	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits

	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must tkae one course from below

Note: null

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one coure from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits

	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Environmental Policy & Resources Planning

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Environmental Policy & Resources Planning

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: More detailed information about the Environmental Policy & Resource Planning track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216, SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one cousre from below

	Course	**Credits**
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits

	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Scince

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	Credits
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits

	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Environmental Policy & Resources Planning

Rule: Can take these track courses

Note: Suggested courses in Environmental Policy and Resources Planning. Please see more detailed description of this track online and talk with your faculty advisor about which courses to take in this track.

	Course	**Credits**
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
	ECNS 202S - Principles of Macroeconomics Offered every term. Prereq., ECNS 201S. The determination of the level of national economic activity, inflation, economic instability, the role of money and financial institutions, and selected topics in public economic policy.	3 Credits
	ECNS 433 - Economics of the Environment Offered intermittently. Prereq., ECNS 201S. Outlines a theoretical framework for the analysis of environmental problems, including concepts of market failure and externalities, materials balance and property rights. The policy implications of this analytical model are explored for a range of topics including pollution and the preservation of natural environments and species. Formally cross-listed with EVST 440.	3 Credits
	ENST 367 - Envr Politics & Policies Offered autumn. Foundation in public lands history, bedrock environmental laws, policy processes and institutions. Research and analysis of current environmental and natural resource policy issues. Focus is domestic illustrated by case studies.	3 Credits

	ENST 382 - Environmental Law Offered spring. Introduction to the history, law and theory of environmental regulation in the United States using public and private land regulation mechanisms as case studies. Basic principles of constitutional and administrative law relevant to environmental regulation, substantive public and private land use law and the history of environmental problems and their regulation.	3 Credits
	FORS 320 - Forest Environmental Economics Offered autumn. Prereq., ECNS 201S; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. Economic techniques to support decision making about the allocation of scarce resources, and management of forests for timber and other ecosystem services.	3 Credits
	GPHY 335 - Water Policy Offered autumn. Prereq., WRIT 101 or WRIT 201, and one Intermedite Writing Course or consent of instructor. Exploration of water resources issues facing the public, resource managers, and water users in the western United States today. Examines concepts, terms, and regulatory environment which provide the foundation for modern water management and policy.	3 Credits
	GPHY 465 - Planning Princ & Processes Offered autumn even-numbered years. Prereq., upper-division or graduate standing. Surveys planning principles, practices and issues in urban and rural environments. Attention is devoted to Montana, state planning programs in the United States., and federal programs and policies that influence land-use planning. Emphasizes skills and techniques used in plan development and implementation.	3 Credits
	GPHY 466 - Environmental Planning Offered autumn odd-numbered years. Introduction to practice of environmental planning which includes elements of physical planning, planning design at the landscape scale, and conservation planning. Includes field visits and project-based work.	3 Credits
	NRSM 121S - Nature of Montana Offered autumn. An exploration of the major natural resource management issues facing the people of Montana and the social processes to manage environmental conflicts. Provides an introduction to the function of ecological systems and the impacts of human uses on the environment and looks at strategies for addressing global climate change, ex-urban population growth, and protecting environmental quality.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits

	NRSM 425 - Nat Res & Envir Economics Offered alternate spring. Prereq., ENSC 201S or FORS 320; and M 115, M 121, M 122, M 151, M 162, M 171, or 172. Introduction to analytical approaches for economic analysis of management of non-renewable resources, fisheries, forests, threatened and endangered species, and the atmosphere.	3 Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 332 - Global Environmental Pol. Offered fall. Prereq. PSCI 230X and junior standing or consent of instructor. This course focuses on the unique set of collective action problems faced by global actors in the governance of the environment and the institutions they use to overcome those problems. Themes include the tragedy of the commons, climate change, and environmental security.	3 Credits
	PSCI 361 - Public Administration Offered autumn. Prereq., PSCI 210S and junior standing. Legal and institutional setting of the administrative system; dynamics of organization and processes of public management.	3 Credits
	PSCI 461 - Administrative Law Offered autumn. Prereq., PSCI 210S and junior standing. The legal foundations of public administration with emphasis on legislative delegation, administrative rulemaking and adjudication, judicial review, and public participation.	3 Credits
	WILD 275 - Wildlife Conservation Offered spring. Prereq., sophomore standing or consent of instr. Principles of animal ecology and framework of wildlife administration as a basis for the conservation of wild birds and animals, and biodiversity. Intended for non-wildlife biology majors.	2 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		64 Total Credits Required

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits

	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits

	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note:

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits

	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

International Conservation

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: International Conservation

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: Students in this track typically complete the International Development Studies Minor (www.cas.umt.edu/IDS). More detailed information about the International Conservation track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216, SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one course from below

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits

	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	Credits
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits

	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

International Conservation

Rule: Can take these track courses

Note: Students in this track typically complete the International Development Studies Minor (www.cas.umt.edu/IDS). More detailed information about the International Conservation track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

	Course	**Credits**
	ENST 225 - Community & Enviornment Offered autumn. Same as SOCI 225. Exploration of the ways that communities address their environmental concerns. Introduction of relevant social science concepts.	3 Credits
	ENST 396 - Supervised Internship (PEAS) (R-10) Offered Fall (2 cr.), Spring (2 cr.); Summer intensive, (6 cr.). Students learn small scale sustainable vegetable farming in a hands-on work environment at the PEAS farm (15 minute bike ride from campus). Lectures, readings and reflection inform the work. Summer students also visit local farms on once-a-week field trips. PEAS is repeatable, as the curriculum changes across the season, and students can attend any semester, though the 6 credit summer intensive course is the heart of the program.	0 To 10 Credits
	ENST 480 - Food, Agriculture, Environment Offered spring. Exploration of the premise that agricultural sustainability requires practices, policies, and social arrangements that balance concerns of environmental soundness, economic viability, and social justice among all sectors of society.	3 Credits

	ENST 487 - Globalization, Justice & Envir Offered autumn. Study of current trends in economic globalization and its effects on efforts to work for social justice and environmental sustainability, particularly in the Global South. Examination of different models and theories of globalization, analysis of ethical issues raised, and assessment of alternatives proposed.	3 Credits
	ENST 493 - Study Abroad: Envir Justice LA Offered intermittently. Two week travel seminar to one or more Latin American countries to examine Latin American perspectives on environmental justice and efforts toward sustainable development within the context of the global economy and U. S. foreign policy. Required one-credit seminar offered spring semester to provide background readings.	3 Credits
	GPHY 432 - Human Role Environ Change Offered intermittently. A systematic examination of the ways in which the major physical systems and ecosystems of the earth have been modified by human activity, and approaches to the rehabilitation of these systems.	3 Credits
	GPHY 434 - Food and Famine Offered intermittently. Exploration of the production, distribution, and consumption of food; the causes and consequences of hunger; and measures that might be taken to relieve hunger.	3 Credits
	NRSM 170 - International Envir. Change Offered spring. An introduction to natural and anthropogenic environmental change from ancient to contemporary times. Exploration of the historical role and importance of ecological disturbance on the development and maintenance of terrestrial ecosystems around the world. Introduction to fields of study available in the College of Forestry and Conservation.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits

	PTRM 345X - Sustaining Human Soc & Nat Env Offered Winter and Summer. These field-based, experiential classes focus on the environmental and conservation concerns, as well as the modern and traditional cultures, of Australia, New Zealand, or Fiji.	3 To 6 Credits
	PTRM 353 - Tourism & Sustnbility Himalaya Offered summer only. Coreq. NRSM 352. In this course we will explore the opportunities and challenges of development with particular reference to nature-based tourism and sustainability in an isolated but rapidly globalizing region of the Himalaya. Students will learn through extensive readings, class discussions, direct field experience (including living in a remote mountain village), meetings with development officials, sustainability activists and stakeholders in the region.	3 Credits
	PTRM 451 - Tourism & Sustainability Offered spring. Prereq., PTRM 210, or consent of instructor. Theories and conceptual models are applied to analyzing relationships between the integration of planning theories to sustainability concepts.	3 Credits
	WILD 460 - Internat Wildlife Cons Issues Offered spring. Prereq., a course in wildlife biology and/or conservation biology. Review of major international wildlife conservation issues with emphasis on the social context of the issues and applied solutions.	2 Credits
Minimum Required Grade: C-		44 Total Credits Required

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	**Credits**
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits

	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits
	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits

	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits

	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	**Credits**

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits

	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Natural Resource Economics

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Natural Resource Economics

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: More detailed information about the Natural Resource Economics track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216 or SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one course from below

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits

	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	**Credits**
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	**Credits**

	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	**Credits**
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Natural Resource Economics

Rule: Can take these track courses

Note: Suggested courses in Natural Resource Economics. Please see ore detailed description of this track online and talk with your faculty advisor about which courses to take in this track.

	Course	Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
	ECNS 202S - Principles of Macroeconomics Offered every term. Prereq., ECNS 201S. The determination of the level of national economic activity, inflation, economic instability, the role of money and financial institutions, and selected topics in public economic policy.	3 Credits
	ECNS 217X - Issues in Economic Development Offered intermittently. Prereq., ECNS 201S. Study of the processes of economic growth and development in the less developed world.	3 Credits
	ECNS 301 - Intermediate Micro with Calc Offered spring and autumn. Prereq., ECNS 201S and M 162 or equiv. Analysis of consumer behavior, production, factor pricing, externalities and public goods.	3 Credits
	ECNS 302 - Intermediate Macroeconomics Offered autumn and spring. Prereq., ECNS 202S. Analysis of national income determination, unemployment, and inflation with emphasis on the role of fiscal and monetary policy.	3 Credits
	ECNS 403 - Introduction to Econometrics Offered autumn. Prereq., an introductory statistics course. Quantitative methods in economics with emphasis on regression analysis.	4 Credits

	ECNS 433 - Economics of the Environment Offered intermittently. Prereq., ECNS 201S. Outlines a theoretical framework for the analysis of environmental problems, including concepts of market failure and externalities, materials balance and property rights. The policy implications of this analytical model are explored for a range of topics including pollution and the preservation of natural environments and species. Formally cross-listed with EVST 440.	3 Credits
	ECNS 445 - Int Env Econ & Clim Change Offered autumn every other year. Same as CCS 445. Prereq., ECNS 201S. An introduction to the economics of various policy approaches towards climate change and other international environmental issues such as trans-boundary pollution problems, international trade and the environment and pollution haven hypothesis.	3 Credits
	ENST 230H - Nature and Society UM campus course offered spring. Explores the relationship between ideas about nature and the development of political and social ideas, institutions, and practices, primarily in western (Euro-American) society. Complements ethics offerings in philosophy aimed at environmental studies majors.	3 Credits
	ENST 480 - Food, Agriculture, Environment Offered spring. Exploration of the premise that agricultural sustainability requires practices, policies, and social arrangements that balance concerns of environmental soundness, economic viability, and social justice among all sectors of society.	3 Credits
	FORS 320 - Forest Environmental Economics Offered autumn. Prereq., ECNS 201S; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. Economic techniques to support decision making about the allocation of scarce resources, and management of forests for timber and other ecosystem services.	3 Credits
	FORS 436 - Project Appraisal Offered autumn. Prereq., FORS 320 or consent of instructor. A suite of techniques, collectively referred to as project appraisal methods, facilitate evaluation of alternative projects. In this applied, computer laboratory-based course, students will become familiar with the use of discounted cash flow analysis and mathematical programing to evaluate proposed courses of action and recommend the economically efficient alternative. Skills will be developed applying these techniques to problems faced by natural resource managers and policy-makers.	3 Credits
	GPHY 323S - Econ. Geog. of Rural Areas Offered spring odd-numbered years. Study of the location of economic activities, including agriculture, industry, and services. Focus on the changing nature of rural areas.	3 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits

	NRSM 121S - Nature of Montana Offered autumn. An exploration of the major natural resource management issues facing the people of Montana and the social processes to manage environmental conflicts. Provides an introduction to the function of ecological systems and the impacts of human uses on the environment and looks at strategies for addressing global climate change, ex-urban population growth, and protecting environmental quality.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 425 - Nat Res & Envir Economics Offered alternate spring. Prereq., ENSC 201S or FORS 320; and M 115, M 121, M 122, M 151, M 162, M 171, or 172. Introduction to analytical approaches for economic analysis of management of non-renewable resources, fisheries, forests, threatened and endangered species, and the atmosphere.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits
	SOCI 470 - Environmental Sociology Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
	WILD 275 - Wildlife Conservation Offered spring. Prereq., sophomore standing or consent of instr. Principles of animal ecology and framework of wildlife administration as a basis for the conservation of wild birds and animals, and biodiversity. Intended for non-wildlife biology majors.	2 Credits
Minimum Required Grade: C-		64 Total Credits Required

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits

	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits

	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits

	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Sustainable Livelihoods & Community Conservation

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Sustainable Livelihoods & Community Conservation

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: More detailed information about the Sustainable Livelihoods & Community Conservation track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Chemistry

Rule: Must take the following couse

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216 or SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one course from below

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits

	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	Credits
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits

	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Sustainable livelihoods and Community Conservation

Rule: Can take these track courses

Note: Suggested courses in Sustainable Livelihoods and Community Conservation. Please see more detailed description of this track online and talk with your faculty advisor about which courses to take in this track.

	Course	**Credits**
	COMX 347 - Rhetoric Nature & Environmtlsm Offered every other year. Same as ENST 377. Survey of rhetorical texts that shape public understanding of nature and environmental issues. Analysis of a range of historical and contemporary environmental texts using theoretical concepts from the rhetorical tradition.	3 Credits
	ECNS 433 - Economics of the Environment Offered intermittently. Prereq., ECNS 201S. Outlines a theoretical framework for the analysis of environmental problems, including concepts of market failure and externalities, materials balance and property rights. The policy implications of this analytical model are explored for a range of topics including pollution and the preservation of natural environments and species. Formally cross-listed with EVST 440.	3 Credits
	ENST 225 - Community & Enviornment Offered autumn. Same as SOCI 225. Exploration of the ways that communities address their environmental concerns. Introduction of relevant social science concepts.	3 Credits
	ENST 480 - Food, Agriculture, Environment Offered spring. Exploration of the premise that agricultural sustainability requires practices, policies, and social arrangements that balance concerns of environmental soundness, economic viability, and social justice among all sectors of society.	3 Credits

	ENST 489S - Env. Justice Iss & Solut Offered autumn. Examination of evidence, causes and consequences of social inequality in the distribution of environmental risks and in access to natural resources and environmental amenities. Community, government and industry responses and service approaches for addressing environmental inequities.	3 Credits
	GPHY 323S - Econ. Geog. of Rural Areas Offered spring odd-numbered years. Study of the location of economic activities, including agriculture, industry, and services. Focus on the changing nature of rural areas.	3 Credits
	GPHY 432 - Human Role Environ Change Offered intermittently. A systematic examination of the ways in which the major physical systems and ecosystems of the earth have been modified by human activity, and approaches to the rehabilitation of these systems.	3 Credits
	GPHY 468 - Community & Regional Analysis Offered autumn. Coreq., GPHY 469. Socio-demographic analysis of communities and regions: population, employment, and spatial interaction. Hands-on course designed for future planners, GIS analysts, and others interested in socio-demographic change. To succeed in this course students should have comfort with basic algebra.	3 Credits
	NRSM 170 - International Envir. Change Offered spring. An introduction to natural and anthropogenic environmental change from ancient to contemporary times. Exploration of the historical role and importance of ecological disturbance on the development and maintenance of terrestrial ecosystems around the world. Introduction to fields of study available in the College of Forestry and Conservation.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PHL 422 - Environmental Philosophy Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Critical exploration of selected philosophical and literary texts pertinent to the ethics of human relationships with the natural environment.	3 Credits

	PTRM 451 - Tourism & Sustainability Offered spring. Prereq., PTRM 210, or consent of instructor. Theories and conceptual models are applied to analyzing relationships between the integration of planning theories to sustainability concepts.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 270 - Intro Development Sociology Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.	3 Credits
	SOCI 350 - The Community Offered intermittently. Prereq., SOCI 101S. The study of families, peer groups, neighborhoods, voluntary associations, power structures, social classes and large scale organizations as they come together in local communities.	3 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	SOCI 470 - Environmental Sociology Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
Minimum Required Grade: C-		54 Total Credits Required

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	**Credits**
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits

	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits
	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits

	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits

	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits

	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Watershed Hydrology

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Watershed Hydrology

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: More detailed information about the Watershed Hydrology track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216 or SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one course from below

	Course	**Credits**
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits

	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	**Credits**
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	**Credits**

	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	**Credits**
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Watershed Hydrology

Rule: Can take these track courses

Note: Suggested courses in Watershed Hydrology. Please see more detailed description of this track online and talk with you faculty advisor about which courses to take in this track.

	Course	Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	GEO 101N - Intro to Physical Geology Offered autumn and spring. General geology including the work of wind, flowing water, glacial ice, gravity, earthquakes, volcanoes and plate tectonics in shaping the earth.	3 Credits
	GEO 102N - Intro to Physical Geology Lab Offered autumn and spring. Prereq. or coreq., GEO 101N (preferred) or 105N or 108N. A series of laboratory and field experiences designed around basic geologic processes and materials. Familiarization with common minerals, rocks, land forms, and structures. Intended to provide laboratory experience primarily with GEO 101N, but can be taken with or following any of the other freshman GEO courses listed above.	1 Credits
	GEO 420 - Hydrogeology Offered spring. Prereq., GEO 101N-102N; PHSX 205N/206N or PHSX 215N/216N ; M 162 or 171 strongly recommended or consent of instr. Occurrence, movement, quality, and methods of quantification of groundwater. Geological framework and physics of groundwater flow. Supply, contamination, and management problems.	4 Credits

	GEO 421 - Hydrology Offered autumn. Prereq. one semester college calculus and physics or consent of instructor. Introduction to the physical mechanisms that drive the water cycle at different scales. The course covers heat, momentum and mass transfer and storage mechanisms in turbulent systems and their role in the global and local climates. At the local scale, the equations that govern surface and subsurface water flows are studied. Along with the overarching goals, students will improve their quantitative skills, will gain experience accessing and reading the professional literature and will improve their capabilities to acquire knowledge independently.	3 Credits
	GEO 460 - Process Geomorphology Offered autumn. Prereq., one semester college calculus and physics. Quantitative examination of landforms, runoff generation, weathering, mechanics of soil erosion by water and wind, mass wasting, glacial and periglacial processes and hillslope evolution.	4 Credits
	GPHY 335 - Water Policy Offered autumn. Prereq., WRIT 101 or WRIT 201, and one Intermedite Writing Course or consent of instructor. Exploration of water resources issues facing the public, resource managers, and water users in the western United States today. Examines concepts, terms, and regulatory environment which provide the foundation for modern water management and policy.	3 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	NRSM 385 - Watershed Hydrology Offered autumn and spring. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. An introduction to physical and biological controls over water movement and storage in the environment, and how those controls are affected by land management practices.	3 Credits
	NRSM 415 - Environmental Soil Science Offered spring odd-numbered years Prereq., ENSC 245N or NRSM 210N or consent of instr. A detailed analysis of the physical, chemical and biological properties of soils and how they function, with a focus on soil processes and how they affect, and are affected by human activities. Specific topics include element cycling, water quality, the effects of environmental change soil biogeochemistry, plant-soil interactions, and the consequences of large-scale disturbances on soil processes.	3 Credits

	NRSM 455 - Riparian Ecology & Management Offered intermittently. Prereqs., successful completion or concurrent enrollment in NRSM 385 and completion of one of the following introductory ecology courses: BIOE 172, BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462. Importance of riparian/wetland areas and the complexities associated with their management for short and long term benefits.	3 Credits
	NRSM 485 - Watershed Management Offered intermittently. Prereq., NRSM 385 or consent of instr. Effects of land management practices on water and sediment yields from wildland watersheds. Introduction to statistical methods in hydrology. Introduction to water yield and sediment modeling techniques.	3 Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		53 Total Credits Required

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	**Credits**
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits

	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits
	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits

	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits

	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits

	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Wilderness Studies

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Wilderness Studies

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: To complete this track students must enroll in the Wilderness and Civilization Program. For information and an application see www.cfc.umt.edu/wc.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216, SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take once course from below

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits

	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	**Credits**
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	**Credits**

	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	**Credits**
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Wilderness Studies

Rule: Can take these track courses

Note: To complete this track students must enroll in the Wilderness and Civilization Program. For information and an application see www.cfc.umt.edu/wc. Please talk to a faculty advisor about additional coursework in this track.

	Course	Credits
	ARTZ 394A - Seminar- Environmental Drawing Offered intermittently. Seminar designed for the Wilderness and Civilization program based on WCP curriculum. Investigation of individual ideas through a variety of media.	3 Credits
	LIT 280L - Ecology of Literature Literary study of nature writing and other genres introducing an ecocritical perspective, with revolving Anglophone texts.	3 Credits
	MUSI 304A - Sound in the Natural World Offered even-numbered years. This is a music composition and performance course that explores sound/music in relation to wilderness. Students will learn from cultures that have stayed in contact with their natural environment and will create compositions from materials collected in the field and will perform and critique them. As a result, students will become familiar with their own creative process.	3 Credits
	NASX 303E - Ecol Persp in Nat Amer Trad Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources.	3 Credits
	NRSM 271N - Conservation Ecology Offered autumn. An overview of ecological concepts and how ecology is applied to further our understanding of ecosystems and conservation. Topics include: ecosystems functions and values, biomes, natural selection and speciation, biodiversity, succession, climate change, fragmentation, protected areas, impacts of exotic species and other human influences on ecosystem functions.	3 Credits

	NRSM 273 - Wilderness/Civ Field Stds (R-6) Offered autumn and spring. Field studies in ecology and conservation. Includes natural history, field journaling, ecological monitoring, protected area management, and community conservation. One-day trips as well as extended backcountry trips. Part of the Wilderness and Civilization program.	1 To 3 Credits
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 371 - Wilderness Issues Lect Series (R-3) Offered spring. Explores current issues in wilderness preservation, management and research.	1 Credits
	NRSM 373 - Wilderness and Civilization (R-6) Offered autumn and spring. Social and cultural perspectives on the wilderness idea and wildland practices. Course topics include history of wilderness and the wilderness movement, various philosophical viewpoints on wilderness, protected area management issues, and how wilderness fits into larger landscapes and societies. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 398 - Internship Offered every term. Prereq., consent of department. Extended classroom experience that provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one curse is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	**Credits**
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits

	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits
	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits

	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits

	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	**Credits**

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits

	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Wildland Fire Management

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Wildland Fire Management

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: Student in this track typically complete the Wildland Fire Sciences & Management Minor (www.cfc.umt.edu/FireSciences). Please see more detailed description of this track online and talk with your faculty advisor about which courses to take.

Professional Writing

Rule: Must take the following course

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216, or SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one course from below

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communications

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits

	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	**Credits**
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	**Credits**

	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	**Credits**
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Wildland Fire Managment

Rule: Can take these track courses

Note: Student in this track typically complete the Wildland Fire Sciences & Management Minor (www.cfc.umt.edu/FireSciences). Please see more detailed description of this track online and talk with your faculty advisor about which courses to take.

	Course	Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
	ERTH 303N - Weather and Climate Offered spring. Same as CCS 303N. Origin, composition, structure, and dynamics of the atmosphere, gas and radiation laws, energy budget and balance, weather elements, North American weather systems, and climate change. To succeed in this course students should have comfort with basic algebra.	3 Credits
	FORS 202 - Forest Mensuration Offered spring. Prereq., FORS 201 or STAT 216 or SOCI 202 or WILD 240; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. The theory and practice of timber inventory and growth projection, including field measurements, sampling procedures, statistical methods, inventory compilation, and stand growth simulation under specified management prescriptions. Stand growth under specified management prescriptions.	3 Credits
	FORS 230 - Forest Fire Management Offered spring. Fire as an ecological factor in Western forests is presented. Fire weather, the measurement of fire weather, and the factors of fuel, weather and topography that influence fire behavior, and fire management decisions are included. NFDRS, state and national fire policy evolutions are discussed. Basic fire suppression tactics are also presented.	2 Credits

	FORS 232 - Forest Insects & Diseases Offered spring. Identification, significance of and remedies for insect infestations and infectious and non-infectious diseases of forests and forest products.	2 Credits
	FORS 241N - Dendrology Offered autumn and spring. Suggested coreq., FORS 240. Methods and techniques for identifying the major families of North American trees, based on gross morphological and anatomical features. Building and use of identification keys.	3 Credits
	FORS 320 - Forest Environmental Economics Offered autumn. Prereq., ECNS 201S; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. Economic techniques to support decision making about the allocation of scarce resources, and management of forests for timber and other ecosystem services.	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 331 - Wildland Fuel Management Offered autumn. Prereq., FORS 230 or consent of instr. The fire ecology of some western vegetation types is discussed. Elements of the principles of wildland fuel management are presented. Prescribed fire use and mechanical manipulation are matched to historic ecosystem processes. Smoke management considerations and health issues are also presented.	3 Credits
	FORS 333 - Basic&Applied Fire Ecology Offered spring. Prereq., FORS 230. A detailed, analysis of fire ecology in terrestrial ecosystems with a focus on the Rocky Mountains, including fire history, fire effects, landscape pattern, land use legacies, and management implications.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 351 - Env Remote Sensing Offered spring. The theory and application of photo- and electro-optical remote sensing for mapping resources and developing information systems.	3 Credits
	FORS 481 - Forest Planning Offered spring. Prereq., FORS 320; FORS 347 or FORS 349 or consent of instr. Integrated multiple use planning at the forest-wide level: defining multi-resource management goals, generating management alternatives, projecting outcomes, assessing environmental impacts, and implementing preferred option.	3 Credits

	FORS 495 - Wildland RxFire Practicum Offered wintersession. Co-convened with FORS 544. Prereq. Fire experience and Consent of Instructor. An intensive field course providing students with technical training, practical applications, and theoretical foundations in ecological burning for restoration purposes. Class is typically held in southeastern United States.	3 Credits
	FORS 533 - Use Fire Wldland Mgmt Offered autumn. Prereq., consent of instr. Evolution of federal fire policy is discussed. Western fire ecology and the planned use of fire for wildlife, range, and forest applications of prescribed fire are presented. Fire behavior and a fire science vocabulary are introduced. Students review literature, present seminars, and lead discussions. Level: Graduate	3 Credits
	GEO 101N - Intro to Physical Geology Offered autumn and spring. General geology including the work of wind, flowing water, glacial ice, gravity, earthquakes, volcanoes and plate tectonics in shaping the earth.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	NRSM 265 - Elements of Ecological Restora Offered autumn. Prereq., one course in the ecological or biological sciences: BIOO 105N, BIOB 160N, BIOB 170N, BIOB 172, BIOE 370, BIOE 428, BIOE 447 or BIOE 448; or FORS 330; or NRSM 271N or NRSM 462 or consent of instructor. Overview of the natural and social science elements of ecological restoration, including the ecological foundations of restoration, practices used to restore terrestrial and aquatic habitats, philosophical and ethical challenges involved, and current initiatives in Montana and the United States. Includes Saturday field trips.	3 Credits
	NRSM 385 - Watershed Hydrology Offered autumn and spring. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. An introduction to physical and biological controls over water movement and storage in the environment, and how those controls are affected by land management practices.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits

	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		74 Total Credits Required

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is require): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	**Credits**
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits

	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits
	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits

	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Rangeland Management & Grassland Ecology

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Science - Resource Conservation; Track: Range Management & Grassland Ecology

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: More detailed information about the Range Management & Grassland Ecology track can be found on our website: www.cfc.umt.edu/rc. Please talk with your faculty advisor about which courses to take in this track.

Professional Writing

Rule: Must take the following course

	Course	Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry

Rule: Must take the following course

Note: null

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Quantitative and Spatial Analysis

Rule: Must take three of the following courses and one must be a statistics course (FORS 201, STAT 216, or SOCI 202)

Note: FORS 250 is highly recommended
Can take STAT 216 Statistics or SOCI 202 Social Statistics in place of FORS 201.

	Course	Credits

	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

Biology

Rule: Must take one course from below

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Communicatins

Rule: Must take one course from below

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physical Science

Rule: Must take the following course

	Course	Credits

	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology

Rule: Must take one course from below

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Policy

Rule: Must take one course from below

	Course	Credits
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Social Science

Rule: Must take one course from below

	Course	Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits

	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Additional Coursework

Rule: Must take at least 36 traditional letter-graded credits from the College of Forestry and Conservation (NRSM, WILD, FORS, PTRM, CCS 103, CCS 352, CCS 391)

Note: Must take 10 credits of foreign language, unless a student tests out of one or more semester, OR 9.0 credits additional coursework in natural resource management, environmental science, or conservation relevant to the student's track/emphasis within the major (these 9.0 credits are in addition to the 36 traditional letter-graded College of Forestry and Conservation credits described just above.
Students double majoring with Resource Conservation and Ecological Restoration, Forestry, Wildlife Biology, and Parks, Tourism and Recreation Management must take an additional 9.0 credits in FORS, NRSM, PTRM, and WILD in addition to courses required by either of their majors. These additional 9.0 credits will be relevant to the student's track/emphasis with the major.

Minimum Required Grade: C-

Range Management & Grassland Ecology

Rule: Can take these track courses

Note: Suggested courses in Range Management & Grassland Ecology. Please see more detailed description of this track online and talk with your faculty advisor about which courses to take in this track.

	Course	Credits

	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	BIOE 458 - Forest and Grassland Ecol Offered summers only at Flathead Lake Biological Station. Prereq., BIOE 342 or BIOE 370/371. Patterns and processes of the forests and grasslands of the northern Rocky Mountains in the context of principles of population community and ecosystem ecology.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
	BIOO 335 - Rocky Mountain Flora Offered spring. Prereq., one college-level course in Biology or consent of instr. Elements of the evolution, geography and natural affinities of flowering plants. Identification using a manual of native plants of Montana.	3 Credits
	BIOO 433 - Plant Physiology Offered spring. Prereq., BIOB 260 or consent of the instructor. The molecular, biochemical and biophysical basis of plant function, from the subcellular to the whole organism level.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
	FORS 230 - Forest Fire Management Offered spring. Fire as an ecological factor in Western forests is presented. Fire weather, the measurement of fire weather, and the factors of fuel, weather and topography that influence fire behavior, and fire management decisions are included. NFDRS, state and national fire policy evolutions are discussed. Basic fire suppression tactics are also presented.	2 Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	FORS 333 - Basic&Applied Fire Ecology Offered spring. Prereq., FORS 230. A detailed, analysis of fire ecology in terrestrial ecosystems with a focus on the Rocky Mountains, including fire history, fire effects, landscape pattern, land use legacies, and management implications.	3 Credits

	NRSM 121S - Nature of Montana Offered autumn. An exploration of the major natural resource management issues facing the people of Montana and the social processes to manage environmental conflicts. Provides an introduction to the function of ecological systems and the impacts of human uses on the environment and looks at strategies for addressing global climate change, ex-urban population growth, and protecting environmental quality.	3 Credits
	NRSM 265 - Elements of Ecological Restora Offered autumn. Prereq., one course in the ecological or biological sciences: BIOO 105N, BIOB 160N, BIOB 170N, BIOB 172, BIOE 370, BIOE 428, BIOE 447 or BIOE 448; or FORS 330; or NRSM 271N or NRSM 462 or consent of instructor. Overview of the natural and social science elements of ecological restoration, including the ecological foundations of restoration, practices used to restore terrestrial and aquatic habitats, philosophical and ethical challenges involved, and current initiatives in Montana and the United States. Includes Saturday field trips.	3 Credits
	NRSM 360 - Rangeland Mgt (equiv 260) Offered autumn. Prereq., junior standing or consent of instr. An introduction to rangelands and their management, grazing influences, class of animal, grazing capacity, control of livestock distribution, improvements, competition and interrelationships with wildlife. Laboratory exercises to gain on-site experience on topics and concepts presented in lectures.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 385 - Watershed Hydrology Offered autumn and spring. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. An introduction to physical and biological controls over water movement and storage in the environment, and how those controls are affected by land management practices.	3 Credits
	NRSM 455 - Riparian Ecology & Management Offered intermittently. Prereqs., successful completion or concurrent enrollment in NRSM 385 and completion of one of the following introductory ecology courses: BIOE 172, BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462. Importance of riparian/wetland areas and the complexities associated with their management for short and long term benefits.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits

	WILD 275 - Wildlife Conservation Offered spring. Prereq., sophomore standing or consent of instr. Principles of animal ecology and framework of wildlife administration as a basis for the conservation of wild birds and animals, and biodiversity. Intended for non-wildlife biology majors.	2 Credits
Minimum Required Grade: C-		

Writing

Rule: Must take both lower-division courses (WRIT 101 and NRSM 200) and at least 3 courses at the upper-division level listed below

Note: The following courses count for the entire upper-division writing requirement (only one course is required): PTRM 451W Tourism and Sustainability, PTRM 482W Wilderness and Protected Area Mgmt.

	Course	Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	FORS 341 - Timber Harvesting & Roads Offered spring. Prereq., NRSM 200 or WRIT 222. An overview of harvesting system capabilities and selection for multiple resource objectives. Fundamentals of forest road management. Best management practices as they apply to forest operations in Montana and the western United States.	3 Credits
	FORS 342 - Wood Anatomy, Properties, & ID Offered spring. Prereq., BIOO 105N or FORS 240 or FORS 241N. Lecture and laboratory investigation of the structure, identification and physical and mechanical properties of the commercial tree species of North America.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits

	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits
	FORS 499 - Senior Thesis Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 444 - Ecological RestorationCapstone Offered spring. Prereq., junior or senior standing in Wildland Restoration and successful completion of NRSM 265 and one advanced ecology course: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; and completion or concurrent enrollment in NRSM 365. This service-learning course teaches students about designing and implementing restoration and monitoring projects. The course includes lectures, labs, and hands-on experience working with ecologists and restoration practitioners from local government agencies, NGOs, or other organizations.	5 Credits

	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	NRSM 499 - Senior Thesis (R-3) Offered autumn and spring. Prereq., senior standing and consent of instr. Preparation of a major paper based on study or research in a field selected according to the needs and objectives of the student.	1 To 3 Credits
	PTRM 300 - Recreation Behavior Offere spring. Prereq., PTRM 217S. This course provides an understanding of recreation behavior in wildland and nature-based tourism oriented settings. Students will learn about theories/conceptual frameworks from social and environmental psychology and their application to visitor management issues in the wildland recreation and nature-base tourism fields.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Math

Rule: Must take one course from below

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Symbolic System

Rule: Must take one course from below

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Expressive Arts

Rule: Must take one course from below

Note: null

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	THTR 120A - Introduction to Acting I Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethical & Human Values

Rule: Must take one course from below

	Course	Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences in Major

Rule: Must take all courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	NRSM 210N - Soils, Water and Climate Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. The factors affecting earth's terrestrial ecosystems are rapidly changing, and understanding their impact on ecosystem services to humanity is becoming increasingly important and yet complex. In this course, students will explore how climate, water and soils interact to shape Earth's biosphere. We will introduce students to a number of fundamental concepts in climate, hydrology, and soil science to gain a comprehensive view of the factors that shape and affect all terrestrial ecosystems. Through a series of lectures and field-based laboratories, students will be introduced to the fundamental principles of climate and hydrology that influence soil development, how they vary across small spatial scales, and how these physical, chemical, and biological processes interact to affect soil development. Ultimately, this class will introduce students to intimate relationship between climate, water, and soils, and how they interact to affect patterns of vegetation we see across the biosphere.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Wildlife Biology

Chad Bishop, Wildlife Biology; Director

The Wildlife Biology Program combines the best features of a liberal arts curriculum with scientific preparation in wildlife conservation. The Program provides students with an extensive knowledge in ecology, population biology, conservation biology, and critical thinking and quantitative skills. Our students receive a strong academic and scientific background with an emphasis on hands-on, experiential learning. The educational requirements for certification by The Wildlife Society can be met within the framework of the undergraduate program.

While some employment opportunities exist in wildlife conservation for students with the baccalaureate degree, we encourage students to continue their education through the master's degree to qualify for most state, federal, and private positions.

Three optional curricula are offered in the Wildlife Biology Program: terrestrial, aquatic, and honors. All three options follow the same schedule of courses for the freshman and most of the sophomore year and then pursue different curricula for the last two years. Each leads to a B.S. in Wildlife Biology. The University is well-suited for instruction in wildlife biology because of the excellent opportunities for field instruction and research at Lubrecht Experimental Forest, Flathead Lake Biological Station, and the Theodore Roosevelt Memorial and Bandy ranches. The Montana Forest and Conservation Experiment Station, the Division of Biological Sciences, and the Montana Cooperative Wildlife Research Unit facilitate research.

The honors curriculum is designed particularly for students with strong academic records who intend to do graduate work. Entrance into this emphasis is open only to students who, at the beginning of the junior year of the wildlife biology program, have a grade-point average of 3.5 or above and who petition the faculty for entrance.

High School Preparation: In addition to general University admission requirements, the student should elect four years of mathematics and three years of science, including biology, chemistry and physics.

Honors students must complete either WILD 370, 470 and 494 (terrestrial option) or BIOO 340, BIOE 428 and WILD 494 (aquatic option). Honors students are encouraged to enroll also in WILD 499 Senior Thesis. The balance of the coursework for the junior and senior years will be developed in consultation with the honors student's faculty advisor and committee.

All students in the honors emphasis are required to meet with their faculty advisor prior to autumn semester registration of their junior and senior years to work out their course schedules.

Department Faculty

Professor

Chad Bishop, Director, Wildlife Biology Program
Ragan Callaway, Professor
Erick Greene, Professor
L. Scott Mills, Associate Vice President of Research for Global Change and Sustainability
Dave Naugle, Professor Large Scale Wildlife Ecology

Associate Professor

Creagh Breuner, Professor
Lisa Eby, Associate Professor of Aquatic Vertebrate Ecology; Undergraduate Program Director, Ecosystem Science & Restoration
Mark Hebblewhite, Associate Professor of Ungulate Habitat Ecology
Winsor Lowe, Associate Professor

Assistant Professor

Jedediah Brodie, Assistant Professor; John Craighead Endowed Chair of Conservation
Zachary Cheviron, Assistant Professor
Victoria Dreitz, Assistant Professor, Wildlife Biology Program; Director, Avian Science Center
Jeffrey Good, Assistant Professor
Angela Luis, Assistant Professor of Population & Disease Ecology
Paul M. Lukacs, Associate Professor of Quantitative Wildlife Ecology
Andrew Whiteley, Assistant Professor of Fisheries & Conservation Genomics

Adjunct

Thomas E Martin, DBS Associated Faculty
Mike Mitchell, Unit Leader, Montana Cooperative Wildlife Research Unit; Adjunct Professor

Affiliates

Michael Schwartz, Adjunct Reseach Assistant Professor of Wildlife Biology

Daniel Pletscher, Professor of Wildlife Biology, Emeritus

Aquatic Wildlife Biology

Chad Bishop, Wildlife Biology Director

The Wildlife Biology Program combines the best features of a liberal arts curriculum with scientific preparation in wildlife conservation. The Program provides students with an extensive knowledge in ecology, population biology, conservation biology, and critical thinking and quantitative skills. Our students receive a strong academic and scientific background with an emphasis on hands-on, experiential learning. The educational requirements for certification by The Wildlife Society can be met within the framework of the undergraduate program.

While some employment opportunities exist in wildlife conservation for students with the baccalaureate degree, we encourage students to continue their education through the master's degree to qualify for most state, federal, and private positions.

Three optional curricula are offered in the Wildlife Biology Program: terrestrial, aquatic, and honors. All three options follow the same schedule of courses for the freshman and most of the sophomore year and then pursue different curricula for the last two years. Each leads to a B.S. in Wildlife Biology. The University is well-suited for instruction in wildlife biology because of the excellent opportunities for field instruction and research at Lubrecht Experimental Forest, Flathead Lake Biological Station, and the Theodore Roosevelt Memorial and Bandy ranches. The Montana Forest and Conservation Experiment Station, the Division of Biological Sciences, and the Montana Cooperative Wildlife Research Unit facilitate research.

High School Preparation: In addition to general University admission requirements, the student should elect four years of mathematics and three years of science, including biology, chemistry and physics.

Wildlife Biology Honors Track

The honors curriculum is designed particularly for students with strong academic records who intend to do graduate work. Entrance into this emphasis is open only to students who, at the beginning of the junior year of the wildlife biology program, have a grade-point average of 3.5 or above and who petition the faculty for entrance.

Honors students must complete either WILD 370, 470 and 494 (terrestrial option) or BIOO 340, BIOE 428 and WILD 494 (aquatic option). Honors students are encouraged to enroll also in WILD 499 Senior Thesis. The balance of the coursework for the junior and senior years will be developed in consultation with the honors student's faculty advisor.

All students in the honors emphasis are required to meet with their faculty advisor prior to autumn semester registration of their junior and senior years to work out their course schedules.

Bachelor of Science - Wildlife Biology; Aquatic Option

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 84

Required Cumulative GPA: 2.5

Note: Experiential Learning is required - Students have several options to fulfill this requirement - list is available from the Wildlife Advisor in Forestry 103C

Major Required Courses

Rule: Must take all courses

Note: Can take WRIT 325 Science Writing / Honors in place of NRSM 200
One out of the four is required: BIOE 406/409, BIOM 427/428, BIOO 462, WILD 485

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
	BIOB 272 - Genetics and Evolution Offered spring. Prereq., either BIOB 260 OR both BIOB 160N and BIOB 170N/171N; and one of M 121, 122, 151, 162, or 171. Principles and mechanisms of inheritance and evolution. Population genetics, fossil record, macroevolution, speciation, extinction, systematics, molecular evolution.	4 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	WILD 180 - Careers in Wildlife Biology Offered autumn and spring. Subject matter and fields of study within wildlife biology conservation and management. Topics to include wildlife ecology, aquatic ecology, human dimensions, conservation and management, and other opportunities for careers in wildlife biology.	2 Credits
Minimum Required Grade: C-		5 Total Credits Required

Outside Major Required Courses

Rule: Must take all courses

Note: Can take WILD 240 Into to Biostatistics/Honors in place of STAT 216; Can take WRIT 245 Science Writing/Honors in place of NRSM 200.

Add: BIOE 406 and 409. Students are required to take 1 of 4 courses – BIOE 406 and 409, BIOM 427, BIOM 428, BIOO 462, or WILD 485.

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 123N - Intro to Organic & Biochem Offered autumn and spring. Prereq., "C-" or equiv. in CHMY 121N or consent of instr. Second semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 124N - Intro to Organic & Biochem Lab Offered autumn and spring. Prereq. or coreq., CHMY 123N. Laboratory to accompany CHMY 123N.	2 Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		37 Total Credits Required

Major Required Courses

Rule: Must take all courses

Note: Can take NRSM 422 Policy in place of WILD 410

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	BIOE 371 - Gen Ecology Lab (equiv to 271) Offered autumn. Prereq. or Coreq., BIOE 370 and either STAT 216 or WILD 240. Methods of describing and testing alternative explanations for patterns in nature. The use of scientific methodology in ecology.	2 Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	BIOM 427 - General Parasitology Offered autumn. Prereq., BIOB 272. Parasitism as a biological phenomenon, origin of parasitism, adaptations and life cycles, parasite morphology, fine structure, physiology, parasites and their environment.	2 Credits
	BIOM 428 - General Parasitology Lab Offered autumn. Coreq., BIOM 427. Taxonomy, morphology and identification of parasitic protozoa, helminths and arthropods.	2 Credits
	BIOO 320 - General Botany Offered autumn. Prereq., BIOB 170N-171N, 260. Prereq. or coreq., BIOB 272. Anatomy, morphology, ecology and physiology of photosynthetic organisms.	5 Credits
	BIOO 340 - Biology and Mgmnt of Fishes Offered autumn. Prereq., BIOB 272 and either STAT 216 or WILD 240. Diversity, adaptations and ecology of fishes. Analysis and management of fish populations and communities.	4 Credits
	BIOO 462 - Entomology Offered alternate springs. Prereq. or Coreq., BIOB 272. The classification, morphology, anatomy, development, life-history, behavior and ecology of insects. Labs include identification of major insect groups, internal and external anatomy and student collections.	4 Credits
	NRSM 385 - Watershed Hydrology Offered autumn and spring. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. An introduction to physical and biological controls over water movement and storage in the environment, and how those controls are affected by land management practices.	3 Credits
	WILD 346 - Wildlife Physiological Ecology Offered autumn. Prereq., BIOB 272. Only open to Wildlife Biology Majors. How physiological and biochemical processes in animals influence behavior and ecology. Application of physiological approaches to wildlife conservation such as assessment of animal health, nutritional condition, and physiological performance.	3 Credits

	WILD 408 - Advanced Fisheries Offered spring. Prereq., BIOO 340. Quantitative analysis and interpretation of fish populations and community data for use in management. Selection, application and evaluation of management techniques.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits
	WILD 480 - The Upshot--Appld Wildlife Mgt Offered spring. Prereq/Coreq.,WILD 370 or WILD 470. Designed for students to apply their knowledge in the development of wildlife management planning.	3 Credits
	WILD 485 - Aquatic Invertebrate Ecology Offered autumn. This course is designed to provide students an understanding of the life histories, ecology and importance of macroinvertebrates in freshwater aquatic systems. The primary focus will be on insects, although an introduction to other invertebrates will also be included. The lab portion will involve identification of major groups of aquatic macroinvertebrates and participation in an environmental assessment using invertebrates as indicators of stream condition and restoration efficacy.	3 Credits
	WILD 494 - Senior Wildlife Seminar Offered autumn and spring. Prereq., senior standing in wildlife biology or consent of instr. Analysis and discussion led by students of current topics in wildlife biology.	1 Credits
Minimum Required Grade: C-		19 Total Credits Required

Writing Requirement

Rule: Must complete the following subcategories

12-18 Total Credits Required

Lower Division Writing

Rule: Complete all of the following courses

Note: Can take WRIT 325 Science Writing/Honors OR WRIT 201 College Writing II in place of NRSM 200

	Course	**Credits**
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Upper Division Writing

Rule: Complete BIOE 371 and TWO of the other courses

	Course	Credits
	BIOE 371 - Gen Ecology Lab (equiv to 271) Offered autumn. Prereq. or Coreq., BIOE 370 and either STAT 216 or WILD 240. Methods of describing and testing alternative explanations for patterns in nature. The use of scientific methodology in ecology.	2 Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	BIOO 320 - General Botany Offered autumn. Prereq., BIOB 170N-171N, 260. Prereq. or coreq., BIOB 272. Anatomy, morphology, ecology and physiology of photosynthetic organisms.	5 Credits
	BIOO 470 - Ornithology Offered spring. Prereq. or Coreq., BIOB 272; major of biology, Pre-Wildlife Biology, or Wildlife Biology, and must be of junior or senior standing. The classification, structure, evolution, behavior and ecology of birds.	4 Credits
	BIOO 475 - Mammalogy Offered autumn. Prereq., BIOB 272. The evolution, systematics, anatomy, physiology and ecology of mammals.	4 Credits

	WILD 408 - Advanced Fisheries Offered spring. Prereq., BIOO 340. Quantitative analysis and interpretation of fish populations and community data for use in management. Selection, application and evaluation of management techniques.	3 Credits
	WILD 470 - Conserv of Wildlife Populatns Offered autumn and spring. Prereq., BIOE 370, M 162 or M 171, and senior standing in Biology, Forestry, Resource Conservation, Recreation Management or Wildlife Biology. Application of population ecology principles and theory to the conservation and management of wildlife populations.	3 Credits
	WILD 499 - Thesis (R-6) Offered autumn and spring. Prereq., consent of instr.; senior standing. Preparation of major paper based on study or research of a topic selected with an advisor according to needs and objectives of student.	1 To 3 Credits
Minimum Required Grade: C-		6-12 Total Credits Required

Mathematics Requirement

Rule: must take the following course

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Symbolic Systems

Rule: must take the following courses

Note: Can take WILD 240 Biostatistics/Honors in place of STAT 216

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits

	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Expressive Arts

Rule: Must take the following course

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural Sciences Requirement

Rule: Must take all courses

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 123N - Intro to Organic & Biochem Offered autumn and spring. Prereq., "C-" or equiv. in CHMY 121N or consent of instr. Second semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 124N - Intro to Organic & Biochem Lab Offered autumn and spring. Prereq. or coreq., CHMY 123N. Laboratory to accompany CHMY 123N.	2 Credits

Minimum Required Grade: C-	12 Total Credits Required

Terrestrial Wildlife Biology

Chad Bishop, Wildlife Biology, Director

The Wildlife Biology Program combines the best features of a liberal arts curriculum with scientific preparation in wildlife conservation. The Program provides students with an extensive knowledge in ecology, population biology, conservation biology, and critical thinking and quantitative skills. Our students receive a strong academic and scientific background with an emphasis on hands-on, experiential learning. The educational requirements for certification by The Wildlife Society can be met within the framework of the undergraduate program.

While some employment opportunities exist in wildlife conservation for students with the baccalaureate degree, we encourage students to continue their education through the master's degree to qualify for most state, federal, and private positions.

Three optional curricula are offered in the Wildlife Biology Program: terrestrial, aquatic, and honors. All three options follow the same schedule of courses for the freshman and most of the sophomore year and then pursue different curricula for the last two years. Each leads to a B.S. in Wildlife Biology. The University is well-suited for instruction in wildlife biology because of the excellent opportunities for field instruction and research at Lubrecht Experimental Forest, Flathead Lake Biological Station, and the Theodore Roosevelt Memorial and Bandy ranches. The Montana Forest and Conservation Experiment Station, the Division of Biological Sciences, and the Montana Cooperative Wildlife Research Unit facilitate research.

High School Preparation: In addition to general University admission requirements, the student should elect four years of mathematics and three years of science, including biology, chemistry and physics.

Wildlife Biology Honors - Track

The honors curriculum is designed particularly for students with strong academic records who intend to do graduate work. Entrance into this emphasis is open only to students who, at the beginning of the junior year of the wildlife biology program, have a grade-point average of 3.5 or above and who petition the faculty for entrance.

Honors students must complete either WILD 370, 470 and 494 (terrestrial option) or BIOO 340, BIOE 428 and WILD 494 (aquatic option). Honors students are encouraged to enroll also in WILD 499 Senior Thesis. The balance of the coursework for the junior and senior years will be developed in consultation with the honors student's faculty.

All students in the honors emphasis are required to meet with their faculty advisor prior to autumn semester registration of their junior and senior years to work out their course schedules.

Bachelor of Science - Wildlife Biology; Terrestrial Option

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 74

Required Cumulative GPA: 2.5

Note: Experiential Learning is required - Students have several options to fulfill this requirement - list is available from the Wildlife Advisor in Forestry 103C

Major Required Courses

Rule: Must take all courses

Note: Can take WRIT 325 Science Writing / Honors OR WRIT 201 College Writing II in place of NRSM 200

	Course	Credits

	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
	BIOB 272 - Genetics and Evolution Offered spring. Prereq., either BIOB 260 OR both BIOB 160N and BIOB 170N/171N; and one of M 121, 122, 151, 162, or 171. Principles and mechanisms of inheritance and evolution. Population genetics, fossil record, macroevolution, speciation, extinction, systematics, molecular evolution.	4 Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	WILD 180 - Careers in Wildlife Biology Offered autumn and spring. Subject matter and fields of study within wildlife biology conservation and management. Topics to include wildlife ecology, aquatic ecology, human dimensions, conservation and management, and other opportunities for careers in wildlife biology.	2 Credits
Minimum Required Grade: C-		17 Total Credits Required

Outside Major Required Courses

Rule: Must take all courses

Note: Can take WILD 240 Into to Biostatistics/Honors in place of STAT 216

	Course	**Credits**
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits

	CHMY 123N - Intro to Organic & Biochem Offered autumn and spring. Prereq., "C-" or equiv. in CHMY 121N or consent of instr. Second semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 124N - Intro to Organic & Biochem Lab Offered autumn and spring. Prereq. or coreq., CHMY 123N. Laboratory to accompany CHMY 123N.	2 Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		23 Total Credits Required

Major Required Courses

Rule: Must take all courses

Note: Can take FORS 347 Silviculture in place of NRSM 360; Can take NRSM 422 Policy in place of WILD 410
NOTE - two out of the three are required: BIOO 470, BIOO475, BIOO 340

	Course	**Credits**

	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	BIOE 371 - Gen Ecology Lab (equiv to 271) Offered autumn. Prereq. or Coreq., BIOE 370 and either STAT 216 or WILD 240. Methods of describing and testing alternative explanations for patterns in nature. The use of scientific methodology in ecology.	2 Credits
	BIOO 335 - Rocky Mountain Flora Offered spring. Prereq., one college-level course in Biology or consent of instr. Elements of the evolution, geography and natural affinities of flowering plants. Identification using a manual of native plants of Montana.	3 Credits
	BIOO 340 - Biology and Mgmnt of Fishes Offered autumn. Prereq., BIOB 272 and either STAT 216 or WILD 240. Diversity, adaptations and ecology of fishes. Analysis and management of fish populations and communities.	4 Credits
	BIOO 470 - Ornithology Offered spring. Prereq. or Coreq., BIOB 272; major of biology, Pre-Wildlife Biology, or Wildlife Biology, and must be of junior or senior standing. The classification, structure, evolution, behavior and ecology of birds.	4 Credits
	BIOO 475 - Mammalogy Offered autumn. Prereq., BIOB 272. The evolution, systematics, anatomy, physiology and ecology of mammals.	4 Credits
	NRSM 360 - Rangeland Mgt (equiv 260) Offered autumn. Prereq., junior standing or consent of instr. An introduction to rangelands and their management, grazing influences, class of animal, grazing capacity, control of livestock distribution, improvements, competition and interrelationships with wildlife. Laboratory exercises to gain on-site experience on topics and concepts presented in lectures.	3 Credits
	WILD 346 - Wildlife Physiological Ecology Offered autumn. Prereq., BIOB 272. Only open to Wildlife Biology Majors. How physiological and biochemical processes in animals influence behavior and ecology. Application of physiological approaches to wildlife conservation such as assessment of animal health, nutritional condition, and physiological performance.	3 Credits
	WILD 370 - Wildlife Habitat Cons & Mgmt Offered autumn and spring. Prereq., junior/senior standing in wildlife biology, BIOE 370, or consent of instr. Application of principles of wildlife biology to conservation and management of wild bird and mammal habitats including field applications.	3 Credits
	WILD 410 - Wildlife Policy & Biopolitics Offered spring, odd years. Prereq., junior standing. Overview of the laws affecting wildlife and how those laws are initiated, implemented, and enforced; impact of politics, interest groups, and agency jurisdictions.	3 Credits

	WILD 470 - Conserv of Wildlife Populatns Offered autumn and spring. Prereq., BIOE 370, M 162 or M 171, and senior standing in Biology, Forestry, Resource Conservation, Recreation Management or Wildlife Biology. Application of population ecology principles and theory to the conservation and management of wildlife populations.	3 Credits
	WILD 480 - The Upshot--Appld Wildlife Mgt Offered spring. Prereq/Coreq.,WILD 370 or WILD 470. Designed for students to apply their knowledge in the development of wildlife management planning.	3 Credits
	WILD 494 - Senior Wildlife Seminar Offered autumn and spring. Prereq., senior standing in wildlife biology or consent of instr. Analysis and discussion led by students of current topics in wildlife biology.	1 Credits
Minimum Required Grade: C-		32 Total Credits Required

Writing Requirement

Rule: Must complete the following subcategories

12-18 Total Credits Required

Lower Division Writing

Rule: Complete all of the following courses

Note: Can take WRIT 325 Science Writing OR WRIT 201 College Writing II in place of NRSM 200

	Course	Credits
	NRSM 200 - Nat.Resource Professional Wrtg Offered fall and spring to College of Forestry and Conservation majors. Prereq., WRIT 101. Students synthesize scientific literature and, using appropriate evidence and APA style, write natural-resources-based documents appropriate for distribution to scientists, managers, and the public.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits

Minimum Required Grade: C-	6 Total Credits Required

Upper Division Writing

Rule: Complete BIOE 371 and TWO of the other courses

	Course	Credits
	BIOE 371 - Gen Ecology Lab (equiv to 271) Offered autumn. Prereq. or Coreq., BIOE 370 and either STAT 216 or WILD 240. Methods of describing and testing alternative explanations for patterns in nature. The use of scientific methodology in ecology.	2 Credits
	BIOE 428 - Freshwater Ecology Offered spring. Prereq., BIOB 160N and either CHMY 123N or 143N. Physical and chemical dynamics of lakes and streams. Diversity, distribution and dynamics of freshwater organisms.	5 Credits
	BIOO 320 - General Botany Offered autumn. Prereq., BIOB 170N-171N, 260. Prereq. or coreq., BIOB 272. Anatomy, morphology, ecology and physiology of photosynthetic organisms.	5 Credits
	BIOO 470 - Ornithology Offered spring. Prereq. or Coreq., BIOB 272; major of biology, Pre-Wildlife Biology, or Wildlife Biology, and must be of junior or senior standing. The classification, structure, evolution, behavior and ecology of birds.	4 Credits
	BIOO 475 - Mammalogy Offered autumn. Prereq., BIOB 272. The evolution, systematics, anatomy, physiology and ecology of mammals.	4 Credits
	WILD 408 - Advanced Fisheries Offered spring. Prereq., BIOO 340. Quantitative analysis and interpretation of fish populations and community data for use in management. Selection, application and evaluation of management techniques.	3 Credits
	WILD 470 - Conserv of Wildlife Populatns Offered autumn and spring. Prereq., BIOE 370, M 162 or M 171, and senior standing in Biology, Forestry, Resource Conservation, Recreation Management or Wildlife Biology. Application of population ecology principles and theory to the conservation and management of wildlife populations.	3 Credits
	WILD 499 - Thesis (R-6) Offered autumn and spring. Prereq., consent of instr.; senior standing. Preparation of major paper based on study or research of a topic selected with an advisor according to needs and objectives of student.	1 To 3 Credits

Minimum Required Grade: C-	6-12 Total Credits Required

Mathematics Requirement

Rule: must take the following course

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Symbolic Systems Requirement

Rule: must take the following courses

Note: Can take WILD 240 Biostistics/Honors in place of STATS 216

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Expressive Arts

Rule: must take the following course

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Natural Sciences Requirement

Rule: Must take all courses

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 123N - Intro to Organic & Biochem Offered autumn and spring. Prereq., "C-" or equiv. in CHMY 121N or consent of instr. Second semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 124N - Intro to Organic & Biochem Lab Offered autumn and spring. Prereq. or coreq., CHMY 123N. Laboratory to accompany CHMY 123N.	2 Credits
Minimum Required Grade: C-		12 Total Credits Required

Wildlife Biology Minor

Chad Bishop, Director

The Wildlife Biology Program combines the best features of a liberal arts curriculum with scientific preparation in wildlife conservation. The Program provides students with an extensive knowledge in ecology, population biology, conservation biology, and critical thinking and quantitative skills. Our students receive a strong academic and scientific background with an emphasis on hands-on, experiential learning. The educational requirements for certification by The Wildlife Society can be met within the framework of the undergraduate program.

While some employment opportunities exist in wildlife conservation for students with the baccalaureate degree, we encourage students to continue their education through the master's degree to qualify for most state, federal, and private positions.

Three optional curricula are offered in the Wildlife Biology Program: terrestrial, aquatic, and honors. All three options follow the same schedule of courses for the freshman and most of the sophomore year and then pursue different curricula for the last two years. Each leads to a B.S. in Wildlife Biology. The University is well-suited for instruction in wildlife biology because of the excellent opportunities for field instruction and research

at Lubrecht Experimental Forest, Flathead Lake Biological Station, and the Theodore Roosevelt Memorial and Bandy ranches. The Montana Forest and Conservation Experiment Station, the Division of Biological Sciences, and the Montana Cooperative Wildlife Research Unit facilitate research.

Minor - Wildlife Biology

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0

Required courses

Rule: must take the following courses

	Course	Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOB 171N - Princpls Biological Dvrsty Lab Offered spring and summer. Coreq., BIOB 170N. The diversity of life including prokaryotes, viruses, protista, fungi, plants and animals including structure and evolutionary relationships.	2 Credits
	BIOO 101N - Survey MT Wldlife & Habitats Offered online autumn. Prereq., one course in biology. Interpreting biological patterns associated with selected Montana wildlife species, including mammals, birds, reptiles and amphibians.	3 Credits
	WILD 105N - Wildlife & People Offered autumn. Intended for non-wildlife biology majors. Interactions of wildlife and people in today's society.	3 Credits
	WILD 180 - Careers in Wildlife Biology Offered autumn and spring. Subject matter and fields of study within wildlife biology conservation and management. Topics to include wildlife ecology, aquatic ecology, human dimensions, conservation and management, and other opportunities for careers in wildlife biology.	2 Credits
	WILD 275 - Wildlife Conservation Offered spring. Prereq., sophomore standing or consent of instr. Principles of animal ecology and framework of wildlife administration as a basis for the conservation of wild birds and animals, and biodiversity. Intended for non-wildlife biology majors.	2 Credits
Minimum Required Grade: C-		15 Total Credits Required

Required courses

Rule: must take the following courses
Note: Can take NRSM 360 Rangeland Mgmt in place of FORS 330

	Course	Credits
	BIOO 335 - Rocky Mountain Flora Offered spring. Prereq., one college-level course in Biology or consent of instr. Elements of the evolution, geography and natural affinities of flowering plants. Identification using a manual of native plants of Montana.	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Wilderness Studies

Wayne Freimund (Professor) Director of Wilderness Institute

Students who successfully complete the requirements of the Wilderness and Civilization Program are eligible for the Wilderness Studies minor. Wilderness and Civilization is an interdisciplinary campus and field-based program. Each year, 25 students investigate wildland conservation and the human-nature relationship through the lenses of policy, ecology, art, Native American Studies, and literature. Wilderness and Civilization combines the strengths of classroom and field learning, interactive classes, innovative faculty, and applied learning through internships. Field trips include extended backcountry trips as well as shorter field trips examining ecology, environmental issues, land use, and natural history. Wilderness and Civilization offers students the opportunity to explore contemporary conservation debates, make connections between disciplines, and learn how to work for positive change.

Wilderness and Civilization is an undergraduate, immersion program geared toward sophomore-, junior-, and senior-level students in any major. Students take 17.0 credits of campus and field-based courses during the fall, and then continue in the spring with an art course, an internship, a 1.0 credit field course, and a 1.0 credit lecture series. The Wilderness and Civilization program is administered by the Wilderness Institute of the College of Forestry and Conservation. The program is offered in collaboration with the College of Arts and Sciences, the College of Visual and Performing Arts, and the Davidson Honors College.

Students must apply for admission to the Wilderness and Civilization program, which is limited to 25 students each year. Applicants must have a cumulative GPA of 3.0 or higher for all college and university work. Applications are due by April 1 and are available at the Wilderness Institute, University Hall 303.

Department Faculty

Professor

Maryann Bonjorni, Professor; Drawing
Richmond Clow, Professor
David L. Moore, Professor

Associate Professor

Nancy Cook, Professor
Louise Economides, Professor | Director of Graduate Studies

Assistant Professor

Natalie Dawson, Director of the Wilderness Institute, Assistant Professor of Wilderness Studies

Wayne Freimund (Professor) Director of Wilderness Institute

Minor - Wilderness Studies (Minor)

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 24

Required Cumulative GPA: 2.0

Note: This minor can be completed during a fall semester plus one wintersession course and four credits in the spring; Experiential learning credit for Honors will be completed with this minor

Required courses

Rule: must take the following courses

Note: NRSM 271 is an Honors course; NRSM 273 will be taken two times fall for 2 credits and spring for 1 credit

	Course	Credits
	NRSM 271N - Conservation Ecology Offered autumn. An overview of ecological concepts and how ecology is applied to further our understanding of ecosystems and conservation. Topics include: ecosystems functions and values, biomes, natural selection and speciation, biodiversity, succession, climate change, fragmentation, protected areas, impacts of exotic species and other human influences on ecosystem functions.	3 Credits
	NRSM 273 - Wilderness/Civ Field Stds (R-6) Offered autumn and spring. Field studies in ecology and conservation. Includes natural history, field journaling, ecological monitoring, protected area management, and community conservation. One-day trips as well as extended backcountry trips. Part of the Wilderness and Civilization program.	1 To 3 Credits
Minimum Required Grade: C-		5 Total Credits Required

Required Courses

Rule: must take the following courses

Note: MUSI 304A is offered during Wintersession - if not offered then take ART 394A Env. Drawing

	Course	Credits
	LIT 373 - Lit & Environment Offered autumn. Prereq., LIT 210L or 211L (ENLT 224L or 225L) and LIT 300 (ENLT 301) or consent of instr. Study of major texts and issues in American nature writing.	3 Credits
	MUSI 304A - Sound in the Natural World Offered even-numbered years. This is a music composition and performance course that explores sound/music in relation to wilderness. Students will learn from cultures that have stayed in contact with their natural environment and will create compositions from materials collected in the field and will perform and critique them. As a result, students will become familiar with their own creative process.	3 Credits
	NASX 303E - Ecol Persp in Nat Amer Trad Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources.	3 Credits
	NRSM 370S - Wildland Conserv Pol/Govrnance Offered autumn and spring. Examination of the historical, philosophical, and legislative background for development and management of our national system of wilderness areas, wild and scenic rivers, trails, and national parks; their place in our social structure. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 371 - Wilderness Issues Lect Series (R-3) Offered spring. Explores current issues in wilderness preservation, management and research.	1 Credits
	NRSM 373 - Wilderness and Civilization (R-6) Offered autumn and spring. Social and cultural perspectives on the wilderness idea and wildland practices. Course topics include history of wilderness and the wilderness movement, various philosophical viewpoints on wilderness, protected area management issues, and how wilderness fits into larger landscapes and societies. Part of the Wilderness and Civilization program.	3 Credits
	NRSM 398 - Internship Offered every term. Prereq., consent of department. Extended classroom experience that provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		19 Total Credits Required

Climate Change Studies

Steven Running, Director

Climate Change Studies is an inter-disciplinary program open to all majors. The program educates students in three areas of the climate change issue: science, society, and solutions. Coursework in the minor provides a foundation that enables students to engage the scientific, societal, and political dimensions of global climate change. Further, the focus on solutions with its orientation toward applied learning will help students develop critical thinking and problem solving skills. Participating students will enhance their major field of study. They will be better prepared to enter a broad range of professions and graduate programs where they can meet the emerging challenges and opportunities arising from climate change. Climate Change Studies is a joint program between the College of Forestry and Conservation, College of Arts and Sciences, and Missoula College's Energy Technology program.

Department Faculty

Professor

Len Broberg, Professor, EVST Program Director
Johnnie N. Moore, Ph.D., University of California (Los Angeles), 1976
Steve Running, Regents Professor of Ecology; Director, Numerical Terradynamics Simulation Group

Associate Professor

Cory Cleveland, Professor, Terrestrial Ecosystem Ecology; Chair, Department of Ecosystems & Conservation Sciences
Joel T. Harper, Ph.D., University of Wyoming, 1998
Ulrich Kamp, Professor
Derek Kellenberg, Professor
Anna Klene, Professor
Peter Koehn, Comparative Government & Politics & Public Administration
Robin Saha, Associate Professor
Steve Schwarze, Professor
Dane Scott, Associate Professor of Ethics; Director of the Center for Ethics
Dan Spencer, Professor
Laurie Yung, Associate Professor of Natural Resource Social Science; Undergraduate Program Director, Resource Conservation

Assistant Professor

Ashley Ballantyne, Assistant Professor of Bioclimatology
Bradley Layton, Energy Technology Program Director/Associate Professor

Adjunct

Nicky Phear, Climate Change Studies Program Director and Instructor

Climate Change Studies Minor

Steven Running, Director

Climate Change Studies is an interdisciplinary program open to all majors. The program educates students in three areas of the climate change issue: science, society, and solutions. Coursework in the minor provides a foundation that enables students to engage the scientific, societal, and political dimensions of global climate change. Further, the focus on solutions with its orientation toward applied learning will help students develop critical thinking and problem solving skills. Participating students will enhance their major field of study. They will be better prepared to enter a broad range of professions and graduate programs where they can meet the emerging challenges and opportunities arising from climate change. Climate Change Studies is a joint program between the College of Forestry and Conservation, College of Humanities and Sciences, and Missoula College's Energy Technology program.

Minor - Climate Change Studies (Minor)

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0

Required course

Rule: must take the following course

	Course	Credits
	CCS 103X - Intro Climate Change:Sci & Soc Offered autumn. This is an introductory and foundational course on the scientific and social dimensions of global climate change. The goal of this course is to provide students with a basic understanding of the fundamental scientific, social, political and technological issues arising from rapid climatic change. As a result, it provides students with a breadth of knowledge and builds connectedness across these varied dimensions of the complex global issue.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Climate Change Science

Rule: Must take at least 6 credits from the following list

Note: Earth 303N same as CCS 303N
NRSM 408 same as CCS 408
NRSM 418 same as CCS 418

	Course	Credits
	ERTH 303N - Weather and Climate Offered spring. Same as CCS 303N. Origin, composition, structure, and dynamics of the atmosphere, gas and radiation laws, energy budget and balance, weather elements, North American weather systems, and climate change. To succeed in this course students should have comfort with basic algebra.	3 Credits
	GEO 482 - Global Change Offered Spring. Same as CCS 482. Prereq., upper division/higher standing in Geosciences or consent of instructor. Lectures, readings, discussions and practicum on the complexity of global climate. Emphasizes the physical, geochemical and geologic processes affecting climate change over geologic and recent time scales.	3 Credits
	NRSM 281 - Science of Climate Change This course provides an introduction to Earth's climate system and the scientific evidence of climate change. This course explores how past climate has shaped Earth's ecosystem and how humans are currently altering Earth's climate system, as well as potential future climate scenarios. Through this course students will gain a better understanding of Earth's energy budget, the global carbon cycle, and potential impacts of climate change. This class is open to all undergraduates, both science and non-science majors, and counts toward the Climate Change Studies minor.	3 Credits

	NRSM 291 - Special Topics (R 12) Offered intermittently. Experimental offerings of visiting professors; new courses or one time offerings of current topics.	1 To 12 Credits
	NRSM 408 - Global Cycles and Climate Offered spring even-numbered years. Same as CCS 408. An analysis of the earths major global biogeochemical cycles with a focus on the ways and extent to which each of them influences and interacts with the global climate system.	3 Credits
	NRSM 418 - Ecosystem Climatology Interactions between the biosphere and atmosphere to advanced undergraduate students and graduate students. This course will explore the interactions between Earth's biosphere and atmosphere and how they affect climate over a range of scales. We will focus on the exchange of energy, mass, and important elements between the biosphere and atmosphere and how this exchange can lead to fascinating feedbacks in Earth's climate system. Basic physics and math is not required but it is recommended.	3 Credits
	NRSM 491 - Special Topics (R 9) Offered intermittently. Experimental offerings of visiting professors; new courses or one time offerings of current topics.	1 To 9 Credits
Minimum Required Grade: C-		6 Total Credits Required

Climate Change and Society

Rule: Must take at least 6 credits from the following list

Note: ENST 427 Social Issues: The Mekong Delta; Wintersession cross-listed with NRSM 427 and GPHY 427 count toward Society Area; taught with ENST/NRSM/GPHY 437 Climate Change: Mekong Delta.
Also NRSM 321 AND ENST 311 Cycle the Rockies: Energy and Climate Change in Montana 6 cr. in Summer

COMX 349 same as CCS 349
ECNS 445 same as CCS 445
GPHY 421 same as CCS 421
NRSM 426 same as CCS 426
PSCI 324 same as CCS 324
ENST 476 same as CCS 476

	Course	**Credits**
	CCS 395 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	COMX 349 - Comm Consump & Climate Offered every other year. Same as CCS 349. Analyzes consumption as a communication practice, investigates discourses that promote consumption, and illuminates environmental impacts on consumption.	3 Credits

	ECNS 445 - Int Env Econ & Clim Change Offered autumn every other year. Same as CCS 445. Prereq., ECNS 201S. An introduction to the economics of various policy approaches towards climate change and other international environmental issues such as trans-boundary pollution problems, international trade and the environment and pollution haven hypothesis.	3 Credits
	ENST 367 - Envr Politics & Policies Offered autumn. Foundation in public lands history, bedrock environmental laws, policy processes and institutions. Research and analysis of current environmental and natural resource policy issues. Focus is domestic illustrated by case studies.	3 Credits
	GPHY 421 - Sustainable Cities Offered spring even-numbered years. Prereq., upper-division or graduate standing. Same as CCS 421. A discussion of sustainability efforts in cities around the world. Topics include, for example, urban sprawl and smart growth, alternative energy, public transportation, integrated waste management, integrated water management, green architecture, and urban agriculture.	3 Credits
	NRGY 295 - Practicum The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism.	2 Credits
	NRSM 426 - Climate and Society Offered spring. Co-convened with NRSM 526. This course examines the social and political aspects of climate change, with a focus on international and domestic processes and cases. Cannot get credit for both NRSM 426 and NRSM 526.	3 Credits
	NRSM 449E - Climate Change Ethics/Policy Offered autumn. Same as CCS 449E. This course focuses on the ethical dimensions of climate change policy. It will cover the following major topics: (1) climate change, personal and collective responsibilities, (2) ethics, climate change and scientific uncertainty, (3) distributive justice and international climate change negotiations, (4) intergenerational justice and climate change policy.	3 Credits
	PSCI 324 - Climate Policies: China & U.S. Offered every other year. Same as CCS 324. Explores historic, current, and future greenhouse-gas emissions of the United States and China, reasons why both are the two largest C02 emitters, and prevailing national and subnational government policies and nongovernmental actions that affect emissions mitigation and adaptation.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Climate Change Solutions

Rule: Must take at least 6 credits from the following courses with at least one course from category "A"

6 Total Credits Required

Category A: Practical Application

Rule: Must take at least 1 course but a total of 6 credits between both categories A and B

	Course	Credits
	CCS 391 - Climate Change Practicum Offered autumn and spring. Prereq., consent of instructor. Provides an opportunity for students to design and implement a capstone project involving creative solutions to climate change.	2 To 4 Credits
	CCS 398 - Clmt Change Internship/SERV (R-6) Offered autumn and spring. This course gives students an opportunity to gain hands-on, "real world" experience working with a local, regional, national or international group to address climate change. Students gain supervised, practical work experience with specific projects and organizations; create a network of professional contacts; and have opportunity to apply ideas and approaches studied in the Climate Change Studies minor.	2 To 4 Credits
	ENST 476 - Environmental Citizenship Offered spring. Prereq., open to juniors and seniors only or by consent of instructor. Same as CCS 476. Develops leadership and environmental citizenship skills, values and virtues through student-initiated projects informed by principles of organizing and sustainable behavior change theories of social marketing.	3 Credits
	NRGY 298 - Internship Offered every term. Prereq., M 121 and consent of instructor. Same as CCS 298. Extended classroom experience providing practical application of classroom learning through on the job training in a student's field of study. This experience increases student skills, prepares them for initial employment, and increases occupational awareness and professionalism.	2 Credits
Minimum Required Grade: C-		3-6 Total Credits Required

Category B

Rule: May take 1 of the following courses

Note: Commentary: ENST 437 Climate Change: Mekong Delta Wintersession cross-listed with NRSM 437 and GPHY 437 count toward Solutions Area; taught with ENST 427 Social Issues: The Mekong Delta.
Also NRSM 321 AND ENST 311 Cycle the Rockies: Energy and Climate Change in Montana 6 cr. in Summer

BGEN 160S same as EVST 160S
GPHY 421 same as CCS 421
NRGY 102 same CCS 102

	Course	Credits

	BGEN 160S - Issues in Sustainability Offered every term. Same as CCN 160S. This literature-intensive course is intended to expose the student to a variety of essays addressing the balance of economic development with the principles of sustainability and social equity. The student is offered an introduction to sustainability concepts, natural systems/cycles and environmental economics. Natural capitalism and triple bottom line maximization is explored, along with the role of corporations and small businesses in sustainable development. A survey of issues surrounding corporate social responsibility and sustainability-driven innovation will be conducted.	3 Credits
	CCS 352 - Climate Field Studies Offered summer. This is an interdisciplinary field course focused on climate change impacts and adaptation. Through site visits and meetings with key decision-makers, students gain knowledge of projected impacts due to climate change (water availability, wildfire, beetle kill, biodiversity), the impacts to various sectors of human society (land management, food and water security, economic stability, and livelihoods), and different mitigation and adaptation responses.	3 Credits
	GPHY 421 - Sustainable Cities Offered spring even-numbered years. Prereq., upper-division or graduate standing. Same as CCS 421. A discussion of sustainability efforts in cities around the world. Topics include, for example, urban sprawl and smart growth, alternative energy, public transportation, integrated waste management, integrated water management, green architecture, and urban agriculture.	3 Credits
	NRGY 102 - Intro to Sustainable Energy II Offered autumn and spring. Prereq., NRGY 101 or consent of instructor. Same as CCS 102. A survey of renewable energy systems and technologies. Addresses physical and technical aspects of wind, solar, geothermal, hydro, tidal, biological, and wave energy systems. Consideration is given to engineering, economic, social, environmental, and political factors that determine implementation and sustainability. Credit not allowed for both NRG 102 and CCS 102.	3 Credits
	NRGY 195 - Practicum Offered summer only. Prereq., NRGY 101, M 121 or consent of instructor. Same as CCS 191. The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism.	2 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Fire Sciences and Management

Department Faculty

Professor

LLoyd Paul Queen, Professor of Remote Sensing; Director, National Center for Landscape Fire Analysis

Associate Professor

David Affleck, Associate Professor of Biometrics
Chair, Department of Forest Management
Director, Inland Northwest Growth & Yield Cooperative
Solomon Dobrowski, Associate Professor of Forest Landscape Ecology
Beth Dodson, Associate Professor of Integrated Natural Resource
Philip Higuera, Associate Professor of Fire Ecology
Christopher R. Keyes, Research Professor of Silviculture
Carl Seielstad, Associate Research Professor; Fire/Fuels Program Manager, National Center for Landscape Fire Analysis
Laurie Yung, Associate Professor of Natural Resource Social Science; Undergraduate Program Director, Resource Conservation

Assistant Professor

Andrew Larson, Associate Professor of Forest Ecology
James Riddering, Adjunct Research Assistant Professor; Remote Sensing Program Manager, National Center for Landscape Fire Analysis

Fire Sciences and Management Minor

Minor - Fire Sciences & Management (Minor)

College of Forestry & Conserv

Catalog Year: 2016-2017

Degree Specific Credits: 23
Required Cumulative GPA: 2.0

Major Required Course

Rule: must take the following course

	Course	Credits
	FORS 230 - Forest Fire Management Offered spring. Fire as an ecological factor in Western forests is presented. Fire weather, the measurement of fire weather, and the factors of fuel, weather and topography that influence fire behavior, and fire management decisions are included. NFDRS, state and national fire policy evolutions are discussed. Basic fire suppression tactics are also presented.	2 Credits
Minimum Required Grade: C-		2 Total Credits Required

Required Course

Rule: must take the following course

	Course	Credits

	FORS 333 - Basic&Applied Fire Ecology Offered spring. Prereq., FORS 230. A detailed, analysis of fire ecology in terrestrial ecosystems with a focus on the Rocky Mountains, including fire history, fire effects, landscape pattern, land use legacies, and management implications.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ecology Courses

Rule: Must take one of the following courses

	Course	Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits
	FORS 330 - Forest Ecology Offered autumn and spring. Prereq., FORS 210 or ENSC 245N or NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172 or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. Examination of physical and biological factors affecting forest structure, composition, and function, including biodiversity, disturbance, and nutrient cycling. Field labs throughout Northern Rockies including developing skills in field observation, data interpretation and problem solving.	3 Credits
	NRSM 462 - Rangeland Ecology Offered spring. NRSM 210N; and BIOO 105N or BIOB 170N or BIOE 172N or BIOB 160N or FORS 240; and FORS 201 or STAT 216 or SOCI 202 or WILD 240 or PSYX 222. We will discuss the ecological principles and processes that drive the structure and function of rangeland ecosystems. We will focus on the intersections of plant, animal, ecosystem, and landscape ecology. We will weave in discussions of management to understand how rangeland dynamics contribute and respond to differing management paradigms.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Practicum or Planning Course

Rule: Must take one of the following courses

Note: FORS 498 Internship must be approved by fire minor advisor prior to registration and taken for 3 credits

	Course	Credits
	FORS 440 - Forest Stand Management Offered autumn. Prereq., FORS 202 or 302; FORS 341; FORS 347 or 349. The management and manipulation of forest stands to reach multiple objectives, with a focus on the planning of forest operations for a community partner.	3 Credits

	FORS 495 - Wildland RxFire Practicum Offered wintersession. Co-convened with FORS 544. Prereq. Fire experience and Consent of Instructor. An intensive field course providing students with technical training, practical applications, and theoretical foundations in ecological burning for restoration purposes. Class is typically held in southeastern United States.	3 Credits
	FORS 498 - Internship Offered every term. Prereq., consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off-campus. Prior approval must be obtained from faculty advisor and Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
	NRSM 495 - ESR Practicum (R-6) Offered every semester. Prereq., senior standing in the Ecological Resotration major and successful completion of NRSM 344, a faculty-approved practicum proposal; and consent of instructor. The goal of this service-learning practicum is for students to gain real-world experience in research, monitoring, or project implementation. Students will implement a project under the supervision of faculty and mentors from local management agencies, organizations or other sponsors.	1 To 6 Credits
	PTRM 485 - Recreation Planning Offered spring. Prereq., PTRM 217S and PTRM 300. Offered autumn. Needs of recreation opportunities and response to those needs through planning, demand assessment and resource analysis.	3 Credits
	WILD 480 - The Upshot--Appld Wildlife Mgt Offered spring. Prereq/Coreq.,WILD 370 or WILD 470. Designed for students to apply their knowledge in the development of wildlife management planning.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Meteorology or Climate Course

Rule: Must take one of the following courses

	Course	**Credits**
	ERTH 303N - Weather and Climate Offered spring. Same as CCS 303N. Origin, composition, structure, and dynamics of the atmosphere, gas and radiation laws, energy budget and balance, weather elements, North American weather systems, and climate change. To succeed in this course students should have comfort with basic algebra.	3 Credits

	NRSM 418 - Ecosystem Climatology Interactions between the biosphere and atmosphere to advanced undergraduate students and graduate students. This course will explore the interactions between Earth's biosphere and atmosphere and how they affect climate over a range of scales. We will focus on the exchange of energy, mass, and important elements between the biosphere and atmosphere and how this exchange can lead to fascinating feedbacks in Earth's climate system. Basic physics and math is not required but it is recommended.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Measurements & Analysis Electives

Rule: Must take one of the following courses

	Course	Credits
	FORS 202 - Forest Mensuration Offered spring. Prereq., FORS 201 or STAT 216 or SOCI 202 or WILD 240; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. The theory and practice of timber inventory and growth projection, including field measurements, sampling procedures, statistical methods, inventory compilation, and stand growth simulation under specified management prescriptions. Stand growth under specified management prescriptions.	3 Credits
	FORS 350 - Forestry Apps of GIS Offered spring. Prereq., FORS 250 or FORS 284 or GPHY 284. Introduction to the basic concepts and techniques of computerized spatial data management and analysis systems and application to natural resource management.	3 Credits
	FORS 351 - Env Remote Sensing Offered spring. The theory and application of photo- and electro-optical remote sensing for mapping resources and developing information systems.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Natural/Management Science Electives

Rule: Take at least one course from the following, but if one of these courses is required for the major a second elective must be taken

	Course	Credits
	BIOE 449 - Plant Biogeography Offered intermittently. Prereq., consent of instr. Description of the distribution of plants and animals at global, continental and regional scales. Analysis of ecological and historical factors influencing distribution and association.	3 Credits

	FORS 331 - Wildland Fuel Management Offered autumn. Prereq., FORS 230 or consent of instr. The fire ecology of some western vegetation types is discussed. Elements of the principles of wildland fuel management are presented. Prescribed fire use and mechanical manipulation are matched to historic ecosystem processes. Smoke management considerations and health issues are also presented.	3 Credits
	FORS 347 - Multiple Resource Silviculture Offered spring. Prereq., FORS 330 or BIOE 370. Credit not allowed for both FORS 347 and 349. An introduction to the concepts and application of silvicultural techniques to forest ecosystems to meet multiple resource objectives.	3 Credits
	FORS 349 - Practice of Silviculture Offered autumn. Prereq., FORS 202 or FORS 302 and FORS 241N and either prereq or coreq FORS 330. Practice of Silviculture is designed primarily for Forestry majors (open to others with appropriate prerequisites), and will consider the conceptual foundations behind various silvicultural practices and techniques, as well as and their application in forest ecosystems to meet multiple resource objectives. The course will cover natural stand dynamics, stand assessment and site classification schemes, even- and uneven-aged silvicultural systems, thinning/stand density concepts, regeneration practices, stand diagnosis and prescription development, vegetative management strategies for diverse objectives, along with quantitative assessment and modeling of alternative prescriptions.	3 Credits
	GPHY 317 - Geomorphology Offered autumn even-numbered years. Prereq., GPHY 111N or GEO 101N. Important landforms and landscapes, their biophysical processes, and their formative elements.	3 Credits
	NRSM 335 - Environmental Entomology Offered autumn odd years. An introduction to the importance of insects in ecosystem function and process, and their use in ecological monitoring as indicators of ecological change, degradation, and the efficacy of ecological restoration efforts. This course also covers the effects of climate change and biological invasions in the context of both pest and beneficial insect species.	3 Credits
	NRSM 385 - Watershed Hydrology Offered autumn and spring. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. An introduction to physical and biological controls over water movement and storage in the environment, and how those controls are affected by land management practices.	3 Credits
	NRSM 465 - Restoration Ecology Offered spring. Prereq., graduate or junior or senior standing and NRSM 265 and one 300-400 level ecology courses: BIOE 370, BIOE 428, BIOE 447, BIOE 448, FORS 330, or NRSM 462; or consent of instructor. This course covers the primary ecological theories that inform the practice of ecological restoration. Topics include the dynamic nature of ecological systems, community assembly, biodiversity and ecosystem functioning, food web dynamics, ecological engineering, macroecology, and statistical issues and study design.	3 Credits
	WILD 370 - Wildlife Habitat Cons & Mgmt Offered autumn and spring. Prereq., junior/senior standing in wildlife biology, BIOE 370, or consent of instr. Application of principles of wildlife biology to conservation and management of wild bird and mammal habitats including field applications.	3 Credits

Minimum Required Grade: C-	3-6 Total Credits Required

Social Science Electives

Rule: Take at least one course from the following, but if one of these courses is required for the major a second elective must be taken

	Course	Credits
	FORS 320 - Forest Environmental Economics Offered autumn. Prereq., ECNS 201S; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. Economic techniques to support decision making about the allocation of scarce resources, and management of forests for timber and other ecosystem services.	3 Credits
	NASX 303E - Ecol Persp in Nat Amer Trad Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources.	3 Credits
	NRSM 379 - Collab in Nat Res Decisions Offered autumn. Political and social processes affecting natural resource decisions. Examination of cases of multi-party collaboration in forestry, range, and watershed management issues.	3 Credits
	NRSM 422 - Nat Res Policy/Administration Offered autumn and spring. Policy formation in the United States and a survey of the major resource policies interpreted in their historical and political contexts.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
	PTRM 482 - Wilderness & Protctd Area Mgt Offered spring. Prereq., PTRM 217S, or consent of instructor. Examination of the origin, evolution, and application of the park concept on state, federal, and international levels. Evaluation of legislation, philosophy, and policy leading to consideration of goals, objectives, and strategies for wilderness and protected area management.	3 Credits
Minimum Required Grade: C-		3-6 Total Credits Required

Ethical & Human Values Elective within Minor

Rule: Can take the elective courses

Note: can take either course for minor and will work for General Education Requirement

	Course	Credits

	NASX 303E - Ecol Persp in Nat Amer Trad Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources.	3 Credits
	NRSM 489E - Ethics Forestry & Conservation Offered autumn. Prereq., junior or senior standing. Theoretical and practical ethical issues affecting the management of natural resources in national forests and on other public lands.	3 Credits
Minimum Required Grade: C-		

Geographic Information Systems

Department Faculty

Professor

Anna Klene, Professor

Associate Professor

Carl Seielstad, Associate Research Professor; Fire/Fuels Program Manager, National Center for Landscape Fire Analysis

Adjunct

Kevin McManigal, Lecturer & GIST Certificate Coordinator

Geographic Information Systems Certificate

Certificate in GIS Sciences and Technologies

The Certificate in GIS Sciences and Technologies, jointly offered by the departments of Geography, and Forest Management, is aimed at present or future professionals or scientists who require skills in GIS technologies. The purpose of this program is to provide undergraduate students or individuals possessing an undergraduate degree with the training, knowledge, and understanding necessary to acquire, process, analyze, and properly display digital geographic data.

Special Requirements for the Certificate

To earn a certificate in GIS Sciences and Technologies, students must either complete or have completed an undergraduate degree and complete a minimum of20 semester credit hours of course work, including 9 to 11 required credits and 9 to 11 elective credits as described below. Students must achieve at least an overall grade point average of 3.0 for courses within the program in order to earn a certificate. The certificate will be awarded upon the successful completion of all of the requirements of the certificate and the undergraduate degree.

Certificate of Art - Geographic Information Systems

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 20

Required Cumulative GPA: 3.0

Required GIS Core Courses

Rule: Must complete 1 from each of the following subcategories
Minimum Required Grade: C-
9-11 Total Credits Required

Introduction to GIS

Rule: Must complete 1 and only 1 of the following courses

Note: Prior to Fall 2013, this was fulfilled by FOR 250 & 350 or GPHY 381 & 382. In 2013 this requirement could be fulfilled with FORS 284.

	Course	Credits
	FORS 250 - Intro to GIS for Forest Mgt Offered every term. Open to sophomores or juniors or with consent of instructor. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process.	3 Credits
	GPHY 284 - Intro to GIS and Cartography Offered every term. Basic computer competency required. This course is designed as a practical introduction to the use of Geographic Information Systems (GIS) for storing, retrieving, analyzing and displaying spatial data. It will also cover the history of cartography and the conventions of the modern map-making process. Students need to register for a required lab section.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Photogrammetry/Remote Sensing

Rule: Must complete 3-4 credits of the following courses

Note: GPHY 487 and 489 should be completed together.

	Course	Credits
	FORS 351 - Env Remote Sensing Offered spring. The theory and application of photo- and electro-optical remote sensing for mapping resources and developing information systems.	3 Credits
	GPHY 487 - Remote Sensing/Raster GIS Offered autumn. Prereq. or coreq., GPHY 284 or FORS 250 or Consent of Instructor. Coreq., GPHY 489. Basic principles of remote sensing and analyzing images within a raster GIS. Review current data sources.	3 Credits
	GPHY 489 - Cartography/GIS Laboratory (R-4) Offered autumn and spring. Prereq., or coreq., GPHY 482, 486 or 487. Lab to accompany cartography and GIS courses.	1 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Additional Required Courses

Rule: Must complete 3-4 credits of the following courses

Note: GPHY 488 and 489 should be completed together. Spring 2014 and 2015, GPHY 488 and 489 are fulfilled by GPHY 491 GIS Applications.

	Course	Credits
	FORS 350 - Forestry Apps of GIS Offered spring. Prereq., FORS 250 or FORS 284 or GPHY 284. Introduction to the basic concepts and techniques of computerized spatial data management and analysis systems and application to natural resource management.	3 Credits
	GPHY 488 - Thematic Cartography & GIS Offered spring. Prereq., GPHY 284 or GPHY 381 or FORS 250 or Consent of Instructor. Application of GIS for managing natural and cultural resources. Covers choropleth maps, dot maps, proportional figure maps, isarithmic maps, and others. Includes computer mapping and GIS exercises. Students need to register for a required linked lab section.	3 Credits
	GPHY 489 - Cartography/GIS Laboratory (R-4) Offered autumn and spring. Prereq., or coreq., GPHY 482, 486 or 487. Lab to accompany cartography and GIS courses.	1 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Advanced Elective Courses

Rule: Must complete 9-11 credits of the following subcategories
Note: Students can choose electives from any subcategory/ies.
Minimum Required Grade: C-
9-11 Total Credits Required

Raster GIS, Remote Sensing, and Image Analysis

Rule: May complete 4-8 credits from the following courses
Note: GPHY 587 and 489 should be completed together.

	Course	Credits
	FORS 551 - Digital Image Processing Offered intermittently. Prereq., FORS 351 or consent of instr. Fundamentals of electro-optical digital remote sensors, data compilation, preprocessing, and pattern recognition. Level: Graduate	4 Credits
	GPHY 587 - Image Analysis & Modeling Offered every two years. Prereq., GPHY 487 or FORS 351 or Consent of instructor; coreq., GPHY 589. Advanced topics in image analysis (e.g. hyperspectral images and pattern-recognition-based classification) and foundations of simple raster-based models. Level: Graduate	3 Credits
	GPHY 589 - Cartography/GIS Laboratory (R-4) Offered autumn and spring. Laboratory to accompany GPHY 587 or 588. Level: Graduate	1 Credits

Minimum Required Grade: C-	4-8 Total Credits Required

Vector GIS and Networks

Rule: May complete 3-11 credits of the following courses

Note: GPHY 486 and 489 should be completed together. GPHY 588 and 589 should be completed together.

	Course	Credits
	GPHY 486 - Transport, Planning & GIS Offered intermittently during wintersession (2 credits) or spring semester (3 credits.) Coreq., GPHY 489. A project-oriented course focusing on patterns and trends in urban passenger transportation, principles of transport planning, and modeling in GIS-T. To succeed in this course students should have comfort with basic algebra and statistics.	3 Credits
	GPHY 489 - Cartography/GIS Laboratory (R-4) Offered autumn and spring. Prereq., or coreq., GPHY 482, 486 or 487. Lab to accompany cartography and GIS courses.	1 Credits
	GPHY 580 - Seminar GIS & Cartography (R-9) Offered every two years. Seminar topics in cartography and GIS. Applications to advanced studies in human and physical geography. Level: Graduate	3 Credits
	GPHY 588 - Vector GIS Offered autumn. Coreq., GPHY 589. Theoretical/conceptual and practical aspects of entity-based GIS modeling and spatial analysis. Point pattern analysis (i.e. cluster detection, density analysis, kriging), network analysis (i.e. network construction, network-based spatial statistics, accessibility modeling), and areal pattern analysis (i.e. spatial autocorrelative pattern, spatial regression modeling). Applications in urban and environmental planning, transportation, natural resource management, ecology, health, criminology, engineering, and business. To succeed in this course students should have familiarity with GIS. Level: Graduate	3 Credits
	GPHY 589 - Cartography/GIS Laboratory (R-4) Offered autumn and spring. Laboratory to accompany GPHY 587 or 588. Level: Graduate	1 Credits
Minimum Required Grade: C-		3-11 Total Credits Required

Data Management and Programming

Rule: May complete 3-10 credits of the following courses

Note: GPHY 468 and 469 should be completed together.

	Course	Credits

	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
	FORS 505 - Sampling Methods Offered spring. Prereq., consent of instr. Fundamentals of statistical sampling emphasizing natural and environmental resource applications. Principles of inferences and alternative estimators are studied in the context of simple random, systematic, unequal probability, stratified, and 3P/Poisson designs. Variable radius plot sampling, line intersect sampling, and other probability proportional to size designs used in forest and ecological inventories are also covered. Level: Graduate	3 Credits
	GPHY 468 - Community & Regional Analysis Offered autumn. Coreq., GPHY 469. Socio-demographic analysis of communities and regions: population, employment, and spatial interaction. Hands-on course designed for future planners, GIS analysts, and others interested in socio-demographic change. To succeed in this course students should have comfort with basic algebra.	3 Credits
	GPHY 469 - Planning & Analysis Laboratory Offered autumn. Coreq., GPHY 468. Laboratory to accompany GPHY 468.	1 Credits
Minimum Required Grade: C-		3-10 Total Credits Required

GIS Applications

Rule: May complete 3-11 credits of the following courses

Note: GPHY 482 and 489 should be completed together.

	Course	**Credits**
	ANTY 452 - GIS in Archaeology Offered intermittently. Prereq., ANTY 250s. Anthropological and archaeological data acquisition, management, and analysis using Geographic Information Systems (GIS) tools and techniques.	3 Credits
	FORS 503 - GIS:Meth & Applic I Offered intermittently. Prereq., consent of instr. Introduction to the theory and development of statistical gradient and predictive distribution models in the resource and conservation sciences. Course will develop climatic, edaphic, biophysical, and inventory data sources for use in predictive distribution modeling. Survey of multiple modeling approaches, limitations and assumptions, and applications in the resource and conservation fields. Emphasis on the integration of GIS and raster analysis methods with spatial and non-spatial statistical techniques. Level: Graduate	3 Credits

	GPHY 385 - Field Techniques Offered autumn and intermittently in spring. Prereq., GPHY 112N or Consent of Instructor. Field techniques used by geographers and planners in making field observations and in collecting data.	3 Credits
	GPHY 481 - Advanced Cartographic Design Offered autumn. Prereq., GPHY 284 or FORS 250 or Consent of Instructor. The course concentrates on the presentation of spatial data and the construction of cartographic products that have clear communication and excellent aesthetic design. The class meets the University's service learning course objectives through a semester long project where students consult with a client, design and construct a map, and deliver a final product.	3 Credits
	GPHY 482 - Spatial Analysis & GIS Offered intermittently. Prereq., GPHY 284 or Consent of Instructor. Coreq., GPHY 489. Quantitative analysis of spatial data, including techniques for pattern analysis, classification, and interpolation within a GIS environment.	3 Credits
	GPHY 489 - Cartography/GIS Laboratory (R-4) Offered autumn and spring. Prereq., or coreq., GPHY 482, 486 or 487. Lab to accompany cartography and GIS courses.	1 Credits
	GPHY 564 - Planning Design Offered spring even-numbered years. Prereq., graduate standing or Consent of Instructor. Analysis of land-use problems and design. Level: Graduate	3 Credits
	WILD 562 - Wildlife Habitat Modeling Offered spring, odd years. Prereq., consent of instr. A survey of theory and applications in the study of resource selection by animals. Level: Graduate	3 Credits
Minimum Required Grade: C-		3-11 Total Credits Required

aggs School of Pharmacy

Patient care is at the center of pharmacy practice. As the medication experts on the health care team, our students will be prepared to promote the health and well-being of individuals and communities. Our curriculum supports interprofessional education and focuses on the development of professional leaders engaged in service.

The Skaggs School of Pharmacy was established in 1907 at Montana State College, was transferred to the University of Montana in 1913, and resides in the College of Health Professions and Biomedical Sciences. The Skaggs School of Pharmacy consists of two departments, Pharmacy Practice and Biomedical and Pharmaceutical Sciences, and is a member of the American Association of Colleges of Pharmacy. The entry-level doctor of pharmacy program is fully accredited by the Accreditation Council for Pharmacy Education, 135 S. LaSalle Street, Suite 4100, Chicago IL 60603-4810, telephone (312) 664-3575, (800) 533-3606; FAX (312) 664-4652; Accreditation Council for Pharmacy Education website (http://www.acpe-accredit.org/)

The curriculum offered by the Skaggs School of Pharmacy consists of a six-year program leading to the entry-level Pharm.D. degree. The first two years, or pre-professional portion of the curriculum, are spent in studies of the basic biological and physical sciences, and in course work necessary to satisfy the University general education requirements. During the first three years of the professional program, students devote their time to the study of the biomedical and pharmaceutical sciences and pharmacy practice. Areas of study include biochemistry, microbiology, medicinal chemistry, pharmaceutics, pharmacology, social and administrative pharmacy, and therapeutics. The final professional year is entirely experiential and designed to fully prepare students to enter the profession as pharmacist patient care providers.

A program of selected electives allows the student to obtain further educational experience in specialized areas. Students in the professional program may choose elective courses in community pharmacy practice, management, research and teaching, hospital and institutional pharmacy practice, and a variety of therapeutic-based topics.

In addition to their formal educational program, to become registered pharmacists, students must complete practical experience under the direction of registered pharmacists and pass the NAPLEX and MPJE exams administered by the National Association of Boards of Pharmacy.

Career opportunities exist in the fields of community pharmacy, ambulatory care pharmacy, hospital and other institutional pharmacy, federal or state government service, public health agencies, and with the pharmaceutical industry. Those with advanced degrees or residency training are in demand for research positions and in pharmaceutical education.

High School Preparation: In addition to the general University admission requirements, algebra, trigonometry, biology, chemistry, physics and a course in computers are recommended.

Pre-pharmacy Program: The pre-pharmacy curriculum, which requires a minimum of two years of full-time study, may be taken at any accredited college or university. Students at the University of Montana-Missoula may enter the pre-pharmacy program during any semester. It is recommended that students considering pharmacy as a major declare a pre-pharmacy major as early as possible in order to receive appropriate advising. Upon designating pre-pharmacy as a major, students will be assigned an advisor within the pharmacy program.

Professional Pharmacy Program: Students must apply for admission to the professional program. Class size in the professional pharmacy program is restricted and admission to the program is competitive. For information on program requirements and the application procedure, refer to Prospective Students on the pharmacy program website (http://health.umt.edu/pharmacy/)

Department of Pharmacy Practice

Michael P. Rivey, Chair

The Department of Pharmacy Practice provides academic course work for the Doctor of Pharmacy and Masters degrees, conducts research in the broad area of health care, and provides service to the profession of pharmacy and other health care disciplines.

Faculty

Professors

Douglas R. Allington, Professor

Donna G. Beall, Professor and Director, Student Affairs

Jean T. Carter, Ph.D., Professor and Coordinator, Assessment

Vincent J. Colucci, Professor

Gayle A. Hudgins, Professor and Director, Experiential Programs

Sarah Johnston Miller, Professor

Michael P. Rivey, Professor and Chair

Associate Professors

Annjeanette E. Belcourt-Dittloff, Associate Professor

Sherrill Brown, Associate Professor

Department of Biomedical and Pharmaceutical Sciences

Elizabeth A. Putnam, Chair

The Department of Biomedical and Pharmaceutical Sciences offers a curriculum in support of the Doctor of Pharmacy (Pharm.D.) degree and graduate programs in the biomedical and pharmaceutical sciences. Degree programs include the M.S. in Neuroscience, Pharmaceutical Sciences, Toxicology and Medicinal Chemistry; and the Ph.D. in Neuroscience, Pharmaceutical Sciences and Drug Design, Toxicology, and Medicinal Chemistry. These programs provide education and training in pharmacology, toxicology, neurobiology, neurochemistry, medicinal chemistry, and molecular genetics. Program graduates are well prepared for careers in academia, government and industry.

Back to Top

- BMED 545 - Research Lab Rotations
  Credits: 2 TO 3. (R 6) Offered autumn and spring. Prereq., BMED 443 or graduate standing. Experience in research methods in departmental research laboratories. Level: Graduate
- BMED 581 - Research Seminar Biomed
  Credits: 1. (R-9) Offered autumn and spring. Oral and written presentations of experimental research results and selected literature topics in biomedical science. Level: Graduate
- BMED 582 - Research Seminar Neurosci.
  Credits: 1. (R-9) Offered autumn and spring. Oral and written presentations of experimental research results and selected literature topics in neuroscience. Level: Graduate
- BMED 583 - Research Seminar Toxicol
  Credits: 1. (R-9) Offered autumn and spring. Oral and written presentations of experimental research results and selected literature topics in toxicology. Level: Graduate
- BMED 593 - Current Research Literature
  Credits: 1. (R-6) Offered autumn and spring. Readings and discussion of current research literature. Level: Graduate
- BMED 594 - Seminar
  Credits: 1. (R 6) Offered autumn and spring. Prereq., senior or graduate standing. Level: Graduate
- BMED 595 - Special Topics
  Credits: 1 TO 9. (R 9) Offered intermittently. Prereq., senior or graduate standing. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics. Level: Graduate
- BMED 596 - Independent Study
  Credits: 1 TO 9. (R 9) Offered every term. Level: Graduate
- BMED 597 - Research (MS)
  Credits: 1 TO 9. (R 10) Offered every term. Level: Graduate
- BMED 599 - Thesis (MS)
  Credits: 1 TO 9. (R 10) Offered every term. Level: Graduate
- BMED 605 - Biomedical Research Ethics
  Credits: 1. Offered spring. Overview of biomedical research ethics and regulations. Topics include ethics and morality in science, scientific integrity, conflicts of interest, human and animal experimentation, intellectual property, plagiarism. Level: Graduate
- BMED 609 - Biomedical Statistics
  Credits: 3. Offered autumn. Experimental design and statistical analysis relevant to the biomedical sciences. Level: Graduate
- BMED 610 - Neuropharmacology
  Credits: 3. Offered alternate years. Prereq., BMED 613 or 661 or consent of instr. Focus on current areas of research and research technologies in neuropharmacology. Development of presentations and research grant proposals. Level: Graduate

- BMED 613 - Pharmacology I

  Credits: 4. Offered autumn. Prereq., BIOC 380 or equiv. Fundamentals of pharmacology and drug action. Level: Graduate

- BMED 614 - Pharmacology II

  Credits: 4. Offered spring. Prereq., BMED 613. Fundamentals of pharmacology and drug action. Continuation of BMED 613. Level: Graduate

- BMED 615 - Molecular Pharmacology

  Credits: 3. Offered alternate years. Prereq., consent of instr. Focus on the basic theories, principles, and practical implications of receptor pharmacology to quantify drug activity. Major emphasis in pharmacodynamics with some time devoted to related pharmacokinetic parameters. Level: Graduate

- BMED 620 - Cardiovas Pharm & Tox

  Credits: 3. Offered alternate years. Prereq., BMED 613 or 641, or consent of instr. Recent advances in pharmacology and toxicology of the cardiovascular system. In-depth study of regulatory mechanisms and the effect of immune response and xenobiotics on cardiovascular function. Level: Graduate

- BMED 621 - Drug Design

  Credits: 4. Offered alternate years. Prereq., Organic Chemistry and Biochemistry or consent of instr. Introduction to the main concepts in medicinal chemistry. Laboratory experience in instrumental analysis, interpreting NMR, MS cleavage, and structure elucidation Level: Graduate

- BMED 622 - Drug Pharmacodynamics

  Credits: 4. Offered alternate years. Organic Chemistry and Biochemistry or consent of instr. Introduction and topical coverage of how drugs form complexes with biological targets to cause an array of responses. Level: Graduate

- BMED 623 - Drug Diversity

  Credits: 3. Offered alternate years. Organic Chemistry and Biochemistry or consent of instr. Topics in chemogenomics and diversity oriented synthesis will be covered. Level: Graduate

- BMED 624 - Methods in Medicinal Chemistry

  Credits: 3. Offered intermittently. Prereq., Organic chemistry and biochemistry or consent of instr. Novel approaches to small molecule therapeutics for disease targeting. Level: Graduate

- BMED 625 - Drug Synthesis

  Credits: 3. Offered intermittently. An introduction to the past and current synthetic approaches and total syntheses of biologically active drugs. Level: Graduate

- BMED 626 - Res Meth Biochem Pharm

  Credits: 1 TO 3. (R-6) Offered every term. Prereq., consent of instr. Laboratory course intended to familiarize students with the instruments, and expertise of current research techniques in the biomedical sciences. Level: Graduate

- BMED 627 - Professional Development

  Credits: 1. Offered autumn and spring. Prereq., Organic Chemistry and Biochemistry or consent of instr. Developmental training in presentations, writing, reviewing, literature research, teaching, research methods, grant writing, ethics, and business aspects in medicinal chemistry. Level: Graduate

- BMED 628 - Grantsmanship

  Credits: 1. This course is designed to provide graduate students and postdoctoral fellows with the necessary background, tools and hands on experience to be able to confidently write and submit a research grant. The focus is on preparing a fellowship application although training will be provided for more typical investigator initiated grants. The entire process from conception, preparation, review and revision will be covered. This course will be a requirement for students on training grants. No prerequisites are required. Level: Graduate

- BMED 630 - Pharmacogenetics

  Credits: 3. Offered alternate years. Prereq., BIOC 380 or 481. The genetic basis of differential drug activity. Level: Graduate

- BMED 632 - Advanced Pharmacokinetics

Credits: 4. Offered Fall. Recent developments and emerging concepts in theoretical and experimental pharmacokinetics, pharmacogenomics, and drug disposition. Critical analysis of the current literature. Level: Graduate

- BMED 637 - Topics in Pharm Sci

  Credits: 1. (R-12) Offered autumn and spring. Current topics in the pharmaceutical sciences, including pharmacology, pharmacokinetics, medicinal chemistry, and drug design and development. Level: Graduate

- BMED 641 - Toxicology I-Principles

  Credits: 3. Offered autumn. Prereq., BIOC 481 or equiv. Introduction to toxicology. Topics include general principles, risk assessment, organ system toxicology, introduction to carcinogenesis, and genetic toxicology. Level: Graduate

- BMED 642 - Toxicology II-Agents

  Credits: 3. Offered spring. Prereq., BMED 641. Toxic agents and the diseases caused by those agents. Includes common toxicants in the environment and occupational settings as well as drug induced toxicity. Level: Graduate

- BMED 643 - Cellular & Molecular Tox

  Credits: 3. Offered autumn. Prereq., BMED 641. Cellular and molecular mechanisms of toxicity. Includes apoptosis, regulation of cell cycle, genetic toxicology, and signal transduction pathways in toxicity. Level: Graduate

- BMED 644 - Immunopharm/Immunotox

  Credits: 3. Offered alternate years. Prereq., MICB 410 or equiv. The impacts of xenobiotic agents on the immune system. Level: Graduate

- BMED 645 - Respiratory Toxicology

  Credits: 3. Offered alternate years. Prereq., BMED 641. The lung and associated immune systems and their response to inhaled immunogenic and toxicological agents. Level: Graduate

- BMED 646 - Neurotoxicology

  Credits: 3. Offered alternate years. Prereq., BMED 641 or 661. Mechanisms of major neurotoxins and neurological disease. Level: Graduate

- BMED 647 - Topics in Toxicology

  Credits: 1 TO 3. (R-9) Offered autumn or spring. Prereq., BMED 613, or 641, or 661. Current topics in toxicology. Level: Graduate

- BMED 657 - Topics in Immunology

  Credits: 1 TO 3. (R-9) Offered autumn or spring. Prereq., MICB 410 or equiv. Current topics in immunology. Level: Graduate

- BMED 661 - Neuroscience I

  Credits: 4. Offered autumn. Prereq., BIOC 380 or equiv. Overview of the structure and function of the nervous system. Level: Graduate

- BMED 662 - Neuroscience II

  Credits: 4. Offered spring. Prereq., BMED 661. Fundamentals of developmental neuroscience, behavioral and cognitive neuroscience and computational neuroscience. Level: Graduate

- BMED 667 - Topics in Neurobiology

  Credits: 1 TO 3. (R-9) Offered every year. Prereq., BMED 661. Current topics in neuroscience. Level: Graduate

- BMED 668 - Neuropathology

  Credits: 4. Prereq., BMED 347 or BMED 661. This course will provide a comprehensive overview of the pathological findings in neurological disease, and their biological basis. This course will provide neuroscience graduate students with a clear description of molecular and cellular processes and reactions that are relevant to the normal and abnormal functioning of the nervous system. Level: Graduate

- BMED 694 - Seminar

  Credits: 1 TO 3. (R 6) Offered autumn and spring. Prereq., senior or graduate standing. Level: Graduate

- BMED 697 - Research (PhD)
  Credits: 1 TO 9. (R-50) Offered every term. Level: Graduate
- BMED 699 - Dissertation (PhD)
  Credits: 1 TO 9. (R-50) Offered every term. Level: Graduate

Pharmacy

Back to Top

- PHAR 110N - Use & Abuse of Drugs
  Credits: 3. Offered autumn and spring. Drug dependence and abuse. Course Attributes: Natural Science Course (N)
- PHAR 191 - Special Topics
  Credits: 1 TO 6. (R 16) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.
- PHAR 324 - Medicinal Plants
  Credits: 2 TO 3. Offered autumn. Same as AAHS 324. Plants and other natural substances which nourish, heal, injure, or alter the conscious mind.
- PHAR 328 - Antimicrobial Agents
  Credits: 3. Offered spring. Prereq., BIOM 400. Chemical characteristics, biochemical mechanisms, and pharmacological properties of drugs used in treating infections caused by microorganisms.
- PHAR 331 - Pharmaceutics
  Credits: 4. Offered spring. Prereq., CHMY 222, first professional year standing. Physical pharmacy and dosage forms.
- PHAR 341 - Physiological Systems I
  Credits: 4. Offered autumn. Prereq., CHMY 222, PHSX 205N, BIOB 260/261. Principles of anatomy, normal and abnormal physiology.
- PHAR 342 - Physiological Systems II
  Credits: 4. Offered spring. Prereq., PHAR 341. Continuation of 341.
- PHAR 361 - Pharm Sci Lab I
  Credits: 1. Offered autumn. Coreq., PHAR 300, PHAR 341. Laboratory experience in the pharmaceutical sciences.
- PHAR 362 - Pharm Sci Lab II
  Credits: 1. Offered spring. Prereq., PHAR 361; coreq., PHAR 331 and 342. Continuation of 361.
- PHAR 371 - Integrated Studies I
  Credits: 1. Prereq., first professional year standing in pharmacy. Small group conferences designed to develop professional skills while integrating material from other pharmacy courses.
- PHAR 372 - Integrated Studies II
  Credits: 1. Prereq., PHAR 371. Continuation of 371.
- PHAR 381 - Pharmaceutical Biochemistry
  Credits: 4. Offered every Autumn. Prereq., admission to Pharmacy School. Fundamental biochemistry from a pharmaceutical sciences perspective; management of genetic information, molecular structure and function, and metabolic reactions, especially as relating to drug actions and targets.
- PHAR 390 - Undergraduate Research
  Credits: 1 TO 3. (R-6) Offered autumn and spring. Prereq., consent of instr. Individual participation in library or laboratory research. Course Attributes: Research & Creative Schlrshp
- PHAR 391 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHAR 421 - Medicinal Chem I
  Credits: 3. Offered autumn. The chemistry of organic compounds used medicinally and their biochemical mechanisms of action.
- PHAR 422 - Medicinal Chem II
  Credits: 3. Offered spring. Prereq., BMED 421. Continuation of 421.
- PHAR 430 - Pharmacogenetics
  Credits: 2. Offered each semester online. Prereq., BMED 421, 432. The genetic basis of differential drug activity.
- PHAR 432 - Clinical Pharmacokinetics
  Credits: 3. Offered autumn. Principles of pharmacokinetics including the processes of ADME (absorption, distribution, metabolism, and elimination) and applications in the clinical setting.
- PHAR 443 - Pharmacol & Toxicol I
  Credits: 4. Offered autumn. Prereq., second professional year standing. Basic principles of pharmacology, toxicology and therapeutics.
- PHAR 444 - Pharmacology & Toxicol II
  Credits: 4. Offered spring. Prereq., BMED 443. Continuation of 443.
- PHAR 445 - Immunopharm/Immunotox
  Credits: 3. Offered in alternating years. Prereq., consent of instr. This course is designed to introduce advanced undergraduate students and professional Pharmacy students to various aspects involved in the development and mechanisms of action of immunomodulatory drugs and chemicals.
- PHAR 484 - Introduction to Toxicology
  Credits: 3. Offered every autumn. Prereq., Biology, Chemistry, and Biochemistry; or consent of instructor. Online instruction provides students with a comprehensive introduction to environmental health and the principles of toxicology. Included: Human toxic substance exposure, processing of toxic substances and the impact on cells and tissues including genetic and epigenetic factors. Graduate increment includes design of a research study in toxicology and leading class
- PHAR 485 - Environmental Health
  Credits: 3. Offered every spring. Prereq., Biology, Chemistry, Biochemistry, and Intro. Toxicology; or consent of instructor. Online instruction for the principles, concepts and applications of environmental health. Included: Methods and paradigm used in the field ranging from ecology to epidemiology, from toxicology to environmental psychology, from genetics to ethics. This course will provide students with a comprehensive introduction to environmental health. This includes an overview of the methods and paradigms used in the field, ranging from ecology to epidemiology, from toxicology to environmental psychology, and from genetics to ethics.
- PHAR 486 - Epidem Translational
  Credits: 3. Offered every Autumn. Prereq., Biology, Chemistry, Biochemistry, Statistics, and Intro. Toxicology; or consent of instructor. Online instruction to introduce the principles and methods for epidemiologic and clinical investigation, including biostatistical applications. Students will learn to conduct and interpret epidemiological and clinical studies on environmental toxicology. Graduate increment includes design and analysis of an epidemiological study and leading class discussions.
- PHAR 490 - Undergraduate Research
  Credits: 1 TO 3. (R-6) Offered autumn and spring. Prereq., consent of instr. Individual participation in library or laboratory research. Course Attributes: Research & Creative Schlrshp
- PHAR 491 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- PHAR 494 - Seminar
  Credits: 1 TO 6. (R-6) Offered intermittently. Varying topics.
- PHAR 591 - Special Topics
  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.

School of Physical Therapy and Rehabilitation Science

Anita M. Santasier, Chair

The professional program in physical therapy grants the Doctor of Physical Therapy (DPT) degree. The program has an entry-level DPT program, an entry-level DPT/MBA program, and a post-entry level transitional DPT curriculum leading to the DPT degree. The following section describes the profession and the pre-professional requirements and application procedures. This information also is available on the program website.

The Profession

Physical Therapy is a health care profession concerned with the habilitation and rehabilitation of individuals with limitations resulting from pathological, surgical, or traumatic conditions. The profession is also concerned with health, wellness and prevention of disability in an effort to promote maximal use of an individual's capacities and reduce their risk of illness. Physical therapists are trained to evaluate neurological, musculoskeletal, cardiovascular, respiratory, and integumentary disorders. Exercise and physical agents, such as heat, cold, light, electricity, and massage are used to promote healing, relieve pain, maintain or restore strength, and improve joint range of motion and functional capabilities. Physical therapists play key roles in: 1) the physical therapy diagnosis and treatment of musculoskeletal injuries, 2) wellness and injury prevention, 3) rehabilitating injured workers to return to their jobs, 4) rehabilitating senior citizens after debilitating disease to enable them to remain independent, 5) helping handicapped children to live within the least restrictive environment, 6) preventing and treating sports-related injuries, and 7) conducting research in basic and clinical sciences. Knowledge of the psychological and social ramifications of disability affecting the individual and his or her family is an integral part of physical therapy intervention.

Physical therapy is practiced in diverse settings, including hospitals, clinics, skilled nursing facilities, sports medicine programs, public schools, and private practices. Legislation in Montana permits direct public access to physical therapists for evaluation and treatment without a physician referral. Even so, physical therapists remain committed to functioning as an integral member of the health care team.

The physical therapy educational program at the University of Montana seeks to prepare physical therapists who have a broad base of skills upon graduation, and who will be able to implement physical therapy services in many settings, especially rural environments. Rural settings require a physical therapist to serve not only as a provider of direct patient care, but also to fulfill the roles of administrator, supervisor, teacher, consultant, and researcher. Students successfully completing the professional program meet the competencies for physical therapy as determined by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association, receive a Doctor of Physical Therapy degree, and are prepared for state licensure.

The Physical Therapy Program is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association through 2018.

High School Preparation:

Specific high school courses are not required but a background is recommended in mathematics, chemistry, biology, physics, English, and communication skills.

Pre-Professional Physical Therapy Curriculum and Application Process

Students wishing to apply to the professional physical therapy program at the University of Montana-Missoula may select any major for their undergraduate degree. While pre-physical therapy is not a degree-granting major at the University, prospective applicants should list pre-professional physical therapy (PPPT) as their second major. This will allow them also to receive advising from the School of Physical Therapy and Rehabilitation Science in order to assure adequate preparation for the professional program. In addition to completing a baccalaureate degree, applicants must take the prerequisite courses and meet additional application requirements listed on our website. All prerequisite courses must be taken for a traditional letter grade and must be completed with a grade of "C" (2.00) or better.

Department Faculty

Associate Professor

James J. Laskin, Associate Professor, Physical Therapy
Ryan L. Mizner, Associate Professor
Anita Santasier, Chair

Assistant Professor

Jennifer Bell, Clinical Assistant Professor/Associate Director of Clinical Education
David Levison, Clinical Assistant Professor, Director of Clinical Education
Sambit Mohapatra, Assistant Professor, Physical Therapy

Alex Santos, Assistant Professor, Physical Therapy, Director of Motor Control Laboratory

Affiliates

Kimberly Mize, Affiliated Clinical Faculty

Allied Health: Health Sciences

Back to Top

- AHHS 582 - Implementing Value Based System Change in Rehabilitation
  Credits: 1. Offered autumn, spring, summer. Prereq. Enrolled in the Rehabilitation Business Administration Certificate. Enhance the learner's appreciation of the management, data, and system skills needed to successfully innovate and implement necessary value based practice changes to compete in the changing rehabilitation healthcare landscape. Level: Graduate
- AHHS 584 - Leadership to Develop Innovative Clinical Practice for Value Based Care
  Credits: 2. This course will explore the drivers of health care reform, the key strategies to implement value based care. The required leadership and organizational characteristics to support innovations and transformative health care. Level: Graduate
- AHHS 599 - System Skills to Thrive in a Changing Health Care Environment - Capstone Project
  Credits: 4. This course will culminate in a capstone project describing the concept of system skills (ie., intrinsic interest in data, the ability to devise solutions to problems identified by the data; and understanding of how to implement practice innovations on a large scale) with relevance to physical therapy practice. The course has three components 1) the importance of measurement and the resultant systems data, 2) the concept of 'positive deviants' and provides case examples of innovators who are using systems data to solve clinical challenges, and 3) performance of a capstone project by the student related to their clinical issue. Level: Graduate

Physical Therapy

Back to Top

- P T 503 - PT and Health Care System
  Credits: 4. Offered autumn. Enrolled in entry-level DPT program or permission of instructor. An introduction to physical therapy and its relationship to the health care system. Topics include introduction to PT as a profession, medical terminology, medical records, teaching and learning, ethics, laws and professional issues in physical therapy. Level: Graduate
- P T 510 - Applied Clinical Anatomy
  Credits: 5. Offered autumn. Enrolled in entry-level DPT program or permission of instructor. Anatomy of the neuromusculoskeletal system and body cavities in relation to movement and function with clinical correlates. Course lab fee. Level: Graduate
- P T 516 - Movement System Exam & Eval
  Credits: 5. Offered autumn. Enrolled in entry-level DPT program or permission of instructor. Principles of musculoskeletal examination and evaluation including posture, neurologic screen, palpation, measurement of ROM and muscle performance, assessment of muscle length, and joint play. Level: Graduate
- P T 519 - Musculoskeletal Management I
  Credits: 4. Offered spring. Enrolled in entry-level DPT program or permission of instructor. Principles of musculoskeletal examination, evaluation, and intervention. The focus is application of anatomic and biomechanical principles when examining posture and movement, identification of abnormal movement patterns, and analysis of underlying neuromuscular impairments. Level: Graduate
- P T 520 - Development Through Life Span
  Credits: 2. Offered spring. Enrolled in entry-level DPT program or permission of instructor.Presentation of changes in adults they progress through the lifespan. Includes the

functional changes associated with aging, assessing and managng fall risk, performance and interpretation of functional outcome measures. Level: Graduate

- P T 523 - Clin Med I: Intro to Med

  Credits: 1. Offered autumn. Enrolled in entry-level DPT program or permission of instructor. Introduction to medical screening within the patient/client meanagment model. Level: Graduate

- P T 524 - Clin Med II Intro to Med

  Credits: 1. Offered spring. Enrolled in entry-level DPT program or permission of instructor. Introduction to pharmacology, medical management of selected orthopedic and hematological conditions. Level: Graduate

- P T 525 - Clin Med III

  Credits: 2. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Pathophysiology, medical and pharmacological management of hepatic, oncological, immunological diseases and organ transplantation. Level: Graduate

- P T 526 - Foundat Skills & Interv

  Credits: 3. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Basic skills of transfers, bed mobility, gait assistive device use, and soft tissue mobilization. Level: Graduate

- P T 527 - Physical & Electrophys Agents

  Credits: 3. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Physiology, indications, contraindications, and application of electrotherapy and physical agents. Theory and application of electrodiagnostic and electrotherapeutic procedures. Level: Graduate

- P T 529 - Biomechanics

  Credits: 4. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Principles of biomechanics and application to physical therapy. Level: Graduate

- P T 530 - Clin Appl Ex Phys

  Credits: 4. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor.. Principles and applications of the physiological adaptations to acute and chronic exercise stresses, exercise assessment/testing, prescription and progression of the exercise program, and the adaptations of exercise interventions in the clinical environment. Basic principles and application of Proprioceptive Neuromuscular Facilitation (PNF). Level: Graduate

- P T 536 - Neurosciences

  Credits: 5. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Anatomy of the head and neck, and neuroanatomy of the human nervous system with emphasis on evaluation of central nervous system lesions and pathological conditions, clinical applications to physical therapy. Level: Graduate

- P T 560 - Clinical Reasoning I

  Credits: 1. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Introduction to the clinical reasoning process in physical therapy, faculty research and scholarship options, and laboratory orientation. Level: Graduate

- P T 563 - Cardiopulmonary PT

  Credits: 3. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Cardiovascular and pulmonary pathology, pharmacology, and differential diagnosis. Physical therapy assessment and interventions for patients with cardiovascular and/or pulmonary disease. Level: Graduate

- P T 565 - PT for Children

  Credits: 2. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Normal development throughout childhood. Physical therapy examination, Eevaluation and intervention of children with neuromotor and musculoskeletal physical therapy rehabilitation of childrendysfunction including. Pphysical therapy for children in school systems. Level: Graduate

- P T 567 - Neurorehabilitation I

Credits: 3. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Neurologic physical therapy assessment and intervention of adults. principles of neuroplasticity, motor control, motor learning and application to physical therapy neurorehabilitation. Includes wheelchair seating and mobility assessment and prescription. Level: Graduate

- P T 568 - Neurorehab II

  Credits: 3. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Neurologic physical therapy assessment and intervention of adults. Principles of NeuroPlasticity, Motor control, motor learning and application to physical therapy neurorehabilitation. Includes assessment and treatment of vestibular system and conditions. Neurologic physical therapy assessment and intervention of adults with traumatic brain injury or spinal cord injury, degenerative neurological conditions, neurological diseases. Also includes assessment and treatment of vestibular system and conditions. Level: Graduate

- P T 569 - Musculoskeletal Mgt II

  Credits: 5. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Principles of musculoskeletal examination, evaluation, and intervention for the hip, knee, ankle, foot, and lumbar spine. Level: Graduate

- P T 570 - Psych of Illness & Disabil

  Credits: 2. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Psychologicalsocial response to illness and disability to include patient motivation and, patient/professional interaction, and treatment of for persons with chronic paindisability throughout the lifespan. Level: Graduate

- P T 572 - Practice & Administration

  Credits: 2. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Practice management and operations explored with emphasis on strategic planning, human resource management, regulatory compliance/risk management, quality improvement and coding payment. Level: Graduate

- P T 573 - Musculoskeletal Mgt III

  Credits: 4. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Principles of musculoskeletal examination, evaluation, and intervention for the shoulder, elbow, wrist, hand, temporomandibular joint (TMJ), thoracic and cervical spine. Level: Graduate

- P T 576 - Clinical Reasoning II

  Credits: 2. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. This course will build on the foundations established in Clinical Reasoning I. Issues related to clinical and research ethics will be discussed. The principles of evidence based practice (EBP), including the application of evidence and the creation of evidence, will be part of the discussion. Limitations of EBP and it role in the changing health care environment, critical appraisal of the literature, statistical knowledge, and weighing evidence for clinical decision making will be presented. A writing assignment, application of debate/persuasive argument techniques, and collaborative group exercise will be a part of this course. Level: Graduate

- P T 577 - App Clin Teaching in PT

  Credits: 1 TO 2. Offered autumn. Teaching experience in practical application of clinical therapy. Level: Graduate

- P T 578 - PT for Select Populations

  Credits: 6. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Physical therapy assessment and interventions are addressed in the areas of occupational health, pregnancy and pelvic floor dysfunction, wound management and prosthetic management. This course also addresses the needs and concerns of special populations including recreational and sporting opportunities. Level: Graduate

- P T 582 - Clinical Experience

  Credits: 1. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. A mix of classroom and clinical experiences to introduce students to the expectations of professional practice. CR/NCR grading. Level: Graduate

- P T 583 - Integrated Clinical Experience-Orthopedic Physical Therapy

Credits: 2. Offered atumn and spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. An integrated, part-time clinical experience with emphasis on patient evaluation, treatment, and professional development. CR/NCR grading. Level: Graduate

- P T 584 - Integrated Clinical Experience-Neurologic Physical Therapy

  Credits: 2. Offered autumn and spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. An integrated, part-time clinical experience with emphasis on patient evaluation, treatment, and professional development. CR/NCR grading. Level: Graduate

- P T 587 - Clinical Internship I

  Credits: 4. Offered summer. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Eight weeks of full-time clinical experience with emphasis on developing patient evaluation and treatment skills. CR/NCR grading. Level: Graduate

- P T 589 - Clinical Internship II

  Credits: 5. Offered summer. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Eight weeks of full-time clinical experience with emphasis on learning about administrative issues, problem solving, time management, and communication skills. Continuation of development of patient treatment and evaluation skills. CR/NCR grading. Level: Graduate

- P T 598 - Internship

  Credits: 1. Offered summer. Prereq., Successful completion of all prior clinical experiences, and previous DPT coursework. Eight weeks of full-time clinical experience with emphasis on learning about administrative issues, problem solving, time management, and communication skills. Continuation of development of patient treatment and evaluation skills. Only CR/NCR grading. Level: Graduate

- P T 626 - Clin Med IV

  Credits: 3. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Course will focus on the role of the physical therapist in a Direct Access environment. Pathology, differential screening, pharmacotherapeutics, evaluation and management of integumentary, gastrointestinal, endocrine/metabolic and urogenital disease. Course will address abdominal and dermatological screening. Level: Graduate

- P T 627 - Prevention & Wellness Educ

  Credits: 2. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Nutrition, health promotion, patient and support network education, exercise/fitness, disease and injury prevention, life span emphasis. Level: Graduate

- P T 628 - PT Student Clinic

  Credits: 1. Offered autumn and spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Open to 2nd and 3rd year DPT students. Supervised service learning experience for students providing physical therapy rehabilitation and wellness activities to individuals without health insurance. Level: Graduate Course Attributes: Service Learning/Volunteer Service Learning

- P T 641 - Introduction to Health-Focused Lifestyle Intervention

  Credits: 2. Offered autumn, spring. Prereq. must be enrolled in HFLI certificate program. Introduces students to Health-Focused Lifestyle Interventions [HFLI] and builds the context for physical-therapist led lifestyle intervention teams to include, exploring the public health context for HFLI teams, identifying target patient populations, and presenting the core competencies required to participate in and lead HFLI teams. Level: Graduate

- P T 642 - Defining Framework for Measuring, Planning and Delivering Health-Focused Lifestyle Interventions

  Credits: 2. Offered autumn, spring. Prereq., must be Enrolled in HFLI certificate program and prerq., or coreq., of PT 641 required. Introduces students to health belief and behavior models as well as a structured methodology for assessment of health status for individuals and at a community level. Level: Graduate

- P T 643 - Principles of Interpersonal and Organizational Health Coaching

  Credits: 2. Offered autumn, spring. Prereq., must be enrolled in HFLI certificate program and PT 641 and PT 642 required. Introduction to health coaching principles, motivational interviewing,

and the influence of health belief and behavior models on developing individual and community level action plans. Level: Graduate

- P T 644 - Competencies for Health-Focused Lifestyle Intervention [HFLI] Teams

  Credits: 2. Offered autumn, spring. Prereq., must be enrolled in a PT program and PT 641, PT 642. Provides students with an overview of the knowledge, skills, and abilities in four specific content areas that are important for ensuring success of physical therapist led HFLI teams. Level: Graduate

- P T 645 - Developing a Health-Focused Lifestyle Intervention Business Plan

  Credits: 2. Offered autumn, spring. Prereq., must be enrolled in HFLI certificate program and PT 641, PT 642, PT 643, and PT 644 required. Guides students through a structured process to develop an achievable strategic plan for a physical therapist-led HFLI program or business. Level: Graduate

- P T 649 - Health-Focused Lifestyle Intervention Capstone Experience

  Credits: 2. Offered spring, autumn. Prereq., must be enrolled in HFLI certificate program and PT 641, PT 642, PT 643, PT 644, and PT 645 required. Provides students with an onsite capstone experience that is designed to provide students the opportunity to interact with faculty in a variety of classes, discussions and presentations. Students will also present their business plans to and receive feedback from faculty with significant HFLI business experience. Level: Graduate

- P T 650 - Screening for Medical Disorder

  Credits: 2. Offered autumn, spring. Prereq. Enrolled in t-DPT curriculum. PT's role, responsibilities, and decision-making processes regarding appropriate referral of a patient to a physician for evaluation of medical conditions outside the scope of physical therapy. Level: Graduate

- P T 651 - Med Imaging in Rehabilitation

  Credits: 2. Offered autumn, summer. Prereq. Enrolled in t-DPT curriculum. Provide the physical therapy clinical learner with the tools needed to interpret and apply specialized medical imaging information to the rehabilitation patient. Level: Graduate

- P T 652 - Pharmacology in Rehab

  Credits: 2. Offered autumn, spring. Prereq., in a PT curriculum. Provide clinical learners with the primary drug classes and the physiologic basis of their action. Level: Graduate

- P T 653 - Legal and Ethical Issues

  Credits: 1. Offered spring, summer. Prereq. Enrolled in a PT curriculum. Foundational information as to the legal, ethical and administrative decision making process often facing physical therapists in clinical practice. Level: Graduate

- P T 654 - Clinical Decision Making

  Credits: 1. Offered autumn, spring. Prereq. Enrolled in a PT curriculum. Provide ways to utilize the Guide to PT Practice for effective and efficient clinical decision making. Level: Graduate

- P T 655 - Business and Marketing

  Credits: 2. Offered spring, summer. Prereq. Enrolled in a PT curriculum. Enhance the PT clinical learner's appreciation of business and management practices needed to succeed within the current healthcare landscape. Level: Graduate

- P T 656 - Coding and Reimbursement

  Credits: 1. Offered autumn, summer. Prereq. Enrolled in a PT curriculum. Educate the clinical learner in analyzing reimbursement of current billing, accounts receivable, collection procedures and use of proper coding. Level: Graduate

- P T 657 - Professionalism

  Credits: 2. Prereq. Enrolled in a PT curriculum. This seminar course provides the clinical learner with the opportunity to analyze and discuss the roles/responsibilities and challenges/opportunities inherent in doctoral level physical therapy practice. Only CR/NCR grading. Level: Graduate

- P T 658 - Critical Assessment

  Credits: 3. Offered autumn, spring. Prereq. Enrolled in t-DPT curriculum. Develop skills in the application of evidence-based practice as a model for effective clinical decision-making. Level: Graduate

- P T 659 - Capstone Project

  Credits: 4. Prereq. Enrolled in t-DPT curriculum. Development of the skills needed by physical therapists to fulfill their role as effective participants in the research process. Guide student

through the capstone case report completion process. Only CR/NCR grading. Level: Graduate

- P T 660 - Mgmt of MS Disorders

  Credits: 2. Offered autumn, spring, summer. Prereq., enrolled in t-DPT curriculum. PT's role, responsibilities, and decision-making processes regarding patients with musculoskeletal disorders. Level: Graduate

- P T 661 - Mgmt of CVP Disorders

  Credits: 2. Offered autumn, spring and summer. prereq., Enrolled in t-DPT curriculum. PT's role, responsibilities and decision-making processes regarding appropriate patient management of persons with cardiovascular and/or pulmonary disorders. Level: Graduate

- P T 662 - Mgmt of Neuro Disorders

  Credits: 2. Offered autumn, spring, summer. Prereq., enrolled in t-DPT curriculum. PT's role, responsibilities, and decision-making processes regarding patients with neurological disorders. Level: Graduate

- P T 663 - Mgmt of Integ Disorders

  Credits: 2. Offered autumn, spring, summer. Prereq., Enrolled in t-DPT curriculum. PT's role, responsibilities, and decision-making processes regarding patients with integumentary disorders. Level: Graduate

- P T 664 - Wellenss and Health Promotion

  Credits: 2. Offered autumn, spring, summer. Prereq., Enrolled in t-DPT curriculum. PT's role, responsibilities, and decision-making processes regarding patient/client involvement with wellness and health promotion. Level: Graduate

- P T 672 - Research in PT II

  Credits: 2. Offered autumn. Data analysis, writing of research manuscript, presentation of project. Level: Graduate

- P T 676 - Clinical Reasoning III

  Credits: 3. Offered autumn. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Course addresses elements of clinical mastery, professional development, career options, ethics and patient advocacy. Each student develops and presents a case report and provides peer review and feedback. Level: Graduate

- P T 679 - Trends & Scholarly Act.

  Credits: 1 TO 6. (R-6) Offered autumn and spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor. Students are required to complete at least 6 credits during their 2nd and 3rd years. Seminar sections that focus on advanced clinical topics in physical therapy and/or engagement in research with an individual faculty advisor. Traditional or CR/NCR grading as determined by instructor. Level: Graduate

- P T 680 - Clinical Internship

  Credits: 12. Offered spring. Enrolled in entry-level DPT program and passed all previous DPT courses or permission of instructor.Prereq., Successful completion of all prior DPT coursework and clinical experiences. Final summative experience is a 15 week clinical internship. Includes writing and presentation of case study or special project. CR/NCR grading. Level: Graduate

- P T 690 - Research

  Credits: 1 TO 10. (R-10) Prereq., consent of instr. Traditional or CR/NCR grading as determined by instructor. Level: Graduate

- P T 691 - Special Topics

  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Traditional or CR/NCR grading as determined by instructor. Level: Graduate

- P T 692 - Independent Study

  Credits: 1 TO 4. (R-6) Prereq., consent of instructor. Traditional or CR/NCR grading as determined by instructor. Level: Graduate

- P T 694 - Seminar/Workshop

  Credits: 1 TO 6. (R-6) Traditional or CR/NCR grading as determined by course instructor. Level: Graduate

- P T 699 - Thesis/Dissertation

  Credits: 1 TO 10. (R-10) Offered every term. Only CR/NCR grading. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate

School of Social Work

Ryan Tolleson Knee, Chair

Social work is a human service profession concerned with the prevention of social problems, the maintenance of satisfying social relationships and the enhancement of human development. It focuses on people and their social environment. Social workers employ a range of knowledge and skills as the basis for constructive intervention on behalf of various client populations. The Bachelor of Arts and Master of Social Work degrees are offered. The Bachelor of Arts degree prepares graduates for generalist social work practice. The Master of Social Work degree prepares graduates for advanced integrated practice.

The undergraduate major in social work is available for those who wish to prepare for: (1) professional employment in the social services; (2) entry into a graduate school of social work; (3) graduate education in other helping service professions. The graduate degree in social work prepares graduates for advanced social work practice. Students can enroll in a two year full-time program or in a part-time option. See the University of Montana Graduate Catalog for a description of the Master of Social Work program. Both the Bachelor of Arts degree and the Master of Social Work degree are fully accredited by the Council on Social Work Education.

Department Faculty

Professor

Janet Finn, Professor
Cindy Garthwait, Professor & Interdisciplinary Gerontolology Program Coordinator
Ryan Tolleson Knee, Professor

Associate Professor

Keith Anderson, Associate Professor
Mary-Ann Bowman, Associate Professor & BSW Program Director
James Caringi, Associate Professor & Chair

Assistant Professor

Bart Klika, Assistant Professor
Laurie Walker, Assistant Professor

Adjunct

Kate Chapin, Director of Field Education
Kerrie Ghenie, Adjunct Assistant Professor
Charlie Wellenstein, Adjunct Assistant Professor

Social Work

Back to Top

- S W 100 - Intro Soc Welfare

  Credits: 3. Offered autumn and spring. Overview of human services, programs and problems in meeting social welfare needs, with emphasis on the complexity of social services and their historical development. Analysis of the value, attitudinal, economic and political factors that condition the provision of these services.

- S W 198 - Internship

  Credits: 1 TO 3. (R-3) Offered autumn and spring. Prereq., consent of instructor. Application of classroom learning in off campus internship placements. Prior approval must be obtained from the School of Social Work practicum coordinator and from the Center for Work-Based Learning. A maximum of 6 credits of Internship (198, 398,) may count toward graduation. Course Attributes: Internships/Practicums

- S W 200 - Intro Soc Wrk Pract

  Credits: 4. Offered autumn and spring. Prereq., SW 100, sophomore standing. Introduction to social work as a profession, including an examination of goals, guiding philosophy and basic assumptions. Emphasis on a generalist framework of social work practice and the development of beginning analytical and practice skills.

- S W 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- S W 300 - Hum Behav & Soc Environ

  Credits: 3. Offered autumn and spring. Prereq., SW 100 and 200, and junior standing in Social Work. Using the ecological-social systems framework, the integration of knowledge and concepts from the social and behavioral sciences for analysis and assessment of problems and issues relevant to professional social work practice. Course Attributes: Writing Course-Advanced

- S W 310 - S W Policy & Services

  Credits: 3. Offered autumn and spring. Prereq., SW 200; Social Work major. Social welfare history, program planning and analysis with review of selected policies on the national level. Includes international comparisons. Upper-division writing course. Course Attributes: Writing Course-Advanced

- S W 323 - Women & Soc Action Amer

  Credits: 3. Offered intermittently. Prereq., one of SW 100, SOCI 101S, or ANTY 101H or consent of instr. Same as WS 323. Focus on women's experiences of and contributions to social change in North, South and Central America in the mid to late-20th century. Through case studies, testimonials, discussions with activists and Internet connections examine social constructions of gender, compare forms of social action in diverse cultural, political and historical contexts, link practice to theories of social participation, and reflect on lessons learned from women's experiences.

- S W 325 - Introduction to Gerontology

  Credits: 3. Offered spring. Prereq., junior standing or consent of instr. An interdisciplinary discussion of the health and social issues of older persons, utilizing didactic presentations, clinical demonstrations, and curricular modules.

- S W 350 - S W Interven Meth I

  Credits: 3. Offered autumn and spring. Prereq., SW 200; Social Work major. The study and application of the generalist model of social work practice and related techniques and procedures for the assessment, intervention and prevention of problems in social functioning. Emphasis on individuals and families.

- S W 360 - S W Interven Meth II

  Credits: 4. Offered autumn and spring. Prereq., Social Work major. The study and application of the generalist model of social work practice and related techniques and procedures for the assessment, intervention and prevention of problems in social functioning. Emphasis on groups and team meetings.

- S W 391 - Special Topics

  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- S W 398 - Internship

  Credits: 1 TO 3. (R-3) Offered autumn and spring. Application of classroom learning in off campus internship placements. Prior approval must be obtained from the School of Social Work practicum coordinator and the Center for Work-Based Learning. A maximum of 6 credits of Internship (198, 398) may count toward graduation. Course Attributes: Internships/Practicums

- S W 400 - Social Work Research

  Credits: 3. Offered autumn and spring. Prereq., SW 360; Social Work major. Utilization of social research findings in social work practice. Techniques for the collection and analysis of clinical data. Special emphasis on research methodology for the assessment of practitioner and program effectiveness.

- S W 410E - Social Work Ethics

Credits: 3. Offered autumn and spring. Prereq., SW 200, admission into the BSW program. Analysis of specific ethical dilemmas from personal, professional and policy perspectives. Focus on ethical issues common to the helping professions and utilizing codes of ethics as guides to decision-making. The relationship between professional ethical issues and the development of social policy. Course Attributes: Ethical & Human Values Course

- S W 420 - Child Abuse/Child Welfare

  Credits: 3. Offered autumn. Prereq., junior standing or consent of instr. Signs and symptoms of physical and sexual abuse and neglect, family dynamics in abuse and neglect, the legal context, programs of prevention and intervention, foster care, special needs adoptions and related issues in child welfare.

- S W 423 - Addiction Studies

  Credits: 3. Offered spring. Same as PSYX 441 and SOCI 433. Examination of chemical dependency and behavioral compulsions, including alcohol and other drugs, gambling, eating disorders, sexual addictions. Ecosystems perspective on etiology, treatment, prevention, family dynamics, community response, and societal contributors. Students engage in a service learning community project which is integrated into the classroom through initial training, regular reflection, and other activities. Course Attributes: Service Learning/Volunteer Service Learning

- S W 450 - Children and Youth at Risk

  Credits: 3. Offered autumn or spring. Focus on the aspects of society that pose a threat to today's youth and the ramification of those threats on youth development and behavior. Resilience and protective factors for youth at risk and strategies to work with those youth. Attention to related systems in Missoula and Montana, including juvenile justice, mental health, child protection, substance abuse, and education.

- S W 455 - Social Gerontology

  Credits: 3. Offered autumn. Examination of the field of social gerontology, including an examination of the major bio/psycho/social/cultural/spiritual theories of aging, the service system, social and health issues, family and care-giving dynamics, social policy, and end of life concerns.

- S W 465 - Social Work Global Context

  Credits: 3. Offered spring even-numbered years. Prereq., upper-division or graduate standing. Examination of globalization, human rights, poverty, international aid, and gender issues; their relationship to social work and social justice, and strategies for action.

- S W 472 - Relational Development

  Credits: 3. Offered autumn and spring. This course covers strategies to help children whose early experiences deprived them of the nurturing needed to develop the essential capacity to connect with others. Emphasis is on significant discoveries in the fields of neuroscience, childhood trauma, grief and loss, child development, and family systems that have fueled the evolution of the Attachment Treatment philosophy to a broader method of caring for emotionally distress children, the Relational Development treatment approach.

- S W 475 - Death, Dying and Grief

  Credits: 3. Offered intermittently. Examination of death, dying and grief from an ecological perspective, focusing on the processes of dying and theories of grief. Emphasis on physical, social, psychological, spiritual, and cultural influences that surround death and grief. Consideration of cultural norms, attitudes toward death, medical, legal and ethical issues of dying. Focus on normal and complicated grief.

- S W 485 - Counseling Theories

  Credits: 3. Offered autumn. Prereq., PSYX 100S. Same as COUN 485 and PSYX 442. This course introduces students to the primary theories that constitute the intellectual foundation for common counseling and psychotherapy techniques, with a special focus on gender, interpersonal influence strategies, and diversity issues.

- S W 487 - Advanced Practice I

  Credits: 2. Offered every term. Concurrent SW 495; admission to the practicum program. Consideration and discussion of practicum-related matters, professional development, and issues confronting the profession.

- S W 488 - Advanced Practice II

  Credits: 2. Concurrent with SW 495; admission to the practicum program. Consideration and discussion of practicum-related matters, professional development, and issues confronting the profession.

- S W 491 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- S W 492 - Independent Study

  Credits: 1 TO 10. (R 10) Offered intermittently. Prereq., 10 credits in social work. Independent work under the University omnibus option. See index. Course Attributes: Omnibus Course

- S W 495 - Field Work Practicum

  Credits: 5. (R-10) Offered every term. Prereq., SW 350 and 360 and approved application to practicum coordinator. Practicum must be taken over two consecutive semesters for a total of 10 credits. Minimum of one credit per semester. Cumulative grade average of 2.75 or above in SW 100, 200, 300, 350 and 360 and a 3.0 grade average for SW 200, 350 and 360 are required. Supervised field work in public and private agencies and institutions. Successful completion of the field work practicum requires a passing performance on the school administered professional social work competency examination. Course Attributes: Internships/Practicums

- S W 500 - Orientation

  Credits: 1. Prereq., admission to M.S.W. program. Seminar introducing M.S.W. students to program philosophy and social work's theory and value base. Level: Graduate

- S W 505 - Found Social Work Pract

  Credits: 2. Prereq., admission to M.S.W. program. Introductory practice course that examines generalist social work practice, dominant theoretical influences, and forces shaping social work over time. Level: Graduate

- S W 510 - Hum Behav Soc Envt I

  Credits: 3. Prereq., admission to M.S.W. program. Introduction to and critical consideration of social work perspectives on human behavior as influenced by the social environment. Particular attention is paid to biological, psychological, social, cultural and spiritual influences. Level: Graduate

- S W 511 - Hum Behav Soc Invt II

  Credits: 3. Prereq., admission to M.S.W. program and SW 510 or consent of instr. Advanced course on human behavior and social environment that addresses difference and diversity, histories and mechanisms of discrimination and oppression, and frameworks for thought and practice that recognize diversity and promote social justice. Level: Graduate

- S W 515 - Pract W Indiv & Families

  Credits: 4. Prereq., admission to M.S.W. program or consent of instr. Practice-oriented course building on students' developing knowledge of engagement, assessment, intervention and evaluation and the application to practice with individuals and families in context of community. Level: Graduate

- S W 520 - SW Research Methods

  Credits: 3. Prereq., admission to M.S.W. program or consent of instr. Introduction to principles, methodologies, technologies, and statistical approaches of human service research. Emphasis on beginning capabilities in evaluation of social work practice and skill development regarding use of published research. Level: Graduate

- S W 521 - Advanced Research

  Credits: 3. Prereq., SW 515. The use of research within the integrated practice model of social work through evaluation of practice and program evaluation. Advanced statistical concepts are applied to direct practice and five types of program evaluation. Level: Graduate

- S W 525 - Pract Groups & Communities

  Credits: 4. Prereq., admission to M.S.W. program or consent of instr. Practice oriented course addressing theories, frameworks, principles, and skills of group and community work. Dynamics of group work and examination of modalities such as mutual aid and social action groups. Level: Graduate

- S W 530 - History of Social Policy

  Credits: 3. Prereq., admission to M.S.W. program or consent of instr. Foundation in social welfare policy and services; examination of relationship between history social welfare policy and emergence of social work profession. Introduction to frameworks for policy analysis. Level: Graduate

- S W 531 - Social Policy Analysis
  Credits: 3. Prereq., SW 530. Focus on the analysis of existing or proposed policies specific to oppressed populations, rural areas and isolated communities. Level: Graduate
- S W 535 - Advanced Practice
  Credits: 4. Prereq., consent of instr. Builds on the skills, knowledge, and values of the foundation generalist and practice courses. Level: Graduate
- S W 545 - Organizational Leadership
  Credits: 3. Prereq., consent of instr. Advanced training in professional leadership and how to effectively conceive, plan, design, implement, manage, assess, and change contemporary organizations. Level: Graduate
- S W 551 - Couples and Family Therapy
  Credits: 3. Offered spring. Prereq., admission to the MSW program, SW 505, or consent of instructor. Course explores family-centered methods of clinical social work interventions with couples and families that can be applied in a variety of settings. Level: Graduate
- S W 552 - Psychopathology & S W
  Credits: 3. Prereq., admission to the MSW program, SW 505, or permission of instructor. Focus on current problems of children, adolescents, and adults of all ages that can be classified as a mental disorder under the DSM of the system. Includes information on theories within the bio-psycho-social paradigm of causality of disorders/conditions; on methods of assessment, including DSM; and an understanding of how social injustice, oppression and poverty impacts healthy growth and development across the life span. Level: Graduate
- S W 553 - Social Work Addictions
  Credits: 3. Offered spring semester. Prereq., admission to MSW program or by permission of instructor. The course examines historical and contemporary models of direct practice, and current ideological, political, policy and systemic challenges to the practice of social work in the addictions. Level: Graduate
- S W 576 - Found Integrative Sem I
  Credits: 1. Prereq., admission to MSW program, SW 505, 587. Seminar accompanying first semester foundation practicum in which students discuss experience with goal of integrating theory and practice. Level: Graduate
- S W 577 - Found Integrative Sem II
  Credits: 1. Prereq., admission to MSW program, SW 505, 587. Seminar accompanying second semester foundation practicum in which students discuss experience with goal of integrating theory and practice. Level: Graduate
- S W 578 - Advanced Seminar I
  Credits: 1. Prereq., SW 587. Critical analysis of how predominant social work theories and professional values and skills are being incorporated into the practicum. Level: Graduate
- S W 579 - Advanced Seminar II
  Credits: 1. Prereq., SW 578. Critical analysis of how predominant social work theories and professional values and skills are being incorporated into the practicum. Advanced portfolio development. Level: Graduate
- S W 586 - Found Practicum I
  Credits: 2. Prereq., admission to MSW program. First semester foundation field practicum experience in a supervised setting designed to provide opportunities to integrate classroom learning and field experiences. Level: Graduate
- S W 587 - Found Practicum II
  Credits: 2. Prereq., admission to MSW program, SW 505, 587. Second semester foundation field practicum experience in a supervised setting designed to provide opportunities to integrate classroom learning and field experiences. Level: Graduate
- S W 588 - Concentration Practicum I
  Credits: 3. Prereq., SW 587, 589. Advanced supervised field work in public and private agencies and institutions. Level: Graduate
- S W 589 - Concentration Practicum II

Credits: 3. Prereq., SW 588. Advanced supervised field work in public and private agencies and institutions. Level: Graduate

- S W 593 - Professional Portfolio
  Credits: 1. Prereq., foundation courses. Summative and in-depth written analysis of course work and practicum experience. Level: Graduate
- S W 594 - Graduate Seminar
  Credits: 3. (R-9) Offered autumn or spring. Prereq., admission to MSW program or consent of instr. In-depth analysis of a current social work issue. Level: Graduate
- S W 595 - Special Topics
  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., admission to MSW program or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- S W 596 - Independent Study
  Credits: 1 TO 9. (R-9) Offered autumn or spring. Prereq., admission to MSW program or consent of instr. Work on selected problems by individual students under direct faculty supervision. Level: Graduate
- S W 597 - Research
  Credits: 1 TO 9. (R-9) Offered autumn or spring. Prereq., admission to MSW program or consent of instr. Directed individual graduate research and study appropriate to background and objectives of the student. Level: Graduate

Social Work B.A.

Bachelor of Arts - Social Work

College of Health Prof Biomed

Catalog Year: 2016-2017

Degree Specific Credits: 65

Required Cumulative GPA: 2.75

Note: A minimum of 40 social work credits are required for this degree. No more than 60 social work credits will count toward graduation. Admission into the School of Social Work requires a 2.75 overall GPA, a 3.00 in Social Work courses and completion of 5 of 8 extra departmental courses.

Lower Division Core Courses

Rule: Take 32 Credits in the following subcategories

32 Total Credits Required

Social Science Requirements

Rule: All of the following courses are required.

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits

	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	PSYX 230 - Developmental Psychology Offered autumn, spring, summer. Prereq., PSYX 100S. The study of human physical, cognitive and psychosocial development throughout the life span. Content covers major theories, the influence of genetics, and the environment from a chronological aspect. Appropriate for Social Work, Nursing, Addiction Studies, Education, and Psychology.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
	S W 100 - Intro Soc Welfare Offered autumn and spring. Overview of human services, programs and problems in meeting social welfare needs, with emphasis on the complexity of social services and their historical development. Analysis of the value, attitudinal, economic and political factors that condition the provision of these services.	3 Credits
	S W 200 - Intro Soc Wrk Pract Offered autumn and spring. Prereq., SW 100, sophomore standing. Introduction to social work as a profession, including an examination of goals, guiding philosophy and basic assumptions. Emphasis on a generalist framework of social work practice and the development of beginning analytical and practice skills.	4 Credits
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits
Minimum Required Grade: C-		23 Total Credits Required

Economics Requirement

Rule: Choose 1 of the following courses

	Course	Credits
	ECNS 101S - Economic Way of Thinking Offered autumn and spring. A critical examination of the market mechanism as a social decision-making device to guide the use of a nation's resources. The limitations of these processes in light of current economic problems such as the rise of the large corporation, monopoly, environmental degradation, economic discrimination and the increasing role of the government.	3 Credits

	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Human Population Requirement

Rule: Choose 1 of the following courses

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	GPHY 121S - Human Geography Offered autumn and spring. Introduction to Human Geography focuses upon the linkages between geography and society including analysis of regions, ethnic groups, urban landscapes, migration and population change, geopolitics, economics, and cultural differences.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Biological Requirement

Rule: Choose 1 of the following courses

	Course	Credits
	BIOB 101N - Discover Biology Offered every term. Contemporary exploration of the organization and complexity of living organisms and the systems in which they live. The central question of biology--relationship between form and function, acquisition and use of energy, and continuity between generations will be addressed through lectures and laboratory investigations. Credit not allowed toward a major in biology. Credit not allowed for both BIOB 101N and BIOB 160N.	3 Credits
	PSYX 250N - Fund of Biological Psychology Offered every term. Prereq., PSYX 100S. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Upper Core Courses

Rule: All courses listed are required

Note: 10 credits of S W 495 required over 2 semesters

	Course	Credits
	S W 300 - Hum Behav & Soc Environ Offered autumn and spring. Prereq., SW 100 and 200, and junior standing in Social Work. Using the ecological-social systems framework, the integration of knowledge and concepts from the social and behavioral sciences for analysis and assessment of problems and issues relevant to professional social work practice.	3 Credits
	S W 310 - S W Policy & Services Offered autumn and spring. Prereq., SW 200; Social Work major. Social welfare history, program planning and analysis with review of selected policies on the national level. Includes international comparisons. Upper-division writing course.	3 Credits
	S W 350 - S W Interven Meth I Offered autumn and spring. Prereq., SW 200; Social Work major. The study and application of the generalist model of social work practice and related techniques and procedures for the assessment, intervention and prevention of problems in social functioning. Emphasis on individuals and families.	3 Credits
	S W 360 - S W Interven Meth II Offered autumn and spring. Prereq., Social Work major. The study and application of the generalist model of social work practice and related techniques and procedures for the assessment, intervention and prevention of problems in social functioning. Emphasis on groups and team meetings.	4 Credits
	S W 400 - Social Work Research Offered autumn and spring. Prereq., SW 360; Social Work major. Utilization of social research findings in social work practice. Techniques for the collection and analysis of clinical data. Special emphasis on research methodology for the assessment of practitioner and program effectiveness.	3 Credits
	S W 410E - Social Work Ethics Offered autumn and spring. Prereq., SW 200, admission into the BSW program. Analysis of specific ethical dilemmas from personal, professional and policy perspectives. Focus on ethical issues common to the helping professions and utilizing codes of ethics as guides to decision-making. The relationship between professional ethical issues and the development of social policy.	3 Credits
	S W 487 - Advanced Practice I Offered every term. Concurrent SW 495; admission to the practicum program. Consideration and discussion of practicum-related matters, professional development, and issues confronting the profession.	2 Credits
	S W 488 - Advanced Practice II Concurrent with SW 495; admission to the practicum program. Consideration and discussion of practicum-related matters, professional development, and issues confronting the profession.	2 Credits

	S W 495 - Field Work Practicum (R-10) Offered every term. Prereq., SW 350 and 360 and approved application to practicum coordinator. Practicum must be taken over two consecutive semesters for a total of 10 credits. Minimum of one credit per semester. Cumulative grade average of 2.75 or above in SW 100, 200, 300, 350 and 360 and a 3.0 grade average for SW 200, 350 and 360 are required. Supervised field work in public and private agencies and institutions. Successful completion of the field work practicum requires a passing performance on the school administered professional social work competency examination.	5 Credits
Minimum Required Grade: C-		33 Total Credits Required

Gerontology Minor

Students in the Gerontology Minor program will study issues of aging from an interdisciplinary perspective and come to understand the interplay between them, including the health and medical as well as social and psychological needs of older persons. Although this interdisciplinary minor is housed in the School of Social Work, students in other majors may complete the minor in consultation with both the Chair of the Gerontology Minor and the students' academic advisors in their respective departments. Students must consult with their major advisor to select electives, practicum or volunteer experiences, and to integrate courses that will meet the requirements of the minor.

Minor - Gerontology (Minor)

College of Health Prof Biomed

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0

Lower Core Course

Rule: Must complete the following:

	Course	**Credits**
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Core Courses

Rule: Must complete all of the following:

	Course	**Credits**

	AHHS 325 - Introduction to Gerontology Offered spring. Prereq., junior standing or consent of instr. An interdisciplinary discussion of the health and social issues of older persons, utilizing didactic presentations, clinical demonstrations, and curricular modules.	3 Credits
	AHHS 430 - Health Aspects of Aging Offered spring. Overview of the health aspects of aging in the United States including biological theories of aging, normal physiological changes associated with aging systems, common pathological problems associated with aging, cultural and ethnic differences in the health of elders, health promotion and healthy aging, and the health care continuum of care for older persons.	3 Credits
	S W 455 - Social Gerontology Offered autumn. Examination of the field of social gerontology, including an examination of the major bio/psycho/social/cultural/spiritual theories of aging, the service system, social and health issues, family and care-giving dynamics, social policy, and end of life concerns.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Gerontology Electives

Rule: Must complete 1 of the following courses

Note: A student must take a minimum of 3 elective credits with at least 25% of the content focused on gerontology. Students may petition for approval of another elective course.

	Course	**Credits**
	AHHS 201 - Living Well, Health & Disablil Offered autumn and spring. The development and implementation of exercise programs for individuals with physical disabilities or chronic illness.	2 Credits
	AHHS 327 - MGS Meeting (R-3) Offered spring. Attendance and participation in the Montana Gerontology Society meeting held annually in April.	1 Credits
	AHHS 420 - Geriatric Health Issues Prereq., Anatomy & physiology. A review of normal aspects of aging, common health problems associated with aging, and common pharmacological and non-pharmacological treatments of these problems in older persons.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	COMX 485 - Communication and Health Offered yearly. Theory and research on the health correlates of human interaction.	3 Credits
	ECNS 310 - Intro Health Economics Offered intermittently. Prereq., economics course. Survey of market forces that govern the production and consumption of medical care in the U.S. market; uncertainty, asymmetric information, and concentrations of market power resulting in inefficient outcomes. Topics include cost escalations, role of medical insurance, and problems of an aging population.	3 Credits

	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
	PHL 321E - Philosophy & Biomedical Ethics Offered intermittently. Prereq., upper-division standing or consent of instr. An examination of ethical problems raised by the practice of medicine and by recent developments in medically-related biological sciences.	3 Credits
	S W 475 - Death, Dying and Grief Offered intermittently. Examination of death, dying and grief from an ecological perspective, focusing on the processes of dying and theories of grief. Emphasis on physical, social, psychological, spiritual, and cultural influences that surround death and grief. Consideration of cultural norms, attitudes toward death, medical, legal and ethical issues of dying. Focus on normal and complicated grief.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Integrating Courses

Rule: Must complete 1 of the following courses

Note: A course has been identified that will integrate the core course content with concepts within each student's major. A similar course can be identified in other majors if required. Students can also take NRSG 377 Introduction to Community Based Nursing through MSU with approval by advisor.

	Course	**Credits**
	CSD 360 - Language Disorders Offered spring. Prereq., CSD 210, CSD 320. Identification, assessment, and intervention for a variety of childhood and adult language disorders. Other topics include secondary conditions, potential developmental, psychosocial and educational concerns, multicultural considerations, and family roles.	3 Credits
	KIN 483 - Exercise Disease & Aging Offered spring. Prereq., KIN 320,321, 460; coreq. KIN 484. Focus on guidelines for exercise testing and prescription for individuals with chronic disease including heart disease, diabetes, hypertension, arthritis, osteoporosis, elderly and pulmonary disease. Class requires 25 assigned hours of service learning. Covers material necessary for ACSM clinical certification exam when combined with KIN 201, 320, 321, 460, and 484.	3 Credits
	P T 520 - Development Through Life Span Offered spring. Enrolled in entry-level DPT program or permission of instructor.Presentation of changes in adults they progress through the lifespan. Includes the functional changes associated with aging, assessing and managng fall risk, performance and interpretation of functional outcome measures. Level: Graduate	2 Credits

	PHAR 451 - Therapeutics I Offered autumn. Prereq., second professional year standing; coreq., PHAR 471; prereq. PHAR 328, PHAR 381, PHAR 331, PHAR 342. Pharmacotherapeutics of common disease states emphasizing pathophysiology and the selection, monitoring, and individualization of drug therapy. Applies the basic pharmaceutical sciences to patient care.	3 Credits
	S W 300 - Hum Behav & Soc Environ Offered autumn and spring. Prereq., SW 100 and 200, and junior standing in Social Work. Using the ecological-social systems framework, the integration of knowledge and concepts from the social and behavioral sciences for analysis and assessment of problems and issues relevant to professional social work practice.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Practicum Courses

Rule: Must complete 1 of the following courses

Note: Students can also take NRSG 454 Urgent and Palliative Care through MSU with approval by advisor. Students in majors that do not have access to a practicum course can enroll in HS 326 Geriatric Practicum for up to 3 credits of service learning experience compatible with the student's major and interests.

	Course	**Credits**
	AHHS 395 - Geriatric Practicum (R-3) Offered spring. Prereq., HS 325. Service learning experience in geriatrics in a setting compatible with the student's major and interests.	1 To 3 Credits
	KIN 498 - Internship (R-6) Offered every term. Prereq. all HHP options minimum junior standing and ECP 120/121 (or equivalent). Prereqs per option. Exercise Science Applied: KIN 320/321. If internship is coaching or strength & conditioning must also have completed KIN 410 and COA 405. Exercise Science Pre-Professional: KIN 320/321. If internship is cardiac rehab must also have completed KIN 460/483/484. Community Health: CHTH 335. Supervised field experiences with private businesses, public agencies, or institutions. 45 hours of internship site work = 1 credit. A maximum of 6 credits of Internship 498 may count toward graduation. Students should not be registered for more than 14 credits their internship semester.	2 To 6 Credits
	P T 588 - Clinical Internship II Offered spring. Prereq., PT 587 and successful completion of year two DPT Autumn semester courses. Five weeks of full-time clinical experience with emphasis on patient evaluation and continuation of developing patient treatment skills. Only CR/NCR grading. Level: Graduate	4 Credits

	PHAR 585 - Geriatric APPE (R-8) Offered every term. Prereq., completion of didactic courses in the Pharm.D. program. Supervised professional experience with geriatric patients in the long term care and/or other pharmacy setting. Level: Graduate	4 Credits
	PSYX 398 - Internship (R-3) Offered every term. Prereq., consent of instructor. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 3 Credits
	S W 398 - Internship (R-3) Offered autumn and spring. Application of classroom learning in off campus internship placements. Prior approval must be obtained from the School of Social Work practicum coordinator and the Center for Work-Based Learning. A maximum of 6 credits of Internship (198, 398) may count toward graduation.	1 To 3 Credits
	S W 495 - Field Work Practicum (R-10) Offered every term. Prereq., SW 350 and 360 and approved application to practicum coordinator. Practicum must be taken over two consecutive semesters for a total of 10 credits. Minimum of one credit per semester. Cumulative grade average of 2.75 or above in SW 100, 200, 300, 350 and 360 and a 3.0 grade average for SW 200, 350 and 360 are required. Supervised field work in public and private agencies and institutions. Successful completion of the field work practicum requires a passing performance on the school administered professional social work competency examination.	5 Credits
	SOCI 498 - Internship (R-6) Offered every term. Prereq., SOCI 101S, 318 and 202; 2.75 GPA; junior standing and consent of instr. Supervised placement in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice.	1 To 6 Credits
	WGSS 398 - Coop Education/Internship R-6) Offered intermittently. Prereq., consent of director. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		3 Total Credits Required

Health Sciences

Health science courses are concerned with fundamental issues in human health and disease and are, therefore, interdisciplinary in both scope and content. They have been designed not only for students anticipating careers in medicine, dentistry, nursing, public health, pharmacy, social work, medical technology, physical therapy, cytotechnology, and numerous other health care professions and services, but for all students interested in individual and community health, the clinical and paramedical arts, and the biomedical sciences. Health sciences courses are listed under two designations: 1) Allied Health: Health Sciences; 2) other disciplines.

Health Sciences Courses

Allied Health: Health Sciences

- AHHS 191 Special Topics
- AHHS 201 Living Well: Health and Disability
- AHHS 291 Special Topics
- AHHS 320 American Indian Health Issues
- AHHS 325 Introduction to Gerontology
- AHHS 327 Montana Gerontology Society Meeting
- AHHS 389 Recent Advances in Clinical Medicine
- AHHS 390 Research
- AHHS 391 Special Topics
- AHHS 394 Medical Preparation and Overview
- AHHS 395 Geriatric Practicum
- AHHS 420 Geriatric Health Issues
- AHHS 430 Health Aspects of Aging
- AHHS 440 Psychosocial Aspects of Illness and Disability in Older Persons
- AHHS 490 Research
- AHHS 491 Special Topics

Anthropology

- ANTY 211 Anthropological Genetics
- ANTY 227 Human Sexuality
- ANTY 333 Culture and Population
- ANTY 426 Culture, Health and Healing

Economics

- ECNS 310 Health Economics

Health and Human Performance

- HEE 110 Personal Health and Wellness
- NUTR 221N Nutrition

Microbiology

- BIOM 250N Elementary Microbiology
- BIOM 251 Elementary Microbiology Laboratory
- BIOM 400 Medical Microbiology

Native American Studies

- NASX 388 Native American Health and Healing

Social Work

- SW 423 Addiction Studies
- SW 455 Social Gerontology

Pharmacy

- PHAR 110N Use and Abuse of Drugs
- PHAR 145N Intro to Cancer Biology
- PHAR 320 American Indian Health Issues

Philosophy

- PHL 321E Philosophy and Biomedical Ethics

Pre-Medical Sciences

Mark A. Pershouse (Director and Associate Professor)

Health care continues to be one of the most rapidly expanding areas of our society. Careers in the health professions have expanded, both in numbers and in the variety of opportunities. The rewards of a career in health care include excellent salaries, stability of employment, geographic mobility, and the opportunity to help other people. The Pre-Medical Sciences Program is an advising program that helps students become well-informed, well-prepared applicants to programs in allopathic medicine, osteopathic medicine, chiropractic medicine, dentistry, naturopathic medicine, optometry, physician assistant studies, podiatry and veterinary medicine.

Pre-Medical Sciences is not a major at the University of Montana. The Pre-Medical coursework will help students to gain admission to a professional school or program while completing a degree in a field of study. Students may select any major as a field of study, but specific pre-professional courses must be completed. When selecting a major, remember that a science major is not required for admissions into professional schools. It is more important to perform well in your chosen major. Professional schools are most concerned with the overall quality, scope and difficulty of undergraduate work rather than the major.

Pre-professional courses are designed to provide a strong foundation in the sciences, highly developed communication skills, and a solid background in the social sciences and humanities. Curriculum guides outlining minimal course requirements established by professional schools are available from the Pre-medical Sciences office and from the Pre-Medical Sciences website (http://umt.edu/premed). Because many majors within the sciences, social sciences and humanities can provide strong preparation for medical school, the Pre-Medical Sciences Advising Program gives students the opportunity to interact with advisors from diverse disciplines in addition to their advisor for their major.

The minimal requirements for professional school should be completed by the end of the third year of study or prior to taking the admission test required by professional schools. Since specific subject requirements vary among institutions, students should discuss their academic plans with their Pre-Medical Sciences advisor.

Admission to a professional school is very competitive. Students must maintain a high grade-point average in college if they expect to be admitted. All required courses must be taken for letter grades. In addition, the applicant must score well on the appropriate professional admissions test. These tests are designed to measure basic academic ability in the natural sciences, reading ability and problem solving skills. These examinations are usually taken during the third year of study.

Besides academic accomplishments and admission exam scores, acceptance by a professional school is also dependent upon letters of recommendation, volunteer experience, job shadowing, and personal interviews conducted by the professional school. It is important that students consult with a Pre-Medical Sciences advisor and with an academic advisor in their major each year to make sure that they can satisfy the necessary requirements for graduation within the time available. The Pre-Medical Sciences Director will also discuss procedures, advise and assist the student during the process of applying to a professional school.

High School Preparation: High school students contemplating a career in the health professions should have three to four years of mathematics, courses in chemistry and physics and a solid background in literature and social science.

Public and Community Health Sciences

Tony Ward, Professor and Chair

Accredited by the Council on Education for Public Health (CEPH) in 2012, the School of Public and Community Health Sciences is a multi-disciplinary program that offers the Master of Public Health (M.P.H.) degree and a graduate Certificate of Public Health (C.P.H.). The program is designed to prepare public health practitioners who will use global insight to improve the health of the people of Montana and other rural areas. Predominantly on-line, web-based instruction allows both traditional students and working professionals to pursue a degree or certificate.

Department Faculty

Professor

Jean Carter, Pharm.D., Ph.D., Professor
Ann Cook, Research Professor Bioethics
Willard Granath Jr., Professor
Kari Jo Harris, PhD, MPH Professor of Public Healthh
Rosemary Hughes, Research Professor
Craig Molgaard, Ph.D., M.P.H., Professor
Liz Putnam, Chair, Associate Professor
Annie Sondag, Professor

Associate Professor

Duncan G Campbell, Associate Professor Clinical Psychology
Bryan Cochran, Professor of Psychology and Director of Clinical Training

Curtis Noonan, Professor
Gyda Swaney, Associate Professor Clinical Psychology
Meg Ann Traci, PhD, Research Associate Professor
Tony Ward, Ph.D., Chair and Associate Professor

Assistant Professor

Annjeanette Belcourt, Associate Professor

Research Faculty

Erin Semmens, Research Assistant Professor

Affiliates

Allied Health Medical Support

Back to Top

- AHMS 108 - Health Data Content & Struct

  Credits: 2. Offered spring. In-depth study of origin, use, content and structure of health records; storage and retrieval systems; numbering and filing systems; documentation requirements; use and structure of health care data sets; and how these components relate to primary and secondary record systems. Additional topics include gathering, compilation and computing of healthcare related statistics, use of research and statistical methods for developing healthcare data into information for various requesters. Course Attributes: Technical Course

- AHMS 144 - Medical Terminology

  Credits: 3. Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes. Course Attributes: Technical Course

- AHMS 156 - Medical Billing Fundamentals

  Credits: 3. Offered every term. Prereq. or coreq., AHMS 220 or consent of instr. An introduction to insurance claim processing for the major medical insurance programs. Students will be provided with a basic knowledge of CPT and ICD-9 procedural and diagnostic coding. Emphasis on completing universal insurance forms to maximize reimbursement as well as trouble shoot denied or underpaid claims. Course Attributes: Technical Course

- AHMS 160 - Beginning Procedural Coding

  Credits: 3. Offered autumn. Prereq., AHMS 156, AHMS 108 or consent of instr. Foundation for utilizing the CPT coding system to increase compatibility and comparability of medical data among users and providers.

- AHMS 164 - AHMS 164 Beginning Diagnosis Coding: ICD-10

  Credits: 3. This course covers basic and intermediate levels of theory and application of ICD-CM principles and guidelines for coding and sequencing diagnoses and procedures. Students perform

basic and intermediate coding using real health records, case studies, and scenarios. Application will focus on the use of the electronic ICD-10-CM with an overview of encoder software. This coding class involves hands-on coding, and knowledge of basic use of applicable coding books or the electronic ICD-10-CM. Currently the students take this course through Great Falls

- AHMS 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHMS 192 - Independent Study

  Credits: 1 TO 9. Course material appropriate to the needs and objectives of the individual student.

- AHMS 212 - CPT Coding

  Credits: 3. Offered spring. Prereq., AHMS 210 or consent of instr. Comprehensive application of the CPT coding system to assign codes for services, supplies and equipment for comparative analysis, research and reimbursement.

- AHMS 213 - ICD-10 CODING

  Credits: 3. Prereq., AHMS 164. Basic understanding of diagnostic and procedural coding principles should already be established. The course requires interpreting ICD-10-CM coding and reporting guidelines to sequence and assign appropriate diagnostic codes for both inpatient and various outpatient settings. Compliance issues associated with various IPPS reimbursement systems such as MS-DRGs, as well as APCs are covered. Encoder software will complement the ICD-10-CM manual in the application of coding processes. Clinical information will be interpreted from brief case studies and progress to the coding of health record excerpts.

- AHMS 216 - Pharmaceutical Products

  Credits: 3. Offered autumn. Fundamental principles of pharmacology and the implications of medication use. Includes the law as it pertains to drug use, dosage forms, routes of administration as well as the pharmacologic actions and uses of drugs.

- AHMS 220 - Medical Office Procedures

  Credits: 4. Offered autumn. An introduction to the necessary skills and qualities required to function successfully in the medical arena. Emphasis on medico-legal and ethical responsibilities, records management and financial management of the medical practice, and interpersonal communications to include patient reception, telephone techniques and appointment scheduling. Course Attributes: Technical Course

- AHMS 245 - Simulated Lab

  Credits: 3. Prereq., consent of instr. This course will use computer applications and software in maintaining health information in medical records through practice utilizing HIT applications through the AHIMA Virtual Lab, to include the following applications: Master Patient Index, Electronic Health Record, Encoder, Abstracting, Chart Tracking, Release of Information.

- AHMS 252 - Computerized Medical Billing

  Credits: 3. Offered spring, Prereq., AHMS 156; prereq. or coreq. AHMS 220; or consent of instr. A medical package is used to enter and update patient data, enter charges, payments and adjustments, and generate management reports, insurance forms, and patient statements.

- AHMS 270E - Medical Ethics

  Credits: 3. Offered every term. Ethical decision-making tools for addressing common ethical issues in the health professions. Course Attributes: Ethical & Human Values Course

- AHMS 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHMS 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- AHMS 298 - Medical Info Internship

  Credits: 3. Offered every term. Prereq., last semester in program, minimum of "C" in AHMS/AHMA (MED) courses, and approval of program director. On-the-job training in positions related to each student's career goal in the medical information field. This experience increases students' skills, prepares them for initial employment and advancement on the job, and increases occupational

awareness and professionalism. Students work a minimum of 180 hours at an approved site and attend a scheduled one-hour seminar. Course Attributes: Internships/Practicums

Allied Health Respiratory Care

Back to Top

- AHRC 101 - Communication Management

  Credits: 1. Offered autumn. Prereq., Acceptance into Respiratory Care Program. Study of respiratory care departmental organization and administration procedures, effective communication strategies, and legal and ethical issues for the Respiratory care professional.

- AHRC 115 - Blood Gas Analysis

  Credits: 2. Offered autumn. Prereq., acceptance into the Respiratory Care program. Study of the indications, rational, methods, instrumentation, and analysis of Blood Gases. Emphasis will be placed on the physiology and clinical implications of acid-base abnormalities.

- AHRC 129 - Patient Care & Assessment

  Credits: 4. Offered autumn. Prereq., BIOH 201N-202N. Introduction to nursing- related knowledge and skills with emphasis on application of microbiology to aseptic technique. Assessment of the respiratory system with cardiopulmonary diagnostic and laboratory tests interpretation. Observation and interpretation of overall patient condition is integrated throughout the course. Course Attributes: Technical Course

- AHRC 130 - Respiratory Care Lab IB

  Credits: 1. Offered autumn. Prereq., acceptance into the Respiratory Care program. Basic clinical competencies taught in RES 129 are studied in a laboratory setting. Peer and instructor review of competencies included. Students focus on patient assessment skills and techniques/equipment.

- AHRC 131 - Resp Care Fundamentals

  Credits: 5. Offered autumn. Prereq., acceptance into the Respiratory Care program. Orientation to basic respiratory care science including the application of principles of physics and chemistry. Emphasis on theory, operation and troubleshooting of equipment used at the entry level of practice. Microbiology in relation to equipment processing, pulmonary rehabilitation and home care included. Course Attributes: Technical Course

- AHRC 133 - Resp Care Pharmacology

  Credits: 3. Offered spring. Prereq., acceptance into the Respiratory Care Program or consent of instr. Principles of basic chemistry introduced with an application to pharmacology as related to the pulmonary system. Cardiovascular and related pharmacology studied in preparation for ACLS and ventilator management. Course Attributes: Technical Course

- AHRC 150 - Respiratory Care Lab I

  Credits: 1. Offered autumn. Prereq., acceptance into the Respiratory Care program. Basic clinical competencies taught in RES 131 are studied in a laboratory setting. Peer and instructor review of competencies included. Students earn their BLS certification. Course Attributes: Technical Course

- AHRC 231 - Resp Crit Care

  Credits: 4. Offered spring. Prereq., RES 120, 129, 131, 133, 150. Continuation of RES 131. Physiology, indication, contraindications, and application of mechanical ventilation. Emphasis on patient assessment, monitoring, stabilization and weaning during assisted pressure breathing. Analysis of the various modes of ventilation, including optimizing the patient-ventilator interface in the adult through various advanced airway techniques. Course Attributes: Technical Course

- AHRC 232 - Resp Path & Disease

  Credits: 3. Offered spring. Prereq., RES 120, 129, 131, 133, 150. Special lectures in medicine and disease as related to the cardiopulmonary system. Emphasis on recognition of signs and symptoms of disease and implications for treatment through the study of selected case studies. Course Attributes: Technical Course

- AHRC 235 - Cardiopulm Anat & Phys

  Credits: 3. Offered spring. Prereq., RES 120, 129, 131, 133, 150 or consent of instr. Principles of physiologic chemistry are introduced and applied to the macro and micro anatomy of the cardiopulmonary system with a focus on structure and function. Application made to pathology

and assessment of patients receiving mechanical ventilation. Course Attributes: Technical Course

- AHRC 242 - Respiratory Management
  Credits: 1. Offered autumn. Prereq., RES 260T, 265T. Study of respiratory care departmental organization and administration procedures. Course Attributes: Technical Course
- AHRC 243 - Perinat & Pediat Res Care
  Credits: 3. Offered autumn. Prereq., RES 260, 265. Study of perinatal and pediatric respiratory care with emphasis on assessment, resuscitation and mechanical ventilation of the neonate and pediatric patient. The theory of Neonatal Resuscitations (NRP) will be presented. Neonatal and pediatric diseases will be studied. Course Attributes: Technical Course
- AHRC 250 - Respiratory Care Lab II
  Credits: 2. Offered spring. Prereq., RES 120, 129, 131, 133, 150. A continuation of RES 150 with emphasis on adult critical care. Clinical competencies taught in RES 231 and RES 235 are studied in a laboratory setting. Peer and instructor review of competencies included. Course Attributes: Technical Course
- AHRC 252 - Respiratory Care Review
  Credits: 2. Offered autumn. Prereq., RES 260, 265. A review of respiratory care in preparation for credentialing exams. Students must take an Entry Level Self-Assessment Exam, a Written Registry Self- Assessment Exam, and a Clinical Simulation Self-Assessment Exam. Course Attributes: Technical Course
- AHRC 255 - Clinical Experience I
  Credits: 5. Offered spring. Prereq., RES 120, 129, 131, 133, 150. Emphasis on the student directly performing basic clinical skills in a patient care setting to include hospitals, home care, and pulmonary function laboratories. Students also participate in physician rounds. Course Attributes: Technical Course
- AHRC 260 - Resp Care Lab III
  Credits: 1. Offered summer. Prereq., RES 231, 232, 235, 250, 255. Students study principles and theory of advanced life support. Peer and instructor review are included. Students will be Advanced Cardiac Life Support (ACLS) and Pediatric Advance Life Support (PALS) certified at the end of this class. Course Attributes: Technical Course
- AHRC 265 - Clinical Experience II
  Credits: 5. Offered summer. Prereq., RES 231, 232, 235, 250, 255. Continuation of clinical skills learned in RES 255. Introduction to adult critical care along with sleep and cardiac diagnostics. Students also participate in physician rounds. Course Attributes: Technical Course
- AHRC 270 - Resp Care Lab IV
  Credits: 1. Offered autumn. Prereq., RES 260, 265. Emphasis on neonatal and pediatric critical care. Clinical competencies introduced in RES 241 are studied. Peer and instructor review of competencies are included. Course Attributes: Technical Course
- AHRC 275 - Clinical Exp III
  Credits: 6. Offered autumn. Prereq., RES 260, 265, 270. Continuation of RES 265 with critical care of the adult. Neonatal and pediatric critical care experiences are emphasized. Students also participate in physician rounds. Course Attributes: Technical Course
- AHRC 291 - Special Topics
  Credits: 1 TO 8. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course
- AHRC 292 - Independent Study
  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student.

Surgical Technology

Back to Top

- AHST 101 - Introduction to Surgical Techn

Credits: 3. Offered spring. Prereq., admission to the program. Provides an orientation to the scrub and circulatory roles of the surgical technologist in the preoperative, intraoperative and postoperative periods. Entry level skills and theories are emphasized. Course Attributes: Technical Course

- AHST 115 - Surgical Lab I

  Credits: 2. Offered spring. Prereq., admission to the program. Demonstration of sterile technique in the campus lab, various skills and their application in the operating room. Course Attributes: Technical Course

- AHST 154 - Surgical Pharmacology

  Credits: 3. Offered spring. Prereq., admission to the program, M 090. Basic overview of the medications that are commonly used before, during and after a surgical procedure.

- AHST 191 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Ethical & Human Values Course Technical Course

- AHST 200 - Operating Room Techniques

  Credits: 5. Offered autumn. Prereq., completion of all second semester courses. Focus on the scrub and circulator roles of the surgical technologist in the preoperative, intraoperative, and postoperative periods. More complex skills and theories; impact of new technologies in the 21 century st operating room. Course Attributes: Technical Course

- AHST 201 - Surgical Procedures I

  Credits: 4. Offered autumn. Prereq., completion of all second semester courses. A study of surgical procedures following the patient through the preoperative, intraoperative, and post-operative stages of specific surgical specialties. Course Attributes: Technical Course

- AHST 202 - Surgical Procedures II

  Credits: 5. A study of surgical procedures following the patient through the preoperative, intraoperative, and postoperative stage of CV/thoracic, orthopedic, neurological, and ophthalmic specialties. Course Attributes: Technical Course

- AHST 215 - Surgical Lab II

  Credits: 2. Offered spring. Demonstration of more complex skills in the campus lab, including assistant circulating, and their application in the operating room. Course Attributes: Technical Course

- AHST 250 - Surgical Clinical I

  Credits: 4. Offered autumn. Prereq., completion of all second semester courses and successful completion of AHST 215. Perioperative experience in the minor surgical procedure role through a supervised clinical hospital rotation.

- AHST 251 - Surgical Clinical II

  Credits: 5. Offered spring. Prereq., completion of all third semester courses. Perioperative experience in the major surgical procedure role through a supervised clinical hospital rotation. Course Attributes: Technical Course

- AHST 298 - Surgical Internship

  Credits: 5. Offered spring. Prereq., successful completion of AHST 202, 251T. Capstone experience in the perioperative role in preparation for initial employment, increasing occupational awareness and professionalism. Students take call for emergency surgeries alongside experienced hospital staff. Course Attributes: Internships/Practicums

Radiologic Technology

Back to Top

- AHXR 100 - Intro to Diagnostic Imaging

  Credits: 3. Offered fall. Introduction to the field of radiology and its mix of technical equipment, lab work, hospital environment, patient care and team work. Course Attributes: Technical Course

- AHXR 121 - Radiographic Imaging I

Credits: 4. Offered autumn. Introduction to fundamental physics principles underlying radiology and diagnostic x-ray production. Topics include electromagnetic waves, electricity and magnetism, electrical energy, and power and circuits as they relate to radiography. Factors of image quality and exposure methods: density, contrast, recorded detail, distortion, technique charts, manual and automatic exposure control, and tube rating charts. Course Attributes: Technical Course

- AHXR 140 - Radiographic Methods

  Credits: 3. Offered autumn. Knowledge and skills necessary for quality patient care during standard and specialty radiographic procedures. Course Attributes: Technical Course

- AHXR 141 - Radiology Lab

  Credits: 1. Co-Requisite AHXR 140 Radiological Methods. Students will practice all patient positioning skills necessary for competency as Radiologic Technologists.

- AHXR 192 - Independent Study

  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- AHXR 195 - Radiographic Clinical: I

  Credits: 1 TO 14. (R-20) Offered over two semesters throughout the Radiology Technology program, beginning Spring semester. Students will begin with an introduction to patient management and basic radiographic procedures. The final semester offers opportunities in advanced patient management skills and experience with highly skilled radiographic procedures. Each semester builds on the previous semester, always emphasizing the principles of ALARA. Course Attributes: Internships/Practicums

- AHXR 221 - Radiographic Imaging II

  Credits: 3. Offered spring. Offers students more technical and detailed information on the use of image receptor systems, processing principles, advanced digital imaging systems and imaging modalities used in radiology.

- AHXR 225 - Radiobiology/Radiation Protctn

  Credits: 2. Offered spring. Principles of radiation protection and radio biology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and personnel, and radiation monitoring devices. Course Attributes: Technical Course

- AHXR 240 - Radiological Methods II

  Credits: 2. Offered spring. Coreq., AHXR 241. Preparation in the procedures associated with radiology in standard radiographic environments.

- AHXR 241 - Radiology Lab II

  Credits: 1. Offered spring. Prereq., BIOH 201N, 202N, and 211N, coreq., AHXR 240. Students will practice all patient positioning skills necessary for competency as Radiologic Technologists.

- AHXR 270 - Radiographic Registry Review

  Credits: 2. Offered spring. An overview of imaging concepts as a review for the national certification test. Topics include a systematic approach for image evaluation, patient care, radiation protection and the physics of radiographic imaging. Course Attributes: Technical Course

- AHXR 274 - Cross Sectional Anatomy

  Credits: 3. Course offered on line each semester. Students must be ARRT certified with a current state license to register for the CT courses. This course will cover information specific to ARRT guidelines in preparation for the Computed Tomography Exam. The regions of the body to be included are: Head, Neck, Chest, Abdomen, Pelvis and Musculoskeletal. Within each of these categories, focus will be placed on these relevant factors. Sectional Anatomy (axial, sagittal and coronal planes), Contrast Media (types, contraindications, administration), Imaging Processes (scout acquisition and methods, parameter selection, protocol modification) and Special Procedures (Reformatting, 3-D rendering, biopsies/drains, screening).

- AHXR 275 - Physics and Instrumentation

  Credits: 2. Course offered on line each semester. Students must be ARRT certified with a current state license to register for the CT courses. This course will cover information specific to ARRT guidelines in preparation for the Computed Tomography Exam. The course will be broken down in to the following sections: Patient Assessment and Preparation (to include patient history, screening, and consent. Immobilization, patient monitoring, accessory medical devices, lab values and medications/dosage). Contrast Administration (to include contrast media types,

considerations, administration and dosage, venipuncture, injection techniques, post-procedure care and adverse reactions). Radiation Safety and Dosimetry (to include technical factors, protection and shielding, dose measurement and dose reduction/optimization).

- AHXR 291 - Special Topics

  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHXR 295 - Radiographic Clinical: I

  Credits: 8 TO 24. (R-20) Offered over two semesters throughout the Radiology Technology program, beginning Spring semester. Students will begin with an introduction to patient management and basic radiographic procedures. The final semester offers opportunities in advanced patient management skills and experience with highly skilled radiographic procedures. Each semester builds on the previous semester, always emphasizing the principles of ALARA. Course Attributes: Internships/Practicums

- AHXR 298 - Internship

  Credits: 1. Extended classroom experience which provides practical application of classroom learning during placements off campus. Course Attributes: Internships/Practicums

Nursing

Back to Top

- NRSG 100 - Introduction to Nursing

  Credits: 1. Offered each semester. This online course is a prerequisite to the Practical Nursing program. Student will be presented with an introductory level of the core concepts of nursing practice and other issues such as the legal concerns and ethical/cultural issues that face professional nurses on a consistent basis. Course Attributes: Practical Nursing Prog Rqrmnt Registered Nursing Prog Rqrmnt

- NRSG 106 - Nursing Assistant

  Credits: 4. The Nursing Assistant course will prepare students for careers in health care under the supervision of the licensed nurse. Students will learn the basic entry-level nursing skills to work in health care setting as a Certified Nursing Assistant. Course includes providing or assisting in client care, bathing, dressing, grooming, toileting, ambulation, transferring, feeding, using equipment, documenting and reporting the general well-being of the client.

- NRSG 110 - Dosage Calculation Hlth Prof

  Credits: 2. This course is intended to provide the student the theory and psychomotor skills to correctly and safely calculate medications for clients in diverse health care settings. It will prepare students for the calculations used in health care professions. Students will review various systems of weights and measures (metric, apothecary, and household), conversions between these systems, ratio/proportions, dosage calculations, percentage preparations, reducing and enlarging formulas, dilution, concentrations, and intravenous flow rates.

- NRSG 131 - Fundamentals of Nursing Lab

  Credits: 3. Offered autumn and spring. Prereq., SCN 201N-202N, M 115, WRT 101, SCN 150N, PSYX 100S, CHMY 121N with lab, and acceptance into the practical nursing program. Introduces the student to basic principles and psychomotor skills to provide a framework for developing initial competencies in patient care. Campus lab experience is used initially. Off campus clinical experience in a long term care setting completes the hands on portion. Successful students are qualified to apply for certification as certified nurse assistants.

- NRSG 138 - Gerontology for Nursing

  Credits: 2. Offered autumn and spring. Prereq: acceptance into the Practical Nursing Program. Introduces the student to the skills and knowledge needed to provide nursing care to aging clients. Topics explored include current trends (including legal and ethical issues) in gerontological nursing, developmental stages and transitions associated with aging, expected age-related physiological changes, and assessment findings, recognition and management of acute and chronic illness that commonly occur in the older adult population, promotion of health for the older adult client, end-of-life issues and care. Course Attributes: Practical Nursing Prog Rqrmnt Registered Nursing Prog Rqrmnt

- NRSG 142 - Cre Cncpts of Mtrnl Chld Nrsng

Credits: 3. Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Information about fetal development and prenatal and postnatal care of the mother and newborn emphasizing caring, communication, professionalism, and critical thinking. Role of the nurse in meeting the needs of the family is emphasized. Clinical application of caring for the mother and newborn will allow the student to demonstrate acquired knowledge.

- NRSG 143 - Cre Cncpts Mtrnl Chd Nrsng Cln

  Credits: 3. Offered intermittently. Prereq: all first semester practical nursing courses and consent of instr. Capstone course that allows the student to work collaboratively with an identified LPN preceptor, performing the role expectations for care in that workplace setting.

- NRSG 144 - Cre Cncpts of Mentl Hlth Nrsng

  Credits: 2. Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Exploration of physiological, psychological, sociocultural, spiritual, and environmental factors associated with mental health/illness affecting individuals and families. Focus will be placed on basic concepts of psychiatric nursing, therapeutic modalities, as well as psychiatric disorders including psychopharmacological management. Course Attributes: Practical Nursing Prog Rqrmnt Registered Nursing Prog Rqrmnt

- NRSG 147 - Practical Nursing NCLEX Review

  Credits: 2. Offered autumn and spring. Prereq: Successful completion of all courses in the first semester of the practical nursing program. Preparation for the national test for LPN licensure.

- NRSG 148 - Leadership Issues

  Credits: 2. Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Capstone course that provides the Practical Nursing student information regarding the current status of vocational nursing. There is a forty-five hour clinical/precepted component to provide the student opportunity to apply theoretical knowledge in the long-term care setting.

- NRSG 191 - Special Topics

  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

- NRSG 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- NRSG 230 - Nursing Pharmacology

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides the student with an overview of pharmacology with an emphasis of the study of effects, interactions, and nursing considerations of pharmacologic agents on the client population across the lifespan. The course also explores the ethical, legal, cultural and age implications of pharmacologic therapy across diverse populations and the lifespan.

- NRSG 231 - Nursing Pharmacology Lab

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. An integration of lab experiences focusing on the basic principles in providing safe medication administration, including intravenous therapy across diverse populations and the lifespan.

- NRSG 232 - Foundations of Nursing

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides opportunities to develop competencies necessary to meet the needs of individuals throughout the lifespan in a safe, legal, and ethical manner using the nursing process. Students learn concepts and skills necessary for maintaining standard precautions, physical, psychological and nutritional safety, along with skills needed in therapeutic interventions. Students are introduced to the concepts of professional nursing, patient needs, safety, communication, teaching/learning, critical thinking, ethical-legal, rural nursing, cultural and ethnic diversity, and interdisciplinary patient-centered care.

- NRSG 233 - Foundations of Nursing Lab

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. An integration of lab experiences focusing on psychomotor nursing skills needed to assist individuals in meeting basic human needs. Application of the nursing process and hands-on learning experiences for nursing skills, patient assessments, nutritional safety, and basic therapeutic skills are practiced and demonstrated.

- NRSG 234 - Adult Nursing I

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This course builds upon the knowledge and skills acquired in Foundations of Nursing, and places them in the context of patient-centered care. Social, cultural, ethical, rural and legal issues, end-of-life and palliative care across diverse adult populations are introduced. Health promotion and prevention throughout the adult lifespan, with specific focus on the geriatric patient, is emphasized. Normal aging, health alterations associated with aging, and their implications are addressed.

- NRSG 235 - Adult Nursing I Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This clinical introduces the student to nursing practice in care of the stable adult patient. This includes care of the adult in a variety of health care settings. Students utilize the nursing process to develop individualized plans of care to prevent illness, promote wellness and maintain or restore health based on patient needs and evidence based practice.

- NRSG 236 - Health and Illness of Maternal Nursing

  Credits: 2. Offered autumn and spring. Prere., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. In this course, the student applies holistic concepts to the professional nursing care of the childbearing family including conception, prenatal, intrapartum, postpartum and newborn care. Content addresses health and complex alterations, reproduction and menopause, nutrition, therapeutic communication, ethical, legal, cultural and evidenced-based practice.

- NRSG 237 - Health and Illness of Maternal Nursing Clinical

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This clinical introduces the student to the role of the registered nurse in the care of the childbearing family. Students will utilize the nursing process to assess and develop individualized plans of care for mother and infant. Emphasis will be placed on patient education to promote healthy mother infant and childbearing family bonding.

- NRSG 244 - Adult Nursing II

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. This course builds upon previous knowledge of the nursing process and care of the patient experiencing acute and chronic disease alterations. Pathophysiologic processes are discussed as related to evidence-based nursing interventions. Students apply the nursing process, nutritional therapy, and pharmacological therapy utilizing interdisciplinary practice to promote, maintain, and restore health across the adult lifespan.

- NRSG 245 - Adult Nursing II Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this clinical experience the student will provide care for individuals and families experiencing acute health alterations, and those associated with chronic disease processes. Students use the nursing process to systematically analyze information to plan and implement nursing interventions which are individualized and founded on evidence-based practice.

- NRSG 246 - Health and Illness of Child and Family Nursing

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this course, the student applies holistic concepts to the professional nursing care of children and their families in health, illness, end-of-life and palliative care.Emphasis is placed on incorporating growth and developmental principles to facilitate positive health outcomes through health promotion, nutrition and disease prevention.

- NRSG 247 - Health and Illness of Child and Family Nursing Clinical

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this clinical, students will utilize the nursing process, to provide nursing care of healthy and high-risk pediatric populations and their families experiencing disruptions in bio/psycho/social/cultural and spiritual needs. Emphasis is also placed on health promotion, health maintenance, and therapeutic communication.

- NRSG 250 - LPN to RN Transition

Credits: 3. Offered autumn and spring. Prereq., admission to the registered nursing program and current unencumbered LPN license. Focus on the role transition from LPN to RN in relation to the concepts and principles of holistic nursing care. Focus is on the continuing development of roles and responsibilities of the RN as defined by the scope of practice standards, nursing theory and conceptual models.

- NRSG 254 - Mental Health Concepts

  Credits: 2 TO 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this course, the student focuses on the nursing concepts utilizing basic human needs, developmental theory, nursing process, therapeutic communication, and nursing interventions to promote and maintain health for clients and families experiencing mental-health issues. The student will examine client responses to stressors across the life span. Tasks of biological-behavioral concepts in psychosocial nursing care, rural and cultural impacts will be addressed.

- NRSG 255 - Mental Health Clinical

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. This clinical applies the knowledge of psychiatric and mental health nursing. Students will have mental health focused clinical experiences in a variety of settings.

- NRSG 256 - Pathophysiology

  Credits: 3. Offered spring and autumn. Prereq., successful acceptance into the Registered Nursing program. This course introduces the student to the basic principles and processes of pathophysiology including cellular communication, genes and genetic disease, forms of cellular injury, nutrition, fluid and electrolyte/acid base balance, immunity, stress coping and illness, and tumor biology. Pathophysiology of the most common alterations according to body systems will be discussed as well as the latest developments in research and patient-centered nursing interventions.

- NRSG 259 - Adult Nursing III

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This course expands on the nursing role in care of patients with complex health alterations. Students utilize evidence-based, interdisciplinary interventions to meet patient and family needs.

- NRSG 260 - Adult Nursing III Lab

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. In this lab students are introduced to basic electrocardiogram interpretation, advanced concepts of perfusion, ventilation and complex pharmacologic regimens.

- NRSG 261 - Adult Nursing III Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This clinical experience focuses on application of the nursing process and utilization of information to provide comprehensive nursing care to the acutely ill patient experiencing complex health alterations in a variety of settings. Emphasis is placed on prioritization of care and collaboration with other members of the interdisciplinary team to ensure optimal client care.

- NRSG 266 - Managed Client Care

  Credits: 2 TO 4. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. In this course students examine concepts of leadership and management emphasizing prioritization, delegation, and supervision of nursing care for patients across the lifespan. Topics also include communication techniques, legal and ethical issues, care of the culturally diverse patient, and utilizing change theory. Healthcare policy, finance, and regulatory environment issues are explored and applied to planning, collaborating and coordinating care across the continuum.

- NRSG 267 - Managing Client Care Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This precepted clinical experience focuses on principles of nursing leadership and management in a variety of settings. Students apply knowledge to provide culturally competent, holistic interventions within the professional nursing role for individuals, communities, and families across the lifespan.

- NRSG 291 - Special Topics

Credits: 1 TO 6. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- NRSG 292 - Independent Study
  Credits: 1 TO 6. (R-6) Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

Pharmacy Technology

Back to Top

- PHA 196 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently.

Pharmacy

Back to Top

- PHAR 100 - Intro Pharm Practice for Techs
  Credits: 3. Offered autumn. Prereq., admission into Pharmacy Technology program. This course offers information regarding careers in pharmacy. It includes the history of pharmacy practice and defines roles of personnel relating to pharmaceutical services. Ethical standards of the occupation and federal and state laws regulating pharmacy practice with emphasis on Montana State Pharmacy Law regulating pharmacy technicians are studied. Day-to-day operations including preparation, maintenance, and storage of pharmaceuticals and records, and basic concepts of computer operations and latest technologies are reviewed. Skills will be developed with are necessary for the pharmacy technician to communicate effectively in the following ways: 1) as a representative of the profession of pharmacy, 2) as an intermediary between the pharmacist and patient, and 3) as an intermediary between the pharmacist and other health care professionals.
- PHAR 101 - Pharmacy Calculations
  Credits: 3. Offered autumn. Calculations used in pharmacy practice; includes various systems of weights and measures, dosage determinations, percentage preparations, reducing and enlarging formulas, dilution, and concentration.
- PHAR 102 - Pharmacology for Technicians
  Credits: 6. Offered autumn. Prereq., admission into Pharmacy Technology program. Study of the properties, reactions, and therapeutic value of the primary agents in the major drug classes.
- PHAR 104 - Pharmacy Dispensing Lab
  Credits: 3. Offered autumn. Prereq., admission into Pharmacy Technology Program. Develop dispensing and distributive skills with hands-on lab, and lecture format.
- PHAR 120 - Medication Safety
  Credits: 3. Offered spring online only. Prereq., PHAR 100, 101, 102, 104 and second semester standing in Pharmacy Technology Program. This course will introduce students to national safety initiatives developed by the Institute of Medicine, The Joint Commission, The Institute of Safe Medicine Practices and others. This awareness will help students become part of the solution in promoting safe medication practices.
- PHAR 121 - Preparation for the PTCB Exam
  Credits: 1. Prereq., PHAR 100, PHAR 101, PHAR 102 and PHAR 104. This course will offer strategies in test taking, and help students refresh their knowledge in all knowledge areas included in the exam as identified by PTCB.
- PHAR 192 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.
- PHAR 198 - Internship: Pharmacy
  Credits: 4. Offered spring. Prereq., PHAR 100, 101, 102, 104 and second semester standing in Pharmacy Technology Program. Training and experience in either hospital, compounding, home infusion, nursing home or other alternative pharmacy settings under supervision of a pharmacist.

Emphasizes special skills unique to that pharmacy setting. Course Attributes: Internships/Practicums

College of Health Professions and Biomedical Sciences

Reed Humphrey, Dean

Howard D. Beall, Associate Dean for Pharmacy

The College of Health Professions and Biomedical Sciences offers the Bachelor of Arts in Social Work, the Doctor of Pharmacy (Pharm.D.) degree; Master of Science degrees in Neuroscience, Pharmaceutical Sciences, Toxicology, and Medicinal Chemistry; the Master of Public Health degree; the Master of Social Work degree; the Doctor of Physical Therapy degree; and the Doctor of Philosophy (Ph.D.) degrees in Biomedical Sciences, Neuroscience, Toxicology, and Medicinal Chemistry.

The focus of these programs is to provide a composite of educational experiences that will produce a well-educated person and a highly trained, professional social worker, health care practitioner or scientist.

Business Technology Department

Cheryl Galipeau, Chair

The Business Technology Department of Missoula College collaborates with business and industry to prepare graduates to compete in and contribute to a dynamic global society. The department attracts and retains skilled faculty with the professional experience and theoretical background to utilize diverse instruction which reflects current and emerging business practices. Faculty actively engage student in the learning process by integrating experiential technical education and empowering students to adapt to an ever-changing world.

Students may choose from six Associate of Applied Science degree programs and four Certificate of Applied Science programs. Degree programs include Accounting Technology with an option in Computer Support; Administrative Management with an option in Social Media Management; Food Service Management; Medical Information Technology with options in Health Information Coding Specialty, and Medical Administrative Assisting; Paralegal Studies; and Management with options in Entrepreneurship and Sales and Marketing. Certificate of Applied Science programs include Culinary Arts, Customer Relations, Medical Reception, and Sales and Marketing.

Students may attend classes on Missoula College's East Campus and UM's Mountain campus. Programs may contain day, evening and weekend classes.

Accounting

Back to Top

- #### ACTG 100 - Essentials of Accounting
  Credits: 4. Offered autumn and spring. Introduction to basic double-entry accounting. Emphasis on analyzing, journalizing, and posting transactions; trial balance, worksheet, financial statements, and adjusting/closing procedures, cash control and completing the accounting cycle.
- #### ACTG 101 - Accounting Procedures I
  Credits: 4. Offered autumn and spring. Basic double-entry accounting. Emphasis on analyzing, journalizing, and posting transactions; trial balance, worksheet, financial statements, and adjusting/closing procedures, accounting systems, and cash control.
- #### ACTG 102 - Accounting Procedures II
  Credits: 4. Offered autumn and spring. Prereq., ACTG 101. Expansion of ACTG 101 including receivables, inventories, plant and intangible assets, and expanded liabilities. Includes partnerships, corporations, long-term liabilities, investments in debt and equity securities, and the statement of cash flows.
- #### ACTG 180 - Payroll Accounting

Credits: 3. Offered autumn and spring. Payroll Topics including Federal and Montana state payroll tax law. The course includes study of workers compensation, independent contractor determination and registration, preparation of payroll, payroll tax returns and deposits, and annual information payroll returns. Students will also be exposed to federal law affecting payroll such as Fair Labor Standards Act, ADA, Family Medical Leave Act, Civil Rights Act, etc. and applicable Montana state laws.

- ACTG 192 - Independent Study
  Credits: 1 TO 9. Course material appropriate to the needs and objectives of the individual student.
- ACTG 211 - Income Tax Fundamentals
  Credits: 4. Offered autumn. Prereq., ACTG 180 with a "C" grade or better. This class is a comprehensive overview of individual income taxation. It includes an introduction to taxation terminology, taxation principles and an overview of retirement plans/tax ramifications for small businesses/individuals. Individual taxation is taught through preparation of a series of tax returns. Course emphasis is on individuals and sole proprietorships.
- ACTG 215 - Fnd of Govt & Not Profit Acct
  Credits: 3. Offered spring. Prereq., ACTG 101-102 or consent of instr. Principles of accounting for governmental units, health care organizations, colleges and universities, and other nonprofit organizations.
- ACTG 250 - Accounting Capstone
  Credits: 4. Offered spring. Prereq., ACTG 202, 211, or equivalent. and consent of instr. Capstone class integrates accounting software, income tax preparation, financial statement preparation, ratio analysis, financial report writing: includes presentation and critical thinking skill development as well.
- ACTG 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

Allied Health Medical Assist

Back to Top

- AHMA 191 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- AHMA 201 - Med Asst Clinical Prcdrs I
  Credits: 4. Offered autumn. Prereq., M 105, BIOH 112, BIOH 113. Skill development necessary to assist health care practitioners in all aspects of patient care in the medical office clinical setting. Includes achieving competency in prepping patients for a physical examination, charting, medication administration, basic medical laboratory skills. Course Attributes: Technical Course
- AHMA 203 - Med Asst Clinical Prcdrs II
  Credits: 4. Offered spring semester. Prereq., AHMA 201. This course builds on skills learned in AHMA 201 and includes body systems and pathophysiology review, and development of skills in the following areas: immunization administration, specimen collection, CLIA waived lab testing, care of lab equipment, spirometry, electrocardiogram, and phlebotomy. Course Attributes: Technical Course
- AHMA 260 - Med Assist Lab 1
  Credits: 2. Co-req., AHMA 201. This course introduces the student to basic skills of medical assisting. Included in this course are standard procedures, aseptic and sterilization procedures, vital signs, assisting with general exams, urinalysis, and drug administration.
- AHMA 262 - Med Assist Laboratory Procedures 2
  Credits: 2. Prereq., AHMA 201 and 260. Corereq., AHMA 203. This course builds on skills learned in AHMA 260 and moves into areas of greater specialization. Included in this course are CLIA-waived and hematological testing, ECG, venipuncture, assisting with surgical procedures, wound care, and specialty exams.
- AHMA 291 - Special Topics

Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHMA 298 - Medical Assisting Externship

  Credits: 5. Offered spring. Prereq., consent of instructor. Placement in a medical office for a guided experience providing the student with a practical application of learned medical office administrative skills. Direct supervision will be the responsibility of a designated person at the site. The students will spend six hours per week to total 90 hours in assigned clinical rotations. Course Attributes: Internships/Practicums

Allied Health Medical Support

Back to Top

- AHMS 175 - Medical Law & Ethics

  Credits: 2. This course will introduce students to the common laws, regulations, and agencies affecting ambulatory medical facilities. Current issues of ethics and bioethics will also be discussed. This is a blended class.

Administrative Management

Back to Top

- AMGT 145 - Records Management

  Credits: 2. Offered every term. Introduction to alphabetic filing techniques and electronic database records management. Current technical developments utilizing automated records systems, biometric access control devices, electronic file organization, ergonomics, the Internet, image technology, and integrated security systems.

- AMGT 192 - Independent Study

  Credits: 1 TO 9. (R-9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- AMGT 198 - Internship

  Credits: 1 TO 6. (R-6) Extended classroom experience which provides practical application of classroom learning during placements within the business community. The student must complete a learning agreement with a faculty member, relating the placement opportunity to his or her field of study. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.

- AMGT 240 - Admin Support for the Office

  Credits: 3. Offered autumn. Prereq., CAPP 134. Overview of the procedures and scope of the administrative assistant’s role in today’s automated office, including traditional and electronic communications, operation of multi-media equipment, and managing office technology.

- AMGT 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AMGT 298 - Adm Mgmt Internship

  Credits: 2. Offered autumn and spring. Prereq., last semester in program, minimum of “C” in program courses, and approval of program director. On the job training in positions related to each student's career goal in the administrative field. This experience increases students' skills, prepares them for initial employment and increases occupational awareness and professionalism. Students work a minimum of six hours each week at an approved site and attend weekly scheduled one-hour seminars. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.

Business: General

Back to Top

- BGEN 160S - Issues in Sustainability

Credits: 3. Offered every term. Same as CCN 160S. This literature-intensive course is intended to expose the student to a variety of essays addressing the balance of economic development with the principles of sustainability and social equity. The student is offered an introduction to sustainability concepts, natural systems/cycles and environmental economics. Natural capitalism and triple bottom line maximization is explored, along with the role of corporations and small businesses in sustainable development. A survey of issues surrounding corporate social responsibility and sustainability-driven innovation will be conducted. Course Attributes: Social Sciences Course (S)

- BGEN 235 - Business Law

  Credits: 3. Offered autumn and spring. This course provides an overview of law as it applies to business transactions. Topics include the nature and source of law; courts and procedure; contracts, sales, and employment; commercial paper; bailment's; property; business organizations; insurance; wills and estate planning; consumer and creditor protection; torts; criminal law; and agency law. Credit not allowed for both BGEN 235 and BADM 257.

Business: Management

Back to Top

- BMGT 212 - Critical Analysis for Business

  Credits: 3. This is an analysis, critical thinking, and writing course for students in the Business Technology fields. Students will also be introduced to traditional Western philosophy through study and discussion of Socrates, Plato and, Aristotle. To that end, students will analyze theories of knowledge and morality in relationship to current events within American Democracy and Law. Students will practice identifying elements of arguments, analyzing elements of arguments for logic, and developing coherent and comprehensive responses to arguments. This course will emphasize practical application rather than purely academic exercise.

- BMGT 216 - Psych of Mgmt & Supervision

  Credits: 4. Offered autumn. Management theory, research, and the practice of management. Topics covered include leadership styles and techniques, effective communication approaches, time management, decision making, delegation, and the basic functions of supervisory skills.

- BMGT 242 - Front Line Supervision

  Credits: 3. Offered spring. Introduces basic employee development with emphasis on the responsibilities of a newly-appointed supervisor. Emphasizes organizational structure, motivation, delegation of authority, the hiring process, employee development, employee performance, evaluations, and dealing with employee conflict.

- BMGT 245 - Customer Service Management

  Credits: 4. Offered spring. Designed to prepare employees and managers to meet customers' expectations. Review of customer service philosophy and techniques. Services marketing, quality issues, service design and delivery, customer interaction systems, complaint handling and service recovery, customer relationships, loyalty management, and operations are addressed.

- BMGT 299 - Capstone:Entrepreneurship

  Credits: 3. Offered spring. Prereq., CAPP 120. An overview of the skill areas and business principles needed to start and operate a small business. Includes developing a business plan, identifying sources of capital formation, managing growth, and marketing issues related to new ventures.

Business: Marketing

Back to Top

- BMKT 109 - Visual Merchandising & Display

  Credits: 3. Offered spring. Introduction to various techniques used by retailers in the merchandising and displaying of goods. Analysis of different approaches and methods for effectiveness in actual retail settings. Includes display principles of balance, color, and focal point statements.

- BMKT 112 - Applied Sales

  Credits: 2. Offered autumn. Course provides students with basic sales skills through the use of experiential training, role-playing and evaluating presentations. Includes the steps in prospecting,

opening, presenting, demonstrating, handling objections, and closing the sale. Students will gain experience through role-playing activities, observations, and written presentations.

- BMKT 112T - Applied Sales

  Credits: 2. Offered autumn. Course provides students with basic sales skills through the use of experiential training, role-playing and evaluating presentations. Includes the steps in prospecting, opening, presenting, demonstrating, handling objections, and closing the sale. Students will gain experience through role-playing activities, observations, and written presentations. Course Attributes: Technical Course

- BMKT 114 - Psychology of Selling

  Credits: 3. Offered spring. Development of selling techniques which are used by many of the world's best companies and explanation of why they work. Includes the psychological reasons that prevent a prospect from purchasing a product or service and the techniques to motivate a prospect to buy.

- BMKT 225 - Marketing

  Credits: 3. Offered autumn. An overview of marketing activities including the consumer buying decision process, distribution channels, the planning process, and new marketing trends. Students learn how to introduce a new product into the market place, target markets, and promote products through advertising and package design.

- BMKT 240 - Advertising

  Credits: 3. Offered spring. Exposure to the history and fundamentals of advertising; in-depth exploration of advertising media, budget plans, ad campaign designs, and in-house promotion designs; and the production of actual radio, television, and print advertising.

- BMKT 265 - Social Media Strat & Mgmt

  Credits: 3. Offered spring. Prereq., CAPP 120 or CSCI 105. Students will analyze and select appropriate communication channels and technologies according to relevant publics, evaluate suitability of media content and use best communication practices to promote a positive organizational image, and apply business relationship marketing techniques to enhance social communities. Students will monitor issues and analyze trends across various social media platforms and manage media through professional, accessible, and ethical practices expected in our global society.

Business

Back to Top

- BUS 198T - Business Technology Internship

  Credits: 3. Prereq. Consent of instr. Extended classroom experience which provides practical application of classroom learning during placements in supervised business-related environments. The experience increases students' business skills, and occupational awareness and professionalism. Variable internship credit will be determined by Department Faculty Supervisor. BUS 198T credits and work experience do not apply toward or substitute for Business Technology Department x298 internship credits and work experience.

- BUS 238T - Financial Planning

  Credits: 3. Offered autumn. This course deals with personal financial planning and investments. The course will focus on a variety of personal finance topics including, the time value of money, liquid asset management, federal income and estate taxes, credit cards, consumer loans, automobile purchases, and insurance. The course then looks at long-term investing. Special topics covered include stocks, bonds, mutual funds, and tax-deferred retirement plans. There are two overall goals of the course. The first goal is to provide students with knowledge that will help you avoid commonly occurring errors in the management of personal finances. The second goal is to introduce you to some of the key concepts underlying the discipline of finance.

Computer Applications

Back to Top

- CAPP 091 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Credit does not

count toward an Associate of Arts, Associate of Applied Science, or Baccalaureate degree.

- CAPP 120 - Introduction to Computers
  Credits: 3. Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.
- CAPP 154 - MS Word
  Credits: 3. Offered autumn and spring. Prereq., CAPP 120 or basic computer experience and consent of instr. Preparation of business forms, correspondence, mail merges, columnar projects, and reports using up-to-date software. Business related application projects, graphics, and printer operation are included.
- CAPP 156 - MS Excel
  Credits: 3. Offered autumn and spring. Prereq., CAPP 120; and M 090 or M 095. Emphasis on the use of workbooks and sheets to solve business problems. Includes projects relating to data and graphs/charts.
- CAPP 254 - Advanced MS Word
  Credits: 3. Offered spring. Prereq., CAPP 154. Analysis of the concepts of advanced work processing document production underlying mastery of the software. Business-related application projects utilizing critical thinking included. Speed and timing component to increase skills essential for employment.
- CAPP 292 - Independent Study
  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student.

Communication

Back to Top

- COMX 250 - Intro to Public Relations
  Credits: 3. Offered autumn and spring. Introduction to the origin, scope, and nature of public relations activities. Investigation of policies, strategies, and procedures available to an organization in establishing and controlling its communications. Course will explore the impact of public relations and media through case studies and writing exercises.

Culinary Arts

Back to Top

- CULA 101 - Introduction to Food Service
  Credits: 5. Offered every term. Introduction to fundamentals in food handling practice, history, cooking methods, tool and equipment skills, safety and sanitation, recipe and menu development. Course Attributes: Technical Course
- CULA 105 - Food Service Sanitation
  Credits: 2. Offered autumn and summer. Introduction to fundamentals in safe and sanitary food handling practices. Emphasis on development of a well-designed food safety program centered on Hazard Analysis Critical Control Point (HACCP). Course Attributes: Technical Course
- CULA 156 - Dining Room Procedures
  Credits: 3. Offered every term. Prereq., CULA 101 and CULA 105 with a "C" or better. Introduction to foundations of dining room service: such as American, French, English and Russian style services. With buffet and tableside presentation along with beverage service and protocol for customer service, sanitation and menu design. Techniques include espresso service, fine dining service and tableside presentation. Personal hygiene, applied math, basic culinary terminology, beverage management, and tableside cooking methods are practiced.
- CULA 157 - Pantry & Garde Manger
  Credits: 3. Offered autumn and spring. Prereq., CULA 101 and CULA 105 with a "C" or better. Identification of fresh greens, vegetables, and fruits reviewed. General and specific knife skills and

garnish techniques practiced. Standards of quality, preparation, and presentation discussed and practiced. Practice preparation of entrée salads, cold sauces, appetizers, finger sandwiches, pâtés, gelatins, mousses, ice carvings, as well as banquet and buffet presentation. Course Attributes: Technical Course

- CULA 158 - Short Order Cookery
  Credits: 4. Offered every term. Prereq., CULA 101 and CULA 105 with a "C" or better. Hands-on experience in all facets of short order cookery. Emphasis on coordination, speed, presentation, and basic food preparation as well as cooking methods. Course Attributes: Technical Course
- CULA 160 - Soups, Stocks, & Sauces
  Credits: 3. Offered every term. Prereq., CULA 101 and CULA 105 with a "C" or better. Hands-on preparation of basic soups, stocks, sauces, glazes, thickening agents, and garnishes. Course Attributes: Technical Course
- CULA 161 - Meats & Vegetables
  Credits: 3. Offered every term. Prereq., CULA 101 and CULA 105 with a "C" or better. Hands-on experience with the fundamental cooking methods for meats, vegetables, grains, legumes, and pastas. Course Attributes: Technical Course
- CULA 165 - Baking & Pastry
  Credits: 3. Offered every term. Prereq., CULA 101, CULA 105, M 095 with a "C" or better or consent of instr. Introduction to various ingredients and how they affect the finished product. Covers six basic functions of ingredients and the techniques of scaling, pan preparation, sifting, chocolate, and pastry bag work. Course Attributes: Technical Course
- CULA 191 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course
- CULA 192 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course
- CULA 210 - Nutritional Cooking
  Credits: 3. Offered spring. Prereq., CULA 101 and CULA 105 or consent of instr. Principles of healthy and nutritious culinary procedures. Adjustment of classic methods to suit preparations designed to extend variety on "lighter" menus. Course Attributes: Technical Course
- CULA 270 - Purchasing and Cost Controls
  Credits: 5. Offered autumn. Prereq., CULA 101 and CULA 105, M 095; or consent of instr. Principles of purchasing foods and materials based on needs, specifications, availability, and seasonality. Costs of doing business including products, labor, facilities, and preparing financial statements.
- CULA 275 - Patisserie
  Credits: 2. Offered spring. Prereq., CULA 165, M 095 or consent of instr. Advanced principles and techniques in preparing custard sauces, pastry cream, puddings, custards, mousses, Bavarians, soufflés, ices, crepes, fruits, and dessert sauces. Emphasis on presentation of plated desserts. Course Attributes: Technical Course
- CULA 291 - Special Topics
  Credits: 1 TO 6. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course
- CULA 298 - Food Service Internship
  Credits: 4. Offered spring & fall. Prereq., Students must be enrolled in final semester of program and maintain a minimum "C" in all CULA (CUL & FSM) courses, or recommendation of Culinary Program Director. On-the-job training in position delegated by the Culinary Arts Internship Director. This experience increases students' skills, prepares them for initial employment, and increases occupational awareness and professionalism. Students work a minimum of 300 hours at approved event sites and attend scheduled on campus meetings. Course Attributes: Internships/Practicums
- CULA 299 - Culinary Arts Capstone

Credits: 4. Offered spring. Prereq., CULA 270. Students must be enrolled in final semester of program and maintain a minimum “C” in all CULA courses, or recommendation of Culinary Program Director. Coordinates with computer applications course to create virtual food establishments. Includes capstone experience integrating menu planning and design, facilities, publicity, labor, purchasing, and kitchen preparation culminating in a formal, multi-course dinner.

Hospitality, Tourism, & Rec.

Back to Top

- ### HTR 107 - Intro Hospitality Management

  Credits: 3. This course introduces students with an overview of the businesses in the hospitality industry, including hotel/lodging, restaurant, and travel/tourism. The course provides the history, present factors, and future trends that will affect the hospitality industry, as well as introductory practices in marketing, operations, economics, technology, and customer service.

- ### HTR 201 - Hotel Mngmt/Ops

  Credits: 3. This course introduces students to the different management responsibilities within hotel and lodging operations. Students receive instruction on the responsibilities and requirements of management in the areas of front desk management, security/maintenance, housekeeping, administration, and food/beverage.

- ### HTR 298 - Internship

  Credits: 4. This course provides students with the opportunity to gain practical experience in the hospitality industry. Students will secure a position in one of the areas of the hospitality industry and work at least 180 hours. Students will also gain knowledge in how to properly and effectively prepare a resume, cover letter, and for a job interview. The internship will culminate in a portfolio of their accomplishments as well as a paper detailing the knowledge gained from the experience in reference to their job outcomes and goals.

Legal Studies

Back to Top

- ### LEG 183 - Contracts

  Credits: 2. Offered spring. Sources of law affecting the formation, enforceability, and interpretation of contracts. Includes the necessary elements of a contract, the basic doctrines of contract law, and practical approaches to drafting a contract.

- ### LEG 184 - Legal Ethics

  Credits: 2. Offered autumn. Introduction to ethics for the paralegal, including confidentiality, paralegal-attorney relationship, fee arrangements, Code of Professional Conduct, attorney-client privilege, fiduciary responsibilities, and public service.

- ### LEG 185 - Introduction Paralegal Studies

  Credits: 3. Offered autumn. Consent of instr. Students will develop an ability to analyze basic legal principles in real property law and practical experience increasing, organizing, and completing real estate transactions. Students in the course will develop fundamental skills; real estate, landlord-tenant, and land use law. Further, students will continue development of drafting skills, legal research, and case analysis.

- ### LEG 186 - Introduction to Legal Research

  Credits: 2. Offered autumn. Prereq., acceptance into program or consent of instr. Introduction to legal research focusing on how to find, use, understand, and correctly cite law library resources.

- ### LEG 187 - Leg Res & Wrtg I

  Credits: 2. Offered spring. Prereq., LEG 186. Advanced legal research focusing on how to find, use, understand, and correctly cite legal resources. Electronic research methods are presented. Application of legal research to writing is introduced.

- ### LEG 188 - Prin of Real Estate

  Credits: 2. Offered spring. Consent of instr. Students will develop an ability to analyze basic legal principles in real property law and practical experience increasing, organizing, and completing real estate transactions. Students in the course will develop fundamental skills; real estate, landlord-

tenant, and land use law. Further, students will continue development of drafting skills, legal research, and case analysis.

- LEG 189 - Criminal Procedures

  Credits: 3. Offered spring. Consent of instr. Criminal prosecution and defense representation with an overview of criminal law principles. Training in criminal procedure involving felonies and misdemeanors in federal, Montana, and municipal courts.

- LEG 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- LEG 196 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- LEG 270 - Civil Litigation

  Credits: 3. Offered autumn. Prereq., LEG 185T, LEG 187T or consent of instr. Introduction to rules governing civil litigation involving the general nature of how lawsuits arise including client interviews and data gathering, pleading and practice from the filing of suit to file preparation for trial, and core considerations of ethics and professionalism.

- LEG 272 - Computers & Law

  Credits: 3. This course provides an introduction to the growing use of computer technology in law offices. Topics will include using established and developing technologies to address issues such as metadata, online office suites, online storage, Google Apps tools, word processing, spreadsheets, database, calendar, task lists, Bates stamping, online and in-office security, case management, optical character recognition & PDF document storage, operating systems, computers, scanners, online security, sale of providers, instant messaging, email, social media, courtroom presentations, discovery, document review, websites, online advertising, collaborative document editing, client billing, client trust account management, payroll, speech recognition, networking systems, cloud computing, remote desktop programs, and scheduling programs.

- LEG 282 - Contemporary Legal Issues

  Credits: 3. Offered spring. Prereq., LEG 270, or consent of instr. Capstone experience designed to investigate topical legal issues of immediate importance. Although the course has delineated structure, the nature of the course will allow both relevant concentrated focus as well as traditional disciplined examination of numerous areas of law practice and theory. The various pedagogical modules will offer students the opportunity to explore statutory structure, analyze case law, and draft legal forms.

- LEG 283 - Trial Preparation

  Credits: 3. Offered spring. Prereq., LEG 270, or consent of instr. Capstone experience designed to investigate topical legal issues of immediate importance. Although the course has delineated structure, the nature of the course will allow both relevant concentrated focus as well as traditional disciplined examination of numerous areas of law practice and theory. The various pedagogical modules will offer students the opportunity to explore statutory structure, analyze case law, and draft legal forms.

- LEG 285 - Family Law

  Credits: 3. Offered spring. Prereq., LEG 185, LEG 286 or consent of instr. Study of Montana law relating to marriage, husband and wife, parent and child, termination of marriage, adoption, joint and sole custody arrangements and modifications, child support guidelines, and juvenile issues. Includes preparation of standard family law documents.

- LEG 286 - Legal Res & Writing II

  Credits: 2. Offered autumn. Prereq., LEG 186T/187T. Advanced legal research and writing with emphasis on drafting and composing legal memoranda; legal research skills and development of legal writing ability.

- LEG 287 - Legal Res. & Writing III

  Credits: 2. Offered spring. Prereq., LEG 286. Continued development of legal research and writing skills including advanced legal theory/case law synthesis, drafting correspondence, pleadings, discovery documents, persuasive writing. Upon completion of this course, the student will be able to: research, analyze, synthesize, and prioritize law cases, treatises, doctrines, theory of the law, legal rules, and other information and draft appropriate correspondence, pleadings, motions,

briefs, discovery documents or memoranda relating to that information as would be anticipated in a law office.

- LEG 288 - Estate Administration
  Credits: 2. Offered spring. Prereq., LEG 185, LEG 286 or consent of instr. This course provides an overview of the law as it applies to wills, trusts, and other estate matters. Topics include the nature and sources of the law relating to wills, trusts, and estates, estate planning, intestate succession, family protection, probate, and estate taxes.
- LEG 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- LEG 292 - Independent Study
  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- LEG 298 - Paralegal Studies Internship
  Credits: 2. Offered autumn and spring. Prereq., last semester in program, minimum of "C" in LEG courses, and approval of program director. On-the-job experience as a paralegal trainee under the supervision of an employer, attorney, or court official. This experience increases students' skills, prepares them for initial employment and advancement on the job, and increases occupational awareness and professionalism. Students work a minimum of 90 hours at an approved site and attend a weekly one-hour seminar. Course Attributes: Internships/Practicums

Media Arts

Back to Top

- MART 214 - Digital Publishing & Design
  Credits: 3. Offered autumn. Prereq., CAPP 120, CSCI 105, or consent of instr. A comprehensive foundation of layout and design principles to integrate digital media essential for effective print-based and web-based business publications.
- MART 232 - Interactive Web II
  Credits: 3. Offered autumn and spring. Prereq., CAPP 120, CSCI 105, or consent of instr. Provides a background and foundation skills required for designing and implementing Web sites for public and private organizations. Marketing and design techniques are applied using state-of-the-art software.

Technical Administrative Skill

Back to Top

- TASK 191 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

Accounting Technology A.A.S.

Lisa Swallow, Director

Almost all organizations need either in-house financial staff or outside bookkeeping/accounting services to aid with financial data compilation and reporting. Bookkeepers and accountants maintain financial records and often participate in strategic planning and other fiscal decisions. Graduates work in small businesses as full charge bookkeepers or large businesses as members of an accounting staff. They are required to communicate extensively with vendors, clients, and employees and are often key players in business projections, cash forecasting, and budgeting. This program provides students the marketable skills for employability in a variety of organizations including service, retail, non-profit, governmental, and accounting firms. Program graduates use technology to gather, compile and analyze data. They communicate budgetary and accounting information to non-financial colleagues and managers. Students considering this program should be analytical, detail-oriented, and enjoy using current technology.

Associate of Applied Science - Accounting Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 63

Required Cumulative GPA: 2.0

Note: See Program Director for scope and sequence advising.
Please refer to online schedule for online course availability.

AAS Accounting Technology

Rule: All courses required.

Note: Pick 1 of the 2 courses: either CAPP 156 MS Excel or CSCI 172 Intro to Computer Modeling.

	Course	Credits
	ACTG 101 - Accounting Procedures I Offered autumn and spring. Basic double-entry accounting. Emphasis on analyzing, journalizing, and posting transactions; trial balance, worksheet, financial statements, and adjusting/closing procedures, accounting systems, and cash control.	4 Credits
	ACTG 102 - Accounting Procedures II Offered autumn and spring. Prereq., ACTG 101. Expansion of ACTG 101 including receivables, inventories, plant and intangible assets, and expanded liabilities. Includes partnerships, corporations, long-term liabilities, investments in debt and equity securities, and the statement of cash flows.	4 Credits
	ACTG 180 - Payroll Accounting Offered autumn and spring. Payroll Topics including Federal and Montana state payroll tax law. Administrative Management A.A.S.

Cheryl Galipeau, Director

The Administrative Management Program allows students to advance the career proficiencies acquired in the Customer Relations certificate program by earning an Associate of Applied Science Degree. The Administrative Management program prepares graduates to meet the administrative and information needs of business and industry. Students gain proficiency in computer, management, and information technologies. They complete an academic component to gain an understanding of professional responsibilities in our global society. Graduates of this program become vital members of executive teams with the ability to assume supervisory, organizational, and communication roles in the coordination of administrative services. Students are encouraged to earn Microsoft Office Specialist (MOS) certification on Microsoft Office programs. Earning a Microsoft Office Specialist certification increases job opportunities by demonstrating technical proficiency in advanced skills to potential and current employers. Interested students should discuss this opportunity with the Administrative Management Program Director. An Associate of Applied Science Degree in Administrative Management opens opportunities for graduates in a variety of business settings.

Associate of Applied Science - Administrative Management

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 64

Required Cumulative GPA: 2.0

Students will also be introduced to traditional Western philosophy through study and discussion of Socrates, Plato and, Aristotle. To that end, students will analyze theories of knowledge and morality in relationship to current events within American Democracy and Law. Students will practice identifying elements of arguments, analyzing elements of arguments for logic, and developing coherent and comprehensive responses to arguments. This course will emphasize practical application rather than purely academic exercise.	3 Credits
	BMGT 216 - Psych of Mgmt & Supervision Offered autumn. Management theory, research, and the practice of management. Topics covered include leadership styles and techniques, effective communication approaches, time management, decision making, delegation, and the basic functions of supervisory skills.	4 Credits
	BMGT 298 - Management Internship (R-3) Offered every term. Extended classroom experience which provides practical application of classroom learning during placements within the business community. The student must complete a learning agreement with a faculty member, relating the placement opportunity to his or her field of study. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 3 Credits
	BMKT 109 - Visual Merchandising & Display Offered spring. Introduction to various techniques used by retailers in the merchandising and displaying of goods. Analysis of different approaches and methods for effectiveness in actual retail settings. Includes display principles of balance, color, and focal point statements.	3 Credits

	BMKT 112 - Applied Sales Offered autumn. Course provides students with basic sales skills through the use of experiential training, role-playing and evaluating presentations. Includes the steps in prospecting, opening, presenting, demonstrating, handling objections, and closing the sale. Students will gain experience through role-playing activities, observations, and written presentations.	2 Credits
	BMKT 114 - Psychology of Selling Offered spring. Development of selling techniques which are used by many of the world's best companies and explanation of why they work. Includes the psychological reasons that prevent a prospect from purchasing a product or service and the techniques to motivate a prospect to buy.	3 Credits
	BMKT 225T - Marketing Offered autumn. An overview of marketing activities including the consumer buying decision process, distribution channels, the planning process, and new marketing trends. Students learn how to introduce a new product into the marketplace, target markets, and promote products through advertising and package design.	3 Credits
	BMKT 240 - Advertising Offered spring. Exposure to the history and fundamentals of advertising; in-depth exploration of advertising media, budget plans, ad campaign designs, and in-house promotion designs; and the production of actual radio, television, and print advertising.	3 Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	COMX 250 - Intro to Public Relations Offered autumn and spring. Introduction to the origin, scope, and nature of public relations activities. Investigation of policies, strategies, and procedures available to an organization in establishing and controlling its communications. Course will explore the impact of public relations and media through case studies and writing exercises.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	MART 214 - Digital Publishing & Design Offered autumn. Prereq., CAPP 120, CSCI 105, or consent of instr. A comprehensive foundation of layout and design principles to integrate digital media essential for effective print-based and web-based business publications.	3 Credits
	MART 232 - Interactive Web II Offered autumn and spring. Prereq., CAPP 120, CSCI 105, or consent of instr. Provides a background and foundation skills required for designing and implementing Web sites for public and private organizations. Marketing and design techniques are applied using state-of-the-art software.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		67 Total Credits Required

Health Information Coding Specialty A.A.S.

Students are trained to analyze health records and to accurately abstract and code procedures and diagnoses utilizing legal and regulatory standards. An understanding of anatomy, medical terminology and disease processes will provide students with the necessary tools to determine correct codes and sequences.

Associate of Applied Science - Medical Information Technology; Health Information Coding Spec Option

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 62

Required Cumulative GPA: 2.0

Note: See Program Director for scope and sequence advising.
Please refer to online schedule for online course availability.

Degree Core Courses

Rule: All Courses Required

Note: AHMS 291 Special Topics: Simulated Lab Medical Support is a 3 cr. course.

"Coding courses held on-line Great Falls College AHMS 201, AHMS 160, AHMS 162, AHMS 212, and AHMS 213". See program director for coding course information.

WRIT 101 may be substituted for WRIT 121 at the discretion of the program director.

	Course	Credits
	AHMS 108 - Health Data Content & Struct Offered spring. In-depth study of origin, use, content and structure of health records; storage and retrieval systems; numbering and filing systems; documentation requirements; use and structure of health care data sets; and how these components relate to primary and secondary record systems. Additional topics include gathering, compilation and computing of healthcare related statistics, use of research and statistical methods for developing healthcare data into information for various requesters.	2 Credits
	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits
	AHMS 156 - Medical Billing Fundamentals Offered every term. Prereq. or coreq., AHMS 220 or consent of instr. An introduction to insurance claim processing for the major medical insurance programs. Students will be provided with a basic knowledge of CPT and ICD-9 procedural and diagnostic coding. Emphasis on completing universal insurance forms to maximize reimbursement as well as trouble shoot denied or underpaid claims.	3 Credits
	AHMS 160 - Beginning Procedural Coding Offered autumn. Prereq., AHMS 156, AHMS 108 or consent of instr. Foundation for utilizing the CPT coding system to increase compatibility and comparability of medical data among users and providers.	3 Credits
	AHMS 164 - BEG DIAGNOSIS CODING:ICD-10 This course covers basic and intermediate levels of theory and application of ICD-CM principles and guidelines for coding and sequencing diagnoses and procedures. Students perform basic and intermediate coding using real health records, case studies, and scenarios. Application will focus on the use of the electronic ICD-10-CM with an overview of encoder software. This coding class involves hands-on coding, and knowledge of basic use of applicable coding books or the electronic ICD-10-CM. Currently the students take this course through Great Falls	3 Credits
	AHMS 175 - Medical Law & Ethics This course will introduce students to the common laws, regulations, and agencies affecting ambulatory medical facilities. Current issues of ethics and bioethics will also be discussed. This is a blended class.	2 Credits

	AHMS 212 - CPT Coding Offered spring. Prereq., AHMS 210 or consent of instr. Comprehensive application of the CPT coding system to assign codes for services, supplies and equipment for comparative analysis, research and reimbursement.	3 Credits
	AHMS 213 - ICD-10 CODING Prereq., AHMS 164. Basic understanding of diagnostic and procedural coding principles should already be established. The course requires interpreting ICD-10-CM coding and reporting guidelines to sequence and assign appropriate diagnostic codes for both inpatient and various outpatient settings. Compliance issues associated with various IPPS reimbursement systems such as MS-DRGs, as well as APCs are covered. Encoder software will complement the ICD-10-CM manual in the application of coding processes. Clinical information will be interpreted from brief case studies and progress to the coding of health record excerpts.	3 Credits
	AHMS 216 - Pharmaceutical Products Offered autumn. Fundamental principles of pharmacology and the implications of medication use. Includes the law as it pertains to drug use, dosage forms, routes of administration as well as the pharmacologic actions and uses of drugs.	3 Credits
	AHMS 220 - Medical Office Procedures Offered autumn. An introduction to the necessary skills and qualities required to function successfully in the medical arena. Emphasis on medico-legal and ethical responsibilities, records management and financial management of the medical practice, and interpersonal communications to include patient reception, telephone techniques and appointment scheduling.	4 Credits
	AHMS 245 - Simulated Lab Prereq., consent of instr. This course will use computer applications and software in maintaining health information in medical records through practice utilizing HIT applications through the AHIMA Virtual Lab, to include the following applications: Master Patient Index, Electronic Health Record, Encoder, Abstracting, Chart Tracking, Release of Information.	3 Credits
	AHMS 252 - Computerized Medical Billing Offered spring, Prereq., AHMS 156; prereq. or coreq. AHMS 220; or consent of instr. A medical package is used to enter and update patient data, enter charges, payments and adjustments, and generate management reports, insurance forms, and patient statements.	2 Credits
	AHMS 298 - Medical Info Internship Offered every term. Prereq., last semester in program, minimum of "C" in AHMS/AHMA (MED) courses, and approval of program director. On-the-job training in positions related to each student's career goal in the medical information field. This experience increases students' skills, prepares them for initial employment and advancement on the job, and increases occupational awareness and professionalism. Students work a minimum of 180 hours at an approved site and attend a scheduled one-hour seminar.	3 Credits
	BIOH 112 - Human Form and Function I Offered autumn. Explores the fundamentals of structure and function at basic cellular and tissue levels, in addition to the anatomy and physiology of the integumentary, musculoskeletal, and nervous systems.	3 Credits

	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	CAPP 154 - MS Word Offered autumn and spring. Prereq., CAPP 120 or basic computer experience and consent of instr. Preparation of business forms, correspondence, mail merges, columnar projects, and reports using up-to-date software. Business related application projects, graphics, and printer operation are included.	3 Credits
	CAPP 156 - MS Excel Offered autumn and spring. Prereq., CAPP 120; and M 090 or M 095. Emphasis on the use of workbooks and sheets to solve business problems. Includes projects relating to data and graphs/charts.	3 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits

Paralegal Studies A.A.S.

Tom Stanton, Director

This program is approved by the American Bar Association. The Paralegal Studies program prepares students for challenging and diverse careers in private law practices and in the law-related areas of business, industry, and government. The goals of the Paralegal Studies program are to enable students, through theoretical and practical legal education, to understand the function of law, to work as paralegals in the effective delivery of legal services, and to enhance the legal profession. This program is designed to equip students with skills to analyze legal issues and to perform a variety of activities including drafting legal documents, interviewing clients, conducting legal research, and preparing cases for trial. Students utilize current technology through Internet research and legal and general office software applications. Paralegal studies students receive the necessary legal training to take advantage of new career opportunities in all sectors of the economy. Students are exposed to the principles of legal ethics and are cautioned regarding restrictions against the unauthorized practice of law by laypersons. Paralegals may not provide legal services directly to the public, except as permitted by law.

Associate of Applied Science - Paralegal Studies

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 70

Required Cumulative GPA: 2.0

Note: Two year/four semester in-step degree. If classes are taken out of sequence, or Spring enrollment, additional semesters are required for graduation. Also note, LEG prefix (legal specialty) are only offered in the semester indicated.

See Program Director for scope and sequence advising.
Please refer to online schedule for online course availability.

Culinary Arts Certificate

Tom Campbell, Director

The Bureau of Labor Statistics indicates that the hospitality field is America's number one retail employer and predicts its growth will increase 30 percent over the next two years. Students entering the Culinary Arts Certificate program or Food Service Management degree program prepare for careers in the hospitality industry. Students develop the skills needed to then seek employment in hotels, restaurants, resorts, casinos, clubs, catering, and corporate dining. Culinary careers encompass hospitality management, sales, product development, and entrepreneurship.

To meet the growing demand of the hospitality industry, two program options are available. Students may earn a Culinary Arts Certificate of Applied Science or a Food Service Management Associate of Applied Science degree.

The Culinary Arts certificate program is three semesters and provides an introduction to the field of culinary arts. Students prepare for an entry-level position in the expanding and challenging food service industry. This program incorporates comprehensive hands-on learning experiences complemented by supportive courses designed to prepare students for a wide range of career opportunities. This program also allows for a seamless transition into the Food Service Management degree.

Certificate of Applied Science - Culinary Arts

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 45

Required Cumulative GPA: 2.0

Note: See Program Director for scope and sequence advising.
Please refer to online schedule for online course availability.

CAS Culinary Arts Certificate

Rule: All courses required.

	Course	Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits

Medical Reception Certificate

Michelle Boller, Interim Director

The Medical Reception curriculum provides students with the skills needed to provide exceptional service to patients in a medical setting. In this role, essential duties include scheduling appointments, screening telephone calls, obtaining and entering patient registration information, releasing appropriate medical information, maintaining medical records and managing patient flow. Medical Reception students are instructed in the financial transactions of a practice and will have a clear understanding of all the activities in the billing and collection cycle. Students are provided a broad overview of medical law and the principles of medical ethics as well as the guidelines established by HIPAA. This training also prepares students for the position of a hospital ward secretary.

Certificate of Applied Science - Medical Reception

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 33

Required Cumulative GPA: 2.0

Provides a background and foundation skills required for designing and implementing Web sites for public and private organizations. Marketing and design techniques are applied using state-of-the-art software.	3 Credits
Minimum Required Grade: C-		66 Total Credits Required

Entrepreneurship Start-up

Technical Certificate - Entrepreneurship/Start-up

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 12
Required Cumulative GPA: 2.0

Core Courses

Rule: Must complete all of the following courses:

	Course	**Credits**

	ACTG 101 - Accounting Procedures I Offered autumn and spring. Basic double-entry accounting. Emphasis on analyzing, journalizing, and posting transactions; trial balance, worksheet, financial statements, and adjusting/closing procedures, accounting systems, and cash control.	4 Credits
	BMGT 299 - Capstone:Entrepreneurship Offered spring. Prereq., CAPP 120. An overview of the skill areas and business principles needed to start and operate a small business. Includes developing a business plan, identifying sources of capital formation, managing growth, and marketing issues related to new ventures.	3 Credits
	BMKT 114 - Psychology of Selling Offered spring. Development of selling techniques which are used by many of the world's best companies and explanation of why they work. Includes the psychological reasons that prevent a prospect from purchasing a product or service and the techniques to motivate a prospect to buy.	3 Credits
	BMKT 240 - Advertising Offered spring. Exposure to the history and fundamentals of advertising; in-depth exploration of advertising media, budget plans, ad campaign designs, and in-house promotion designs; and the production of actual radio, television, and print advertising.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Hospitality Management Certificate

Certificate of Applied Science - Hospitality Management

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 32
Required Cumulative GPA: 2.0

Core Courses

Rule: Must complete all of the following courses:

	Course	**Credits**
	ACTG 101 - Accounting Procedures I Offered autumn and spring. Basic double-entry accounting. Emphasis on analyzing, journalizing, and posting transactions; trial balance, worksheet, financial statements, and adjusting/closing procedures, accounting systems, and cash control.	4 Credits

	ACTG 102 - Accounting Procedures II Offered autumn and spring. Prereq., ACTG 101. Expansion of ACTG 101 including receivables, inventories, plant and intangible assets, and expanded liabilities. Includes partnerships, corporations, long-term liabilities, investments in debt and equity securities, and the statement of cash flows.	4 Credits
	BMGT 245 - Customer Service Management Offered spring. Designed to prepare employees and managers to meet customers' expectations. Review of customer service philosophy and techniques. Services marketing, quality issues, service design and delivery, customer interaction systems, complaint handling and service recovery, customer relationships, loyalty management, and operations are addressed.	4 Credits
	CULA 198 - Internship Introduction to foundations of dining room service and protocol. Includes techniques in dining room service. Personal hygiene, applied math, basic culinary terminology, beverage management, and table side cooking methods are practiced.	1 To 6 Credits
	HTR 107 - Intro to Hosp Mngmt This course introduces students with an overview of the businesses in the hospitality industry, including hotel/lodging, restaurant, and travel/tourism. The course provides the history, present factors, and future trends that will affect the hospitality industry, as well as introductory practices in marketing, operations, economics, technology, and customer service.	3 Credits
	HTR 201 - Hotel Mngmt/Ops This course introduces students to the different management responsibilities within hotel and lodging operations. Students receive instruction on the responsibilities and requirements of management in the areas of front desk management, security/maintenance, housekeeping, administration, and food/beverage.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits

Business Media Design

Certificate of Applied Science - Business Media Design

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 33
Required Cumulative GPA: 2.0
Note: See Program Director for scope and sequence advising.

CAS Business Media Design Course Requirements

Rule: All courses required

	Course	**Credits**
	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	COMX 140L - Intro to Visual Rhetoric Offered autumn and spring. An introduction to the persuasive nature of visual symbols as texts. Readings will include historical to contemporary rhetorical criticisms on advertising, billboards, bodies, cartoons, memorials, and photography.	3 Credits

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	MART 101L - Intro to Media Arts Offered every term. Overview of the media arts and their interaction, integration and development in the creation of story beginning with the early years of photography and movie-making through the introduction of radio and television up to the digital revolution.	3 Credits
	MART 102 - Digital Technology in the Arts Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.	3 Credits
	MART 111A - Intro to Photoshop Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment.	3 Credits
	MART 112A - Introduction to Film Editing Offered every term. Study of the history, process and philosophy of narrative film/video editing and an introduction to Final Cut nonlinear editing software.	3 Credits
	MART 214 - Digital Publishing & Design Offered autumn. Prereq., CAPP 120, CSCI 105, or consent of instr. A comprehensive foundation of layout and design principles to integrate digital media essential for effective print-based and web-based business publications.	3 Credits
	MART 232 - Interactive Web II Offered autumn and spring. Prereq., CAPP 120, CSCI 105, or consent of instr. Provides a background and foundation skills required for designing and implementing Web sites for public and private organizations. Marketing and design techniques are applied using state-of-the-art software.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits

Minimum Required Grade: C-	33 Total Credits Required

Computer Science Requirements

Rule: Pick 1 of the 2 courses below

Note: See Program Director for prerequisites, placement and advising.

	Course	Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Food Service Management A.A.S.

Tom Campbell, Director

The Food Service Management program culminates in an Associate of Applied Science Degree. This program combines theory, practical training, and industry experience to prepare students for entry-level and management positions in the diverse and dynamic hospitality industry. The degree program is designed to continue principles taught in the Culinary Arts certificate program. The spectrum of learning is expanded to include more in-depth professional studies thereby enhancing employment options. Accreditation by the American Culinary Federation ensures graduates' eligibility for certification as an ACF "Certified Culinarian".

Technical subject areas include introduction to the industry, basic baking, patisserie, cost control, dining room service, Garde manger, nutritional cooking, fundamental cooking principles, short order cookery, a la carte stations, menu planning, supervised internship, and the recognized sanitation certificate awarded by the National Restaurant Association Educational Foundation.

Associate of Applied Science - Food Service Management

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 66

Required Cumulative GPA: 2.0

Note: See Program Director for scope and sequence advising.
Please refer to online schedule for online course availability.

AAS Food Service Management

Rule: All courses required.

	Course	Credits
	BMGT 216 - Psych of Mgmt & Supervision Offered autumn. Management theory, research, and the practice of management. Topics covered include leadership styles and techniques, effective communication approaches, time management, decision making, delegation, and the basic functions of supervisory skills.	4 Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	CULA 101 - Introduction to Food Service Offered every term. Introduction to fundamentals in food handling practice, history, cooking methods, tool and equipment skills, safety and sanitation, recipe and menu development.	5 Credits
	CULA 105 - Food Service Sanitation Offered autumn and summer. Introduction to fundamentals in safe and sanitary food handling practices. Emphasis on development of a well-designed food safety program centered on Hazard Analysis Critical Control Point (HACCP).	2 Credits
	CULA 156 - Dining Room Procedures Offered every term. Prereq., CULA 101 and CULA 105 with a "C" or better. Introduction to foundations of dining room service: such as American, French, English and Russian style services. With buffet and tableside presentation along with beverage service and protocol for customer service, sanitation and menu design. Techniques include espresso service, fine dining service and tableside presentation. Personal hygiene, applied math, basic culinary terminology, beverage management, and tableside cooking methods are practiced.	3 Credits
	CULA 157 - Pantry & Garde Manger Offered autumn and spring. Prereq., CULA 101 and CULA 105 with a "C" or better. Identification of fresh greens, vegetables, and fruits reviewed. General and specific knife skills and garnish techniques practiced. Standards of quality, preparation, and presentation discussed and practiced. Practice preparation of entrée salads, cold sauces, appetizers, finger sandwiches, pâtés, gelatins, mousses, ice carvings, as well as banquet and buffet presentation.	3 Credits
	CULA 158 - Short Order Cookery Offered every term. Prereq., CULA 101 and CULA 105 with a “C” or better. Hands-on experience in all facets of short order cookery. Emphasis on coordination, speed, presentation, and basic food preparation as well as cooking methods.	4 Credits

	CULA 160 - Soups, Stocks, & Sauces Offered every term. Prereq., CULA 101 and CULA 105 with a “C” or better. Hands-on preparation of basic soups, stocks, sauces, glazes, thickening agents, and garnishes.	3 Credits
	CULA 161 - Meats & Vegetables Offered every term. Prereq., CULA 101 and CULA 105 with a “C” or better. Hands-on experience with the fundamental cooking methods for meats, vegetables, grains, legumes, and pastas.	3 Credits
	CULA 165 - Baking & Pastry Offered every term. Prereq., CULA 101, CULA 105, M 095 with a “C” or better or consent of instr. Introduction to various ingredients and how they affect the finished product. Covers six basic functions of ingredients and the techniques of scaling, pan preparation, sifting, chocolate, and pastry bag work.	3 Credits
	CULA 205 - Catering Mangement Offered autumn and spring. Prereq., CULA 101, 105. This course will introduce the student to a comprehensive look at planning, starting and operating a successful catering business. Whether on-premise, off-premise, mobile, inside a hotel, part of a restaurant or run from a home kitchen, the student will learn the necessary skills from competence in cooking to managerial skills.	2 Credits
	CULA 210 - Nutritional Cooking Offered spring. Prereq., CULA 101 and CULA 105 or consent of instr. Principles of healthy and nutritious culinary procedures. Adjustment of classic methods to suit preparations designed to extend variety on “lighter” menus.	3 Credits
	CULA 270 - Purchasing and Cost Controls Offered autumn. Prereq., CULA 101 and CULA 105, M 095; or consent of instr. Principles of purchasing foods and materials based on needs, specifications, availability, and seasonality. Costs of doing business including products, labor, facilities, and preparing financial statements.	5 Credits
	CULA 275 - Patisserie Offered spring. Prereq., CULA 165, M 095 or consent of instr. Advanced principles and techniques in preparing custard sauces, pastry cream, puddings, custards, mousses, Bavarians, soufflés, ices, crepes, fruits, and dessert sauces. Emphasis on presentation of plated desserts.	2 Credits
	CULA 298 - Food Service Internship Offered spring & fall. Prereq., Students must be enrolled in final semester of program and maintain a minimum "C" in all CULA (CUL & FSM) courses, or recommendation of Culinary Program Director. On-the-job training in position delegated by the Culinary Arts Internship Director. This experience increases students’ skills, prepares them for initial employment, and increases occupational awareness and professionalism. Students work a minimum of 300 hours at approved event sites and attend scheduled on campus meetings.	4 Credits

	CULA 299 - Culinary Arts Capstone Offered spring. Prereq., CULA 270. Students must be enrolled in final semester of program and maintain a minimum "C" in all CULA courses, or recommendation of Culinary Program Director. Coordinates with computer applications course to create virtual food establishments. Includes capstone experience integrating menu planning and design, facilities, publicity, labor, purchasing, and kitchen preparation culminating in a formal, multi-course dinner.	4 Credits
	M 105 - Contemporary Mathematics Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An introduction to mathematical ideas and their impact on society. Intended for students wishing to satisfy the general education mathematics requirement.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		66 Total Credits Required

Missoula College

Shannon O'Brien, Dean

Clint Reading, Associate Dean

MISSION

The Mission of Missoula College is to create a comprehensive, accessible, student-centered learning environment that fosters individual growth, facilitates workforce development, and provides a foundation for advanced academic achievement.

Vision of Excellence

We envision a future where Missoula College is recognized as a model of excellence for two-year education in Montana, empowering students to succeed in higher education and continuing to serve the needs of the community and workforce. We elevate the awareness of two-year education as a result of our high retention, graduation and placement rates. Through this demonstration of excellence, more students will enroll in two-year colleges, more businesses and industries will partner with two-year schools, and the state will receive the benefits of a more educated citizenry/workforce.

The Missoula College offers programs and services on four campuses: the East Campus at 909 South Avenue West, the West Campus at 3639 South Avenue West, Mountain Campus at 32 Campus Drive, and the Bitterroot College in Hamilton. The student support offices including Enrollment Services, Disability Services for Students, Financial Aid, Registrar, Career Services, Educational Opportunity (EOC), Outreach Programming Office, Academic Advising, and administrative offices are located at the East Campus. All business technology programs, applied computing and engineering technology programs, culinary arts programs, health professions programs, as well as a branch of the Mansfield Library, The Bookstore at the Missoula College, and a dining room are located on the East Campus. All industrial technology programs are located on the West Campus.

Students may attend courses at four campus sites and online. Courses are scheduled at a variety of times between 7 a.m. and 10 p.m., Monday through Saturday. The Missoula College Dean's Office, department chairs and/or program directors may be contacted for specific program and scheduling information.

Bachelor of Applied Science Degree Program

A Bachelor of Applied Science (B.A.S.) degree is offered by the University of Montana - Missoula in collaboration with the Missoula College. The initial contact for information and degree planning for the B.A.S. degree is the Missoula College Academic Advising Center. This degree program is available for students who have completed an Associate of Applied Science degrees from accredited institutions and who wish to continue toward completing a baccalaureate degree. For more information, see the Bachelor of Applied Science section of the catalog.

Associate of Applied Science and Certificate of Applied Science Programs

The Associate of Applied Science (A.A.S.) and Certificate of Applied Science (C.A.S.) programs are designed to prepare an individual for employment in a specific career or career pathway. In some instances, particularly in Health Professions, the degree or certificate is a prerequisite for taking a licensing examination. The A.A.S. degree is not typically considered a transfer degree, although opportunities do exist at the University of Montana and some other baccalaureate degree-granting institutions for continuing in programs such as the University's Bachelor of Applied Science degree program.

The College's Surgical Technology and Respiratory Care programs are reviewed by their respective Joint Review Committees and accredited by the Commission on Accreditation of Allied Health Education Programs. The Food Service Management program is accredited by the American Culinary Federation Educational Institute Accrediting Commission, the Paralegal Studies program is approved by the American Bar Association, and the Nursing programs are approved by the Montana Board of Nursing and Accredited by Accreditation Commission for Education in Nursing (ACEN). The Pharmacy Technology Program is accredited by American Society of Health System Pharmacists/Accreditation Council for Pharmacy Education (ASHP/ACPE).

Associate of Arts Degree Program

The Associate of Arts degree is a general education transfer degree and does not officially include a major or minor course of study but students may focus on specific areas of emphasis in order to satisfy the degree requirements. To receive an Associate of Arts (AA) degree, students must successfully complete all the general education requirements as described by Montana Board of Regents policy 301.10 Appendix 1. The minimum grade point average for the 60 credits required for the A.A. is 2.0. At least 30 of the 60 required credits must be earned at UM, through either Missoula College or University of Montana-Missoula.

Credit Applicable Toward Associate of Arts and Baccalaureate Degrees

Students may count up to 15 technical course credits towards the A.A. and baccalaureate degrees (except the B.A.S.; see the B.A.S. section of the catalog for more information). UP to 20 technical course credits may count if the student has previously earned an A.A.S. degree. Refer to the section on Technical Courses and Credit Maximums in this catalog for additional information. Students should visit with their advisor for more information.

Academic Support Services

Services designed to increase the success of students enrolled at Missoula College are available at the College. Such services include the Academic Advising Center, tutoring and computer-based academic learning tools in the Academic Support Center, study skills workshops, basic skills developmental courses, access to Disability Services for Students, academic and financial aid reinstatement and follow-up assistance, individual student retention services, and other learning support activities.

Industrial Technology Department

William Hillman, Chair

The mission of the Department of Industrial Technology is to provide the regional workforce with credentialed, skilled, and competent entry-level technicians and to be responsive to emerging workforce needs. The Department encourages the development of teamwork and interpersonal communication skills required in the workplace. It also stresses the importance of a strong work ethic and the value of continuing education and lifelong learning. The instruction for the Department of Industrial Technology Certificate of Applied Science and Associate of Applied Science (A.A.S.) degree programs are primarily delivered at the West Campus at 3639 South Avenue West. Some instruction is delivered at the East Campus or Mountain Campus.

All students admitted to Industrial Technology programs are required to submit writing and math placement scores immediately upon admission to the Missoula College or make arrangements to take these assessments as soon as possible. Thereafter, students needing to take a math and/or writing assessment should contact the Academic Support Center at 406-243-7826 to schedule an appointment to take the placement assessments as soon as possible. Students who live outside of the Western Montana area may take a math and writing assessment at their local community college. Contact the Academic Support Center at 406-243-7826.

Construction Trades

Back to Top

- CSTN 120 - Carpentry Bscs & Rough-In Frmg
  Credits: 5. Introduction to the carpentry trade, including history, career opportunities, and requirements. The course covers building materials, fasteners, adhesives, hand tools, and power tools. OSHA rules and regulations for a safe working place and procedures for compliance are covered. This course includes a two-credit imbedded lab. Students will also learn now to install windows and an exterior door. Course Attributes: Technical Course
- CSTN 122 - Beginning Carpentry Lab
  Credits: 5. Lab to support CSTN 102 and 120.
- CSTN 142 - Int & Ext Finish Carpentry
  Credits: 4. Prereq: CSTN 120 and 122. Study of various types of siding, gutter systems, roof venting requirements, and framing with metal studs. Installation of sheathing, exterior siding, roofing felt, shingles, insulation vapor barriers, and stairs on small building constructed in CSTN 120. Installation of wood and metal doors. Demonstration of materials, layout and installation of suspended ceilings. Selection and installation of countertops, base cabinets and wall cabinets. Window, door, floor, ceiling trim and drywall are installed in a small building. This course includes a one-credit imbedded lab.
- CSTN 143 - Intermediate Carpentry Lab
  Credits: 4. Lab to accompany CSTN 142. Prereq: CSTN 102, CSTN 120 and CSTN 122.
- CSTN 171 - Site Prep, Found, Concrete Ins

Credits: 3. Offered Autumn. Prereq., CSTN 100 or consent of instr. Introduces the process of distance measurement as well as differential and trigonometric leveling for site layout. It covers the principles, equipment, and methods used to perform the site layout tasks that require making angular measurements. This course is designed to let students apply the blueprint reading skills learned so far to a practical exercise.

- CSTN 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- CSTN 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- CSTN 205 - Advanced Carpentry Lecture

  Credits: 6. Prereq: CSTN 102, 120, 122, 142, and 143. Study of the process for angular measurement, using transits, theodolites, electronic distance measuring devices, lasers, and trigonometric calculating to lay out foundations and determine elevations. Installation of standing seam, lap seam, and built-up roofing systems; concrete, vinyl, wooden, tile, and carpeted floors as well as radiant heating; paneling, wainscoting, movable partitions, curtain walls and fire-rated commercial wall construction. Advanced stair systems, including shop built and prefabricated stairs, balustrades, mitered risers and treads, and layout of elliptical fastening methods, and assembly techniques. Project planning, scheduling, estimating, and management skills included. This course includes a two-credit lab. Course Attributes: Technical Course

- CSTN 206 - Advanced Carpentry Lab

  Credits: 2. Laboratory to accompany CSTN 205. Prereq: CSTN 102, 120, 122, 142, and 143. Course Attributes: Technical Course

- CSTN 261 - Building Management

  Credits: 4. Prereq: CSTN 120, 122, 142, 143, 171. Introduction to building business and project management including overhead costs, payroll costs, estimating and scheduling. Covers elements of payroll computation and preparation, payroll tax returns, information returns, and identification and compensation of independent contractors. Students are introduced to building cost estimating, and scheduling of subcontractors and building inspections. This course includes a one-credit imbedded lab.

- CSTN 278 - Applied Building Practices Lab

  Credits: 6. Offered spring. Prereq., CSTN 102, 103, 120, 122, 142, 143. Students work on a variety of projects either at the college or in the community to practice and develop their skills as well as learn new skills. Knowing and following OSHA rules and regulations is emphasized. Students are expected to produce a professional quality product.

- CSTN 279 - Commercial Construction

  Credits: 4. Prereq.CSTN 171, 120, 122, 142, and 143. Study and develop skills in metal stud framing, commercial roofing systems, metal and masonry buildings, metal doors and door hardware, suspended ceilings, and fire rated commercial walls.

- CSTN 282 - Green Bldg Concept & Design I

  Credits: 4. Offered fall semester of the 2nd year. This course takes a holistic approach to natural resource conservation and energy efficiency in the construction industry. From integrated design, building site selection and evaluation, through building design, material selection and efficiencies, passive heating and cooling, and construction techniques. Students design an energy efficient residence to be built by next years class.

- CSTN 283 - Green Bldg Concept & Design II

  Credits: 3. Prereq., CSTN 282. Spring semester. A course fee of $50.00 is required. This course builds on concepts learned in CSTN 282 Green Building Concepts and Design I. Students learn how to weatherize existing buildings and green remodeling and preservation techniques, design and build outdoor living spaces, and green landscaping practices. They learn how to document building for green rating for both NAHB Standards and LEED. They will conduct blower door tests and learn to test for and mitigate radon gas. Students will also refine the energy efficient residential plan they produced in Green Building Concepts and Design I.

- CSTN 286 - Advanced Wood Buildings

  Credits: 3. Curriculum will provide current and future industry participants education in the history, benefits, sourcing, design, products, applications and techniques in modern and emerging

wood and wood frame construction. It will further showcase the inherent qualities of responsibly sourced wood as a rapidly renewable resource in single family residential, low rise multifamily, mixed use commercial and high rise buildings and inform both current practitioners and future industry workforce members on the products, techniques and tools in wood building construction that provide the maximum economic and sustainable benefits.

- CSTN 291 - Special Topics

  Credits: 3 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- CSTN 295 - Practicum

  Credits: 1 TO 3. (R-3) Offered autumn. The course will be an elective for all students within the Sustainable Construction Technology Program and a requirement for any student pursuing a CTS in Green Building. The practicum will allow students to apply concepts learned in CSTN 282 Green Building and Design I, CSTN 283 Green Building and Design II, and CSTN 261 Building Management in a hands on project, research activity or other relevant designated undertaking.

- CSTN 299 - Capstone: Carpentry

  Credits: 2. Capstone laboratory to accompany CSTN 102, 120, 122, 142, 143, 205, 206, and 261. This course provides hands-on experience in which the student applies the skills and knowledge presented in the Carpentry Program. The course will emphasize advanced application in the areas of exterior finishing and interior finishing, and other constructed topics.

Diesel Service Tech

Back to Top

- DST 120 - Electrical Systems

  Credits: 8. Offered spring. The theory of AC/DC electricity including Ohm's Law, magnetism, wiring diagrams, and circuit analysis. Starting, charging, and related systems are covered in-depth using test equipment commonly found in heavy equipment repair facilities. Electronic systems are reviewed and tested using common electronic test equipment. Course Attributes: Technical Course

- DST 128 - Engine Service I

  Credits: 4. Offered autumn. Introduction to the construction and operation of internal combustion engines with the diesel engine being examined in detail. The use of measuring tools and related special tools is covered extensively along with common manufacture rebuild procedures. Start-up and running practices are demonstrated on various running diesel engines. Students must complete this course with a letter grade of "C" or better to enroll in U 135T Power Trains the second-half of the semester. Course Attributes: Technical Course

- DST 135 - Power Trains (UMCOT)

  Credits: 7. Offered autumn. Chassis and drive train components used in light and heavy-duty trucks and other equipment. Clutches, manual transmissions, differentials, and final drives are covered. Course Attributes: Technical Course

- DST 191 - Special Topics

  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.

- DST 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- DST 221 - Brakes Suspn and Undercarr

  Credits: 6. Offered autumn. Air brake design, construction, and operating principles including an in-depth study of diagnostic procedures for troubleshooting and repairing brake systems. Suspension systems and undercarriage design and repair are covered along with common axle alignment procedures found in industry. Students must complete this course with a letter grade of "C" or better to enroll in U225T Hydraulics in the second-half of the semester. Course Attributes: Technical Course

- DST 225 - Hydraulics (UMCOT)

  Credits: 6. Offered autumn. Theory and application of hydraulics relative to mobile construction equipment and industrial hydraulic systems. Includes valves, pumps, motors, actuators, and

related hydraulic components, system maintenance, troubleshooting, and repair. Course Attributes: Technical Course

- DST 229 - Engine Service II

  Credits: 7. Offered spring. Prereq., DET 128T. A continuation of Engine Service I with a major emphasis placed on the rebuilding of a diesel engine. Engine components repair and failure analysis are reviewed along with tune-up and running of diesel engines commonly found in the heavy equipment trade. Shop flat-rate procedures, work order procedures, and warranty requirements are covered. Students must complete this course with a letter grade of "C" or better to enroll in U230T Air Conditioning in the second-half of the semester. Course Attributes: Technical Course

- DST 230 - Air Conditioning

  Credits: 3. Offered spring. Prereq., DET 120T, DET 225T. Principles, theories, and the hazards of working with R-12 and R-34, including laws governing these refrigerants. An in-depth study of the components of an air conditioning system including hands-on practice. Discharging and charging principles are discussed, including leakage testing and other general diagnostic principles found in the field.

- DST 231 - Fuel Systems

  Credits: 5. Offered spring. A comprehensive study of diesel fuel injection systems to include: Cummins, Roosa Master, Caterpillar, Detroit Diesel, and Bosch. Disassembly and repair of these systems are covered in-depth along with calibration practices. Installation, timing, and on-engine adjustments are made on diesel engines. On-engine diagnosis of the fuel systems using special diesel engine diagnostic tools is reviewed. Course Attributes: Technical Course

- DST 235 - Advanced Power Trains

  Credits: 2. Offered spring. Prereq., DET 135T. A continuation of DET 135T with an emphasis on heavy automatic transmission, torque converters, and powershift transmission. In-depth coverage of component review troubleshooting and repair. Course Attributes: Technical Course

- DST 270 - Diesel and Gaseous Fueled Engi

  Credits: 3. Offered summer. Prereq., completion of an accredited diesel program or consent of instr. Overview of the diesel engine and its operating principles including the fuel systems found in the power generation field. Both mechanical and electronic type systems studied in depth. Gaseous/spark ignited internal combustion with in-depth look at both the ignition system and fuel system. Emission systems, preventive maintenance and general tune-up included. Course Attributes: Technical Course

- DST 271 - Power Generators

  Credits: 5. Offered summer. Prereq., completion of accredited diesel program and DET 270T. Introduction to generators as found in the power generation field including the review of electrical laws that pertain to A/C and D/C current. The operation of a typical internal combustion powered generator will be covered in depth including troubleshooting and rebuilding practices found in the power generation field. Generator mounting/alignment practices and generator installations, including flow requirements for combustion and cooling. Course Attributes: Technical Course

- DST 272 - Power Generation Controls

  Credits: 4. Offered summer. Prereq., completion of accredited diesel program and DET 271T. Operation of the generator and controls including governing devices and other specialized devices such as reverse power relays and volt/amp reactive power factor (VAR) controllers. Intensive troubleshooting including in depth coverage of service and repair of control systems. Course Attributes: Technical Course

FacilityManagement Engineering

Back to Top

- FME 122 - Electricity

  Credits: 6. Offered spring. The electrical laws and principles pertaining to DC and AC circuits. Includes current, voltage, resistance, power, load, panels, feeders, lamps, motors, and fuses. Introduction to wiring methods and materials in conformance with the National Electric Code (NEC). Includes installation and replacement of light fixtures, heaters, GFCI's, switches, receptacles, raceways and electrical thermostats. Upon successful completion, students will receive the NCCER certification for Electricity

- FME 123 - Carpentry

  Credits: 6. Offered autumn. Application of carpentry principles and techniques. Construction and maintenance of foundation, floor, wall, ceiling, and roof systems. Includes safe use of tools and materials common to the industry. Additional topics are painting, masonry, insulation, and ventilation of commercial buildings.

- FME 127 - High/Low Pressure Boilers

  Credits: 3. Offered spring. The fundamentals of high/low pressure boiler operation and maintenance. Covers steam, feed-water, fuel, and draft systems. Includes boiler water treatment and hot water heating systems. Introduces safe mechanical operating procedures used in the industry. This course allows students to sit for the Third Class Boiler License Exam with 40 hours of hands-on training verses the 960 hours required by the state.

- FME 128 - Plumbing & Maintenance

  Credits: 3. Offered autumn. Maintenance principles pertaining to lawns, groundcovers, trees, swimming pools, and plumbing equipment. Emphasis is placed on safe application of chemicals; maintenance frequency; and the identification and safe uses of associated tools and materials.

- FME 130 - Heating & Air Conditioning

  Credits: 6. Offered spring. The fundamentals of heating, ventilating, and air conditioning. Covers heating and refrigeration cycles, gas furnaces, refrigerants, system evacuation and charging, and components used in associated systems. Introduces the basic mechanical service procedures used in the industry. Students will also sit for the Universal 608 EPA exam and receive the NCCER certification for Heating, Ventilation, Air conditioning and Refrigeration (HVAC).

- FME 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.

- FME 192 - Independent Study

  Credits: 1 TO 6. (R-6) Course material appropriate to the needs and objectives of the individual student.

Heavy Equipment Operation

Back to Top

- HEO 146 - Safety & Basic Controls

  Credits: 5. Offered autumn. Co-reqs., M 111 and CAPP 120. Orientation to the safe operation and basic control of crawler-tractors, scrapers, front-end loaders, motor graders, backhoes, trucks, and other heavy equipment units. Sufficient time is allowed for the development of basic machine operational skills.

- HEO 148 - Operational Skill Bldg

  Credits: 5. Offered autumn. Prereq., HEO 146T. Advancement of basic skills. Proper understanding and operation of heavy equipment is pursued. Time is allowed for development of proper operational techniques.

- HEO 150 - Job Simulation

  Credits: 6. Offered spring. Prereq., HEO 146, HEO 148T Incorporates learned skills into entry-level, industrial situations. Emphasis is on advanced equipment usage, problem definition and resolution, project-type earth moving assignments, proper equipment, and safety regulations. Course may allow participation in cooperative project efforts within the community.

- HEO 151 - Service & Maintenance

  Credits: 2. Offered autumn. Different types of lubricants and their applications, scheduled and preventive maintenance procedures, and importance of periodic services and maintenance. Also included are safety procedures and regulations.

- HEO 153 - Const. Theory & Spec. Equip.

  Credits: 5. Offered spring. Prereq., M 111, HEO 148. Study of construction principles, specialized equipment, production estimates, and various related subjects.

- HEO 191 - Special Topics

Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.

- HEO 192 - Independent Study
  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student.

Metals & Machining Technology

Back to Top

- MCH 101 - Introduction to Manufacturing Processes
  Credits: 1. This course is designed to introduce the student with an overview of manufacturing to include engineering materials and product attributes, material removal processes, property enhancing and surface processing operations, special processes and assembly technologies, and manufacturing systems.
- MCH 102 - Introduction to Manufacturing Materials
  Credits: 2. This is an introductory course in the study of materials used in the manufacturing industry. Topics include selection and identification of steels, selection and identification of nonferrous metals, mechanical behavior of various plastics, hardening, case hardening, tempering, annealing, normalizing, stress relieving, and the use of the Rockwell and Brinell hardness testers.
- MCH 112 - Related Metals Processes I
  Credits: 1. Offered spring. Use of hand tools and machines which relate to the repair of heavy equipment. Instruction covers fasteners, layout, bench metal, threads and threading, drills and drilling, and tool sharpening. Course Attributes: Technical Course
- MCH 114 - Related Metals Processes II
  Credits: 3. Offered autumn. Instruction and use of drills, files, threads and threading processes, basic lathe, drill press, and band saw operation, including precision measuring instruments. Fasteners, layout procedures, and basic hand tools are covered. Course Attributes: Technical Course
- MCH 115 - Related Metals Processes III
  Credits: 3. Offered autumn and spring. A basic metalworking course covering fasteners, layout, bench metal, heat treating, threads and threading, drills and drilling, basic machining, and tool sharpening. Course Attributes: Technical Course
- MCH 120 - Blueprint Reading & Ingterpretation for Machining
  Credits: 3. This course introduces the fundamental concepts necessary to interpret and make drawings with symbols, various schematics and diagrams, dimensioning techniques, section views, auxiliary views, threads and fasteners, and sketching typical to all shop drawings. Interpretation of specifications and determination of acceptable tolerance requirements to ensure quality control measures for design parts will also be stressed.
- MCH 122 - Introduction to CAM
  Credits: 3. This course introduces Computer Aided Manufacturing (CAM) operational basics for both mill and lathe programming using current CAM software. The course includes terminology relevant to PC-based CAD/CAM work, hardware familiarity, system operation and management, folders, file type and structure, menu structure and use, and 3 axis (milling machines) and 2 axis (lathes) tool paths. Emphasis is placed on proper geometric creation, management, relevant utilities, and toolbar and menu functions.
- MCH 125 - Introduction to CNC Lathes
  Credits: 3. Prereq., MCH 132 . This course provides opportunities for students to develop skills in the safe setup, maintenance, and operation of CNC lathes and related periphery tools and skills. Topics covered include CNC lathe parts, controls, tool holding, tool insert geometry, chip formation, speeds and feeds, operation and process planning, threads, fits, dimensioning and tolerances, surface finish, and the following lathe processes: facing, turning, tapering, drilling, boring, reaming, chamfering, grooving, parting-off, internal and external threading, tapering, and knurling. Graded projects based on chuck, collet, and fixturing will be done. Related periphery tooling, use and care of precision measuring tools, in addition to related math used in the trade, will also be covered.
- MCH 127 - Introduction to CNC Mills

Credits: 3. Prereq., MCH 134. This course provides instruction in the setup and operation of CNC mills. Student projects include specialty tooling and multi-axis machining. Students will also gain experience in process control. Topics include specialty tooling, multi-axis machining, process control, and laboratory exercises in part production.

- MCH 129 - Machine Quality Control and Precision Measurements

  Credits: 3. Students will develop the knowledge to analyze and evaluate the processes and methodology required in an industrial production environment to determine whether quality control standards are being met. Topics include use of non-precision measuring tools, use of precision measuring tools, use of comparison gauges, and analysis of measurements in a CNC environment.

- MCH 130 - Machine Shop

  Credits: 3. The course content covers a broad range of shop fundamentals in manual and CNC machining. This course includes an emphasis on shop and work area safety. Instruction covers standard shop work, such as measurement, layout, basic hand tools, drills, drill presses, and taps and dies. Use of pedestal grinder will be covered. Work assignments incorporate projects requiring use of the above machines, tooling, and emphasizes safety.

- MCH 132 - Introduction to Manual Engine Lathes

  Credits: 4. Prereq., or corereq., MCH 120 and MCH 129. This introduction to Manual Engine Lathes will cover the safety, maintenance and operation of manual engine lathes and related periphery tools and skills. Subjects covered include HSS tool bit grinding and tool bit geometry, chip formation, speeds and feeds, operation and process planning, threads, fits, dimensioning and tolerances, surface finish, and the following lathe processes: facing, turning, tapering, drilling, boring, reaming, chamfering, grooving, parting-off, internal and external threading, tapering, knurling, filing and polishing. Graded projects using between centers and chuck work turning will be done. Related periphery tooling, use and care of precision measuring tools, in addition to related math used in the trade, will also be covered.

- MCH 134 - Introduction to Manual Mills

  Credits: 4. Prereq.,/coreq., MCH 120 and MCH 129. The student will perform advanced hands-on machine shop operations: set up and operation of manual milling machines, drill presses, band saws, grinders, and other equipment commonly found in manufacturing facilities. The student will use precision measuring tools and methods, utilize blueprints, and perform project process planning. Various types of steel and aluminum are use.

- MCH 191 - Special Topics

  Credits: 1 TO 6. (R-6). Offered intermittently. Prereq. Consent of instr.

- MCH 196 - Independent Study Variable

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Course Attributes:
  Service Learning/Volunteer Technical Course

- MCH 198 - Internship

  Credits: 1 TO 6. Prereq., consent of department. Extended classroom experience that provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.

- MCH 214 - Advanced Related Metals Proc

  Credits: 3. Offered autumn. Prereq., MPR 114T or 115T. Advanced skill development using machine tools such as milling machines, lathes, surface grinders, and drill presses, emphasizing safety and providing greater complexity than provided in MPR 114T. Welding and machining are used together demonstrating how sequencing work improves quality and productivity. Course Attributes: Technical Course

- MCH 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently

Small Engine Technology

Back to Top

- SET 178 - Marine Elec & Fuel Syst

Credits: 5. Offered spring. Prereq., SET 160T. Theory of and testing and troubleshooting of problems with ignition, charging, and cranking systems. Includes the design, testing, and troubleshooting of marine carburetion and fuel injection systems. Course Attributes: Technical Course

- SET 179 - Marine Powerhds/Low Units

  Credits: 6. Offered spring. Prereq., SET 178T. Theory of design, function and components of outboard motor powerheads and lower units. Includes basic rigging, power trim and tilt, propping, and personal watercraft design, function, and maintenance. Course Attributes: Technical Course

- SET 181 - Snowmobile Main & Rep II

  Credits: 2. Offered spring. Prereq., SET 180T. Principles and theory of snowmobile electrical, fuel, front suspension, and brake systems. Course Attributes: Technical Course

- SET 182 - Comp Apps Motorsports

  Credits: 1. Offered spring. Prereq., CRT 100. Use of recreational power equipment software for parts retrieval, invoicing and payment methods. Students build, query, and create reports using database software, and create a business plan for a hypothetical dealership. Course Attributes: Technical Course

- SET 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

Surveying

Back to Top

- SRVY 108 - Construction Surveying

  Credits: 2. Offered autumn. Basic principles of surveying and the use of surveying equipment. Calculation of angles and distances to determine grade elevations. Introduction to Global Positioning Systems, lasers and their relationship to the heavy equipment operator. Course Attributes: Technical Course

Welding

Back to Top

- WLDG 101 - Welding Fund Auto Tech/Diesel

  Credits: 2. Offered autumn. Basic and intermediate processes of shielded metal arc welding (SMAW) and oxyacetylene welding are covered in flat, horizontal, and vertical positions in a variety of joint configurations. Instruction in the oxyacetylene cutting process. This course is designed for Diesel students only. Course Attributes: Technical Course

- WLDG 103 - Welding Fund Constructn Trades

  Credits: 2. Offered spring. Basic welding processes of shielded metal arc welding (SMAW), flux core arc welding (FCAW) are covered in the flat, horizontal, and vertical positions in a variety of joint configurations. The instruction in flux core arc welding is focused on the carpentry building trades. Instruction in the oxyacetylene cutting process is also provided. Safe operation of equipment is covered and work is evaluated to industrial standards. This course is designed for carpentry students.

- WLDG 117 - Blueprint Rdng & Weldng Symbls

  Credits: 3. Offered spring. Prereq., WLDG 150 (Practical experience in reading and drawing orthographic projections, interpreting dimensions, notes, scales, and welding symbols. Isometric projection (pictorial), sections, and auxiliary views with practical experience using conventional drafting tools and computer aided drafting (CAD). Course Attributes: Technical Course

- WLDG 139 - Welding Maint & Repair -Diesel

  Credits: 1. Offered autumn. Prereq., MPR 115T, WLDG 101. Combines the skills gained in welding and machine shop for practical applications such as repairing a broken cylinder block. Major emphasis is placed on repair techniques. Common repair procedures using machine shop and welding equipment is demonstrated. This course is designed for Diesel students only. Course Attributes: Technical Course

- WLDG 145 - Fabrication Basics

  Credits: 4. Offered spring. Prereq., MPR 114T; WLDG 180; coreq., WLDG 117, 187. Conception, design, and construction of a metal structure to industry standards using shears, presses, and other machine tools common to the welding industry. Skills are developed in the areas of shielded metal arc welding and flux core arc welding, oxyacetylene cutting, plasma arc cutting, and air carbon arc cutting. Course Attributes: Technical Course

- WLDG 150 - Welding Layout Techniques

  Credits: 2. Using practical layout techniques students develop basics for blueprint construction, layout on pipe and structural steel, and use of tools common to material layout. Course Attributes: Technical Course

- WLDG 180 - Shielded Metal Arc Welding

  Credits: 4. Offered autumn. Theory and safe operation of shielded metal arc welding (SMAW) of carbon steel on plate and structural components in all positions to industry standards. Visual inspection and destructive testing used to determine acceptability based upon industry standards (American Welding Society Structural Welding Code-Steel). Power sources and electrodes are covered in depth. Materials are prepared using mechanical plate shears and thermal cutting techniques. Thermal cutting techniques are examined relative to theory of operation and safe practices. Processes used are oxy-fuel cutting, plasma arc cutting, and air carbon arc cutting. Theory and operation of oxyacetylene welding examined. Course Attributes: Technical Course

- WLDG 184 - OSHA Rules & Regulations Wldng

  Credits: 1. Offered spring. Study of the Occupational Safety and Health Administration rules and regulations that affect the welding and construction industries. Course Attributes: Technical Course

- WLDG 187 - Flux Core Arc Welding

  Credits: 4. Offered spring. Prereq., WLDG 180 (Theory, practice, and safe operation of flux core arc welding equipment. Coupons are welded in the flat, horizontal, and vertical positions to industry standards using a variety of welding electrodes, diameters, and power sources, which prepare students for welding qualification to the American Welding Society Structural Welding Code specifications. Course Attributes: Technical Course

- WLDG 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

- WLDG 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- WLDG 205 - Applied Metallurgy

  Credits: 4. Offered autumn. Covers the manufacturing of iron and steel. Examination of physical and mechanical properties. Phase changes with the application of heating and cooling cycles. Ferrous crystal types and properties. Suggested welding procedures for low, medium, and high carbon steels, alloy steels, and cast iron. Course Attributes: Technical Course

- WLDG 210 - Pipe Welding - Integrated Lab

  Credits: 4. Offered autumn. Prereq., WLDG 180; coreq., WLDG 215. Emphasis on skill development in the welding of pipe sections to extremely high quality levels as required by national codes and standards. Pipe welding using GTAW for the root pass and SMAW for the remaining passes in all positions. Visual inspection and destructive testing used to evaluate work according to industry standards. Students will be able to attempt welding qualification test as to code procedure set from American Welding Society –D1.1 Structural Welding Code-Steel. This test will certify them to a determined process on carbon steel from prequalified variables. Course Attributes: Technical Course

- WLDG 215 - GTAW (integrated lab)

  Credits: 4. Offered autumn. Prereq., WLDG 180, 187, 210 The theory and safe operation of Gas Tungsten Arc Welding (GTAW). Examination of power source controls and operation along with associated consumables such as gasses, electrode filler materials for carbon steel, stainless steel, and aluminum. Welding skill development according to industry standards using these materials in the flat, horizontal, and vertical positions. Course Attributes: Technical Course

- WLDG 245 - Metal Fab Design/Construction

  Credits: 4. Offered spring. Prereq., MPR 114T, MPR 214T; WLDG 117, 180, 187, 215, 275. Students combine all knowledge and skills developed in the welding program to design and draw a full set of plans (blueprints) for an instructor-approved project using extensive welding, metal fabrication equipment, machining processes and automation. High quality performance, consistent with business and industry required. Course Attributes: Technical Course

- WLDG 275 - Gas Metal Arc Welding

  Credits: 4. Offered spring. Prereq., WLDG 187. Theory and safe operation of Gas Metal Arc Welding (GMAW). Theory of flux core arc welding applied to GMAW. Primary focus on application, practical skill development, and producing welds that meet industry standards. Metals welded are low carbon steel, stainless steel, and aluminum. Short circuit arc and spray arc transfer used. Examination of gas and electrode selection. Course Attributes: Technical Course

- WLDG 280 - Weld Testing Certification

  Credits: 2. Offered spring. Prereq., WLDG 180, 187, 215, 275. Fundamental concepts and requirements of the American Society of Mechanical Engineers (ASME) and American Welding Society (AWS) are examined. Through laboratory experience students are provided the opportunity to qualify (certify) under the two codes mentioned above. Course Attributes: Technical Course

- WLDG 285 - Automation in Welding

  Credits: 3. Offered spring. Prereq., WLDG 117, 150, 187, 215, CADX 110 Application of the welding process to automation. Examination of simple automation techniques such as tools, clamping, and fixturing to aid in the rapid joining of production runs. Increasing complexity is examined leading into equipment that carries the welding gun, tractors, and carriages by fully automated systems with the student performing set-up and troubleshooting (Submerged Arc Welding) and automated parts processing (optical tracer torch). Programmable controllers are investigated and used. Programming and use of a PUMA 650 Industrial Robot. Course Attributes: Technical Course

- WLDG 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

Diesel Technology A.A.S.

The mission of the Diesel Technology Program is to provide the regional workforce with credentialed, skilled and competent diesel technicians and to be responsive to emerging workforce needs.

Students in the Diesel Technology program train to be diesel mechanics that repair diesel-powered trucks and heavy equipment. Students study hydraulics, electrical systems, fuel systems, power trains, air conditioning, brakes and suspension, engine theory, and engine diagnosis, beginning with basic principles and proceeding to an advanced level of system technology. Along with these core courses, students take classes in welding, machining, computers, communications, and math. Credit for independent study is available to those desiring additional instruction in diesel mechanics. Students who complete the program successfully are awarded the Associate of Applied Science degree.

The program often has a waiting list. Prospective students are encouraged to apply one year prior to anticipated school attendance. Contact the Jim Headlee, Program Director, at 406-243-7648 or email for more information.

Associate of Applied Science - Diesel Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 66

Required Cumulative GPA: 2.0

Diesel Technology

Rule: All courses required

	Course	Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	COMX 102 - Interprsnl Skills in Workplace This course will introduce students to interpersonal communication theory which can be applied to a workplace environment. Students will learn effective communication strategies that promote success in professional and personal relationships.	1 Credits
	DST 120 - Electrical Systems Offered spring. The theory of AC/DC electricity including Ohm's Law, magnetism, wiring diagrams, and circuit analysis. Starting, charging, and related systems are covered in-depth using test equipment commonly found in heavy equipment repair facilities. Electronic systems are reviewed and tested using common electronic test equipment.	8 Credits
	DST 128 - Engine Service I Offered autumn. Introduction to the construction and operation of internal combustion engines with the diesel engine being examined in detail. The use of measuring tools and related special tools is covered extensively along with common manufacture rebuild procedures. Start-up and running practices are demonstrated on various running diesel engines. Students must complete this course with a letter grade of "C" or better to enroll in U 135T Power Trains the second-half of the semester.	4 Credits
	DST 135 - Power Trains (UMCOT) Offered autumn. Chassis and drive train components used in light and heavy-duty trucks and other equipment. Clutches, manual transmissions, differentials, and final drives are covered.	7 Credits
	DST 221 - Brakes Suspn and Undercarr Offered autumn. Air brake design, construction, and operating principles including an in-depth study of diagnostic procedures for troubleshooting and repairing brake systems. Suspension systems and undercarriage design and repair are covered along with common axle alignment procedures found in industry. Students must complete this course with a letter grade of "C" or better to enroll in U225T Hydraulics in the second-half of the semester.	6 Credits
	DST 225 - Hydraulics (UMCOT) Offered autumn. Theory and application of hydraulics relative to mobile construction equipment and industrial hydraulic systems. Includes valves, pumps, motors, actuators, and related hydraulic components, system maintenance, troubleshooting, and repair.	6 Credits

	DST 229 - Engine Service II Offered spring. Prereq., DET 128T. A continuation of Engine Service I with a major emphasis placed on the rebuilding of a diesel engine. Engine components repair and failure analysis are reviewed along with tune-up and running of diesel engines commonly found in the heavy equipment trade. Shop flat-rate procedures, work order procedures, and warranty requirements are covered. Students must complete this course with a letter grade of "C" or better to enroll in U230T Air Conditioning in the second-half of the semester.	7 Credits
	DST 230 - Air Conditioning Offered spring. Prereq., DET 120T, DET 225T. Principles, theories, and the hazards of working with R-12 and R-34, including laws governing these refrigerants. An in-depth study of the components of an air conditioning system including hands-on practice. Discharging and charging principles are discussed, including leakage testing and other general diagnostic principles found in the field.	3 Credits
	DST 231 - Fuel Systems Offered spring. A comprehensive study of diesel fuel injection systems to include: Cummins, Roosa Master, Caterpillar, Detroit Diesel, and Bosch. Disassembly and repair of these systems are covered in-depth along with calibration practices. Installation, timing, and on-engine adjustments are made on diesel engines. On-engine diagnosis of the fuel systems using special diesel engine diagnostic tools is reviewed.	5 Credits
	DST 235 - Advanced Power Trains Offered spring. Prereq., DET 135T. A continuation of DET 135T with an emphasis on heavy automatic transmission, torque converters, and powershift transmission. In-depth coverage of component review troubleshooting and repair.	2 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits
	MCH 115 - Related Metals Processes III Offered autumn and spring. A basic metalworking course covering fasteners, layout, bench metal, heat treating, threads and threading, drills and drilling, basic machining, and tool sharpening.	3 Credits
	WLDG 101 - Welding Fund Auto Tech/Diesel Offered autumn. Basic and intermediate processes of shielded metal arc welding (SMAW) and oxyacetylene welding are covered in flat, horizontal, and vertical positions in a variety of joint configurations. Instruction in the oxyacetylene cutting process. This course is designed for Diesel students only.	2 Credits
	WLDG 139 - Welding Maint & Repair -Diesel Offered autumn. Prereq., MPR 115T, WLDG 101. Combines the skills gained in welding and machine shop for practical applications such as repairing a broken cylinder block. Major emphasis is placed on repair techniques. Common repair procedures using machine shop and welding equipment is demonstrated. This course is designed for Diesel students only.	1 Credits

	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		64 Total Credits Required

Welding Technology (A.A.S.)

The mission of the Welding Technology Program is to provide the regional workforce with credentialed, skilled, and competent welders and to be responsive to emerging workforce needs. The Welding Technology Program prepares students to operate and troubleshoot a variety of welding power sources and related equipment. The program prepares students to solve problems using computational skills and other problem-solving techniques essential to welding and steel fabrication. It also encourages the development of the teamwork and interpersonal skills required on the job.

Welding students develop skills in six different welding processes: oxyacetylene (OAW), shielded metal arc (SMAW), gas metal arc (GMAW), flux core arc, (FCAW), submerged arc (SAW), and gas tungsten arc welding (GTAW). Students also develop additional skills, such as blueprint reading and layout, metallurgy, and gain an understanding of how heating and cooling cycles affect the properties of metals. Students also study the design of jigs and fixtures and how to incorporate these into an automated welding system.

Courses such as Computer Aided Design and Drafting (CADD), OSHA Rules and Compliance, and Related Metals Processes provide for a solid background in the metals industry. Fabrication basics and Metal Design and Construction utilize all of the gained knowledge in an instructor-approved/student-designed project.

Welding technology students have the opportunity to become certified to American Welding Society Standards and receive documentation stating qualifications.

Students are awarded the Certificate of Applied Science upon successful completion of the first year of the Welding Technology program. Students are awarded the Associate of Applied Science degree upon successfully completing the two-year program.

The program often has a waiting list. For more detailed information, visit our web site or contact Zach Reddig, Program Director, at 406-243-7644 or by email.

Associate of Applied Science - Welding Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 67

Required Cumulative GPA: 2.0

First Year Welding Program

Rule: All Courses Required for Certification in Welding

	Course	**Credits**

	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	COMX 102 - Interprsnl Skills in Workplace This course will introduce students to interpersonal communication theory which can be applied to a workplace environment. Students will learn effective communication strategies that promote success in professional and personal relationships.	1 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits
	MCH 114 - Related Metals Processes II Offered autumn. Instruction and use of drills, files, threads and threading processes, basic lathe, drill press, and band saw operation, including precision measuring instruments. Fasteners, layout procedures, and basic hand tools are covered.	3 Credits
	WLDG 117 - Blueprint Rdng & Weldng Symbls Offered spring. Prereq., WLDG 150 (Practical experience in reading and drawing orthographic projections, interpreting dimensions, notes, scales, and welding symbols. Isometric projection (pictorial), sections, and auxiliary views with practical experience using conventional drafting tools and computer aided drafting (CAD).	3 Credits
	WLDG 145 - Fabrication Basics Offered spring. Prereq., MPR 114T; WLDG 180; coreq., WLDG 117, 187. Conception, design, and construction of a metal structure to industry standards using shears, presses, and other machine tools common to the welding industry. Skills are developed in the areas of shielded metal arc welding and flux core arc welding, oxyacetylene cutting, plasma arc cutting, and air carbon arc cutting.	4 Credits
	WLDG 150 - Welding Layout Techniques Using practical layout techniques students develop basics for blueprint construction, layout on pipe and structural steel, and use of tools common to material layout.	2 Credits

	WLDG 180 - Shielded Metal Arc Welding Offered autumn. Theory and safe operation of shielded metal arc welding (SMAW) of carbon steel on plate and structural components in all positions to industry standards. Visual inspection and destructive testing used to determine acceptability based upon industry standards (American Welding Society Structural Welding Code-Steel). Power sources and electrodes are covered in depth. Materials are prepared using mechanical plate shears and thermal cutting techniques. Thermal cutting techniques are examined relative to theory of operation and safe practices. Processes used are oxy-fuel cutting, plasma arc cutting, and air carbon arc cutting. Theory and operation of oxyacetylene welding examined.	4 Credits
	WLDG 184 - OSHA Rules & Regulations Wldng Offered spring. Study of the Occupational Safety and Health Administration rules and regulations that affect the welding and construction industries.	1 Credits
	WLDG 187 - Flux Core Arc Welding Offered spring. Prereq., WLDG 180 (Theory, practice, and safe operation of flux core arc welding equipment. Coupons are welded in the flat, horizontal, and vertical positions to industry standards using a variety of welding electrodes, diameters, and power sources, which prepare students for welding qualification to the American Welding Society Structural Welding Code specifications.	4 Credits
	WLDG 205 - Applied Metallurgy Offered autumn. Covers the manufacturing of iron and steel. Examination of physical and mechanical properties. Phase changes with the application of heating and cooling cycles. Ferrous crystal types and properties. Suggested welding procedures for low, medium, and high carbon steels, alloy steels, and cast iron.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		37 Total Credits Required

Second Year Welding Program

Rule: All Courses Required for Certification in Welding

__	**Course**	**Credits**
	BMGT 242 - Front Line Supervision Offered spring. Introduces basic employee development with emphasis on the responsibilities of a newly-appointed supervisor. Emphasizes organizational structure, motivation, delegation of authority, the hiring process, employee development, employee performance, evaluations, and dealing with employee conflict.	3 Credits

	DDSN 114 - Introduction to CAD Offered autumn. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to computer aided design and drafting software for production of drawings and plans for architecture and engineering systems. Fundamentals of two dimensional drafting and drawing management for professional design.	3 Credits
	MCH 214 - Advanced Related Metals Proc Offered autumn. Prereq., MPR 114T or 115T. Advanced skill development using machine tools such as milling machines, lathes, surface grinders, and drill presses, emphasizing safety and providing greater complexity than provided in MPR 114T. Welding and machining are used together demonstrating how sequencing work improves quality and productivity.	3 Credits
	WLDG 210 - Pipe Welding - Integrated Lab Offered autumn. Prereq., WLDG 180; coreq., WLDG 215. Emphasis on skill development in the welding of pipe sections to extremely high quality levels as required by national codes and standards. Pipe welding using GTAW for the root pass and SMAW for the remaining passes in all positions. Visual inspection and destructive testing used to evaluate work according to industry standards. Students will be able to attempt welding qualification test as to code procedure set from American Welding Society –D1.1 Structural Welding Code-Steel. This test will certify them to a determined process on carbon steel from prequalified variables.	4 Credits
	WLDG 215 - GTAW (integrated lab) Offered autumn. Prereq., WLDG 180, 187, 210 The theory and safe operation of Gas Tungsten Arc Welding (GTAW). Examination of power source controls and operation along with associated consumables such as gasses, electrode filler materials for carbon steel, stainless steel, and aluminum. Welding skill development according to industry standards using these materials in the flat, horizontal, and vertical positions.	4 Credits
	WLDG 245 - Metal Fab Design/Construction Offered spring. Prereq., MPR 114T, MPR 214T; WLDG 117, 180, 187, 215, 275. Students combine all knowledge and skills developed in the welding program to design and draw a full set of plans (blueprints) for an instructor-approved project using extensive welding, metal fabrication equipment, machining processes and automation. High quality performance, consistent with business and industry required.	4 Credits
	WLDG 275 - Gas Metal Arc Welding Offered spring. Prereq., WLDG 187. Theory and safe operation of Gas Metal Arc Welding (GMAW). Theory of flux core arc welding applied to GMAW. Primary focus on application, practical skill development, and producing welds that meet industry standards. Metals welded are low carbon steel, stainless steel, and aluminum. Short circuit arc and spray arc transfer used. Examination of gas and electrode selection.	4 Credits
	WLDG 280 - Weld Testing Certification Offered spring. Prereq., WLDG 180, 187, 215, 275. Fundamental concepts and requirements of the American Society of Mechanical Engineers (ASME) and American Welding Society (AWS) are examined. Through laboratory experience students are provided the opportunity to qualify (certify) under the two codes mentioned above.	2 Credits

	WLDG 285 - Automation in Welding Offered spring. Prereq., WLDG 117, 150, 187, 215, CADX 110 Application of the welding process to automation. Examination of simple automation techniques such as tools, clamping, and fixturing to aid in the rapid joining of production runs. Increasing complexity is examined leading into equipment that carries the welding gun, tractors, and carriages by fully automated systems with the student performing set-up and troubleshooting (Submerged Arc Welding) and automated parts processing (optical tracer torch). Programmable controllers are investigated and used. Programming and use of a PUMA 650 Industrial Robot.	3 Credits
Minimum Required Grade: C-		30 Total Credits Required

Facility Management Engineering Certificate

The mission of the Facility Management Engineering Certificate program is to provide the regional workforce with credentialed, skilled, and competent facility management professionals and to be responsive to emerging workforce needs.

Students in the Facility Management Engineering program are trained as facility management professionals capable of maintaining commercial buildings. Subject matter in the program includes plumbing, electricity, carpentry, and heating/air conditioning. Students learn physical and electrical theories that enable them to understand building systems. In addition, they study landscape maintenance, pool care, computers, and boiler operation. Water treatment is discussed in both the pool and boiler courses. The program introduces current environmental and energy problems that can be reduced through efficient building operation. It also encourages resource development, teamwork, and interpersonal skills required on the job.

Upon successful completion of the program, students are awarded a Certificate of Applied Science which can be applied toward an AAS in Sustainable Construction Technology. Contact William Hillman, Program Director, at 406-243-7645 or email for more information.

Certificate of Applied Science - Facility Management

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 36
Required Cumulative GPA: 2.0

Facility Management Engineering

Rule: All courses required

	Course	**Credits**
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits

	COMX 102 - Interprsnl Skills in Workplace This course will introduce students to interpersonal communication theory which can be applied to a workplace environment. Students will learn effective communication strategies that promote success in professional and personal relationships.	1 Credits
	FME 122 - Electricity Offered spring. The electrical laws and principles pertaining to DC and AC circuits. Includes current, voltage, resistance, power, load, panels, feeders, lamps, motors, and fuses. Introduction to wiring methods and materials in conformance with the National Electric Code (NEC). Includes installation and replacement of light fixtures, heaters, GFCI's, switches, receptacles, raceways and electrical thermostats. Upon successful completion, students will receive the NCCER certification for Electricity	6 Credits
	FME 123 - Carpentry Offered autumn. Application of carpentry principles and techniques. Construction and maintenance of foundation, floor, wall, ceiling, and roof systems. Includes safe use of tools and materials common to the industry. Additional topics are painting, masonry, insulation, and ventilation of commercial buildings.	6 Credits
	FME 127 - High/Low Pressure Boilers Offered spring. The fundamentals of high/low pressure boiler operation and maintenance. Covers steam, feed-water, fuel, and draft systems. Includes boiler water treatment and hot water heating systems. Introduces safe mechanical operating procedures used in the industry. This course allows students to sit for the Third Class Boiler License Exam with 40 hours of hands-on training verses the 960 hours required by the state.	3 Credits
	FME 128 - Plumbing & Maintenance Offered autumn. Maintenance principles pertaining to lawns, groundcovers, trees, swimming pools, and plumbing equipment. Emphasis is placed on safe application of chemicals; maintenance frequency; and the identification and safe uses of associated tools and materials.	3 Credits
	FME 130 - Heating & Air Conditioning Offered spring. The fundamentals of heating, ventilating, and air conditioning. Covers heating and refrigeration cycles, gas furnaces, refrigerants, system evacuation and charging, and components used in associated systems. Introduces the basic mechanical service procedures used in the industry. Students will also sit for the Universal 608 EPA exam and receive the NCCER certification for Heating, Ventilation, Air conditioning and Refrigeration (HVAC).	6 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits

	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		36 Total Credits Required

Sustainable Construction Certificate

The mission of this one-year certificate is to give students an overview of the green building industry with instruction and hands-on experience in the principles of green building, energy efficiency, green rating systems, including the ICC700 and LLED programs, and prepare them for further study or entry-level careers in the emerging green building industry.

Technical Certificate - Sustainable Construction

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 29
Required Cumulative GPA: 2.0

Certificate of Technical Studies in Sustainable Contruction

Rule: All courses required

	Course	**Credits**
	BGEN 160S - Issues in Sustainability Offered every term. Same as CCN 160S. This literature-intensive course is intended to expose the student to a variety of essays addressing the balance of economic development with the principles of sustainability and social equity. The student is offered an introduction to sustainability concepts, natural systems/cycles and environmental economics. Natural capitalism and triple bottom line maximization is explored, along with the role of corporations and small businesses in sustainable development. A survey of issues surrounding corporate social responsibility and sustainability-driven innovation will be conducted.	3 Credits
	BMGT 242 - Front Line Supervision Offered spring. Introduces basic employee development with emphasis on the responsibilities of a newly-appointed supervisor. Emphasizes organizational structure, motivation, delegation of authority, the hiring process, employee development, employee performance, evaluations, and dealing with employee conflict.	3 Credits

	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	CSTN 191 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	CSTN 261 - Building Management Prereq: CSTN 120, 122, 142, 143, 171. Introduction to building business and project management including overhead costs, payroll costs, estimating and scheduling. Covers elements of payroll computation and preparation, payroll tax returns, information returns, and identification and compensation of independent contractors. Students are introduced to building cost estimating, and scheduling of subcontractors and building inspections. This course includes a one-credit imbedded lab.	4 Credits
	CSTN 282 - Green Bldg Concept & Design I Offered fall semester of the 2nd year. This course takes a holistic approach to natural resource conservation and energy efficiency in the construction industry. From integrated design, building site selection and evaluation, through building design, material selection and efficiencies, passive heating and cooling, and construction techniques. Students design an energy efficient residence to be built by next years class.	4 Credits
	CSTN 286 - Advanced Wood Buildings Curriculum will provide current and future industry participants education in the history, benefits, sourcing, design, products, applications and techniques in modern and emerging wood and wood frame construction. It will further showcase the inherent qualities of responsibly sourced wood as a rapidly renewable resource in single family residential, low rise multifamily, mixed use commercial and high rise buildings and inform both current practitioners and future industry workforce members on the products, techniques and tools in wood building construction that provide the maximum economic and sustainable benefits.	3 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits

	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		33 Total Credits Required

Design and Efficiency

Rule: Take one of the following

	Course	Credits
	CSTN 283 - Green Bldg Concept & Design II Prereq., CSTN 282. Spring semester. A course fee of $50.00 is required. This course builds on concepts learned in CSTN 282 Green Building Concepts and Design I. Students learn how to weatherize existing buildings and green remodeling and preservation techniques, design and build outdoor living spaces, and green landscaping practices. They learn how to document building for green rating for both NAHB Standards and LEED. They will conduct blower door tests and learn to test for and mitigate radon gas. Students will also refine the energy efficient residential plan they produced in Green Building Concepts and Design I.	3 Credits
	NRGY 235 - Building Energy Efficiency Offered Spring. Prereq., NRGY 101. Provides an overview of energy efficiency opportunities in residential buildings with an emphasis on the Passivhaus standard. Prepares the student to take the National RESNET Home Energy Rater Exam, which is a required final exam. Local home and industry tours, and hands-on exposure to HVAC controls and maintenance are also offered. Study of the analysis techniques used for reduction of energy consumption and energy management, including energy accounting and energy auditing. Residential and commercial building energy efficiency opportunities will be covered. Other topics addressed include motors, pumps, green building, and purchasing energy supplies. Career opportunities in energy efficiency will be discussed. Several local tours of energy-efficient homes will occur throughout the semester.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Heavy Equipment Operation Certificate

The mission of the Heavy Equipment Operation Program is to provide the regional workforce with credentialed, skilled and competent heavy equipment operators and to be responsive to emerging workforce needs. The Heavy Equipment Operation Program provides students with a basic understanding of fundamental machine functions and is designed to develop apprentice-level skills in the operation of heavy equipment.

Students are trained to safely and properly operate and maintain a variety of heavy equipment, including crawler-tractors, graders, scrapers, front-end loaders, excavators, backhoes, and dump trucks. Students develop an understanding of basic surveying techniques, receive extensive training in safety regulations and procedures, and learn how to handle controls precisely and judge distances accurately. The program also promotes an awareness of potential job site difficulties and allows students to gain knowledge of the work ethic expected by employers in the construction industry.

A Certificate of Applied Science is awarded upon successful completion of the program.

This is a Autumn Semester entry program, and enrollment is limited. Prospective students are encouraged to apply early. Contact Joseph Janssen, Program Director, at 406-243-7643 or email for more information.

Certificate of Applied Science - Heavy Equipment Operation

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 36

Required Cumulative GPA: 2.0

Note: TRK 106T Commercial Driver's License (CDL) Training non-credit is a recommended elective.

Heavy Equipment Operation

Rule: Required for Certification in Heavy Equipment Operation

	Course	Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	COMX 102 - Interprsnl Skills in Workplace This course will introduce students to interpersonal communication theory which can be applied to a workplace environment. Students will learn effective communication strategies that promote success in professional and personal relationships.	1 Credits
	HEO 146T - Safety & Basic Controls Offered autumn. Co-reqs., M 111 and CAPP 120. Orientation to the safe operation and basic control of crawler-tractors, scrapers, front-end loaders, motor graders, backhoes, trucks, and other heavy equipment units. Sufficient time is allowed for the development of basic machine operational skills.	5 Credits
	HEO 148T - Operational Skill Bldg Offered autumn. Prereq., HEO 146T. Advancement of basic skills. Proper understanding and operation of heavy equipment is pursued. Time is allowed for development of proper operational techniques.	5 Credits
	HEO 150T - Job Simulation Offered spring. Prereq., HEO 146T, HEO 148T. Incorporates learned skills into entry-level, industrial situations. Emphasis is on advanced equipment usage, problem definition and resolution, project-type earth moving assignments, proper equipment, and safety regulations. Course may allow participation in cooperative project efforts within the community.	6 Credits

	HEO 151T - Service & Maintenance Offered autumn. Different types of lubricants and their applications, scheduled and preventive maintenance procedures, and importance of periodic services and maintenance. Also included are safety procedures and regulations.	2 Credits
	HEO 153T - Const Theory & Spec Equip Offered spring. Prereq., M 111, HEO 148T. Study of construction principles, specialized equipment, production estimates, and various related subjects.	5 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits
	MCH 112 - Related Metals Processes I Offered spring. Use of hand tools and machines which relate to the repair of heavy equipment. Instruction covers fasteners, layout, bench metal, threads and threading, drills and drilling, and tool sharpening.	1 Credits
	SRVY 108 - Construction Surveying Offered autumn. Basic principles of surveying and the use of surveying equipment. Calculation of angles and distances to determine grade elevations. Introduction to Global Positioning Systems, lasers and their relationship to the heavy equipment operator.	2 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		36 Total Credits Required

Recreational Power Equipment Certificate

The mission of the Recreational Power Equipment Program is to provide the regional workforce with credentialed, skilled, and competent power equipment technicians and to be responsive to emerging workforce needs.

The Recreational Power Equipment Program prepares students to repair and maintain a wide variety of two-cycle and four-cycle engines and related equipment. Students work on motorcycles, ATVs, snowmobiles, outboard motors, and personal watercraft. Units of instruction include mechanical, fuel, and electrical systems. The program also encourages the development of teamwork and interpersonal skills required on the job.

For more detailed information including program costs, tool requirements, student class schedules, and course syllabi, visit: http://www.cte.umt.edu/industrialtech/rpe/

Contact Mike Steffenson, Program Director, at 406-243-7693 or Michael.Steffenson@umontana.edu for more information.

Certificate of Applied Science - Recreational Power Equipment

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 39
Required Cumulative GPA: 2.0

Recreational Power Equipment

Rule: Required for Certification in Recreational Power Equipment

Note: Please note: SET 160 is first half only, SET 176 is first half only, SET 177 second half first 5 weeks and SET 180 is second half last 5 weeks.

Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits
	MCH 115 - Related Metals Processes III Offered autumn and spring. A basic metalworking course covering fasteners, layout, bench metal, heat treating, threads and threading, drills and drilling, basic machining, and tool sharpening.	3 Credits
	SET 160 - Basic Electricity for RPE Offered autumn. The theory of AC/DC electricity including Ohm's Law, magnetism, series circuits, parallel circuits, the use of meters, and electrical test equipment. Includes electrical symbols, soldering, storage batteries, cranking motors, and electrical safety.	3 Credits
	SET 176 - Motorcy/ATV Eng, Sus, Chas Offered autumn. Study of the design and function of several types of engines, transmissions, suspension, and brake systems.	3 Credits
	SET 177 - Motorcy/ATV Elect & Fuel Offered autumn. Prereq., SET 160T. Principles of ignition, charging, and cranking systems. Design and function of carburetor, fuel injection, and lubrication systems. Hands-on diagnosis of problems and testing of systems.	4 Credits

	SET 178 - Marine Elec & Fuel Syst Offered spring. Prereq., SET 160T. Theory of and testing and troubleshooting of problems with ignition, charging, and cranking systems. Includes the design, testing, and troubleshooting of marine carburetion and fuel injection systems.	5 Credits
	SET 179 - Marine Powerhds/Low Units Offered spring. Prereq., SET 178T. Theory of design, function and components of outboard motor powerheads and lower units. Includes basic rigging, power trim and tilt, propping, and personal watercraft design, function, and maintenance.	6 Credits
	SET 180 - Snowmobile Main & Rep I Offered autumn. Prereq., SET 177T. The repair and maintenance of air cooled and liquid cooled engines. Includes clutch, track, and rear suspension service and maintenance.	2 Credits
	SET 181 - Snowmobile Main & Rep II Offered spring. Prereq., SET 180T. Principles and theory of snowmobile electrical, fuel, front suspension, and brake systems.	2 Credits
	SET 182 - Comp Apps Motorsports Offered spring. Prereq., CRT 100. Use of recreational power equipment software for parts retrieval, invoicing and payment methods. Students build, query, and create reports using database software, and create a business plan for a hypothetical dealership.	1 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		39 Total Credits Required

Welding Technology Certificate

The mission of the Welding Technology Program is to provide the regional workforce with credentialed, skilled, and competent welders and to be responsive to emerging workforce needs. The Welding Technology Program prepares students to operate and troubleshoot a variety of welding power sources and related equipment. The program prepares students to solve problems found within the welding industry using computational skills and other problem-solving techniques essential to welding and steel fabrication. It also encourages the development of teamwork and interpersonal skills required on the job.

Welding students develop skills in six different welding processes–oxyacetylene (OAW), shielded metal arc (SMAW), gas metal arc (GMAW), flux core arc, (FCAW), submerged arc (SAW), and gas tungsten arc welding (GTAW). Beyond the development of welding skills and understanding of the process, they also study other skills, such as blueprint reading and layout, metallurgy, and gain an understanding of how heating and cooling cycles affect the properties of metals. Students also study the design of jigs and fixtures and how to incorporate these into an automated welding system.

The Welding Technology Program also has courses that provide for a solid background in the metals industry. Such courses are Computer Aided Design and Drafting (CADD), OSHA Rules and Compliance, and Related Metals Processes. Fabrication basics and Metal Design and Construction utilize all of the gained knowledge with an instructor approved/student designed project.

Welding technology students have the opportunity to become certified to American Welding Society Standards and receive documentation stating qualifications.

Students are awarded the Certificate of Applied Science upon successful completion of the first year of the Welding Technology program. Students are awarded the Associate of Applied Science degree upon successfully completing the two-year program.

The program often has a waiting list. For more detailed information, visit our web site, or contact Zach Reddig, Program Director, at 406-243-7644 or by email.

Rule: All courses are required

	Course	Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits
	MCH 114 - Related Metals Processes II Offered autumn. Instruction and use of drills, files, threads and threading processes, basic lathe, drill press, and band saw operation, including precision measuring instruments. Fasteners, layout procedures, and basic hand tools are covered.	3 Credits
	WLDG 117 - Blueprint Rdng & Weldng Symbls Offered spring. Prereq., WLDG 150 (Practical experience in reading and drawing orthographic projections, interpreting dimensions, notes, scales, and welding symbols. Isometric projection (pictorial), sections, and auxiliary views with practical experience using conventional drafting tools and computer aided drafting (CAD).	3 Credits

	WLDG 145 - Fabrication Basics Offered spring. Prereq., MPR 114T; WLDG 180; coreq., WLDG 117, 187. Conception, design, and construction of a metal structure to industry standards using shears, presses, and other machine tools common to the welding industry. Skills are developed in the areas of shielded metal arc welding and flux core arc welding, oxyacetylene cutting, plasma arc cutting, and air carbon arc cutting.	4 Credits
	WLDG 150 - Welding Layout Techniques Using practical layout techniques students develop basics for blueprint construction, layout on pipe and structural steel, and use of tools common to material layout.	2 Credits
	WLDG 180 - Shielded Metal Arc Welding Offered autumn. Theory and safe operation of shielded metal arc welding (SMAW) of carbon steel on plate and structural components in all positions to industry standards. Visual inspection and destructive testing used to determine acceptability based upon industry standards (American Welding Society Structural Welding Code-Steel). Power sources and electrodes are covered in depth. Materials are prepared using mechanical plate shears and thermal cutting techniques. Thermal cutting techniques are examined relative to theory of operation and safe practices. Processes used are oxy-fuel cutting, plasma arc cutting, and air carbon arc cutting. Theory and operation of oxyacetylene welding examined.	4 Credits
	WLDG 184 - OSHA Rules & Regulations Wldng Offered spring. Study of the Occupational Safety and Health Administration rules and regulations that affect the welding and construction industries.	1 Credits
	WLDG 187 - Flux Core Arc Welding Offered spring. Prereq., WLDG 180 (Theory, practice, and safe operation of flux core arc welding equipment. Coupons are welded in the flat, horizontal, and vertical positions to industry standards using a variety of welding electrodes, diameters, and power sources, which prepare students for welding qualification to the American Welding Society Structural Welding Code specifications.	4 Credits
	WLDG 205 - Applied Metallurgy Offered autumn. Covers the manufacturing of iron and steel. Examination of physical and mechanical properties. Phase changes with the application of heating and cooling cycles. Ferrous crystal types and properties. Suggested welding procedures for low, medium, and high carbon steels, alloy steels, and cast iron.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		37 Total Credits Required

Sustainable Construction Certificate

This one-year certificate in Sustainable Construction is for students looking to obtain a hands-on working knowledge of basic carpentry skills. Students will get instruction and practice in entry-level skills, including site preparation and layout, concrete forming and placement, residential framing, roofing, siding, and window installation.

Certificate of Applied Science - Sustainable Construction Tech

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 33
Required Cumulative GPA: 2.0

Certificate of Applied Science in Sustainable Construction Technology

Rule: All courses required

	Course	Credits
	BMGT 242 - Front Line Supervision Offered spring. Introduces basic employee development with emphasis on the responsibilities of a newly-appointed supervisor. Emphasizes organizational structure, motivation, delegation of authority, the hiring process, employee development, employee performance, evaluations, and dealing with employee conflict.	3 Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	CSTN 120 - Carpentry Bscs & Rough-In Frmg Introduction to the carpentry trade, including history, career opportunities, and requirements. The course covers building materials, fasteners, adhesives, hand tools, and power tools. OSHA rules and regulations for a safe working place and procedures for compliance are covered. This course includes a two-credit imbedded lab. Students will also learn now to install windows and an exterior door.	5 Credits
	CSTN 122 - Beginning Carpentry Lab Lab to support CSTN 102 and 120.	5 Credits
	CSTN 142 - Int & Ext Finish Carpentry Prereq: CSTN 120 and 122. Study of various types of siding, gutter systems, roof venting requirements, and framing with metal studs. Installation of sheathing, exterior siding, roofing felt, shingles, insulation vapor barriers, and stairs on small building constructed in CSTN 120. Installation of wood and metal doors. Demonstration of materials, layout and installation of suspended ceilings. Selection and installation of countertops, base cabinets and wall cabinets. Window, door, floor, ceiling trim and drywall are installed in a small building. This course includes a one-credit imbedded lab.	4 Credits

	CSTN 143 - Intermediate Carpentry Lab Lab to accompany CSTN 142. Prereq: CSTN 102, CSTN 120 and CSTN 122.	4 Credits
	CSTN 171 - Site Prep, Found, Concrete Ins Offered Autumn. Prereq., CSTN 100 or consent of instr. Introduces the process of distance measurement as well as differential and trigonometric leveling for site layout. It covers the principles, equipment, and methods used to perform the site layout tasks that require making angular measurements. This course is designed to let students apply the blueprint reading skills learned so far to a practical exercise.	3 Credits
	M 111 - Technical Mathematics Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		33 Total Credits Required

Sustainable Construction A.A.S.

This two-year Associate of Applied Science course of study is designed to prepare students for a wide range of building industry career paths. Students will get hands-on training in various job-site skills, including safety training as well as instruction and practice in entry-level skills, including site preparation and layout, concrete forming and placement, residential framing, roofing, siding, and window installation.

Additionally, students will be exposed to basic job-site control practices, scheduling, estimating, and the major guiding principles of green building and sustainable construction. Working on an actual on-site modular home, students completing the program will have experience and exposure to all aspects of residential construction, including foundations, framing, roofing, siding, insulation, drywall, cabinetry, floor finishes, and the process of basic project management.

AAS in Sustainable Construction Technology

Rule: All courses required

	Course	**Credits**
	CSTN 205 - Advanced Carpentry Lecture Prereq: CSTN 102, 120, 122, 142, and 143. Study of the process for angular measurement, using transits, theodolites, electronic distance measuring devices, lasers, and trigonometric calculating to lay out foundations and determine elevations. Installation of standing seam, lap seam, and built-up roofing systems; concrete, vinyl, wooden, tile, and carpeted floors as well as radiant heating; paneling, wainscoting, movable partitions, curtain walls and fire-rated commercial wall construction. Advanced stair systems, including shop built and prefabricated stairs, balustrades, mitered risers and treads, and layout of elliptical fastening methods, and assembly techniques. Project planning, scheduling, estimating, and management skills included. This course includes a two-credit lab.	6 Credits
	CSTN 206 - Advanced Carpentry Lab Laboratory to accompany CSTN 205. Prereq: CSTN 102, 120, 122, 142, and 143.	2 Credits

	CSTN 261 - Building Management Prereq: CSTN 120, 122, 142, 143, 171. Introduction to building business and project management including overhead costs, payroll costs, estimating and scheduling. Covers elements of payroll computation and preparation, payroll tax returns, information returns, and identification and compensation of independent contractors. Students are introduced to building cost estimating, and scheduling of subcontractors and building inspections. This course includes a one-credit imbedded lab.	4 Credits
	CSTN 278 - Applied Building Practices Lab Offered spring. Prereq., CSTN 102, 103, 120, 122, 142, 143. Students work on a variety of projects either at the college or in the community to practice and develop their skills as well as learn new skills. Knowing and following OSHA rules and regulations is emphasized. Students are expected to produce a professional quality product.	6 Credits
	CSTN 279 - Commercial Construction Prereq.CSTN 171, 120, 122, 142, and 143. Study and develop skills in metal stud framing, commercial roofing systems, metal and masonry buildings, metal doors and door hardware, suspended ceilings, and fire rated commercial walls.	4 Credits
	CSTN 282 - Green Bldg Concept & Design I Offered fall semester of the 2nd year. This course takes a holistic approach to natural resource conservation and energy efficiency in the construction industry. From integrated design, building site selection and evaluation, through building design, material selection and efficiencies, passive heating and cooling, and construction techniques. Students design an energy efficient residence to be built by next years class.	4 Credits
	CSTN 283 - Green Bldg Concept & Design II Prereq., CSTN 282. Spring semester. A course fee of $50.00 is required. This course builds on concepts learned in CSTN 282 Green Building Concepts and Design I. Students learn how to weatherize existing buildings and green remodeling and preservation techniques, design and build outdoor living spaces, and green landscaping practices. They learn how to document building for green rating for both NAHB Standards and LEED. They will conduct blower door tests and learn to test for and mitigate radon gas. Students will also refine the energy efficient residential plan they produced in Green Building Concepts and Design I.	3 Credits
	CSTN 299 - Capstone: Carpentry Capstone laboratory to accompany CSTN 102, 120, 122, 142, 143, 205, 206, and 261. This course provides hands-on experience in which the student applies the skills and knowledge presented in the Carpentry Program. The course will emphasize advanced application in the areas of exterior finishing and interior finishing, and other constructed topics.	2 Credits
	DDSN 114 - Introduction to CAD Offered autumn. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to computer aided design and drafting software for production of drawings and plans for architecture and engineering systems. Fundamentals of two dimensional drafting and drawing management for professional design.	3 Credits

	WLDG 103 - Welding Fund Constructn Trades Offered spring. Basic welding processes of shielded metal arc welding (SMAW), flux core arc welding (FCAW) are covered in the flat, horizontal, and vertical positions in a variety of joint configurations. The instruction in flux core arc welding is focused on the carpentry building trades. Instruction in the oxyacetylene cutting process is also provided. Safe operation of equipment is covered and work is evaluated to industrial standards. This course is designed for carpentry students.	2 Credits
Minimum Required Grade: C-		36 Total Credits Required

Precision Machine Technology Certificate

The Certificate of Technical Studies in Precision Machine Technology provides instruction in the theory and operation of manual mills and lathes, precision measurements, blueprint reading, and the use of other tools related to the machinist trade. Students can earn NIMS credentials in all phases of the training. Upon completion of this program, students will enter the workforce at entry level, pursue apprenticeship, or continue their machining training to earn the CAS.

Technical Certificate - Precision Machine Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0

Certificate of Technical Studies in Precision Machine Technology

Rule: All courses required

	Course	**Credits**
	MCH 101 - Intro Manf Proc This course is designed to introduce the student with an overview of manufacturing to include engineering materials and product attributes, material removal processes, property enhancing and surface processing operations, special processes and assembly technologies, and manufacturing systems.	1 Credits
	MCH 120 - Bluepr Read & Interp for Mach This course introduces the fundamental concepts necessary to interpret and make drawings with symbols, various schematics and diagrams, dimensioning techniques, section views, auxiliary views, threads and fasteners, and sketching typical to all shop drawings. Interpretation of specifications and determination of acceptable tolerance requirements to ensure quality control measures for design parts will also be stressed.	3 Credits
	MCH 129 - Mach Qual Contr and Prec Meas Students will develop the knowledge to analyze and evaluate the processes and methodology required in an industrial production environment to determine whether quality control standards are being met. Topics include use of non-precision measuring tools, use of precision measuring tools, use of comparison gauges, and analysis of measurements in a CNC environment.	3 Credits

	MCH 132 - Intro to Man Eng Lathes Prereq., or corereq., MCH 120 and MCH 129. This introduction to Manual Engine Lathes will cover the safety, maintenance and operation of manual engine lathes and related periphery tools and skills. Subjects covered include HSS tool bit grinding and tool bit geometry, chip formation, speeds and feeds, operation and process planning, threads, fits, dimensioning and tolerances, surface finish, and the following lathe processes: facing, turning, tapering, drilling, boring, reaming, chamfering, grooving, parting-off, internal and external threading, tapering, knurling, filing and polishing. Graded projects using between centers and chuck work turning will be done. Related periphery tooling, use and care of precision measuring tools, in addition to related math used in the trade, will also be covered.	4 Credits
	MCH 134 - Introduction to Manual Mills Prereq.,/coreq., MCH 120 and MCH 129. The student will perform advanced hands-on machine shop operations: set up and operation of manual milling machines, drill presses, band saws, grinders, and other equipment commonly found in manufacturing facilities. The student will use precision measuring tools and methods, utilize blueprints, and perform project process planning. Various types of steel and aluminum are use.	4 Credits
Minimum Required Grade: C-		21 Total Credits Required

Precision Machine Technology (C.A.S.)

The Precision Machine Technology Certificate of Applied Science program provides instruction in the theory and operation of mills and lathes, both manual and CNC, other tools related to the machinist trade, and associated programming. Students can earn NIMS credentials in all phases of the training. Upon completion of this program, students will enter employment in the machining industry, pursue apprenticeship in machining, or further their education toward higher academic degrees.

Certificate of Applied Science in Precision Machine Technology

Rule: All courses required

	Course	**Credits**

	DDSN 135 - Solidworks his course aggregates fundamental concepts of Blueprint Reading and Interpretation (MCH 120) and Machine Quality Control and Precision Measurements (MCH 129) in the form of gaining practical application of concepts to 3D solid modeling. 3D models will include drawings with symbols, various schematics and diagrams, dimensioning techniques, section views, auxiliary views, threads and fasteners typical to shop drawings. Application of specifications and acceptable tolerance requirements to ensure quality control measures for design parts and assemblies will also be stressed.	2 Credits
	MCH 101 - Intro Manf Proc This course is designed to introduce the student with an overview of manufacturing to include engineering materials and product attributes, material removal processes, property enhancing and surface processing operations, special processes and assembly technologies, and manufacturing systems.	1 Credits
	MCH 102 - Intro to Manf Materials This is an introductory course in the study of materials used in the manufacturing industry. Topics include selection and identification of steels, selection and identification of nonferrous metals, mechanical behavior of various plastics, hardening, case hardening, tempering, annealing, normalizing, stress relieving, and the use of the Rockwell and Brinell hardness testers.	2 Credits
	MCH 120 - Bluepr Read & Interp for Mach This course introduces the fundamental concepts necessary to interpret and make drawings with symbols, various schematics and diagrams, dimensioning techniques, section views, auxiliary views, threads and fasteners, and sketching typical to all shop drawings. Interpretation of specifications and determination of acceptable tolerance requirements to ensure quality control measures for design parts will also be stressed.	3 Credits
	MCH 122 - Introduction to CAM This course introduces Computer Aided Manufacturing (CAM) operational basics for both mill and lathe programming using current CAM software. The course includes terminology relevant to PC-based CAD/CAM work, hardware familiarity, system operation and management, folders, file type and structure, menu structure and use, and 3 axis (milling machines) and 2 axis (lathes) tool paths. Emphasis is placed on proper geometric creation, management, relevant utilities, and toolbar and menu functions.	3 Credits
	MCH 125 - Introduction to CNC Lathes Prereq., MCH 132 . This course provides opportunities for students to develop skills in the safe setup, maintenance, and operation of CNC lathes and related periphery tools and skills. Topics covered include CNC lathe parts, controls, tool holding, tool insert geometry, chip formation, speeds and feeds, operation and process planning, threads, fits, dimensioning and tolerances, surface finish, and the following lathe processes: facing, turning, tapering, drilling, boring, reaming, chamfering, grooving, parting-off, internal and external threading, tapering, and knurling. Graded projects based on chuck, collet, and fixturing will be done. Related periphery tooling, use and care of precision measuring tools, in addition to related math used in the trade, will also be covered.	3 Credits

	MCH 127 - Introduction to CNC Mills Prereq., MCH 134. This course provides instruction in the setup and operation of CNC mills. Student projects include specialty tooling and multi-axis machining. Students will also gain experience in process control. Topics include specialty tooling, multi-axis machining, process control, and laboratory exercises in part production.	3 Credits
	MCH 129 - Mach Qual Contr and Prec Meas Students will develop the knowledge to analyze and evaluate the processes and methodology required in an industrial production environment to determine whether quality control standards are being met. Topics include use of non-precision measuring tools, use of precision measuring tools, use of comparison gauges, and analysis of measurements in a CNC environment.	3 Credits
	MCH 130 - Machine Shop The course content covers a broad range of shop fundamentals in manual and CNC machining. This course includes an emphasis on shop and work area safety. Instruction covers standard shop work, such as measurement, layout, basic hand tools, drills, drill presses, and taps and dies. Use of pedestal grinder will be covered. Work assignments incorporate projects requiring use of the above machines, tooling, and emphasizes safety.	3 Credits
	MCH 132 - Intro to Man Eng Lathes Prereq., or corereq., MCH 120 and MCH 129. This introduction to Manual Engine Lathes will cover the safety, maintenance and operation of manual engine lathes and related periphery tools and skills. Subjects covered include HSS tool bit grinding and tool bit geometry, chip formation, speeds and feeds, operation and process planning, threads, fits, dimensioning and tolerances, surface finish, and the following lathe processes: facing, turning, tapering, drilling, boring, reaming, chamfering, grooving, parting-off, internal and external threading, tapering, knurling, filing and polishing. Graded projects using between centers and chuck work turning will be done. Related periphery tooling, use and care of precision measuring tools, in addition to related math used in the trade, will also be covered.	4 Credits
	MCH 134 - Introduction to Manual Mills Prereq.,/coreq., MCH 120 and MCH 129. The student will perform advanced hands-on machine shop operations: set up and operation of manual milling machines, drill presses, band saws, grinders, and other equipment commonly found in manufacturing facilities. The student will use precision measuring tools and methods, utilize blueprints, and perform project process planning. Various types of steel and aluminum are use.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 12
Required Cumulative GPA: 2.0

HVAC

Rule: All courses required

	Course	Credits
	FME 122 - Electricity Offered spring. The electrical laws and principles pertaining to DC and AC circuits. Includes current, voltage, resistance, power, load, panels, feeders, lamps, motors, and fuses. Introduction to wiring methods and materials in conformance with the National Electric Code (NEC). Includes installation and replacement of light fixtures, heaters, GFCI's, switches, receptacles, raceways and electrical thermostats. Upon successful completion, students will receive the NCCER certification for Electricity	6 Credits
	FME 130 - Heating & Air Conditioning Offered spring. The fundamentals of heating, ventilating, and air conditioning. Covers heating and refrigeration cycles, gas furnaces, refrigerants, system evacuation and charging, and components used in associated systems. Introduces the basic mechanical service procedures used in the industry. Students will also sit for the Universal 608 EPA exam and receive the NCCER certification for Heating, Ventilation, Air conditioning and Refrigeration (HVAC).	6 Credits
Minimum Required Grade: C-		12 Total Credits Required

Construction Helper Certificate

This one-semester certificate program is designed to prepare candidates for entry-level positions across the construction industry. Designed to make students job-site ready, the program covers job-site safety as well as a hands on introduction to site and foundation work and basic carpentry.

Technical Certificate - Construction Helper

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 16
Required Cumulative GPA: 2.0

Certificate of Technical Studies, Construction Helper

Rule: All courses required

	Course	Credits
	CSTN 120 - Carpentry Bscs & Rough-In Frmg Introduction to the carpentry trade, including history, career opportunities, and requirements. The course covers building materials, fasteners, adhesives, hand tools, and power tools. OSHA rules and regulations for a safe working place and procedures for compliance are covered. This course includes a two-credit imbedded lab. Students will also learn now to install windows and an exterior door.	5 Credits
	CSTN 122 - Beginning Carpentry Lab Lab to support CSTN 102 and 120.	5 Credits
	CSTN 171 - Site Prep, Found, Concrete Ins Offered Autumn. Prereq., CSTN 100 or consent of instr. Introduces the process of distance measurement as well as differential and trigonometric leveling for site layout. It covers the principles, equipment, and methods used to perform the site layout tasks that require making angular measurements. This course is designed to let students apply the blueprint reading skills learned so far to a practical exercise.	3 Credits
	NRGY 120 - Industrial Safety and Rigging This course provides an overview of safe industrial practices and provides students with hands-on experiences in rigging for a variety of industries. Students will complete the requirements for an OSHA 30 certification, construct a scaffold system, identify equipment for shifting heavy loads such as may be used in the wind and solar industries. Load security, fall gear, arrest equipment, confined spaces, safety data sheets will be covered. Students will also learn elements of first aid, cardio-pulmonary resuscitation (CPR), and proper use of Automated External Defibrillators (AED's).	3 Credits
Minimum Required Grade: C-		16 Total Credits Required

Health Professions Department

Nick Arthur, Chair

The Health Professions Department of Missoula College-University of Montana seeks to prepare students to be health practitioners who are technically competent and who are safe and in a variety of clinical, agency and community settings. The Health Professions Department offers four Associate of Applied Science (A.A.S.) Degrees, one Associate of Science (A.S.) Degree, and one Certificate of Applied Science (CAS) program with courses and learning experiences that contribute to understanding the health needs of individuals and society. Clinical affiliations and on-site experiences are essential elements of all programs; local and regional communities, their agencies, and organizations are a valuable resource and provide cooperative learning experiences in health delivery systems.

Allied Health Medical Support

Back to Top

- AHMS 108 - Health Data Content & Struct

  Credits: 2. Offered spring. In-depth study of origin, use, content and structure of health records; storage and retrieval systems; numbering and filing systems; documentation requirements; use and structure of health care data sets; and how these components relate to primary and secondary record systems. Additional topics include gathering, compilation and computing of healthcare related statistics, use of research and statistical methods for developing healthcare data into information for various requesters. Course Attributes: Technical Course

- AHMS 144 - Medical Terminology

  Credits: 3. Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes. Course Attributes: Technical Course

- AHMS 156 - Medical Billing Fundamentals

  Credits: 3. Offered every term. Prereq. or coreq., AHMS 220 or consent of instr. An introduction to insurance claim processing for the major medical insurance programs. Students will be provided with a basic knowledge of CPT and ICD-9 procedural and diagnostic coding. Emphasis on completing universal insurance forms to maximize reimbursement as well as trouble shoot denied or underpaid claims. Course Attributes: Technical Course

- AHMS 160 - Beginning Procedural Coding

  Credits: 3. Offered autumn. Prereq., AHMS 156, AHMS 108 or consent of instr. Foundation for utilizing the CPT coding system to increase compatibility and comparability of medical data among users and providers.

- AHMS 164 - AHMS 164 Beginning Diagnosis Coding: ICD-10

  Credits: 3. This course covers basic and intermediate levels of theory and application of ICD-CM principles and guidelines for coding and sequencing diagnoses and procedures. Students perform basic and intermediate coding using real health records, case studies, and scenarios. Application will focus on the use of the electronic ICD-10-CM with an overview of encoder software. This coding class involves hands-on coding, and knowledge of basic use of applicable coding books or the electronic ICD-10-CM. Currently the students take this course through Great Falls

- AHMS 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHMS 192 - Independent Study

  Credits: 1 TO 9. Course material appropriate to the needs and objectives of the individual student.

- AHMS 212 - CPT Coding

  Credits: 3. Offered spring. Prereq., AHMS 210 or consent of instr. Comprehensive application of the CPT coding system to assign codes for services, supplies and equipment for comparative analysis, research and reimbursement.

- AHMS 213 - ICD-10 CODING

  Credits: 3. Prereq., AHMS 164. Basic understanding of diagnostic and procedural coding principles should already be established. The course requires interpreting ICD-10-CM coding and reporting guidelines to sequence and assign appropriate diagnostic codes for both inpatient and various outpatient settings. Compliance issues associated with various IPPS reimbursement systems such as MS-DRGs, as well as APCs are covered. Encoder software will complement the ICD-10-CM manual in the application of coding processes. Clinical information will be interpreted from brief case studies and progress to the coding of health record excerpts.

- AHMS 216 - Pharmaceutical Products

  Credits: 3. Offered autumn. Fundamental principles of pharmacology and the implications of medication use. Includes the law as it pertains to drug use, dosage forms, routes of administration as well as the pharmacologic actions and uses of drugs.

- AHMS 220 - Medical Office Procedures

  Credits: 4. Offered autumn. An introduction to the necessary skills and qualities required to function successfully in the medical arena. Emphasis on medico-legal and ethical responsibilities, records management and financial management of the medical practice, and interpersonal communications to include patient reception, telephone techniques and appointment scheduling. Course Attributes: Technical Course

- AHMS 245 - Simulated Lab

  Credits: 3. Prereq., consent of instr. This course will use computer applications and software in maintaining health information in medical records through practice utilizing HIT applications through the AHIMA Virtual Lab, to include the following applications: Master Patient Index, Electronic Health Record, Encoder, Abstracting, Chart Tracking, Release of Information.

- AHMS 252 - Computerized Medical Billing

  Credits: 3. Offered spring, Prereq., AHMS 156; prereq. or coreq. AHMS 220; or consent of instr. A medical package is used to enter and update patient data, enter charges, payments and

adjustments, and generate management reports, insurance forms, and patient statements.

- AHMS 270E - Medical Ethics

  Credits: 3. Offered every term. Ethical decision-making tools for addressing common ethical issues in the health professions. Course Attributes: Ethical & Human Values Course

- AHMS 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHMS 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- AHMS 298 - Medical Info Internship

  Credits: 3. Offered every term. Prereq., last semester in program, minimum of "C" in AHMS/AHMA (MED) courses, and approval of program director. On-the-job training in positions related to each student's career goal in the medical information field. This experience increases students' skills, prepares them for initial employment and advancement on the job, and increases occupational awareness and professionalism. Students work a minimum of 180 hours at an approved site and attend a scheduled one-hour seminar. Course Attributes: Internships/Practicums

Allied Health Respiratory Care

Back to Top

- AHRC 101 - Communication Management

  Credits: 1. Offered autumn. Prereq., Acceptance into Respiratory Care Program. Study of respiratory care departmental organization and administration procedures, effective communication strategies, and legal and ethical issues for the Respiratory care professional.

- AHRC 115 - Blood Gas Analysis

  Credits: 2. Offered autumn. Prereq., acceptance into the Respiratory Care program. Study of the indications, rational, methods, instrumentation, and analysis of Blood Gases. Emphasis will be placed on the physiology and clinical implications of acid-base abnormalities.

- AHRC 129 - Patient Care & Assessment

  Credits: 4. Offered autumn. Prereq., BIOH 201N-202N. Introduction to nursing- related knowledge and skills with emphasis on application of microbiology to aseptic technique. Assessment of the respiratory system with cardiopulmonary diagnostic and laboratory tests interpretation. Observation and interpretation of overall patient condition is integrated throughout the course. Course Attributes: Technical Course

- AHRC 130 - Respiratory Care Lab IB

  Credits: 1. Offered autumn. Prereq., acceptance into the Respiratory Care program. Basic clinical competencies taught in RES 129 are studied in a laboratory setting. Peer and instructor review of competencies included. Students focus on patient assessment skills and techniques/equipment.

- AHRC 131 - Resp Care Fundamentals

  Credits: 5. Offered autumn. Prereq., acceptance into the Respiratory Care program. Orientation to basic respiratory care science including the application of principles of physics and chemistry. Emphasis on theory, operation and troubleshooting of equipment used at the entry level of practice. Microbiology in relation to equipment processing, pulmonary rehabilitation and home care included. Course Attributes: Technical Course

- AHRC 133 - Resp Care Pharmacology

  Credits: 3. Offered spring. Prereq., acceptance into the Respiratory Care Program or consent of instr. Principles of basic chemistry introduced with an application to pharmacology as related to the pulmonary system. Cardiovascular and related pharmacology studied in preparation for ACLS and ventilator management. Course Attributes: Technical Course

- AHRC 150 - Respiratory Care Lab I

  Credits: 1. Offered autumn. Prereq., acceptance into the Respiratory Care program. Basic clinical competencies taught in RES 131 are studied in a laboratory setting. Peer and instructor review of

competencies included. Students earn their BLS certification. Course Attributes: Technical Course

- AHRC 231 - Resp Crit Care

  Credits: 4. Offered spring. Prereq., RES 120, 129, 131, 133, 150. Continuation of RES 131. Physiology, indication, contraindications, and application of mechanical ventilation. Emphasis on patient assessment, monitoring, stabilization and weaning during assisted pressure breathing. Analysis of the various modes of ventilation, including optimizing the patient-ventilator interface in the adult through various advanced airway techniques. Course Attributes: Technical Course

- AHRC 232 - Resp Path & Disease

  Credits: 3. Offered spring. Prereq., RES 120, 129, 131, 133, 150. Special lectures in medicine and disease as related to the cardiopulmonary system. Emphasis on recognition of signs and symptoms of disease and implications for treatment through the study of selected case studies. Course Attributes: Technical Course

- AHRC 235 - Cardiopulm Anat & Phys

  Credits: 3. Offered spring. Prereq., RES 120, 129, 131, 133, 150 or consent of instr. Principles of physiologic chemistry are introduced and applied to the macro and micro anatomy of the cardiopulmonary system with a focus on structure and function. Application made to pathology and assessment of patients receiving mechanical ventilation. Course Attributes: Technical Course

- AHRC 242 - Respiratory Management

  Credits: 1. Offered autumn. Prereq., RES 260T, 265T. Study of respiratory care departmental organization and administration procedures. Course Attributes: Technical Course

- AHRC 243 - Perinat & Pediat Res Care

  Credits: 3. Offered autumn. Prereq., RES 260, 265. Study of perinatal and pediatric respiratory care with emphasis on assessment, resuscitation and mechanical ventilation of the neonate and pediatric patient. The theory of Neonatal Resuscitations (NRP) will be presented. Neonatal and pediatric diseases will be studied. Course Attributes: Technical Course

- AHRC 250 - Respiratory Care Lab II

  Credits: 2. Offered spring. Prereq., RES 120, 129, 131, 133, 150. A continuation of RES 150 with emphasis on adult critical care. Clinical competencies taught in RES 231 and RES 235 are studied in a laboratory setting. Peer and instructor review of competencies included. Course Attributes: Technical Course

- AHRC 252 - Respiratory Care Review

  Credits: 2. Offered autumn. Prereq., RES 260, 265. A review of respiratory care in preparation for credentialing exams. Students must take an Entry Level Self-Assessment Exam, a Written Registry Self- Assessment Exam, and a Clinical Simulation Self-Assessment Exam. Course Attributes: Technical Course

- AHRC 255 - Clinical Experience I

  Credits: 5. Offered spring. Prereq., RES 120, 129, 131, 133, 150. Emphasis on the student directly performing basic clinical skills in a patient care setting to include hospitals, home care, and pulmonary function laboratories. Students also participate in physician rounds. Course Attributes: Technical Course

- AHRC 260 - Resp Care Lab III

  Credits: 1. Offered summer. Prereq., RES 231, 232, 235, 250, 255. Students study principles and theory of advanced life support. Peer and instructor review are included. Students will be Advanced Cardiac Life Support (ACLS) and Pediatric Advance Life Support (PALS) certified at the end of this class. Course Attributes: Technical Course

- AHRC 265 - Clinical Experience II

  Credits: 5. Offered summer. Prereq., RES 231, 232, 235, 250, 255. Continuation of clinical skills learned in RES 255. Introduction to adult critical care along with sleep and cardiac diagnostics. Students also participate in physician rounds. Course Attributes: Technical Course

- AHRC 270 - Resp Care Lab IV

  Credits: 1. Offered autumn. Prereq., RES 260, 265. Emphasis on neonatal and pediatric critical care. Clinical competencies introduced in RES 241 are studied. Peer and instructor review of competencies are included. Course Attributes: Technical Course

- AHRC 275 - Clinical Exp III
  Credits: 6. Offered autumn. Prereq., RES 260, 265, 270. Continuation of RES 265 with critical care of the adult. Neonatal and pediatric critical care experiences are emphasized. Students also participate in physician rounds. Course Attributes: Technical Course
- AHRC 291 - Special Topics
  Credits: 1 TO 8. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course
- AHRC 292 - Independent Study
  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student.

Surgical Technology

Back to Top

- AHST 101 - Introduction to Surgical Techn
  Credits: 3. Offered spring. Prereq., admission to the program. Provides an orientation to the scrub and circulatory roles of the surgical technologist in the preoperative, intraoperative and postoperative periods. Entry level skills and theories are emphasized. Course Attributes: Technical Course
- AHST 115 - Surgical Lab I
  Credits: 2. Offered spring. Prereq., admission to the program. Demonstration of sterile technique in the campus lab, various skills and their application in the operating room. Course Attributes: Technical Course
- AHST 154 - Surgical Pharmacology
  Credits: 3. Offered spring. Prereq., admission to the program, M 090. Basic overview of the medications that are commonly used before, during and after a surgical procedure.
- AHST 191 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Ethical & Human Values Course Technical Course
- AHST 200 - Operating Room Techniques
  Credits: 5. Offered autumn. Prereq., completion of all second semester courses. Focus on the scrub and circulator roles of the surgical technologist in the preoperative, intraoperative, and postoperative periods. More complex skills and theories; impact of new technologies in the 21 century st operating room. Course Attributes: Technical Course
- AHST 201 - Surgical Procedures I
  Credits: 4. Offered autumn. Prereq., completion of all second semester courses. A study of surgical procedures following the patient through the preoperative, intraoperative, and post-operative stages of specific surgical specialties. Course Attributes: Technical Course
- AHST 202 - Surgical Procedures II
  Credits: 5. A study of surgical procedures following the patient through the preoperative, intraoperative, and postoperative stage of CV/thoracic, orthopedic, neurological, and ophthalmic specialties. Course Attributes: Technical Course
- AHST 215 - Surgical Lab II
  Credits: 2. Offered spring. Demonstration of more complex skills in the campus lab, including assistant circulating, and their application in the operating room. Course Attributes: Technical Course
- AHST 250 - Surgical Clinical I
  Credits: 4. Offered autumn. Prereq., completion of all second semester courses and successful completion of AHST 215. Perioperative experience in the minor surgical procedure role through a supervised clinical hospital rotation.
- AHST 251 - Surgical Clinical II

Credits: 5. Offered spring. Prereq., completion of all third semester courses. Perioperative experience in the major surgical procedure role through a supervised clinical hospital rotation. Course Attributes: Technical Course

- AHST 298 - Surgical Internship

  Credits: 5. Offered spring. Prereq., successful completion of AHST 202, 251T. Capstone experience in the perioperative role in preparation for initial employment, increasing occupational awareness and professionalism. Students take call for emergency surgeries alongside experienced hospital staff. Course Attributes: Internships/Practicums

Radiologic Technology

Back to Top

- AHXR 100 - Intro to Diagnostic Imaging

  Credits: 3. Offered fall. Introduction to the field of radiology and its mix of technical equipment, lab work, hospital environment, patient care and team work. Course Attributes: Technical Course

- AHXR 121 - Radiographic Imaging I

  Credits: 4. Offered autumn. Introduction to fundamental physics principles underlying radiology and diagnostic x-ray production. Topics include electromagnetic waves, electricity and magnetism, electrical energy, and power and circuits as they relate to radiography. Factors of image quality and exposure methods: density, contrast, recorded detail, distortion, technique charts, manual and automatic exposure control, and tube rating charts. Course Attributes: Technical Course

- AHXR 140 - Radiographic Methods

  Credits: 3. Offered autumn. Knowledge and skills necessary for quality patient care during standard and specialty radiographic procedures. Course Attributes: Technical Course

- AHXR 141 - Radiology Lab

  Credits: 1. Co-Requisite AHXR 140 Radiological Methods. Students will practice all patient positioning skills necessary for competency as Radiologic Technologists.

- AHXR 192 - Independent Study

  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- AHXR 195 - Radiographic Clinical: I

  Credits: 1 TO 14. (R-20) Offered over two semesters throughout the Radiology Technology program, beginning Spring semester. Students will begin with an introduction to patient management and basic radiographic procedures. The final semester offers opportunities in advanced patient management skills and experience with highly skilled radiographic procedures. Each semester builds on the previous semester, always emphasizing the principles of ALARA. Course Attributes: Internships/Practicums

- AHXR 221 - Radiographic Imaging II

  Credits: 3. Offered spring. Offers students more technical and detailed information on the use of image receptor systems, processing principles, advanced digital imaging systems and imaging modalities used in radiology.

- AHXR 225 - Radiobiology/Radiation Protctn

  Credits: 2. Offered spring. Principles of radiation protection and radio biology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and personnel, and radiation monitoring devices. Course Attributes: Technical Course

- AHXR 240 - Radiological Methods II

  Credits: 2. Offered spring. Coreq., AHXR 241. Preparation in the procedures associated with radiology in standard radiographic environments.

- AHXR 241 - Radiology Lab II

  Credits: 1. Offered spring. Prereq., BIOH 201N, 202N, and 211N, coreq., AHXR 240. Students will practice all patient positioning skills necessary for competency as Radiologic Technologists.

- AHXR 270 - Radiographic Registry Review

Credits: 2. Offered spring. An overview of imaging concepts as a review for the national certification test. Topics include a systematic approach for image evaluation, patient care, radiation protection and the physics of radiographic imaging. Course Attributes: Technical Course

- AHXR 274 - Cross Sectional Anatomy

  Credits: 3. Course offered on line each semester. Students must be ARRT certified with a current state license to register for the CT courses. This course will cover information specific to ARRT guidelines in preparation for the Computed Tomography Exam. The regions of the body to be included are: Head, Neck, Chest, Abdomen, Pelvis and Musculoskeletal. Within each of these categories, focus will be placed on these relevant factors. Sectional Anatomy (axial, sagittal and coronal planes), Contrast Media (types, contraindications, administration), Imaging Processes (scout acquisition and methods, parameter selection, protocol modification) and Special Procedures (Reformatting, 3-D rendering, biopsies/drains, screening).

- AHXR 275 - Physics and Instrumentation

  Credits: 2. Course offered on line each semester. Students must be ARRT certified with a current state license to register for the CT courses. This course will cover information specific to ARRT guidelines in preparation for the Computed Tomography Exam. The course will be broken down in to the following sections: Patient Assessment and Preparation (to include patient history, screening, and consent. Immobilization, patient monitoring, accessory medical devices, lab values and medications/dosage). Contrast Administration (to include contrast media types, considerations, administration and dosage, venipuncture, injection techniques, post-procedure care and adverse reactions). Radiation Safety and Dosimetry (to include technical factors, protection and shielding, dose measurement and dose reduction/optimization).

- AHXR 291 - Special Topics

  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- AHXR 295 - Radiographic Clinical: I

  Credits: 8 TO 24. (R-20) Offered over two semesters throughout the Radiology Technology program, beginning Spring semester. Students will begin with an introduction to patient management and basic radiographic procedures. The final semester offers opportunities in advanced patient management skills and experience with highly skilled radiographic procedures. Each semester builds on the previous semester, always emphasizing the principles of ALARA. Course Attributes: Internships/Practicums

- AHXR 298 - Internship

  Credits: 1. Extended classroom experience which provides practical application of classroom learning during placements off campus. Course Attributes: Internships/Practicums

Nursing

Back to Top

- NRSG 100 - Introduction to Nursing

  Credits: 1. Offered each semester. This online course is a prerequisite to the Practical Nursing program. Student will be presented with an introductory level of the core concepts of nursing practice and other issues such as the legal concerns and ethical/cultural issues that face professional nurses on a consistent basis. Course Attributes: Practical Nursing Prog Rqrmnt Registered Nursing Prog Rqrmnt

- NRSG 106 - Nursing Assistant

  Credits: 4. The Nursing Assistant course will prepare students for careers in health care under the supervision of the licensed nurse. Students will learn the basic entry-level nursing skills to work in health care setting as a Certified Nursing Assistant. Course includes providing or assisting in client care, bathing, dressing, grooming, toileting, ambulation, transferring, feeding, using equipment, documenting and reporting the general well-being of the client.

- NRSG 110 - Dosage Calculation Hlth Prof

  Credits: 2. This course is intended to provide the student the theory and psychomotor skills to correctly and safely calculate medications for clients in diverse health care settings. It will prepare students for the calculations used in health care professions. Students will review various systems of weights and measures (metric, apothecary, and household), conversions between these

systems, ratio/proportions, dosage calculations, percentage preparations, reducing and enlarging formulas, dilution, concentrations, and intravenous flow rates.

- NRSG 131 - Fundamentals of Nursing Lab

  Credits: 3. Offered autumn and spring. Prereq., SCN 201N-202N, M 115, WRT 101, SCN 150N, PSYX 100S, CHMY 121N with lab, and acceptance into the practical nursing program. Introduces the student to basic principles and psychomotor skills to provide a framework for developing initial competencies in patient care. Campus lab experience is used initially. Off campus clinical experience in a long term care setting completes the hands on portion. Successful students are qualified to apply for certification as certified nurse assistants.

- NRSG 138 - Gerontology for Nursing

  Credits: 2. Offered autumn and spring. Prereq: acceptance into the Practical Nursing Program. Introduces the student to the skills and knowledge needed to provide nursing care to aging clients. Topics explored include current trends (including legal and ethical issues) in gerontological nursing, developmental stages and transitions associated with aging, expected age-related physiological changes, and assessment findings, recognition and management of acute and chronic illness that commonly occur in the older adult population, promotion of health for the older adult client, end-of-life issues and care. Course Attributes: Practical Nursing Prog Rqrmnt Registered Nursing Prog Rqrmnt

- NRSG 142 - Cre Cncpts of Mtrnl Chld Nrsng

  Credits: 3. Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Information about fetal development and prenatal and postnatal care of the mother and newborn emphasizing caring, communication, professionalism, and critical thinking. Role of the nurse in meeting the needs of the family is emphasized. Clinical application of caring for the mother and newborn will allow the student to demonstrate acquired knowledge.

- NRSG 143 - Cre Cncpts Mtrnl Chd Nrsng Cln

  Credits: 3. Offered intermittently. Prereq: all first semester practical nursing courses and consent of instr. Capstone course that allows the student to work collaboratively with an identified LPN preceptor, performing the role expectations for care in that workplace setting.

- NRSG 144 - Cre Cncpts of Mentl Hlth Nrsng

  Credits: 2. Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Exploration of physiological, psychological, sociocultural, spiritual, and environmental factors associated with mental health/illness affecting individuals and families. Focus will be placed on basic concepts of psychiatric nursing, therapeutic modalities, as well as psychiatric disorders including psychopharmacological management. Course Attributes: Practical Nursing Prog Rqrmnt Registered Nursing Prog Rqrmnt

- NRSG 147 - Practical Nursing NCLEX Review

  Credits: 2. Offered autumn and spring. Prereq: Successful completion of all courses in the first semester of the practical nursing program. Preparation for the national test for LPN licensure.

- NRSG 148 - Leadership Issues

  Credits: 2. Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Capstone course that provides the Practical Nursing student information regarding the current status of vocational nursing. There is a forty-five hour clinical/precepted component to provide the student opportunity to apply theoretical knowledge in the long-term care setting.

- NRSG 191 - Special Topics

  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

- NRSG 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- NRSG 230 - Nursing Pharmacology

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides the student with an overview of pharmacology with an emphasis of the study of effects, interactions, and nursing considerations of pharmacologic agents on the client population across the lifespan. The course also explores the ethical, legal, cultural and age implications of pharmacologic therapy across diverse populations and the lifespan.

- NRSG 231 - Nursing Pharmacology Lab

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. An integration of lab experiences focusing on the basic principles in providing safe medication administration, including intravenous therapy across diverse populations and the lifespan.

- NRSG 232 - Foundations of Nursing

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides opportunities to develop competencies necessary to meet the needs of individuals throughout the lifespan in a safe, legal, and ethical manner using the nursing process. Students learn concepts and skills necessary for maintaining standard precautions, physical, psychological and nutritional safety, along with skills needed in therapeutic interventions. Students are introduced to the concepts of professional nursing, patient needs, safety, communication, teaching/learning, critical thinking, ethical-legal, rural nursing, cultural and ethnic diversity, and interdisciplinary patient-centered care.

- NRSG 233 - Foundations of Nursing Lab

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. An integration of lab experiences focusing on psychomotor nursing skills needed to assist individuals in meeting basic human needs. Application of the nursing process and hands-on learning experiences for nursing skills, patient assessments, nutritional safety, and basic therapeutic skills are practiced and demonstrated.

- NRSG 234 - Adult Nursing I

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This course builds upon the knowledge and skills acquired in Foundations of Nursing, and places them in the context of patient-centered care. Social, cultural, ethical, rural and legal issues, end-of-life and palliative care across diverse adult populations are introduced. Health promotion and prevention throughout the adult lifespan, with specific focus on the geriatric patient, is emphasized. Normal aging, health alterations associated with aging, and their implications are addressed.

- NRSG 235 - Adult Nursing I Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This clinical introduces the student to nursing practice in care of the stable adult patient. This includes care of the adult in a variety of health care settings. Students utilize the nursing process to develop individualized plans of care to prevent illness, promote wellness and maintain or restore health based on patient needs and evidence based practice.

- NRSG 236 - Health and Illness of Maternal Nursing

  Credits: 2. Offered autumn and spring. Prere., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. In this course, the student applies holistic concepts to the professional nursing care of the childbearing family including conception, prenatal, intrapartum, postpartum and newborn care. Content addresses health and complex alterations, reproduction and menopause, nutrition, therapeutic communication, ethical, legal, cultural and evidenced-based practice.

- NRSG 237 - Health and Illness of Maternal Nursing Clinical

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This clinical introduces the student to the role of the registered nurse in the care of the childbearing family. Students will utilize the nursing process to assess and develop individualized plans of care for mother and infant. Emphasis will be placed on patient education to promote healthy mother infant and childbearing family bonding.

- NRSG 244 - Adult Nursing II

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. This course builds upon previous knowledge of the nursing process and care of the patient experiencing acute and chronic disease alterations. Pathophysiologic processes are discussed as related to evidence-based nursing interventions. Students apply the nursing process, nutritional therapy, and pharmacological therapy utilizing interdisciplinary practice to promote, maintain, and restore health across the adult lifespan.

- NRSG 245 - Adult Nursing II Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this clinical experience the

student will provide care for individuals and families experiencing acute health alterations, and those associated with chronic disease processes. Students use the nursing process to systematically analyze information to plan and implement nursing interventions which are individualized and founded on evidence-based practice.

- NRSG 246 - Health and Illness of Child and Family Nursing

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this course, the student applies holistic concepts to the professional nursing care of children and their families in health, illness, end-of-life and palliative care.Emphasis is placed on incorporating growth and developmental principles to facilitate positive health outcomes through health promotion, nutrition and disease prevention.

- NRSG 247 - Health and Illness of Child and Family Nursing Clinical

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this clinical, students will utilize the nursing process, to provide nursing care of healthy and high-risk pediatric populations and their families experiencing disruptions in bio/psycho/social/cultural and spiritual needs. Emphasis is also placed on health promotion, health maintenance, and therapeutic communication.

- NRSG 250 - LPN to RN Transition

  Credits: 3. Offered autumn and spring. Prereq., admission to the registered nursing program and current unencumbered LPN license. Focus on the role transition from LPN to RN in relation to the concepts and principles of holistic nursing care. Focus is on the continuing development of roles and responsibilities of the RN as defined by the scope of practice standards, nursing theory and conceptual models.

- NRSG 254 - Mental Health Concepts

  Credits: 2 TO 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this course, the student focuses on the nursing concepts utilizing basic human needs, developmental theory, nursing process, therapeutic communication, and nursing interventions to promote and maintain health for clients and families experiencing mental-health issues. The student will examine client responses to stressors across the life span. Tasks of biological-behavioral concepts in psychosocial nursing care, rural and cultural impacts will be addressed.

- NRSG 255 - Mental Health Clinical

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. This clinical applies the knowledge of psychiatric and mental health nursing. Students will have mental health focused clinical experiences in a variety of settings.

- NRSG 256 - Pathophysiology

  Credits: 3. Offered spring and autumn. Prereq., successful acceptance into the Registered Nursing program. This course introduces the student to the basic principles and processes of pathophysiology including cellular communication, genes and genetic disease, forms of cellular injury, nutrition, fluid and electrolyte/acid base balance, immunity, stress coping and illness, and tumor biology. Pathophysiology of the most common alterations according to body systems will be discussed as well as the latest developments in research and patient-centered nursing interventions.

- NRSG 259 - Adult Nursing III

  Credits: 3. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This course expands on the nursing role in care of patients with complex health alterations. Students utilize evidence-based, interdisciplinary interventions to meet patient and family needs.

- NRSG 260 - Adult Nursing III Lab

  Credits: 1. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. In this lab students are introduced to basic electrocardiogram interpretation, advanced concepts of perfusion, ventilation and complex pharmacologic regimens.

- NRSG 261 - Adult Nursing III Clinical

  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This clinical experience

focuses on application of the nursing process and utilization of information to provide comprehensive nursing care to the acutely ill patient experiencing complex health alterations in a variety of settings. Emphasis is placed on prioritization of care and collaboration with other members of the interdisciplinary team to ensure optimal client care.

- NRSG 266 - Managed Client Care
  Credits: 2 TO 4. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. In this course students examine concepts of leadership and management emphasizing prioritization, delegation, and supervision of nursing care for patients across the lifespan. Topics also include communication techniques, legal and ethical issues, care of the culturally diverse patient, and utilizing change theory. Healthcare policy, finance, and regulatory environment issues are explored and applied to planning, collaborating and coordinating care across the continuum.
- NRSG 267 - Managing Client Care Clinical
  Credits: 2. Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This precepted clinical experience focuses on principles of nursing leadership and management in a variety of settings. Students apply knowledge to provide culturally competent, holistic interventions within the professional nursing role for individuals, communities, and families across the lifespan.
- NRSG 291 - Special Topics
  Credits: 1 TO 6. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- NRSG 292 - Independent Study
  Credits: 1 TO 6. (R-6) Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

Pharmacy Technology

Back to Top

- PHA 196 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently.

Pharmacy

Back to Top

- PHAR 100 - Intro Pharm Practice for Techs
  Credits: 3. Offered autumn. Prereq., admission into Pharmacy Technology program. This course offers information regarding careers in pharmacy. It includes the history of pharmacy practice and defines roles of personnel relating to pharmaceutical services. Ethical standards of the occupation and federal and state laws regulating pharmacy practice with emphasis on Montana State Pharmacy Law regulating pharmacy technicians are studied. Day-to-day operations including preparation, maintenance, and storage of pharmaceuticals and records, and basic concepts of computer operations and latest technologies are reviewed. Skills will be developed with are necessary for the pharmacy technician to communicate effectively in the following ways: 1) as a representative of the profession of pharmacy, 2) as an intermediary between the pharmacist and patient, and 3) as an intermediary between the pharmacist and other health care professionals.
- PHAR 101 - Pharmacy Calculations
  Credits: 3. Offered autumn. Calculations used in pharmacy practice; includes various systems of weights and measures, dosage determinations, percentage preparations, reducing and enlarging formulas, dilution, and concentration.
- PHAR 102 - Pharmacology for Technicians
  Credits: 6. Offered autumn. Prereq., admission into Pharmacy Technology program. Study of the properties, reactions, and therapeutic value of the primary agents in the major drug classes.
- PHAR 104 - Pharmacy Dispensing Lab
  Credits: 3. Offered autumn. Prereq., admission into Pharmacy Technology Program. Develop dispensing and distributive skills with hands-on lab, and lecture format.

- PHAR 120 - Medication Safety

  Credits: 3. Offered spring online only. Prereq., PHAR 100, 101, 102, 104 and second semester standing in Pharmacy Technology Program. This course will introduce students to national safety initiatives developed by the Institute of Medicine, The Joint Commission, The Institute of Safe Medicine Practices and others. This awareness will help students become part of the solution in promoting safe medication practices.

- PHAR 121 - Preparation for the PTCB Exam

  Credits: 1. Prereq., PHAR 100, PHAR 101, PHAR 102 and PHAR 104. This course will offer strategies in test taking, and help students refresh their knowledge in all knowledge areas included in the exam as identified by PTCB.

- PHAR 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- PHAR 198 - Internship: Pharmacy

  Credits: 4. Offered spring. Prereq., PHAR 100, 101, 102, 104 and second semester standing in Pharmacy Technology Program. Training and experience in either hospital, compounding, home infusion, nursing home or other alternative pharmacy settings under supervision of a pharmacist. Emphasizes special skills unique to that pharmacy setting. Course Attributes: Internships/Practicums

Practical Nursing A.A.S.

Dixie McLaughlin, Nursing Program Director

Note: This program will no longer accept applications. Students currently in the program will complete autumn 2016 and should follow the 2015-2016 academic catalog.

The Missoula College will teach out student currently enrolled in Associate of Applied Science degree (A.A.S.) in Practical Nursing (PN).

Students learn practical nursing skills through independent study, lectures, simulations, demonstrations, and practice in a nursing skills lab. Under instructor supervision, students also provide patient care in a variety of health care settings. The program is approved by the Montana State Board of Nursing (301 South Park, Helena, MT 59601).

Students must provide proof of having met the following requirements to the Nursing Program Administrative Associate on or before the first day of class:

1. Two step Tuberculosis testing using the PPD (Purified Protein Derivative) or chest x-ray (positive results will require a physician's letter before a student can continue in clinical settings);
2. Hepatitis B vaccine, (HBV, a three injection series that may be obtained at Curry Health Center and other health care providers). The Hepatitis B vaccine must be started on or before acceptance into the program so the three injections series is completed by the time clinical begins;
3. Measles, mumps and rubella (MMR) immunization (for those born before 1956, it is not required to have an MMR, but a titer must be completed);
4. Influenza Vaccination;
5. Varicellla (Chicken Pox) Vaccination;
6. BLS training for health care providers;
7. Proof of insurance;
8. Criminal Background Check

Many licensing bodies and employing institutions in health care have increasingly stringent requirements and background checks as conditions for licensing or employment. If a student has concerns about this, she/he should contact the licensing board for nursing at dlibsdnur@mt.gov.

Practical Nursing program graduates are eligible to write the National Council Licensing Examination (NCLEX) for Practical Nurses. Completion of the A.A.S. Practical Nursing Program does not guarantee a student licensure. This is a decision of the Montana State Board of Nursing.

After licensure, graduates typically find employment in hospitals, long term care facilities, physician offices and other health care agencies. They work under the supervision of a registered nurse, physician, dentist, osteopath or other health care provider as specified in the State of Montana Nurse Practice Act.

Associate of Applied Science - Practical Nursing

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 48

Required Cumulative GPA: 3.0

Note: A minimum cumulative GPA of 2.75, successful completion of pre-nursing courses within 2 attempts, and acceptance through an application process is needed for entrance into the Practical Nursing Program. Total credits for the AAS Practical Nursing degree are 44. This includes pre-nursing credits (26 credits) and AAS Practical Nursing credits (18 credits).

Pre-Nursing

Rule: All courses required.

Note: Minimum cumulative in Pre-Nursing course of 2.75. BIOH 201N, 202N, 211N, and 212N must be completed with a 'B'.
CHMY 121N, CHMY 122, BIOH 201N, BIOH 202N, BIOH 211N and BIOH 212N must be completed within 5 years of application.
Anatomy and Physiology I & II coursework, whether completed at the Missoula College or transferred from elsewhere, must have been completed within the 5 years immediately preceding application to any specific health professions program.

	Course	Credits
	BIOH 201N - Human Anat Phys I (equiv 301) Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. Required, integrated laboratory includes some dissection.	4 Credits
	BIOH 202N - Human Anat and Phys I Lab Offered autumn and spring. Coreq., BIOH 201. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. A cadaver lab is included.	4 Credits
	BIOH 211N - Human Anat Phys II (equiv 311) Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection.	4 Credits
	BIOH 212N - Human Anat Phys II Lab Offered autumn and spring. Prereq., BIOH 201N. Coreq., BIOH 211. Continuation of 201N. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. A cadaver lab is included.	4 Credits

	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 122 - Intro to Gen Chem Lab Offered autumn and spring. Prereq., Enrolled in the College of Technology ASRN program. Prereq. or coreq., CHMY 121N or equivalent. A laboratory course emphasizing inorganic chemistry, quantitative relations and synthesis of inorganic and organic compounds.	1 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	NRSG 100 - Introduction to Nursing Offered each semester. This online course is a prerequisite to the Practical Nursing program. Student will be presented with an introductory level of the core concepts of nursing practice and other issues such as the legal concerns and ethical/cultural issues that face professional nurses on a consistent basis.	1 Credits
	NUTR 221N - Basic Human Nutrition Offered autumn and spring. The principles of science as applied to current concepts and controversies in the field of human nutrition.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C		26 Total Credits Required

Mathematics Pre-Nursing Requirement

Rule: Must complete 1 of the following courses

Note: M 121 is the recommended math. Courses that substitute for M 121 College Algebra can be Probability and Linear Math, Pre-calculus with Algebra, or Pre-calculus with Trig , or Calculus.
Mathematics and Writing prerequisite coursework should have been completed no more than 10 years prior to application to any specific health professions program. If mathematics and writing prerequisite coursework is greater than 10 years old, the student should take the writing and mathematics placement exams administered

by the college (e-write and ALEX respectively). If the student places into a comparable level to the specific course in question then that course shall be accepted as a valid prerequisite for the intended program. If the student places below the required standard then they shall remediate as needed prior to application to any specific health professions program.

	Course	Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
Minimum Required Grade: C		3-4 Total Credits Required

Practical Nursing

Rule: All courses are required except as noted in the comments

Note: NRSG 147 Practical Nursing NCLEX Review is an elective course.

	Course	Credits
	NRSG 138 - Gerontology for Nursing Offered autumn and spring. Prereq: acceptance into the Practical Nursing Program. Introduces the student to the skills and knowledge needed to provide nursing care to aging clients. Topics explored include current trends (including legal and ethical issues) in gerontological nursing, developmental stages and transitions associated with aging, expected age-related physiological changes, and assessment findings, recognition and management of acute and chronic illness that commonly occur in the older adult population, promotion of health for the older adult client, end-of-life issues and care.	2 Credits

	NRSG 142 - Cre Cncpts of Mtrnl Chld Nrsng Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Information about fetal development and prenatal and postnatal care of the mother and newborn emphasizing caring, communication, professionalism, and critical thinking. Role of the nurse in meeting the needs of the family is emphasized. Clinical application of caring for the mother and newborn will allow the student to demonstrate acquired knowledge.	3 Credits
	NRSG 144 - Cre Cncpts of Mentl Hlth Nrsng Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Exploration of physiological, psychological, sociocultural, spiritual, and environmental factors associated with mental health/illness affecting individuals and families. Focus will be placed on basic concepts of psychiatric nursing, therapeutic modalities, as well as psychiatric disorders including psychopharmacological management.	2 Credits
	NRSG 147 - Practical Nursing NCLEX Review Offered autumn and spring. Prereq: Successful completion of all courses in the first semester of the practical nursing program. Preparation for the national test for LPN licensure.	2 Credits
	NRSG 148 - Leadership Issues Offered autumn and spring. Prereq: successful completion of semester 1 of the PN nursing program. Capstone course that provides the Practical Nursing student information regarding the current status of vocational nursing. There is a forty-five hour clinical/precepted component to provide the student opportunity to apply theoretical knowledge in the long-term care setting.	2 Credits
	NRSG 230 - Nursing Pharmacology Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides the student with an overview of pharmacology with an emphasis of the study of effects, interactions, and nursing considerations of pharmacologic agents on the client population across the lifespan. The course also explores the ethical, legal, cultural and age implications of pharmacologic therapy across diverse populations and the lifespan.	3 Credits
	NRSG 232 - Foundations of Nursing Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides opportunities to develop competencies necessary to meet the needs of individuals throughout the lifespan in a safe, legal, and ethical manner using the nursing process. Students learn concepts and skills necessary for maintaining standard precautions, physical, psychological and nutritional safety, along with skills needed in therapeutic interventions. Students are introduced to the concepts of professional nursing, patient needs, safety, communication, teaching/learning, critical thinking, ethical-legal, rural nursing, cultural and ethnic diversity, and interdisciplinary patient-centered care.	3 Credits

	NRSG 234 - Adult Nursing I Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This course builds upon the knowledge and skills acquired in Foundations of Nursing, and places them in the context of patient-centered care. Social, cultural, ethical, rural and legal issues, end-of-life and palliative care across diverse adult populations are introduced. Health promotion and prevention throughout the adult lifespan, with specific focus on the geriatric patient, is emphasized. Normal aging, health alterations associated with aging, and their implications are addressed.	3 Credits
Minimum Required Grade: B		18 Total Credits Required

Radiologic Technology A.A.S.

Anne Delaney, Program Director

A Radiologic Technologist (Radiographer) uses critical thinking and independent judgment to obtain diagnostic medical images while providing quality patient care and minimizing radiation exposure.

Technologists are employed in acute care settings, ambulatory care settings, physicians' offices, in education and in management or sales positions.

With additional education and training, radiographers may be employed in radiation therapy, computed tomography, mammography, magnetic resonance imaging, diagnostic medical ultrasound, nuclear medicine, special vascular imaging and cardiac catheterization.

The Radiologic Technology program is approved by the American Registry of Radiologic Technologists (ARRT) and accredited by the Northwest Association of Schools and Colleges. When all requirements for the associate degree are completed, the student will be eligible to take the national certification examination administered by the American Registry of Radiologic Technologists. Upon successful completion of this examination, the student becomes a Registered Radiologic Technologist, R.T. (R) ARRT.

Program Requirements

The Associate of Applied Science degree in Radiologic Technology requires students to successfully complete the Pre-Radiology prerequisite courses prior to applying to the program. Students admitted to the University of Montana may enroll in the Pre-Radiology prerequisite courses.

Students must pass BIOH 201N-202N with a minimum grade of 'B' and have a minimum cumulative GPA of 2.75 in all course work, including prerequisite courses, to apply to the Radiologic Technology program. A course may be attempted a maximum of two times. As some courses are offered Autumn or Spring semester only, it is important to obtain advising with the Program Director or Clinical Coordinator each semester prior to registration.

Application to the program is required Spring semester in the year prior to the Autumn semester program start. Students may apply while enrolled in the Pre-Radiology prerequisite courses with acceptance to the program to be determined after Spring grades are finalized. Students who apply twice to the program and are not accepted are strongly encouraged to contact Career Services for counseling toward another degree.

The program classes begin Autumn semester each year with the majority of classroom courses completed in the first two semesters. Clinical education will begin at the end of the second semester. A ten-week summer clinical rotation is required between the first and second years and consists of 40 hour per week of clinical instruction. The Autumn semester of the second year will also be didicatted to 40 hours per week of clinical instruction.

Students entering the program are required to rotate to clinical sites outside the Missoula area on a periodic basis. These rotations will take place during any term or session beginning the Summer semester of the program. These sites may include, but are not limited to, Ronan, Hamilton, Plains, Ronan, and Polson, Montana. Transportation and housing are the student's responsibility.

Associate of Applied Science - Radiologic Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 83

Required Cumulative GPA: 2.0

Note: It is preferred that students have the prerequisite core completed by the end of the semester in which they intend to apply to the program (i.e. applying to the program in the spring and completing the core by the end of that spring semester.) Students must also prove competence with computer technology prior to application to the Radiology Technology Program in one of the following three ways: a) Acceptable transfer credit for CAPP 120, b) Passing challenge exam for CAPP 120, or c) Take and pass CAPP 120

Radiologic Technology Prerequisite Courses

Rule: All courses required

Note: Students must pass BIOH 201N/202N with a minimum grade of 'B' and have a minimum cumulative GPA of 2.75 in all course work including prerequisite courses to apply to the Radiologic Technology program.

	Course	Credits
	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits
	BIOH 201N - Human Anat Phys I (equiv 301) Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. Required, integrated laboratory includes some dissection.	4 Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	SCN 175N - Integrated Physical Science I Offered every term. An introduction to the basic principles of physics, chemistry, and nuclear reactions with emphasis on the scientific method and process. A knowledge of basic algebraic functions, decimals, and scientific notation is recommended. Suitable for students with little science background.	3 Credits
Minimum Required Grade: C-		13 Total Credits Required

Math Requirement

Rule: Take either

	Course	Credits

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Writing Requirement

Rule: Take either

	Course	**Credits**
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Radiologic Technology Courses

Rule: All courses required

Note: These courses cannot be taken unless accepted into the program through the application process.
AHXR 195 represents spring at 8 credits and summer at 12 credits.
AHXR 295 is taken Fall at 8 credits and second year spring at 9 credits.
For AHXR courses the minimum grade is a B.

	Course	Credits
	AHMS 270E - Medical Ethics Offered every term. Ethical decision-making tools for addressing common ethical issues in the health professions.	3 Credits
	AHXR 100 - Intro to Diagnostic Imaging Offered fall. Introduction to the field of radiology and its mix of technical equipment, lab work, hospital environment, patient care and team work.	3 Credits
	AHXR 121 - Radiographic Imaging I Offered autumn. Introduction to fundamental physics principles underlying radiology and diagnostic x-ray production. Topics include electromagnetic waves, electricity and magnetism, electrical energy, and power and circuits as they relate to radiography. Factors of image quality and exposure methods: density, contrast, recorded detail, distortion, technique charts, manual and automatic exposure control, and tube rating charts.	4 Credits
	AHXR 140 - Radiographic Methods Offered autumn. Knowledge and skills necessary for quality patient care during standard and specialty radiographic procedures.	3 Credits
	AHXR 141 - Radiology Lab Co-Requisite AHXR 140 Radiological Methods. Students will practice all patient positioning skills necessary for competency as Radiologic Technologists.	1 Credits
	AHXR 195 - Radiographic Clinical: I (R-20) Offered over two semesters throughout the Radiology Technology program, beginning Spring semester. Students will begin with an introduction to patient management and basic radiographic procedures. The final semester offers opportunities in advanced patient management skills and experience with highly skilled radiographic procedures. Each semester builds on the previous semester, always emphasizing the principles of ALARA.	1 To 14 Credits
	AHXR 221 - Radiographic Imaging II Offered spring. Offers students more technical and detailed information on the use of image receptor systems, processing principles, advanced digital imaging systems and imaging modalities used in radiology.	3 Credits
	AHXR 225 - Radiobiology/Radiation Protctn Offered spring. Principles of radiation protection and radio biology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and personnel, and radiation monitoring devices.	2 Credits
	AHXR 240 - Radiological Methods II Offered spring. Coreq., AHXR 241. Preparation in the procedures associated with radiology in standard radiographic environments.	2 Credits

	AHXR 241 - Radiology Lab II Offered spring. Prereq., BIOH 201N, 202N, and 211N, coreq., AHXR 240. Students will practice all patient positioning skills necessary for competency as Radiologic Technologists.	1 Credits
	AHXR 270 - Radiographic Registry Review Offered spring. An overview of imaging concepts as a review for the national certification test. Topics include a systematic approach for image evaluation, patient care, radiation protection and the physics of radiographic imaging.	2 Credits
	AHXR 295 - Radiographic Clinical: I (R-20) Offered over two semesters throughout the Radiology Technology program, beginning Spring semester. Students will begin with an introduction to patient management and basic radiographic procedures. The final semester offers opportunities in advanced patient management skills and experience with highly skilled radiographic procedures. Each semester builds on the previous semester, always emphasizing the principles of ALARA.	12 To 24 Credits
	BIOH 211N - Human Anat Phys II (equiv 311) Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection.	4 Credits
	BIOH 212N - Human Anat Phys II Lab Offered autumn and spring. Prereq., BIOH 201N. Coreq., BIOH 211. Continuation of 201N. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. A cadaver lab is included.	4 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
Minimum Required Grade: C-		83 Total Credits Required

Registered Nursing

Dixie McLaughlin, Nursing Program Director

The Associate of Science in Nursing (A.S.N.) requires four semesters of full-time study. Applicants to the program must have completed all pre-nursing courses, have a cumulative GPA of at least 2.75 (all courses taken post high school), and have received a B or better in BIOH 201/202 and BIOH 211/212.

Admission to the program requires completion of the application which can be obtained on the Missoula College Health Professions webpage. The number of students accepted into the A.S.N. stand-alone program is limited to 18 students in Spring 2017. Of the 18 students accepted for Spring 2017, 10 are in the on-campus face-to-face program and 8 are part of the hybrid program. All candidates who meet the admission requirements will be considered. Students learn Registered Nursing skills through independent study, lectures, simulations, demonstrations, and advanced skills practice in the nursing lab. Under instructor supervision and preceptorship, students also provide patient care in a variety of acute care settings.

The A.S.N. degree program is approved by the State Board of Nursing (301 South Park, Helena, MT 59601). The program is accredited by the Accreditation Commission for the Education in Nursing (ACEN) (3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326).

Students must provide proof of having met the following requirements to the Nursing Program Administrative Associate on or before the first day of class:

1. Two step Tuberculosis testing using the PPD (Purified Protein Derivative) or chest x-ray (positive results will require a physician's letter before a student can continue in clinical settings);
2. Hepatitis B vaccine and titer: The three injection Hepatitis B series must be started on or before acceptance into the program so the series is completed by the time clinical begins;
3. Measles, mumps, and rubella (MMR) immunization (for those born before 1956, it is not required to have an MMR, but a titer must be completed);
4. Influenza Vaccination;
5. Varicella (Chicken Pox) Vaccination;
6. Basic Life Support (BLS) training Healthcare Provider;
7. Criminal Background Check, including Sexual Offender Registery

Many licensing bodies and employing institutions in health care have increasingly stringent requirements and background checks as conditions for licensing or employment. If a student has concerns about this, she/he should contact the licensing board for nursing.

Associate of Science - Registered Nursing

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 72

Required Cumulative GPA: 2.0

Note: Students must pass all NRSG courses with a minimum grade of a B. It is highly recommended that students have completed BIOH 211/212, SOCI 101, BIOM 250, and BIOM 251 prior to admission to the program.

Registered Nursing

Rule: All courses required

Note: Students must pass all nursing (rubric NRSG) courses with a minimum grade of a B.

	Course	Credits
	BIOH 201N - Human Anat Phys I (equiv 301) Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. Required, integrated laboratory includes some dissection.	4 Credits

	BIOH 211N - Human Anat Phys II (equiv 311) Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection.	4 Credits
	BIOM 250N - Microbiology for Hlth Sciences Offered spring. Infectious diseases, including concepts of virulence, resistance, prevention and control of microbial diseases in the individual and in the community. If laboratory experience is desired, the student may enroll concurrently in BIOM 251. Credit not allowed toward a major in microbiology.	3 Credits
	BIOM 251 - Microbiology Hlth Sciences Lab Offered spring. Prereq. or coreq., BIOM 250N. Observation of live microorganisms, their characteristics and activities. Experience with microbiological techniques. Credit not allowed toward a major in microbiology.	1 Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 122 - Intro to Gen Chem Lab Offered autumn and spring. Prereq., Enrolled in the College of Technology ASRN program. Prereq. or coreq., CHMY 121N or equivalent. A laboratory course emphasizing inorganic chemistry, quantitative relations and synthesis of inorganic and organic compounds.	1 Credits
	NRSG 230 - Nursing Pharmacology Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides the student with an overview of pharmacology with an emphasis of the study of effects, interactions, and nursing considerations of pharmacologic agents on the client population across the lifespan. The course also explores the ethical, legal, cultural and age implications of pharmacologic therapy across diverse populations and the lifespan.	3 Credits
	NRSG 231 - Nursing Pharmacology Lab Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. An integration of lab experiences focusing on the basic principles in providing safe medication administration, including intravenous therapy across diverse populations and the lifespan.	2 Credits

	NRSG 232 - Foundations of Nursing Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. This course provides opportunities to develop competencies necessary to meet the needs of individuals throughout the lifespan in a safe, legal, and ethical manner using the nursing process. Students learn concepts and skills necessary for maintaining standard precautions, physical, psychological and nutritional safety, along with skills needed in therapeutic interventions. Students are introduced to the concepts of professional nursing, patient needs, safety, communication, teaching/learning, critical thinking, ethical-legal, rural nursing, cultural and ethnic diversity, and interdisciplinary patient-centered care.	3 Credits
	NRSG 233 - Foundations of Nursing Lab Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program. An integration of lab experiences focusing on psychomotor nursing skills needed to assist individuals in meeting basic human needs. Application of the nursing process and hands-on learning experiences for nursing skills, patient assessments, nutritional safety, and basic therapeutic skills are practiced and demonstrated.	3 Credits
	NRSG 234 - Adult Nursing I Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This course builds upon the knowledge and skills acquired in Foundations of Nursing, and places them in the context of patient-centered care. Social, cultural, ethical, rural and legal issues, end-of-life and palliative care across diverse adult populations are introduced. Health promotion and prevention throughout the adult lifespan, with specific focus on the geriatric patient, is emphasized. Normal aging, health alterations associated with aging, and their implications are addressed.	3 Credits
	NRSG 235 - Adult Nursing I Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This clinical introduces the student to nursing practice in care of the stable adult patient. This includes care of the adult in a variety of health care settings. Students utilize the nursing process to develop individualized plans of care to prevent illness, promote wellness and maintain or restore health based on patient needs and evidence based practice.	2 Credits
	NRSG 236 - Maternal Nursing Offered autumn and spring. Prere., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. In this course, the student applies holistic concepts to the professional nursing care of the childbearing family including conception, prenatal, intrapartum, postpartum and newborn care. Content addresses health and complex alterations, reproduction and menopause, nutrition, therapeutic communication, ethical, legal, cultural and evidenced-based practice.	2 Credits

	NRSG 237 - Maternal Nursing Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester 1 of the RN program. This clinical introduces the student to the role of the registered nurse in the care of the childbearing family. Students will utilize the nursing process to assess and develop individualized plans of care for mother and infant. Emphasis will be placed on patient education to promote healthy mother infant and childbearing family bonding.	1 Credits
	NRSG 244 - Adult Nursing II Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. This course builds upon previous knowledge of the nursing process and care of the patient experiencing acute and chronic disease alterations. Pathophysiologic processes are discussed as related to evidence-based nursing interventions. Students apply the nursing process, nutritional therapy, and pharmacological therapy utilizing interdisciplinary practice to promote, maintain, and restore health across the adult lifespan.	3 Credits
	NRSG 245 - Adult Nursing II Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this clinical experience the student will provide care for individuals and families experiencing acute health alterations, and those associated with chronic disease processes. Students use the nursing process to systematically analyze information to plan and implement nursing interventions which are individualized and founded on evidence-based practice.	2 Credits
	NRSG 246 - Child and Family Nursing Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this course, the student applies holistic concepts to the professional nursing care of children and their families in health, illness, end-of-life and palliative care.Emphasis is placed on incorporating growth and developmental principles to facilitate positive health outcomes through health promotion, nutrition and disease prevention.	2 Credits
	NRSG 247 - Child/Family Nursing Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this clinical, students will utilize the nursing process, to provide nursing care of healthy and high-risk pediatric populations and their families experiencing disruptions in bio/psycho/social/cultural and spiritual needs. Emphasis is also placed on health promotion, health maintenance, and therapeutic communication.	1 Credits

	NRSG 254 - Mental Health Concepts Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. In this course, the student focuses on the nursing concepts utilizing basic human needs, developmental theory, nursing process, therapeutic communication, and nursing interventions to promote and maintain health for clients and families experiencing mental-health issues. The student will examine client responses to stressors across the life span. Tasks of biological-behavioral concepts in psychosocial nursing care, rural and cultural impacts will be addressed.	2 To 3 Credits
	NRSG 255 - Mental Health Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I and II of the RN program. This clinical applies the knowledge of psychiatric and mental health nursing. Students will have mental health focused clinical experiences in a variety of settings.	1 Credits
	NRSG 256 - Pathophysiology Offered spring and autumn. Prereq., successful acceptance into the Registered Nursing program. This course introduces the student to the basic principles and processes of pathophysiology including cellular communication, genes and genetic disease, forms of cellular injury, nutrition, fluid and electrolyte/acid base balance, immunity, stress coping and illness, and tumor biology. Pathophysiology of the most common alterations according to body systems will be discussed as well as the latest developments in research and patient-centered nursing interventions.	3 Credits
	NRSG 259 - Adult Nursing III Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This course expands on the nursing role in care of patients with complex health alterations. Students utilize evidence-based, interdisciplinary interventions to meet patient and family needs.	3 Credits
	NRSG 260 - Adult Nursing III Lab Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. In this lab students are introduced to basic electrocardiogram interpretation, advanced concepts of perfusion, ventilation and complex pharmacologic regimens.	1 Credits
	NRSG 261 - Adult Nursing III Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This clinical experience focuses on application of the nursing process and utilization of information to provide comprehensive nursing care to the acutely ill patient experiencing complex health alterations in a variety of settings. Emphasis is placed on prioritization of care and collaboration with other members of the interdisciplinary team to ensure optimal client care.	2 Credits

	NRSG 266 - Managed Client Care Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. In this course students examine concepts of leadership and management emphasizing prioritization, delegation, and supervision of nursing care for patients across the lifespan. Topics also include communication techniques, legal and ethical issues, care of the culturally diverse patient, and utilizing change theory. Healthcare policy, finance, and regulatory environment issues are explored and applied to planning, collaborating and coordinating care across the continuum.	2 To 4 Credits
	NRSG 267 - Managing Client Care Clinical Offered autumn and spring. Prereq., acceptance into the Registered Nursing Program and successful completion of semester I, II and III of the RN program. This precepted clinical experience focuses on principles of nursing leadership and management in a variety of settings. Students apply knowledge to provide culturally competent, holistic interventions within the professional nursing role for individuals, communities, and families across the lifespan.	2 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits
Minimum Required Grade: C-		66 Total Credits Required

Writing Requirement

Rule: All courses required

Note: Students who have completed WRIT 101, College Writing greater than ten years prior to applying to the Missoula College must take the Writing Placement test. If the score on the test places the student in WRIT 101, the transfer credits will be accepted for the nursing program requirements. If the student places below the required standard, then they shall remediate as needed prior to application to the nursing program.
All students need to take WRIT 101 for the nursing program

	Course	**Credits**

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Mathematics Requirement

Rule: Must complete one of the following courses

Note: M 121 is the recommended math. Courses that substitute for M 121 College Algebra can be Probability and Linear Math, Pre-calculus with Algebra, or Pre-calculus with Trig , or Calculus. Mathematics and Writing prerequisite coursework should have been completed no more than 10 years prior to application to any specific health professions program. If mathematics and writing prerequisite coursework is greater than 10 years old, the student should take the writing and mathematics placement exams administered by the college (e-write and ALEX respectively). If the student places into a comparable level to the specific course in question then that course shall be accepted as a valid prerequisite for the intended program. If the student places below the required standard then they shall remediate as needed prior to application to the nursing program.

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits

	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Respiratory Care A.A.S.

Nicholas Arthur, Program Director

Respiratory Care is an allied health specialty. It is an important part of modern medicine and health care. Respiratory Care encompasses the care of patients with respiratory problems in the hospital, clinic, and home.

Respiratory therapists, as members of a team of health care professionals, work to evaluate, treat, and manage patients of all ages with respiratory illnesses and other cardiopulmonary disorders in a wide variety of clinical settings. Respiratory therapists must behave in a manner consistent with the standards and ethics of all health care professionals. In addition to performing respiratory care procedures, respiratory therapists are involved in clinical decision-making (such as patient evaluation, treatment selection, and assessment of treatment efficacy) and patient education. The scope of practice for respiratory therapist includes, but is not limited to:

- acquiring and evaluating clinical data;
- assessing the cardiopulmonary status of patients;
- performing and assisting in the performance of prescribed diagnostic studies, such as drawing blood samples, performing blood gas analysis, pulmonary function testing, and applying adequate recording electrodes using polysomnographic techniques;
- utilizing data to assess the appropriateness of prescribed respiratory care;
- establishing therapeutic goals for patients with cardiopulmonary disease;
- participating in the development and modification of respiratory care plans;
- case management of patients with cardiopulmonary and related diseases;
- initiating ordered respiratory care, evaluating and monitoring patients' responses to such care, modifying the prescribed respiratory therapy and cardiopulmonary procedures, and life support endeavors to achieve desired therapeutic objectives;
- initiating and conducting prescribed pulmonary rehabilitation;
- providing patient, family, and community education;
- promoting cardiopulmonary wellness, disease prevention, and disease management;
- participating in life support activities as required; and
- promoting evidence-based medicine, research, and clinical practice guidelines.

Starting salaries are excellent with premiums paid for evening, night, and weekend shifts. Jobs are plentiful throughout the United States. Graduates are eligible to take the credentialing examinations administered by the National Board for Respiratory Care (NBRC) which lead to the Registered Respiratory Therapist (RRT) credential. Licensure requirements in the state of Montana also are met by successful completion of the NBRC Entry Level (CRT) examination.

The goal of the program is, "To prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) domains of respiratory care practice as performed by registered respiratory therapists (RRTs)" CoARC standard 3.01.

The program is 4 ½ semesters in length which includes the AA prerequisite courses and a summer session. The Respiratory Care Program at The University of Montana Missoula College, is accredited by the Commission on Accreditation for Respiratory Care (www.coarc.com), 1248 Harwood Road, Bedford, Texas 76021-4244. Graduates receive the degree of Associate of Applied Science in Respiratory Care.

Students accepted to the program are required to rotate to clinical sites outside the Missoula area on a periodic basis. These rotations take place during the spring semester, summer session and autumn semester of the second year. These sites may include, but are not limited to: Kalispell, Ronan, Polson, Butte, Billings, Bozeman, Hamilton, Helena, Coeur d'Alene and Lewiston, Idaho and Spokane, Washington. Transportation and housing are the student's responsibility.

Associate of Applied Science - Respiratory Care

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 72

Required Cumulative GPA: 2.0

Note: It is preferred that students have the prerequisite core completed by the end of the semester in which they intend to apply to the program (i.e. applying to the program in the spring and completing the core by the end of that spring semester.) However, those students who anticipate completing the core by the end of the summer semester are still encouraged to apply in the spring and may be granted provisional acceptance. Computer competency must be demonstrated by taking CAPP 120 or may be challenged by testing out.

Pre- Respiratory Care Prerequisite Courses

Rule: All courses required

Note: Must have completed or be in the process of completing when applying to the program. A minimum GPA of 2.75 for prerequisite courses is required in order to apply to the program.

	Course	Credits
	BIOH 201N - Human Anat Phys I (equiv 301) Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. Required, integrated laboratory includes some dissection.	4 Credits
	BIOH 202N - Human Anat and Phys I Lab Offered autumn and spring. Coreq., BIOH 201. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. A cadaver lab is included.	4 Credits
	BIOH 211N - Human Anat Phys II (equiv 311) Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection.	4 Credits
	BIOH 212N - Human Anat Phys II Lab Offered autumn and spring. Prereq., BIOH 201N. Coreq., BIOH 211. Continuation of 201N. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. A cadaver lab is included.	4 Credits

	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	SCN 175N - Integrated Physical Science I Offered every term. An introduction to the basic principles of physics, chemistry, and nuclear reactions with emphasis on the scientific method and process. A knowledge of basic algebraic functions, decimals, and scientific notation is recommended. Suitable for students with little science background.	3 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		20 Total Credits Required

Respiratory Care Courses

Rule: All courses required

	Course	**Credits**
	AHRC 101 - Communication Management Offered autumn. Prereq., Acceptance into Respiratory Care Program. Study of respiratory care departmental organization and administration procedures, effective communication strategies, and legal and ethical issues for the Respiratory care professional.	1 Credits
	AHRC 115 - Blood Gas Analysis Offered autumn. Prereq., acceptance into the Respiratory Care program. Study of the indications, rational, methods, instrumentation, and analysis of Blood Gases. Emphasis will be placed on the physiology and clinical implications of acid-base abnormalities.	2 Credits

	AHRC 129 - Patient Care & Assessment Offered autumn. Prereq., BIOH 201N-202N. Introduction to nursing- related knowledge and skills with emphasis on application of microbiology to aseptic technique. Assessment of the respiratory system with cardiopulmonary diagnostic and laboratory tests interpretation. Observation and interpretation of overall patient condition is integrated throughout the course.	4 Credits
	AHRC 130 - Respiratory Care Lab IB Offered autumn. Prereq., acceptance into the Respiratory Care program. Basic clinical competencies taught in RES 129 are studied in a laboratory setting. Peer and instructor review of competencies included. Students focus on patient assessment skills and techniques/equipment.	1 Credits
	AHRC 131 - Resp Care Fundamentals Offered autumn. Prereq., acceptance into the Respiratory Care program. Orientation to basic respiratory care science including the application of principles of physics and chemistry. Emphasis on theory, operation and troubleshooting of equipment used at the entry level of practice. Microbiology in relation to equipment processing, pulmonary rehabilitation and home care included.	5 Credits
	AHRC 133 - Resp Care Pharmacology Offered spring. Prereq., acceptance into the Respiratory Care Program or consent of instr. Principles of basic chemistry introduced with an application to pharmacology as related to the pulmonary system. Cardiovascular and related pharmacology studied in preparation for ACLS and ventilator management.	3 Credits
	AHRC 150 - Respiratory Care Lab I Offered autumn. Prereq., acceptance into the Respiratory Care program. Basic clinical competencies taught in RES 131 are studied in a laboratory setting. Peer and instructor review of competencies included. Students earn their BLS certification.	1 Credits
	AHRC 231 - Resp Crit Care Offered spring. Prereq., RES 120, 129, 131, 133, 150. Continuation of RES 131. Physiology, indication, contraindications, and application of mechanical ventilation. Emphasis on patient assessment, monitoring, stabilization and weaning during assisted pressure breathing. Analysis of the various modes of ventilation, including optimizing the patient-ventilator interface in the adult through various advanced airway techniques.	4 Credits
	AHRC 232 - Resp Path & Disease Offered spring. Prereq., RES 120, 129, 131, 133, 150. Special lectures in medicine and disease as related to the cardiopulmonary system. Emphasis on recognition of signs and symptoms of disease and implications for treatment through the study of selected case studies.	3 Credits
	AHRC 235 - Cardiopulm Anat & Phys Offered spring. Prereq., RES 120, 129, 131, 133, 150 or consent of instr. Principles of physiologic chemistry are introduced and applied to the macro and micro anatomy of the cardiopulmonary system with a focus on structure and function. Application made to pathology and assessment of patients receiving mechanical ventilation.	3 Credits
	AHRC 243 - Perinat & Pediat Res Care Offered autumn. Prereq., RES 260, 265. Study of perinatal and pediatric respiratory care with emphasis on assessment, resuscitation and mechanical ventilation of the neonate and pediatric patient. The theory of Neonatal Resuscitations (NRP) will be presented. Neonatal and pediatric diseases will be studied.	3 Credits

	AHRC 250 - Respiratory Care Lab II Offered spring. Prereq., RES 120, 129, 131, 133, 150. A continuation of RES 150 with emphasis on adult critical care. Clinical competencies taught in RES 231 and RES 235 are studied in a laboratory setting. Peer and instructor review of competencies included.	2 Credits
	AHRC 252 - Respiratory Care Review Offered autumn. Prereq., RES 260, 265. A review of respiratory care in preparation for credentialing exams. Students must take an Entry Level Self-Assessment Exam, a Written Registry Self- Assessment Exam, and a Clinical Simulation Self-Assessment Exam.	2 Credits
	AHRC 255 - Clinical Experience I Offered spring. Prereq., RES 120, 129, 131, 133, 150. Emphasis on the student directly performing basic clinical skills in a patient care setting to include hospitals, home care, and pulmonary function laboratories. Students also participate in physician rounds.	5 Credits
	AHRC 260 - Resp Care Lab III Offered summer. Prereq., RES 231, 232, 235, 250, 255. Students study principles and theory of advanced life support. Peer and instructor review are included. Students will be Advanced Cardiac Life Support (ACLS) and Pediatric Advance Life Support (PALS) certified at the end of this class.	1 Credits
	AHRC 265 - Clinical Experience II Offered summer. Prereq., RES 231, 232, 235, 250, 255. Continuation of clinical skills learned in RES 255. Introduction to adult critical care along with sleep and cardiac diagnostics. Students also participate in physician rounds.	5 Credits
	AHRC 270 - Resp Care Lab IV Offered autumn. Prereq., RES 260, 265. Emphasis on neonatal and pediatric critical care. Clinical competencies introduced in RES 241 are studied. Peer and instructor review of competencies are included.	1 Credits
	AHRC 275 - Clinical Exp III Offered autumn. Prereq., RES 260, 265, 270. Continuation of RES 265 with critical care of the adult. Neonatal and pediatric critical care experiences are emphasized. Students also participate in physician rounds.	6 Credits
Minimum Required Grade: B-		52 Total Credits Required

Surgical Technology A.A.S.

Debbie Fillmore, Program Director

Students in the program are educated to be Surgical Technologists who work as part of the surgical team to ensure the operative procedure is conducted under optimal conditions. The ST is responsible for three phases (preoperative, intraoperative, and postoperative) of patient care with minimal direction. All surgical team members must adhere to the principles of asepsis and the practice of sterile technique. The ST normally functions in a sterile capacity by passing instruments, equipment and supplies to the surgeon during the surgical procedure but may also perform many non-sterile duties throughout the workday.

Students admitted to the University of Montana enter as Associate of Arts (AA) General Studies majors with an emphasis in the program of their choice. Students must select the specific prerequisite courses required for their chosen area of study after meeting with the program advisor. Students must apply to the program by October 1. Students may apply while enrolled in the A.A. prerequisite courses with acceptance to the

program to be determined after the Autumn semester grades are finalized. BIOH 201N/202N, Anatomy and Physiology I, and lab, must be passed with a grade of B (3.0) and be a face-to-face course. The program-specific courses begin spring semester.

Once accepted to the program, a student must complete each Surgical Technology-specific course (those courses with an AHST with a minimum grade of 'C' (80%) in order to continue in the ST program. Course grading scales may vary. If a student does not pass the required courses, he/she will not be able to continue in the program and will need to apply for readmission. If a student is re-admitted, he/she will be required to complete skills labs, AHST 115 and AHST 215, to ensure sterile technique skills are acceptable for patient care. A student may take any required course a maximum of two (2) times. A student may apply to the program a maximum of two (2) times.

A student will become a member of the Association of Surgical Technologists (www.ast.org) during the first year in the program. A student anticipating program completion will write the National Certification Exam prior to graduation. A student who successfully completes the ST program is awarded an A.A.S. degree in Surgical Technology. The credential of Certified Surgical Technologist (CST) will be awarded to a student upon passing the National Certification Exam and graduation from the ST program. The credential of Certified is awarded by the National Board of Surgical Technology and Surgical Assisting (NBSTSA).

Students are required to rotate sites during the clinical portion of their education. During the last semester of the program, internships may be outside the Missoula area. Transportation and housing are the student's responsibility. Prior to entering a healthcare facility for clinical experiences, a student will be required to submit a background check. Many healthcare facilities have increasingly stringent requirements. A student could be refused entry into a clinical facility based on information disclosed in a background check. If this is a concern for you, please consult the Program Director. If a student is denied agency access based on the Background Check, there will be no placement at an alternate site, and the subsequent inability of the student to complete the clinical education will result in inability to continue in the Surgical Technology program.

The University of Montana Missoula College Surgical Technology Program also has Outreach campuses in Butte and Billings. The Butte site is the Montana Tech of The University of Montana Highlands College campus in collaboration with St James Healthcare. The Billings site is the Montana State University-Billings City College campus in collaboration with St Vincent Healthcare and Billings Clinic. Students at those sites take the equivalent prerequisite courses on their respective campuses. The Surgical Technology-specific courses begin spring semester. Students must apply to the ST program by October 1. Students may apply while enrolled in the prerequisite courses with acceptance to the program to be determined after fall grades are finalized. The classroom portion of the ST program curriculum is delivered in web-based format using the Moodle course delivery system from the Missoula campus. Lab and clinical courses are conducted on each Outreach campus. Outreach students are required to travel to Missoula to write the National Certification Exam and to participate in Commencement exercises. Prospective students may contact the Health Professions' Office at 406-243-7868 for more information regarding the ST Program on the Butte and Billings campuses. Please refer to the specific course catalogs on the Butte and Billings campuses for prerequisite requirements.

The ST program is accredited by the Committee on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park St., Clearwater, FL 33756; phone 727-210-2350, www.caahep.org.

Associate of Applied Science - Surgical Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 68

Required Cumulative GPA: 2.0

Note: It is preferred that students have the prerequisite core completed by the end of the semester in which they intend to apply to the program (i.e. applying to the program in the fall semester and completing the core by the end of that fall semester.) CAPP 120 may be challenged by testing out. WRIT 101 or WRIT 121 only one is required. BIOM 250 and AHMS 270E may be taken prior to applying.

Surgical Technology Prerequisite Courses

Rule: All courses required

Note: WRIT 101 College Writing can be taken instead of WRIT 121 Intro to Technical Writing; BIOH 201N/202N must be passed with a minimum of a B

	Course	Credits

	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits
	BIOH 201N - Human Anat Phys I (equiv 301) Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. Required, integrated laboratory includes some dissection.	4 Credits
	BIOH 202N - Human Anat and Phys I Lab Offered autumn and spring. Coreq., BIOH 201. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. A cadaver lab is included.	4 Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	M 105 - Contemporary Mathematics Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An introduction to mathematical ideas and their impact on society. Intended for students wishing to satisfy the general education mathematics requirement.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C-		20 Total Credits Required

Surgical Technology Courses

Rule: All courses required

	Course	**Credits**

	AHMS 270E - Medical Ethics Offered every term. Ethical decision-making tools for addressing common ethical issues in the health professions.	3 Credits
	AHST 101 - Introduction to Surgical Techn Offered spring. Prereq., admission to the program. Provides an orientation to the scrub and circulatory roles of the surgical technologist in the preoperative, intraoperative and postoperative periods. Entry level skills and theories are emphasized.	3 Credits
	AHST 115 - Surgical Lab I Offered spring. Prereq., admission to the program. Demonstration of sterile technique in the campus lab, various skills and their application in the operating room.	2 Credits
	AHST 154 - Surgical Pharmacology Offered spring. Prereq., admission to the program, M 090. Basic overview of the medications that are commonly used before, during and after a surgical procedure.	3 Credits
	AHST 200 - Operating Room Techniques Offered autumn. Prereq., completion of all second semester courses. Focus on the scrub and circulator roles of the surgical technologist in the preoperative, intraoperative, and postoperative periods. More complex skills and theories; impact of new technologies in the 21 century st operating room.	5 Credits
	AHST 201 - Surgical Procedures I Offered autumn. Prereq., completion of all second semester courses. A study of surgical procedures following the patient through the preoperative, intraoperative, and post-operative stages of specific surgical specialties.	4 Credits
	AHST 215 - Surgical Lab II Offered spring. Demonstration of more complex skills in the campus lab, including assistant circulating, and their application in the operating room.	2 Credits
	AHST 250 - Surgical Clinical I Offered autumn. Prereq., completion of all second semester courses and successful completion of AHST 215. Perioperative experience in the minor surgical procedure role through a supervised clinical hospital rotation.	4 Credits
	AHST 251 - Surgical Clinical II Offered spring. Prereq., completion of all third semester courses. Perioperative experience in the major surgical procedure role through a supervised clinical hospital rotation.	5 Credits
	AHST 298 - Surgical Internship Offered spring. Prereq., successful completion of AHST 202, 251T. Capstone experience in the perioperative role in preparation for initial employment, increasing occupational awareness and professionalism. Students take call for emergency surgeries alongside experienced hospital staff.	5 Credits

	BIOH 211N - Human Anat Phys II (equiv 311) Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection.	4 Credits
	BIOH 212N - Human Anat Phys II Lab Offered autumn and spring. Prereq., BIOH 201N. Coreq., BIOH 211. Continuation of 201N. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. A cadaver lab is included.	4 Credits
	BIOM 250N - Microbiology for Hlth Sciences Offered spring. Infectious diseases, including concepts of virulence, resistance, prevention and control of microbial diseases in the individual and in the community. If laboratory experience is desired, the student may enroll concurrently in BIOM 251. Credit not allowed toward a major in microbiology.	3 Credits
Minimum Required Grade: C		48 Total Credits Required

Pharmacy Technology Certificate

Mary McHugh, Program Director

The American Society of Health System Pharmacists/Accreditation Council of Pharmacy Education (ASHP/ACPE) - accredited Pharmacy Technology Program at the University of Montana-Missoula College prepares students to function in hospital-based pharmacies, community pharmacies, and a number of other types of pharmacies. The two-semester program includes classroom, lab, and experiential learning opportunities. Lab and experiential hours allow students to integrate their classroom knowledge into the practical setting. Students are required to rotate to experiential sites and some may be outside the Missoula area. Transportation and housing are the student's responsibility.

The Pharmacy Technology Program is an autumn entry program. Applicants to the Pharmacy Technology program must complete the program specific application packet which can be obtained on the UM Missoula College Pharmacy Technology webpage. Please note that application deadlines are also found on the program webpage. Generally, applications to the program are due April 1 during the spring semester prior to the autumn semester program start. Documentation of required math and writing assessments must be included in the application packet. Transcripts are not accepted in place of the assessments. Students should place in Level 3 or higher in the ALEKS Math Assessment, and should attain a 7 or better on the E-Write Assessment, or provide alternate assessment scores as instructed in the application packet. Students who do not score high enough on assessments should consult with an advisor to arrange enrollment in the necessary courses to build their skills. Students must either complete Intro to Computers (CAPP 120) or pass the challenge for CAPP 120 prior to enrollment in the Pharmacy Technology Program. The challenge is offered several times each year. Instructions for scheduling the challenge and assessments are found in the application on the program website.

Once accepted into the program, all students are expected to register with the State of Montana as Pharmacy Technicians in Training. Please note the requirements of registration as a Pharmacy Technician in Training found on the application form on the Montana State Board of Pharmacy website:http://bsd.dli.mt.gov/license/bsd_boards/pha_board/pdf/pha_tech.pdf

Students must complete the required autumn PHAR classes with a C or higher to proceed to the spring semester. If a student does not pass the required courses with a C or better, he/she will not be able to continue in the program and will need to apply for readmission. A student may take any required course a maximum of two (2) times.

After successfully completing the program, students are awarded a Certificate of Applied Science and are well prepared for and encouraged to sit for the national technician certification examination such as offered through the Pharmacy Technician Certification Board (PTCB). Some students may be prepared to take the PTCE as early

as December of the first semester of the program, so that they may complete their experiential training as certified Pharmacy Technicians rather than Certified Technicians in Training.

Conviction of a crime (misdemeanor or felony) could leave an individual ineligible for participation in the certifying test and/or becoming registered in Montana as a certified pharmacy technician. Background checks are required prior to internships. Additionally, the Montana State Board of Pharmacy Application for Pharmacy Technician Registration includes a number of questions regarding personal history, including but not limited to criminal charges. Please contact the PTCB (Pharmacy Technician Certification Board),www.ptcb.org, and the Montana State Board of Pharmacy (http://bsd.dli.mt.gov/license/bsd_boards/pha_board/board_page.asp) if this is a potential problem.

Current salary range in Montana is from $7 per hour to $20 per hour, depending on employer, job duties, and experience.

Certificate of Applied Science - Pharmacy Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 30

Required Cumulative GPA: 2.0

Note: Math: Placement into Level 3 using a proctored ALEKS assessment
Writing: Score of 7 on the E-Write assessment

Degree Core Courses

Rule: Complete all courses

Note: AHMS 144 May be taken before application to the program.
There are two different sections of PHAR 198 and both are required to receive the certificate.

	Course	Credits
	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits
	CAPP 120 - Introduction to Computers Offered autumn and spring. Introduction to computer terminology, hardware, and software, including wire/wireless communications and multimedia devices. Students utilize word processing, spread sheet, database, and presentation applications to create projects common to business and industry in a networked computing environment. Internet research, email usage, and keyboarding proficiency are integrated.	3 Credits
	PHAR 100 - Intro Pharm Practice for Techs Offered autumn. Prereq., admission into Pharmacy Technology program. This course offers information regarding careers in pharmacy. It includes the history of pharmacy practice and defines roles of personnel relating to pharmaceutical services. Ethical standards of the occupation and federal and state laws regulating pharmacy practice with emphasis on Montana State Pharmacy Law regulating pharmacy technicians are studied. Day-to-day operations including preparation, maintenance, and storage of pharmaceuticals and records, and basic concepts of computer operations and latest technologies are reviewed. Skills will be developed with are necessary for the pharmacy technician to communicate effectively in the following ways: 1) as a representative of the profession of pharmacy, 2) as an intermediary between the pharmacist and patient, and 3) as an intermediary between the pharmacist and other health care professionals.	3 Credits

	PHAR 101 - Pharmacy Calculations Offered autumn. Calculations used in pharmacy practice; includes various systems of weights and measures, dosage determinations, percentage preparations, reducing and enlarging formulas, dilution, and concentration.	3 Credits
	PHAR 102 - Pharmacology for Technicians Offered autumn. Prereq., admission into Pharmacy Technology program. Study of the properties, reactions, and therapeutic value of the primary agents in the major drug classes.	6 Credits
	PHAR 104 - Pharmacy Dispensing Lab Offered autumn. Prereq., admission into Pharmacy Technology Program. Develop dispensing and distributive skills with hands-on lab, and lecture format.	3 Credits
	PHAR 120 - Medication Safety Offered spring online only. Prereq., PHAR 100, 101, 102, 104 and second semester standing in Pharmacy Technology Program. This course will introduce students to national safety initiatives developed by the Institute of Medicine, The Joint Commission, The Institute of Safe Medicine Practices and others. This awareness will help students become part of the solution in promoting safe medication practices.	3 Credits
	PHAR 121 - Preparation for the PTCB Exam Prereq., PHAR 100, PHAR 101, PHAR 102 and PHAR 104. This course will offer strategies in test taking, and help students refresh their knowledge in all knowledge areas included in the exam as identified by PTCB.	1 Credits
	PHAR 198 - Internship: Pharmacy Offered spring. Prereq., PHAR 100, 101, 102, 104 and second semester standing in Pharmacy Technology Program. Training and experience in either hospital, compounding, home infusion, nursing home or other alternative pharmacy settings under supervision of a pharmacist. Emphasizes special skills unique to that pharmacy setting.	4 Credits
Minimum Required Grade: C-		33 Total Credits Required

Medical Assisting A.A.S.

Jacki Elam, MA, RMA Program Director

Students in Medical Assisting are cross-trained with skills and knowledge in front office administrative, clinical, and limited laboratory procedures that are designed to assist healthcare practitioners in administering to the needs of patients. Selected administrative skills include scheduling, medical office accounting systems, medical coding and billing, and electronic medical records. Some of the clinical skills the student will learn include assisting with medical examinations, vital signs, administering medications and injections (under supervision), sterilizing instruments and electrocardiography. Laboratory skills will include venipuncture (under supervision), and performing selected CLIA-waived laboratory tests. Additionally, Medical Assisting students will become acquainted with the laws and regulations governing medicine in the ambulatory setting, as well as ethical issues being confronted in the health care arena. The program is designed to prepare the student for an entry-level position in Medical Assisting.

Students may apply for admission by meeting with the program director. Prior to entry, the student must be able to show competency in computers. Each Spring students will have to provide documentation of vaccines, background check, etc. as posted on the program's web page. Because some classes are only offered in a specific semester, and some courses have pre-requisites or co-requisites, meeting with the Program Director before each semester is necessary to ensure students adequately progress through the program.

Students must earn a "C" or better in all courses in order to progress and complete the program. This includes passing 100% of psychomotor and affective competencies required in AHMA 260 & 262 Laboratory courses. A course may be attempted a maximum of two times. At the end of the program the student will perform a 200-

hour, unpaid externship/practicum in an ambulatory facility, such as a clinic or licensed healthcare provider's office. The site must be approved by the Program Director. This provides the student with the opportunity to apply the knowledge and skills learned in a real world setting. Students who successfully complete the program will be awarded an Associate of Applied Science degree.

Associate of Applied Science - Medical Assisting

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 60

Required Cumulative GPA: 2.0

Note: A minimum of a C in each Medical Assisting core course is required for graduation. Medical Assisting core courses must be completed with no more than 2 attempts. Total credits for the AAS Medical Assisting degree are 60. The student must show competence in computers to enter the Medical Assisting program.

Core Courses

Rule: Must complete all of the following courses

	Course	Credits
	ACTG 101 - Accounting Procedures I Offered autumn and spring. Basic double-entry accounting. Emphasis on analyzing, journalizing, and posting transactions; trial balance, worksheet, financial statements, and adjusting/closing procedures, accounting systems, and cash control.	4 Credits
	AHMA 201 - Med Asst Clinical Prcdrs I Offered autumn. Prereq., M 105, BIOH 112, BIOH 113. Skill development necessary to assist health care practitioners in all aspects of patient care in the medical office clinical setting. Includes achieving competency in prepping patients for a physical examination, charting, medication administration, basic medical laboratory skills.	4 Credits
	AHMA 203 - Med Asst Clinical Prcdrs II Offered spring semester. Prereq., AHMA 201. This course builds on skills learned in AHMA 201 and includes body systems and pathophysiology review, and development of skills in the following areas: immunization administration, specimen collection, CLIA waived lab testing, care of lab equipment, spirometry, electrocardiogram, and phlebotomy.	4 Credits
	AHMA 260 - Med Assist Lab 1 Co-req., AHMA 201. This course introduces the student to basic skills of medical assisting. Included in this course are standard procedures, aseptic and sterilization procedures, vital signs, assisting with general exams, urinalysis, and drug administration.	2 Credits
	AHMA 262 - MA Lab 2 Prereq., AHMA 201 and 260. Corereq., AHMA 203. This course builds on skills learned in AHMA 260 and moves into areas of greater specialization. Included in this course are CLIA-waived and hematological testing, ECG, venipuncture, assisting with surgical procedures, wound care, and specialty exams.	2 Credits

	AHMA 298 - Medical Assisting Externship Offered spring. Prereq., consent of instructor. Placement in a medical office for a guided experience providing the student with a practical application of learned medical office administrative skills. Direct supervision will be the responsibility of a designated person at the site. The students will spend six hours per week to total 90 hours in assigned clinical rotations.	5 Credits
	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits
	AHMS 156 - Medical Billing Fundamentals Offered every term. Prereq. or coreq., AHMS 220 or consent of instr. An introduction to insurance claim processing for the major medical insurance programs. Students will be provided with a basic knowledge of CPT and ICD-9 procedural and diagnostic coding. Emphasis on completing universal insurance forms to maximize reimbursement as well as trouble shoot denied or underpaid claims.	3 Credits
	AHMS 175 - Medical Law & Ethics This course will introduce students to the common laws, regulations, and agencies affecting ambulatory medical facilities. Current issues of ethics and bioethics will also be discussed. This is a blended class.	2 Credits
	AHMS 216 - Pharmaceutical Products Offered autumn. Fundamental principles of pharmacology and the implications of medication use. Includes the law as it pertains to drug use, dosage forms, routes of administration as well as the pharmacologic actions and uses of drugs.	3 Credits
	AHMS 220 - Medical Office Procedures Offered autumn. An introduction to the necessary skills and qualities required to function successfully in the medical arena. Emphasis on medico-legal and ethical responsibilities, records management and financial management of the medical practice, and interpersonal communications to include patient reception, telephone techniques and appointment scheduling.	4 Credits
	AHMS 252 - Computerized Medical Billing Offered spring, Prereq., AHMS 156; prereq. or coreq. AHMS 220; or consent of instr. A medical package is used to enter and update patient data, enter charges, payments and adjustments, and generate management reports, insurance forms, and patient statements.	3 Credits
	BIOH 112 - Human Form and Function I Offered autumn. Explores the fundamentals of structure and function at basic cellular and tissue levels, in addition to the anatomy and physiology of the integumentary, musculoskeletal, and nervous systems.	3 Credits
	BIOH 113 - Human Form and Function II Offered spring. Explores the fundamental structures and functions of the endocrine, cardiovascular, respiratory, digestive, urinary and reproductive systems.	3 Credits
	CAPP 154 - MS Word Offered autumn and spring. Prereq., CAPP 120 or basic computer experience and consent of instr. Preparation of business forms, correspondence, mail merges, columnar projects, and reports using up-to-date software. Business related application projects, graphics, and printer operation are included.	3 Credits

	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	M 105 - Contemporary Mathematics Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An introduction to mathematical ideas and their impact on society. Intended for students wishing to satisfy the general education mathematics requirement.	3 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits
Minimum Required Grade: C		

Computed Tomography Certificate

The five-credit Computed Tomography certificate fulfills the new American Registry of Radiologic Technologists certification requirements and is available to registered and licensed radiologic technologists and current Missoula College radiology students.

The Montana Department of Labor and Industry has agreed to work with employers to set up an apprenticeship model for qualified candidates to complete their clinical competences. Employers may sponsor the certification of current radiologic technologists to ensure compliance with the new ARRT Certification requirements. For technologists who are not employed by the institution, the apprenticeship agreement would codify a probationary period, incremental wage increases, a requirement to pass the certification exam, and a requirement to work for an agreed-upon amount of time once the training is complete.

For more information, please call:

Maryann Dunbar - Administrative Assistant, Health Professions - 406-243-7868

Anne Delaney - Program Director, Radiologic Technology - 406-243-7809

Technical Certificate - Computed Tomography

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 6

Required Cumulative GPA: 2.0

Certificate in Computed Tomography

Rule: All courses required

	Course	Credits
	AHXR 274 - Cross Sectional Anatomy Course offered on line each semester. Students must be ARRT certified with a current state license to register for the CT courses. This course will cover information specific to ARRT guidelines in preparation for the Computed Tomography Exam. The regions of the body to be included are: Head, Neck, Chest, Abdomen, Pelvis and Musculoskeletal. Within each of these categories, focus will be placed on these relevant factors. Sectional Anatomy (axial, sagittal and coronal planes), Contrast Media (types, contraindications, administration), Imaging Processes (scout acquisition and methods, parameter selection, protocol modification) and Special Procedures (Reformatting, 3-D rendering, biopsies/drains, screening).	3 Credits
	AHXR 275 - Physics and Instrumentation Course offered on line each semester. Students must be ARRT certified with a current state license to register for the CT courses. This course will cover information specific to ARRT guidelines in preparation for the Computed Tomography Exam. The course will be broken down in to the following sections: Patient Assessment and Preparation (to include patient history, screening, and consent. Immobilization, patient monitoring, accessory medical devices, lab values and medications/dosage). Contrast Administration (to include contrast media types, considerations, administration and dosage, venipuncture, injection techniques, post-procedure care and adverse reactions). Radiation Safety and Dosimetry (to include technical factors, protection and shielding, dose measurement and dose reduction/optimization).	2 Credits
Minimum Required Grade: C-		6 Total Credits Required

Applied Computing and Engineering Technology

Xueying Shen, Chairperson

The Department of Applied Computing and Engineering Technology collaborates with business and industry to prepare graduates to compete in and contribute to a diverse and dynamic global society. Students acquire the practical skills necessary to pursue entry-level careers in STEM-related (Science, Technology, Engineering, and Mathematics) occupations. Students engage in experiential learning, embracing technical education, effective communication, problem solving, professionalism, and specific workplace skills. The department promotes lifelong learning to empower students in an ever-changing world. More details on programs available through the department can be found at the Applied Computing and Engineering Technology website.

Preparation to Enter Programs

Students entering programs in Applied Computing & Engineering Technology are expected to have basic computing skills and adequate preparation in mathematics.

Department Faculty

Professors

Thomas Gallagher, IT Program Director/Professor
Dennis Labonty, Ph.D.

Associate Professors

Bradley Layton, Energy Technology Program Director/Associate Professor

Assistant Professors

Xueying Shen, Electronics Technology Program Director
Steven Stiff, Assistant Professor

Adjunct Faculty

Dianne Burke, Cybersecurity Program Director/Adjunct Instructor
Corryn Greenawalt
Wally Higgins, Adjunct Instructor
Eric Iverson
Kari McLean, Adjunct professor
Krista Milligan
Zachary Rossmiller

Computer Technology (COT)

Back to Top

- ### CRT 188T - Computers and Law
  Credits: 3. Offered autumn. Prereq., CAPP 120 and LEG 185T. Intermediate concepts of computer systems, operating systems, graphical environments, electronic mail, Internet, and file management. A variety of applications including word processing, spreadsheet, database, presentation, and law-related software are included. Course Attributes: Technical Course

- ### CRT 205T - Food Serv Mgmt Comp App
  Credits: 2. Offered spring. Prereq., CAPP 120. Introduction to computerized applications relevant to the food service industry. Includes spreadsheet, recipe management and word processing software; appropriate industry reports, create menus and fliers; import, export and scale recipes; analyze nutrition; and calculate food cost. Course Attributes: Technical Course

Computer Science/Programming

Back to Top

- ### CSCI 110 - Programming - VB I
  Credits: 3. Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to object-oriented programming using an even-driven paradigm. Basic concepts of control structures, data handling, documentation, and error control. Fundamentals of algorithm design and structured software development.

- ### CSCI 113 - Programming with C++ I
  Credits: 3. Offered intermittently. M 090 or ALEKS score >2 recommended prior to taking course. Object oriented programming using C++. Implementation of structured programming concepts along with construction of classes to create data types for defining objects.

- ### CSCI 120 - Programming - VB II
  Credits: 3. Offered autumn. Prereq., CSCI 110. Design and implementation of software using object-oriented programming practices. The class framework is used to apply the object-oriented techniques of encapsulation, polymorphism, and inheritance.

- ### CSCI 215E - Social & Ethical Issues in CS
  Credits: 3. Offered autumn and spring. Prereq., WRIT 101. Exploration of ethical issues in the field of computing. Skills needed to identify and analyze various ethical concerns. Standard ethical concepts and theories, methods of ethical analysis. Strong emphasis on practical application of the ethical process. Course Attributes: Ethical & Human Values Course
  Writing Course-Intermediate

- ### CSCI 221 - System Analysis and Design
  Credits: 3. Offered spring. Prereq., CSCI 240. Analysis of the system development life cycle. Emphasis on planning, analyzing, designing, implementing and supporting information systems to meet business requirements. Covers feasibility studies, time and cost estimates, modeling tools, design tools, implementation and support strategies. A simulated business design project will be developed.

- CSCI 240 - Databases and SQL

  Credits: 3. Offered autumn. Prereq., CSCI 172 or consent of instr. Relational database design including: requirements analysis, data structure, entity relationships, normalization, relational algebra and integrity. Physical implementation focusing on data storage; retrieval and modification; concurrency; optimization; security; SQL; and XML.

- CSCI 290 - Undergraduate Research

  Credits: 1 TO 6. (R-10) Offered every term. Consent of instr. Independent research under the direction of a faculty member.

Drafting Design

Back to Top

- DDSN 113 - Technical Drafting

  Credits: 3. Offered autumn. An introduction to the techniques and standard practices of communicating technical graphics. The class studies and practices drawing skills and learns the drawing standards that support the needs of the design team in advancing ideas. It also provides the foundation for successful drawing communication in the CAD environment. Topics covered include; drawing media and tools, hand drawing skills, perspectives, views, sketching, standard scales, geometric construction, sections, dimensioning, and tolerances.

- DDSN 114 - Introduction to CAD

  Credits: 3. Offered autumn. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to computer aided design and drafting software for production of drawings and plans for architecture and engineering systems. Fundamentals of two dimensional drafting and drawing management for professional design.

- DDSN 116 - 3D CAD

  Credits: 3. Offered autumn. Prereq. or Co-req., DDSN 114. CAD II provides a project-based, in-depth study of the skills and concepts involved in Computer Aided Design and Drafting. Topics covered include object grouping and sharing; three dimensional modeling; animation; and interoperability with other software. This course is the second in a two-part series covering the core AutoCAD application.

- DDSN 135 - Solidworks

  Credits: 2. his course aggregates fundamental concepts of Blueprint Reading and Interpretation (MCH 120) and Machine Quality Control and Precision Measurements (MCH 129) in the form of gaining practical application of concepts to 3D solid modeling. 3D models will include drawings with symbols, various schematics and diagrams, dimensioning techniques, section views, auxiliary views, threads and fasteners typical to shop drawings. Application of specifications and acceptable tolerance requirements to ensure quality control measures for design parts and assemblies will also be stressed.

- DDSN 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

- DDSN 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Independent research in geography or planning.

- DDSN 244 - GIS Mapping

  Credits: 3. Offered Spring. Basics of geospatial technologies; remotely sensed imagery, GIS, and GPS and how each of the individual areas can be used together to analyze spatial datasets. Students will explore a wide range of spatial data and will learn to apply these data sets to real-world solutions.

- DDSN 245 - Civil Drafting

  Credits: 4. Offered spring. Prereq. DDSN 114. Introduces students to computer aided design software for common survey and engineering design and drafting applications. Topics include collection of survey data; the coordinate geometry system; surfaces; subdivision and land planning; road design and corridor modeling; utilities; site grading and drainage; mapping; and 3D visualization.

Electronics Technology

Back to Top

- ## ETEC 105 - DC Circuit Analysis

  Credits: 4. Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to direct current (DC) and analysis of series, parallel, and series-parallel circuits. Topics include electrical quantities, units of measurement, measurement instruments, resistors, current, voltage, power, energy, network theorems, equivalent circuits, magnetism, and electromagnetism. Laboratory experiments include circuit analysis; the proper use of measurement equipment and techniques; and troubleshooting.

- ## ETEC 106 - AC Circuit Analysis

  Credits: 3. Offered autumn and spring. Analysis of alternating current (AC) circuits and the behavior of capacitors, inductors, reactance, impedance, transformers, and signal filters. Laboratory experiments include circuit analysis, the use of proper measurement equipment, and troubleshooting.

- ## ETEC 113 - Circuits Lab

  Credits: 1. Offered autumn. Prereq/Co-req., ETEC 105. Covers proper techniques of soldering and tool usage. Electronic technical language, hands on troubleshooting skills and basic electronic measurements are involved.

- ## ETEC 120 - Electrician Fundamentals NCCER Level I with NCCER Core Curriculum

  Credits: 4. Students will learn the fundamentals of installing electrical systems in structures. These systems will include wiring, circuit breaker panels, switches, and light fixtures. Students will also learn to read and follow blueprints in accordance with the National Electrical Code® as well as state and local codes. The course largely follows the first level of NCCER's 4-level Electrical curriculum that complies with DOL time-based standards for apprenticeship.

- ## ETEC 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered Intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ## ETEC 213 - Power Systems Technology

  Credits: 3. Offered spring. Prereq., ETEC 106, M 121, Prereq/Co-req., M 122. A review of the principles of electricity, magnetism, and transformer action; the application of these principles in the operation of single-phase and three-phase ac/de motors, alternators, and generators; and the control methods for these electrical devices.

- ## ETEC 214 - Energy Storage and Dist.

  Credits: 3. Offered spring. Prereq. ETEC 106, NRGY 101, and M 121 or consent of instructor. Studies storage and transport methods of different types of energy. Explores emergent technologies and mechanisms designed to enhance efficiency and safety, including 'smart grid' technologies; assesses relative social, ec\onomic and environmental merits of each type of energy system in terms of its storage and distribution.

- ## ETEC 240 - Robotics

  Credits: 3. Offered spring. Prereq. or Co-req., ETEC 250. Explores physical and operating characteristics of a robot. Topics include robot configurations, power supplies, control systems, end effectors, sensors, stepper motors and stepper controls. Robot programming also is covered and a typical robot is programmed to perform repetitive actions. Includes hands-on labs.

- ## ETEC 245 - Digital Electronics

  Credits: 4. Offered autumn. Prereq., ETEC 250. Explores digital electronic circuits and devices that make up a computer system. Topics include binary and hexadecimal number systems, Boolean algebra and digital logic theory, simple logic circuits, combinational logic, and sequential logic. Also covered is the analog-to-digital and digital-to-analog interfaces between a digital system and the real (analog) world. Includes hands-on labs.

- ## ETEC 250 - Solid State Electronics I

  Credits: 4. Offered spring. Prereq. ETEC 105. An introduction to semiconductor technologies used in solid state electronics with an emphasis on diodes and transistors. Classroom concepts are reinforced through lab-based experiments.

- ## ETEC 251 - Solid State Electronics II

Credits: 3. Offered autumn. Prereq. ETEC 250. An introduction to semiconductor technologies used in solid state electronics with an emphasis on amplifier circuits, field effect transistors, thyristors, and operational amplifiers. Classroom concepts are reinforced through lab-based experiments.

- ETEC 260 - Data and Network Communication

  Credits: 3. Offered autumn. Prereq., ETEC 250. Explores the principles, applications, and theory of data communication systems. Topics include communication concepts and terminology, analog and digital channel characteristics, signaling techniques for analog and digital data, communication codes, transmission media, and standards and protocols for various data communication systems including computer networks, and the public switched telephone network. Includes hands-on labs.

- ETEC 265 - Control Systems

  Credits: 4. Offered autumn. Prereq., ETEC 250. The course provides a comprehensive coverage of components, circuits, instruments, and control techniques used in continuous and discrete automatic control systems, and focuses on basic principles, operation and applications. Programming, interfacing, and applications of programmable logic controllers are emphasized, including PLC hardware components, ladder logic diagram, fundamentals of PLC programming, and PLC interfacing and troubleshooting. Laboratory experiments and course projects are included in the course.

- ETEC 270 - Wireless Communications

  Credits: 4. Offered autumn. Prereq., ETEC 250. Explores audio and radio frequency (RF) circuits. Topics include AM and FM signal modulation and demodulation, RF transmitters, RF receivers, RF amplifiers, audio amplifiers, oscillators, mixers, and antennas. Includes hands-on labs.

- ETEC 275 - Microprocessors and Microcontrollers

  Credits: 4. Offered spring. Prereq., ETEC 250 and prereq., or Co-req., CSCI 113. The course introduces the fundamental concepts, basic principles of the architecture, organization, operation and applications of microprocessors and microcontrollers. Programming in assembly language and in C, and interfacing of microprocessor systems are emphasized. Laboratory experiments and course projects are included in the course to increase the hands-on skills of the students.

- ETEC 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered Intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ETEC 295 - Special Topics

  Credits: 1 TO 6. (R-6) Offered Intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ETEC 298 - Internship

  Credits: 2. Offered intermittently. Consent of instructor required. Extended classroom experience providing practical application of classroom learning through on the job training in a student's field of study. This experience increases student skills, prepares them for initial employment, and increases occupational awareness and professionalism.

- ETEC 299 - Electronics Capstone

  Credits: 3. Offered spring. Prereq., ETEC 275. Completion of project prototypes. Includes comprehensive final project from conception to market.

Health Information Technology

Back to Top

- HIT 101 - Intro to Healthcare Informatic

  Credits: 3. Introduces the discipline of healthcare information technology. An overview of the subject including history, basic knowledge of healthcare informatics and tools as applied in support of healthcare delivery. Students will gain an introductory level about the complexities of health care and how informatics fits within the US Healthcare System.

- HIT 265 - Electronic Health Records

  Credits: 3. Prereq., HIT 101. An introduction to the electronic health record (EHR). Students will study the use of the EHR in improving healthcare quality, accessibility, and cost-effectiveness. EHR implementation and its use within the internal clinical office will be examined. The EHR will be

studied in the context of a comprehensive Health Information System (HIS) supporting our society's interdisciplinary clinical healthcare system.

Information Technology Systems

Back to Top

- ITS 150 - CCNA 1: Exploration

  Credits: 3. Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. Introduction to networking field including terminology; protocols; local-area and wide-area networks; the OSI model; topologies; IP addressing; cabling and cabling tools; routers and router programming. Ethernet and network standards; and wireless technologies.

- ITS 152 - CCNA 2: Exploration

  Credits: 3. Offered fall. Prereq., ITS 150. Covers router theory and technologies including configurations, IOS software management, routine protocol configuration, TCP/IP, access-lists and introduction to LAN switching. Course Attributes: Technical Course

- ITS 165 - OS Commands and Scripts

  Credits: 3. Offered spring. Introduction to operating system concepts through the use of contemporary software. Emphasizes file system management, networking, installation, maintenance, management, and disaster recovery practices using both the command interpreter and graphical user interface.

- ITS 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ITS 210 - Network OS - Desktop

  Credits: 3. Offered autumn. Prereq., ITS 150. In-depth study of a secure, multi-user, client-based network operating system. Topics include installation, administration of resources, performance, network services, and security. Course Attributes: Technical Course

- ITS 212 - Network OS - Server Admin

  Credits: 3. Offered autumn. Prereq./Co-req, ITS 210. Server technologies commonly used in local area networking. Topics include installation, administration, storage, application services, network services, security, reliability, and availability. Course Attributes: Technical Course

- ITS 214 - Network OS - Infrastructure

  Credits: 3. Offered fall. Prereq., ITS 212. Principles and implementation of enterprise networking services. Topics include Protocol Binding, DNS, DHCP, WINS, Remote Access, IP Routing, IP Security, Network Address Translation, and Certificate Services. Course Attributes: Technical Course

- ITS 221 - Project Management

  Credits: 3. Offered autumn. Prereq., CSCI 172. Investigation of topics in project management including scope, definition, risk, procurement and the RFP. Management of time, cost, quality, and human resources. Concepts are reinforced with PM software.

- ITS 222 - Enterprise Security

  Credits: 3. Offered spring. Prereq./Co-req, ITS 214. Examination of general information technology security concepts. Topics include access control, authentication, attack methods, remote access, web security, wireless networks, cryptography, internal infrastructure security, and external attacks. Security procedures, organizational policies, risk management and disaster recovery addressed. Course Attributes: Technical Course

- ITS 250 - CCNA 3: Exploration

  Credits: 3. Offered spring (first half). Prereq., ITS 152. Covers router configurations including advanced IP addressing techniques, variable length subnet masking, intermediate routing protocols, Ethernet switching, virtual LANs, spanning-tree protocol, and VLAN trucking protocol. Course Attributes: Technical Course

- ITS 252 - CCNA 4: Exploration

  Credits: 3. Offered (second half). Prereq., ITS 152. Project-based course in wide-area networking including advanced IP addressing techniques, network address translation, port address

translation, DHCP, WAN technology and terminology, PPP, ISDN, DDR, Frame Relay, network management, and introduction to optical networking.

- ITS 255 - IP Telephony

  Credits: 3. Offered autumn. Prereq./Co-req. ITS 150. Provides an introduction to converged voice and data networks as well as challenges faced by the various technologies. Presents solutions and implementation considerations for signaling, quality of service, security, call control, dial plans, gateway protocols, messaging, congestion, and connecting to a PSTN network. Course Attributes: Technical Course

- ITS 271 - Securing Desktop/Mobile Dev.

  Credits: 4. Course provides advanced technical information and relevant skills to successfully secure end-user devices, including desktop and laptop systems, tablets, cellular phones, and other portable computing equipment. Building on existing knowledge and skills in the areas of server management, network management, and security, students will gain mastery-level knowledge of security issues and best practices. Course content covers client/server exposures and protections (authentication options, packet signing and encryption of network traffic, appropriate implementation of permissions and rights); malware threats and treatments; transmission choices and precautions (wired, wireless, remote desktop access, virtual private networking (VPN)); cloud computing considerations; and corporate mobile device best practices. Hardening of the operating system and application software is also covered. Course content will focus on business-focused security practices to prepare students for Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.

- ITS 273 - Securing Networks

  Credits: 4. Course provides advanced technical information and relevant skills to secure servers and business information. Building on existing knowledge and skills in the areas of server management, network management, and security, students will gain mastery-level knowledge of security issues and best practices. Students will examine and apply hardening techniques to operating systems and infrastructure-based applications. Strategies to ensure business continuity and data security are emphasized, including policy, data preservation, disaster preparedness, and disaster recovery. Legal guidelines and requirements, both domestic and international, are examined in the context of responsible and ethical computer use. Course content will focus on business-focused security practices to prepare students for the Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.

- ITS 275 - Border/Perimeter Network Sec

  Credits: 4. Course provides advanced technical information and relevant skills to successfully secure computer networks at the public/private interface. Material focuses on hardware- and software-based techniques to prevent and monitor unauthorized or malicious access to corporate networks and servers. Building on existing knowledge of border and perimeter security, students will develop and implement best practices guidelines for boundary-related devices and software. Students will establish baseline assessments of network security from public access points and identify known and/or potential security vulnerabilities. Course content will focus on business-focused security practices to prepare students for the Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.

- ITS 277 - Software Assurance and File Sy

  Credits: 4. Course provides advanced technical information and relevant skills to methodically secure software, including operating systems, custom application software, and commercially-available packages. Students will classify application software (including, but not limited to customer-facing, employee/partner, mobile/endpoint, database, and cloud-based), and perform risk analyses and common weakness assessments against these programs. Students will research various commercial, professional, and governmental security organizations and create a personalized repository of security-related checklists, toolkits, reference material, and resources. Students will investigate low-level file system structures such as master file tables, allocation tables, free space tables, file table entries, and metadata fields. Using common file signatures and checksums, students will verify internal content against external and metadata indicators. Students will examine 'hidden' disk space areas, including file, volume, and/or partition slack. Course content will focus on business-focused security practices to prepare students for Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a

network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.

- ITS 280 - Computer Repair & Maint.

  Credits: 3. Offered autumn. Prereq./Co-req, ITS 150. In-depth study of personal computer hardware. Focus on field replaceable components. Topics include: storage devices, processors, system boards, memory, ports, cabling, power supplies, multimedia devices, printers, and troubleshooting. Course Attributes: Technical Course

- ITS 289 - Professional Certification

  Credits: 1. (R-4) Offered autumn and spring. Prereq., consent of instr. Review objectives of an information technology industry-based professional certification. Certification objectives, preparation strategies, and exam strategies included. Course can be repeated for different industry-based professional certifications. Course Attributes: Technical Course

- ITS 290 - Undergraduate Research

  Credits: 1 TO 6. (R-6) Consent of instr. Independent research under the direction of a faculty member. Graded credit/no credit.

- ITS 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics. Course Attributes: Technical Course

- ITS 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr.

- ITS 297 - Undergraduate Research

  Credits: 1 TO 10. Offered every term. Preq. consent of instr. Independent research under the direction of a faculty member. Graded credit/no credit.

- ITS 298 - Internship/Cooperative Educati

  Credits: 2. Offered autumn and spring. Not open to non-majors. On-the-job training in positions requiring information technology competencies. This experience increases students' skills, prepares them for initial employment, and increases occupational awareness and professionalism. Students work a minimum of six hours each week at an approved site and attend a weekly one-hour seminar. Course Attributes: Internships/Practicums

Sustainable Energy

Back to Top

- NRGY 101N - Intro to Sustainable Energy

  Credits: 3. Offered autumn. A survey of traditional energy systems and technologies. Introduces conventional primary energy sources--coal, oil, gas, nuclear--and examines the technologies used to capture, convert, distribute, store, and utilize these energy sources. Consideration is given to physical and engineering aspects, as well as economic, social environmental, and political factors that determine the sustainability of these sources.

- NRGY 102 - Intro to Sustainable Energy II

  Credits: 3. Offered autumn and spring. Prereq., NRGY 101 or consent of instructor. Same as CCS 102. A survey of renewable energy systems and technologies. Addresses physical and technical aspects of wind, solar, geothermal, hydro, tidal, biological, and wave energy systems. Consideration is given to engineering, economic, social, environmental, and political factors that determine implementation and sustainability. Credit not allowed for both NRG 102 and CCS 102.

- NRGY 120 - Industrial Safety and Rigging

  Credits: 3. This course provides an overview of safe industrial practices and provides students with hands-on experiences in rigging for a variety of industries. Students will complete the requirements for an OSHA 30 certification, construct a scaffold system, identify equipment for shifting heavy loads such as may be used in the wind and solar industries. Load security, fall gear, arrest equipment, confined spaces, safety data sheets will be covered. Students will also learn elements of first aid, cardio-pulmonary resuscitation (CPR), and proper use of Automated External Defibrillators (AED's).

- NRGY 191 - Special Topics

Credits: 1 TO 3. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- NRGY 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- NRGY 195 - Practicum

  Credits: 2. Offered summer only. Prereq., NRGY 101, M 121 or consent of instructor. Same as CCS 191. The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism. Course Attributes: Internships/Practicums

- NRGY 196 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Service Learning/Volunteer

- NRGY 235 - Building Energy Efficiency

  Credits: 4. Offered Spring. Prereq., NRGY 101. Provides an overview of energy efficiency opportunities in residential buildings with an emphasis on the Passivhaus standard. Prepares the student to take the National RESNET Home Energy Rater Exam, which is a required final exam. Local home and industry tours, and hands-on exposure to HVAC controls and maintenance are also offered. Study of the analysis techniques used for reduction of energy consumption and energy management, including energy accounting and energy auditing. Residential and commercial building energy efficiency opportunities will be covered. Other topics addressed include motors, pumps, green building, and purchasing energy supplies. Career opportunities in energy efficiency will be discussed. Several local tours of energy-efficient homes will occur throughout the semester.

- NRGY 241 - Alternative Fuels

  Credits: 3. Offered autumn. Prereq., NRGY 101, M 121. Identifies alternative fuel sources; explores fuel characteristics; identifies and evaluates the infrastructure required to produce, store, distribute, and use them; discusses emission and conversion efficiencies; assesses social, environmental, and economic impacts.

- NRGY 242 - Solar Thermal & Wind Systems

  Credits: 3. Offered autumn. Prereq., NRGY 101, M 121, Prereq., or Co-req., M 122. Same as CCS 242. Introduction to the fundamentals of solar and wind energy for the design and installation of solar thermal and wind systems. Includes an overview of the physics and chemistry of the resource and the technology, and will prepare students for a career in renewable energy or for installing a renewable energy system on their own home. Credit given for NRG 242 or CCS 242, not both.

- NRGY 243 - Fundmtl PV Design & Install

  Credits: 3. Offered spring. Prereq., M 121, Prereq./Co-req., ETEC 105. An introduction to the fundamental principles and technologies of solar photovoltaic energy systems. Emphasis on system design and installation, including site and resource assessment, load analysis, troubleshooting, and cost analysis. The material covered prepares students for a career in renewable energy or for installing a renewable energy system on their own home.

- NRGY 244 - Bioenergy

  Credits: 3. Offered spring. Prereqs., SCN 175N, M 121 and NRGY 102, or consent of instructor. Investigates the physical nature of various biorenewable resources and the technologies currently employed to produce, harvest, refine and convert these into useable energy, feedstocks and products.

- NRGY 245 - Fuel Cells

  Credits: 3. Offered spring. Prereq., NRGY 101, M 121. An introduction to the different types of fuel cells (hydrogen, biological, metal/air, proton exchange membrane, etc.) accompanied by a critical examination of their applications, operation, efficiencies, advantages and disadvantages. Students must purchase a fuel cell kit for a laboratory component.

- NRGY 246 - Geothermal Energy Technology

  Credits: 3. Offered Autumn. Prereqs., NRGY 101 and 102 and M 121. An introduction to the physical and technical aspects of geothermal energy systems. Topics covered include the fundamental principles of geology and hydrology, heat flow mechanisms, and a consideration of

heat exchange systems including: dry steam, flash, binary systems, heat pumps, passive systems. The course also surveys political, economic, ecological, and social aspects of geothermal energy development.

- NRGY 250 - Energy Finance

  Credits: 3. Offered summer. An introduction to the terminology, policies, and mathematical models for financing energy technology projects. Concepts covered include time value of money, tax code, triple bottom line, and cost-benefit analysis. Microsoft Excel will be used.

- NRGY 260 - Smart Grid Technology

  Credits: 3. Prereq., ETEC 105 or equivalent. Provides an overview of smart grid technician opportunities at both the residential and industrial scale. Prepares the student to work in a variety of settings including programming a thermostat, monitoring a grid simulation system, building a simple timer to schedule when major appliances run, familiarity with Energy STAR appliances, and integration with both renewable and non-renewable primary energy sources. Local home and industry tours, and hands-on exposure to programmable logic circuits will be part of the course. Study of efficiency techniques used for reduction of energy consumption at the residential and industrial scale will be included. Career opportunities in a variety of industries related to grid-scale power management will be discussed. Possible projects include the building of a small circuit to coordinate the operation of a suite of appliances.

- NRGY 270 - Recycling Technology

  Credits: 4. Prereq., Familiarity with general materials and their properties is assumed. Students must possess basic word processing skills, be able to download and open relatively large PDF files, and perform functions such as loading software and navigating between folders and files. Familiarity with basic computing skills is a must for online courses and will significantly influence your course experience. Provides an overview of recycling opportunities at both the residential and industrial scale. Prepares the student to work with a variety of materials including cellulosic, plastic, metal, glass and electronics waste. Students will be exposed to ANSI-IREC standards as well as LEED standards for repurposing and “upcycling” materials. Local home and industry tours, and hands-on exposure to materials processors such as glass pulverizer, cardboard grinders and plastics extruders will be part of the course. Study of efficiency techniques used for reduction of virgin material consumption and waste management, including materials auditing and accessing international materials reclamation will be included. Career opportunities in a variety of industries related to materials reclamation will be discussed. Possible projects include the building of a solar thermal forge.

- NRGY 290 - Undergraduate Research

  Credits: 1 TO 10. Offered every term. Preq., consent of instr. Independent research under the direction of a faculty member. Course Attributes: Research & Creative Schlrshp

- NRGY 291 - Special Topics

  Credits: 1 TO 4. (R-6) Offered intermittently. Experimental offerings of Energy Technology faculty and visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- NRGY 292 - Independent Study

  Credits: 1 TO 9. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- NRGY 295 - Practicum

  Credits: 2. The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism.

- NRGY 298 - Internship

  Credits: 2. Offered every term. Prereq., M 121 and consent of instructor. Same as CCS 298. Extended classroom experience providing practical application of classroom learning through on the job training in a student's field of study. This experience increases student skills, prepares them for initial employment, and increases occupational awareness and professionalism. Course Attributes: Internships/Practicums

- NRGY 299 - Energy Technology Capstone

  Credits: 3. (R-9) Offered spring and autumn. Students participate in an energy technology design, building, testing, and competition. Previous examples include participation in the Shell EcoMarathon and the American Society of Mechanical Engineering Human Powered Vehicle

Challenge. This course is very time intensive and will require meetings outside of regularly scheduled class times. Travel to competition is strongly encouraged, but not required.

Surveying

Back to Top

- SRVY 230 - Intro to Srvyg for Engineers
  Credits: 3. Offered spring. M 090 or ALEKS score >2 recommended prior to taking course. Basic principles of civil surveying and the use of surveying equipment. Surveying introduces students to the link between field (construction) and office (design) practices. Students will become familiar with Global Positioning Systems (GPS), levels, level rods, total stations, basic survey computations, and their relationship to Computer Design Systems.

Electronics Technology A.A.S.

Steve Shen, Program Director

Students in the Electronics Technology program learn to troubleshoot, calibrate, test, and repair electronic components and circuit boards used in a wide range of electronic equipment including computers and communication equipment. Training includes working knowledge of direct and alternating current theory, semiconductor circuits, instrumentation, automatic controls, data communications, computerized communication links, and operational amplifiers. Students become familiar with robotics, electronic communications theory, and modes of RF communications.

Students are awarded the Associate of Applied Science degree upon successful completion of the program.

Associate of Applied Science - Electronics Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 63

Required Cumulative GPA: 2.0

Electronics Technology core courses

Rule: All courses are required

Note: CSCI 113 C++ Programming may be substituted for CSCI 110.
WRIT 121 Technical Writing may be substituted for WRIT 101.

	Course	Credits
	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
	CSCI 113 - Programming with C++ I Offered intermittently. M 090 or ALEKS score >2 recommended prior to taking course. Object oriented programming using C++. Implementation of structured programming concepts along with construction of classes to create data types for defining objects.	3 Credits

	ETEC 105 - DC Circuit Analysis Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to direct current (DC) and analysis of series, parallel, and series-parallel circuits. Topics include electrical quantities, units of measurement, measurement instruments, resistors, current, voltage, power, energy, network theorems, equivalent circuits, magnetism, and electromagnetism. Laboratory experiments include circuit analysis; the proper use of measurement equipment and techniques; and troubleshooting.	4 Credits
	ETEC 106 - AC Circuit Analysis Offered autumn and spring. Analysis of alternating current (AC) circuits and the behavior of capacitors, inductors, reactance, impedance, transformers, and signal filters. Laboratory experiments include circuit analysis, the use of proper measurement equipment, and troubleshooting.	3 Credits
	ETEC 113 - Circuits Lab Offered autumn. Prereq/Co-req., ETEC 105. Covers proper techniques of soldering and tool usage. Electronic technical language, hands on troubleshooting skills and basic electronic measurements are involved.	1 Credits
	ETEC 245 - Digital Electronics Offered autumn. Prereq., ETEC 250. Explores digital electronic circuits and devices that make up a computer system. Topics include binary and hexadecimal number systems, Boolean algebra and digital logic theory, simple logic circuits, combinational logic, and sequential logic. Also covered is the analog-to-digital and digital-to-analog interfaces between a digital system and the real (analog) world. Includes hands-on labs.	4 Credits
	ETEC 250 - Solid State Electronics I Offered spring. Prereq. ETEC 105. An introduction to semiconductor technologies used in solid state electronics with an emphasis on diodes and transistors. Classroom concepts are reinforced through lab-based experiments.	4 Credits
	ETEC 251 - Solid State Electronics II Offered autumn. Prereq. ETEC 250. An introduction to semiconductor technologies used in solid state electronics with an emphasis on amplifier circuits, field effect transistors, thyristors, and operational amplifiers. Classroom concepts are reinforced through lab-based experiments.	3 Credits
	ETEC 260 - Data and Network Communication Offered autumn. Prereq., ETEC 250. Explores the principles, applications, and theory of data communication systems. Topics include communication concepts and terminology, analog and digital channel characteristics, signaling techniques for analog and digital data, communication codes, transmission media, and standards and protocols for various data communication systems including computer networks, and the public switched telephone network. Includes hands-on labs.	3 Credits

	ETEC 265 - Control Systems Offered autumn. Prereq., ETEC 250. The course provides a comprehensive coverage of components, circuits, instruments, and control techniques used in continuous and discrete automatic control systems, and focuses on basic principles, operation and applications. Programming, interfacing, and applications of programmable logic controllers are emphasized, including PLC hardware components, ladder logic diagram, fundamentals of PLC programming, and PLC interfacing and troubleshooting. Laboratory experiments and course projects are included in the course.	4 Credits
	ETEC 270 - Wireless Communications Offered autumn. Prereq., ETEC 250. Explores audio and radio frequency (RF) circuits. Topics include AM and FM signal modulation and demodulation, RF transmitters, RF receivers, RF amplifiers, audio amplifiers, oscillators, mixers, and antennas. Includes hands-on labs.	4 Credits
	ETEC 275 - Microprocessors Offered spring. Prereq., ETEC 250 and prereq., or Co-req., CSCI 113. The course introduces the fundamental concepts, basic principles of the architecture, organization, operation and applications of microprocessors and microcontrollers. Programming in assembly language and in C, and interfacing of microprocessor systems are emphasized. Laboratory experiments and course projects are included in the course to increase the hands-on skills of the students.	4 Credits
	ETEC 299 - Electronics Capstone Offered spring. Prereq., ETEC 275. Completion of project prototypes. Includes comprehensive final project from conception to market.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits

	SCN 175N - Integrated Physical Science I Offered every term. An introduction to the basic principles of physics, chemistry, and nuclear reactions with emphasis on the scientific method and process. A knowledge of basic algebraic functions, decimals, and scientific notation is recommended. Suitable for students with little science background.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		63 Total Credits Required

Energy Technology A.A.S.

Bradley Layton, Program Director

Students in the Energy Technology program are introduced to the full suite of energy sources and technologies. Graduates will be general practitioners that are equipped with skills in design, installation, and maintenance of diverse energy technologies and systems; sales, operations, and management; regulatory compliance; basic electricity and power systems; energy storage and distribution; site assessment; basic energy economics; efficiency and conservation strategies; and project management. Students may enter the program in either autumn or spring term. Further information can be found at http://ace.mc.umt.edu/nrg/.

Associate of Applied Science - Energy Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 69

Required Cumulative GPA: 2.0

Energy Technology Core Requirements

Rule: All courses are required

Note: WRIT 121 Technical Writing may be substituted for WRIT 101 at the discretion of the program director based on future career and educational goals.
BGEN 160S Issue in Sustainability may be substituted for BGEN 105S at the discretion of the program director.
ETEC 214 Energy Storage and Distribution may be substituted for ETEC 213 at the discretion of the program director.

	Course	**Credits**

	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ETEC 105 - DC Circuit Analysis Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to direct current (DC) and analysis of series, parallel, and series-parallel circuits. Topics include electrical quantities, units of measurement, measurement instruments, resistors, current, voltage, power, energy, network theorems, equivalent circuits, magnetism, and electromagnetism. Laboratory experiments include circuit analysis; the proper use of measurement equipment and techniques; and troubleshooting.	4 Credits
	ETEC 106 - AC Circuit Analysis Offered autumn and spring. Analysis of alternating current (AC) circuits and the behavior of capacitors, inductors, reactance, impedance, transformers, and signal filters. Laboratory experiments include circuit analysis, the use of proper measurement equipment, and troubleshooting.	3 Credits
	ETEC 113 - Circuits Lab Offered autumn. Prereq/Co-req., ETEC 105. Covers proper techniques of soldering and tool usage. Electronic technical language, hands on troubleshooting skills and basic electronic measurements are involved.	1 Credits
	ETEC 213 - Power Systems Technology Offered spring. Prereq., ETEC 106, M 121, Prereq/Co-req., M 122. A review of the principles of electricity, magnetism, and transformer action; the application of these principles in the operation of single-phase and three-phase ac/de motors, alternators, and generators; and the control methods for these electrical devices.	3 Credits
	ITS 221 - Project Management Offered autumn. Prereq., CSCI 172. Investigation of topics in project management including scope, definition, risk, procurement and the RFP. Management of time, cost, quality, and human resources. Concepts are reinforced with PM software.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	NRGY 101N - Intro to Sustainable Energy Offered autumn. A survey of traditional energy systems and technologies. Introduces conventional primary energy sources--coal, oil, gas, nuclear--and examines the technologies used to capture, convert, distribute, store, and utilize these energy sources. Consideration is given to physical and engineering aspects, as well as economic, social environmental, and political factors that determine the sustainability of these sources.	3 Credits
	NRGY 102 - Intro to Sustainable Energy II Offered autumn and spring. Prereq., NRGY 101 or consent of instructor. Same as CCS 102. A survey of renewable energy systems and technologies. Addresses physical and technical aspects of wind, solar, geothermal, hydro, tidal, biological, and wave energy systems. Consideration is given to engineering, economic, social, environmental, and political factors that determine implementation and sustainability. Credit not allowed for both NRG 102 and CCS 102.	3 Credits
	NRGY 195 - Practicum Offered summer only. Prereq., NRGY 101, M 121 or consent of instructor. Same as CCS 191. The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism.	2 Credits
	NRGY 235 - Building Energy Efficiency Offered Spring. Prereq., NRGY 101. Provides an overview of energy efficiency opportunities in residential buildings with an emphasis on the Passivhaus standard. Prepares the student to take the National RESNET Home Energy Rater Exam, which is a required final exam. Local home and industry tours, and hands-on exposure to HVAC controls and maintenance are also offered. Study of the analysis techniques used for reduction of energy consumption and energy management, including energy accounting and energy auditing. Residential and commercial building energy efficiency opportunities will be covered. Other topics addressed include motors, pumps, green building, and purchasing energy supplies. Career opportunities in energy efficiency will be discussed. Several local tours of energy-efficient homes will occur throughout the semester.	3 Credits
	NRGY 298 - Internship Offered every term. Prereq., M 121 and consent of instructor. Same as CCS 298. Extended classroom experience providing practical application of classroom learning through on the job training in a student's field of study. This experience increases student skills, prepares them for initial employment, and increases occupational awareness and professionalism.	2 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		51 Total Credits Required

Energy Technology Science Requirements

Rule: Take 3 credits

Note: ENSC 105N Environmental Science may be substituted for SCN 176N at the discretion of the program director based on future career and educational goals.

	Course	**Credits**
	SCN 175N - Integrated Physical Science I Offered every term. An introduction to the basic principles of physics, chemistry, and nuclear reactions with emphasis on the scientific method and process. A knowledge of basic algebraic functions, decimals, and scientific notation is recommended. Suitable for students with little science background.	3 Credits
	SCN 176N - Integrated Phys. Science II Offered spring term intermittently. An introduction to the fundamental principles of environmental and earth sciences. Course emphasizes the scientific method and process of science.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Energy Electives

Rule: Take 15 credits

Note: 3 credits of a general elective may be substituted in place of 3 credits of energy electives. This substitution must be approved by the program director.

	Course	**Credits**

	NRGY 241 - Alternative Fuels Offered autumn. Prereq., NRGY 101, M 121. Identifies alternative fuel sources; explores fuel characteristics; identifies and evaluates the infrastructure required to produce, store, distribute, and use them; discusses emission and conversion efficiencies; assesses social, environmental, and economic impacts.	3 Credits
	NRGY 242 - Solar Thermal & Wind Systems Offered autumn. Prereq., NRGY 101, M 121, Prereq., or Co-req., M 122. Same as CCS 242. Introduction to the fundamentals of solar and wind energy for the design and installation of solar thermal and wind systems. Includes an overview of the physics and chemistry of the resource and the technology, and will prepare students for a career in renewable energy or for installing a renewable energy system on their own home. Credit given for NRG 242 or CCS 242, not both.	3 Credits
	NRGY 243 - Fundmtl PV Design & Install Offered spring. Prereq., M 121, Prereq./Co-req., ETEC 105. An introduction to the fundamental principles and technologies of solar photovoltaic energy systems. Emphasis on system design and installation, including site and resource assessment, load analysis, troubleshooting, and cost analysis. The material covered prepares students for a career in renewable energy or for installing a renewable energy system on their own home.	3 Credits
	NRGY 244 - Bioenergy Offered spring. Prereqs., SCN 175N, M 121 and NRGY 102, or consent of instructor. Investigates the physical nature of various biorenewable resources and the technologies currently employed to produce, harvest, refine and convert these into useable energy, feedstocks and products.	3 Credits
	NRGY 245 - Fuel Cells Offered spring. Prereq., NRGY 101, M 121. An introduction to the different types of fuel cells (hydrogen, biological, metal/air, proton exchange membrane, etc.) accompanied by a critical examination of their applications, operation, efficiencies, advantages and disadvantages. Students must purchase a fuel cell kit for a laboratory component.	3 Credits
	NRGY 246 - Geothermal Energy Technology Offered Autumn. Prereqs., NRGY 101 and 102 and M 121. An introduction to the physical and technical aspects of geothermal energy systems. Topics covered include the fundamental principles of geology and hydrology, heat flow mechanisms, and a consideration of heat exchange systems including: dry steam, flash, binary systems, heat pumps, passive systems. The course also surveys political, economic, ecological, and social aspects of geothermal energy development.	3 Credits
	NRGY 250 - Energy Finance Offered summer. An introduction to the terminology, policies, and mathematical models for financing energy technology projects. Concepts covered include time value of money, tax code, triple bottom line, and cost-benefit analysis. Microsoft Excel will be used.	3 Credits

	NRGY 270 - Recycling Technology Prereq., Familiarity with general materials and their properties is assumed. Students must possess basic word processing skills, be able to download and open relatively large PDF files, and perform functions such as loading software and navigating between folders and files. Familiarity with basic computing skills is a must for online courses and will significantly influence your course experience. Provides an overview of recycling opportunities at both the residential and industrial scale. Prepares the student to work with a variety of materials including cellulosic, plastic, metal, glass and electronics waste. Students will be exposed to ANSI-IREC standards as well as LEED standards for repurposing and “upcycling” materials. Local home and industry tours, and hands-on exposure to materials processors such as glass pulverizer, cardboard grinders and plastics extruders will be part of the course. Study of efficiency techniques used for reduction of virgin material consumption and waste management, including materials auditing and accessing international materials reclamation will be included. Career opportunities in a variety of industries related to materials reclamation will be discussed. Possible projects include the building of a solar thermal forge.	4 Credits
	NRGY 290 - Undergraduate Research Offered every term. Preq., consent of instr. Independent research under the direction of a faculty member.	1 To 10 Credits
	NRGY 291 - Special Topics (R-6) Offered intermittently. Experimental offerings of Energy Technology faculty and visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 4 Credits
	NRGY 292 - Independent Study (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	NRGY 299 - Energy Technology Capstone (R-9) Offered spring and autumn. Students participate in an energy technology design, building, testing, and competition. Previous examples include participation in the Shell EcoMarathon and the American Society of Mechanical Engineering Human Powered Vehicle Challenge. This course is very time intensive and will require meetings outside of regularly scheduled class times. Travel to competition is strongly encouraged, but not required.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Programming and App Development

Thomas Gallagher, Program Director

Programming and App Development concentration emphasizes application development and business processes. Students learn to write software using an object-oriented programming paradigm for deployment to the web and the desktop. Relational database design, structured query language (SQL), and the ability to create applications which push and pull information from databases are highlighted. Graduates seek careers as computer support specialists, help desk technicians, web developers, software developers, and database administrators.

Associate of Applied Science - Information Technology; Programming andApp Development Option

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 60
Required Cumulative GPA: 2.0

Information Technology Core Courses

Rule: All courses are required
Note: Completion of IT core courses fulfills requirements for CAS in computer support.

	Course	Credits
	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ITS 150 - CCNA 1: Exploration Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. Introduction to networking field including terminology; protocols; local-area and wide-area networks; the OSI model; topologies; IP addressing; cabling and cabling tools; routers and router programming. Ethernet and network standards; and wireless technologies.	3 Credits
	ITS 165 - OS Commands and Scripts Offered spring. Introduction to operating system concepts through the use of contemporary software. Emphasizes file system management, networking, installation, maintenance, management, and disaster recovery practices using both the command interpreter and graphical user interface.	3 Credits

	ITS 210 - Network OS - Desktop Offered autumn. Prereq., ITS 150. In-depth study of a secure, multi-user, client-based network operating system. Topics include installation, administration of resources, performance, network services, and security.	3 Credits
	ITS 280 - Computer Repair & Maint. Offered autumn. Prereq./Co-req, ITS 150. In-depth study of personal computer hardware. Focus on field replaceable components. Topics include: storage devices, processors, system boards, memory, ports, cabling, power supplies, multimedia devices, printers, and troubleshooting.	3 Credits
	ITS 289 - Professional Certification (R-4) Offered autumn and spring. Prereq., consent of instr. Review objectives of an information technology industry-based professional certification. Certification objectives, preparation strategies, and exam strategies included. Course can be repeated for different industry-based professional certifications.	1 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		28 Total Credits Required

> *Mathematics*
> **Rule:** Any Mathematics course level 115 or higher

Programming and App Development Option Requirements

Rule: All courses are required

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	CSCI 113 - Programming with C++ I Offered intermittently. M 090 or ALEKS score >2 recommended prior to taking course. Object oriented programming using C++. Implementation of structured programming concepts along with construction of classes to create data types for defining objects.	3 Credits

	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 215E - Social & Ethical Issues in CS Offered autumn and spring. Prereq., WRIT 101. Exploration of ethical issues in the field of computing. Skills needed to identify and analyze various ethical concerns. Standard ethical concepts and theories, methods of ethical analysis. Strong emphasis on practical application of the ethical process.	3 Credits
	CSCI 221 - System Analysis and Design Offered spring. Prereq., CSCI 240. Analysis of the system development life cycle. Emphasis on planning, analyzing, designing, implementing and supporting information systems to meet business requirements. Covers feasibility studies, time and cost estimates, modeling tools, design tools, implementation and support strategies. A simulated business design project will be developed.	3 Credits
	CSCI 240 - Databases and SQL Offered autumn. Prereq., CSCI 172 or consent of instr. Relational database design including: requirements analysis, data structure, entity relationships, normalization, relational algebra and integrity. Physical implementation focusing on data storage; retrieval and modification; concurrency; optimization; security; SQL; and XML.	3 Credits
	ITS 298 - Internship/Cooperative Educati Offered autumn and spring. Not open to non-majors. On-the-job training in positions requiring information technology competencies. This experience increases students' skills, prepares them for initial employment, and increases occupational awareness and professionalism. Students work a minimum of six hours each week at an approved site and attend a weekly one-hour seminar.	2 Credits
	MART 232 - Interactive Web II Offered autumn and spring. Prereq., CAPP 120, CSCI 105, or consent of instr. Provides a background and foundation skills required for designing and implementing Web sites for public and private organizations. Marketing and design techniques are applied using state-of-the-art software.	3 Credits
Minimum Required Grade: C-		23 Total Credits Required

Programming and App Development Directed Electives

Rule: Required; take a minimum of 6 credits

Note: Student must select at least two directed elective courses (minimum of 6 credits). Directed electives must be approved by student's advisor. Examples of directed electives may include courses from the ACTG, BGEN, COMX, CSCI, DDSN, ITS, or WRIT rubrics. A student may request substitution of other courses to fulfill the directed elective requirement provided a clear connection can be made between a course, a student's career objective, and the degree program. All substitution requests require departmental approval.

Minimum Required Grade: C-

6 Total Credits Required

Network Administration and Security

Thomas Gallagher, Program Director

Network Administrator has become a common job title across all career fields. The Network Administration and Security concentration provides students with a background in network administration for supporting users and computing in a networked environment. Coursework in network operating systems, server administration, routers, switches, security, and IP telephony are all embedded in the Network Administration and Security concentration.

The University of Montana is a Cisco Networking Academy, IBM Academic Alliance, & a CompTIA Authorized Academy, and a member of the Microsoft Developers Network Academic Alliance. Opportunities exist for professional certification from Cisco (CCNA, CCENT, CCVA), Microsoft and Comp TIA (A+, Network+ and Security+).

Students entering the program should be prepared with basic computing skills (keyboarding, word processing, file management, and Internet applications) and adequate preparation in mathematics (completion of M 090 or equivalent placement scores). Underprepared students should allocate an additional semester to the suggested four semester sequence.

Strong emphasis on practical application of the ethical process.	3 Credits
	ITS 152 - CCNA 2: Exploration Offered fall. Prereq., ITS 150. Covers router theory and technologies including configurations, IOS software management, routine protocol configuration, TCP/IP, access-lists and introduction to LAN switching.	3 Credits
	ITS 212 - Network OS - Server Admin Offered autumn. Prereq./Co-req, ITS 210. Server technologies commonly used in local area networking. Topics include installation, administration, storage, application services, network services, security, reliability, and availability.	3 Credits
	ITS 214 - Network OS - Infrastructure Offered fall. Prereq., ITS 212. Principles and implementation of enterprise networking services. Topics include Protocol Binding, DNS, DHCP, WINS, Remote Access, IP Routing, IP Security, Network Address Translation, and Certificate Services.	3 Credits
	ITS 222 - Enterprise Security Offered spring. Prereq./Co-req, ITS 214. Examination of general information technology security concepts. Topics include access control, authentication, attack methods, remote access, web security, wireless networks, cryptography, internal infrastructure security, and external attacks. Security procedures, organizational policies, risk management and disaster recovery addressed.	3 Credits
	ITS 250 - CCNA 3: Exploration Offered spring (first half). Prereq., ITS 152. Covers router configurations including advanced IP addressing techniques, variable length subnet masking, intermediate routing protocols, Ethernet switching, virtual LANs, spanning-tree protocol, and VLAN trucking protocol.	3 Credits
	ITS 252 - CCNA 4: Exploration Offered (second half). Prereq., ITS 152. Project-based course in wide-area networking including advanced IP addressing techniques, network address translation, port address translation, DHCP, WAN technology and terminology, PPP, ISDN, DDR, Frame Relay, network management, and introduction to optical networking.	3 Credits
	ITS 298 - Internship/Cooperative Educati Offered autumn and spring. Not open to non-majors. On-the-job training in positions requiring information technology competencies. This experience increases students' skills, prepares them for initial employment, and increases occupational awareness and professionalism. Security Course Requirement

Rule: One course required

	Course	Credits
	ITS 271 - Securing Desktop/Mobile Dev. Course provides advanced technical information and relevant skills to successfully secure end-user devices, including desktop and laptop systems, tablets, cellular phones, and other portable computing equipment. Building on existing knowledge and skills in the areas of server management, network management, and security, students will gain mastery-level knowledge of security issues and best practices. Course content covers client/server exposures and protections (authentication options, packet signing and encryption of network traffic, appropriate implementation of permissions and rights); malware threats and treatments; transmission choices and precautions (wired, wireless, remote desktop access, virtual private networking (VPN)); cloud computing considerations; and corporate mobile device best practices. Hardening of the operating system and application software is also covered. Course content will focus on business-focused security practices to prepare students for Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits
	ITS 273 - Securing Networks Course provides advanced technical information and relevant skills to secure servers and business information. Building on existing knowledge and skills in the areas of server management, network management, and security, students will gain mastery-level knowledge of security issues and best practices. Students will examine and apply hardening techniques to operating systems and infrastructure-based applications. Strategies to ensure business continuity and data security are emphasized, including policy, data preservation, disaster preparedness, and disaster recovery. Legal guidelines and requirements, both domestic and international, are examined in the context of responsible and ethical computer use. Course content will focus on business-focused security practices to prepare students for the Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits

	ITS 275 - Border/Perimeter Network Sec Course provides advanced technical information and relevant skills to successfully secure computer networks at the public/private interface. Material focuses on hardware- and software-based techniques to prevent and monitor unauthorized or malicious access to corporate networks and servers. Building on existing knowledge of border and perimeter security, students will develop and implement best practices guidelines for boundary-related devices and software. Students will establish baseline assessments of network security from public access points and identify known and/or potential security vulnerabilities. Course content will focus on business-focused security practices to prepare students for the Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits
	ITS 277 - Software Assurance and File Sy Course provides advanced technical information and relevant skills to methodically secure software, including operating systems, custom application software, and commercially-available packages. Students will classify application software (including, but not limited to customer-facing, employee/partner, mobile/endpoint, database, and cloud-based), and perform risk analyses and common weakness assessments against these programs. Students will research various commercial, professional, and governmental security organizations and create a personalized repository of security-related checklists, toolkits, reference material, and resources. Students will investigate low-level file system structures such as master file tables, allocation tables, free space tables, file table entries, and metadata fields. Using common file signatures and checksums, students will verify internal content against external and metadata indicators. Students will examine 'hidden' disk space areas, including file, volume, and/or partition slack. Course content will focus on business-focused security practices to prepare students for Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Computer Aided Design Certificate

Thomas Gallagher, Interim Program Director

The Computer Aided Design (CAD) program offers graduates a pathway into professional careers as technicians in civil, mechanical, and architectural drafting. Other career opportunities exist in geographic information systems, mapping, surveying, and technical design. This one-year program prepares students in mathematics, business, and writing, as well as the following skills: graphic communications; computer-aided design and modeling systems; geographic information systems; and surveying. Graduates emerge with an understanding of how to use computer aided design software to solve real-world graphic communications problems in a team-oriented environment.

Certificate of Applied Science - Computer Aided Design

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 34

Required Cumulative GPA: 2.0

Computer Aided Design Core Certificate Courses

Rule: All courses are required

Note: WRIT 121 Technical Writing may be substituted for WRIT 101 at the discretion of the program advisor based on future career and educational goals.

	Course	Credits
	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	DDSN 113 - Technical Drafting Offered autumn. An introduction to the techniques and standard practices of communicating technical graphics. The class studies and practices drawing skills and learns the drawing standards that support the needs of the design team in advancing ideas. It also provides the foundation for successful drawing communication in the CAD environment. Topics covered include; drawing media and tools, hand drawing skills, perspectives, views, sketching, standard scales, geometric construction, sections, dimensioning, and tolerances.	3 Credits
	DDSN 114 - Introduction to CAD Offered autumn. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to computer aided design and drafting software for production of drawings and plans for architecture and engineering systems. Fundamentals of two dimensional drafting and drawing management for professional design.	3 Credits

	DDSN 116 - 3D CAD Offered autumn. Prereq. or Co-req., DDSN 114. CAD II provides a project-based, in-depth study of the skills and concepts involved in Computer Aided Design and Drafting. Topics covered include object grouping and sharing; three dimensional modeling; animation; and interoperability with other software. This course is the second in a two-part series covering the core AutoCAD application.	3 Credits
	DDSN 244 - GIS Mapping Offered Spring. Basics of geospatial technologies; remotely sensed imagery, GIS, and GPS and how each of the individual areas can be used together to analyze spatial datasets. Students will explore a wide range of spatial data and will learn to apply these data sets to real-world solutions.	3 Credits
	DDSN 245 - Civil Drafting Offered spring. Prereq. DDSN 114. Introduces students to computer aided design software for common survey and engineering design and drafting applications. Topics include collection of survey data; the coordinate geometry system; surfaces; subdivision and land planning; road design and corridor modeling; utilities; site grading and drainage; mapping; and 3D visualization.	4 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	SRVY 230 - Intro to Srvyg for Engineers Offered spring. M 090 or ALEKS score >2 recommended prior to taking course. Basic principles of civil surveying and the use of surveying equipment. Surveying introduces students to the link between field (construction) and office (design) practices. Students will become familiar with Global Positioning Systems (GPS), levels, level rods, total stations, basic survey computations, and their relationship to Computer Design Systems.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		34 Total Credits Required

Computer Support Certificate

Thomas Gallagher, Program Director

Computer Support is a 31-credit certificate program that prepares students for entry-level positions in the computing field. Required coursework includes programming, operating systems, networking, PC hardware, data modeling, and web technologies. Graduates pursue careers as help desk technicians, computer repair professionals, and computer support specialists. All students have the opportunity to complete the CompTIA A+ Computer Support Specialist industry certification. Coursework for the certificate program also leads to the A.A.S. degree in Information Technology.

Certificate of Applied Science - Computer Support

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 31

Required Cumulative GPA: 2.0

Computer Support Core Courses

Rule: All courses are required

Note: null

	Course	Credits
	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ITS 150 - CCNA 1: Exploration Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. Introduction to networking field including terminology; protocols; local-area and wide-area networks; the OSI model; topologies; IP addressing; cabling and cabling tools; routers and router programming. Ethernet and network standards; and wireless technologies.	3 Credits

	ITS 165 - OS Commands and Scripts Offered spring. Introduction to operating system concepts through the use of contemporary software. Emphasizes file system management, networking, installation, maintenance, management, and disaster recovery practices using both the command interpreter and graphical user interface.	3 Credits
	ITS 210 - Network OS - Desktop Offered autumn. Prereq., ITS 150. In-depth study of a secure, multi-user, client-based network operating system. Topics include installation, administration of resources, performance, network services, and security.	3 Credits
	ITS 280 - Computer Repair & Maint. Offered autumn. Prereq./Co-req, ITS 150. In-depth study of personal computer hardware. Focus on field replaceable components. Topics include: storage devices, processors, system boards, memory, ports, cabling, power supplies, multimedia devices, printers, and troubleshooting.	3 Credits
	ITS 289 - Professional Certification (R-4) Offered autumn and spring. Prereq., consent of instr. Review objectives of an information technology industry-based professional certification. Certification objectives, preparation strategies, and exam strategies included. Course can be repeated for different industry-based professional certifications.	1 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		28 Total Credits Required

Mathematics

Rule: Chose one course from the following or any Mathematics course having one of these as a prerequisite

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits

	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Energy Technology Certificate

Bradley Layton, Program Director

The Energy Technology program offers a 30-credit certificate preparing students for entry-level positions in the energy technology field. Required coursework includes mathematics; writing; energy technologies and systems; and energy storage and distribution. Coursework for the certificate program also leads to the A.A.S. degree in Energy Technology.

Certificate of Applied Science - Energy Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 30

Required Cumulative GPA: 2.0

Energy Technology Core Requirements

Rule: All courses are required

Note: WRIT 121 Technical Writing may be substituted for WRIT 101 at the discretion of the program director based on future career and educational goals.
BGEN 160S Issue in Sustainability may be substituted for BGEN 105S at the discretion of the program director.
ETEC 214 Energy Storage and Distribution may be substituted for ETEC 213 at the discretion of the program director.

	Course	**Credits**
	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits

	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ETEC 105 - DC Circuit Analysis Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to direct current (DC) and analysis of series, parallel, and series-parallel circuits. Topics include electrical quantities, units of measurement, measurement instruments, resistors, current, voltage, power, energy, network theorems, equivalent circuits, magnetism, and electromagnetism. Laboratory experiments include circuit analysis; the proper use of measurement equipment and techniques; and troubleshooting.	4 Credits
	ETEC 106 - AC Circuit Analysis Offered autumn and spring. Analysis of alternating current (AC) circuits and the behavior of capacitors, inductors, reactance, impedance, transformers, and signal filters. Laboratory experiments include circuit analysis, the use of proper measurement equipment, and troubleshooting.	3 Credits
	ETEC 113 - Circuits Lab Offered autumn. Prereq/Co-req., ETEC 105. Covers proper techniques of soldering and tool usage. Electronic technical language, hands on troubleshooting skills and basic electronic measurements are involved.	1 Credits
	ETEC 213 - Power Systems Technology Offered spring. Prereq., ETEC 106, M 121, Prereq/Co-req., M 122. A review of the principles of electricity, magnetism, and transformer action; the application of these principles in the operation of single-phase and three-phase ac/de motors, alternators, and generators; and the control methods for these electrical devices.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	NRGY 101N - Intro to Sustainable Energy Offered autumn. A survey of traditional energy systems and technologies. Introduces conventional primary energy sources--coal, oil, gas, nuclear--and examines the technologies used to capture, convert, distribute, store, and utilize these energy sources. Consideration is given to physical and engineering aspects, as well as economic, social environmental, and political factors that determine the sustainability of these sources.	3 Credits
	NRGY 195 - Practicum Offered summer only. Prereq., NRGY 101, M 121 or consent of instructor. Same as CCS 191. The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism.	2 Credits

	NRGY 235 - Building Energy Efficiency Offered Spring. Prereq., NRGY 101. Provides an overview of energy efficiency opportunities in residential buildings with an emphasis on the Passivhaus standard. Prepares the student to take the National RESNET Home Energy Rater Exam, which is a required final exam. Local home and industry tours, and hands-on exposure to HVAC controls and maintenance are also offered. Study of the analysis techniques used for reduction of energy consumption and energy management, including energy accounting and energy auditing. Residential and commercial building energy efficiency opportunities will be covered. Other topics addressed include motors, pumps, green building, and purchasing energy supplies. Career opportunities in energy efficiency will be discussed. Several local tours of energy-efficient homes will occur throughout the semester.	4 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		27 Total Credits Required

Energy Electives

Rule: Take 3 credits

	Course	Credits
	NRGY 241 - Alternative Fuels Offered autumn. Prereq., NRGY 101, M 121. Identifies alternative fuel sources; explores fuel characteristics; identifies and evaluates the infrastructure required to produce, store, distribute, and use them; discusses emission and conversion efficiencies; assesses social, environmental, and economic impacts.	3 Credits
	NRGY 242 - Solar Thermal & Wind Systems Offered autumn. Prereq., NRGY 101, M 121, Prereq., or Co-req., M 122. Same as CCS 242. Introduction to the fundamentals of solar and wind energy for the design and installation of solar thermal and wind systems. Includes an overview of the physics and chemistry of the resource and the technology, and will prepare students for a career in renewable energy or for installing a renewable energy system on their own home. Credit given for NRG 242 or CCS 242, not both.	3 Credits

	NRGY 243 - Fundmtl PV Design & Install Offered spring. Prereq., M 121, Prereq./Co-req., ETEC 105. An introduction to the fundamental principles and technologies of solar photovoltaic energy systems. Emphasis on system design and installation, including site and resource assessment, load analysis, troubleshooting, and cost analysis. The material covered prepares students for a career in renewable energy or for installing a renewable energy system on their own home.	3 Credits
	NRGY 244 - Bioenergy Offered spring. Prereqs., SCN 175N, M 121 and NRGY 102, or consent of instructor. Investigates the physical nature of various biorenewable resources and the technologies currently employed to produce, harvest, refine and convert these into useable energy, feedstocks and products.	3 Credits
	NRGY 245 - Fuel Cells Offered spring. Prereq., NRGY 101, M 121. An introduction to the different types of fuel cells (hydrogen, biological, metal/air, proton exchange membrane, etc.) accompanied by a critical examination of their applications, operation, efficiencies, advantages and disadvantages. Students must purchase a fuel cell kit for a laboratory component.	3 Credits
	NRGY 246 - Geothermal Energy Technology Offered Autumn. Prereqs., NRGY 101 and 102 and M 121. An introduction to the physical and technical aspects of geothermal energy systems. Topics covered include the fundamental principles of geology and hydrology, heat flow mechanisms, and a consideration of heat exchange systems including: dry steam, flash, binary systems, heat pumps, passive systems. The course also surveys political, economic, ecological, and social aspects of geothermal energy development.	3 Credits
	NRGY 250 - Energy Finance Offered summer. An introduction to the terminology, policies, and mathematical models for financing energy technology projects. Concepts covered include time value of money, tax code, triple bottom line, and cost-benefit analysis. Microsoft Excel will be used.	3 Credits
	NRGY 270 - Recycling Technology Prereq., Familiarity with general materials and their properties is assumed. Students must possess basic word processing skills, be able to download and open relatively large PDF files, and perform functions such as loading software and navigating between folders and files. Familiarity with basic computing skills is a must for online courses and will significantly influence your course experience. Provides an overview of recycling opportunities at both the residential and industrial scale. Prepares the student to work with a variety of materials including cellulosic, plastic, metal, glass and electronics waste. Students will be exposed to ANSI-IREC standards as well as LEED standards for repurposing and “upcycling” materials. Local home and industry tours, and hands-on exposure to materials processors such as glass pulverizer, cardboard grinders and plastics extruders will be part of the course. Study of efficiency techniques used for reduction of virgin material consumption and waste management, including materials auditing and accessing international materials reclamation will be included. Career opportunities in a variety of industries related to materials reclamation will be discussed. Possible projects include the building of a solar thermal forge.	4 Credits

	NRGY 290 - Undergraduate Research Offered every term. Preq., consent of instr. Independent research under the direction of a faculty member.	1 To 10 Credits
	NRGY 291 - Special Topics (R-6) Offered intermittently. Experimental offerings of Energy Technology faculty and visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 4 Credits
	NRGY 292 - Independent Study (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	NRGY 299 - Energy Technology Capstone (R-9) Offered spring and autumn. Students participate in an energy technology design, building, testing, and competition. Previous examples include participation in the Shell EcoMarathon and the American Society of Mechanical Engineering Human Powered Vehicle Challenge. This course is very time intensive and will require meetings outside of regularly scheduled class times. Travel to competition is strongly encouraged, but not required.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Cybersecurity

Professional Certificate - Cybersecurity

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 16

Required Cumulative GPA: 2.0

Note: Prerequisite skills needed to succeed in this proposed NIS certificate program are met with a degree in Network Management or related field or equivalent work experience. It would be helpful for incoming students to have industry certifications such as A+, CCNA, Security+, Microsoft Servers, or Net+ to establish an appropriate baseline skill set.

Core Certificate Courses

Rule: All courses are required

	Course	**Credits**

	ITS 271 - Securing Desktop/Mobile Dev. Course provides advanced technical information and relevant skills to successfully secure end-user devices, including desktop and laptop systems, tablets, cellular phones, and other portable computing equipment. Building on existing knowledge and skills in the areas of server management, network management, and security, students will gain mastery-level knowledge of security issues and best practices. Course content covers client/server exposures and protections (authentication options, packet signing and encryption of network traffic, appropriate implementation of permissions and rights); malware threats and treatments; transmission choices and precautions (wired, wireless, remote desktop access, virtual private networking (VPN)); cloud computing considerations; and corporate mobile device best practices. Hardening of the operating system and application software is also covered. Course content will focus on business-focused security practices to prepare students for Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits
	ITS 273 - Securing Networks Course provides advanced technical information and relevant skills to secure servers and business information. Building on existing knowledge and skills in the areas of server management, network management, and security, students will gain mastery-level knowledge of security issues and best practices. Students will examine and apply hardening techniques to operating systems and infrastructure-based applications. Strategies to ensure business continuity and data security are emphasized, including policy, data preservation, disaster preparedness, and disaster recovery. Legal guidelines and requirements, both domestic and international, are examined in the context of responsible and ethical computer use. Course content will focus on business-focused security practices to prepare students for the Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits
	ITS 275 - Border/Perimeter Network Sec Course provides advanced technical information and relevant skills to successfully secure computer networks at the public/private interface. Material focuses on hardware- and software-based techniques to prevent and monitor unauthorized or malicious access to corporate networks and servers. Building on existing knowledge of border and perimeter security, students will develop and implement best practices guidelines for boundary-related devices and software. Students will establish baseline assessments of network security from public access points and identify known and/or potential security vulnerabilities. Course content will focus on business-focused security practices to prepare students for the Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits

	ITS 277 - Software Assurance and File Sy Course provides advanced technical information and relevant skills to methodically secure software, including operating systems, custom application software, and commercially-available packages. Students will classify application software (including, but not limited to customer-facing, employee/partner, mobile/endpoint, database, and cloud-based), and perform risk analyses and common weakness assessments against these programs. Students will research various commercial, professional, and governmental security organizations and create a personalized repository of security-related checklists, toolkits, reference material, and resources. Students will investigate low-level file system structures such as master file tables, allocation tables, free space tables, file table entries, and metadata fields. Using common file signatures and checksums, students will verify internal content against external and metadata indicators. Students will examine 'hidden' disk space areas, including file, volume, and/or partition slack. Course content will focus on business-focused security practices to prepare students for Security+, CISSP, and Security Pro industry certifications. Prerequisite Skills: Course builds upon established skills in security, server management, and network management. Students should be working as a network manager or have completed appropriate skills-based coursework using MS Server 2008/2012 & Mware.	4 Credits
Minimum Required Grade: C-		16 Total Credits Required

Health Information Technology Health Professions

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Professional Certificate - Health Information Technology; Track: Health Professions

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 18

Required Cumulative GPA: 2.0

Note: This certificate requires the courses below in addition to the successful completion of a degree in a clinical health profession-related field, i.e. nursing.

Computing courses

Rule: All courses are required

	Course	**Credits**
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits

	CSCI 240 - Databases and SQL Offered autumn. Prereq., CSCI 172 or consent of instr. Relational database design including: requirements analysis, data structure, entity relationships, normalization, relational algebra and integrity. Physical implementation focusing on data storage; retrieval and modification; concurrency; optimization; security; SQL; and XML.	3 Credits
	HIT 101 - Intro to Healthcare Informatic Introduces the discipline of healthcare information technology. An overview of the subject including history, basic knowledge of healthcare informatics and tools as applied in support of healthcare delivery. Students will gain an introductory level about the complexities of health care and how informatics fits within the US Healthcare System.	3 Credits
	HIT 265 - Electronic Health Records Prereq., HIT 101. An introduction to the electronic health record (EHR). Students will study the use of the EHR in improving healthcare quality, accessibility, and cost-effectiveness. EHR implementation and its use within the internal clinical office will be examined. The EHR will be studied in the context of a comprehensive Health Information System (HIS) supporting our society's interdisciplinary clinical healthcare system.	3 Credits
	ITS 150 - CCNA 1: Exploration Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. Introduction to networking field including terminology; protocols; local-area and wide-area networks; the OSI model; topologies; IP addressing; cabling and cabling tools; routers and router programming. Ethernet and network standards; and wireless technologies.	3 Credits
	ITS 210 - Network OS - Desktop Offered autumn. Prereq., ITS 150. In-depth study of a secure, multi-user, client-based network operating system. Topics include installation, administration of resources, performance, network services, and security.	3 Credits
Minimum Required Grade: C-		18 Total Credits Required

Degree Specific Credits: 13

Required Cumulative GPA: 2.0

Note: This certificate requires both the courses listed below and the successful completion of a degree in a computing-related field, i.e. Information Technology.

Health Information Courses

Rule: All courses are required

	Course	Credits
	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits
	AHMS 156 - Medical Billing Fundamentals Offered every term. Prereq. or coreq., AHMS 220 or consent of instr. An introduction to insurance claim processing for the major medical insurance programs. Students will be provided with a basic knowledge of CPT and ICD-9 procedural and diagnostic coding. Emphasis on completing universal insurance forms to maximize reimbursement as well as trouble shoot denied or underpaid claims.	3 Credits
	HIT 101 - Intro to Healthcare Informatic Introduces the discipline of healthcare information technology. An overview of the subject including history, basic knowledge of healthcare informatics and tools as applied in support of healthcare delivery. Students will gain an introductory level about the complexities of health care and how informatics fits within the US Healthcare System.	3 Credits
	HIT 265 - Electronic Health Records Prereq., HIT 101. An introduction to the electronic health record (EHR). Students will study the use of the EHR in improving healthcare quality, accessibility, and cost-effectiveness. EHR implementation and its use within the internal clinical office will be examined. The EHR will be studied in the context of a comprehensive Health Information System (HIS) supporting our society's interdisciplinary clinical healthcare system.	3 Credits
	NRSG 100 - Introduction to Nursing Offered each semester. This online course is a prerequisite to the Practical Nursing program. Student will be presented with an introductory level of the core concepts of nursing practice and other issues such as the legal concerns and ethical/cultural issues that face professional nurses on a consistent basis.	1 Credits
Minimum Required Grade: C-		13 Total Credits Required

Electronics Technology (CAS)

Certificate of Applied Science - Electronics Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 31
Required Cumulative GPA: 2.0

Core Courses

Rule: Must complete all of the following courses:

	Course	Credits
	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
	CSCI 113 - Programming with C++ I Offered intermittently. M 090 or ALEKS score >2 recommended prior to taking course. Object oriented programming using C++. Implementation of structured programming concepts along with construction of classes to create data types for defining objects.	3 Credits
	ETEC 105 - DC Circuit Analysis Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to direct current (DC) and analysis of series, parallel, and series-parallel circuits. Topics include electrical quantities, units of measurement, measurement instruments, resistors, current, voltage, power, energy, network theorems, equivalent circuits, magnetism, and electromagnetism. Laboratory experiments include circuit analysis; the proper use of measurement equipment and techniques; and troubleshooting.	4 Credits
	ETEC 106 - AC Circuit Analysis Offered autumn and spring. Analysis of alternating current (AC) circuits and the behavior of capacitors, inductors, reactance, impedance, transformers, and signal filters. Laboratory experiments include circuit analysis, the use of proper measurement equipment, and troubleshooting.	3 Credits
	ETEC 113 - Circuits Lab Offered autumn. Prereq/Co-req., ETEC 105. Covers proper techniques of soldering and tool usage. Electronic technical language, hands on troubleshooting skills and basic electronic measurements are involved.	1 Credits
	ETEC 250 - Solid State Electronics I Offered spring. Prereq. ETEC 105. An introduction to semiconductor technologies used in solid state electronics with an emphasis on diodes and transistors. Classroom concepts are reinforced through lab-based experiments.	4 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits

	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		31 Total Credits Required

Energy Auditor

Technical Certificate - Energy Auditor

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 18
Required Cumulative GPA: 2.0

Core Courses

Rule: Must complete all of the following courses:

	Course	**Credits**
	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	ETEC 213 - Power Systems Technology Offered spring. Prereq., ETEC 106, M 121, Prereq/Co-req., M 122. A review of the principles of electricity, magnetism, and transformer action; the application of these principles in the operation of single-phase and three-phase ac/de motors, alternators, and generators; and the control methods for these electrical devices.	3 Credits

	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	NRGY 101N - Intro to Sustainable Energy Offered autumn. A survey of traditional energy systems and technologies. Introduces conventional primary energy sources--coal, oil, gas, nuclear--and examines the technologies used to capture, convert, distribute, store, and utilize these energy sources. Consideration is given to physical and engineering aspects, as well as economic, social environmental, and political factors that determine the sustainability of these sources.	3 Credits
	NRGY 195 - Practicum Offered summer only. Prereq., NRGY 101, M 121 or consent of instructor. Same as CCS 191. The practicum provides students with a supervised field experience. Students will gain hands-on experience with energy specific technologies in a fast-paced creative environment. This course increases students' occupational awareness and professionalism.	2 Credits
	NRGY 235 - Building Energy Efficiency Offered Spring. Prereq., NRGY 101. Provides an overview of energy efficiency opportunities in residential buildings with an emphasis on the Passivhaus standard. Prepares the student to take the National RESNET Home Energy Rater Exam, which is a required final exam. Local home and industry tours, and hands-on exposure to HVAC controls and maintenance are also offered. Study of the analysis techniques used for reduction of energy consumption and energy management, including energy accounting and energy auditing. Residential and commercial building energy efficiency opportunities will be covered. Other topics addressed include motors, pumps, green building, and purchasing energy supplies. Career opportunities in energy efficiency will be discussed. Several local tours of energy-efficient homes will occur throughout the semester.	4 Credits
Minimum Required Grade: C-		18 Total Credits Required

Network & Information Security Professional

Technical Certificate - Recycling Technology

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 16
Required Cumulative GPA: 2.0

Core Courses

Rule: Must complete all of the following courses:

	Course	Credits
	BGEN 160S - Issues in Sustainability Offered every term. Same as CCN 160S. This literature-intensive course is intended to expose the student to a variety of essays addressing the balance of economic development with the principles of sustainability and social equity. The student is offered an introduction to sustainability concepts, natural systems/cycles and environmental economics. Natural capitalism and triple bottom line maximization is explored, along with the role of corporations and small businesses in sustainable development. A survey of issues surrounding corporate social responsibility and sustainability-driven innovation will be conducted.	3 Credits
	ITS 221 - Project Management Offered autumn. Prereq., CSCI 172. Investigation of topics in project management including scope, definition, risk, procurement and the RFP. Management of time, cost, quality, and human resources. Concepts are reinforced with PM software.	3 Credits
	NRGY 102 - Intro to Sustainable Energy II Offered autumn and spring. Prereq., NRGY 101 or consent of instructor. Same as CCS 102. A survey of renewable energy systems and technologies. Addresses physical and technical aspects of wind, solar, geothermal, hydro, tidal, biological, and wave energy systems. Consideration is given to engineering, economic, social, environmental, and political factors that determine implementation and sustainability. Credit not allowed for both NRG 102 and CCS 102.	3 Credits
	NRGY 241 - Alternative Fuels Offered autumn. Prereq., NRGY 101, M 121. Identifies alternative fuel sources; explores fuel characteristics; identifies and evaluates the infrastructure required to produce, store, distribute, and use them; discusses emission and conversion efficiencies; assesses social, environmental, and economic impacts.	3 Credits
	NRGY 270 - Recycling Technology Prereq., Familiarity with general materials and their properties is assumed. Students must possess basic word processing skills, be able to download and open relatively large PDF files, and perform functions such as loading software and navigating between folders and files. Familiarity with basic computing skills is a must for online courses and will significantly influence your course experience. Provides an overview of recycling opportunities at both the residential and industrial scale. Prepares the student to work with a variety of materials including cellulosic, plastic, metal, glass and electronics waste. Students will be exposed to ANSI-IREC standards as well as LEED standards for repurposing and “upcycling” materials. Local home and industry tours, and hands-on exposure to materials processors such as glass pulverizer, cardboard grinders and plastics extruders will be part of the course. Study of efficiency techniques used for reduction of virgin material consumption and waste management, including materials auditing and accessing international materials reclamation will be included. Career opportunities in a variety of industries related to materials reclamation will be discussed. Possible projects include the building of a solar thermal forge.	4 Credits
Minimum Required Grade: C-		16 Total Credits Required

Josef Crepeau, Chair

The Department of Applied Arts and Sciences provides instruction in five disciplines: communication, mathematics, behavioral science and psychology, science, and writing. Many courses from these disciplines count towards the general education requirements for the Associate of Arts (AA) degree and frequently are programmatic requirements for Associate of Applied Science (AAS) degrees.

Applied Arts and Sciences

Back to Top

- AASC 100 - Intro to University Experience
  Credits: 3. This course is designed to help new students make a successful transition to college and acquire the skills needed to become competent and successful in higher education. Topics include an introduction to campus resources and academic policies; motivation and time management; study skills and learning strategies; critical thinking and problem solving; ethics, diversity and collaboration; information literacy and research. The course culminates with a semester capstone project. Elective credit only. Credit not allowed for both AASC 100 and AASC 101.
- AASC 101 - Study & Learning Strategy
  Credits: 2. This course facilitates the development of skills needed to become competent and successful in higher education. Topics include management of classroom performance, time, and money; memory, listening and note-taking; reading and test-taking strategies; critical thinking and problem-solving; information literacy and research; ethics and diversity; stress management and healthy choices. Elective credit only. Credit not allowed for both AASC 100 and AASC 101. Course Attributes: Study Skills Course
- AASC 196T - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course
- AASC 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

Art

Back to Top

- ARTZ 195 - Student Teaching
  Credits: 1 TO 6. (R-6) Offered intermittently. Organized student teaching.

Biology-General

Back to Top

- BIOB 295 - Student Teaching
  Credits: 1 TO 6. (R-6) Offered intermittently. Organized student teaching.

Biology-Human

Back to Top

- BIOH 108 - Basic Anatomy
  Credits: 3. Offered Intermittently. Structures of the human body and their basic functions.
- BIOH 201N - Human Anat Phys I (equiv 301)
  Credits: 4. Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous

system. Required, integrated laboratory includes some dissection. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- BIOH 202N - Human Anat and Phys I Lab

  Credits: 4. Offered autumn and spring. Coreq., BIOH 201. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. A cadaver lab is included. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- BIOH 211N - Human Anat Phys II (equiv 311)

  Credits: 4. Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- BIOH 212N - Human Anat Phys II Lab

  Credits: 4. Offered autumn and spring. Prereq., BIOH 201N. Coreq., BIOH 211. Continuation of 201N. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. A cadaver lab is included. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- BIOH 213N - The Biology of Behavior

  Credits: 3. Offered spring. Prereq., BIOB 101N. An introduction to the biological basis of human behavior, including neuron function and the roles of hormones, heredity, and environmental influences. Behavioral topics include sensation, learning, emotion, and issues such as obesity, addiction, and stress. Intended for students to satisfy the science with a lab general education requirement. Course Attributes: Natural Science Lab Course (N)

- BIOH 261 - Human Physiology lab

  Credits: 4. Offered autumn. Prereq., BIOH 201N, 202N, 211N, and 212N. In-depth exploration of principles and clinical consequences of the physiology of selected human organ systems. Building upon basic concepts covered in BIOH 201N, 202N, 211N, and 212N, students study membrane functions, neural physiology, nervous system integration, endocrine and peripheral nervous system function and coordination, circulatory, respiratory, renal, digestive, and reproductive physiology.

- BIOH 295 - Student Teaching

  Credits: 1 TO 6. (R-6) Offered intermittently. Organized student teaching.

Chemical Addiction Studies

Back to Top

- CAS 140X - Addictions and Diversity

  Credits: 3. Offered intermittently. This course required for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. Introduction to multicultural competencies where students will be exposed to the fundamentals of working with substance abusing and dependent individuals from the cultural impact of race, nationality, gender, age, sexual orientation, religion, and socio-economic status on the development and progression of alcohol/drug problems. Appropriate for students of Social Work, Psychology, community health, Business and Counseling students, Education, and those with an interest in diversity and addictions. Course Attributes: Cultural Intl Diversity (X)

- CAS 185 - Prevention Practices

  Credits: 3. Offered intermittently. This course required for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. The course introduces strategies for environmental prevention that focus on altering and improving the environment by changing social norms or attitudes, controlling the availability of illicit drugs or alcohol, or strengthening enforcement of laws and regulations. Risk and Protective Theory will be outlined, as well as the five categories of environmental strategies.

This course is appropriate for everyone who has or will have a role in prevention, education, community health, and/or community change. Required for Chemical Addiction Studies students. May also be appropriate for students of social work, psychology, sociology, community health or those with an interest in learning about alcohol and drug prevention in society.

- CAS 191 - Special Topics

  Credits: 3. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- CAS 195 - Field Work/Clinical/Practicum

  Credits: 1 TO 3. (R-3) Offered every autumn and spring. Prereq., CAS 185 and CAS 242 and consent of instructor. This field work placement focuses on PREVENTION and is created to provide Chemical Addiction Studies students with direct experience working in community organizations where they will create and implement alcohol and drug prevention activities. May also be appropriate for students of Social Work, Psychology, Sociology, Community Health or those with an interest in learning about prevention practices with direct experience in community organizations. Course Attributes: Internships/Practicums

- CAS 201 - Theories of Counseling

  Credits: 3. Offered intermittently. This is an entry level survey course of various approaches to counseling and psychotherapy and is a required course by the state of Montana for Addiction Counselor Licensure. The course is a mixture of lecture, discussion, experiential learning, demonstrations, role playing, viewing counseling sessions, and practice of the major contemporary models of counseling. Ethical and professional issues are also addressed.

- CAS 210 - Individual Counseling

  Credits: 3. Offered intermittently. Prereq., CAS 201 and CAS 242. This course is intended for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. Major theories and practice of individual counseling for the client with substance abusing or chemically dependent behavior is presented.

- CAS 225 - Group Counseling

  Credits: 3. Offered Intermittently. Prereq., CAS 201. This course is intended for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. Major theories and practice of counseling for the client with substance abusing or chemically dependent behavior in group settings. Includes comprehensive group approaches, family therapy and other appropriate group strategies. Includes group dynamics and strategies to managing group sessions.

- CAS 242 - Fund Subst Abuse and Addiction

  Credits: 3. This course is offered intermittently for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. May also be appropriate for Students of Social Work, Psychology, Sociology, or Community Health.

- CAS 243 - Substance Abuse Counseling I

  Credits: 3. Offered autumn and spring and summers intermittently. Prereq., CAS 242 and consent of instr. This course is required for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. This course is created to provide students specific knowledge regarding the theories, research, and evidenced-based literature in the provision of addiction counseling services. Students will be introduced to the overall scope of the problems of addictions, professional characteristics and principles of addiction counselors, ethical and legal responsibilities of professional behavior, addiction counseling skills and competencies required to be addiction counselors.

- CAS 248 - Substance Abuse Counseling II

  Credits: 3. Offered intermittently. Prereq., CAS 242 and consent of instr. This course is required for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. Meets specific State of Montana educational requirements associated with individual and group counseling for addiction, as well as ethics for addiction counselors. The course requires the student to draw upon the resources provided by experts. The course work significant amount of experiential application and counseling practice techniques.

- CAS 260 - Addiction Assess/Documentation

Credits: 3. Offered intermittently. Prereq., CAS 242 and consent of instr. This course is required for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. Intended to provide a comprehensive education to meet State of Montana education requirements for Licensure in Addiction Counseling. Students will be trained in clinical assessment diagnosis, treatment planning and patient record documentation with the client who has substance use disorders. Students will complete experiential application of the materials.

- CAS 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CAS 292 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CAS 295 - Field Work/Clinical/Practicum
  Credits: 1 TO 4. (R-4) Offered intermittently. Prereq., CAS 185, CAS 195, and CAS 242. This course is offered for students seeking to obtain their AA degree in Chemical and Addiction Studies and who wish to become Licensed Addiction Counselors in the State of Montana. This Field Work Placement focuses on addiction treatment and counseling activities. The student will work in the community under the supervision of an addiction treatment professional and be given the opportunity to witness and participate in alcohol and drug treatment counseling activities. Course Attributes: Internships/Practicums

Chemistry

Back to Top

- CHMY 195 - Student Teaching
  Credits: 1 TO 6. (R-6) Offered intermittently. Organized student teaching.

Communication

Back to Top

- COMX 102 - Interprsnl Skills in Workplace
  Credits: 1. This course will introduce students to interpersonal communication theory which can be applied to a workplace environment. Students will learn effective communication strategies that promote success in professional and personal relationships.
- COMX 140L - Intro to Visual Rhetoric
  Credits: 3. Offered autumn and spring. An introduction to the persuasive nature of visual symbols as texts. Readings will include historical to contemporary rhetorical criticisms on advertising, billboards, bodies, cartoons, memorials, and photography. Course Attributes: Lit & Artistic Studies (L)
- COMX 191 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- COMX 192 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.
- COMX 198 - Internship
  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prerequisite, consent of instructor. Extended classroom experience that provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (398, 498) may count toward graduation.
- COMX 212X - Intro to Intercultural Com
  Credits: 3. Offered autumn and spring. This course provides students with an introduction to communicating across cultures. Local and global case studies and theories will be explored.

Students will explore the influence of immediate communication and social media on large scale social issues. Course Attributes: Cultural Intl Diversity (X)

- COMX 217A - Oral Interpretation of Lit

  Credits: 3. Offered intermittently. Introduction to orally presenting literature to an audience. Focus is on analyzing and performing prose, drama, poetry, and children's literature to express points of view. Course Attributes: Expressive Arts Course (A)

- COMX 219S - Survey of Children's Comm

  Credits: 3. Offered autumn. Focus on communication processes and contemporary communication environments of children and adolescents. Topics include language development and the brain, nonverbal communication development, media, contracting, bullying, and gender. Course Attributes: Social Sciences Course (S)

- COMX 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- COMX 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

Creative Writing

Back to Top

- CRWR 210A - Intro Fiction Workshop

  Credits: 3. Offered intermittently. This beginning writing workshop emphasizes the reading, discussion, and revision of students' short fiction. Students will be introduced to the technical elements of writing fiction. No prior experience in writing short fiction required. Course Attributes: Expressive Arts Course (A)

- CRWR 211A - Intro Poetry Workshop

  Credits: 3. Offered intermittently. This beginning writing workshop focuses on the reading, discussion, and revision of students' poems. Students will study and use models of poetic techniques. No prior experience in writing poetry required. Course Attributes: Expressive Arts Course (A)

- CRWR 240A - Intro Creative Writing Wrkshp

  Credits: 3. Offered every term. Beginning writing workshop designed for students to explore genres of creative writing with opportunities for students to write, and revise using genre-specific writing techniques. Course Attributes: Expressive Arts Course (A)

Environmental Studies

Back to Top

- ENST 231H - Nature and Society

  Credits: 3. Offered intermittently, autumn and spring. Prereq., WRIT 101. Explores the relationship between ideas about nature and the development of political and social ideas, institutions, and practices in primarily western (Euro-American) society. Course is an elective for students in the 2-uear AA and AAS degree programs. Course Attributes: Hist & Cultural Studies (H)
  Writing Course-Intermediate

Mathematics

Back to Top

- M 065 - Prealgebra

  Credits: 3. Offered every term. Prereq., ALEKS placement >= 1. Arithmetic and basic algebra skills needed for Introductory Algebra. Topics include integers and rational numbers, decimals and percentages with applications, ratios and proportions with applications, single variable linear equations with applications, introduction to graphing, exponents, factoring, and an introduction to

polynomials. Credit does not count toward a certificate or degree. Credit does not count toward Associate of Arts, Associate of Applied Science, or Baccalaureate degrees. MC Course Attributes: Technical Course

- M 090 - Introductory Algebra

  Credits: 3. Offered every term. Prereq., M 065 or ALEKS placement >= 2. Review of arithmetic principles of integers and rational numbers, linear equations in one or two unknowns, systems of linear equations and operations with polynomials and rational expressions. Credit does not count toward an Associate of Arts, Associate of Applied Science, or Baccalaureate degree. MC

- M 095 - Intermediate Algebra

  Credits: 3. Offered autumn and spring. Prereq., M 090 or ALEKS placement >= 3. Topics include linear equations, inequalities, applications and graphing; polynomials; radicals, rational exponents and complex numbers; quadratic equations. Graphing calculator required. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC

- M 111 - Technical Mathematics

  Credits: 3. Offered autumn and spring. Prereq., ALEKS placement >= 2 or M 065. Designed to provide the mathematical background necessary for success in the industrial areas. Topics covered include percent, ratio proportion, formula evaluation, basic algebra and geometry concepts, trigonometry, measurement, statistics, and graphing. Markdowns, inventory turnover, and other basic formulas. Credit does not count toward Associate of Arts or Baccalaureate degrees. MC Course Attributes: Technical Course

Psychology

Back to Top

- PSYX 161S - Fund of Organizational Psych

  Credits: 3. Offered intermittently. Foundation in the psychological processes that influence behavior of people in organizational settings. Course Attributes: Social Sciences Course (S)

- PSYX 230 - Developmental Psychology

  Credits: 3. Offered autumn, spring, summer. Prereq., PSYX 100S. The study of human physical, cognitive and psychosocial development throughout the life span. Content covers major theories, the influence of genetics, and the environment from a chronological aspect. Appropriate for Social Work, Nursing, Addiction Studies, Education, and Psychology.

- PSYX 238 - Adolescent Psychology

  Credits: 3. Offered every term. PreReq., PSYX 100S or PSYX 230S. This course is designed to provide an introduction to the physical, social, emotional, and cognitive developmental changes that occur during adolescence, as well as their relationships and cultural influences. Appropriate for students in Addiction Studies, Psychology, Social Work, Education, and other disciplines where a study of the adolescent is desired.

- PSYX 240 - Fund of Abnormal Psychology

  Credits: 3. Offered every term. Prereq., PSYX 100. This course provides a broad introduction to abnormal psychology, which includes defining abnormality, examining the history of abnormal psychology, identifying how abnormal psychology relates to other disciplines in psychology, exploring major research methods used in abnormal psychology, discussing various mental illnesses and their potential causes and possible treatments, and applying major abnormal psychological findings to practical problems.

Science (COT)

Back to Top

- SCN 095T - Special Topics

  Credits: 1 TO 6. Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- SCN 100N - Issues in Biology

  Credits: 3. Offered autumn and spring. An introductory course for students with little science background. This course explores several issues relating to human biology such as cancer, drug abuse, population growth, and genetic engineering. Also includes discussions of fundamental

biological concepts such as evolution, biodiversity, and basic cell and molecular biology. Course Attributes: Natural Science Course (N)

- SCN 105N - Montana Ecosystems

  Credits: 3. Offered autumn and spring. An introduction to the landscapes and ecosystem diversity of Montana, with an emphasis on exploring the dominant habitats of western Montana. Required, integrated laboratory includes field trip investigations, classroom lab exercises, and presentations. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- SCN 120T - Technical Physics I

  Credits: 4. Offered intermittently. Prereq., M 095. Introduction to models, measurements, vectors, motion in a straight line, motion in a plane, Newton's laws of motion, application of Newton's laws, and circular motion and gravitation. Course Attributes: Technical Course

- SCN 175N - Integrated Physical Science I

  Credits: 3. Offered every term. An introduction to the basic principles of physics, chemistry, and nuclear reactions with emphasis on the scientific method and process. A knowledge of basic algebraic functions, decimals, and scientific notation is recommended. Suitable for students with little science background. Course Attributes: Natural Science Course (N)

- SCN 176N - Integrated Phys. Science II

  Credits: 3. Offered spring term intermittently. An introduction to the fundamental principles of environmental and earth sciences. Course emphasizes the scientific method and process of science. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- SCN 195T - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

- SCN 196T - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

- SCN 260N - The Biology of Behavior

  Credits: 3. Offered autumn and spring. Prereq., SCN 100N. An introduction to the biological basis of human behavior, including neuron function and the roles of hormones, heredity, and environmental influences. Behavioral topics include sensation, learning, emotion, and issues such as obesity, addiction, and stress. Intended for students to satisfy the science with a lab general education requirement. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- SCN 291 - Student Teaching

  Credits: 1 TO 6. (R-6) Offered intermittently. Organized student teaching.

- SCN 295T - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course

Writing

Back to Top

- WRIT 090T - Critical Writing Skills

  Credits: 3. Offered intermittently. Prereq., placement or referral by WRIT 101 instructor. Designed for students who need instruction and practice integrating critical thinking, reading, and writing before entering the required first-year writing course. Emphasis on drafting and revising. Grading by traditional letter system or NCR (no credit). Traditional letter grade only. Credit does not count toward a certificate or degree. Course Attributes: Technical Course

- WRIT 095 - Developmental Writing

  Credits: 3. Offered every term. Prereq., placement or referral by WRIT 101 instructor. Designed for students who need instruction and practice integrating critical thinking, reading and writing before entering the required first-year writing course. Emphasis on invention, drafting, and revision.

Grading A-F or NC (no credit). Credit does not count toward Associate of Arts or Baccalaureate degrees.

- WRIT 121 - Intro to Technical Writing
  Credits: 3. Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy. Course Attributes: Writing Course-Intermediate
- WRIT 191T - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course
- WRIT 192 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently.
- WRIT 221 - Intermediate Tech Writing
  Credits: 3. Offered intermittently. Prereq., WRIT 121, WRIT 101, or consent of instr. Continuation of technical writing with emphasis on technical text including editing for technical content, graphic placement, and document design as seen through the eye of the audience. Current critical issues in technical writing are discussed. Course Attributes: Writing Course-Intermediate
- WRIT 291T - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Technical Course
- WRIT 292T - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student. Course Attributes: Technical Course

Applied Arts and Sciences A.A.

The Department of Applied Arts and Sciences offers the Associate of Arts degree. The Associate of Arts degree is considered a general education transfer degree and does not include a major or minor course of study. To receive an Associate of Arts degree, students must:
• successfully complete all lower-division general education requirements with a letter grade of C- or better;
• earn a minimum of 60 credits, at least 30 of which must be from UM;
• and maintain an institutional cumulative GPA of 2.00 for all UM courses taken for a traditional letter grade (A-F).

Matriculating students may begin coursework in the autumn, spring or summer. Courses numbered below 100 do not count toward the 60 credit requirement or general education course requirements, but do fulfill financial aid credit load requirements. Up to 15 technical credits (courses with a "T" suffix) may be counted toward the total 60 required for the AA degree. For students who have earned an AAS degree, however, up to 20 credits of courses with a "T" suffix may apply toward the requirements for an AA degree.

Students planning on completing a baccalaureate degree are encouraged to select specific general education courses and electives that meet the requirements for that future major. Students work with their advisor to develop an AA degree plan to best prepare them to transition to a four-year degree.

Pathways within the Associate of Arts Degree

Although the AA does not include a major or minor course of study, students may elect to choose classes in a specific area of interest. Recognized pathways within the Associate of Arts degree include:
• Chemical and Addiction Studies
• Business
• Communication Studies
• Health IT
• Professional Communication
• Sociology
• For individuals attending the Montana Law Enforcement Academy, a specialized Associate of Arts degree is offered through a collaboration among Missoula College UM, the University of Montana Department Of Sociology, and the Montana Law Enforcement Academy in Helena, MT.

Concentrations within the Associate of Arts Degree

Similar to pathways or areas of emphasis within the AA degree concentrations are meant to help students focus on communication studies, an area of increasing demand to employers. Unlike areas of emphasis, these concentrations are recorded on the student's transcript a concentration of the AA degree itself.

Courses

An "R" after the course title indicates students may earn credit for each successful completion to the maximum number indicated after the "R." Credits earned beyond this maximum will not count towards the total required for the AA degree.

Associate of Arts - General AA

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 60

Required Cumulative GPA: 2.0

Note: The AA degree has three requirements: completion of UM's lower-division General Education Requirements (GERs), a minimum of 60 total earned credits, and a minimum cumulative GPA of 2.0. At least 30 of the total 60 degree credits must be earned from Missoula College or UM-Missoula. Missoula College students are limited to enrolling in lower-division coursework (course level 100 or 200).

Up to 15 technical credits may be counted towards the total 60 required for the AA. If the student has previously earned an AAS degree, the student may use up to 20 technical credits.

Mathematics

Rule: Any Mathematics course level 104 or higher (excluding M 111 Technical Mathematics).

Note: Appropriate placement into mathematics courses required. Prerequisites may apply. If a student successfully places into and completes a mathematics (either "M" or "STAT") course that is also considered a Symbolic System, that course may be used to count towards both the Mathematics and Symbolic Systems General Education Requirements.

Minimum Required Grade: C-

3-4 Total Credits Required

Writing Skills

Rule: Both WRIT 101 AND an Approved Writing Course are required.

Note: NOTE: Students who place into and successfully complete WRIT 201 are considered to have satisfied both the WRIT 101 and the Lower-Division Approved Writing Course General Education Requirements.

Minimum Required Grade: C-

6 Total Credits Required

WRIT 101

Rule: Take 1 of the courses below.

Note: Appropriate placement into WRIT 101/201 required. Prerequisites may apply.

	Course	Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
	WRIT 201 - College Writing II Offered autumn and spring. Prereq., placement or C or better in WRIT 101. MUSWA at or above 5.5, SAT/ACT essay at or above 11, a SAT writing section score at or above 700 or a Combined English/Writing portion of the ACT at or above 32. Designed for first year students with advanced writing ability and students who seek a lower-division writing course. Offers instruction in rhetorical reading and writing, particularly the study and practice of written argumentation in different academic and civic contexts.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Lower-Division Approved Writing Course

Rule: Any course designated as an Approved Writing Course during semester it's taken.

Symbolic System/Foreign Language

Rule: Students must complete either a Symbolic System OR a Foreign Language.
Minimum Required Grade: C-
3-10 Total Credits Required

Symbolic Systems

Rule: Successful completion of 1 course from the list below.

Note: Prerequisites apply for all courses listed above; some courses from this list are major-restricted. Other baccalaureate major-specific Symbolic Systems may be used in lieu of course list above; speak with your advisor for more information.

	Course	**Credits**
	M 136 - Math for K-8 Teachers II Offered autumn and spring. Prereq., M 135. Topics include introductory geometry, geometric constructions, congruence, similarity, measurement, coordinate geometry and an introduction to computer geometry.	4 Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Foreign Language

Rule: Successful completion of first-year sequence of a Modern and Classical Language (MCLL).

Note: A first-year sequence consists of 101 & 102 courses (5 credits each) for all MCLL majors except Irish; 101, 102, & 103 courses of Irish (3 credits each) must be completed. Students may take placement test to demonstrate proficiency to receive non-credit exemption from this requirement. Speak with your advisor for more information.

Perspectives

Rule: A minimum of 3 credits towards each Perspective Category is required.

Note: Some courses satisfy multiple Perspectives or GER Categories; visit with your advisor for more information. Students who take the maximum number of Perspective "double-dippers" possible will be able to complete the Perspectives with a total of 21 credits.

Minimum Required Grade: C-

21-27 Total Credits Required

Expressive Arts (A)

Rule: A minimum of three credits is required.

Literary & Artistic Studies (L)

Rule: A minimum of three credits is required.

Historical & Cultural Studies (H)

Rule: A minimum of three credits is required.

Social Sciences (S)

Rule: A minimum of three credits is required.

Ethical & Human Values (E)

Rule: A minimum of three credits is required.

American & European Perspectives (Y)

Rule: A minimum of three credits is required.

Indigenous & Global Perspectives (X)

Rule: A minimum of three credits is required.

Natural Sciences (N)

Rule: A minimum of six credits is required. At least one course must have a laboratory component.

AA Degree Electives

Rule: Number of elective credits required varies; student needs to ensure s/he earns at least 60 total credits for the AA degree.

Note: Transfer students may count up to 30 transfer credits towards the total 60 necessary for degree. A maximum of 15 technical credits may be counted towards the total 60. (A student may use 20 technical credits towards the 60 if s/he has earned an AAS degree.)

13-27 Total Credits Required

Healthcare Informatics A.A.

Associate of Arts - General AA; Track: Healthcare Informatics

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 66

Required Cumulative GPA: 2.0

Note: Upon completion of the required course work, students will have earned a General AA degree that meets the requirements for a Certificate of Applied Science (CAS) in Computer Support, the MUS core for maximum transferability of General Education requirements, and courses specifically required by the 2+2 articulation agreement with Montana Tech for a BS in Health Care Informatics.

Montana University System (MUS) Core General Education Requirements

Rule: All courses are required

Note: In addition to the categories above, students must ensure that at least one course they take during their college career has "significant content related to the cultural heritage of Native Americans." This requirement may be fulfilled through the Social Science/History elective, the Humanities/Fine Arts elective, or by taking an additional course. Please consult with an advisor about which courses fulfill both sets of requirements.

Minimum Required Grade: C-

32 Total Credits Required

Natural Science Perspective

Rule: All courses are required

	Course	Credits
	BIOH 201N - Human Anat Phys I (equiv 301) Offered autumn and spring. Prereq., introductory science course or college-prep high school biology course recommended. Comprehensive knowledge of human form and function necessary for students preparing for health-related professions. Emphasis on structure, function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. Required, integrated laboratory includes some dissection.	4 Credits
	BIOH 202N - Human Anat and Phys I Lab Offered autumn and spring. Coreq., BIOH 201. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers tissues through nervous system. A cadaver lab is included.	4 Credits
	BIOH 211N - Human Anat Phys II (equiv 311) Offered autumn and spring. Prereq., and continuation of BIOH 201N. Comprehensive knowledge of human form and function necessary for students in health-related programs. Emphasis on structure function and homeostatic regulation of body systems with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. Required integrated laboratory includes frequent dissection.	4 Credits
	BIOH 212N - Human Anat Phys II Lab Offered autumn and spring. Prereq., BIOH 201N. Coreq., BIOH 211. Continuation of 201N. Basic knowledge necessary for students in health-related programs. Emphasis on normal anatomy and physiology with presentation of basic concepts in chemistry and microbiology as they relate to human anatomy and physiology. Covers endocrine through reproductive systems. A cadaver lab is included.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Social Sciences/History Perspective

Rule: Take a minimum of 6 credits

Note: Must take one additional elective that fulfills the MUS Social Sciences/History perspective. Please note that the MUS Core general education requirements differ from the University of Montana general education requirements. Consult with your advisor to ensure that all requirements are met.

	Course	Credits

	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Mathematics Perspective

Rule: All courses are required

	Course	Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Communications Perspective

Rule: All courses are required

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Humanities/Fine Arts Perspective

Rule: Take a minimum of 6 credits

Note: Must take one additional elective that fulfills the MUS Humanities/Fine Art perspective. Please note that the MUS Core general education requirements differ from the University of Montana general education requirements. Consult with your advisor to ensure that all requirements are met.

	Course	**Credits**
	CSCI 215E - Social & Ethical Issues in CS Offered autumn and spring. Prereq., WRIT 101. Exploration of ethical issues in the field of computing. Skills needed to identify and analyze various ethical concerns. Standard ethical concepts and theories, methods of ethical analysis. Strong emphasis on practical application of the ethical process.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Cultural Diversity Perspective

Rule: Take a minimum of 3 credits

Note: Must take one elective that fulfills the MUS Cultural Diversity perspective. Please note that the MUS Core general education requirements differ from the University of Montana general education requirements. Consult with your advisor to ensure that all requirements are met.

Health Care Informatics Track Requirements

Rule: All courses are required

	Course	**Credits**
	AHMS 144 - Medical Terminology Offered every term. Introduction to a medical word building system using Greek and Latin word roots, combining forms, suffixes, and prefixes.	3 Credits

	CSCI 105 - Computer Fluency Offered autumn and spring. Introduces the skills and concepts of information technology, both from practical and a more theoretical point of view. During lectures and interactive computer labs, students will explore a wide range of digital and information technologies, including common PC applications, networking, databases, privacy, and security. Credit not allowed for both CSCI 105 and CRT 111 and CS 111.	3 Credits
	CSCI 110 - Programming - VB I Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. An introduction to object-oriented programming using an even-driven paradigm. Basic concepts of control structures, data handling, documentation, and error control. Fundamentals of algorithm design and structured software development.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	CSCI 240 - Databases and SQL Offered autumn. Prereq., CSCI 172 or consent of instr. Relational database design including: requirements analysis, data structure, entity relationships, normalization, relational algebra and integrity. Physical implementation focusing on data storage; retrieval and modification; concurrency; optimization; security; SQL; and XML.	3 Credits
	HIT 101 - Intro to Healthcare Informatic Introduces the discipline of healthcare information technology. An overview of the subject including history, basic knowledge of healthcare informatics and tools as applied in support of healthcare delivery. Students will gain an introductory level about the complexities of health care and how informatics fits within the US Healthcare System.	3 Credits
	HIT 265 - Electronic Health Records Prereq., HIT 101. An introduction to the electronic health record (EHR). Students will study the use of the EHR in improving healthcare quality, accessibility, and cost-effectiveness. EHR implementation and its use within the internal clinical office will be examined. The EHR will be studied in the context of a comprehensive Health Information System (HIS) supporting our society's interdisciplinary clinical healthcare system.	3 Credits
	ITS 150 - CCNA 1: Exploration Offered autumn and spring. M 090 or ALEKS score >2 recommended prior to taking course. Introduction to networking field including terminology; protocols; local-area and wide-area networks; the OSI model; topologies; IP addressing; cabling and cabling tools; routers and router programming. Ethernet and network standards; and wireless technologies.	3 Credits
	ITS 165 - OS Commands and Scripts Offered spring. Introduction to operating system concepts through the use of contemporary software. Emphasizes file system management, networking, installation, maintenance, management, and disaster recovery practices using both the command interpreter and graphical user interface.	3 Credits

	ITS 210 - Network OS - Desktop Offered autumn. Prereq., ITS 150. In-depth study of a secure, multi-user, client-based network operating system. Topics include installation, administration of resources, performance, network services, and security.	3 Credits
	ITS 280 - Computer Repair & Maint. Offered autumn. Prereq./Co-req, ITS 150. In-depth study of personal computer hardware. Focus on field replaceable components. Topics include: storage devices, processors, system boards, memory, ports, cabling, power supplies, multimedia devices, printers, and troubleshooting.	3 Credits
	ITS 289 - Professional Certification (R-4) Offered autumn and spring. Prereq., consent of instr. Review objectives of an information technology industry-based professional certification. Certification objectives, preparation strategies, and exam strategies included. Course can be repeated for different industry-based professional certifications.	1 Credits
Minimum Required Grade: C-		34 Total Credits Required

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Applied Science

Missoula College Academic Advising Center

The Bachelor of Applied Science (BAS) degree is a baccalaureate degree designed for students who have earned an Associate of Applied Science (AAS) degree from a regionally accredited institution for higher education. The Missoula College section of the University of Montana-Missoula catalog identifies Associate of Applied Science degree programs offered at The University of Montana.

Interdisciplinary in nature, the BAS affords students the opportunity to identify an area or areas of concentration from which they will take upper-division courses. Students are encouraged to consider subject area(s) that will assist them with their academic and/or professional goals.

Specific requirements for the degree are: 1.) Completion of an AAS degree with a 2.50 GPA; 2.) Completion of a BAS degree plan identifying academic coursework which is approved by an identified degree plan advisor group; 3.) Completion of a minimum of 127 credits of coursework with 39 upper-division credits and a minimum 2.0 cumulative GPA; 4.) Completion of all UM General Education Requirements. Up to 50 credits earned from the AAS degree may count towards the 127 required for the BAS.

It is important to understand that the BAS degree does not identify a specific discipline major or minor, but rather areas of concentration.

Students interested in pursuing this degree should contact the BAS Advisor at 406-243-7801 for more information.

Bachelor of Applied Science - Applied Science

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 127

Required Cumulative GPA: 2.0

Note: null

Writing Skills

Rule: Both WRIT 101 AND an Approved Writing Course are required.

Note: NOTE: Students who place into and successfully complete WRIT 201 are considered to have satisfied both the WRIT 101 and the Lower-Division Approved Writing Course General Education Requirements.

Minimum Required Grade: C-

6 Total Credits Required

WRIT 101

Rule: Take 1 of the courses below.

Note: Appropriate placement into WRIT 101/201 required. Prerequisites may apply.

	Course	Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
	WRIT 201 - College Writing II Offered autumn and spring. Prereq., placement or C or better in WRIT 101. MUSWA at or above 5.5, SAT/ACT essay at or above 11, a SAT writing section score at or above 700 or a Combined English/Writing portion of the ACT at or above 32. Designed for first year students with advanced writing ability and students who seek a lower-division writing course. Offers instruction in rhetorical reading and writing, particularly the study and practice of written argumentation in different academic and civic contexts.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Lower-Division Approved Writing Course

Rule: Any course designated as an Approved Writing Course during semester it's taken.

Perspectives

Rule: A minimum of 3 credits towards each Perspective Category is required, except Natural Sciences.

Note: Some courses satisfy multiple Perspectives or GER Categories. Some courses included in your specific degree plan may overlap with Perspective or other GER categories; visit with your advisor for more information.

Minimum Required Grade: C-

27 Total Credits Required

Expressive Arts (A)

Rule: A minimum of three credits is required.

Literary & Artistic Studies (L)

Rule: A minimum of three credits is required.

Historical & Cultural Studies (H)

Rule: A minimum of three credits is required.

Social Sciences (S)

Rule: A minimum of three credits is required.

Ethical & Human Values (E)

Rule: A minimum of three credits is required.

American & European Perspectives (Y)

Rule: A minimum of three credits is required.

Indigenous & Global Perspectives (X)

Rule: A minimum of three credits is required.

Natural Sciences (N)

Rule: A minimum of six credits is required. At least one course must have a laboratory component.

Symbolic System/Foreign Language

Rule: Students must complete either a Symbolic System OR a Foreign Language.

Minimum Required Grade: C-

3-10 Total Credits Required

Symbolic Systems

Rule: Successful completion of 1 course from the list below.

Note: Prerequisites apply for all courses listed below; some courses from this list are major-restricted. Other baccalaureate major-specific Symbolic Systems may be used in lieu of course list above; speak with your advisor for more information.

	Course	Credits
	M 133 - Geom & Meas for K-8 Teachers Offered autumn and spring. Prereq., M 132. The study of geometry and geometric measurement for prospective elementary and middle school teachers, including synthetic, transformational, and coordinate geometry, constructions, congruence and similarity, 2-dimensional and 3-dimensional measurement, and problem solving.	3 Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Foreign Language

Rule: Successful completion of first-year sequence of a Modern and Classical Language (MCLL).

Note: A first-year sequence usually consists of courses numbered 101 & 102 (5 credits each) for most catalog-approved languages, though some exceptions to this course numbering and sequencing apply. Depending on the language, students may take a placement test to demonstrate proficiency to receive non-credit exemption from this requirement. Refer to the General Education Requirements section of this catalog and speak with your advisor for more information.

Mathematics

Rule: Any Mathematics course level 104 or higher (excluding M 111 Technical Mathematics).

Note: Appropriate placement into mathematics courses required. Prerequisites may apply. If a student successfully places into and completes a mathematics (either "M" or "STAT") course that is also considered a Symbolic System, that course may be used to count towards both the Mathematics and Symbolic Systems General Education Requirements.

Minimum Required Grade: C-

3-4 Total Credits Required

Upper-Division Credit Requirement

Rule: 39 upper-division courses required for UM GERs. At least 30 of the 39 upper-division credits must be from the degree plan.

39 Total Credits Required

Upper-Division Writing

Rule: At least one upper-division writing course is required for UM GERs.

Note: This course may be included as part of the student's degree plan or total Upper-Division Credits.

3 Total Credits Required

AAS Degree Credits

Rule: Up to 50 technical credits earned from AAS may be counted towards the 127 required for the BAS.

Minimum Required Grade: C-

38-50 Total Credits Required

Communication Studies A.A.

Associate of Arts - General AA; Communication Studies Option

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 60

Required Cumulative GPA: 2.0

Note: The AA degree has three requirements: completion of UM's lower-division General Education Requirements (GERs), a minimum of 60 total earned credits, and a minimum cumulative GPA of 2.0. At least 30 of the total 60 degree credits must be earned from Missoula College or UM-Missoula. Missoula College students are limited to enrolling in lower-division coursework (course level 100 or 200).

Up to 15 technical credits may be counted towards the total 60 required for the AA. If the student has previously earned an AAS degree, the student may use up to 20 technical credits.

In addition, to receive to Associate of Arts with and Option in Communication Studies, a student must complete the requirements specific to that degree.

Degree Specific Requirements for AA with an Option in Communication Studies

Rule: All courses required

Note: Some courses required for the Associate of Arts with an Option in Communication Studies satisfy multiple Perspectives or GER Categories; visit with your advisor for more information.

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits

	COMX 140L - Intro to Visual Rhetoric Offered autumn and spring. An introduction to the persuasive nature of visual symbols as texts. Readings will include historical to contemporary rhetorical criticisms on advertising, billboards, bodies, cartoons, memorials, and photography.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		

Organizational Communication or Rhetorical Theory

Rule: Take one of the following

	Course	Credits
	COMX 220S - Intro to Organizational Comm Offered yearly. Theory and research on communication in organizations. Focus on topics such as productivity, power, culture, socialization, technology and globalization covering a wide range of organizations including corporations, government, educational institutions, non-profit agencies and media organizations.	3 Credits
	COMX 240H - Intro to Rhetorical Theory Offered yearly. An overview of rhetorical theory including an exploration of classical rhetoric, British and Continental rhetorical theory, and contemporary theories of language and persuasion.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Statistics

Rule: Take one of the following

Note: Completion of one of these courses satisfies the Symbolic Systems GER category.

	Course	Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Communication Elective

Rule: Complete 6 credits

Note: Student must select at least two directed elective courses (minimum of 6 credits). Directed electives must be approved by student's advisor.

Mathematics

Rule: Any Mathematics course level 104 or higher (excluding M 111 Technical Mathematics).

Note: Appropriate placement into mathematics courses required. Prerequisites may apply. If a student successfully places into and completes a mathematics (either "M" or "STAT") course that is also considered a Symbolic System, that course may be used to count towards both the Mathematics and Symbolic Systems General Education Requirements.

Minimum Required Grade: C-

3 Total Credits Required

Writing Skills

Rule: Both WRIT 101 AND an Approved Writing Course are required.

Note: NOTE: Students who place into and successfully complete WRIT 201 are considered to have satisfied both the WRIT 101 and the Lower-Division Approved Writing Course General Education Requirements.

Minimum Required Grade: C-

3 Total Credits Required

WRIT 101

Rule: Take 1 of the courses below.

Note: Appropriate placement into WRIT 101/201 required. Prerequisites may apply.

	Course	Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
	WRIT 201 - College Writing II Offered autumn and spring. Prereq., placement or C or better in WRIT 101. MUSWA at or above 5.5, SAT/ACT essay at or above 11, a SAT writing section score at or above 700 or a Combined English/Writing portion of the ACT at or above 32. Designed for first year students with advanced writing ability and students who seek a lower-division writing course. Offers instruction in rhetorical reading and writing, particularly the study and practice of written argumentation in different academic and civic contexts.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Lower-Division Approved Writing Course

Rule: Any course designated as an Approved Writing Course during semester it's taken.

Perspectives

Rule: A minimum of 3 credits towards each Perspective Category is required.

Note: Some courses satisfy multiple Perspectives or GER Categories; visit with your advisor for more information. Students who take the maximum number of Perspective "double-dippers" possible will be able to complete the Perspectives with a total of 21 credits.

In addition, courses required for the Associate of Arts with an Option in Communication Studies will satisfy applicable Perspectives or GER Categories.

Minimum Required Grade: C-

3 Total Credits Required

Expressive Arts (A)

Rule: A minimum of three credits is required.

Literary & Artistic Studies (L)

Rule: A minimum of three credits is required.

Historical & Cultural Studies (H)

Rule: A minimum of three credits is required.

Social Sciences (S)

Rule: A minimum of three credits is required.

Ethical & Human Values (E)

Rule: A minimum of three credits is required.

American & European Perspectives (Y)

Rule: A minimum of three credits is required.

Indigenous & Global Perspectives (X)

Rule: A minimum of three credits is required.

Natural Sciences (N)

Rule: A minimum of six credits is required. At least one course must have a laboratory component.

Symbolic System/Foreign Language

Rule: Students must complete either a Symbolic System OR a Foreign Language.
Minimum Required Grade: C-
3-10 Total Credits Required

Symbolic Systems

Rule: Successful completion of 1 course from the list below.

Note: Prerequisites apply for all courses listed above; some courses from this list are major-restricted. Other baccalaureate major-specific Symbolic Systems may be used in lieu of course list above; speak with your advisor for more information.

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits

	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Foreign Language

Rule: Successful completion of first-year sequence of a Modern and Classical Language (MCLL).

Note: A first-year sequence consists of 101 & 102 courses (5 credits each) for all MCLL majors except Irish; 101, 102, & 103 courses of Irish (3 credits each) must be completed. Students may take placement test to demonstrate proficiency to receive non-credit exemption from this requirement. Speak with your advisor for more information.

AA Degree Electives

Rule: Number of elective credits required varies; student needs to ensure s/he earns at least 60 total credits for the AA degree.

Note: Transfer students may count up to 30 transfer credits towards the total 60 necessary for degree. A maximum of 15 technical credits may be counted towards the total 60. (A student may use 20 technical credits towards the 60 if s/he has earned an AAS degree.)

Minimum Required Grade: C-

13-27 Total Credits Required

Professional Communication A.A.

Associate of Arts - General AA; Professional Communication Option

Missoula College

Catalog Year: 2016-2017

Degree Specific Credits: 60

Required Cumulative GPA: 2.0

Note: The AA degree has three requirements: completion of UM's lower-division General Education Requirements (GERs), a minimum of 60 total earned credits, and a minimum cumulative GPA of 2.0. At least 30 of the total 60 degree credits must be earned from Missoula College or UM-Missoula. Missoula College students are limited to enrolling in lower-division coursework (course level 100 or 200).

Up to 15 technical credits may be counted towards the total 60 required for the AA. If the student has previously earned an AAS degree, the student may use up to 20 technical credits.

In addition, to receive to Associate of Arts with and Option in Professional Communication, a student must complete the requirements specific to that degree.

Degree Specific Requirements for AA with an Option in Professional Communication

Rule: All courses required

Note: Some courses required for the Associate of Arts with an Option in Professional Communication satisfy multiple Perspectives or GER Categories; visit with your advisor for more information.

	Course	**Credits**

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	COMX 140L - Intro to Visual Rhetoric Offered autumn and spring. An introduction to the persuasive nature of visual symbols as texts. Readings will include historical to contemporary rhetorical criticisms on advertising, billboards, bodies, cartoons, memorials, and photography.	3 Credits

Focus on topics such as productivity, power, culture, socialization, technology and globalization covering a wide range of organizations including corporations, government, educational institutions, non-profit agencies and media organizations.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
	WRIT 121 - Intro to Technical Writing Offered every term. Introduction to technical writing situations that integrate text, design, and graphics. Emphasis is on evidence-based, informative writing that uses design and graphics to visually represent logic and organization. Course focuses on writing as a process and includes student self-assessment. Major assignments include a pure technical document, exploration of credibility, and public science writing. Students are expected to write without major faults in grammar or usage and to have basic computer literacy.	3 Credits

	WRIT 221 - Intermediate Tech Writing Offered intermittently. Prereq., WRIT 121, WRIT 101, or consent of instr. Continuation of technical writing with emphasis on technical text including editing for technical content, graphic placement, and document design as seen through the eye of the audience. Current critical issues in technical writing are discussed.	3 Credits
Minimum Required Grade: C-		

Statistics

Rule: Take one of the following

	Course	Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Communication Elective

Rule: Complete 3 credits

Note: Student must select at least two directed elective courses (minimum of 6 credits). Directed electives must be approved by student's advisor.

Mathematics

Rule: Any Mathematics course level 104 or higher (excluding M 111 Technical Mathematics).

Note: Appropriate placement into mathematics courses required. Prerequisites may apply. If a student successfully places into and completes a mathematics (either "M" or "STAT") course that is also considered a Symbolic System, that course may be used to count towards both the Mathematics and Symbolic Systems General Education Requirements.

Minimum Required Grade: C-

College of Visual and Performing Arts

Stephen Kalm, Dean

The College of Visual and Performing Arts (CVPA) is comprised of four professionally accredited schools; Art, Media Arts, Music and Theatre & Dance. CVPA is committed to leadership in pedagogy, creative scholarship and professional performances and exhibitions. The College prides itself on its high achieving faculty, successful alumni and talented students. CVPA:

- serves UM students by teaching performing and visual arts with rigor and devotion, and by offering preparation and experience that enable students to succeed in the world of art, to perform and create with grace and maturity, and to teach with expertise and perspective
- serves the University, the community, state, region and nation, by presenting concerts, productions, and exhibitions of high quality, and by offering educational and research opportunities in the arts for all disciplines
- serves as the cultural center of the state and region
- provides national leadership in the arts by enhancing the excellence of traditional arts curricula, instruction and research with innovative and imaginative programs that utilize new technologies, incorporate various media, and enhance cultural and intellectual environments
- inspires the pursuit of excellence by encouraging creativity and expression through the arts

In addition, the College of Visual and Performing Arts offers *Creative Pulse: Master's Degree in Integrated Arts and Education* program for educators and education administrators during summer sessions. Creative Pulse students embrace and explore critical thinking processes and habits of the mind, enabling participants to develop, refine and integrate these processes into their own thinking and learning abilities, as well as those of their students.

For more information visit the College of Visual and Performing Arts website.

Theatre & Dance

Michael Monsos, Director

The School of Theatre & Dance is accredited by the National Association of Schools of Theatre (NAST) and is a member of the Association for Theatre in Higher Education (ATHE) and the United States Institute for Theatre Technology (USITT). The school is housed in the Performing Arts and Radio/Television Center, which includes three theatre/dance performance spaces and television/radio studios. The program is production-oriented with approximately ten major productions presented each year including contemporary, historical, period, musical, and experimental plays, as well as dance showcases and concerts. Montana Repertory Theatre and the

CoMotion Dance Project, professional touring companies based at UM, often involve students both on and off stage. The faculty is strong, possessing a diversity of educational and professional theatre and dance backgrounds.

The Bachelor of Arts with a major in Dance allows the student who plans to enter a dance career to select another major to complement that objective. The Bachelor of Arts with a major in Theatre provides the student with a broad liberal arts education and a general focus in theatre. The degree allows the student to complete an additional major and may form the basis for further training on the graduate level. The Bachelor of Arts with a major in Theatre and an area of specialization in Education Endorsement Preparation is designed for the student seeking teaching endorsement in the field of theatre. The Bachelor of Fine Arts with a major in Dance or Theatre is a professionally oriented degree designed for the student who plans to pursue a career in theatre, dance, or a related field. Areas of specialization are: Acting, Design/Technology, Choreography and Performance, and Teaching. Graduate programs lead to the Master of Arts in Theatre with a focus on either performance theory/criticism or teaching or the Master of Fine Arts in Theatre with areas of specialization in Acting, Design/Technology, or Directing.

For more information on the academic programs and to learn about Theatre & Dance productions, please visit our website.

Advisement

Each Theatre & Dance major or minor must have a faculty advisor who is assigned by the School and who is usually from the student's area. The School, through its advisement program, often recommends non-theatre and non-dance electives and specific General Education courses to the student depending on the student's area. Majors may not take core or area-required courses on a credit/no credit basis.

Auditions and Portfolio Reviews

Actors, dancers, designers and technicians undergo periodic review in the form of auditions or portfolio presentations. These ongoing evaluations provide each student with the opportunity and challenge of individualized critiques from faculty and professional staff.

Senior Project

A senior project is required of all students. The senior project is usually production-related and has both practical and written components. Requirements for the project vary and are outlined in the School of Theatre & Dance Handbook.

Department Faculty

Professors

Michele Antonioli, Professor of Dance
Randy Bolton, Professor of Theatre
Nicole Bradley Browning, Professor of Dance / Head of Dance
Jillian Campana, Professor of Theatre
Alessia Carpoca, Professor of Theatre / Head of Design & Technology
Mark Dean, Professor of Theatre
Gregory Johnson, Artistic Director, Montana Repertory Theatre / Professor of Theatre
Karen Kaufmann, Artistic Director, CoMotion Dance Project / Professor of Dance
Michael Monsos, School Director / Professor of Theatre

Associate Professors

John Kenneth DeBoer, Associate Professor of Theatre / Head of Performance & Practice
Heidi Eggert, Associate Professor of Dance
Bernadette Sweeney, Associate Professor of Theatre

Assistant Professors

Pamyla Stiehl, Assistant Professor of Theatre

Adjunct Faculty

Kelly Bouma, Instructor of Theatre
Sarah Donnelly, Instructor of Dance

Dance

Back to Top

- DANC 100A - Intro to Modern Dance
  Credits: 2. (R-4) Offered autumn and spring. Introduction to basic modern dance vocabulary through exercises for alignment, strength and flexibility and combinations across the floor. Course Attributes: Expressive Arts Course (A)
- DANC 108A - Dance Forms
  Credits: 1 TO 8. (R-8) Offered autumn and spring. Introduction to basic dance vocabulary and technique in a particular style. Course Attributes: Expressive Arts Course (A)
- DANC 110A - Intro to Ballet
  Credits: 2. (R-4) Offered autumn and spring. Introduction to basic ballet positions and steps. Course Attributes: Expressive Arts Course (A)
- DANC 115A - Intro to Jazz Dance
  Credits: 2. (R-4) Offered autumn and spring. Introduction to basic strengthening and stretching exercises and stylistic characteristics of jazz. Course Attributes: Expressive Arts Course (A)
- DANC 118A - Dance Forms: Tap
  Credits: 2. (R-8) Offered intermittently. Introduction to basic tap dance vocabulary and technique. Course Attributes: Expressive Arts Course (A)
- DANC 129A - Dance Performance Lab I
  Credits: 1. (R-7) Offered autumn and spring. Credit for rehearsing and performing in approved Theatre & Dance productions. Course Attributes: Expressive Arts Course (A)
- DANC 130A - Introduction to Dance
  Credits: 3. Offered autumn and spring. The various elements of dance and basic artistic principles underlying dance and all of the arts. Introduces the student to beginning-level dance vocabulary and dance skills as well as the creative process through direct experience. Course Attributes: Expressive Arts Course (A)
- DANC 160A - Dance Forms: Irish
  Credits: 2. (R-8) Offered autumn and spring. Introduction to basic Irish dance vocabulary and technique. Course Attributes: Expressive Arts Course (A)
- DANC 165A - Dance Forms: African
  Credits: 2. (R-8) Offered autumn. Introduction to basic African dance vocabulary and technique. Course Attributes: Expressive Arts Course (A)
- DANC 170A - Dance Forms: Tribal Belly
  Credits: 2. (R-8) Offered intermittently. Introduction to basic tribal-style belly dance vocabulary and technique. Course Attributes: Expressive Arts Course (A)
- DANC 191 - Special Topics
  Credits: 1 TO 6. (R-6) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- DANC 194 - Seminar/Workshop
  Credits: 1. Offered autumn and spring. Introduces incoming freshmen to the world of university dance and contemporary dance as a profession.
- DANC 200A - Contemporary Modern II

Credits: 2. (R-12) Offered autumn and spring. Prereq., DANC 100A. Continuation of the modern dance vocabulary at an advanced-beginner level. Course Attributes: Expressive Arts Course (A)

- DANC 205 - Improvisation
  Credits: 2. (R-6) Offered spring. Exploration of stimulus, structure and performance of improvised movement. Elements such as space, shape, motion, time, quality, form and awareness emphasized. Instructor-designed structures, transitioning to student-designed scores, culminating in improvised performance.
- DANC 210A - Ballet II
  Credits: 2. (R-12) Offered autumn and spring. Prereq., DANC 110A. Continuation of the ballet vocabulary at an advanced-beginner level. Course Attributes: Expressive Arts Course (A)
- DANC 215A - Jazz Dance II
  Credits: 2. (R-12) Offered autumn. Prereq., DANC 115A. Continuation of the jazz vocabulary at an advanced-beginner level. Course Attributes: Expressive Arts Course (A)
- DANC 220A - Creative Practice I
  Credits: 3. (R-6) Offered spring. Prereq., DANC 200A. Exploration of stimulus, structure, and performance of both composed and improvised movement. Elements such as space, shape, energy, motion, time, quality, form and awareness emphasized. Instructor-designed structures, transitioning to student-designed scores, culminating in originally created/improvised performance. Course Attributes: Expressive Arts Course (A)
- DANC 225 - Rehearsal & Performance
  Credits: 1 TO 4. (R-24) Offered autumn and spring. Open to students who are choreographing a dance for a concert or to those who have been selected through audition to perform.
- DANC 229A - Dance Performance Lab II
  Credits: 1. (R-7) Offered autumn and spring. Credit for rehearsing and performing in approved Theatre & Dance productions. Course Attributes: Expressive Arts Course (A)
- DANC 234L - Dance in Popular Movies
  Credits: 3. Offered spring odd-numbered years. Survey of the history of dance and movement on film, with specific focus on the use of and reasons for choreography in popular movies of specific decades. Course Attributes: Lit & Artistic Studies (L)
- DANC 280 - Dance Conditioning: Pilates
  Credits: 1. (R-8) Offered autumn and spring. Pilates mat (floor) exercises to build core control, strength and flexibility.
- DANC 294 - Seminar/Workshop
  Credits: 1. Offered autumn and spring. One-time offerings of current topics.
- DANC 295 - Student Teaching: Children's Dance
  Credits: 1. Offered autumn and spring. Students participate and gain beginning-level teaching experience in two of four dance classes for children ranging in ages from 3 ½ to 12 years old.
- DANC 298 - Cooperative Eductn/Internship
  Credits: 1. Offered intermittently. Prereq., consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (398, 498) may count toward graduation. Course Attributes: Internships/Practicums
- DANC 300 - Contemporary Modern III
  Credits: 3. (R-12) Offered autumn and spring. Prereq., DANC 200A. Extension of the modern dance vocabulary through lengthier combinations of movement.
- DANC 305 - Contact Improvisation
  Credits: 2. (R-6) Offered autumn odd-numbered years. The art of moving with one or more partners while using a shifting point of contact and supporting each other's weight. Skills such as rolling, suspending, falling and recovering together explored through physical sensations that use weight, counter-balance and yielding.
- DANC 310 - Ballet III

Credits: 2. (R-12) Offered autumn and spring. Development of ability to combine steps; carriage of head and arms.

- DANC 315 - Jazz III

  Credits: 2. (R-12) Offered autumn. Prereq., DANC 215A or consent of instr. Continuation of DANC 215A.

- DANC 320 - Creative Practice II

  Credits: 2. (R-6) Prereq., DANC 220A. Explores ways to manipulate several dancers in space, through repetition of shapes, through related rhythms. May include choreography for videotape.

- DANC 322 - Dance Touring

  Credits: 1 TO 4. (R-24) Offered autumn and spring. Prereq., audition. Rehearsal and touring to the community. Course Attributes: Service Learning/Volunteer Service Learning

- DANC 325 - Spirit Squad

  Credits: 1. (R-4) Offered autumn and spring. UM cheer and dance team selected during audition process each spring; students perform routines at the intermediate jazz level. Development of current dance performance, leadership, communication and organizational skills. (Only four credits of DANC 325, HHP 100-179, MS 203 and MS 315 may count toward a degree.) Course Attributes: PE Activity Skills Course

- DANC 329 - Dance Stage Management Practicum

  Credits: 1. (R-6) Offered autumn and spring. Stage management practicum involving stage managing or assistant stage managing a dance production. Involves evening and weekend work.

- DANC 334 - Dance History

  Credits: 3. Offered autumn odd-numbered years. Discussion of primary movements and major figures in American modern dance, including global influences and its relationship to cultural trends of the twentieth and twenty-first centuries.

- DANC 345 - Teaching for the Disabled

  Credits: 1. (R-4) Offered autumn and spring. Students interact with adults with developmental disabilities in an adaptive dance class where movement is used as a therapeutic modality for people with cognitive and physical impairments. Students interact with the participants, engage as role models and gain beginning teaching experience.

- DANC 346 - Methods: Dance in K-8

  Credits: 2. (R-4) Offered autumn and spring. Open to majors in elementary education. Techniques and applications for using movement in the public school setting. Focus on movement elements, lesson design and planning, standards for dance, multiple intelligence theory, assessment, classroom management techniques and multiculturalism.

- DANC 360L - World Dance

  Credits: 3. (R-6) Offered autumn odd-numbered years. Investigation of dances of diverse cultures. Study of dance as: an emblem of cultural identity, social order, power and gender-specific behavior; an expression of religion and/or ritual; a classical art form; and as a medium for personal expression in Western and non-Western world cultures. Course Attributes: Lit & Artistic Studies (L) Cultural Intl Diversity (X)

- DANC 380 - Science of Dance Movement

  Credits: 3. Offered spring even-numbered years. Study of the skeletal system and how it relates to dance movement. Basic kinesthetic principles, conditioning for dancers, and injury recognition and prevention.

- DANC 391 - Special Topics

  Credits: 1 TO 24. (R-24) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- DANC 392 - Independent Study

  Credits: 1 TO 3. (R-24) Offered autumn and spring. Prereq., consent of instr.

- DANC 394 - Seminar/Workshop

  Credits: 1. (R-2) Offered autumn and spring. One-time offerings of current topics.

- DANC 395 - Studio/Practicum

Credits: 1 TO 6. (R-12) Studio-based course, emphasizing one-on-one faculty instruction. Students meet during regularly scheduled times with faculty or in small groups throughout the semester to discuss the development of their individual work.

- DANC 399 - Jr Creat/Research Proj

  Credits: 1. (R-6) Offered autumn and spring. Independent study in choreography or a research paper which could be on such subjects as teaching styles, multiple intelligence theory, dance historical topics, dance injuries, etc. An initial proposal, a journal, and a paper are required.

- DANC 400 - Contemporary Modern IV

  Credits: 3. (R-12) Offered autumn and spring. Prereq., DANC 300. Performance of exercises and combinations that are technically demanding in strength, balance, weight, agility and line.

- DANC 404 - Adv Contemporary Modern

  Credits: 3. (R-12) Offered autumn and spring. Prereq., DANC 400, 6 cr., or equiv. skill, and consent of instr. Continuation of DANC 400.

- DANC 405 - Advanced Improvisation

  Credits: 2. (R-6) Prereq., DANC 205, 305. Exploration of improvisation and contact improvisation as performance art forms. Instructor and students collaboratively design, rehearse, and publicly perform improvisational scores.

- DANC 406 - Dance as a Healing Art

  Credits: 2. (R-6) Offered spring. Study of body movement as a reflection of inner emotional states. How changes in movement lead to changes in the psyche, promoting health and growth. Exploration of techniques for experiencing the inter-connection between movement and emotional expression.

- DANC 410 - Ballet IV

  Credits: 2. (R-12) Offered autumn and spring. Continues to build on skills developed in Ballet III; emphasis on developing advanced petite allegro, grand allegro, turns, and artistry.

- DANC 440 - Dance Pedagogy

  Credits: 3. (R-9) Offered autumn even-numbered years. Methods and experiences in teaching modern dance, ballet and jazz.

- DANC 446 - Teaching Projects

  Credits: 1 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instr. Independent study that may involve either assisting in the teaching of a dance technique class or actually planning and teaching it. Course Attributes: Service Learning/Volunteer Service Learning

- DANC 491 - Special Topics

  Credits: 1 TO 24. (R-24) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- DANC 492 - Independent Study

  Credits: 1 TO 6. (R-9) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- DANC 494 - Junior/Senior Seminar

  Credits: 3. (R-6) Offered autumn even-numbered years. Seminar to discuss both practical and philosophical issues confronting dance students about to enter the "real" world. Course Attributes: Writing Course-Advanced

- DANC 495 - Practicum/Field Work

  Credits: 1 TO 6. (R-6) Studio-based course, emphasizing one-on-one faculty instruction. Students meet during regularly scheduled times with faculty or in small groups throughout the semester to discuss the development of their individual work.

- DANC 497 - Methods: Tchng Movmnt in Schls

  Credits: 3. Offered autumn odd-numbered years. Prereq., consent of instr. Experience in planning, observing and directing creative movement as a teaching tool in K-5.

- DANC 499 - Senior Thesis/Creative Project

  Credits: 2 TO 3. (R-6) Offered autumn and spring. Independent study in choreography or teaching. The student is responsible for setting up the project. An initial proposal, a journal, and a paper are

required.

- DANC 591 - Special Topics
  Credits: 1 TO 6. (R-6) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate

Theatre

Back to Top

- THTR 101L - Introduction to Theatre
  Credits: 3. Offered autumn and spring. The various elements of play production and dance. The basic artistic principles underlying dance, theatre and all of the arts. Course Attributes: Lit & Artistic Studies (L) Democracy and Citizenship (Y)
- THTR 102A - Introduction to Theatre Design
  Credits: 3. Offered autumn. Basic understanding of the principles of design for the theatre and television, including the production elements of scenery, costumes and lighting. Course Attributes: Expressive Arts Course (A)
- THTR 103 - Introd to House Management
  Credits: 1. (R-3) Offered autumn and spring. Introduction to the skills and experience of the front-of-house staff for a theatrical production.
- THTR 106A - Theat Prod I: Run Crew
  Credits: 1. (R-6) Offered autumn and spring. Operation and running a show backstage on a scenery, costume, or prop crew for a major school production. Course Attributes: Expressive Arts Course (A)
- THTR 107A - Theat Prod I: Constr Crew
  Credits: 3. (R-9) Offered autumn and spring. The construction and completion of scenery/props, costumes, and/or lighting under supervision. Most assignments involve very basic construction techniques and/or maintenance duties found in professional shop. Involves minimum of two 4-hour labs a week. Course Attributes: Expressive Arts Course (A)
- THTR 113A - Introduction to Voice Acting
  Credits: 3. An introduction to the skills and techniques required of the actor's voice to be effective in communication with others online, onstage, and in the world. Course Attributes: Expressive Arts Course (A)
- THTR 120A - Introduction to Acting I
  Credits: 3. Offered every term. An introduction to the skills and techniques required of the actor to be effective in communication with others on stage and off stage. Course Attributes: Expressive Arts Course (A)
- THTR 121 - Introduction to Acting II
  Credits: 3. Offered autumn and spring. Prereq., THTR 120A. Continuation of 120A.
- THTR 155 - Drawing Fundamntls for Theatre
  Credits: 3. Offered spring. Students will begin to develop skills in drawing the human form, perspective, and architecture.
- THTR 191 - Special Topics/Exprmtl Courses
  Credits: 1 TO 6. (R-6) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- THTR 202 - Stagecraft I
  Credits: 3. Offered autumn. Fundamental theories and hands-on application in the areas of costuming, lighting, scenery, and properties.
- THTR 203 - Stagecraft II: Scenery & Props
  Credits: 3. Offered spring. Fundamental theories and hands-on application in the areas of scenery, properties, and rigging.
- THTR 206 - Theat Prod II: Run Crew

Credits: 1. (R-6) Offered autumn and spring. Prereq., THTR 106A. Operation and running a show backstage, as in scenery, costumes, or props for a major school production.

- THTR 207 - Theat Prod II: Constr Crew

  Credits: 3. (R-6) Offered autumn and spring. The construction and completion of scenery/props, costumes, and/or lighting. Advanced construction assignments and/or maintenance duties found in professional shop; possible supervision of a small construction crew. Involves minimum of two 4-hour labs a week.

- THTR 210 - Voice & Speech I

  Credits: 3. Offered autumn. Prereq., THTR 221 or consent of instr. Voice production, phonetics and speech for the stage.

- THTR 211 - Voice & Speech II

  Credits: 3. Offered spring. Prereq., THTR 210. Continuation of 210.

- THTR 220A - Acting I

  Credits: 3. Offered autumn and spring. Studio class intended to cultivate skill sets necessary for those with a background or interest in the craft of acting, especially those considering a career in the performing arts (theatre, music, dance, film, broadcasting): observation, imagination, concentration, improvisation, and character. Course Attributes: Expressive Arts Course (A)

- THTR 221 - Acting II

  Credits: 3. Offered spring. Prereq., THTR 220A. Continuation of 220A. Scene study and characterization. Works selected from realism and poetic realism, utilizing modern and contemporary scripts of the American masters.

- THTR 229 - Production Acting I

  Credits: 1. (R-4) Offered autumn and spring. Credit for acting in approved Drama/Dance productions.

- THTR 235L - Dramatic Literature

  Credits: 3. Offered autumn and spring. The study of representative texts in dramatic literature as a foundation for play analysis. Course Attributes: Lit & Artistic Studies (L)

- THTR 239A - Creative Drama/Dance: K-8

  Credits: 2. Offered autumn and spring. Restricted to majors in Elementary Education and Early Childhood Education: P-3. Focus on the use of creative drama and dance as types of educational tools. Students will explore, experience, and implement creative teaching methods in order to promote scholarship through kinesthetic teaching in elementary education. Course Attributes: Expressive Arts Course (A)

- THTR 245 - Int Costume Construction

  Credits: 3. Offered spring. Intermediate costume construction focusing on the development of skills needed to function as a stitcher.

- THTR 249 - Stage Makeup

  Credits: 2. Offered spring. Principles of and practice in theatrical makeup. Students will work on makeup for major productions.

- THTR 255 - Drafting for Theatre I

  Credits: 3. Offered spring. Drawing techniques for the theatre with an emphasis on drafting as utilized by technicians, designers, stage managers and directors.

- THTR 264 - Master Electrician

  Credits: 2. Offered intermittently. Prereq., THTR 107A, THTR 202, or consent of instr. Training for the position of master electrician and assistant lighting designer. Practical application of production planning, lighting paperwork, overseeing lighting crews, advanced electrical theory, power distribution, and creative problem solving. Students will work on major school productions.

- THTR 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- THTR 292 - Independent Study

Credits: 1 TO 12. (R-12) Offered autumn and spring. Independent study in all the arts of the theatre.

- THTR 305 - Theatre Workshop III

  Credits: 1 TO 20. (R-20) Offered autumn and spring. Prereq., consent of instructor. Advanced laboratory production in all the arts of the theatre.

- THTR 306 - Summer Theatre

  Credits: 1 TO 12. (R-12) Offered summer. Prereq., consent of instr. Practicum in school-approved summer theatre companies in the capacity of actor, designer, director, stage manager and/or technician.

- THTR 307 - Production Construction I

  Credits: 3. (R-12) Offered autumn and spring. Prereq., THTR 107A and consent of instr. Students serve as the construction/maintenance crew in a shop (sound, light, costume, or scenery) for School productions.

- THTR 308 - Production Team I

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Students function as part of the production team in a role of responsibility (i.e., master electrician, cutter, first hand, master carpenter, etc.) for a school production. These assignments and duties may serve also as part of the required junior project.

- THTR 309 - Production Design I

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Students function as a member of the production team in a role of responsibility (i.e., scenic designer, costume designer, light designer, etc.) for a school production. These assignments and duties may serve also as part of the required junior project.

- THTR 310 - Voice and Speech III

  Credits: 3. Offered autumn. Prereq., THTR 211 and audition, or consent of instr. Dialects, accents, and continued development of good voice and speech skills.

- THTR 311 - Voice and Speech IV

  Credits: 3. Offered spring. Integration of voice and speech skills, vocal character.

- THTR 315 - Physical Performance Skills I

  Credits: 3. Offered spring. Prereq., THTR 221 or consent of instr. Basics of physical performance: collaboration, concentration, centering, balance, agility, and body awareness through a variety of stage movement techniques.

- THTR 316 - Physical Performance Skills II

  Credits: 3. Offered autumn. Prereq., THTR 315. Physical characterization: exploring weight, rhythm, tempo, and kinesthetic relationships through Laban, animal studies, and Michael Chekhov.

- THTR 320 - Acting III

  Credits: 3. Offered autumn. Prereq., THTR 221. Selected scenes and projects from European and American realistic texts such as Chekhov, Ibsen, Strindberg, and Shaw.

- THTR 321 - Acting IV

  Credits: 3. Offered spring. Prereq., THTR 320. Study and practice of working with a camera and film/television scripts.

- THTR 329 - Production Acting II

  Credits: 1. (R-4) Offered autumn and spring. Prereq., THTR 229A. Credit for acting in approved Theatre & Dance productions. Course Attributes: Expressive Arts Course (A)

- THTR 330H - Theatre History I

  Credits: 3. Offered autumn. Prereq., WRIT 101 (or higher) or equivalent, or consent of instr. A survey of the major developments of the theatre from primitive beginnings to the 19th century, including various cultures and their representative plays and performances throughout the world. Course Attributes: Hist & Cultural Studies (H) Writing Course-Intermediate

- THTR 331Y - Theatre History II

  Credits: 3. Offered spring. Prereq., THTR 330H or theatre minor. Continuation of 330H. The many and varied periods since the 19th century as reflected in the theatre of the times in America and

Europe. Course Attributes: Writing Course-Advanced Democracy and Citizenship (Y)

- THTR 332 - Dramaturgy
  Credits: 3. Prereq., THTR 330H or consent of instr. An introduction to literary, historical, and contextual analysis of play scripts and performance pieces intended for production.
- THTR 336 - Costume History
  Credits: 3. Offered intermittently. History of Western costume from ancient Egypt to the present day.
- THTR 339 - Theatre in Elem Education
  Credits: 2. (R-4) Offered autumn and spring. Exploration, implementation and experience in teaching strategies for using theatre in elementary education. Focus on techniques and applications for teaching theatre and for utilizing theatre as a tool for teaching other subject matter. Course Attributes: Expressive Arts Course (A)
- THTR 340 - Costume Design I
  Credits: 3. Offered autumn. Prereq., THTR 102A, 202. Introduction to principles and practices of stage costume design.
- THTR 345 - Flat Pattern Des & Drafting
  Credits: 3. Offered autumn. Prereq., THTR 202. Pattern design using the flat pattern method, pattern drafting of various garment parts, advanced principles of fitting.
- THTR 346 - Textile Selection & Manipulatn
  Credits: 3. Offered spring alternate years. Analysis of fibers, yarns, structures and finishes, as related to selection and use for the theatre. Basic dyeing, distressing and painting.
- THTR 350 - Scenic Design I
  Credits: 3. Offered autumn. Prereq., THTR 102A, 202. Introduction to the problems encountered in designing scenery, analyzing of script, research and practical demands of theatre conventions. Projects include those for theatre, musicals, opera, dance and television.
- THTR 353 - Technical Direction
  Credits: 1 TO 3. Offered intermittently. Prereq., THTR 255 or consent of instr. Training for position of technical director. The role and scope of technical direction, production scheduling, design analysis, budgets and bookkeeping, and methods of construction.
- THTR 355 - Computer Aid Draft & Appl
  Credits: 3. (R-6) Offered autumn. Prereq., THTR 255. Computer drafting for scenery, costumes, lighting, and sound design drawings, including 2-D and 3-D plans, layouts and renderings. Work with CAD, photo manipulation, spreadsheet, database, and word processing programs.
- THTR 356 - Scenic Painting
  Credits: 1 TO 3. (R-6) Offered spring. Introduction to the basic skills needed as a scenic artist. Emphasis on the varied materials and techniques used in the scenic studio, color mixing, and interpretation of the designer's work.
- THTR 360 - Theatre Lighting I
  Credits: 3. Offered autumn. Prereq., THTR 102A, 202. Introduction to principles and practices of theatre lighting design. Training for position of lighting designer for theatre. Design requirements and decisions, color, development of stage picture; concentration on proscenium theatre design concepts.
- THTR 365 - Theatre Sound I
  Credits: 3. Offered autumn. Prereq., THTR 102A, 202, or consent of instr. Introduction to principles and practices of theatre sound design. Training for position of sound designer for theatre. Principles, practices, and equipment used to create finished sound designs for theatre, dance and related areas.
- THTR 370 - Stage Management I
  Credits: 2. Offered autumn. Prereq., THTR 202. Beginning study of the duties of the stage manager concentrating on the rehearsal process in the non-professional theatre situation.
- THTR 371 - Stage Mgmt Pract I

Credits: 1 TO 3. (R-6) Offered autumn and spring. Prereq., THTR 370 or consent of instr. Stage management practicum involving stage managing a showcase production or assistant stage managing a major show. Involves evening work.

- THTR 375 - Directing I

  Credits: 3. Offered autumn and spring. Prereq., THTR 120A or THTR 220A; THTR 235L. Open to juniors and seniors. Introduction to the analytical skills, staging, and conceptual techniques of the director; includes some practical application in scene work.

- THTR 380 - Playwriting

  Credits: 3. (R-6) Offered intermittently. Techniques and practice in writing short and full-length plays.

- THTR 391 - Special Topics/Exprmtl Courses

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- THTR 392 - Independent Study

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- THTR 395 - Practicum

  Credits: 1 TO 3. (R-18) Offered autumn and spring. Service learning experience in theatre in a setting compatible with the student's major and interests.

- THTR 398 - Cooperative Eductn/Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- THTR 405 - Professional Theatre

  Credits: 9. (R-18) Offered spring. Prereq., consent of instr. Laboratory experience in total play production through participation in state, regional, national and international touring production programs.

- THTR 406 - Professional Tech Prod

  Credits: 1 TO 9. (R-18) Offered spring. Prereq., consent of instr. Students experience the rigors and develop the skills required of technicians in touring theatre, maintaining integrity of all production elements through three months of intensive travel and varying venues.

- THTR 407 - Prod Construct II

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Students serve as construction crew in one of the shops for productions.

- THTR 408 - Production Team II

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Students serve as a member of the production team in a role of responsibility (i.e., master electrician, sound board operator, cutter, first hand, etc.) for major productions. These assignments and duties may serve also as part of the required senior project.

- THTR 409 - Production Design II

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Students serve as a member of the production team in a role of designer (i.e., set designer, costume designer, light designer, etc.) for major productions. These assignments and duties may serve also as part of the required senior project.

- THTR 410 - Singing For Actors

  Credits: 2. (R-4) Offered spring. Prereq., audition, acting specialization, or consent of instr. Development and presentation of musical numbers in a dramatic context. A broad-based acquaintance with music theatre literature is acquired, and techniques for approaching songs are explored with an eye toward developing competency in music theatre forms. Course Attributes: Co-Convened Course

- THTR 415 - Physical Performnce Skills III

Credits: 3. Offered spring. Prereq., THTR 316 or consent of instructor, which includes audition for acting specialization. Extremes of performance: stage combat, martial arts, and biomechanics/theatre of the grotesque.

- THTR 416 - Physical Performance Skills IV

  Credits: 3. Offered spring. Advanced specialized physical skills such as period styles, advanced combat/choreography, and commedia.

- THTR 420 - Acting V

  Credits: 3. Offered autumn. Prereq., THTR 321 and BFA acting specialization, or consent of instr. Selected scenes and projects from specific historical and stylistic periods, from Molière to Restoration comedy. Course Attributes: Co-Convened Course

- THTR 421 - Acting VI

  Credits: 3. Offered spring. Prereq., THTR 420. Selected speeches, scenes and projects from verse drama, especially Shakespeare. Course Attributes: Co-Convened Course

- THTR 423 - Professional Performance

  Credits: 1 TO 9. (R-18) Offered spring. Prereq., consent of instr. Students experience the rigors and develop the skills required for actors in touring theatre; creating characters and maintaining consistent performances through three months of intensive travel and varying venues.

- THTR 425 - Acting VII

  Credits: 3. Offered autumn. Prereq., THTR 421. Performance and scene work in contemporary practice and theory. Course Attributes: Co-Convened Course

- THTR 426 - Acting VIII

  Credits: 3. Offered spring. Prereq., THTR 425. Developing professional skills, material for the actor, professional portfolio, resume audition material, commercial acting, performance market research. Course Attributes: Co-Convened Course

- THTR 429 - Production Acting III

  Credits: 1. (R-9) Offered autumn and spring. Prereq., THTR 329. Credit for acting in approved Theatre & Dance productions.

- THTR 439 - Methods of Teaching Theatre

  Credits: 3. (R-6) Offered autumn. Prereq., consent of instr. Building and addressing specific curriculum in theatre arts. Course Attributes: Co-Convened Course

- THTR 440 - Costume Design II

  Credits: 3. (R-9) Offered spring. Prereq., THTR 340. Advanced techniques in costume design; possible topics include design for dance, opera, large scale drama and musicals. Course Attributes: Co-Convened Course

- THTR 445 - Draping

  Credits: 3. Offered spring. Prereq., THTR 345. Garment design based on manipulation of fabric on a body form; emphasis on creative solutions to design problems and the interrelationships between fabric, design, and form.

- THTR 447 - Tailoring

  Credits: 3. Offered spring alternate years. Prereq., consent of instr. Principles used in the construction of tailored garments.

- THTR 450 - Scene Design II

  Credits: 3. Offered spring. Prereq., THTR 350. A continuation of the techniques and projects in 350. Course Attributes: Co-Convened Course

- THTR 456 - Advanced Scene Painting

  Credits: 3. (R-9) Offered spring. Prereq., THTR 356 and/or consent of instr. Students will explore advanced scene painting techniques.

- THTR 460 - Theatre Lighting II

  Credits: 3. Offered spring. Prereq., THTR 360 or consent of instr. Advanced study of principles and practices of theatre lighting design. Training for position of light designer for theatre. Design requirements and decisions, color, development of stage picture; thrust and arena theatre. Course Attributes: Co-Convened Course

- THTR 465 - Theatre Sound II

  Credits: 3. Offered spring. Prereq., THTR 365 or consent of instr. Advanced study of principles and practices of theatre sound design. Training for position of theatre sound designer. Principles, practices and equipment used to create sound and music designs for the theatre, dance and related areas. Course Attributes: Co-Convened Course

- THTR 470 - Stage Management II

  Credits: 2. Offered intermittently. Prereq., THTR 370 or consent of instr. Additional study of stage management concentrating on pre-rehearsal duties, aspects of maintaining a show's integrity as established by the director, inter-production relationships, supervision of crews and union contracts. Understanding a stage manager's need for paperwork and writing skills. Students encouraged to enroll in THTR 472 to use skills in a living situation.

- THTR 472 - Stage Mgmt Pract II

  Credits: 3. (R-9) Offered autumn and spring. Prereq., THTR 470 or consent of instr. Stage managing a major show in the drama season in the Montana or Masquer Theatres or assistant stage managing for an Equity stage manager on a Montana Repertory Theatre production.

- THTR 475 - Directing II

  Credits: 3. Offered autumn. Prereq., THTR 375 or consent of instr. Directing skills for the advanced student; extensive scene work.

- THTR 476 - Directing III

  Credits: 3. Offered spring. Prereq., THTR 475. Continuation of 475. Course material coordinated with laboratory projects

- THTR 481 - Adv Acting: Persnl Performance

  Credits: 3. Offered autumn. Prereq., THTR 321 or consent of instr. Developing personal performance skills.

- THTR 482 - Adv Acting: Solo Performance

  Credits: 3. Offered spring, Prereq., THTR 481 or consent of instr. Creating solo performance material from original material or existing texts.

- THTR 484 - Adv Acting: Professionl Skills

  Credits: 3. Offered spring. Prereq., THTR 420 or consent of instr. Developing professional skills, material for the actor, professional portfolio, resume audition material, commercial acting, performance market research.

- THTR 490 - Undergraduate Research

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student. Course Attributes: Research & Creative Schlrshp

- THTR 491 - Special Topics/Exprmtl Courses

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- THTR 492 - Independent Study

  Credits: 1 TO 12. (R-24) Offered intermittently. Prereq., consent of school director. Independent work under the University omnibus option. See index.

- THTR 494 - Seminar/Workshop

  Credits: 2. (R-6) Offered intermittently. Prereq., 10 credits in Theatre or in English dramatic literature and consent of instr. Intensive study of dramatic theory relating to acting, directing, design and dramaturgy.

- THTR 495 - Practicum

  Credits: 1 TO 3. (R-9) Offered intermittently autumn and spring. Service learning experience in theatre in a setting compatible with the student’s major and interests.

- THTR 498 - Cooperative Eductn/Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A

maximum of 6 credits of Internship (398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- THTR 499 - Senior Project

  Credits: 1. Offered autumn and spring. Prereq., senior-level theatre major. The student, with approval from his/her advisor, will begin a project during the semester prior to the semester of his/her graduation. An in-depth paper and brief defense of the project are required.

- THTR 501 - Intro to Grad Studies

  Credits: 1. Offered autumn. Introduction to basic research and writing skills. Level: Graduate

- THTR 505 - Professional Theatre

  Credits: 9. (R-18) Offered spring. Prereq., consent of instr. Laboratory experience in total play production through participation in state, regional, national, and international touring production programs. Level: Graduate

- THTR 506 - Graduate Summer Theatre

  Credits: 1 TO 3. (R-6) Offered summer. Prereq., consent of instr. Practicum in school-approved summer theatre companies in the capacity of actor, designer, director, stage manager and/or technician. The student and instructor will meet prior to the student's registration for the course in order to determine the proper credit load and work expectations for the course. Student will earn credit for said work in consultation with Director of the School and outside producing company, with credit correlating to significance of above-listed duties. Level: Graduate

- THTR 507 - Tech Prod Assignment

  Credits: 2 TO 4. (R-12) Offered autumn and spring. Prereq., consent of instr. Production assignment made by the faculty. Student assigned a responsible technical position such as technical director, master electrician, sound engineer, cutter/draper or scenic artist. Credit variable and will be assigned by faculty. Level: Graduate

- THTR 508 - Desgn Prod Assignment

  Credits: 2 TO 4. (R-24) Offered autumn and spring. Prereq., consent of instr. Production design assignment made by the faculty. Student designs an element of a Theatre & Dance production with the supervision of a faculty designer. Level: Graduate

- THTR 509 - Tech Direct Pract

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Technical direction of a major show in the drama season in the Montana or Masquer Theatres. Level: Graduate

- THTR 510 - Graduate Singing for Actors

  Credits: 2. (R-4) Offered spring. Prereq., audition, acting specialization, or consent of instr. Development and presentation of musical numbers in a dramatic context. A broad-based acquaintance with music theatre literature is acquired, and techniques for approaching songs are explored with an eye toward developing competency in music theatre forms. Co-convenes with THTR 410. Level: Graduate Course Attributes: Co-Convened Course

- THTR 512 - Prob in Voice/Speech

  Credits: 1 TO 3. (R-12) Offered intermittently. Prereq., consent of instr. Development of specific advanced skills in vocal work. Level: Graduate

- THTR 513 - Grad Voice & Speech I

  Credits: 3. Offered autumn. Prereq., consent of instr. Studio training with extensive focus on exercises designed to foster awareness of how the body, breath, voice, resonance, and enunciation are the artist's tactics when acting. Level: Graduate

- THTR 514 - Graduate Voice & Speech II

  Credits: 3. Offered spring. Prereq., THTR 513. Continuation of 513; advanced studio encompassing standard speech, character voice, accent and dialect-acquisition studies. Level: Graduate

- THTR 515 - Grad Phys Performance Skills

  Credits: 3. Offered autumn. Prereq., consent of instructor. Investigation of the history and methodology of major physical-performance models. Studio work resulting in exercises and scene work to accompany each discipline explored. Level: Graduate

- THTR 517 - Prob in Physcial Perfrmnce

  Credits: 1 TO 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Development of specific advanced skills in physical performance. Level: Graduate

- THTR 520 - Graduate Acting I

  Credits: 3. (R-12) Offered autumn. Prereq., consent of instr. Intensive rehearsal and project work with emphasis on integration of advanced skills. Level: Graduate

- THTR 521 - Grad Acting II

  Credits: 3. Offered spring. Prereq., THTR 520 or consent of instr. Continuation of 521; intimate exploration of monologues, scene work, and contemporary techniques. Level: Graduate

- THTR 525 - Problems in Acting

  Credits: 1 TO 3. (R-18) Offered autumn and spring. Prereq., consent of instr. Development of specific advanced skills in acting. Level: Graduate

- THTR 526 - Studio Training I

  Credits: 3. Offered autumn. Scenes and projects from specific historical and stylistic periods, from Molière to Restoration comedy to drawing-room comedy. Co-convenes with THTR 421. Level: Graduate Course Attributes: Co-Convened Course

- THTR 527 - Studio Training II

  Credits: 3. Offered spring. Work in speeches, scenes, and projects from Shakespeare and other classical verse drama. Co-convenes with THTR 421. Level: Graduate Course Attributes: Co-Convened Course

- THTR 528 - Studio Training III

  Credits: 3. Offered autumn. Performance and scene work in contemporary practice and theory. Course will additionally familiarize students with contemporary performance theory and criticism. Co-convenes with THTR 425. Level: Graduate Course Attributes: Co-Convened Course

- THTR 529 - Studio Training IV

  Credits: 3. Offered spring. Developing professional skills, material for the actor, professional portfolio, resume audition material, commercial acting, performance market research, and knowledge about unions. Co-convenes with THTR 426. Level: Graduate Course Attributes: Co-Convened Course

- THTR 530 - Grad Sem Dramatic Lit

  Credits: 3. (R-9) Offered intermittently. Prereq., consent of instr. Selected topics with individual research projects presented in seminar concerning various genres, periods, and themes in dramatic literature. Level: Graduate

- THTR 531 - Grad Sem Theatre Hist

  Credits: 3. (R-9) Offered intermittently. Prereq., consent of instr. Selected topics and issues with individual research projects presented in seminar concerning various genres, periods, themes, and cultural contexts in theatre history. Level: Graduate

- THTR 532 - Grad Sem Dramaturgy

  Credits: 3. A graduate-level introduction to literary, historical, and contextual analysis of play scripts and performance pieces intended for production. Level: Graduate

- THTR 535 - Perform Theory & Criticism

  Credits: 3. Offered spring. Survey of the theories, elements and ingredients of multi-cultural live performance forms, including theatre, popular entertainment, ceremonies, and other public events. Includes instruction in and application of various approaches to the criticism of live performance. Level: Graduate

- THTR 539 - Grad Methods Tchg Theatre

  Credits: 3. In-depth study of teaching methods for presenting the craft of acting and theatre production to introductory-level students. Co-convenes with THTR 439. Level: Graduate Course Attributes: Co-Convened Course

- THTR 540 - Graduate Costume Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Further advancement of techniques in costume design using script/character analysis, color/texture/form usage, and presentation. Possible designs for dance, opera, large-scale drama and musicals. Co-convenes with THTR 440. Level: Graduate Course Attributes: Co-Convened Course

- THTR 542 - Prob in Costume Design

Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Development of specific technical skills in costume design. Level: Graduate

- THTR 545 - Grad Design Seminar I

  Credits: 2. Offered autumn. This course is designed to teach graduate students effective research, collaboration, and script-analysis methodologies and exploration practices. Level: Graduate

- THTR 546 - Grad Design Seminar II

  Credits: 2. Offered spring. This course is designed to continue the design process skills developed in Seminar I of effective research, collaboration and script-analysis methodologies and exploration practices. Level: Graduate

- THTR 550 - Graduate Scene Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Development of specific design skills in scenery through unrealized design opportunities as well as design concept and process development. Co-convenes with THTR 450. Level: Graduate Course Attributes: Co-Convened Course

- THTR 552 - Prob in Scene Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Development of specific technical skills in scene design. Level: Graduate

- THTR 553 - Technical Direction

  Credits: 3. Offered autumn and spring. Prereq., consent of instr. Role and scope of technical direction, production scheduling, design analysis, budgets and bookkeeping and methods of construction. Level: Graduate

- THTR 555 - Grad CADD

  Credits: 3. (R-6) Offered autumn. Students will further their understanding for how CADD software is used to create complete, accurate draftings for design and technology in theatre and theatre-related activities. Level: Graduate

- THTR 556 - Grad Rendering Techniques

  Credits: 2. Offered spring. Students will begin to develop personal design styles using both traditional and digital drawing and rendering techniques. Level: Graduate

- THTR 560 - Graduate Light Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Advanced study of principles and practices of theatre lighting design, especially collaboration and communication. Training for position of light designer for theatre or lighting instructor. Design requirements and decisions, color, development of stage picture; thrust and arena theatre. Co-convenes with THTR 460. Level: Graduate Course Attributes: Co-Convened Course

- THTR 562 - Prob in Light Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Development of specific technical skills in light design. Level: Graduate

- THTR 565 - Graduate Sound Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Further advanced study of principles and practices of theatre sound design, especially script analysis and collaboration. Training for position of theatre sound designer or instructor. Principles, practices and equipment used to create sound and music designs for the theatre, dance and related areas. Co-convenes with THTR 465. Level: Graduate Course Attributes: Co-Convened Course

- THTR 567 - Problems in Sound Design

  Credits: 3. (R-12) Offered autumn and spring. Prereq., consent of instr. Development of specific technical skills in sound design. Level: Graduate

- THTR 570 - Grad Stage Mgmt

  Credits: 2. Offered autumn. Prereq., consent of instr. Study of duties of stage manager in rehearsal and performance process. Includes stage managing a production for a faculty or guest-artist director. Level: Graduate

- THTR 572 - Stage Mgmt Pract

  Credits: 1 TO 6. (R-18) Offered autumn and spring. Prereq., consent of instr. Practical work in stage management projects. Level: Graduate

- THTR 574 - Prob Theatre Mgmt
  Credits: 1 TO 6. (R-18) Offered intermittently. Prereq., consent of instr. Level: Graduate
- THTR 577 - Directing IV
  Credits: 3. Offered autumn. Prereq., THTR 476 or consent of instr. Formalist styles of dramatic material. Through a variety of tools, textual and linguistic analysis, metrical and rhetorical analysis, archetypes, and musical structures, students analyze, interpret and stage projects drawn from opera and pre-modern drama, especially Shakespeare. Level: Graduate
- THTR 578 - Directing V
  Credits: 3. Offered spring. Prereq., THTR 577. Exploration of image, time manipulation, and nonlinear storytelling. Level: Graduate
- THTR 580 - Problems in Playwriting
  Credits: 1 TO 3. (R-12) Offered intermittently. Development of specific advanced writing projects based on dramatic structure, conflict, tension, and character complexities/psychology. Level: Graduate
- THTR 590 - Research
  Credits: 1 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instr. Level: Graduate
- THTR 591 - Special Topics
  Credits: 1 TO 18. (R-18) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- THTR 592 - Independent Study
  Credits: 1 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instr. Level: Graduate
- THTR 594 - Seminar
  Credits: 1 TO 3. (R-12) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary. Level: Graduate
- THTR 595 - Practicum
  Credits: 1 TO 3. (R-9) Service learning experience in theatre in a setting compatible with the student's major and interests. Level: Graduate Course Attributes: Internships/Practicums
- THTR 597 - Educational Methods
  Credits: 1 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instr. Level: Graduate
- THTR 598 - Internship
  Credits: 2 TO 6. (R-24) Offered intermittently. Prereq., consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate Course Attributes: Internships/Practicums
- THTR 599 - Professional Paper
  Credits: 1 TO 4. (R-4) Offered autumn and spring. Preparation of a professional paper appropriate to the needs and objectives of the individual student. Level: Graduate
- THTR 609 - Grad Design Project
  Credits: 2. Students serve in one or more design roles of the production team for major theatre and dance events, working from conceptual stage to realized production. Level: Graduate
- THTR 645 - Grad Design Seminar III
  Credits: 2. Offered autumn. This course is designed to continue the design process skills developed in Seminar II of effective research, collaboration and script analysis methodologies and exploration practices. Level: Graduate
- THTR 646 - Grad Design Seminar IV
  Credits: 2. Offered spring. This course is the capstone to the seminar sequence which completes the design process skills developed in Seminar I, II, and III of effective research, collaboration and script analysis methodologies and exploration practices. Level: Graduate
- THTR 675 - Directing VI
  Credits: 3. Offered autumn. Prereq., THTR 578. The history and literature of directing. Level: Graduate

- THTR 677 - Problems in Directing
  Credits: 1 TO 3. (R-18) Offered autumn and spring. Prereq., consent of instr. Level: Graduate
- THTR 690 - Research
  Credits: 1 TO 6. Offered autumn and spring. Prereq., consent of instr. An in-house project that takes the form of a capstone directing assignment or acting role in a School production. A paper detailing and reflecting upon the process accompanies the creative work. Level: Graduate
- THTR 695 - Grad Final Creative Project
  Credits: 1 TO 6. Offered autumn and spring. Prereq., consent of instr. An in-house project that takes the form of a capstone directing assignment or acting role in a School production. A paper detailing and reflecting upon the process accompanies the creative work. Level: Graduate
- THTR 699 - Thesis
  Credits: 1 TO 12. (R-12) Offered autumn and spring. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate

Dance Minor

Minor - Dance (Minor)

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 27
Required Cumulative GPA: 2.0

Dance Minor LD Core

Rule: Must complete the following subcategories

22 Total Credits Required

Composition

Rule: Course is required.

	Course	Credits
	DANC 220A - Creative Practice I (R-6) Offered spring. Prereq., DANC 200A. Exploration of stimulus, structure, and performance of both composed and improvised movement. Elements such as space, shape, energy, motion, time, quality, form and awareness emphasized. Instructor-designed structures, transitioning to student-designed scores, culminating in originally created/improvised performance.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Modern Experience I

Rule: 6 credits required at or above the listed level.

	Course	Credits
	DANC 100A - Intro to Modern Dance (R-4) Offered autumn and spring. Introduction to basic modern dance vocabulary through exercises for alignment, strength and flexibility and combinations across the floor.	2 Credits
Minimum Required Grade: C-		6 Total Credits Required

Ballet Experience I

Rule: 6 credits required at or above the listed level.

	Course	Credits
	DANC 110A - Intro to Ballet (R-4) Offered autumn and spring. Introduction to basic ballet positions and steps.	2 Credits
Minimum Required Grade: C-		6 Total Credits Required

Jazz Experience

Rule: 2 credits required at or above the listed level.

	Course	Credits
	DANC 115A - Intro to Jazz Dance (R-4) Offered autumn and spring. Introduction to basic strengthening and stretching exercises and stylistic characteristics of jazz.	2 Credits
Minimum Required Grade: C-		2 Total Credits Required

Technique Experience II

Rule: 2 credits required at or above the listed level.
Note: Select 1 of the 4 options.

	Course	Credits
	DANC 165A - Dance Forms: African (R-8) Offered autumn. Introduction to basic African dance vocabulary and technique.	2 Credits
	DANC 200A - Contemporary Modern II (R-12) Offered autumn and spring. Prereq., DANC 100A. Continuation of the modern dance vocabulary at an advanced-beginner level.	2 Credits

	DANC 210A - Ballet II (R-12) Offered autumn and spring. Prereq., DANC 110A. Continuation of the ballet vocabulary at an advanced-beginner level.	2 Credits
	DANC 215A - Jazz Dance II (R-12) Offered autumn. Prereq., DANC 115A. Continuation of the jazz vocabulary at an advanced-beginner level.	2 Credits
Minimum Required Grade: C-		2 Total Credits Required

Costume Experience

Rule: Select 1 of the 3 options.

Note: For THTR 107A: choose either Section 02: Costume Shop on MW or Section 05: Costume Shop on TR.

	Course	Credits
	THTR 102A - Introduction to Theatre Design Offered autumn. Basic understanding of the principles of design for the theatre and television, including the production elements of scenery, costumes and lighting.	3 Credits
	THTR 107A - Theat Prod I: Constr Crew (R-9) Offered autumn and spring. The construction and completion of scenery/props, costumes, and/or lighting under supervision. Most assignments involve very basic construction techniques and/or maintenance duties found in professional shop. Involves minimum of two 4-hour labs a week.	3 Credits
	THTR 245 - Int Costume Construction Offered spring. Intermediate costume construction focusing on the development of skills needed to function as a stitcher.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Dance Minor UD Core

Rule: Course is required.

	Course	Credits
	DANC 334 - Dance History Offered autumn odd-numbered years. Discussion of primary movements and major figures in American modern dance, including global influences and its relationship to cultural trends of the twentieth and twenty-first centuries.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Dance Minor Electives

Rule: Select 2 of the 6 options.

2 Total Credits Required

	Course	Credits
	DANC 280 - Dance Conditioning: Pilates (R-8) Offered autumn and spring. Pilates mat (floor) exercises to build core control, strength and flexibility.	1 Credits
	DANC 295 - Stdnt Tching:Children's Dance Offered autumn and spring. Students participate and gain beginning-level teaching experience in two of four dance classes for children ranging in ages from 3 ½ to 12 years old.	1 Credits
	DANC 305 - Contact Improvisation (R-6) Offered autumn odd-numbered years. The art of moving with one or more partners while using a shifting point of contact and supporting each other's weight. Skills such as rolling, suspending, falling and recovering together explored through physical sensations that use weight, counter-balance and yielding.	2 Credits
	DANC 360L - World Dance (R-6) Offered autumn odd-numbered years. Investigation of dances of diverse cultures. Study of dance as: an emblem of cultural identity, social order, power and gender-specific behavior; an expression of religion and/or ritual; a classical art form; and as a medium for personal expression in Western and non-Western world cultures.	3 Credits
	DANC 380 - Science of Dance Movement Offered spring even-numbered years. Study of the skeletal system and how it relates to dance movement. Basic kinesthetic principles, conditioning for dancers, and injury recognition and prevention.	3 Credits
	DANC 406 - Dance as a Healing Art (R-6) Offered spring. Study of body movement as a reflection of inner emotional states. How changes in movement lead to changes in the psyche, promoting health and growth. Exploration of techniques for experiencing the inter-connection between movement and emotional expression.	2 Credits
Minimum Required Grade: C-		2 Total Credits Required

Dance - Choreography and Performance

Bachelor of Fine Arts - Dance; Track: Choreography and Performance

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 70

Required Cumulative GPA: 2.0

	DANC 494 - Junior/Senior Seminar (R-6) Offered autumn even-numbered years. Seminar to discuss both practical and philosophical issues confronting dance students about to enter the "real" world.	3 Credits

Minimum Required Grade: C-	19 Total Credits Required

Ballet Experience

Rule: 12 credits required at or above the listed level.

	Course	Credits
	DANC 310 - Ballet III (R-12) Offered autumn and spring. Development of ability to combine steps; carriage of head and arms.	2 Credits
Minimum Required Grade: C-		12 Total Credits Required

Stage Management Course

Rule: Registration based on production assignment as determined by Dance faculty.

	Course	Credits
	DANC 329 - Dance Stage Mgmt Pract (R-6) Offered autumn and spring. Stage management practicum involving stage managing or assistant stage managing a dance production. Involves evening and weekend work.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Junior Project

Rule: Students must complete project for graduation.

Note: Junior projects must be planned with the student's project advisor and all journals and papers will be submitted to that advisor. All choreography and performance BFA candidates are required to choreograph for their junior projects.

	Course	Credits
	DANC 399 - Jr Creat/Research Proj (R-6) Offered autumn and spring. Independent study in choreography or a research paper which could be on such subjects as teaching styles, multiple intelligence theory, dance historical topics, dance injuries, etc. An initial proposal, a journal, and a paper are required.	1 To 6 Credits
Minimum Required Grade: C-		1 Total Credits Required

Senior Project

Rule: Students must complete project for graduation.

Note: Senior projects must be planned with the student's project advisor and all journals and papers will be submitted to that advisor.

	Course	Credits
	DANC 499 - Senior Thesis/Creative Project (R-6) Offered autumn and spring. Independent study in choreography or teaching. The student is responsible for setting up the project. An initial proposal, a journal, and a paper are required.	2 To 3 Credits
Minimum Required Grade: C-		3 Total Credits Required

BFA Choreography & Performance Degree Electives

Rule: Must complete the follow subcategories.

1 Total Credits Required

Cross-Training

Rule: One credit from HHP by advisement.

Acting Elective

Rule: Optional by advisement.

	Course	Credits
	THTR 220A - Acting I Offered autumn and spring. Studio class intended to cultivate skill sets necessary for those with a background or interest in the craft of acting, especially those considering a career in the performing arts (theatre, music, dance, film, broadcasting): observation, imagination, concentration, improvisation, and character.	3 Credits
Minimum Required Grade: Pass		3 Total Credits Required

Minimum Required Grade: C-		19 Total Credits Required

Ballet Experience

Rule: 12 credits required at or above the listed level

	Course	**Credits**
	DANC 310 - Ballet III (R-12) Offered autumn and spring. Development of ability to combine steps; carriage of head and arms.	2 Credits
Minimum Required Grade: C-		12 Total Credits Required

Stage Management Course

Rule: Registration based on production assignment as determined by Dance faculty.

Note: null

	Course	Credits
	DANC 329 - Dance Stage Mgmt Pract (R-6) Offered autumn and spring. Stage management practicum involving stage managing or assistant stage managing a dance production. Involves evening and weekend work.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Junior Project

Rule: Students must complete project for graduation.

Note: Junior projects must be planned with the student's project advisor and all journals and papers will be submitted to that advisor.

	Course	Credits
	DANC 399 - Jr Creat/Research Proj (R-6) Offered autumn and spring. Independent study in choreography or a research paper which could be on such subjects as teaching styles, multiple intelligence theory, dance historical topics, dance injuries, etc. An initial proposal, a journal, and a paper are required.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Senior Project

Rule: Students must complete project for graduation.

Note: Senior projects must be planned with the student's project advisor and all journals and papers will be submitted to that advisor.

	Course	Credits
	DANC 499 - Senior Thesis/Creative Project (R-6) Offered autumn and spring. Independent study in choreography or teaching. The student is responsible for setting up the project. An initial proposal, a journal, and a paper are required.	2 To 3 Credits
Minimum Required Grade: C-		3 Total Credits Required

BFA Teaching Requirements

Rule: Must complete the following subcategories.

30 Total Credits Required

Required Courses

Rule: All courses are required.

Note: For DANC 440: Section 40

	Course	Credits
	DANC 345 - Teaching for the Disabled (R-4) Offered autumn and spring. Students interact with adults with developmental disabilities in an adaptive dance class where movement is used as a therapeutic modality for people with cognitive and physical impairments. Students interact with the participants, engage as role models and gain beginning teaching experience.	1 Credits
	DANC 440 - Dance Pedagogy (R-9) Offered autumn even-numbered years. Methods and experiences in teaching modern dance, ballet and jazz.	3 Credits
Minimum Required Grade: C-		4 Total Credits Required

Teaching Assistant Experience

Rule: Course required.

Note: Completion of two credits must include serving as teaching assistant for at least one 100-level technique course offered in DANC rubric on campus. It is optional to earn credits through the Flagship Program.

	Course	Credits
	DANC 446 - Teaching Projects (R-24) Offered autumn and spring. Prereq., consent of instr. Independent study that may involve either assisting in the teaching of a dance technique class or actually planning and teaching it.	1 To 6 Credits
Minimum Required Grade: C-		2 Total Credits Required

In-Schools Experience

Rule: Repeat once.

Note: Section 01 for first registration; Section 40 for second.

	Course	Credits
	DANC 497 - Methods: Tchng Movmnt in Schls Offered autumn odd-numbered years. Prereq., consent of instr. Experience in planning, observing and directing creative movement as a teaching tool in K-5.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Modern Experience

Rule: 18 credits required at or above the listed level.

	Course	Credits
	DANC 300 - Modern III (R-12) Offered autumn and spring. Prereq., DANC 200A. Extension of the modern dance vocabulary through lengthier combinations of movement.	3 Credits
Minimum Required Grade: C-		18 Total Credits Required

Theatre - Education Endorsement Preparation

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Bachelor of Arts - Theatre; Track: Education Endorsement Preparation

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: The Education Endorsement Preparation specialization is designed for the student seeking an endorsement in the major teaching field of Theatre. For endorsement to teach Theatre, a student also must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major or minor GPA of 2.75 is required to be eligible for student teaching. This major does not qualify as a single field endorsement. Individuals must complete a second teaching major or minor in another content area. The demand in Montana high schools for teaching of courses in this field is limited. The required second endorsement (either a teaching major or teaching minor) should be in a field in high demand.

BA Theatre Education Major LD Core

Rule: Must complete the following subcategories.

24 Total Credits Required

Required Courses

Rule: All courses are required.

	Course	Credits
	THTR 102A - Introduction to Theatre Design Offered autumn. Basic understanding of the principles of design for the theatre and television, including the production elements of scenery, costumes and lighting.	3 Credits
	THTR 103 - Introd to House Management (R-3) Offered autumn and spring. Introduction to the skills and experience of the front-of-house staff for a theatrical production.	1 Credits

Minimum Required Grade: C-		1 Total Credits Required

Senior Project

Rule: Must be taken during student's final semester on campus (not student-teaching semester).

	Course	Credits
	THTR 499 - Senior Project Offered autumn and spring. Prereq., senior-level theatre major. The student, with approval from his/her advisor, will begin a project during the semester prior to the semester of his/her graduation. An in-depth paper and brief defense of the project are required.	1 Credits
Minimum Required Grade: Pass		1 Total Credits Required

Theatre - Acting

Bachelor of Fine Arts - Theatre; Track: Acting

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 78

Required Cumulative GPA: 2.0

Note: Students who intend to pursue the Acting specialization will normally enter the University as Bachelor of Arts students in Theatre. They should then declare intent to pursue the BFA degree no later than the beginning of the second year of a four-year program. A student may elect a special concentration in directing, music theatre, or another discipline in addition to the BFA core and area-specialization requirements. The program is designed in consultation with the student's advisor and must be approved by the faculty. The special concentration may require five years to complete.

A survey of the major developments of the theatre from primitive beginnings to the 19th century, including various cultures and their representative plays and performances throughout the world.	3 Credits
	THTR 331Y - Theatre History II Offered spring. Prereq., THTR 330H or theatre minor. Continuation of 330H. The many and varied periods since the 19th century as reflected in the theatre of the times in America and Europe.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Theatre Minor Focused Area (acting, costumes, literature/history, scenery, etc.)

Rule: 12-credit minimum: 8 credits must be UD.

Note: An advisor in Theatre & Dance must be consulted for guidelines regarding one's specific focus. Dance, Media Arts, or Music courses may count toward these required electives with approval from advisor.

Minimum Required Grade: C-

12 Total Credits Required

Music

Maxine Ramey, Director

The School of Music offers students who have demonstrated talent in music the opportunity to continue further study either for a profession or an avocation and at the same time acquire a broad general education. Complete sequences of courses are given to prepare a student for a career as a teacher or supervisor of music in the elementary/secondary schools; for a career directed toward composition, the music technology industry, private teaching, or concert work; or, for a thorough training in music within the structure of a broad liberal arts curriculum.

Four year degree programs at the undergraduate level include the Bachelor of Music Education; Bachelor of Music with areas of specialization in performance, piano performance and pedagogy or composition/music technology; and Bachelor of Arts in music. Two year graduate degree programs include the Master of Music with areas of specialization in music education, performance, composition/technology; and musical theater.

The University of Montana-Missoula is an accredited institutional member of the National Association of Schools of Music.

In general, admission as a major in the School of Music is by certificate from the high school from which the student graduates. The faculty of the School of Music is more concerned with evidence of talent, conspicuous achievement in music, promise of development, and scholarship in general than it is in the precise content of the program which the prospective music student has followed prior to admission to the University.

The School of Music welcomes the opportunity for prospective students and parents to consult with faculty and administration by paper and electronic correspondence and/or by appointment interviews on the campus. Every student wishing to become a music major or minor must take the Music Theory Assessment Examination and a Piano Proficiency Evaluation during orientation and also must audition and be accepted officially into the applied studio of a music faculty member prior to confirmation as a fully-admitted major or minor in music. Students may be admitted provisionally for one semester, and at the end of that semester students must reaudition to gain full admittance into a music major degree program

Department Faculty

Professors

Margaret Nichols Baldridge, Professor Violin and Viola
Anne Basinski, Professor, School of Music - Director, UM Opera Theater - Director, Undergraduate Voice Area
Fern Glass Boyd, Cello, Music Literature
Steven Hesla, Keyboard Area Chair
Stephen Kalm, Dean
Dr. Robert LedBetter, Director of Percussion Studies
Luis Millán, Director of Orchestra, Guitar
Maxine Ramey, Director, School of Music
Margaret Lund Schuberg, Professor of Flute

Associate Professors

David Cody, Voice, Opera, Musical Theatre
Jennifer Gookin Cavanaugh, Associate Professor; Oboe, Bassoon, and Theory
Lori Gray, Associate Professor, Music Education
Kevin Griggs, Associate Director of Bands/Director of Athletic Bands
Christopher Hahn, Professor of Piano and Piano Pedagogy
Kimberly Gratland James, Associate Professor, Voice; Coordinator, MM Vocal Performance Program
James Randall, Associate Professor of Music History
James Smart, Director of Bands, Trumpet

Assistant Professors

Zachary Cooper, Assistant Professor of Horn and Music Theory
David Edmonds, Director of Choral Studies
Johan Eriksson, Associate Professor of Saxophone and Jazz Studies
Christopher Kirkpatrick, Associate Professor of Clarinet
Emilie LeBel, Assistant Professor of Composition
Rob Tapper, Professor of Trombone & Director of Jazz Studies

Adjunct Faculty

Jeff Brandt, The Unprofessor
Nancy Cooper, Adjunct Assistant Professor of Music
John Driscoll, Instructor of Trumpet
Creighton James, Voice
Benedict Kirby, Adjunct Prof. of Tuba & Euphonium
Thomas Pertis, Instructor of Guitar
Amy Smart, Country Music On-line

- MUSE 120 - Techs: String Inst in Class I
  Credits: 1. (R-2) Offered autumn. Group instruction for beginning students on violin, viola, cello and bass, with emphasis on teaching procedures.
- MUSE 121 - Techs: String Inst in Class II
  Credits: 1. (R-2) Offered spring. Prereq., MUSE 120. Continuation of MUSE 120.
- MUSE 123 - Techniques: Voice
  Credits: 1. Offered autumn. This course examines vocal function and issues associated with the physical processes of singing such as alignment, breathing, creating sound, amplifying (resonating) sound. Additionally, students will learn basic information about becoming a voice teacher (or choral director). Students will also learn about singers' diction, voice classification, and the appropriate assigning of solo classical repertoire. Course Attributes: Expressive Arts Course (A) Performance Music Course
- MUSE 126 - Techs: Percussn Instruments I
  Credits: 1. (R-2) Offered autumn. Basic instruction in percussion instruments, with emphasis on teaching procedures.
- MUSE 127 - Techs: Percussn Instruments II
  Credits: 1. (R-2) Offered spring. Prereq., MUSE 126. Continuation of MUSE 126. Basic instruction in percussion instruments, with emphasis on teaching procedures.
- MUSE 272 - Techniqus: Flute & Single Reed
  Credits: 1. Composers are expected to bring new musical ideas, sketches, and eventually finished pieces to the workshop, while performers are expected to read, critique, practice, and finally perform the new works.
- MUSE 273 - Techniques: Double Reed
  Credits: 1. (R-2) Offered autumn. Basic instruction in oboe and bassoon, with emphasis on teaching procedures.
- MUSE 274 - Techniques: Upper Brass
  Credits: 1. (R-2) Offered autumn. Basic instruction in trumpet and horn, with emphasis on teaching procedures.
- MUSE 275 - Techniques: Lower Brass
  Credits: 1. Offered spring. Basic instruction in trombone, baritone, and tuba, with emphasis on teaching procedures.
- MUSE 333 - Gen Music Methods & Materls I
  Credits: 2. Offered autumn. Prereq., upper-division standing in music and C&I 200. Development of practical knowledge to effectively instruct and administer general music classes in the public schools, grades K-12.
- MUSE 334 - Gen Music Methods & Materls II
  Credits: 2. Offered spring. Prereq., upper-division standing in music and EDU 202. Continuation of MUSE 333.
- MUSE 397 - Methods: K-8 Music
  Credits: 2. Offered autumn and spring. Prereq., C&I 200. Integration of fundamental skills and basic rudiments of music into the various aspects of teaching music creatively in the elementary school. For non-music majors only.
- MUSE 425 - Technology and Materials
  Credits: 2. Offered autumn semesters, as an elective. The course will provide in-depth examination of technology and print resources appropriate for use in music classrooms K-12, all areas and ensembles. Students will work independently and collaboratively to reflect upon, discuss, and practice utilizing technology and print resources for the music classroom (K-12).
- MUSE 497 - Methods: Choral & Literature

Credits: 2. Offered Spring. Prereq., upper-division standing in music and MUSE 123. Development of strategies for directing the secondary choral ensemble. Focus on rehearsal techniques and literature selection for the developing choir.

- MUSE 521 - Psychology of Music

  Credits: 2. Offered intermittently. Prereq., graduate standing in music. Investigation of the perception, processing and cognition of music. Psychological foundations of musical behavior: psychoacoustics, measurement and prediction of musical ability, functional music, music and society, music learning, and effective response to music. Level: Graduate

- MUSE 522 - Philosophy of Music

  Credits: 2. Offered intermittently. Prereq., graduate standing in music. An investigation of the meaning of music, the relationship to various societies and social structures and the leading philosophical ideas which relate to music and music instruction. Level: Graduate

- MUSE 581 - Arts Educ Institute

  Credits: 2. (R-4) Offered summer. Same as ART 581, THTR 581. Open forum with national and regional speakers, panels, and symposia to promote discussion, understanding, and direction on significant national issues in the arts and arts education. Level: Graduate

- MUSE 582 - Arts Educ Seminar I

  Credits: 1 TO 2. (R-4) Same as CP 582. Offered summers. Topics vary. Level: Graduate

- MUSE 583 - Arts Educ Seminar II

  Credits: 1 TO 2. (R-4) Prereq., MUSE 582. Same as CP 583. Offered summers. Topics vary. Level: Graduate

- MUSE 584 - Arts Educ Seminar III

  Credits: 1 TO 2. (R-18) Prereq., MUSE 583. Same as CP 584. Continuation MUSE 583. Level: Graduate

- MUSE 585 - Arts Educ Seminar IV

  Credits: 1 TO 2. (R-4) Prereq., MUSE 584. Same as CP 585. Continuation of MUSE 584. Level: Graduate

- MUSE 586 - Arts Educ Seminar V

  Credits: 1 TO 2. (R-8) Offered summer. Prereq., MUSE 585. Same as CP 586. Continuation and synthesis of preceding seminars. Level: Graduate

- MUSE 588 - Arts Ed Apprenticeship

  Credits: 1 TO 3. (R-24) Offered summer. Same as CP 588. Exploration of art forms to develop new artistic and communicative perceptions and awareness. Level: Graduate

Music

Back to Top

- MUSI 101L - Enjoyment of Music

  Credits: 3. Offered autumn and spring. The development of music listening skills. Exploration of the relationship between musical materials and the expressive qualities of a musical composition or performance. Concert attendance required. No musical background is expected. For non majors only. Credit not allowed for both MUSI 101L and 202L (MUS 134L and 135L). Course Attributes: Lit & Artistic Studies (L)

- MUSI 102A - Performance Study

  Credits: 1 TO 2. Offered autumn and spring. Prereq., consent of instr. Individual instruction in voice, piano, organ, harpsichord, carillon, string, wind and percussion instruments. A total of 6 credits is allowed in any one performance area. All private instruction requires concurrent ensemble participation. Course Attributes: Expressive Arts Course (A)
  Performance Music Course

- MUSI 104 - Music Fundamentals

  Credits: 2. Offered autumn. Basic principles of notation, including clefs, scales, intervals, cords and rhythm.

- MUSI 105 - Music Theory I

  Credits: 2. Offered autumn. Coreq., MUSI 140. Material and structure of music. Application of principles in tow-, three-, and four-part writing and the keyboard.

- MUSI 106 - Music Theory II

  Credits: 2. Offered spring. Prereq., MUSI 105. Coreq., MUSI 141. Continuation of MUSI 105.

- MUSI 108A - Orchestra: UMSO

  Credits: 1. Offered autumn and spring. See MUSI 112A for repeatability limitations. Open to all University students by audition. Rehearsal and performing experience in a broad range of symphonic, choral, operatic and concerto repertoire in the University Orchestra and the Missoula Symphony. Course Attributes: Ensemble Music Course Expressive Arts Course (A)

- MUSI 110A - Opera Theatre I

  Credits: 1. (R-8) Offered autumn and spring. Prereq., consent of instr. Study and performance of the standard opera repertoire. Course Attributes: Ensemble Music Course
  Expressive Arts Course (A)

- MUSI 111A - Singing for Non-Majors

  Credits: 2. Offered autumn and spring. An introduction to the skills which enable and enhance artistic singing. As a group, students work to understand and exercise good tone production, musicality, and performance skills. Course Attributes: Expressive Arts Course (A)

- MUSI 112A - Choir

  Credits: 1. Offered autumn and spring. Open to all University students. Audition places students according to appropriate ensemble and proper seating/section. Music majors refer to curricula for specific requirements. Non-music majors may apply 8 credits of MUSI 112A-114A, 110A/310, 131A/331, and 122A/322 toward graduation. Course Attributes: Ensemble Music Course
  Expressive Arts Course (A)

- MUSI 114A - Band: UM Concert Band

  Credits: 1. Offered autumn and spring. See MUSI 112A for repeatability limitations. Major musical organizations open to all University students. Audition required for Symphonic Wind Ensemble. Course Attributes: Ensemble Music Course Expressive Arts Course (A)

- MUSI 122A - Percussion Ensemble: UM

  Credits: 1. Offered autumn and spring. See MUSI 112A for repeatability limitations. Prereq., consent of instr. String, woodwind, brass, percussion, piano and vocal ensembles as appropriate to meet student needs. Course Attributes: Ensemble Music Course Expressive Arts Course (A)

- MUSI 123A - World Percussion Ensemble

  Credits: 1. Offered autumn and spring. See MUS 107A for repeatability limitations. Prereq., consent of instr. String, woodwind, brass, percussion, piano and vocal ensembles as appropriate to meet student needs. Course Attributes: Expressive Arts Course (A)

- MUSI 130L - History of Jazz

  Credits: 3. Offered autumn. The development of jazz in the 20th century with emphasis on critical listening and the recognition of important trends and people in its history. Course Attributes: Lit & Artistic Studies (L)

- MUSI 131A - Jazz Ensemble I: UM Jazz Bands

  Credits: 1. (R-8) Offered autumn and spring. Prereq., consent of instr. Study and performance of the jazz repertoire. Course Attributes: Ensemble Music Course Expressive Arts Course (A)

- MUSI 132L - History of Rock & Roll

  Credits: 3. Offered autumn and spring. A study of the roots, components, and development of the musical art form "Rock and Roll". Significant performing artists and movements with the style identified and presented. Includes traditional lecture with substantial use of audio and visual aids. Course Attributes: Lit & Artistic Studies (L)

- MUSI 133L - Cntry Msc:Cowbys,Opry,Nshville

  Credits: 3. This course will explore the country music genre, including its major performers, songwriters, songs and impact on culture from the early times on the radio to the beginning of the twenty-first century. Course Attributes: Lit & Artistic Studies (L)

- MUSI 135A - Keyboard Skills I

Credits: 1. Offered autumn. Music reading, techniques, and harmonization skills acquired through study of solo and ensemble repertoire in a contemporary electronic piano laboratory. Course Attributes: Expressive Arts Course (A) Performance Music Course

- MUSI 136A - Keyboard Skills II

  Credits: 1. Offered spring. Prereq., MUSI 135A. Continuation of MUSI 135A. Course Attributes: Expressive Arts Course (A) Performance Music Course

- MUSI 139 - Language of Music II

  Credits: 3. Offered spring. Prereq., MUSI 138. Continuation of MUSI 138 with emphasis on analysis of musical examples and aural recognition of basic harmonic patterns.

- MUSI 140 - Aural Perception I

  Credits: 2. Offered autumn. Coreq., MUSI 105. A laboratory course in singing and dictation to supplement Theory I.

- MUSI 141 - Aural Perception II

  Credits: 2. Offered spring. Prereq., MUSI 140; coreq., MUSI 106. Continuation of MUSI 140.

- MUSI 155A - Marching: Grizzly Marchng Band

  Credits: 1. Offered autumn. See MUSI 112A for repeatability limitations. A musical organization of brass, woodwinds, percussion, and auxiliary units open to all University students with no audition required. Course Attributes: Expressive Arts Course (A)

- MUSI 160A - Beginning Guitar

  Credits: 2. Offered autumn. A beginning course in the fundamentals of playing folk guitar. Includes introduction to the rudiments of music. Course Attributes: Expressive Arts Course (A)

- MUSI 162A - Chamber Ensembles I

  Credits: 1. (R-20) Offered autumn and spring. See MUS 107A for repeatability limitations. Prereq., consent of instr. String, woodwind, brass, percussion, piano and vocal ensembles as appropriate to meet student needs. Course Attributes: Expressive Arts Course (A)

- MUSI 180 - Composition I

  Credits: 1 TO 2. (R-4) Offered autumn and spring. Prereq., consent of instr. An introduction to the basic art of music composition. May be substituted for upper division electives for students not majoring in theory or composition.

- MUSI 191 - Special / Experimental Courses

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- MUSI 192 - Independent Study

  Credits: 1 TO 3. (R-9) Offered autumn and spring. Course material appropriate to the needs and objectives of the individual student.

- MUSI 195 - Applied Study I

  Credits: 1 TO 4. (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Instruction in voice, piano, organ, string, wind and percussion instruments. Students entering MUSI 195 must show talent for solo performance and evidence of the equivalent of a minimum of four years prior study. All private instruction requires concurrent ensemble participation. Course Attributes: Internships/Practicums

- MUSI 202L - Intro to Music Literature

  Credits: 3. Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L. Course Attributes: Lit & Artistic Studies (L)

- MUSI 205 - Music Theory III

  Credits: 2. Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 240. Continuation of MUSI 106.

- MUSI 206 - Music Theory IV

Credits: 2. Offered spring. Prereq., MUSI 205; coreq., MUSI 241. This course is a continuation of MUSI 205, concentrating on, but not limited to, music as defined by and expressed in the Western European historical traditions from the Renaissance through the common practice period to the contemporary musical world in which we live.

- MUSI 207H - World Music (equiv to 307)

  Credits: 3. Offered autumn and spring. Introduction to the diversity of music among the world's peoples. Selected music systems throughout the world examined in their broad cultural contexts: religious, historical, and social. Introduction to ethnomusicology-a combination of musicology, anthropology and other related disciplines. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)

- MUSI 218 - Int Piano Cls (Honors)

  Credits: 1. Offered intermittently. Prereq., placement examination. Accelerated offering of the material covered in MUSI 235 and 236. Course Attributes: Performance Music Course

- MUSI 225 - Jazz Theory & Improvisation I

  Credits: 2. Offered autumn. A performance oriented course to provide a basic understanding of jazz harmony. Application of scales and melodic patterns in improvising over various harmonic progressions.

- MUSI 226 - Jazz Theory & Improvisation II

  Credits: 2. Offered spring. Prereq., MUSI 225. Continuation of MUSI 225.

- MUSI 235 - Keyboard Skills III

  Credits: 1. Offered autumn. Prereq., MUSI 136A or equiv. Continuation of MUSI 136A. Course Attributes: Performance Music Course

- MUSI 236 - Keyboard Skills IV

  Credits: 1. Offered spring. Prereq., MUSI 235. Continuation of MUSI 235, culminates in piano functional examination. Course Attributes: Performance Music Course

- MUSI 240 - Aural Perception III

  Credits: 2. Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 205. A lab course in singing and dictation to supplement Theory III.

- MUSI 241 - Aural Perception IV

  Credits: 2. Offered spring. Prereq., MUSI 240; coreq., MUSI 206. See MUSI 240.

- MUSI 267A - Composer's Workshop

  Credits: 1. This is a composition workshop and new music ensemble, in which student composers and performers collaborate, guided by a faculty composer, to develop new pieces. Course Attributes: Expressive Arts Course (A)

- MUSI 280 - Composition II

  Credits: 1 TO 2. (R-4) Offered autumn and spring. Prereq., 4 credits of MUSI 180. Original work in composition may be substituted for upper-division electives for students not majoring in theory or composition.

- MUSI 281 - Diction: English, Italian

  Credits: 2. Offered autumn even-numbered years. Introduced course participants to the International Phonetic Alphabet (IPA) with application to American English Diction and Italian Diction.

- MUSI 282 - Dict: Gmn & French (equiv 382)

  Credits: 2. Offered spring odd-numbered years. Applies IPA to French and German Diction and addresses other guidelines that apply to the lyric pronunciation of these languages. Students will transcribe, translate, recite, and sing German and French texts. This is a required course for BM vocal performance majors; MUS 281 is the prerequisite course. Students who would like to be considered for mid-year registration in this diction series may do so only with the consent of the instructor.

- MUSI 291 - Special / Experimental Courses

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings by visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- MUSI 295 - Applied Study II

  Credits: 1 TO 4. (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Continuation of 151. All private instruction requires concurrent ensemble participation. Course Attributes: Internships/Practicums

- MUSI 296 - Piano Prof Assessment

  Credits: 0. Repeat 8 times. All majors pursuing a B.M. or B.M.E. degree must successfully complete all sections of the Piano Proficiency Assessment in order to attain upper-division standing in music. The eight-part exam is administered at the end of each semester. Successfully completed assessments will receive a grade of CR.

- MUSI 301H - Music History I

  Credits: 3. Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire. Course Attributes: Hist & Cultural Studies (H)
  Democracy and Citizenship (Y)

- MUSI 302H - Music History II

  Credits: 3. Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H. Course Attributes: Hist & Cultural Studies (H)
  Writing Course-Advanced Democracy and Citizenship (Y)

- MUSI 304A - Sound in the Natural World

  Credits: 3. Offered even-numbered years. This is a music composition and performance course that explores sound/music in relation to wilderness. Students will learn from cultures that have stayed in contact with their natural environment and will create compositions from materials collected in the field and will perform and critique them. As a result, students will become familiar with their own creative process. Course Attributes: Expressive Arts Course (A)

- MUSI 308 - Orchestras II: UM

  Credits: 1. Offered autumn and spring. Prereq., upper-division standing in instrument of participation. See MUSI 108A for description.

- MUSI 310 - Opera Theatre II

  Credits: 1. (R-8) Offered autumn and spring. Prereq., consent of instr. See MUSI 131A for description. Course Attributes: Expressive Arts Course (A)

- MUSI 312 - Choir III

  Credits: 1 TO 8. Offered autumn and spring. Prereq., upper-division standing in voice. See MUSI 112A for description.

- MUSI 314 - Band III: UM Concert Band

  Credits: 1. Offered autumn and spring. Prereq., upper-division standing in instrument of participation. See MUSI 114A for description.

- MUSI 322 - UM Percussion Ensemble

  Credits: 1. Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.

- MUSI 323 - World Percussion Ensemble

  Credits: 1. Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.

- MUSI 331 - Jzz Ens II: UM

  Credits: 1. (R-8) Offered autumn and spring. Prereq., consent of instr. See MUSI 131A for description.

- MUSI 332 - Advanced Functional Piano

  Credits: 1. Offered intermittently. Prereq., upper-division standing in music. Offered alternate years. Techniques of harmonization, transposition, sight-reading, modulation, and improvisation.

- MUSI 333 - Practicum in Piano Pedagogy

  Credits: 1 TO 2. (R-4) Offered intermittently. Prereq. or coreq., MUSI 435, 436. Student teaching of young pianists.

- MUSI 335 - Instrumental Conducting

Credits: 2. (R-4) Offered spring. Prereq., upper-division standing in music. Conducting methods and practice. Teaching methods and materials.

- MUSI 336 - Choral Conducting

  Credits: 2. (R-4) Offered autumn. Prereq., upper-division standing in music. A study of the techniques of choral conducting. Emphasis on issues encountered in various ensemble settings.

- MUSI 342 - Vocal Repertoire I

  Credits: 2. Offered autumn odd-numbered years. Prereq., upper-division standing in music. Comprehensive acquaintance with styles and interpretation in British, German, and possible additional repertoire genres.

- MUSI 343 - Vocal Repertoire II

  Credits: 2. Offered spring even-numbered years. Prereq., upper-division standing in music. Comprehensive acquaintance with styles and interpretation in American, French and possible additional genres.

- MUSI 355 - Marching Band II: Grizzly

  Credits: 1. (R-4) Offered autumn. Prereq., MUSI 155A or consent of instr. A musical organization of brass, woodwinds, percussion, and auxiliary units open to all University students.

- MUSI 356 - Form & Analysis I

  Credits: 2. Offered autumn. Prereq., upper-division standing in music. Detailed harmonic and formal analysis of representative works from the Baroque period to the present.

- MUSI 357 - Form & Analysis II

  Credits: 2. Offered spring. Prereq., upper-division standing in music and MUSI 356. Continuation of MUSI 356.

- MUSI 362 - Chmbr Ens III: UM

  Credits: 1. Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.

- MUSI 380 - Composition III

  Credits: 1 TO 3. (R-6) Offered autumn and spring. Prereq., upper-division standing in music and 4 credits in MUSI 280. Creative writing of music.

- MUSI 388 - Concert Attendance UM

  Credits: 0. All music majors pursuing a B.M., B.M.E., or B.A. degree must attend in a minimum of 100 approved recitals/concerts prior to graduation. Students will receive recital credits each semester they are enrolled and should register for 388 the semester they apply for graduation. Successful completion of attendance requirements will be graded CR.

- MUSI 391 - Special / Experimental Courses

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- MUSI 392 - Independent Study

  Credits: 1 TO 3. (R-9) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- MUSI 395 - Applied Study III

  Credits: 1 TO 4. (R-12) Offered autumn and spring. Prereq., upper-division standing in music and consent of instr. Continuation of MUSI 295. All private instruction requires concurrent ensemble participation. Course Attributes: Internships/Practicums

- MUSI 399 - Junior Recital

  Credits: 1 TO 2. Coreq., MUSI 395. Offered autumn and spring. Public performance guided by applied music faculty during the junior year of applied study. This recital, consisting of a minimum of 20 minutes of music, may be scheduled in conjunction with another student's junior recital. Co-Requisite: MUSI 395.

- MUSI 407 - Counterpoint I

  Credits: 3. Offered intermittently. Prereq., upper-division standing in music. Writing and analysis of contrapuntal styles through the 18th century.

- MUSI 409 - String Pedagogy & Literature

Credits: 1 TO 2. (R-4) Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in class string instruction.

- MUSI 411 - Woodwind Pedagogy

  Credits: 2. Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in individual and class instruction are discussed. Philosophies, repertoire, individual and group techniques used in teaching woodwinds.

- MUSI 412 - Brass Pedagogy

  Credits: 2. Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in individual and class instruction are discussed. Philosophies, repertoire, individual and group techniques used in teaching brass instruments.

- MUSI 413 - Percussion Pedagogy

  Credits: 2. Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in individual and class instruction are discussed. Philosophies, repertoire, individual and group techniques used in teaching percussion instruments.

- MUSI 415 - Music 20th Century to Present

  Credits: 3. Offered intermittently. Prereq., MUSI 302H and upper-division standing in music. Detailed analysis and comparison of selected instrumental, vocal and keyboard compositions of the 20th Century. Course Attributes: Writing Course-Advanced

- MUSI 416 - Topics in Music History

  Credits: 3. (R-3) Offered intermittently. Prereq. MUSI 302H and upper division standing in music or consent of instructor. Course materials will examine the development of musical styles, genres, forms and aesthetics important to Western music, introducing students to research methods in musicology. Course Attributes: Writing Course-Advanced

- MUSI 417 - Cultural Studies in Music

  Credits: 3. (R-3) Offered intermittently. Prereq. MUSI 302H and upper division standing in music, or consent of instructor. Course materials will examine music's contemporary role within cultures and societies around the world, introducing students to research methods in cultural studies and ethnomusicology. Course Attributes: Writing Course-Advanced

- MUSI 420 - Jazz Pedagogy

  Credits: 3. Offered spring even-numbered years. Prereq., upper division or graduate standing in music or consent of instructor. Development of skills needed to rehearse and direct jazz ensembles at the middle school through high school level.

- MUSI 432 - Keyboard Literature

  Credits: 3. Offered autumn even-numbered years. Prereq., upper-division standing in music. Keyboard literature from the developments of the Baroque era to the contemporary period including the suite, sonata, character pieces, etc.

- MUSI 433 - Keyboard Literature II

  Credits: 3. Offered spring odd-numbered years. Continuation of MUSI 435.

- MUSI 435 - Piano Methods & Materials I

  Credits: 3. Offered autumn odd-numbered years. Prereq., upper-division standing in music or consent of instr. Methods and materials for teaching piano classes in public schools and private studios. Procedures in teaching beginning, intermediate and advanced students in private studios. Practical demonstrations and supervised laboratory experience with children's classes.

- MUSI 436 - Piano Methods & Materials II

  Credits: 3. Offered spring even-numbered years. Prereq., MUSI 435. Continuation of MUSI 435.

- MUSI 440 - Orchestration

  Credits: 2. Offered autumn. Prereq., upper-division standing in music. Orchestrating and transcribing for orchestra and band instruments.

- MUSI 442 - Vocal Studio Pedagogy and Lit

  Credits: 2. Offered autumn odd-numbered years or spring even-numbered years. Prereq., upper-division standing in music. Procedures, philosophies and terminology used in the teaching of singing. Individual and group techniques.

- MUSI 444 - Advanced Vocal Pedagogy

Credits: 3. Offered spring even-numbered years or as needed. Prereq., MUSI 442 or consent of instructor. A detailed examination of foundational vocal technique and science topics including respiration, phonation, resonation, and articulation. Offers students the opportunity to explore current topics in the field and how to approach them as a singer or voice teacher.

- MUSI 467 - Composers' Workshop II
  Credits: 1. Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.
- MUSI 470 - Jazz Arranging & Composition
  Credits: 3. Offered spring odd-numbered years. Prereq., upper division or graduate standing in music or consent of instructor. Composing and arranging for small to medium sized jazz ensembles. Rhythmic rewriting of melodies, re-harmonization techniques, arranging of pre-existing jazz compositions, and original compositions.
- MUSI 480 - Composition IV
  Credits: 1 TO 3. (R-6) Offered autumn and spring. Prereq., 3 credits in MUSI 380. A continuation of composition with writing in the larger forms.
- MUSI 491 - Special / Experimental Courses
  Credits: 1 TO 9. (R-9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- MUSI 492 - Independent Study
  Credits: 1 TO 3. (R-9) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- MUSI 495 - Applied Study IV
  Credits: 1 TO 4. (R-12) Offered autumn and spring. Prereq., upper-division standing in music and consent of instr. Continuation of MUSI 395. All private instruction requires concurrent ensemble participation. Course Attributes: Internships/Practicums
- MUSI 499 - Senior Recital/Capstone Pjt
  Credits: 1 TO 4. (R-4) Offered autumn and spring.
- MUSI 500 - Secondary Perform Area
  Credits: 1 TO 2. (R-6) Offered every term. Prereq., audition and consent of instr. Continuation of MUSI 102A. Level: Graduate
- MUSI 511 - Advanced Conducting
  Credits: 2. (R-6) Offered intermittently. Prereq., MUSI 335/336 and consent of instr. Class and/or individual study of the art of conducting with emphasis on performance with university performing groups. Level: Graduate
- MUSI 520 - Research in Music
  Credits: 1 TO 2. Offered autumn and summer. Prereq., graduate standing in music. Research problems: their statement, organization, techniques, tabulation of materials, and concepts necessary for interpretation of data. Development of a research proposal. Level: Graduate
- MUSI 526 - Sem Instrumental Lit
  Credits: 2. (R-4) Offered intermittently. Prereq., graduate standing in music. Concentrated study of symphonic literature or instrumental chamber music literature. Level: Graduate
- MUSI 551 - Major Performance Area
  Credits: 1 TO 4. (R-12) Offered every term. Prereq., audition and consent of instr. Continuation of MUSI 495. Level: Graduate
- MUSI 554 - Analytical Techniques I
  Credits: 3. Offered autumn odd-numbered years. Prereq., graduate standing in music. A survey of the theoretical approach of leading composers from the polyphonic period to the present. Level: Graduate
- MUSI 555 - Analytical Techniques II
  Credits: 3. Offered spring even-numbered years. Prereq., MUSI 554. Continuation of MUSI 554. Level: Graduate
- MUSI 559 - Composition

Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Continuation of MUSI 480. Level: Graduate

- MUSI 593 - Professional Projects
  Credits: 1 TO 4. (R-4) Offered intermittently. Prereq., graduate standing in music. Level: Graduate
- MUSI 595 - Special Topics
  Credits: 1 TO 8. (R-8) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- MUSI 596 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Students must have projects approved by a music faculty member before enrolling. Level: Graduate Course Attributes: Independent Study
- MUSI 598 - Internship
  Credits: 1 TO 6. (R–6) Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate
- MUSI 599 - Thesis
  Credits: 1 TO 10. (R-10) Offered intermittently. Prereq., graduate standing in music. Level: Graduate
- MUSI 699 - Dissertation
  Credits: 1 TO 12. Offered intermittently. Prereq., graduate standing in music. Level: Graduate

Music-Technology

Back to Top

- MUST 110 - Digital Audio & Multitracking
  Credits: 2. Offered autumn and spring. Composition of computer music through recording, editing, and processing sound with digital audio software. Study of the theory and application of digital audio recording, multitracking, and digital signal processing, and electroacoustic music history. Survey of historical and current electronic and computer music composers, pieces, and practices.
- MUST 210 - Sequencng, Synthesis, Sampling
  Credits: 2. Offered autumn. Prereq., MUST 110. Composition of computer music using MIDI sequencing, sampling, and synthesis software, and score preparation using music notation software. Study of the theory and application of MIDI, synthesis algorithms, and effects processing, and the practice of music engraving.
- MUST 227A - Mtn Electroacoustc Lptp Ens I
  Credits: 1. This is a new music workshop, in which student composers, guided by a faculty composer, collaborate on new pieces for electroacoustic ensemble. Each student will compose structured improvisations, scored with a combination of traditional and graphic notation, that the Mountain Electroacoustic Laptop Ensemble (MELEe) will perform, with their electric or amplified instruments, MIDI controllers, and laptop computers. Successful completion of MUST 310 is a prerequisite for taking this class, unless otherwise exempted by the instructor. Course Attributes: Expressive Arts Course (A)
- MUST 310 - Interactivity Digitl Sgnl Proc
  Credits: 2. Offered spring. Prereq., MUST 210 and upper-division standing in music. Composition of interactive computer music using a graphical programming environment for MIDI, synthesis, and digital signal processing. Study of graphical programming, interactive composition and performance, generating and processing MIDI data, synthesizing computer-generated sound, and processing digital audio in real-time.
- MUST 410 - Computer Music Programming
  Credits: 2. Offered autumn. Upper-division standing in music. Composition of computer music through programming. Study of object oriented programming, synthesis and digital signal processing techniques, music-generating algorithms, sound spatialization, graphical user interface design, and external control.
- MUST 427 - Mtn Electroacoustc Lptp Ens II

Credits: 1. Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.

- MUST 491 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- MUST 492 - Independent Study
  Credits: 1 TO 3. (R-9) Offered autumn and spring. Prereq., consent of instr.
- MUST 595 - Special Topics
  Credits: 1 TO 8. (R-8) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- MUST 596 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Students must have projects approved by a music faculty member before enrolling. Level: Graduate

Music Minor

Minor - Music

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 27

Required Cumulative GPA: 2.75

Note: Electives are to allow for emphasis in a particular area of Music study and must include course work at the upper-division level.

Upper-division course work normally requires a pre-requisite. Please see the University general catalog for details.
Consent of instructor will be required if all prerequisites have not been met.

To receive an academic minor in Music the student Must earn at least 27 credits to include the following:
• MUSI 202L (Introduction to Music Literature) 3 credits
• MUSI 195 (Major Performance I) 2 credits
• 2 credits chosen from MUSI 112A (Choral Ensembles), 108A (Orchestras), 155A (Marching Band), 112A (Concert Bands), 110A (Opera Theater), 131A (UM Jazz Bands), 162A (Chamber Ensembles), taken concurrently with 195.
• MUSI 105-106 (Music Theory I, II) 4 credits
• MUSI 140-141 (Aural Perception I, II) 4 credits
• 12 credits of Music electives which Must be approved in advance by the School of Music, Director.

Reguired for a Minor in Music

Rule: All courses required

Note: *MUSI 108A-114A,, +162A, #191 Ensembles for one credit each semester for a total of 2 credits each year. +Guitar principals, only #piano principals only. Ensembles must be taken concurrently with MUSI 195. MUSI 195 Applied Studies 1 credit each semester for a total of 2 credits for the year. Music electives approved by Director of the School 12 credits. See elective options.

	Course	Credits
	MUSI 105 - Music Theory I Offered autumn. Coreq., MUSI 140. Material and structure of music. Application of principles in tow-, three-, and four-part writing and the keyboard.	2 Credits

	MUSI 106 - Music Theory II Offered spring. Prereq., MUSI 105. Coreq., MUSI 141. Continuation of MUSI 105.	2 Credits
	MUSI 140 - Aural Perception I Offered autumn. Coreq., MUSI 105. A laboratory course in singing and dictation to supplement Theory I.	2 Credits
	MUSI 141 - Aural Perception II Offered spring. Prereq., MUSI 140; coreq., MUSI 106. Continuation of MUSI 140.	2 Credits
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Minor in Music Elective Options - Performance

Rule: All courses required

Note: MUSI 295 and MUSI 395 Applied Studies 1 credit each semester for a year total of 2 credits . Two year total of 4 credits in these Applied Studies. *MUSI 308A-314A, 362A, 391 Ensembles for four credits must be taken concurrently with MUSI 295, 395. Music Electives may be selected from MUSI 301H (Music History I), MUSI 205-206 (Theory III,IV) or from 300-400 level performance or academic classes for four credits.

Minimum Required Grade: C-

12 Total Credits Required

Minor in Music Elective Options - Theory

Rule: All courses required

Note: *MUSI 356-357 Form and Analysis I, II for 4 credits *or MUSI 379 (Counterpoint I), 3 crs + 1 cr. elective

	Course	**Credits**
	MUSI 205 - Music Theory III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 240. Continuation of MUSI 106.	2 Credits
	MUSI 206 - Music Theory IV Offered spring. Prereq., MUSI 205; coreq., MUSI 241. This course is a continuation of MUSI 205, concentrating on, but not limited to, music as defined by and expressed in the Western European historical traditions from the Renaissance through the common practice period to the contemporary musical world in which we live.	2 Credits
	MUSI 240 - Aural Perception III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 205. A lab course in singing and dictation to supplement Theory III.	2 Credits
	MUSI 241 - Aural Perception IV Offered spring. Prereq., MUSI 240; coreq., MUSI 206. See MUSI 240.	2 Credits

Minimum Required Grade: C-	12 Total Credits Required

Minor in Music Elective Options - Music History

Rule: All courses required

Note: MUSI 415-417 History/Literature Period Courses for 6 credits and *Theory or Literature electives for 3 credits. *Although worth 4 crs., MUSI 205-206 (Theory III, IV) is strongly recommended to fulfill the Theory/Literature electives.

	Course	Credits
	MUSI 301H - Music History I Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Minor in Music Elective Options - Composition

Rule: All courses required

Note: MUSI 180 Composition I 1 credit each semester for a total of 2 credits each year for total of 4 credits, MUSI 280 Composition II 1 credit each semester for a total of 2 credits each year for total of 4 credits. MUSI 207X Music in World Cultures 3 credits

	Course	Credits
	MUSI 135A - Keyboard Skills I Offered autumn. Music reading, techniques, and harmonization skills acquired through study of solo and ensemble repertoire in a contemporary electronic piano laboratory.	1 Credits
Minimum Required Grade: C-		12 Total Credits Required

Minor in Music Elective Options - Technology

Rule: All courses required

Note: Music Technology
MUST 110 Digital Audio and Multitracking 2
MUST 210 Sequencing, Synthesis, Sampling 2
MUST 310 Interactivity Digital Sgnl Proc. 2
MUST 227A Mtn Electroacoustic Lap Top Ensemble 1
MUSI 207X Music in World Cultures 3

	Course	Credits

	MUST 410 - Computer Music Programming Offered autumn. Upper-division standing in music. Composition of computer music through programming. Study of object oriented programming, synthesis and digital signal processing techniques, music-generating algorithms, sound spatialization, graphical user interface design, and external control.	2 Credits
Minimum Required Grade: C-		12 Total Credits Required

Music History

Bachelor of Arts - Music; Track: Specialization in Music History

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 51

Required Cumulative GPA: 2.75

Note: **51 Credits of non-Music major courses (36 credits Must be in the College of Arts and Sciences)
**51 Credits in Music
All degrees require 39 upper division credits.

First year

Rule: All courses required

Note: 1st year requirements: MUSI 195 applied studies 1 credit each semester for a total of 2 credits first year. Spring semester MUSI 207X Music of the World's Peoples is required for 3 credits.

	Course	Credits
	MUSI 105 - Music Theory I Offered autumn. Coreq., MUSI 140. Material and structure of music. Application of principles in tow-, three-, and four-part writing and the keyboard.	2 Credits
	MUSI 106 - Music Theory II Offered spring. Prereq., MUSI 105. Coreq., MUSI 141. Continuation of MUSI 105.	2 Credits
	MUSI 135A - Keyboard Skills I Offered autumn. Music reading, techniques, and harmonization skills acquired through study of solo and ensemble repertoire in a contemporary electronic piano laboratory.	1 Credits
	MUSI 136A - Keyboard Skills II Offered spring. Prereq., MUSI 135A. Continuation of MUSI 135A.	1 Credits
	MUSI 140 - Aural Perception I Offered autumn. Coreq., MUSI 105. A laboratory course in singing and dictation to supplement Theory I.	2 Credits

	MUSI 141 - Aural Perception II Offered spring. Prereq., MUSI 140; coreq., MUSI 106. Continuation of MUSI 140.	2 Credits
	MUSI 195 - Applied Study I (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Instruction in voice, piano, organ, string, wind and percussion instruments. Students entering MUSI 195 must show talent for solo performance and evidence of the equivalent of a minimum of four years prior study. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits

Study of the theory and application of digital audio recording, multitracking, and digital signal processing, and electroacoustic music history. Survey of historical and current electronic and computer music composers, pieces, and practices.	2 Credits
Minimum Required Grade: C-		21-26 Total Credits Required

2nd year

Rule: See commentary

Note: All requrired for second year of study for a BA in Composition: MUSI 280 Composition II studies 1 credit each semester for a total of 2 credits first year. MUSE 123, 120-121, 126-127, 272-5 Voice/Instruments in Class 1 credit each semester for a total of two credits second year. MUSI 296-01 Upper-Division Required Performance required by the end of the 2nd year of study. UDRP to consist of scholarly writing example to be approved by faculty

	Course	Credits
	MUSE 120 - Techs: String Inst in Class I (R-2) Offered autumn. Group instruction for beginning students on violin, viola, cello and bass, with emphasis on teaching procedures.	1 Credits
	MUSE 121 - Techs: String Inst in Class II (R-2) Offered spring. Prereq., MUSE 120. Continuation of MUSE 120.	1 Credits
	MUSE 123 - Techniques: Voice Offered autumn. This course examines vocal function and issues associated with the physical processes of singing such as alignment, breathing, creating sound, amplifying (resonating) sound. Additionally, students will learn basic information about becoming a voice teacher (or choral director). Students will also learn about singers' diction, voice classification, and the appropriate assigning of solo classical repertoire.	1 Credits
	MUSE 126 - Techs: Percussn Instruments I (R-2) Offered autumn. Basic instruction in percussion instruments, with emphasis on teaching procedures.	1 Credits
	MUSE 127 - Techs: Percussn Instruments II (R-2) Offered spring. Prereq., MUSE 126. Continuation of MUSE 126. Basic instruction in percussion instruments, with emphasis on teaching procedures.	1 Credits
	MUSE 272 - Techniqus: Flute & Single Reed Composers are expected to bring new musical ideas, sketches, and eventually finished pieces to the workshop, while performers are expected to read, critique, practice, and finally perform the new works.	1 Credits
	MUSE 273 - Techniques: Double Reed (R-2) Offered autumn. Basic instruction in oboe and bassoon, with emphasis on teaching procedures.	1 Credits
	MUSE 274 - Techniques: Upper Brass (R-2) Offered autumn. Basic instruction in trumpet and horn, with emphasis on teaching procedures.	1 Credits
	MUSE 275 - Techniques: Lower Brass Offered spring. Basic instruction in trombone, baritone, and tuba, with emphasis on teaching procedures.	1 Credits
	MUSI 205 - Music Theory III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 240. Continuation of MUSI 106.	2 Credits

	MUSI 206 - Music Theory IV Offered spring. Prereq., MUSI 205; coreq., MUSI 241. This course is a continuation of MUSI 205, concentrating on, but not limited to, music as defined by and expressed in the Western European historical traditions from the Renaissance through the common practice period to the contemporary musical world in which we live.	2 Credits
	MUSI 240 - Aural Perception III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 205. A lab course in singing and dictation to supplement Theory III.	2 Credits
	MUSI 241 - Aural Perception IV Offered spring. Prereq., MUSI 240; coreq., MUSI 206. See MUSI 240.	2 Credits
	MUSI 280 - Composition II (R-4) Offered autumn and spring. Prereq., 4 credits of MUSI 180. Original work in composition may be substituted for upper-division electives for students not majoring in theory or composition.	1 To 2 Credits
	MUSI 301H - Music History I Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire.	3 Credits
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits
	MUST 210 - Sequencng, Synthesis, Sampling Offered autumn. Prereq., MUST 110. Composition of computer music using MIDI sequencing, sampling, and synthesis software, and score preparation using music notation software. Study of the theory and application of MIDI, synthesis algorithms, and effects processing, and the practice of music engraving.	2 Credits
Minimum Required Grade: C-		23-27 Total Credits Required

3rd year

Rule: See commentary

Note: All required for third year of study for a BA in Composition: MUSE 123, 120-121, 126-127, 272-5 Voice/Instruments in Class for 1 credit each semester for a total of two credits the third year. MUSI 380 Composition III studies 1 credit Fall semester.

	Course	**Credits**
	MUSE 120 - Techs: String Inst in Class I (R-2) Offered autumn. Group instruction for beginning students on violin, viola, cello and bass, with emphasis on teaching procedures.	1 Credits
	MUSE 121 - Techs: String Inst in Class II (R-2) Offered spring. Prereq., MUSE 120. Continuation of MUSE 120.	1 Credits

	MUSE 123 - Techniques: Voice Offered autumn. This course examines vocal function and issues associated with the physical processes of singing such as alignment, breathing, creating sound, amplifying (resonating) sound. Additionally, students will learn basic information about becoming a voice teacher (or choral director). Students will also learn about singers' diction, voice classification, and the appropriate assigning of solo classical repertoire.	1 Credits
	MUSE 126 - Techs: Percussn Instruments I (R-2) Offered autumn. Basic instruction in percussion instruments, with emphasis on teaching procedures.	1 Credits

Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Music Requirements for Mathematics

Rule: One course for 3 credits

Note: Mathematics - Math 105 or Math 115

	Course	Credits
	M 105 - Contemporary Mathematics Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An introduction to mathematical ideas and their impact on society. Intended for students wishing to satisfy the general education mathematics requirement.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Music Requirements for Modern & Classical Languages

Rule: All courses required

Note: Foreign Language - French or German for 10 credits.

Minimum Required Grade: C-

10 Total Credits Required

Music Requirements for Expressive Arts

Rule: All courses required

Note: Expressive Arts - A Courses - (min. 3 credits) Ensembles and Sec. Lessons taken each semester satisfies this requirement.

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Literary & Artistic Studies

Rule: All courses required

Note: Literary and Artistic Studies - L Courses -(min. 3 credits) MUSI 202L taken in 1st year satisfies this requirement.

	Course	Credits
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Music Requirements for Historic & Cultural Studies

Rule: All courses required

Note: Historical and Cultural Studies and American and European Perspectives - H/Y Courses - (min. 3 credits) MUSI 301 and/or MUSI 302

	Course	Credits
	MUSI 301H - Music History I Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire.	3 Credits
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits
Minimum Required Grade: C-		3-6 Total Credits Required

Music Requirements for Indigenous & Global Perspectives

Rule: All courses required

Note: Indigenous and Global Perspectives - (min. 3 credits) Required MUSI 207H

	Course	Credits
	MUSI 207H - World Music (equiv to 307) Offered autumn and spring. Introduction to the diversity of music among the world's peoples. Selected music systems throughout the world examined in their broad cultural contexts: religious, historical, and social. Introduction to ethnomusicology-a combination of musicology, anthropology and other related disciplines.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Music Requirements for Natural Sciences

Rule: All courses required

Note: Natural Science (for this perspective, 6 credits required and at least one course Must include a lab experience)

Minimum Required Grade: C-

6 Total Credits Required

Piano Performance

Bachelor of Music - Music; Track: Specialization in Piano Performance

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 87

Required Cumulative GPA: 2.75

Note: All degrees require 39 upper division credits.

1st year

Rule: All courses required

Note: 1st year required: MUSI 195 applied studies 2 credit each semester for a total of 4 credits first year.

	Course	Credits
	MUSI 105 - Music Theory I Offered autumn. Coreq., MUSI 140. Material and structure of music. Application of principles in tow-, three-, and four-part writing and the keyboard.	2 Credits
	MUSI 106 - Music Theory II Offered spring. Prereq., MUSI 105. Coreq., MUSI 141. Continuation of MUSI 105.	2 Credits
	MUSI 140 - Aural Perception I Offered autumn. Coreq., MUSI 105. A laboratory course in singing and dictation to supplement Theory I.	2 Credits
	MUSI 141 - Aural Perception II Offered spring. Prereq., MUSI 140; coreq., MUSI 106. Continuation of MUSI 140.	2 Credits
	MUSI 195 - Applied Study I (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Instruction in voice, piano, organ, string, wind and percussion instruments. Students entering MUSI 195 must show talent for solo performance and evidence of the equivalent of a minimum of four years prior study. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits
Minimum Required Grade: C-		17-21 Total Credits Required

2nd year

Rule: All courses required

Note: 2nd year required: MUSI 295 applied studies 3 credit each semester for a total of 6 credits first year. MUSI 102A is required for 1 credit each semester of the second year for a total of 2 credits. MUSI 296-01 Upper-Division Required Performance required to be completed to advance to upper division classes.

	Course	Credits

	MUSI 102A - Performance Study Offered autumn and spring. Prereq., consent of instr. Individual instruction in voice, piano, organ, harpsichord, carillon, string, wind and percussion instruments. A total of 6 credits is allowed in any one performance area. All private instruction requires concurrent ensemble participation.	1 To 2 Credits
	MUSI 205 - Music Theory III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 240. Continuation of MUSI 106.	2 Credits
	MUSI 206 - Music Theory IV Offered spring. Prereq., MUSI 205; coreq., MUSI 241. This course is a continuation of MUSI 205, concentrating on, but not limited to, music as defined by and expressed in the Western European historical traditions from the Renaissance through the common practice period to the contemporary musical world in which we live.	2 Credits
	MUSI 240 - Aural Perception III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 205. A lab course in singing and dictation to supplement Theory III.	2 Credits
	MUSI 241 - Aural Perception IV Offered spring. Prereq., MUSI 240; coreq., MUSI 206. See MUSI 240.	2 Credits
	MUSI 295 - Applied Study II (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Continuation of 151. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 296 - Piano Prof Assessment Repeat 8 times. All majors pursuing a B.M. or B.M.E. degree must successfully complete all sections of the Piano Proficiency Assessment in order to attain upper-division standing in music. The eight-part exam is administered at the end of each semester. Successfully completed assessments will receive a grade of CR.	
	MUSI 301H - Music History I Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire.	3 Credits
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits
Minimum Required Grade: C-		24-30 Total Credits Required

3rd year

Rule: All courses required

Note: 3rd year required: MUSI 395 applied studies 4 credit each semester for a total of 8 credits third year. MUSI 335 or 336 Instrumental or Choral Conducting for 2 credits. * Piano principles must take MUSI 332 A Advanced Functional Piano or MUSI 218 with PPA (at the discretion of Piano Faculty)

	Course	Credits
	MUSI 332 - Advanced Functional Piano Offered intermittently. Prereq., upper-division standing in music. Offered alternate years. Techniques of harmonization, transposition, sight-reading, modulation, and improvisation.	1 Credits
	MUSI 356 - Form & Analysis I Offered autumn. Prereq., upper-division standing in music. Detailed harmonic and formal analysis of representative works from the Baroque period to the present.	2 Credits
	MUSI 357 - Form & Analysis II Offered spring. Prereq., upper-division standing in music and MUSI 356. Continuation of MUSI 356.	2 Credits
	MUSI 395 - Applied Study III (R-12) Offered autumn and spring. Prereq., upper-division standing in music and consent of instr. Continuation of MUSI 295. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 435 - Piano Methods & Materials I Offered autumn odd-numbered years. Prereq., upper-division standing in music or consent of instr. Methods and materials for teaching piano classes in public schools and private studios. Procedures in teaching beginning, intermediate and advanced students in private studios. Practical demonstrations and supervised laboratory experience with children's classes.	3 Credits
	MUSI 436 - Piano Methods & Materials II Offered spring even-numbered years. Prereq., MUSI 435. Continuation of MUSI 435.	3 Credits
Minimum Required Grade: C-		21-23 Total Credits Required

4th year

Rule: All courses required

Note: 4th year required: MUSI 495 applied studies 4 credit each semester for a total of 8 credits fourth year. MUSI 499 Senior Recital for two credits. MUSI 415, 416 or 417 Upper Div. Writing Course for 3 credits, additional 2 credits upper division. All students majoring in music are required to attend in a minimum of 100 approved recitals/concerts prior to graduation. During the 4th year in an undergraduate degree program and upon completion of this requirement, students should register for MUSI 388, 0 cr.

	Course	Credits
	MUSI 388 - Concert Attendance UM All music majors pursuing a B.M., B.M.E., or B.A. degree must attend in a minimum of 100 approved recitals/concerts prior to graduation. Students will receive recital credits each semester they are enrolled and should register for 388 the semester they apply for graduation. Successful completion of attendance requirements will be graded CR.	

	MUSI 415 - Music 20th Century to Present Offered intermittently. Prereq., MUSI 302H and upper-division standing in music. Detailed analysis and comparison of selected instrumental, vocal and keyboard compositions of the 20th Century.	3 Credits

Instrumental Pedagogy

Rule: One course for 2 credits

Note: Four credits of Upper division Music Electives. At least 4 of these credits Must be in academic Music courses such as String principals Must take MUSI 409 (Pedagogy of Strings) Woodwind principals Must take MUSI 411 (woodwind pedagogy), Brass principals Must take MUSI 412 (brass pedagogy), Percussion principals Must take MUSI 413 (Percussion pedagogy).

	Course	**Credits**
	MUSI 409 - String Pedagogy & Literature (R-4) Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in class string instruction.	1 To 2 Credits
	MUSI 411 - Woodwind Pedagogy Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in individual and class instruction are discussed. Philosophies, repertoire, individual and group techniques used in teaching woodwinds.	2 Credits
	MUSI 412 - Brass Pedagogy Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in individual and class instruction are discussed. Philosophies, repertoire, individual and group techniques used in teaching brass instruments.	2 Credits
	MUSI 413 - Percussion Pedagogy Offered intermittently. Prereq., upper-division standing in music and consent of instr. Procedures and materials in individual and class instruction are discussed. Philosophies, repertoire, individual and group techniques used in teaching percussion instruments.	2 Credits
Minimum Required Grade: C-		4-8 Total Credits Required

1st and 2nd year Ensemble requirements

Rule: One course each semester

Note: Ensembles - MUSI 108A -114A, +162A, + guitar principals only required one credit each semester for two credits each year.
All majors seeking an undergraduate degree in music and who are registered for 5 or more credits must participate in an ensemble specified by their degree curriculum each semester of residence of the regular school year. (See specific curricula for maximum ensemble credits applicable toward minimum degree requirements.)
Majors whose principal performance area is wind/percussion must register for:
• MUSI 114A (MUS 110A), section 1, Symphonic Wind Ensemble (or MUSI 114A (MUS 110A), section 2, University Concert Band, or MUSI 108A (MUS 108A), section 1, University Orchestra, if designated by the Director, every semester.
String majors must register for:
• MUSI 108A (MUS 108A), section 1, University Orchestra, every semester.

	Course	Credits
	MUSI 108A - Orchestra: UMSO Offered autumn and spring. See MUSI 112A for repeatability limitations. Open to all University students by audition. Rehearsal and performing experience in a broad range of symphonic, choral, operatic and concerto repertoire in the University Orchestra and the Missoula Symphony.	1 Credits
	MUSI 114A - Band: UM Concert Band Offered autumn and spring. See MUSI 112A for repeatability limitations. Major musical organizations open to all University students. Audition required for Symphonic Wind Ensemble.	1 Credits
	MUSI 162A - Chamber Ensembles I (R-20) Offered autumn and spring. See MUS 107A for repeatability limitations. Prereq., consent of instr. String, woodwind, brass, percussion, piano and vocal ensembles as appropriate to meet student needs.	1 Credits
Minimum Required Grade: C-		2-6 Total Credits Required

3rd and fourth Ensemble Requirements

Rule: One course each semester

Note: Ensembles required MUSI 308A -314A, 362A, 1 credit each semester for a total of two credits first year. All majors seeking an undergraduate degree in music and who are registered for 5 or more credits must participate in an ensemble specified by their degree curriculum each semester of residence of the regular school year. (See specific curricula for maximum ensemble credits applicable toward minimum degree requirements.) Majors whose principal performance area is wind/percussion must register for:
• MUSI 314 (MUS 310), section 1, Symphonic Wind Ensemble (MUSI 314), section 2, University Concert Band, or MUSI 308A (MUS 308A), section 1, University Orchestra, if designated by the Director, every semester.
String majors must register for:
• MUSI 308 (MUS 308), section 1, University Orchestra, every semester.

	Course	Credits
	MUSI 308 - Orchestras II: UM Offered autumn and spring. Prereq., upper-division standing in instrument of participation. See MUSI 108A for description.	1 Credits
	MUSI 314 - Band III: UM Concert Band Offered autumn and spring. Prereq., upper-division standing in instrument of participation. See MUSI 114A for description.	1 Credits

	MUSI 362 - Chmbr Ens III: UM Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.	1 Credits
Minimum Required Grade: C-		4-12 Total Credits Required

Lower division Writing Expectation

Rule: All courses required

	Course	Credits
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Division Writing Expecation

Rule: One course for 3 credits

Note: Must take one course from the above listed courses for 3 credits

	Course	Credits
	MUSI 415 - Music 20th Century to Present Offered intermittently. Prereq., MUSI 302H and upper-division standing in music. Detailed analysis and comparison of selected instrumental, vocal and keyboard compositions of the 20th Century.	3 Credits
	MUSI 416 - Topics in Music History (R-3) Offered intermittently. Prereq. MUSI 302H and upper division standing in music or consent of instructor. Course materials will examine the development of musical styles, genres, forms and aesthetics important to Western music, introducing students to research methods in musicology.	3 Credits
	MUSI 417 - Cultural Studies in Music (R-3) Offered intermittently. Prereq. MUSI 302H and upper division standing in music, or consent of instructor. Course materials will examine music's contemporary role within cultures and societies around the world, introducing students to research methods in cultural studies and ethnomusicology.	3 Credits
Minimum Required Grade: C-		3-9 Total Credits Required

Music Requirements for Writing

Rule: All courses required

	Course	Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Music Requirements for Mathematics

Rule: One course for 3 credits

Note: Mathematics - M Couse 100 or above

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Expressive Arts

Rule: All courses required

Note: Expressive Arts - A Courses - (min. 3 credits) Ensembles and Sec. Lessons taken each semester satisfies this requirement.

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Literary & Artistic Studies

Rule: All courses required

Note: Literary and Artistic Studies - L Courses -(min. 3 credits) MUSI 202L taken in 1st year satisfies this requirement.

	Course	**Credits**
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Music Requirements for Historic & Cultural Studies

Rule: All courses required

Note: Historical and Cultural Studies and American and European Perspectives - H/Y Courses - (min. 3 credits) MUSI 301 and MUSI 302

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Indigenous & Global Perspectives

Rule: All courses required

Note: Indigenous and Global Perspectives - (min. 3 credits) Required MUSI 207H

	Course	Credits

Music Composition

Bachelor of Music - Music; Track: Specialization in Music Composition

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 86

Required Cumulative GPA: 2.75

Note: All degrees require 39 upper division credits.

1st year

Rule: All courses required

Note: 1st year requirements: MUSI 195 applied studies 1 credit each semester for a total of 2 credits first year. Composition I - 2 credits each semester for a total of four credits first year.

	Course	Credits

	MUSI 105 - Music Theory I Offered autumn. Coreq., MUSI 140. Material and structure of music. Application of principles in tow-, three-, and four-part writing and the keyboard.	2 Credits
	MUSI 106 - Music Theory II Offered spring. Prereq., MUSI 105. Coreq., MUSI 141. Continuation of MUSI 105.	2 Credits
	MUSI 135A - Keyboard Skills I Offered autumn. Music reading, techniques, and harmonization skills acquired through study of solo and ensemble repertoire in a contemporary electronic piano laboratory.	1 Credits
	MUSI 136A - Keyboard Skills II Offered spring. Prereq., MUSI 135A. Continuation of MUSI 135A.	1 Credits
	MUSI 140 - Aural Perception I Offered autumn. Coreq., MUSI 105. A laboratory course in singing and dictation to supplement Theory I.	2 Credits
	MUSI 141 - Aural Perception II Offered spring. Prereq., MUSI 140; coreq., MUSI 106. Continuation of MUSI 140.	2 Credits
	MUSI 180 - Composition I (R-4) Offered autumn and spring. Prereq., consent of instr. An introduction to the basic art of music composition. May be substituted for upper division electives for students not majoring in theory or composition.	1 To 2 Credits
	MUSI 195 - Applied Study I (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Instruction in voice, piano, organ, string, wind and percussion instruments. Students entering MUSI 195 must show talent for solo performance and evidence of the equivalent of a minimum of four years prior study. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits
	MUST 110 - Digital Audio & Multitracking Offered autumn and spring. Composition of computer music through recording, editing, and processing sound with digital audio software. Study of the theory and application of digital audio recording, multitracking, and digital signal processing, and electroacoustic music history. Survey of historical and current electronic and computer music composers, pieces, and practices.	2 Credits
Minimum Required Grade: C-		21-23 Total Credits Required

2nd year

Rule: All courses required

Note: 2nd year requirements: MUSI 295 applied studies 1 credit each semester for a total of 2 credits second year. Composition II - 2 credits each semester for a total of four credits the second year. MUSI 296 -01 Upper-Division Required Performance to be completed 2nd year to advance to upper division classes

	Course	Credits
	MUSI 205 - Music Theory III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 240. Continuation of MUSI 106.	2 Credits
	MUSI 206 - Music Theory IV Offered spring. Prereq., MUSI 205; coreq., MUSI 241. This course is a continuation of MUSI 205, concentrating on, but not limited to, music as defined by and expressed in the Western European historical traditions from the Renaissance through the common practice period to the contemporary musical world in which we live.	2 Credits
	MUSI 235 - Keyboard Skills III Offered autumn. Prereq., MUSI 136A or equiv. Continuation of MUSI 136A.	1 Credits
	MUSI 236 - Keyboard Skills IV Offered spring. Prereq., MUSI 235. Continuation of MUSI 235, culminates in piano functional examination.	1 Credits
	MUSI 240 - Aural Perception III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 205. A lab course in singing and dictation to supplement Theory III.	2 Credits
	MUSI 241 - Aural Perception IV Offered spring. Prereq., MUSI 240; coreq., MUSI 206. See MUSI 240.	2 Credits
	MUSI 280 - Composition II (R-4) Offered autumn and spring. Prereq., 4 credits of MUSI 180. Original work in composition may be substituted for upper-division electives for students not majoring in theory or composition.	1 To 2 Credits
	MUSI 295 - Applied Study II (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Continuation of 151. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 296 - Piano Prof Assessment Repeat 8 times. All majors pursuing a B.M. or B.M.E. degree must successfully complete all sections of the Piano Proficiency Assessment in order to attain upper-division standing in music. The eight-part exam is administered at the end of each semester. Successfully completed assessments will receive a grade of CR.	
	MUSI 301H - Music History I Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire.	3 Credits
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits

	MUST 210 - Sequencng, Synthesis, Sampling Offered autumn. Prereq., MUST 110. Composition of computer music using MIDI sequencing, sampling, and synthesis software, and score preparation using music notation software. Study of the theory and application of MIDI, synthesis algorithms, and effects processing, and the practice of music engraving.	2 Credits
Minimum Required Grade: C-		24-26 Total Credits Required

3rd year

Rule: See commentary

Note: 3rd year requirements: MUSI 395 applied studies 1 credit Fall semester. Composition III - 3 credits each semester for a total of six credits the third year. MUSI 335 or 336 Instrumental OR Choral Conducting for 2 credits Spring Semester

	Course	Credits
	MUSI 335 - Instrumental Conducting (R-4) Offered spring. Prereq., upper-division standing in music. Conducting methods and practice. Teaching methods and materials.	2 Credits
	MUSI 336 - Choral Conducting (R-4) Offered autumn. Prereq., upper-division standing in music. A study of the techniques of choral conducting. Emphasis on issues encountered in various ensemble settings.	2 Credits
	MUSI 356 - Form & Analysis I Offered autumn. Prereq., upper-division standing in music. Detailed harmonic and formal analysis of representative works from the Baroque period to the present.	2 Credits
	MUSI 357 - Form & Analysis II Offered spring. Prereq., upper-division standing in music and MUSI 356. Continuation of MUSI 356.	2 Credits
	MUSI 380 - Composition III (R-6) Offered autumn and spring. Prereq., upper-division standing in music and 4 credits in MUSI 280. Creative writing of music.	1 To 3 Credits
	MUSI 395 - Applied Study III (R-12) Offered autumn and spring. Prereq., upper-division standing in music and consent of instr. Continuation of MUSI 295. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 407 - Counterpoint I Offered intermittently. Prereq., upper-division standing in music. Writing and analysis of contrapuntal styles through the 18th century.	3 Credits
	MUSI 415 - Music 20th Century to Present Offered intermittently. Prereq., MUSI 302H and upper-division standing in music. Detailed analysis and comparison of selected instrumental, vocal and keyboard compositions of the 20th Century.	3 Credits

	MUSI 440 - Orchestration Offered autumn. Prereq., upper-division standing in music. Orchestrating and transcribing for orchestra and band instruments.	2 Credits
Minimum Required Grade: C-		21-23 Total Credits Required

4th year

Rule: All courses required

Note: 4th year requirements: MUSI 499 Professional project 2 credits Spring semester. MUSI 480 Composition IV, 3 credits Fall semester. All students majoring in music are required to attend in a minimum of 100 approved recitals/concerts prior to graduation. During the 4th year in an undergraduate degree program and upon completion of this requirement, students should register for MUSI 388, 0 cr.

	Course	Credits
	MUSI 388 - Concert Attendance UM All music majors pursuing a B.M., B.M.E., or B.A. degree must attend in a minimum of 100 approved recitals/concerts prior to graduation. Students will receive recital credits each semester they are enrolled and should register for 388 the semester they apply for graduation. Successful completion of attendance requirements will be graded CR.	
	MUSI 480 - Composition IV (R-6) Offered autumn and spring. Prereq., 3 credits in MUSI 380. A continuation of composition with writing in the larger forms.	1 To 3 Credits
	MUSI 499 - Senior Recital/Capstone Pjt (R-4) Offered autumn and spring.	1 To 4 Credits
	MUST 310 - Interactivity Digitl Sgnl Proc Offered spring. Prereq., MUST 210 and upper-division standing in music. Composition of interactive computer music using a graphical programming environment for MIDI, synthesis, and digital signal processing. Study of graphical programming, interactive composition and performance, generating and processing MIDI data, synthesizing computer-generated sound, and processing digital audio in real-time.	2 Credits
	MUST 410 - Computer Music Programming Offered autumn. Upper-division standing in music. Composition of computer music through programming. Study of object oriented programming, synthesis and digital signal processing techniques, music-generating algorithms, sound spatialization, graphical user interface design, and external control.	2 Credits
Minimum Required Grade: C-		9-11 Total Credits Required

Upper Division Writing Expecation

Rule: All courses required

Note: Music 415, Music of the 20th Century to the Present, will satisfy the upper-division writing expectation.

	Course	Credits

	MUSI 415 - Music 20th Century to Present Offered intermittently. Prereq., MUSI 302H and upper-division standing in music. Detailed analysis and comparison of selected instrumental, vocal and keyboard compositions of the 20th Century.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

1st and 2nd year Ensemble requirements

Rule: One course each semester

Note: Ensembles - MUSI 108A -114A, +162A, #191, (+ guitar principals only #piano principals only)required one credit each semester for two credits each year. All majors seeking an undergraduate degree in music and who are registered for 5 or more credits must participate in an ensemble specified by their degree curriculum each semester of residence of the regular school year. (See specific curricula for maximum ensemble credits applicable toward minimum degree requirements.)
Majors whose principal performance area is wind/percussion must register for:
• MUSI 114A (MUS 110A), section 1, Symphonic Wind Ensemble (or MUSI 114A (MUS 110A, section 2, University Concert Band, or MUSI 108A(MUS 108A, section 1, University Orchestra, if designated by the Director, every semester.
String majors must register for:
• MUSI 108A (MUS 108A), section 1, University Orchestra, every semester.

	Course	**Credits**
	MUSI 108A - Orchestra: UMSO Offered autumn and spring. See MUSI 112A for repeatability limitations. Open to all University students by audition. Rehearsal and performing experience in a broad range of symphonic, choral, operatic and concerto repertoire in the University Orchestra and the Missoula Symphony.	1 Credits
	MUSI 110A - Opera Theatre I (R-8) Offered autumn and spring. Prereq., consent of instr. Study and performance of the standard opera repertoire.	1 Credits

1st year

Rule: See commentary

Note: 1st year requirements: MUSI 195 applied studies 1 credit each semester for a total of 2 credits first year. First year must include MUSE 120-121 or MUSI 274-275 -Strings or Brass in class. *ALL BME KEYBOARD, VOICE & STRING must take 1 semester only of 155A-MARCHING BAND*

	Course	Credits

	MUSE 120 - Techs: String Inst in Class I (R-2) Offered autumn. Group instruction for beginning students on violin, viola, cello and bass, with emphasis on teaching procedures.	1 Credits
	MUSE 121 - Techs: String Inst in Class II (R-2) Offered spring. Prereq., MUSE 120. Continuation of MUSE 120.	1 Credits
	MUSE 123 - Techniques: Voice Offered autumn. This course examines vocal function and issues associated with the physical processes of singing such as alignment, breathing, creating sound, amplifying (resonating) sound. Additionally, students will learn basic information about becoming a voice teacher (or choral director). Students will also learn about singers' diction, voice classification, and the appropriate assigning of solo classical repertoire.	1 Credits
	MUSE 274 - Techniques: Upper Brass (R-2) Offered autumn. Basic instruction in trumpet and horn, with emphasis on teaching procedures.	1 Credits
	MUSE 275 - Techniques: Lower Brass Offered spring. Basic instruction in trombone, baritone, and tuba, with emphasis on teaching procedures.	1 Credits
	MUSI 105 - Music Theory I Offered autumn. Coreq., MUSI 140. Material and structure of music. Application of principles in tow-, three-, and four-part writing and the keyboard.	2 Credits
	MUSI 106 - Music Theory II Offered spring. Prereq., MUSI 105. Coreq., MUSI 141. Continuation of MUSI 105.	2 Credits
	MUSI 135A - Keyboard Skills I Offered autumn. Music reading, techniques, and harmonization skills acquired through study of solo and ensemble repertoire in a contemporary electronic piano laboratory.	1 Credits
	MUSI 136A - Keyboard Skills II Offered spring. Prereq., MUSI 135A. Continuation of MUSI 135A.	1 Credits
	MUSI 140 - Aural Perception I Offered autumn. Coreq., MUSI 105. A laboratory course in singing and dictation to supplement Theory I.	2 Credits
	MUSI 141 - Aural Perception II Offered spring. Prereq., MUSI 140; coreq., MUSI 106. Continuation of MUSI 140.	2 Credits
	MUSI 155A - Marching: Grizzly Marchng Band Offered autumn. See MUSI 112A for repeatability limitations. A musical organization of brass, woodwinds, percussion, and auxiliary units open to all University students with no audition required.	1 Credits

	MUSI 195 - Applied Study I (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Instruction in voice, piano, organ, string, wind and percussion instruments. Students entering MUSI 195 must show talent for solo performance and evidence of the equivalent of a minimum of four years prior study. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 202L - Intro to Music Literature Offered spring. Prereq., for non-majors consent of instr. A survey of representative examples of the standard music literature of the Western European tradition. Particular attention to musical styles and forms and their relationship to musical understanding and effective listening. A basic knowledge of music fundamentals is expected. Credit not allowed for both MUSI 101L and 202L.	3 Credits
Minimum Required Grade: C-		19-24 Total Credits Required

2nd year

Rule: See commentary

Note: 2nd year BME classes required: MUSI 295 applied studies 1 credit each semester for a total of 2 credits 2nd year. Also required for 2nd year MUSE 120-121 or MUSE 274, 275 Woodwinds in class and Strings or Brass in class for a total of 2 credits.
in the second year of classes MUSI 296-01 Upper Division Required Performance must be completed to move on to upper division classes.
Apply for admission to Teacher Education Program during second year.
String Voice, and Piano principals required to take only 1 credit of Marching Band MUSI 155.

	Course	**Credits**
	MUSE 120 - Techs: String Inst in Class I (R-2) Offered autumn. Group instruction for beginning students on violin, viola, cello and bass, with emphasis on teaching procedures.	1 Credits
	MUSE 121 - Techs: String Inst in Class II (R-2) Offered spring. Prereq., MUSE 120. Continuation of MUSE 120.	1 Credits
	MUSE 272 - Techniqus: Flute & Single Reed Composers are expected to bring new musical ideas, sketches, and eventually finished pieces to the workshop, while performers are expected to read, critique, practice, and finally perform the new works.	1 Credits
	MUSE 273 - Techniques: Double Reed (R-2) Offered autumn. Basic instruction in oboe and bassoon, with emphasis on teaching procedures.	1 Credits
	MUSE 274 - Techniques: Upper Brass (R-2) Offered autumn. Basic instruction in trumpet and horn, with emphasis on teaching procedures.	1 Credits
	MUSE 275 - Techniques: Lower Brass Offered spring. Basic instruction in trombone, baritone, and tuba, with emphasis on teaching procedures.	1 Credits

	MUSI 155A - Marching: Grizzly Marchng Band Offered autumn. See MUSI 112A for repeatability limitations. A musical organization of brass, woodwinds, percussion, and auxiliary units open to all University students with no audition required.	1 Credits
	MUSI 195 - Applied Study I (R-12) Offered autumn and spring. Prereq., audition and consent of instr. Instruction in voice, piano, organ, string, wind and percussion instruments. Students entering MUSI 195 must show talent for solo performance and evidence of the equivalent of a minimum of four years prior study. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 205 - Music Theory III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 240. Continuation of MUSI 106.	2 Credits
	MUSI 206 - Music Theory IV Offered spring. Prereq., MUSI 205; coreq., MUSI 241. This course is a continuation of MUSI 205, concentrating on, but not limited to, music as defined by and expressed in the Western European historical traditions from the Renaissance through the common practice period to the contemporary musical world in which we live.	2 Credits
	MUSI 235 - Keyboard Skills III Offered autumn. Prereq., MUSI 136A or equiv. Continuation of MUSI 136A.	1 Credits
	MUSI 236 - Keyboard Skills IV Offered spring. Prereq., MUSI 235. Continuation of MUSI 235, culminates in piano functional examination.	1 Credits
	MUSI 240 - Aural Perception III Offered autumn. Prereq., MUSI 106 and 141; coreq., MUSI 205. A lab course in singing and dictation to supplement Theory III.	2 Credits
	MUSI 241 - Aural Perception IV Offered spring. Prereq., MUSI 240; coreq., MUSI 206. See MUSI 240.	2 Credits
	MUSI 296 - Piano Prof Assessment Repeat 8 times. All majors pursuing a B.M. or B.M.E. degree must successfully complete all sections of the Piano Proficiency Assessment in order to attain upper-division standing in music. The eight-part exam is administered at the end of each semester. Successfully completed assessments will receive a grade of CR.	
	MUSI 301H - Music History I Offered autumn. Prereq., MUSI 202L. The history of music in Western civilization from its origins to 1750 and its relationship to general cultural development. Introduction to basic research skills in music. Emphasis on listening for style characteristics through representative recorded repertoire.	3 Credits
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits
Minimum Required Grade: C-		21-27 Total Credits Required

3rd year

Rule: All courses required

Note: Required for 3rd year BME study: MUSI 395 applied studies 1 credit for Fall semester the third year. MUSI 102A for 1 credit Spring semester the third year.

	Course	Credits
	MUSE 126 - Techs: Percussn Instruments I (R-2) Offered autumn. Basic instruction in percussion instruments, with emphasis on teaching procedures.	1 Credits
	MUSE 127 - Techs: Percussn Instruments II (R-2) Offered spring. Prereq., MUSE 126. Continuation of MUSE 126. Basic instruction in percussion instruments, with emphasis on teaching procedures.	1 Credits
	MUSE 333 - Gen Music Methods & Materls I Offered autumn. Prereq., upper-division standing in music and C&I 200. Development of practical knowledge to effectively instruct and administer general music classes in the public schools, grades K-12.	2 Credits
	MUSE 334 - Gen Music Methods & Materls II Offered spring. Prereq., upper-division standing in music and EDU 202. Continuation of MUSE 333.	2 Credits
	MUSE 497 - Methods: Choral & Literature Offered Spring. Prereq., upper-division standing in music and MUSE 123. Development of strategies for directing the secondary choral ensemble. Focus on rehearsal techniques and literature selection for the developing choir.	2 Credits
	MUSI 102A - Performance Study Offered autumn and spring. Prereq., consent of instr. Individual instruction in voice, piano, organ, harpsichord, carillon, string, wind and percussion instruments. A total of 6 credits is allowed in any one performance area. All private instruction requires concurrent ensemble participation.	1 To 2 Credits
	MUSI 335 - Instrumental Conducting (R-4) Offered spring. Prereq., upper-division standing in music. Conducting methods and practice. Teaching methods and materials.	2 Credits
	MUSI 336 - Choral Conducting (R-4) Offered autumn. Prereq., upper-division standing in music. A study of the techniques of choral conducting. Emphasis on issues encountered in various ensemble settings.	2 Credits
	MUSI 395 - Applied Study III (R-12) Offered autumn and spring. Prereq., upper-division standing in music and consent of instr. Continuation of MUSI 295. All private instruction requires concurrent ensemble participation.	1 To 4 Credits
	MUSI 440 - Orchestration Offered autumn. Prereq., upper-division standing in music. Orchestrating and transcribing for orchestra and band instruments.	2 Credits
Minimum Required Grade: C-		18-20 Total Credits Required

4th year

Rule: All courses required

Note: Required for 4th year BME study: MUSI 102A one credit Fall semester for the fourth year study.
All students majoring in music are required to attend in a minimum of 100 approved recitals/concerts prior to graduation. During the 4th year in an undergraduate degree program and upon completion of this requirement, students should register for MUSI 388, 0 cr.

	Course	Credits
	MUSE 425 - Technology and Materials Offered autumn semesters, as an elective. The course will provide in-depth examination of technology and print resources appropriate for use in music classrooms K-12, all areas and ensembles. Students will work independently and collaboratively to reflect upon, discuss, and practice utilizing technology and print resources for the music classroom (K-12).	2 Credits
	MUSI 102A - Performance Study Offered autumn and spring. Prereq., consent of instr. Individual instruction in voice, piano, organ, harpsichord, carillon, string, wind and percussion instruments. A total of 6 credits is allowed in any one performance area. All private instruction requires concurrent ensemble participation.	1 To 2 Credits
	MUSI 388 - Concert Attendance UM All music majors pursuing a B.M., B.M.E., or B.A. degree must attend in a minimum of 100 approved recitals/concerts prior to graduation. Students will receive recital credits each semester they are enrolled and should register for 388 the semester they apply for graduation. Successful completion of attendance requirements will be graded CR.	
Minimum Required Grade: C-		3-5 Total Credits Required

3rd and 4th Year Education Department Requirements

Rule: All courses required

Note: Students must be formally admitted to the Teacher Education Program to take Education courses. See the Department of Curriculum and Instruction in the College of Education and Human Sciences for more information. EDU 494 is taken for 1 cred and EDU 495 is taken for 14 credits. These two education classes are taken the last semester of study.

	Course	Credits
	EDU 202 - Early Field Experience Offered autumn and spring. Prereq., admission to Teacher Education Program in secondary and K-12. Guided introductory field experience for students committed to teaching as a profession. Connects field experience to content of co-requisite theory classes. Seminars include professional development portfolio, developmental level of students, diversity, learning/teaching strategies, motivation, classroom management, and assessment of learning.	1 Credits

	EDU 221 - Ed Psych & Measuremnt Offered autumn and spring. Prereq., admission to Teacher Education program in secondary and K-12. Analysis of fundamental psychological concepts underlying classroom teaching and management, learning and evaluation including educational measurement. Emphasis on cognition, developmental, and motivational aspects of learning.	3 Credits
	EDU 345 - Excptnlty & Clsrm Mgmt Offered autumn and spring. Prereq., Admission to the Teacher Education Program in secondary and K-12. Focus on classroom management and the characteristics and instructional adaptations for exceptional students in the regular classroom. Addresses the Individuals with Disabilities Education Act and subsequent reauthorizations, presents practices for working with students who are at-risk and students with disabilities in inclusive settings, and includes technological considerations.	3 Credits
	EDU 395 - Clinical Experience (R-4) Offered autumn and spring. Prereq., admission to the Teacher Education Program. Arranged field experience and seminar focusing on applying content from the co-requisite courses. This course number is used for multiple clinical experiences. Check the class schedule or with your advisor regarding the appropriate section. Elementary Education Majors: EDU 395 Clinical Experience Level 1 must be taken concurrently with Level 1 courses. EDU 395 Clinical Experience Level 2 must be taken concurrently with Level 2 courses. Secondary and K-12 Licensure Students: EDU 395 Clinical Experience K-8 and EDU 395 Clinical Experience 9-12 have a prerequisite of an initial field experience and should be taken concurrently with a secondary or K-12 methods course.	1 Credits
	EDU 407E - Ethics & Policy Issues Offered every term. Prereq., admission to Teacher Education Program and EDU 202 or EDU 395. Practical application of ethical principles of the teaching profession. Analysis of the American public school and major policy issues from historical, legal, political, social as well as ethical perspectives.	3 Credits
	EDU 494 - Seminar:Refl Pract & App Rsrch (R-9) Required seminar during student teaching. Prereq., admission to the Teacher Education Program. Focuses on learning to conduct research on P-12 student performance to determine teaching effectiveness. Includes on-campus and/or on-line planning, conducting, and analyzing classroom practice.	1 To 9 Credits
	EDU 495 - Student Teaching (R-14) Offered autumn and spring. Arranged capstone clinical experience required for all professional licensure students. Prereq., admission to the Teacher Education Program, completion of all required field experiences and methods courses, an application to student teach, and the consent of the Director of Field Experiences. In addition, elementary education majors must complete all coursework in all previous levels. Secondary and K-12 licensure students must complete at least two-thirds of content coursework and receive approval by departments in their major and minor content areas.	1 To 14 Credits

Minimum Required Grade: C-	26-34 Total Credits Required

1st and 2nd year Education Requirements

Rule: Course required

Note: Apply for Admission to Teacher Education Program during second year

	Course	Credits
	HEE 233 - Health Issues Child/Adol Offered every term. Overview of current health issues affecting children and adolescents. Focus is on educational and preventive measures that can be implemented by teachers and schools through comprehensive school health education programs.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

1st and 2nd year Ensembles

Rule: All courses required

Note: Ensembles - MUSI 108A -114A, +162A, #191, + guitar principals only #piano principals only required one credit each semester for two credits each year.
All majors seeking an undergraduate degree in music and who are registered for 5 or more credits must participate in an ensemble specified by their degree curriculum each semester of residence of the regular school year. (See specific curricula for maximum ensemble credits applicable toward minimum degree requirements.)
Majors whose principal performance area is wind/percussion must register for:
•MUSI 114A (MUS 110A), section 1, Symphonic Wind Ensemble (or MUSI 114A (MUS 110A), section 2, University Concert Band, or MUSI 108A (MUS 108A), section 1, University Orchestra, if designated by the Director, every semester.
String majors must register for:
• MUSI 108A (MUS 108A), section 1, University Orchestra, every semester.
B.M.E. voice majors must take a minimum of:
• 6 credits in MUSI 112 (MUS 107A), section 1 (University Choir)
Ensemble requirements for piano and organ are listed separately for each curriculum.

	Course	Credits
	MUSI 108A - Orchestra: UMSO Offered autumn and spring. See MUSI 112A for repeatability limitations. Open to all University students by audition. Rehearsal and performing experience in a broad range of symphonic, choral, operatic and concerto repertoire in the University Orchestra and the Missoula Symphony.	1 Credits
	MUSI 110A - Opera Theatre I (R-8) Offered autumn and spring. Prereq., consent of instr. Study and performance of the standard opera repertoire.	1 Credits
	MUSI 112A - Choir: Chamber Chorale Offered autumn and spring. Open to all University students. Audition places students according to appropriate ensemble and proper seating/section. Music majors refer to curricula for specific requirements. Non-music majors may apply 8 credits of MUSI 112A-114A, 110A/310, 131A/331, and 122A/322 toward graduation.	1 Credits

	MUSI 114A - Band: UM Concert Band Offered autumn and spring. See MUSI 112A for repeatability limitations. Major musical organizations open to all University students. Audition required for Symphonic Wind Ensemble.	1 Credits
	MUSI 162A - Chamber Ensembles I (R-20) Offered autumn and spring. See MUS 107A for repeatability limitations. Prereq., consent of instr. String, woodwind, brass, percussion, piano and vocal ensembles as appropriate to meet student needs.	1 Credits
	MUSI 191 - Special / Experimental Courses (R-9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
Minimum Required Grade: C-		4-14 Total Credits Required

3rd and 4th year Ensembles

Rule: All courses required

Note: MUSI 308A -314A, + 362A, #491, (+ guitar principals only #piano principals only) 1 credit each semester for a total of two credits the third year. 4th year 1credit fall semester.

	Course	**Credits**
	MUSI 308 - Orchestras II: UM Offered autumn and spring. Prereq., upper-division standing in instrument of participation. See MUSI 108A for description.	1 Credits
	MUSI 310 - Opera Theatre II (R-8) Offered autumn and spring. Prereq., consent of instr. See MUSI 131A for description.	1 Credits
	MUSI 312 - Choir III: Chamber Chorale Offered autumn and spring. Prereq., upper-division standing in voice. See MUSI 112A for description.	1 To 8 Credits
	MUSI 314 - Band III: UM Concert Band Offered autumn and spring. Prereq., upper-division standing in instrument of participation. See MUSI 114A for description.	1 Credits
	MUSI 362 - Chmbr Ens III: UM Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.	1 Credits
	MUSI 491 - Special / Experimental Courses (R-9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
Minimum Required Grade: C-		3-21 Total Credits Required

Musicrequired English Writing Skills

Rule: All courses required

	Course	**Credits**

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		

Upper Division Writing Expectation

Rule: One course for 3 credits required

Note: You should take a 400 level (415, 416 or 417) Music History writing class to satisfy the upper-division writing expectation for 3 credits.

	Course	**Credits**
	MUSI 415 - Music 20th Century to Present Offered intermittently. Prereq., MUSI 302H and upper-division standing in music. Detailed analysis and comparison of selected instrumental, vocal and keyboard compositions of the 20th Century.	3 Credits
	MUSI 416 - Topics in Music History (R-3) Offered intermittently. Prereq. MUSI 302H and upper division standing in music or consent of instructor. Course materials will examine the development of musical styles, genres, forms and aesthetics important to Western music, introducing students to research methods in musicology.	3 Credits
	MUSI 417 - Cultural Studies in Music (R-3) Offered intermittently. Prereq. MUSI 302H and upper division standing in music, or consent of instructor. Course materials will examine music's contemporary role within cultures and societies around the world, introducing students to research methods in cultural studies and ethnomusicology.	3 Credits
Minimum Required Grade: C-		3-9 Total Credits Required

Lower division Writing Expectation

Rule: All courses required

	Course	**Credits**
	MUSI 302H - Music History II Offered spring. Prereq., MUSI 202L. The history of music in Western civilization from 1750 to modern times. See MUSI 301H.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Music Requirements for Mathematics

Rule: All courses required

Note: M couse 100 or above

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Modern & Classical Languages

Rule: All courses required

Note: Exception to Modern and Classical Language Requirement-Symbolic Systems - MUSI 105, 106, 140,141

Minimum Required Grade: C-

Music Requirements for Symbolic Systems

Rule: All courses required

Note: The competency for Symbolic Systems is also satisfied within the music major curriculum. Music History 302H satisfies your lower-division writing requirement.

Minimum Required Grade: C-

Music Requirements for Expressive Arts

Rule: All courses required

Note: A Courses - (min. of 3 credits) Ensembles taken each semester satisfy this requirement.

Minimum Required Grade: C-

Music Requirements for Literary & Artistic Studies

Rule: All courses required

Note: Literary and Artistic Studies - L Courses - (min. of 3 credits) MUSI 202L taken in the 1st year satisfies this requirement.

Minimum Required Grade: C-

Music Requirements for Historic & Cultural Studies

Rule: All courses required

Note: Historical and Cultural Studies and American and European Perspectives - H/Y Course - (min. of 3 credits) MUSI 301H - 302H taken in the 2nd year satisfy this requirement.

Minimum Required Grade: C-

Music Requirements for Social Sciences

Rule: All courses required

Note: Social Sciences - S Courses - (min. of 3 credits)

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Ethical and Human Values

Rule: All courses required

Note: Ethical and Human Values - E Courses - (min. of 3 credits) EDU 407E taken the 3rd or 4th year satisfies this requirement.

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Indigenous & Global Perspectives

Rule: All courses required

Note: Indigenous and Global Perspectives - X Courses - (min. of 3 credits) A Native American Studies Course with an X is required for Education Degree. NASX 105 is recommended.

Minimum Required Grade: C-

3 Total Credits Required

Music Requirements for Natural Sciences

Rule: All courses required

Note: Natural Science - N Courses - 6 credits, choice made from course catalog credits required and at least one course must include a lab experience

Minimum Required Grade: C-

6 Total Credits Required

Media Arts

Mark Shogren, Director

The School of Media Arts has degree programs at both undergraduate and graduate levels. The undergraduate program offers a B.A. degree that consists of a uniquely integrated curriculum centered in digital technology as a storytelling and artistic medium. The course of instruction is comprehensive and combines the areas of digital filmmaking and integrated digital media. The undergraduate program also offers a B.F.A. degree with specializations in Digital Filmmaking, Integrated Digital Media, Animation, and Sonic Arts. The graduate program offers an M.F.A., which provides an intensive, dedicated program in either Digital Filmmaking or Integrated Digital Media. The Digital Filmmaking track offers the student comprehensive training in the areas of writing, directing and editing. The Integrated Digital Media track focuses on the areas of digital compositing, digital image design, animation, and interactive digital media. In addition, the School has a comprehensive Media Arts Minor program and a substantial number of on-line courses and elective summer classes that provide students the opportunity to enhance the artistic part of their educational experience. For more information on the academic programs and to experience the creative work of Media Arts undergraduate and graduate students please visit our website at: http://www.umt.edu/mediaarts.

Media Arts-Filmmaking

Back to Top

- MAR 252 - Screenwriting

  Credits: 3. Offered autumn. Prereq., Media Arts Major. Intermediate level writing class devoted to short films, with an emphasis on writing camera-ready scripts for spring production. Feature film structure and techniques also discussed.

- MAR 335 - Experimental Animation

  Credits: 3. Offered Spring. This course focuses on the development and creation of experimental animation projects using traditional stop motion animation techniques such as hand drawn, silhouette, object and clay. Projects created in this class may have elements created using iStopmotion, Dragonframe and other digital capture platforms. Open to Media Arts majors only.

- MAR 415 - Short Form Screenwriting

  Credits: 3. Offered Autumn. Media Arts majors only. Intermediate level writing class devoted to short films, with an emphasis on writing camera-ready scripts for spring production. Feature film structure and techniques are also discussed.

- MAR 442 - Experimental Film

  Credits: 3. Offered autumn. Media Arts majors only. Surveying a wide range of experimental cinema (film/video) from the 1920's to the present with the central focus being artistic practice in the context of historic and cultural concerns. Students will also create projects focusing on exploring film/video both as a form of personal expression and as a medium, rather than as mass entertainment.

- MAR 443 - Documentary

  Credits: 3. Offered autumn. Designed to bring together Film Studies students (theorists) and Media Arts students (filmmakers) so they may draw from their respective fields to collaborate on the production of documentaries. After exposure to both documentary history and criticism, students will be required to work with a team of producers in learning the basic skills involved in documentary production.

- MAR 456 - Directing

  Credits: 3. Offered autumn. Media Arts majors only. Developing, directing and editing a five to seven minute fiction movie. In depth work on creation of shooting script, casting, work with actors and location work. Emphasis on collaborative process and diligence and preparation in all levels of production.

- MAR 470 - Adv. Acting for Film I

  Credits: 3. Offered autumn. The class is introduces the student to acting techniques needed to work competently in realistic film work. It consists of acting in several exercises and scenes shot in the studio, as well as research into different film acting styles.

- MAR 471 - Adv. Acting for Film II

  Credits: 3. Offered spring. A project-based course that combines actors and directors in the collaborative creation of a short fiction film.

Media Arts

Back to Top

- MART 101L - Intro to Media Arts

  Credits: 3. Offered every term. Overview of the media arts and their interaction, integration and development in the creation of story beginning with the early years of photography and movie-making through the introduction of radio and television up to the digital revolution. Course Attributes: Lit & Artistic Studies (L)

- MART 102 - Digital Technology in the Arts

  Credits: 3. Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.

- MART 111A - Intro to Photoshop

Credits: 3. Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment. Course Attributes: Expressive Arts Course (A)

- MART 112A - Introduction to Film Editing

  Credits: 3. Offered every term. Study of the history, process and philosophy of narrative film/video editing and an introduction to Final Cut nonlinear editing software. Course Attributes: Expressive Arts Course (A)

- MART 230 - Introduction to Still Image

  Credits: 3. Offered every term. This course provides a thorough introduction to the practices of capturing digital still imagery through scanning, photography, internet acquisition and mobile devices. Emphasis on content, composition, and digital manipulation of images is applied through the creation of various still-image projects. Digital capture techniques, project planning, narrative, and the integration of various forms of digital design are fundamental components of this course.

- MART 235 - Fundamentals of Type

  Credits: 3. Offered every semester. This course is a study of the design and use of basic letterforms, anatomical features, hierarchy of information, major type families and characteristics, and the understanding of typographic grids. Students will learn the historical significance of letterforms and their origins to help fully understand how to use typography correctly within their works and designs. Students will gain experience in the art of typesetting and typographic layout, and learn the necessary skills for expressive typography, conceptual thinking and effective communication.

- MART 255 - Photoshop: Art and Design

  Credits: 3. Offered every term. Online Course. This project-based course explores a variety of design principles and techniques through Adobe Photoshop.

- MART 256 - Illustr: Vector and Layout Des

  Credits: 3. Offered every term. An introduction to the basic principles and techniques of still image design and manipulation using Adobe Illustrator, the industry leading application for creating vector-based content. This project-based course demystifies the powerful Illustrator toolsets and workspace and enables students to actualize their ideas by helping them to develop an efficient production process. No prerequisites required.

- MART 300 - Visions of Film

  Credits: 3. Offered spring. Media Arts majors only. Study of major film theories that led to the constitution of visual film language and their application in contemporary film narrative and direction. Course Attributes: Writing Course-Intermediate

- MART 301 - Media Arts Practices

  Credits: 1 TO 6. (R-6) Offered autumn. Prereq., Media Arts majors only. Practical application of the principles of production through work on graduate and upper level undergraduate projects, either as a crew member, production manager, designer, editor, director of photography or actor.

- MART 302 - Intro to Motion Design

  Credits: 3. Offered spring. Media Arts majors only. This project-oriented course will introduce students to the basic technical and aesthetic components of digital motion design using the industry standard software programs Photoshop and After Effects.

- MART 304 - Modern Horror Film

  Credits: 3. Offered every term. Online Course. This class explores the changing landscape of the horror film since 1960, studying the movies in filmic terms (Acting, Directing, Cinematography, Music, etc.) and sociological importance. Through online discussions, selected readings, multimedia projects, and video lectures, we will seek to understand the often-controversial genre of horror.

- MART 305 - 3D Animation I

  Credits: 3. Offered Autumn. This course is an introduction to fundamental concepts, principles, and practices of 3D digital modeling with Maya. Students will develop 3D modeling techniques, including production of geometric and organic objects. Through lectures, tutorials, in-class exercises and projects, students will be exposed to various techniques that may be used for innovative and artistic content such as filmic animation and compositing. Open to Media Arts majors only.

- MART 320 - Art of Photoshop

Credits: 3. Offered every term. Online Course. Pre-requisite MAR 230 or consent of instructor. This course provides an understanding of the use of Photoshop as an artistic tool. Exercises and projects will explore areas of customizing & combining tools, depth & perspective, and graphic elements (including text & paths), and will be based on effective production techniques, project planning, and the artistic principles of color theory, content, and layering.

- MART 323 - 3D Motion Design I

  Credits: 3. Offered autumn. Media Arts majors only. Introduction to fundamental concepts, principles and practices of digital compositing and rendering in order to establish a common aesthetic and technical language necessary to develop quality time-based art and design.

- MART 324 - Stop Motion Animation

  Credits: 3. Offered winter and summer sessions. Guides students through the active creation of several individual stop motion animation projects while developing their knowledge and expertise in traditional stop motion animation techniques using modern computing technology.

- MART 325 - Intro to Animation

  Credits: 3. Offered spring. Media Arts majors only. Introduction to two-dimensional digital animation, focusing on character and motion design animation fundamentals including: cell animation (frame by frame), motion-tweening, working with key frames and motion paths, moving elements on a 2D stage, object choreography and text animation.

- MART 327 - Intro to Cinematography

  Credits: 3. Offered spring. Media Arts majors only. Preliminary study of digital cinematography including color theory, composition, lens choice, continuity, camera movement/support, lighting for film and video, and grip in both studio and location situations.

- MART 332 - Introduction to Film Scoring

  Credits: 3. Media Arts / Music Majors only. Intro to Film Scoring focuses on the role of music in movies. It covers composition, orchestration, and dramatic techniques and how they integrate with the elements of dramatic action. Students will analyze iconic movies and scores and working with media arts film students, create two original film scores. Media Arts / Music Majors only.

- MART 333 - 3D Animation II

  Credits: 3. Offered Spring. Building on the modeling skills learned in 3D Animation I, this course teaches students how to animate, texture map, add visual effects and render. The course will also cover advanced rigging techniques. As a continuation of this series, students will be introduced to animation, dynamics (including particle and fluid systems), and MEL scripting. Open to Media Arts majors only.

- MART 335 - Experimental Animation

  Credits: 3. Offered spring. This course focuses on the development and creation of experimental animation projects using traditional stop motion animation techniques such as hand drawn, silhouette, object and clay. Projects created in this class may have elements created using iStopmotion, Dragonframe and other digital capture platforms. Open to Media Arts majors only.

- MART 336 - Directing the Fic Film

  Credits: 3. Offered autumn. Media Arts majors only. Developing, directing and editing a five to seven minute fiction movie. In depth work on creation of shooting script, casting, work with actors and location work. Emphasis on collaborative process and diligence and preparation in all levels of production.

- MART 340 - Princ of Interactive Media

  Credits: 3. Offered spring. Media Arts majors only. This course is designed to help students gain the skill sets necessary to successfully create work in the constantly evolving internet environment. It covers the fundamentals of website structure, content design and navigation and focuses on directory structure, visual design, user navigation, audio/video integration and domain management.

- MART 341 - Intro to Web Design

  Credits: 3. Offered every term. Online Course. Students will gain necessary skills in this introduction to the fundamentals of website structure, content design and navigation. Areas of focus will be directory structure, visual design, user navigation, audio/video integration and domain management. This course is open to all university students and geared to non-majors.

- MART 342 - Art & Sci of Interactive Games

Credits: 3. Offer every term. Online course. This class is an introduction to the technological achievements and artistic and social impacts involved with the development of interactive games. It will cover the evolution of the gaming profile and the advanced visual, sonic and narrative properties that make interactive games the explosive growth industry that is today.

- MART 355 - Experimental Documentary Media

  Credits: 3. In this course, students will explore the state of contemporary documentary media through investigating new approaches to integrating narrative content in documentary, interactive documentary, avant-garde documentaries, sensory filmmaking, and experiments in collaborating with documentary subjects. The focus of this course is to expand students' understanding of the possibilities of the documentary genre. Selected films, film history and theory will encourage students toward a more expansive definition of documentary practice, while considering how they might create new work in documentary arts.

- MART 391 - Special Topics

  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- MART 395 - Practicum I

  Credits: 3. Offered every term. This course offers the student the opportunity to apply their media arts skill sets and techniques to a variety of professional level projects that include movies, web site design, and still image design. Course Attributes: Internships/Practicums

- MART 416 - Production Studio I

  Credits: 3. Offered Autumn. Prereq., Media Arts major. This course offers a thorough look at storyboarding/previsuals, idea sketches and writing synopsis, as well as identity and promotion of finished works. This is also an opportunity for the student to begin production of the projects that will be continued in MART 457 Postproduction Studio.

- MART 422 - Digital Compositing II

  Credits: 3. Offered spring. Media Arts majors only. Combines the common aesthetic and technical language with solid design principles. Students immerse themselves in the making of a body of integrated-digital 3D work that explores the technical and aesthetic possibilities of multi-layered x y z plane actualizations.

- MART 425 - 3D Motion Design II

  Credits: 3. Offered autumn. Media Arts majors only. Advanced techniques of 3D motion graphics and animation.

- MART 432 - Techniques of Film Scoring

  Credits: 3. Prereq., MART 332. Focuses on the role of music in movies and expands upon the work accomplished in MART 332. It covers composition, orchestration, and harmonic techniques and integrates these with the elements of dramatic action. Students will work with media arts film students to actualize these techniques by creating original film scores of short scenes. The course will include a student project gallery, a peer review area, downloadable videos specific to the curriculum and a wide variety of online resources applicable to the subject matter.

- MART 436 - Producing

  Credits: 3. The secret history of great filmmakers is the history of great producers working behind the scenes to give the director the freedom and the resources to focus on his or her “vision.” The director’s job is everything “in” the frame; the producer’s job is everything outside the frame. This class asks: how does one produce a film? What do producers do, anyway? Why are there so many of them (what are their duties)? Why do they do it? And most importantly: HOW do they do it? This class creates structures and techniques for students to create more viable film productions; it also invites a number of guest speakers to share their experiences and advice about filmmaking. Most of these speakers are producers, or work in the world of film production and development.

- MART 440 - Tech Interactive Media Design

  Credits: 3. Offered spring. Media Arts majors only. Pre-requisite MAR 340. Advanced interactive media design class that builds on the foundation of principles taught in MAR 340.

- MART 441 - Web Technologies

  Credits: 3. Offered every term. This online advanced web technologies course will explore the latest in HTML5 and CSS3 in order to creating complex interactive functions and user experiences. Gaining an understanding of the overall environment of web design technologies will allow for a more integrated set of web design skills and a greater understanding of how the internet works.

- MART 445 - Sound for Digital Media

  Credits: 3. Offered spring. Media Arts majors only. This course is targeted at the Integrated Digital Media student and introduces fundamental concepts, principles and practices of digital sound recording and editing. This will enable students to expand their aesthetic by integrating their sonic and visual creative work.

- MART 446 - Sound for Film

  Credits: 3. Offered spring. Media Arts majors only. This course is targeted at the Digital Filmmaking student and introduces fundamental concepts, principles and practices of digital location sound recording and post-production editing to picture in order to establish a common aesthetic and technical language.

- MART 450 - Topics in Film/Media Studies

  Credits: 3. Offered spring. Media Arts majors only. Research and exploration of contemporary film, video, digital art and design. Focus on areas of student research both in commercial and non-commercial venues and styles. Course Attributes: Writing Course-Advanced

- MART 455 - Visions of Documentary Film

  Credits: 3. Offered spring. Media Arts majors only. Production of short experimental works of non-fiction. Emphasis on pre-production articulation of ideas and goals that lead to competent dramatic footage of actual events and people. Applied concepts: personal point-of-view, metaphor as organizing principle, articulation of subject/thesis, complexity of story, embedded meanings, use of visual motif.

- MART 457 - Production Studio II

  Credits: 3. Offered Spring. Prereq., Media Arts Major. This course covers the principles and techniques of finishing projects. Students will focus on advanced rendering tools, prototype testing, installation and final performances, refined editing/titles/credits, enabling students to leave with a well polished finished project.

- MART 491 - Special Topics

  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- MART 495 - Practicum II

  Credits: 3. Offered every term. This course offers the student the opportunity to apply their media arts skill sets and techniques to a variety of professional level projects that include movies, web site design, and still image design.

- MART 499 - Professional Portfolio

  Credits: 3. Offered spring. Media Arts majors only. This course is intended for senior majors in Media Arts who are ready to develop their physical and online presence, readying them for a strong exit-strategy from their university careers. Students will work on strengthening their professional image through development of digital and physical portfolios, demo reels, identity/branding and personal websites. Topics will also include but not be limited to: internships, resume development, cover letters, artist statements, interviewing process, graduate school and mentorships. Guest lectures and interviews will provide insight into current industry standards, professional workflow and entering the creative workforce. Students should leave this course with all the materials they need to enter the professional world.

- MART 500 - Core Rsrch:Digital Tech in Art

  Credits: 4. Offered autumn. This course explores the relationship between aesthetics and the emerging capabilities of digital technology. It will cover the historical relationship between science and art up to the end of the 20th century and examine the methodology of critical artistic applications. Level: Graduate

- MART 508 - Film Production

  Credits: 4. Offered every term.. Introduction to visual composition, photo and video manipulation and layering on the digital platform. Projects begin with static image composition and move to video time-based work using software-compositing programs. Level: Graduate

- MART 509 - Media Production II

  Credits: 4. Offered spring. Continuation of production and post-production practices and techniques introduced in MAR 508. Level: Graduate

- MART 510 - Core Rsrch: Narr and Expmnts

Credits: 4. Offered spring. This course expands upon the research begun in MAR 500 by exploring the development of emerging 21st century digital technologies and their impact on aesthetics in artistic production. Level: Graduate

- MART 514 - Advanced Composit Tech

  Credits: 4. Offered spring. This course continues the work begun in MAR 422 by furthering the development of artistic principles and practices and culminates in an in-house presentation of graduate level motion design techniques. Level: Graduate

- MART 515 - Digital Post-Production

  Credits: 4. Offered spring. Study and application of the principles of editing narrative. Beginning with animated storyboards created from scenes written by the student, the class edits existing footage in action and dialogue scenes. Study of history of editing as well as analysis of classic editing techniques. Level: Graduate

- MART 520 - Core Research: Peer Teaching

  Credits: 2. This graduate seminar is designed for prospective graduate teaching assistants and will cover techniques and best practices for both in-class and online delivery. Level: Graduate

- MART 522 - Intro to Inter Digi Media

  Credits: 4. Offered autumn. Based upon the research developed in MAR 500 and MAR 510, graduate students will explore and begin to develop artistic applications of interactive digital media, which will culminate in a semester end in-house presentation. Level: Graduate

- MART 523 - Tech in Inter Digi Media

  Credits: 4. Offered spring. This course expands upon the work begun in MAR 522 and will culminate in a semester end public presentation. Level: Graduate

- MART 524 - Compositing Applications I

  Credits: 4. Offered autumn. Based upon the concepts and principles developed in MAR 422 and MAR 514, graduate students will create a compositing project from pre-production through post-production, which will culminate in a semester end in-house presentation. Level: Graduate

- MART 525 - Compositing Applic. II

  Credits: 4. Offered spring. This course expands upon the work begun in MAR 524 and culminates in a semester end public presentation. Level: Graduate

- MART 530 - Core Rsrch: Prof Presentation

  Credits: 3. The purpose of this class is to develop a foundation for your professional media arts practice, to prepare you for seeking career, exhibition, and public presentation opportunities in the field. Level: Graduate

- MART 557 - Advanced Post-Production

  Credits: 4. Offered Fall. Advanced Post Production is a graduate level course designed to provide students with advanced technical and conceptual instruction in non-linear editing for narrative films. The class provides a platform for engaging in conceptual critiques with their films as they are edited as well as a base for professional certification in the Final Cut Pro Application. Level: Graduate

- MART 577 - Film Directing I

  Credits: 4. Offered autumn. Study of dramatic action, human psychology, and the patterns of story as applied to script analysis and directing for film. Level: Graduate

- MART 578 - Graduate Studio

  Credits: 1 TO 6. (R-18) Offered every semester. Each semester students work on individual projects under the supervision of a faculty mentor. Each year begins and ends with a faculty and peer review of projects in progress. Level: Graduate

- MART 579 - Film Directing III

  Credits: 4. Offered autumn. Continuation of video/film directing techniques at a more advanced level, including the creation of a short film. Level: Graduate

- MART 580 - Principals of Cinematography

  Credits: 4. Offered autumn. Intermediate study of digital cinematography including color theory, composition, lens choice, continuity, camera movement/support, lighting for film and video, and grip in both studio and location situations. Level: Graduate

- MART 586 - Screenwriting I
  Credits: 4. Offered autumn. Prereq., MAR 577. Basic development of the short screenplay from idea, through development of characters and action to final shooting script. Level: Graduate
- MART 587 - Screenwriting II
  Credits: 4. Offered spring. Prereq., MAR 586. Continued work in screenwriting at an advanced level. Level: Graduate
- MART 591 - Graduate Practicum
  Credits: 3. Offered every term. This course offers the graduate student the opportunity to expand their media arts skill sets and techniques by working on a variety of professional level projects that include movies, web site design, and still image design. Level: Graduate
- MART 595 - Special Topics
  Credits: 1 TO 6. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, and one-time offerings of current topics. Level: Graduate Course Attributes: Internships/Practicums
- MART 596 - Independent Study
  Credits: 1 TO 6. (R-12) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Independent Study
- MART 597 - Research
  Credits: 1 TO 12. (R-12) Offered intermittently. Directed individual research and study appropriate to the back ground and objectives of the student. Level: Graduate
- MART 601 - Final Portfolio Research
  Credits: 3. Offered every semester. Investigation into subjects relevant to the development of the student's Final Portfolio work. Application of qualitative research techniques, with a research presentation or paper due at the end of the semester. Level: Graduate
- MART 680 - Film Directing IV
  Credits: 4. Offered spring. Prereq., MAR 577, 578, 579. Continued advanced work in directing, including the completion of a short film. Level: Graduate
- MART 687 - Final Portfolio I
  Credits: 1 TO 12. Offered autumn. Ongoing production and content work relating to thesis projects. Level: Graduate
- MART 688 - Media Practicum
  Credits: 1 TO 4. (R-12) Offered every term. Pursuit of Practical Experience in Media Arts projects both personal and Professional. Level: Graduate
- MART 690 - Professional Practices
  Credits: 3. (R-6) Offered every term. Work outside of program in an area of professional interest. Level: Graduate Course Attributes: Research & Creative Schlrshp
- MART 699 - Final Portfolio II
  Credits: 1 TO 12. Offered spring. Final work on thesis portfolio. Approval by the student's thesis committee is required for graduation. Level: Graduate

Media Arts Minor

The Media Arts minor program offers an integrated curriculum, centered in digital technology as a storytelling medium. The minor is meant to supplement the work of those undergraduate students whose major area of study can be enhanced through the application of Media Arts principles and technologies and fulfills the prerequisites for those interested in pursuing the B.A. The Media Arts minor is offered both in-class and online. For more information please visit our website at http://www.umt.edu/mediaarts.

Minor - Media Arts (Minor)

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0

Required Courses

Rule: Must complete all.

	Course	Credits
	MAR 101L - Intro to Media Arts Offered every term. Overview of the media arts and their interaction, integration and development in the creation of story beginning with the early years of photography and movie-making through the introduction of radio and television up to the digital revolution.	3 Credits
	MAR 112A - Intro to Non-Linear Editing Offered every term. Study of the history, process and philosophy of narrative film/video editing and an introduction to Final Cut nonlinear editing software.	3 Credits
	MART 102 - Digital Technology in the Arts Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.	3 Credits
	MART 111A - Intro to Photoshop Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Media Arts B.A.

The B.A. program provides a uniquely integrated curriculum that combines the areas of Digital Filmmaking and Integrated Digital Media. The courses in Digital Filmmaking focus on the three primary components of pre-production, production and post-production and include directing, writing, sound design, and editing. The courses in Integrated Digital Media focus on the relationship between digital technology and aesthetics and include still image/motion graphics, compositing, 2D animation, sound design and interactive media. History and theory courses in both areas provide students with a deeper understanding of artistic principles and practices. The undergraduate program has a large production space including a green screen area, three computer labs with 60 total stations and an audio recording room. After completion of the prerequisite courses, there is a G.P.A. gate in effect for admission into the Major. For more information on requirements, please see the B.A. program heading under academics or the Media Arts website at http://www.umt.edu/mediaarts .

Bachelor of Arts - Media Arts

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 45

Required Cumulative GPA: 2.0

Note: Prerequisite courses (MAR 101L, MAR 112A, MART 102, MART 111A) must be completed or be in the process of completion before applying to the B.A. program.

Lower Division Core

Rule: Complete all courses.

	Course	Credits
	MAR 101L - Intro to Media Arts Offered every term. Overview of the media arts and their interaction, integration and development in the creation of story beginning with the early years of photography and movie-making through the introduction of radio and television up to the digital revolution.	3 Credits
	MAR 112A - Intro to Non-Linear Editing Offered every term. Study of the history, process and philosophy of narrative film/video editing and an introduction to Final Cut nonlinear editing software.	3 Credits
	MAR 210 - Creation of Media Story Offered autumn. Media Arts majors only. An introduction to screenwriting and visualization for media story. Focus is on developing visual writing skills and effective utilization of critical story elements.	3 Credits
	MAR 251 - Dig Video Prod Tech Offered autumn. Media Arts majors only. Intermediate study of digital video cameras, lighting, sound, and their use in specific production situations.	3 Credits
	MART 102 - Digital Technology in the Arts Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.	3 Credits
	MART 111A - Intro to Photoshop Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment.	3 Credits
	MART 221 - Fund of Digital Image Design Offered autumn. Media Arts majors only. Introduction to the fundamental concepts, principles and practices of digital still imaging in order to establish a common aesthetic and technical language necessary to develop quality designs on the computer.	3 Credits
Minimum Required Grade: C		21 Total Credits Required

Upper Division Core

Rule: Complete all courses.

	Course	Credits

	MAR 300 - Visions of Film Offered spring. Media Arts majors only. Study of major film theories that led to the constitution of visual film language and their application in contemporary film narrative and direction.	3 Credits
	MAR 456 - Directing Offered autumn. Media Arts majors only. Developing, directing and editing a five to seven minute fiction movie. In depth work on creation of shooting script, casting, work with actors and location work. Emphasis on collaborative process and diligence and preparation in all levels of production.	3 Credits
	MART 302 - Intro to Motion Design Offered spring. Media Arts majors only. This project-oriented course will introduce students to the basic technical and aesthetic components of digital motion design using the industry standard software programs Photoshop and After Effects.	3 Credits
	MART 325 - Fund of Digital Animation Offered spring. Media Arts majors only. Introduction to two-dimensional digital animation, focusing on character and motion design animation fundamentals including: cell animation (frame by frame), motion-tweening, working with key frames and motion paths, moving elements on a 2D stage, object choreography and text animation.	3 Credits
	MART 330 - Principles of Sound Design Offered autumn. Media Arts majors only. Introduction to fundamental concepts, principles and practices of digital sound recording and editing in order to establish a common aesthetic and technical language necessary to develop quality audio design.	3 Credits
	MART 340 - Princ of Interactive Media Offered spring. Media Arts majors only. This course is designed to help students gain the skill sets necessary to successfully create work in the constantly evolving internet environment. It covers the fundamentals of website structure, content design and navigation and focuses on directory structure, visual design, user navigation, audio/video integration and domain management.	3 Credits
	MART 450 - Topics in Film/Media Studies Offered spring. Media Arts majors only. Research and exploration of contemporary film, video, digital art and design. Focus on areas of student research both in commercial and non-commercial venues and styles.	3 Credits
Minimum Required Grade: C		24 Total Credits Required

Digital Filmmarking

The Digital Filmmaking curriculum offers an all-inclusive experience in the areas of pre-production, production and post-production with specific courses designed to fully integrate students into the ever-changing digital world of filmmaking.

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Fine Arts - Media Arts; Track: Digital Filmmaking

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 72

Required Cumulative GPA: 2.0

Note: B.F.A. Digital Filmmaking.

Prerequisite courses (MAR 101L, MAR 112A, MART 102, MART 111A) must be completed or be in the process of completion before applying to the B.A. program.

First year requirements of the B.A. program (MAR 210, MAR 251, MAR 300, MART 221, MART 302, MART 325) must be completed or in progress before applying to the B.F.A. Digital Filmmaking program.

Lower Division Core

Rule: Complete all courses.

	MAR 300 - Visions of Film Offered spring. Media Arts majors only. Study of major film theories that led to the constitution of visual film language and their application in contemporary film narrative and direction.	3 Credits
	MAR 326 - Intro to Cinematography Offered spring. Media Arts majors only. Preliminary study of digital cinematography including color theory, composition, lens choice, continuity, camera movement/support, lighting for film and video, and grip in both studio and location situations.	3 Credits
	MAR 355 - Directing the Fic Film Offered autumn. Media Arts majors only. Developing, directing and editing a five to seven minute fiction movie. In depth work on creation of shooting script, casting, work with actors and location work. Emphasis on collaborative process and diligence and preparation in all levels of production.	3 Credits
	MAR 415 - Short Form Screenwriting Offered Autumn. Media Arts majors only. Intermediate level writing class devoted to short films, with an emphasis on writing camera-ready scripts for spring production. Feature film structure and techniques are also discussed.	3 Credits
	MAR 442 - Experimental Film Offered autumn. Media Arts majors only. Surveying a wide range of experimental cinema (film/video) from the 1920's to the present with the central focus being artistic practice in the context of historic and cultural concerns. Students will also create projects focusing on exploring film/video both as a form of personal expression and as a medium, rather than as mass entertainment.	3 Credits
	MAR 446 - Sound for Film Offered spring. Media Arts majors only. This course is targeted at the Digital Filmmaking student and introduces fundamental concepts, principles and practices of digital location sound recording and post-production editing to picture in order to establish a common aesthetic and technical language.	3 Credits

	MAR 455 - Visions of Documentary Film Offered spring. Media Arts majors only. Production of short experimental works of non-fiction. Emphasis on pre-production articulation of ideas and goals that lead to competent dramatic footage of actual events and people. Applied concepts: personal point-of-view, metaphor as organizing principle, articulation of subject/thesis, complexity of story, embedded meanings, use of visual motif.	3 Credits
	MART 301 - Media Arts Practices (R-6) Offered autumn. Prereq., Media Arts majors only. Practical application of the principles of production through work on graduate and upper level undergraduate projects, either as a crew member, production manager, designer, editor, director of photography or actor.	1 To 6 Credits
	MART 302 - Intro to Motion Design Offered spring. Media Arts majors only. This project-oriented course will introduce students to the basic technical and aesthetic components of digital motion design using the industry standard software programs Photoshop and After Effects.	3 Credits
	MART 325 - Fund of Digital Animation Offered spring. Media Arts majors only. Introduction to two-dimensional digital animation, focusing on character and motion design animation fundamentals including: cell animation (frame by frame), motion-tweening, working with key frames and motion paths, moving elements on a 2D stage, object choreography and text animation.	3 Credits

	MAR 210 - Creation of Media Story Offered autumn. Media Arts majors only. An introduction to screenwriting and visualization for media story. Focus is on developing visual writing skills and effective utilization of critical story elements.	3 Credits
	MAR 251 - Dig Video Prod Tech Offered autumn. Media Arts majors only. Intermediate study of digital video cameras, lighting, sound, and their use in specific production situations.	3 Credits
	MART 102 - Digital Technology in the Arts Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.	3 Credits
	MART 111A - Intro to Photoshop Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment.	3 Credits
	MART 255 - Photoshop: Art and Design Offered every term. Online Course. This project-based course explores a variety of design principles and techniques through Adobe Photoshop.	3 Credits
	MART 256 - Illustr: Vector and Layout Des Offered every term. An introduction to the basic principles and techniques of still image design and manipulation using Adobe Illustrator, the industry leading application for creating vector-based content. This project-based course demystifies the powerful Illustrator toolsets and workspace and enables students to actualize their ideas by helping them to develop an efficient production process. No prerequisites required.	3 Credits
Minimum Required Grade: C		21 Total Credits Required

Upper Division Core

Rule: Complete all courses.

Note: Elective: 6 cr.

	Course	**Credits**

	MART 300 - Visions of Film Offered spring. Media Arts majors only. Study of major film theories that led to the constitution of visual film language and their application in contemporary film narrative and direction.	3 Credits
	MART 302 - Intro to Motion Design Offered spring. Media Arts majors only. This project-oriented course will introduce students to the basic technical and aesthetic components of digital motion design using the industry standard software programs Photoshop and After Effects.	3 Credits
	MART 305 - 3D Animation I Offered Autumn. This course is an introduction to fundamental concepts, principles, and practices of 3D digital modeling with Maya. Students will develop 3D modeling techniques, including production of geometric and organic objects. Through lectures, tutorials, in-class exercises and projects, students will be exposed to various techniques that may be used for innovative and artistic content such as filmic animation and compositing. Open to Media Arts majors only.	3 Credits
	MART 325 - Fund of Digital Animation Offered spring. Media Arts majors only. Introduction to two-dimensional digital animation, focusing on character and motion design animation fundamentals including: cell animation (frame by frame), motion-tweening, working with key frames and motion paths, moving elements on a 2D stage, object choreography and text animation.	3 Credits
	MART 330 - Principles of Sound Design Offered autumn. Media Arts majors only. Introduction to fundamental concepts, principles and practices of digital sound recording and editing in order to establish a common aesthetic and technical language necessary to develop quality audio design.	3 Credits
	MART 335 - Experimental Animation Offered spring. This course focuses on the development and creation of experimental animation projects using traditional stop motion animation techniques such as hand drawn, silhouette, object and clay. Projects created in this class may have elements created using iStopmotion, Dragonframe and other digital capture platforms. Open to Media Arts majors only.	3 Credits
	MART 336 - Directing the Fic Film Offered autumn. Media Arts majors only. Developing, directing and editing a five to seven minute fiction movie. In depth work on creation of shooting script, casting, work with actors and location work. Emphasis on collaborative process and diligence and preparation in all levels of production.	3 Credits
	MART 340 - Princ of Interactive Media Offered spring. Media Arts majors only. This course is designed to help students gain the skill sets necessary to successfully create work in the constantly evolving internet environment. It covers the fundamentals of website structure, content design and navigation and focuses on directory structure, visual design, user navigation, audio/video integration and domain management.	3 Credits

	MART 341 - Intro to Web Design Offered every term. Online Course. Students will gain necessary skills in this introduction to the fundamentals of website structure, content design and navigation. Areas of focus will be directory structure, visual design, user navigation, audio/video integration and domain management. This course is open to all university students and geared to non-majors.	3 Credits
	MART 416 - Production Studio I Offered Autumn. Prereq., Media Arts major. This course offers a thorough look at storyboarding/previsuals, idea sketches and writing synopsis, as well as identity and promotion of finished works. This is also an opportunity for the student to begin production of the projects that will be continued in MART 457 Postproduction Studio.	3 Credits
	MART 425 - Tech of Digital Animation Offered autumn. Media Arts majors only. Advanced techniques of 3D motion graphics and animation.	3 Credits
	MART 440 - Tech Interactive Media Design Offered spring. Media Arts majors only. Pre-requisite MAR 340. Advanced interactive media design class that builds on the foundation of principles taught in MAR 340.	3 Credits
	MART 441 - Web Technologies Offered every term. This online advanced web technologies course will explore the latest in HTML5 and CSS3 in order to creating complex interactive functions and user experiences. Gaining an understanding of the overall environment of web design technologies will allow for a more integrated set of web design skills and a greater understanding of how the internet works.	3 Credits
	MART 450 - Topics in Film/Media Studies Offered spring. Media Arts majors only. Research and exploration of contemporary film, video, digital art and design. Focus on areas of student research both in commercial and non-commercial venues and styles.	3 Credits
	MART 457 - Production Studio II Offered Spring. Prereq., Media Arts Major. This course covers the principles and techniques of finishing projects. Students will focus on advanced rendering tools, prototype testing, installation and final performances, refined editing/titles/credits, enabling students to leave with a well polished finished project.	3 Credits
Minimum Required Grade: C		42 Total Credits Required

Sonic Arts

The Sonic Arts curriculum offers an in-depth experience in the design, development and production of sonic artwork and provides a platform for students to integrate their work with both filmmaking and integrated digital media.

This is an advising track only and not an official program as recognized by the University of Montana (UM) or the Montana University System. This information will not appear on your UM transcript, diploma, university lists, student data system, or university publication. You do not fill out a major change for a track.

Bachelor of Fine Arts - Media Arts; Track: Sonic Arts

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 72

Required Cumulative GPA: 2.0

Note: B.F.A. Sonic Arts.

Prerequisite courses (MAR 101L, MAR 112A, MART 102, MART 111A) must be completed or be in the process of completion before applying to the B.A. program.

The first year requirements of the B.A. program (MAR 210, MAR 251, MAR 300, MART 221, MART 302, MART 325) and MUST 110 and MUST 210 must be completed or in progress before applying to the B.F.A. Sonic Arts program.

Rule: Complete all courses.

	Course	Credits
	MAR 101L - Intro to Media Arts Offered every term. Overview of the media arts and their interaction, integration and development in the creation of story beginning with the early years of photography and movie-making through the introduction of radio and television up to the digital revolution.	3 Credits
	MAR 112A - Intro to Non-Linear Editing Offered every term. Study of the history, process and philosophy of narrative film/video editing and an introduction to Final Cut nonlinear editing software.	3 Credits
	MAR 210 - Creation of Media Story Offered autumn. Media Arts majors only. An introduction to screenwriting and visualization for media story. Focus is on developing visual writing skills and effective utilization of critical story elements.	3 Credits
	MAR 251 - Dig Video Prod Tech Offered autumn. Media Arts majors only. Intermediate study of digital video cameras, lighting, sound, and their use in specific production situations.	3 Credits
	MART 102 - Digital Technology in the Arts Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.	3 Credits
	MART 111A - Intro to Photoshop Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment.	3 Credits
	MART 221 - Fund of Digital Image Design Offered autumn. Media Arts majors only. Introduction to the fundamental concepts, principles and practices of digital still imaging in order to establish a common aesthetic and technical language necessary to develop quality designs on the computer.	3 Credits

	MUST 110 - Digital Audio & Multitracking Offered autumn and spring. Composition of computer music through recording, editing, and processing sound with digital audio software. Study of the theory and application of digital audio recording, multitracking, and digital signal processing, and electroacoustic music history. Survey of historical and current electronic and computer music composers, pieces, and practices.	2 Credits
	MUST 210 - Sequencng, Synthesis, Sampling Offered autumn. Prereq., MUST 110. Composition of computer music using MIDI sequencing, sampling, and synthesis software, and score preparation using music notation software. Study of the theory and application of MIDI, synthesis algorithms, and effects processing, and the practice of music engraving.	2 Credits
Minimum Required Grade: C		25 Total Credits Required

Rule: Complete all courses.

Note: Also required: MAR 342: Intro to Film Scoring (offered spring, 3 credits) and MAR 442: Film Scoring Techniques (offered spring, 3 credits)

	Course	**Credits**
	MAR 300 - Visions of Film Offered spring. Media Arts majors only. Study of major film theories that led to the constitution of visual film language and their application in contemporary film narrative and direction.	3 Credits
	MAR 446 - Sound for Film Offered spring. Media Arts majors only. This course is targeted at the Digital Filmmaking student and introduces fundamental concepts, principles and practices of digital location sound recording and post-production editing to picture in order to establish a common aesthetic and technical language.	3 Credits
	MAR 465 - Special Projects Offered autumn. Media Arts majors only. Focus on the production of short commercial works, including advertisements, industrial work, “how to” videos, as well as paper projects with potential clients. Students develop a DVD/Web portfolio for entry into the profession upon graduation. The class serves as a synthesis point for analysis and presentation of techniques and principles learned throughout the program.	3 Credits
	MART 301 - Media Arts Practices (R-6) Offered autumn. Prereq., Media Arts majors only. Practical application of the principles of production through work on graduate and upper level undergraduate projects, either as a crew member, production manager, designer, editor, director of photography or actor.	1 To 6 Credits
	MART 302 - Intro to Motion Design Offered spring. Media Arts majors only. This project-oriented course will introduce students to the basic technical and aesthetic components of digital motion design using the industry standard software programs Photoshop and After Effects.	3 Credits

	MART 325 - Fund of Digital Animation Offered spring. Media Arts majors only. Introduction to two-dimensional digital animation, focusing on character and motion design animation fundamentals including: cell animation (frame by frame), motion-tweening, working with key frames and motion paths, moving elements on a 2D stage, object choreography and text animation.	3 Credits
	MART 330 - Principles of Sound Design Offered autumn. Media Arts majors only. Introduction to fundamental concepts, principles and practices of digital sound recording and editing in order to establish a common aesthetic and technical language necessary to develop quality audio design.	3 Credits
	MART 340 - Princ of Interactive Media Offered spring. Media Arts majors only. This course is designed to help students gain the skill sets necessary to successfully create work in the constantly evolving internet environment. It covers the fundamentals of website structure, content design and navigation and focuses on directory structure, visual design, user navigation, audio/video integration and domain management.	3 Credits
	MART 440 - Tech Interactive Media Design Offered spring. Media Arts majors only. Pre-requisite MAR 340. Advanced interactive media design class that builds on the foundation of principles taught in MAR 340.	3 Credits
	MART 445 - Sound for Digital Media Offered spring. Media Arts majors only. This course is targeted at the Integrated Digital Media student and introduces fundamental concepts, principles and practices of digital sound recording and editing. This will enable students to expand their aesthetic by integrating their sonic and visual creative work.	3 Credits
	MART 450 - Topics in Film/Media Studies Offered spring. Media Arts majors only. Research and exploration of contemporary film, video, digital art and design. Focus on areas of student research both in commercial and non-commercial venues and styles.	3 Credits
	MART 499 - Professional Portfolio Offered spring. Media Arts majors only. This course is intended for senior majors in Media Arts who are ready to develop their physical and online presence, readying them for a strong exit-strategy from their university careers. Students will work on strengthening their professional image through development of digital and physical portfolios, demo reels, identity/branding and personal websites. Topics will also include but not be limited to: internships, resume development, cover letters, artist statements, interviewing process, graduate school and mentorships. Guest lectures and interviews will provide insight into current industry standards, professional workflow and entering the creative workforce. Students should leave this course with all the materials they need to enter the professional world.	3 Credits

	MUST 310 - Interactivity Digitl Sgnl Proc Offered spring. Prereq., MUST 210 and upper-division standing in music. Composition of interactive computer music using a graphical programming environment for MIDI, synthesis, and digital signal processing. Study of graphical programming, interactive composition and performance, generating and processing MIDI data, synthesizing computer-generated sound, and processing digital audio in real-time.	2 Credits
	MUST 410 - Computer Music Programming Offered autumn. Upper-division standing in music. Composition of computer music through programming. Study of object oriented programming, synthesis and digital signal processing techniques, music-generating algorithms, sound spatialization, graphical user interface design, and external control.	2 Credits
	MUST 427 - Mtn Electroacoustc Lptp Ens II Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.	1 Credits
Minimum Required Grade: C		47 Total Credits Required

Integrated Digital Media

Bachelor of Arts - Media Arts; Track: Integrated Digital Media (online)

College of Visual & Perf Arts

Catalog Year: 2016-2017

Degree Specific Credits: 48
Required Cumulative GPA: 2.0

Lower Division Core Courses

Rule: Complete all courses.

Note: Mar 101L, MAR 112A, MART 102, and MART 111A must be completed prior to registering for the higher level courses listed for this degree.

	Course	**Credits**
	MAR 101L - Intro to Media Arts Offered every term. Overview of the media arts and their interaction, integration and development in the creation of story beginning with the early years of photography and movie-making through the introduction of radio and television up to the digital revolution.	3 Credits
	MAR 112A - Intro to Non-Linear Editing Offered every term. Study of the history, process and philosophy of narrative film/video editing and an introduction to Final Cut nonlinear editing software.	3 Credits

	MART 102 - Digital Technology in the Arts Offered every term. An introduction to the relationship between aesthetics and the emerging capacities of digital technology. The course will explore the basic evolution of hardware, system software, and the Internet and will present a brief history of the pioneers of both traditional and digital art. It will also look at contemporary and emerging trends in the artistic application of digital technology.	3 Credits
	MART 111A - Intro to Photoshop Offered every term. Online Course. This project-oriented design and compositing course introduces students to the fundamentals of Adobe Photoshop while focusing on artistic expression in a digital technology environment.	3 Credits
	MART 255 - Photoshop: Art and Design Offered every term. Online Course. This project-based course explores a variety of design principles and techniques through Adobe Photoshop.	3 Credits
	MART 256 - Intro Illustr for Media Arts Offered every term. An introduction to the basic principles and techniques of still image design and manipulation using Adobe Illustrator, the industry leading application for creating vector-based content. This project-based course demystifies the powerful Illustrator toolsets and workspace and enables students to actualize their ideas by helping them to develop an efficient production process. No prerequisites required.	3 Credits
Minimum Required Grade: C		18 Total Credits Required

Upper Division Core

Rule: Must complete all of the following:courses

Note: MART 340 must be taken prior to registering for MART 440.

	Course	**Credits**
	MART 302 - Intro to Motion Design Offered spring. Media Arts majors only. This project-oriented course will introduce students to the basic technical and aesthetic components of digital motion design using the industry standard software programs Photoshop and After Effects.	3 Credits
	MART 330 - Principles of Sound Design Offered autumn. Media Arts majors only. Introduction to fundamental concepts, principles and practices of digital sound recording and editing in order to establish a common aesthetic and technical language necessary to develop quality audio design.	3 Credits
	MART 340 - Princ of Interactive Media Offered spring. Media Arts majors only. This course is designed to help students gain the skill sets necessary to successfully create work in the constantly evolving internet environment. It covers the fundamentals of website structure, content design and navigation and focuses on directory structure, visual design, user navigation, audio/video integration and domain management.	3 Credits

	MART 341 - Intro to Web Design Offered every term. Online Course. Students will gain necessary skills in this introduction to the fundamentals of website structure, content design and navigation. Areas of focus will be directory structure, visual design, user navigation, audio/video integration and domain management. This course is open to all university students and geared to non-majors.	3 Credits
	MART 342 - Art & Sci of Interactive Games Offer every term. Online course. This class is an introduction to the technological achievements and artistic and social impacts involved with the development of interactive games. It will cover the evolution of the gaming profile and the advanced visual, sonic and narrative properties that make interactive games the explosive growth industry that is today.	3 Credits
	MART 440 - Tech Interactive Media Design Offered spring. Media Arts majors only. Pre-requisite MAR 340. Advanced interactive media design class that builds on the foundation of principles taught in MAR 340.	3 Credits
	MART 450 - Topics in Film/Media Studies Offered spring. Media Arts majors only. Research and exploration of contemporary film, video, digital art and design. Focus on areas of student research both in commercial and non-commercial venues and styles.	3 Credits
	MART 499 - Professional Portfolio Offered spring. Media Arts majors only. This course is intended for senior majors in Media Arts who are ready to develop their physical and online presence, readying them for a strong exit-strategy from their university careers. Students will work on strengthening their professional image through development of digital and physical portfolios, demo reels, identity/branding and personal websites. Topics will also include but not be limited to: internships, resume development, cover letters, artist statements, interviewing process, graduate school and mentorships. Guest lectures and interviews will provide insight into current industry standards, professional workflow and entering the creative workforce. Students should leave this course with all the materials they need to enter the professional world.	3 Credits
Minimum Required Grade: C		24 Total Credits Required

Degree Electives

Rule: Must complete 6 credits from the following courses

Note: Other courses within CVPA or other areas may be taken for elective credit upon approval of the director.

	Course	**Credits**
	MAR 210 - Creation of Media Story Offered autumn. Media Arts majors only. An introduction to screenwriting and visualization for media story. Focus is on developing visual writing skills and effective utilization of critical story elements.	3 Credits
	MAR 251 - Dig Video Prod Tech Offered autumn. Media Arts majors only. Intermediate study of digital video cameras, lighting, sound, and their use in specific production situations.	3 Credits

	MAR 300 - Visions of Film Offered spring. Media Arts majors only. Study of major film theories that led to the constitution of visual film language and their application in contemporary film narrative and direction.	3 Credits
	MART 221 - Fund of Digital Image Design Offered autumn. Media Arts majors only. Introduction to the fundamental concepts, principles and practices of digital still imaging in order to establish a common aesthetic and technical language necessary to develop quality designs on the computer.	3 Credits
	MART 305 - 3D Animation I Offered Autumn. This course is an introduction to fundamental concepts, principles, and practices of 3D digital modeling with Maya. Students will develop 3D modeling techniques, including production of geometric and organic objects. Through lectures, tutorials, in-class exercises and projects, students will be exposed to various techniques that may be used for innovative and artistic content such as filmic animation and compositing. Open to Media Arts majors only.	3 Credits
	MART 325 - Fund of Digital Animation Offered spring. Media Arts majors only. Introduction to two-dimensional digital animation, focusing on character and motion design animation fundamentals including: cell animation (frame by frame), motion-tweening, working with key frames and motion paths, moving elements on a 2D stage, object choreography and text animation.	3 Credits
	MART 332 - Introduction to Film Scoring Media Arts / Music Majors only. Intro to Film Scoring focuses on the role of music in movies. It covers composition, orchestration, and dramatic techniques and how they integrate with the elements of dramatic action. Students will analyze iconic movies and scores and working with media arts film students, create two original film scores. Media Arts / Music Majors only.	3 Credits
	MART 333 - 3D Animation II Offered Spring. Building on the modeling skills learned in 3D Animation I, this course teaches students how to animate, texture map, add visual effects and render. The course will also cover advanced rigging techniques. As a continuation of this series, students will be introduced to animation, dynamics (including particle and fluid systems), and MEL scripting. Open to Media Arts majors only.	3 Credits
	MART 432 - Techniques of Film Scoring Prereq., MART 332. Focuses on the role of music in movies and expands upon the work accomplished in MART 332. It covers composition, orchestration, and harmonic techniques and integrates these with the elements of dramatic action. Students will work with media arts film students to actualize these techniques by creating original film scores of short scenes. The course will include a student project gallery, a peer review area, downloadable videos specific to the curriculum and a wide variety of online resources applicable to the subject matter.	3 Credits
	MUST 110 - Digital Audio & Multitracking Offered autumn and spring. Composition of computer music through recording, editing, and processing sound with digital audio software. Study of the theory and application of digital audio recording, multitracking, and digital signal processing, and electroacoustic music history. Survey of historical and current electronic and computer music composers, pieces, and practices.	2 Credits

	MUST 210 - Sequencng, Synthesis, Sampling Offered autumn. Prereq., MUST 110. Composition of computer music using MIDI sequencing, sampling, and synthesis software, and score preparation using music notation software. Study of the theory and application of MIDI, synthesis algorithms, and effects processing, and the practice of music engraving.	2 Credits
	MUST 310 - Interactivity Digitl Sgnl Proc Offered spring. Prereq., MUST 210 and upper-division standing in music. Composition of interactive computer music using a graphical programming environment for MIDI, synthesis, and digital signal processing. Study of graphical programming, interactive composition and performance, generating and processing MIDI data, synthesizing computer-generated sound, and processing digital audio in real-time.	2 Credits
	MUST 410 - Computer Music Programming Offered autumn. Upper-division standing in music. Composition of computer music through programming. Study of object oriented programming, synthesis and digital signal processing techniques, music-generating algorithms, sound spatialization, graphical user interface design, and external control.	2 Credits
	MUST 427 - Mtn Electroacoustc Lptp Ens II Offered autumn and spring. Prereq., consent of instructor. See MUSI 122A.	1 Credits
Minimum Required Grade: C		6 Total Credits Required

Art

Julia Galloway, Director

The School of Art provides a comprehensive education in studio art, including intensive hands-on studio practice, art history, criticism, and theory. Programs provide thorough professional training for students interested in careers in the field of art.
Degree offerings include the B.A., B.F.A., M.A., and M.F.A. in Art. Areas of specialization are Ceramics, Drawing, Painting, Photography, Printmaking and Sculpture. An M.A. degree in Art with concentrations in Studio Art and/or Art History is also offered, as well as courses that prepare students for licensure for teaching art.

Advanced Placement Policy

All students, including those who have taken AP examinations, must submit a portfolio to challenge art classes. Undergraduate students may challenge foundations courses only (ARTZ 105A (Art 101A), Visual Language-Drawing; ARTZ 106A (ART 102A), Visual Language-2-D Fndtns; and ARTZ 108A (ART 103A), Visual Language-3-D Fndtns).

Portfolios are reviewed at the beginning of each semester. The challenge process waives the requirement to take a specific class, but does not provide any credits. The process of portfolio reviews is as follows: students submit a portfolio of ten .jpeg files or pieces of actual work to the school office two weeks prior to the beginning of the semester. If challenging more than one course, students submit examples of work for each course, for example: ten drawing samples for ARTZ 105A (ART 101A), ten color works for ARTZ 106A (ART 102A), and/or ten 3-D pieces for ARTZ 108A (ART 103A).

Transfer Students

Students with transfer credits from another institution must contact the school director for review of transfer transcripts to assess course equivalents.

Department Faculty

Professors

James Bailey, Professor; Printmaking & Painting/Drawing
Maryann Bonjorni, Professor; Drawing

Katy Cannon, Adjunct Professor
H. Rafael Chacon, Professor; Art History and Criticism
Elizabeth Dove, Professor; Printmaking and Photography
Julia Galloway, Professor
Valerie Hedquist, Professor; Art History and Criticism
Elizabeth Lo, Professor; Ceramics and Drawing
Cathryn Mallory, Professor and Gallery Director

Associate Professors

Bradley Allen, Director of the School of Art; Associate Professor of Sculpture
Kevin Bell, Associate Professor; Painting
Matthew Hamon, Associate Professor; Photography
Trey Hill, Associate Professor; Ceramics

Assistant Professors

Jennifer Combe, Assistant Professor; Art Education

Adjunct Faculty

Steven Krutek, Adjunct Assistant Professor; Foundations and Art Education
Jack Metcalf, Adjunct; Foundations

Art History

Back to Top

- ARTH 160L - Global Visual Culture
  Credits: 3. Offered autumn and spring. An introduction to the visual arts exploring various approaches to understanding art, art history and terminology, techniques and media, motivating factors behind the creative act. Course Attributes: Lit & Artistic Studies (L)
- ARTH 200H - Art of World Civilization I
  Credits: 3. Offered autumn. Survey of the history of visual art from prehistory to 1400. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- ARTH 201H - Art of World Civilization II
  Credits: 3. Offered spring. Survey of the history of visual art from 1400 to the present. Course Attributes: Hist & Cultural Studies (H) Democracy and Citizenship (Y)
- ARTH 250L - Introduction to Art Criticism
  Credits: 3. Offered autumn and spring. Prereqs., ARTH 200H, ARTH 201H. Study of the description, interpretation, and evaluation of visual art as practiced in art criticism. Course Attributes: Lit & Artistic Studies (L) Writing Course-Intermediate
- ARTH 333H - Architectural History I
  Credits: 3. Offered autumn. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of architectural styles, designs, and choices of the built environment from prehistory to the modern age. Course Attributes: Hist & Cultural Studies (H)
- ARTH 334H - Architectural History II
  Credits: 3. Prereqs., ARTH 201H and ARTH 250L or consent of instructor. Exploration of architectural styles, designs, and choices of the built environment from 1850 to the present. Course Attributes: Hist & Cultural Studies (H)
- ARTH 350 - Contemp Art and Art Criticism
  Credits: 3. Offered autumn and spring. Prereq., ARTH 250L or consent of instructor. Exploration of artists, art works, critics, and theories from 1960 to the present. Course Attributes: Writing Course-Advanced
- ARTH 391 - Special Topics

Credits: 1 TO 6. (R-12) Offered intermittently. Experimental offerings by visiting professors, new courses, and/or one-time investigations of current topics.

- ARTH 400 - Art & Architecture of Egypt
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Egyptian art and architecture from prehistory to the present.
- ARTH 407 - Roman and Early Christian Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Roman art and architecture from prehistory to the Early Christian period.
- ARTH 410 - Medieval Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Medieval art and architecture from 250 to 1400.
- ARTH 425 - Art of the Renaissance
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1450 to 1600. Course Attributes: Writing Course-Approved
- ARTH 428 - Baroque Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1600 to 1700.
- ARTH 430 - 19th Century Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1800 to 1900.
- ARTH 433H - Ancient American Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of ancient American art and architecture from prehistory to 1492. Course Attributes: Hist & Cultural Studies (H)
- ARTH 434 - Latin American Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of Latin American art and architecture from 1492 to the present. Course Attributes: Writing Course-Advanced
- ARTH 436 - The History of Women in Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH250L or consent of instructor. Exploration of women and art from prehistory to the present.
- ARTH 440 - 20th Century Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 201H and ARTH 250L or consent of instructor. Exploration of art and architecture of the 20th century.
- ARTH 450 - Renaissance Theory & Criticism
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of the writings on art from the 14th-16th centuries.
- ARTH 458 - Adv Research in Art History
  Credits: 2 TO 6. (R-9) Offered autumn and spring. Prereqs., a 300-level art history course and consent of instructor. Further exploration of art history topics including student proposals.
- ARTH 459 - Advanced Research Art Crit
  Credits: 3 TO 6. (R-9) Offered intermittently. Prereqs., ARTH 350 and consent of instructor. Further exploration of art criticism topics including student proposals.
- ARTH 464 - African Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of African art and architecture from prehistory to the present.
- ARTH 465 - Spanish Art
  Credits: 3. Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of Spanish art and architecture from prehistory to the present.

- ARTH 491 - Special Topics
  Credits: 1 TO 6. (R-9) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time investigation of current topics.
- ARTH 494 - Sem Art Hist & Crit
  Credits: 3. (R-9) Offered intermittently. Prereq., ARTH 200H or 201H, a 300-level art history course and consent of instructor. Upper-division seminar in varying topics of art history and criticism.
- ARTH 498 - Internship
  Credits: 1 TO 6. (R-12) Offered intermittently. Prereqs., ARTH 250L and/or consent of instructor. Special internship under instructor supervision offering practical experience. Course Attributes: Internships/Practicums
- ARTH 503 - Crit Theories I
  Credits: 3. Prereq., consent of instructor. Seminar on the history of art criticism. Level: Graduate
- ARTH 509 - Crit Theories II
  Credits: 3. Prereq., ARTH 503 or consent of instructor. Continuation of ARTH 503 with an emphasis on contemporary theories and topics. Level: Graduate
- ARTH 550 - Graduate Studies/Art History
  Credits: 2 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instructor. Further research for graduate students in art history. Level: Graduate
- ARTH 597 - Research in Art History
  Credits: 3 TO 9. (R-24) Offered intermittently. Prereq., consent of instructor. Research for graduate students in art history and/or studio. Level: Graduate
- ARTH 698 - Methodologies in Art History
  Credits: 3 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Investigation of the historiography and practitioners of art history. Level: Graduate

Art

Back to Top

- ARTZ 103A - Art for Non-Majors
  Credits: 3. This course introduces students to visual art and culture from both contemporary and historical perspectives through lectures, readings, writing, and studio projects. It explores visual literacy including terminology, techniques, aesthetics, studio practice, and cultural context. Course Attributes: Expressive Arts Course (A)
- ARTZ 105A - Visual Language - Drawing
  Credits: 3. Offered autumn and spring. Introduction to basic drawing skills and concept integration. Studio practice with research in historical and contemporary approaches. Course Attributes: Expressive Arts Course (A)
- ARTZ 106A - Visual Language - 2-D Fndtns
  Credits: 3. Offered autumn and spring. Prereq. or coreq., ARTZ 105A. Introduction to the formal elements and principles of design, color theory, and predominant western and non-western historical styles. Course Attributes: Expressive Arts Course (A)
- ARTZ 108A - Visual Language - 3-D Fndtns
  Credits: 3. Offered autumn and spring. Introduction to the formal elements and principles of design in 3-D. Course Attributes: Expressive Arts Course (A)
- ARTZ 131A - Ceramics for Non-majors
  Credits: 3. Offered intermittently. A general introduction to art using ceramics. Less specialized than Ceramics I for art majors. Credit not allowed toward a B.A., B.F.A., or minor in art. Course Attributes: Expressive Arts Course (A)
- ARTZ 191 - Special Topics
  Credits: 1 TO 6. (R-12) Offered intermittently. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.

- ARTZ 211A - Drawing I

  Credits: 3. Offered autumn and spring. Prereq., ARTZ 105A, ARTZ 106A, and ARTH 200H or 201H. Study of human anatomy through drawing, in-class skills development, homework portfolio, and research in historical and contemporary figuration required. Course Attributes: Expressive Arts Course (A)

- ARTZ 221A - Painting I

  Credits: 3. Offered autumn and spring. Prereq., ARTZ 105A and 106A. Introduction to acrylic and oil painting. Emphasis on color theory, composition, concept development, and research in historical and contemporary strategies. Course Attributes: Expressive Arts Course (A)

- ARTZ 231A - Ceramics I

  Credits: 3. Offered autumn and spring. Prereq., ARTZ 108A. Introduction to clay as a historical and contemporary medium. Emphasis on handbuilding, wheel throwing, and concept development. Course Attributes: Expressive Arts Course (A)

- ARTZ 251A - Sculpture I

  Credits: 3. Offered autumn and spring. Prereq., ARTZ 108A. Introduction to fundamental technical skills and new processes in various materials. Emphasis on formal concerns and concept development. Course Attributes: Expressive Arts Course (A)

- ARTZ 271A - Printmaking I

  Credits: 3. (R-9) Offered autumn and spring. Prereq., ARTZ 105A. Introduction to printmaking techniques. Emphasis on multiples, layering color, and collaboration. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Consideration of historical and contemporary approaches. Course Attributes: Expressive Arts Course (A)

- ARTZ 284A - Photo I-Techs and Processes

  Credits: 3. Offered autumn and spring. Prereq., ARTZ 105A. Introduction to photography. Emphasis on exposure, digital camera basics, composition, digital photography processing, and print finishing techniques. Consideration of historical and contemporary approaches. Course Attributes: Expressive Arts Course (A)

- ARTZ 291 - Special Topics

  Credits: 1 TO 9. (R-12) Offered intermittently. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.

- ARTZ 302A - Elementary School Art

  Credits: 2. Offered autumn and spring. Visual art teaching methods for future elementary school teachers in a variety of media, methods of critique, and curricular components. Course Attributes: Expressive Arts Course (A)

- ARTZ 311 - Drawing II

  Credits: 3. (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 211A. Focus on integrating content and form in drawings and research in historical and contemporary ideas.

- ARTZ 321 - Painting II

  Credits: 3. (R-12) Offered autumn and spring. Prereq., ARTZ 221A and ARTH 250L. Continued development of painting skills and concepts with an emphasis on contemporary ideas and approaches. Topics may include: figuration, place, process, abstraction, and other contemporary themes.

- ARTZ 331 - Ceramics II

  Credits: 3. (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 231A. Continued development of ceramic process with emphasis on handbuilding sculpture and wheel throwing. Focus on integrating content and form through study of historical and contemporary approaches.

- ARTZ 335 - Clay and Glaze

  Credits: 3. Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.

- ARTZ 351 - Sculpture II

  Credits: 3. (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.

- ARTZ 371 - Printmaking II

  Credits: 3. (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.

- ARTZ 384 - Photo II-Theory, Crit, Prctice

  Credits: 3. (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.

- ARTZ 385 - The Art of Digital Photography

  Credits: 3. (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.

- ARTZ 388 - Alternative Process Photog

  Credits: 3. Offered intermittently. Prereq. or coreq., ARTH 250L and ARTZ 284A. Exploration of historic and alternative photography techniques such as cyanotype, pinhole, and wet-plate. Focus on digital negative, historic optics, and varied approaches to format, presentation, and research in historical and contemporary approaches.

- ARTZ 391 - Special Topics

  Credits: 1 TO 9. (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.

- ARTZ 394A - Seminar- Environmental Drawing

  Credits: 3. Offered intermittently. Seminar designed for the Wilderness and Civilization program based on WCP curriculum. Investigation of individual ideas through a variety of media. Course Attributes: Expressive Arts Course (A)

- ARTZ 398 - Internship

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience. Course Attributes: Internships/Practicums

- ARTZ 402 - Teaching Art I-- K-12

  Credits: 3. Offered autumn. Prereqs., ARTH 250L and junior standing. Preparation for art specialists including historical and contemporary trends in curriculum development, teaching procedures, child growth and development in art, resources, evaluation, democratic teaching practices, and directed teaching experiences in school setting. Course Attributes: Service Learning

- ARTZ 403 - Teaching Art II-- K-12

  Credits: 3. Offered spring. Prereq., ARTZ 402. Continuation and practical application of ARTZ 402.

- ARTZ 410 - Advanced Research- Drawing

  Credits: 3. (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.

- ARTZ 420 - Advanced Research- Painting

  Credits: 3. (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.

- ARTZ 430 - Advanced Research- Ceramics

  Credits: 3. (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.

- ARTZ 451 - Advanced Research- Sculpture

Credits: 3. (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.

- ARTZ 470 - Advanced Research- Printmaking

  Credits: 3. (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.

- ARTZ 486 - Advanced Research- Photography

  Credits: 3. (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.

- ARTZ 491 - Special Topics

  Credits: 1 TO 6. (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.

- ARTZ 492 - Independent Study

  Credits: 2 TO 6. (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.

- ARTZ 494 - Seminar- Professional Prctices

  Credits: 3. Offered autumn. Prereqs., senior status and prereq. or coreq., ARTH 250L. Required of all graduating B.F.A. students. Introduction to professional practices and standards in the visual arts, including: presentation, portfolio development, career and exhibition opportunities, arts advocacy, and graduate school application.

- ARTZ 498 - Internship

  Credits: 1 TO 12. (R-12) Offered intermittently. Prereqs., ARTH 250L and consent of instructor. Special internship under instructor supervision offering practical experience. Course Attributes: Internships/Practicums

- ARTZ 499 - Senior Thesis/Capstone

  Credits: 3. Offered spring. Prereqs., senior status, ARTZ 494, and successful passage of B.F.A. review. Required of B.F.A. students. Focus on completion of artwork and preparation for required spring B.F.A. exhibition. Further exploration of professional practices topics and career opportunities.

- ARTZ 501 - Graduate Critique Seminar

  Credits: 2. (R-4) Offered autumn and spring. Prereqs., graduate student status and consent of instructor. Weekly meetings to critique graduate student work. Level: Graduate

- ARTZ 504 - Pre-Candidacy

  Credits: 1. Offered autumn and spring. Prereqs., graduate student status and consent of instructor. Taken concurrently with 500-level Graduate Research/Studio Processes. Emphasis on one-on-one instruction with faculty in preparation for review prior to thesis work. Level: Graduate

- ARTZ 505 - Grad Studio Res: Art

  Credits: 1 TO 3. (R-24) Offered spring. Prereqs., graduate student status and consent of instructor. Regular meetings with faculty to discuss development of individual work. Level: Graduate

- ARTZ 506 - Graduate Pedagogy

  Credits: 3. Offered autumn. Prereqs., first semester graduate student status and consent of instructor. Focus on current pedagogical practices in college-level art education. Emphasis on: syllabus, teaching philosophy, assignments preparation, public-speaking skills development, TA application and course shadowing. Level: Graduate

- ARTZ 507 - Beyond Art School

  Credits: 2. Prereqs., graduate student status and consent of instructor. Introduction to professional practices and standards in the visual arts. Emphasis on: portfolio, resume, and web development, exhibition opportunities, grant writing, and artist residencies. Level: Graduate

- ARTZ 508 - Expanded Studio Practice

  Credits: 3 TO 6. Offered autumn and spring. Prereqs., graduate student status and consent of instructor. Studio-based course with emphasis on collaborative practices across media. May include: topic-based studio assignments, thematic inquiry, responses to readings, and/or specific studio processes. Level: Graduate

- ARTZ 511 - Grad Res/Studio Pr:Drawing
  Credits: 2 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instructor. Graduate research in drawing, based on student's direction. Level: Graduate
- ARTZ 521 - Grad Res/Studio Pr: Painting
  Credits: 3 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instructor. Advanced research in painting. Level: Graduate
- ARTZ 531 - Grad Res/Studio Pr: Ceramics
  Credits: 3 TO 6. (R-24) Offered autumn and spring. Prereq. consent of instructor. Advanced research in ceramics. Level: Graduate
- ARTZ 551 - Grad Res/Studio Pr: Sculp
  Credits: 2 TO 6. (R-24) Offered autumn and spring. Prereq., consent of instructor. Advanced research in sculpture. Level: Graduate
- ARTZ 571 - Grad Res/Studio Pr: Print
  Credits: 2 TO 12. (R-24) Offered autumn and spring. Prereq., consent of instr. Advanced research in printmaking. Level: Graduate
- ARTZ 594 - Seminar
  Credits: 1 TO 6. (R-6) Offered intermittently. Level: Graduate
- ARTZ 595 - Special Topics
  Credits: 1 TO 9. (R-12) Offered intermittently. Prereqs., graduate student status and consent of instructor. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics. Level: Graduate
- ARTZ 596 - Independent Study
  Credits: 2 TO 6. (R-18) Prereq., consent of instructor. Offered intermittently. Level: Graduate
  Course Attributes: Service Learning/Volunteer
- ARTZ 597 - Research in Art History
  Credits: 2 TO 6. (R-18) Offered intermittently. Prereq., consent of instr. Level: Graduate
- ARTZ 598 - Internship
  Credits: 2 TO 6. (R-12) Offered intermittently. Prereqs., graduate student status and Fine Arts Major and consent of instructor. Special internship under instructor supervision offering practical experience. Level: Graduate Course Attributes: Internships/Practicums
- ARTZ 697 - Thesis Paper
  Credits: 1 TO 3. Offered intermittently. Prereqs., ARTZ 699 and consent of instructor. One-on-one instruction with thesis committee chair. Level: Graduate
- ARTZ 699 - Thesis Exhibition
  Credits: 1 TO 12. (R-12) Offered intermittently. Prereqs., graduate student status and consent of instructor. Thesis exhibition preparation. Level: Graduate

Studio I Courses

Rule: All Courses Reqired

	Course	Credits
	ARTZ 211A - Drawing I Offered autumn and spring. Prereq., ARTZ 105A, ARTZ 106A, and ARTH 200H or 201H. Study of human anatomy through drawing, in-class skills development, homework portfolio, and research in historical and contemporary figuration required.	3 Credits
	ARTZ 221A - Painting I Offered autumn and spring. Prereq., ARTZ 105A and 106A. Introduction to acrylic and oil painting. Emphasis on color theory, composition, concept development, and research in historical and contemporary strategies.	3 Credits
	ARTZ 231A - Ceramics I Offered autumn and spring. Prereq., ARTZ 108A. Introduction to clay as a historical and contemporary medium. Emphasis on handbuilding, wheel throwing, and concept development.	3 Credits
	ARTZ 251A - Sculpture I Offered autumn and spring. Prereq., ARTZ 108A. Introduction to fundamental technical skills and new processes in various materials. Emphasis on formal concerns and concept development.	3 Credits
	ARTZ 271A - Printmaking I (R-9) Offered autumn and spring. Prereq., ARTZ 105A. Introduction to printmaking techniques. Emphasis on multiples, layering color, and collaboration. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Consideration of historical and contemporary approaches.	3 Credits
	ARTZ 284A - Photo I-Techs and Processes Offered autumn and spring. Prereq., ARTZ 105A. Introduction to photography. Emphasis on exposure, digital camera basics, composition, digital photography processing, and print finishing techniques. Consideration of historical and contemporary approaches.	3 Credits
Minimum Required Grade: C		18 Total Credits Required

Begining Art History And Criticism

Rule: All Courses Required

	Course	Credits
	ARTH 200H - Art of World Civilization I Offered autumn. Survey of the history of visual art from prehistory to 1400.	3 Credits
	ARTH 201H - Art of World Civilization II Offered spring. Survey of the history of visual art from 1400 to the present.	3 Credits
	ARTH 250L - Introduction to Art Criticism Offered autumn and spring. Prereqs., ARTH 200H, ARTH 201H. Study of the description, interpretation, and evaluation of visual art as practiced in art criticism.	3 Credits
Minimum Required Grade: C		9 Total Credits Required

Upper Division Studio Courses

Rule: 12 Credits of Upper Division (300-400 Level) Courses Are Required

	Course	Credits
	ARTZ 311 - Drawing II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 211A. Focus on integrating content and form in drawings and research in historical and contemporary ideas.	3 Credits
	ARTZ 321 - Painting II (R-12) Offered autumn and spring. Prereq., ARTZ 221A and ARTH 250L. Continued development of painting skills and concepts with an emphasis on contemporary ideas and approaches. Topics may include: figuration, place, process, abstraction, and other contemporary themes.	3 Credits
	ARTZ 331 - Ceramics II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 231A. Continued development of ceramic process with emphasis on handbuilding sculpture and wheel throwing. Focus on integrating content and form through study of historical and contemporary approaches.	3 Credits
	ARTZ 335 - Clay and Glaze Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.	3 Credits
	ARTZ 351 - Sculpture II (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.	3 Credits

	ARTZ 371 - Printmaking II (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 372 - Printmaking II- Lithography (R-12) Offered autumn and spring. Prereq., ART 233A. Continued work in various printmaking media.	3 Credits
	ARTZ 384 - Photo II-Theory, Crit, Prctice (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.	3 Credits
	ARTZ 385 - The Art of Digital Photography (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.	3 Credits
	ARTZ 391 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.	1 To 9 Credits
	ARTZ 398 - Internship (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience.	1 To 12 Credits
	ARTZ 410 - Advanced Research- Drawing (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.	3 Credits
	ARTZ 420 - Advanced Research- Painting (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 430 - Advanced Research- Ceramics (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.	3 Credits
	ARTZ 451 - Advanced Research- Sculpture (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.	3 Credits

	ARTZ 470 - Advanced Research- Printmaking (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.	3 Credits
	ARTZ 486 - Advanced Research- Photography (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 491 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.	1 To 6 Credits
	ARTZ 492 - Independent Study (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.	2 To 6 Credits
	ARTZ 494 - Seminar- Professional Prctices Offered autumn. Prereqs., senior status and prereq. or coreq., ARTH 250L. Required of all graduating B.F.A. students. Introduction to professional practices and standards in the visual arts, including: presentation, portfolio development, career and exhibition opportunities, arts advocacy, and graduate school application.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Upper Division Art History

Rule: 6 credits in Upper Division (300-400 Level) Courses are Required

	Course	Credits
	ARTH 333H - Architectural History I Offered autumn. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of architectural styles, designs, and choices of the built environment from prehistory to the modern age.	3 Credits
	ARTH 391 - Special Topics (R-12) Offered intermittently. Experimental offerings by visiting professors, new courses, and/or one-time investigations of current topics.	1 To 6 Credits
	ARTH 407 - Roman and Early Christian Art Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Roman art and architecture from prehistory to the Early Christian period.	3 Credits
	ARTH 425 - Art of the Renaissance Offered intermittently. Prereqs., ARTH 200H or 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1450 to 1600.	3 Credits

	ARTH 430 - 19th Century Art Offered intermittently. Prereqs., ARTH 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1800 to 1900.	3 Credits
	ARTH 433H - Acient American Art Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of ancient American art and architecture from prehistory to 1492.	3 Credits
	ARTH 434H - Latin American Art Offered intermittently. Prereq., ARTH 200H or 201H or consent of instructor. Same as NAS 368H. Exploration of themes in the development of Latin American art from the colonial period to the present including Renaissance ideals in the "New World", syncretism of European, African, and indigenous roots, the Black Legend, and the advent of such movements as Academism, Modernism, Social Realism, Magic Realism and Post-Modernism.	3 Credits

	ARTZ 335 - Clay and Glaze Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.	3 Credits
	ARTZ 351 - Sculpture II (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.	3 Credits
	ARTZ 371 - Printmaking II (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 372 - Printmaking II- Lithography (R-12) Offered autumn and spring. Prereq., ART 233A. Continued work in various printmaking media.	3 Credits

	ARTZ 384 - Photo II-Theory, Crit, Prctice (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.	3 Credits
	ARTZ 385 - The Art of Digital Photography (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.	3 Credits
	ARTZ 391 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.	1 To 9 Credits
	ARTZ 398 - Internship (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience.	1 To 12 Credits
	ARTZ 410 - Advanced Research- Drawing (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.	3 Credits
	ARTZ 420 - Advanced Research- Painting (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 430 - Advanced Research- Ceramics (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.	3 Credits
	ARTZ 451 - Advanced Research- Sculpture (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.	3 Credits
	ARTZ 470 - Advanced Research- Printmaking (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.	3 Credits
	ARTZ 486 - Advanced Research- Photography (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.	3 Credits

	ARTZ 491 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.	1 To 6 Credits
	ARTZ 492 - Independent Study (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.	2 To 6 Credits
	ARTZ 498 - Internship (R-12) Offered intermittently. Prereqs., ARTH 250L and consent of instructor. Special internship under instructor supervision offering practical experience.	1 To 12 Credits
Minimum Required Grade: C		12 Total Credits Required

Upper Division Studio Courses

Rule: 12 Credits of Upper Division (300-400 Level) Courses Outside Area Of Concentration Are Required

	Course	Credits
	ARTZ 311 - Drawing II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 211A. Focus on integrating content and form in drawings and research in historical and contemporary ideas.	3 Credits
	ARTZ 321 - Painting II (R-12) Offered autumn and spring. Prereq., ARTZ 221A and ARTH 250L. Continued development of painting skills and concepts with an emphasis on contemporary ideas and approaches. Topics may include: figuration, place, process, abstraction, and other contemporary themes.	3 Credits
	ARTZ 331 - Ceramics II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 231A. Continued development of ceramic process with emphasis on handbuilding sculpture and wheel throwing. Focus on integrating content and form through study of historical and contemporary approaches.	3 Credits
	ARTZ 335 - Clay and Glaze Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.	3 Credits
	ARTZ 351 - Sculpture II (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.	3 Credits

	ARTZ 371 - Printmaking II (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 372 - Printmaking II- Lithography (R-12) Offered autumn and spring. Prereq., ART 233A. Continued work in various printmaking media.	3 Credits
	ARTZ 384 - Photo II-Theory, Crit, Prctice (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.	3 Credits
	ARTZ 385 - The Art of Digital Photography (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.	3 Credits
	ARTZ 388 - Alternative Process Photog Offered intermittently. Prereq. or coreq., ARTH 250L and ARTZ 284A. Exploration of historic and alternative photography techniques such as cyanotype, pinhole, and wet-plate. Focus on digital negative, historic optics, and varied approaches to format, presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 391 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.	1 To 9 Credits
	ARTZ 398 - Internship (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience.	1 To 12 Credits
	ARTZ 410 - Advanced Research- Drawing (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.	3 Credits
	ARTZ 420 - Advanced Research- Painting (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.	3 Credits

	ARTZ 430 - Advanced Research- Ceramics (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.	3 Credits
	ARTZ 451 - Advanced Research- Sculpture (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.	3 Credits
	ARTZ 470 - Advanced Research- Printmaking (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.	3 Credits
	ARTZ 484 - Photo III- Studio Projects (R-9) Offered autumn or spring. Prereqs., ARTZ 384 and 385. Concentrated exploration of techniques, portfolio development, and research in historical and contemporary approaches.	3 Credits
	ARTZ 486 - Advanced Research- Photography (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 491 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.	1 To 6 Credits
	ARTZ 492 - Independent Study (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.	2 To 6 Credits
	ARTZ 498 - Internship (R-12) Offered intermittently. Prereqs., ARTH 250L and consent of instructor. Special internship under instructor supervision offering practical experience.	1 To 12 Credits
Minimum Required Grade: C		12 Total Credits Required

Upper Division Art History

Rule: 6 Credits in Upper Division (300-400 Level) Courses are Required

	Course	Credits
	ARTH 333H - Architectural History I Offered autumn. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of architectural styles, designs, and choices of the built environment from prehistory to the modern age.	3 Credits
	ARTH 391 - Special Topics (R-12) Offered intermittently. Experimental offerings by visiting professors, new courses, and/or one-time investigations of current topics.	1 To 6 Credits

	ARTH 407 - Roman and Early Christian Art Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Roman art and architecture from prehistory to the Early Christian period.	3 Credits
	ARTH 425 - Art of the Renaissance Offered intermittently. Prereqs., ARTH 200H or 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1450 to 1600.	3 Credits
	ARTH 430 - 19th Century Art Offered intermittently. Prereqs., ARTH 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1800 to 1900.	3 Credits
	ARTH 433H - Acient American Art Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of ancient American art and architecture from prehistory to 1492.	3 Credits
	ARTH 434H - Latin American Art Offered intermittently. Prereq., ARTH 200H or 201H or consent of instructor. Same as NAS 368H. Exploration of themes in the development of Latin American art from the colonial period to the present including Renaissance ideals in the "New World", syncretism of European, African, and indigenous roots, the Black Legend, and the advent of such movements as Academism, Modernism, Social Realism, Magic Realism and Post-Modernism.	3 Credits

Upper Division Studio Courses

Rule: 12 Credits of Upper Division (300-400 Level) Courses Are Required

	Course	Credits

	ARTZ 311 - Drawing II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 211A. Focus on integrating content and form in drawings and research in historical and contemporary ideas.	3 Credits
	ARTZ 321 - Painting II (R-12) Offered autumn and spring. Prereq., ARTZ 221A and ARTH 250L. Continued development of painting skills and concepts with an emphasis on contemporary ideas and approaches. Topics may include: figuration, place, process, abstraction, and other contemporary themes.	3 Credits
	ARTZ 331 - Ceramics II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 231A. Continued development of ceramic process with emphasis on handbuilding sculpture and wheel throwing. Focus on integrating content and form through study of historical and contemporary approaches.	3 Credits
	ARTZ 335 - Clay and Glaze Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.	3 Credits
	ARTZ 351 - Sculpture II (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.	3 Credits
	ARTZ 371 - Printmaking II (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 372 - Printmaking II- Lithography (R-12) Offered autumn and spring. Prereq., ART 233A. Continued work in various printmaking media.	3 Credits
	ARTZ 384 - Photo II-Theory, Crit, Prctice (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.	3 Credits
	ARTZ 385 - The Art of Digital Photography (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.	3 Credits

	ARTZ 391 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.	1 To 9 Credits
	ARTZ 398 - Internship (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience.	1 To 12 Credits
	ARTZ 410 - Advanced Research- Drawing (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.	3 Credits
	ARTZ 420 - Advanced Research- Painting (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 430 - Advanced Research- Ceramics (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.	3 Credits
	ARTZ 451 - Advanced Research- Sculpture (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.	3 Credits
	ARTZ 470 - Advanced Research- Printmaking (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.	3 Credits
	ARTZ 486 - Advanced Research- Photography (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 491 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.	1 To 6 Credits
	ARTZ 492 - Independent Study (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.	2 To 6 Credits
	ARTZ 494 - Seminar- Professional Prctices Offered autumn. Prereqs., senior status and prereq. or coreq., ARTH 250L. Required of all graduating B.F.A. students. Introduction to professional practices and standards in the visual arts, including: presentation, portfolio development, career and exhibition opportunities, arts advocacy, and graduate school application.	3 Credits

Minimum Required Grade: C	12 Total Credits Required

Upper Division Art History

Rule: 6 Credits in Upper Division (300-400 Level) Courses are Required

	Course	Credits
	ARTH 333H - Architectural History I Offered autumn. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of architectural styles, designs, and choices of the built environment from prehistory to the modern age.	3 Credits
	ARTH 391 - Special Topics (R-12) Offered intermittently. Experimental offerings by visiting professors, new courses, and/or one-time investigations of current topics.	1 To 6 Credits
	ARTH 407 - Roman and Early Christian Art Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Roman art and architecture from prehistory to the Early Christian period.	3 Credits

	Course	Credits

	ARTZ 311 - Drawing II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 211A. Focus on integrating content and form in drawings and research in historical and contemporary ideas.	3 Credits
	ARTZ 321 - Painting II (R-12) Offered autumn and spring. Prereq., ARTZ 221A and ARTH 250L. Continued development of painting skills and concepts with an emphasis on contemporary ideas and approaches. Topics may include: figuration, place, process, abstraction, and other contemporary themes.	3 Credits
	ARTZ 331 - Ceramics II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 231A. Continued development of ceramic process with emphasis on handbuilding sculpture and wheel throwing. Focus on integrating content and form through study of historical and contemporary approaches.	3 Credits
	ARTZ 335 - Clay and Glaze Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.	3 Credits
	ARTZ 351 - Sculpture II (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.	3 Credits
	ARTZ 371 - Printmaking II (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 372 - Printmaking II- Lithography (R-12) Offered autumn and spring. Prereq., ART 233A. Continued work in various printmaking media.	3 Credits
	ARTZ 384 - Photo II-Theory, Crit, Prctice (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.	3 Credits
	ARTZ 385 - The Art of Digital Photography (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.	3 Credits

	ARTZ 391 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.	1 To 9 Credits
	ARTZ 398 - Internship (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience.	1 To 12 Credits
	ARTZ 410 - Advanced Research- Drawing (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.	3 Credits
	ARTZ 420 - Advanced Research- Painting (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 430 - Advanced Research- Ceramics (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.	3 Credits
	ARTZ 451 - Advanced Research- Sculpture (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.	3 Credits
	ARTZ 470 - Advanced Research- Printmaking (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.	3 Credits
	ARTZ 484 - Photo III- Studio Projects (R-9) Offered autumn or spring. Prereqs., ARTZ 384 and 385. Concentrated exploration of techniques, portfolio development, and research in historical and contemporary approaches.	3 Credits
	ARTZ 486 - Advanced Research- Photography (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 491 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.	1 To 6 Credits
	ARTZ 492 - Independent Study (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.	2 To 6 Credits

	ARTZ 498 - Internship (R-12) Offered intermittently. Prereqs., ARTH 250L and consent of instructor. Special internship under instructor supervision offering practical experience.	1 To 12 Credits
Minimum Required Grade: C		12 Total Credits Required

Upper Division Studio Courses

Rule: 12 Credits of Upper Division (300-400 Level) Courses Outside Area Of Concentration Are Required

	Course	Credits
	ARTZ 311 - Drawing II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 211A. Focus on integrating content and form in drawings and research in historical and contemporary ideas.	3 Credits
	ARTZ 321 - Painting II (R-12) Offered autumn and spring. Prereq., ARTZ 221A and ARTH 250L. Continued development of painting skills and concepts with an emphasis on contemporary ideas and approaches. Topics may include: figuration, place, process, abstraction, and other contemporary themes.	3 Credits
	ARTZ 331 - Ceramics II (R-12) Offered autumn and spring. Prereq., ARTH 250L and ARTZ 231A. Continued development of ceramic process with emphasis on handbuilding sculpture and wheel throwing. Focus on integrating content and form through study of historical and contemporary approaches.	3 Credits
	ARTZ 335 - Clay and Glaze Offered autumn. Prereq., ARTZ 250L and ARTZ 231A. In-depth study of the physical and chemical properties of clays and glazes. Hands-on testing of clay and glaze formulas and introduction to kiln firing.	3 Credits
	ARTZ 351 - Sculpture II (R-12) Offered autumn and spring. Prereqs or coreqs., ARTH 250L and ARTZ 251A. Continued development of sculptural processes. Emphasis on clear sculptural responses to material-based and topic-based assignments and contemporary approaches.	3 Credits
	ARTZ 371 - Printmaking II (R-12) Offered autumn and spring. Prereq., ARTZ 271A and prereq. or coreq., ARTH 250L. Continued development of printmaking processes. Emphasis on integration of content. Topics may include: relief, intaglio, lithography, screenprinting, artist books, mixed media, or photo-processes. Focus on layering of color, increased scale, styles of format and presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 372 - Printmaking II- Lithography (R-12) Offered autumn and spring. Prereq., ART 233A. Continued work in various printmaking media.	3 Credits

	ARTZ 384 - Photo II-Theory, Crit, Prctice (R-12) Offered autumn and spring. Prereqs., ARTH 250L and prereq. or coreq. ARTZ 284A. Further exploration of photography. Emphasis on traditional film and darkroom-based processes, expansion of technical knowledge in small and medium format cameras, film and chemical process, presentation options, and research in historical and contemporary approaches.	3 Credits
	ARTZ 385 - The Art of Digital Photography (R-12) Offered autumn or spring. Prereq. or co-req., ARTH 250L and ARTZ 284A. Further exploration of photography. Emphasis on effective use of color, advanced editing techniques, studio and strobe lighting, varied approaches to format and presentation, introduction to video capture and editing, and research in historical and contemporary approaches.	3 Credits
	ARTZ 388 - Alternative Process Photog Offered intermittently. Prereq. or coreq., ARTH 250L and ARTZ 284A. Exploration of historic and alternative photography techniques such as cyanotype, pinhole, and wet-plate. Focus on digital negative, historic optics, and varied approaches to format, presentation, and research in historical and contemporary approaches.	3 Credits
	ARTZ 391 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, experimental offerings of new courses, and/or one-time offerings of current topics.	1 To 9 Credits
	ARTZ 398 - Internship (R-12) Offered autumn and spring. Prereqs., ARTH 250L and/or consent of instructor. Special internships under instructor supervision offering practical experience.	1 To 12 Credits
	ARTZ 410 - Advanced Research- Drawing (R-9) Offered intermitently. Prereq. ARTH 350 and ARTZ 211A or consent of instructor. Further exploration of drawing-related studio practice including installation, performance, and research in historical and contemporary approaches, including student proposals.	3 Credits
	ARTZ 420 - Advanced Research- Painting (R-9) Offered intermittently. Prereqs. or co-reqs., ARTH 350 and ARTZ 321 or consent of instructor. Further exploration of painting-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 430 - Advanced Research- Ceramics (R-9) Offered intermittently. Further exploration of contemporary ceramics including student proposals. Specific conceptual and technical aspects in individual and group critiques.	3 Credits
	ARTZ 451 - Advanced Research- Sculpture (R-9) Offered intermittingly. Prereq., ARTZ 351 or consent of instructor. Further exploration of sculpture-related studio practice including technical and student proposals.	3 Credits
	ARTZ 470 - Advanced Research- Printmaking (R-9) Offered intermittently. Prereqs., ARTH 250L and ARTZ 271A or consent of instructor. Further exploration of printmaking techniques including student proposals.	3 Credits

	ARTZ 486 - Advanced Research- Photography (R-9) Offered intermittently. Prereqs., ARTZ 384 or 385 or 388 or consent of instructor. Further exploration of photography-related studio practice including technical and conceptual student proposals.	3 Credits
	ARTZ 491 - Special Topics (R-12) Offered intermittently. Prereq., ARTH 250L. Experimental offerings by visiting professors, new courses, and/or one-time offerings of current topics.	1 To 6 Credits
	ARTZ 492 - Independent Study (R-12) Offered intermittently. Prereqs., ARTH 250L or consent of instructor. Further exploration of studio practice including technical and conceptual student proposals.	2 To 6 Credits
	ARTZ 498 - Internship (R-12) Offered intermittently. Prereqs., ARTH 250L and consent of instructor. Special internship under instructor supervision offering practical experience.	1 To 12 Credits
Minimum Required Grade: C		12 Total Credits Required

Upper Division Art History

Rule: 6 Credits in Upper Division (300-400 Level) Courses are Required

	Course	Credits
	ARTH 333H - Architectural History I Offered autumn. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of architectural styles, designs, and choices of the built environment from prehistory to the modern age.	3 Credits
	ARTH 391 - Special Topics (R-12) Offered intermittently. Experimental offerings by visiting professors, new courses, and/or one-time investigations of current topics.	1 To 6 Credits
	ARTH 407 - Roman and Early Christian Art Offered intermittently. Prereqs., ARTH 200H and ARTH 250L or consent of instructor. Exploration of Roman art and architecture from prehistory to the Early Christian period.	3 Credits
	ARTH 425 - Art of the Renaissance Offered intermittently. Prereqs., ARTH 200H or 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1450 to 1600.	3 Credits
	ARTH 430 - 19th Century Art Offered intermittently. Prereqs., ARTH 201H and ARTH 250L or consent of instructor. Exploration of European art and architecture from 1800 to 1900.	3 Credits
	ARTH 433H - Acient American Art Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of ancient American art and architecture from prehistory to 1492.	3 Credits

	ARTH 434H - Latin American Art Offered intermittently. Prereq., ARTH 200H or 201H or consent of instructor. Same as NAS 368H. Exploration of themes in the development of Latin American art from the colonial period to the present including Renaissance ideals in the "New World", syncretism of European, African, and indigenous roots, the Black Legend, and the advent of such movements as Academism, Modernism, Social Realism, Magic Realism and Post-Modernism.	3 Credits

See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major or minor GPA of 2.75 is required to be eligible for student teaching.

School of Business Administration

Christopher Shook, Dean

Terri L. Herron, Associate Dean

Homepage:http://www.business.umt.edu/

The School of Business Administration, founded in 1918, is the largest professional school at the University. All programs are accredited by AACSB International–The Association to Advance Collegiate Schools of Business, and accounting programs also hold separate AACSB accreditation.

Mission

The University of Montana's School of Business Administration enhances lives and benefits society by providing a world-class business education in a supportive, collegial environment. We accomplish this mission by acting on our shared core values of creating significant experiences, building relationships, teaching and researching relevant topics, behaving ethically, and inspiring individuals to thrive.

The goal of the School of Business Administration's programs is to provide a broad foundation in business practice and theory, supplemented by deep expertise within one or more specific business disciplines through majors and certificates. The complexity of contemporary society has increased the need for responsible, ethical leadership in organizations with local and global reach. A professional business education combined with solid grounding in the liberal arts and sciences prepares men and women to meet difficult challenges and to contribute to society in meaningful ways. School of Business Administration graduates work in business, nonprofit, and government sectors all over the world.

Students may pursue programs of study leading to the B.S. in Business Administration with a major in any of the following areas: accounting, finance, international business, management, management information systems, and marketing. Students pursuing other undergraduate degrees can complete a minor in Business Administration. The School of Business Administration also offers various certificates to both business majors and non-business major.

High School Preparation:

High school students who are planning to major or minor in business administration at the University of Montana-Missoula should take their school's college preparatory curriculum. Additional courses to improve quantitative, writing, verbal communication, analytical, and computer skills will be beneficial. Students should take as much mathematics as possible, including two years of algebra.

Credit/No Credit Option:

Most business administration courses are offered for traditional letter grade only.

All courses required for the major, the minor, certificates, and all general education courses must be taken for a traditional letter grade. Business courses taken as electives may be taken on a credit/no credit basis only if not identified as traditional letter grade only in the registration system and if approved by the instructor and the department chair. For additional information see the Academic Policies and Procedures section of the catalog.

Graduate Programs

Opportunity for further study at the graduate level is offered through programs leading to the degrees of Master of Accountancy (M-Acct.), Master of Science in Business Analytics (M.S.-B.A), Master of Business Administration (M.B.A.), joint J.D./M.B.A., joint M.B.A./D.P.T. and joint M.B.A./Pharm.D. The graduate programs are suited to all students regardless of undergraduate training. Further details may be obtained from the Graduate School or by specific inquiries directed to: Director of M.B.A. Program, School of Business Administration, Director of M.S.-B.A. Program, School of Business Administration,or Director of M-Acct. Program, School of Business Administration.

Foundation Program for M.B.A and M-Acct Programs

The M.B.A. and M-Acct. programs are open to graduates of non-business undergraduate programs (prerequisites strictly enforced). Students in the arts and sciences or other professional schools are encouraged to consider the M.B.A. and M-Acct programs. Completion of all of the foundation courses listed below (or equivalents) prior to starting the program will reduce the time required for the M.B.A. or M-Acct. at the University of Montana-Missoula by one year; however, many of the courses listed below have prerequisites that are strictly enforced (including, without limitation, a general prerequisite that all upper-division business courses require the completion of each lower-core business course with a grade of C or better).

- ACTG 201 Principles of Financial Accounting
- ACTG 202 Principles of Managerial Accounting
- BGEN 361 Principles of Business Law
- BFIN 322 Business Finance
- BMIS 270 MIS Foundations for Business
- BMGT 322 Operations Management
- BMGT 340 Management and Organizational Behavior
- BMKT 325 Principles of Marketing
- ECNS 201S Principles of Microeconomics
- STAT 216 Introduction to Statistics

Nine of the 10 courses in the Foundation Program are included in the undergraduate Minor in Business Administration, which is open to any undergraduate student. The School of Business Administration also offers a series of five graduate-level courses that can substitute for the above undergraduate courses. These courses are only open to students who have already earned an undergraduate degree. For more information, please visit the University of Montana School of Business Administration M.B.A website (http://www.business.umt.edu/programs/graduate/mba-program/default.php) or M-Acct website (http://www.business.umt.edu/programs/graduate/macct-program/default.php).

Foundation Program for M.S.-B.A. Program

The M.S.-B.A. program is open to graduates of non-business undergraduate programs. The program can be completed in one year for students who have completed the following foundation courses, or the equivalent:

- BMIS 326 Introduction to Data Analytics
- BMKT 560 Marketing & Stats (or STAT 216 Introduction to Statistics and BMKT 325 Marketing Principles)
- STAT 451 Statistical Methods I
- Business analytics internship or work experience

For more information, please visit the University of Montana School of Business Administration M.S.-B.A. website (http://www.business.umt.edu/programs/graduate/msba-program/default.php).

Management and Marketing Department

Klaus Uhlenbruck, Chair

The Department of Management and Marketing offers three majors within the Bachelor of Science in Business Administration: International Business, Management, and Marketing.

Business: General

Back to Top

- BGEN 220E - Business Ethics and Social Responsibility
  Credits: 3. Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders. Course Attributes: Ethical & Human Values Course
- BGEN 360 - International Business
  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business. Analysis of business in diverse parts of the globe. Examines the impact of socio-economic, political, legal, educational, and cultural factors on management.
- BGEN 492 - Independent Study
  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- BGEN 499 - Strategic Management
  Credits: 3. Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion. Course Attributes: Writing Course-Advanced

Business: Management

Back to Top

- BMGT 191 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- BMGT 192 - Independent Study

Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- BMGT 205 - Professional Business Comm

  Credits: 3. Offered intermittently. Prereq., WRIT 101, COMX 111A. Focuses on understanding the scope and nature of business communication and becoming more fluent and effective writers and speakers in a variety of business situations. Students practice choosing and applying the best communication vehicle and strategy for multiple purposes, audiences, and situations. The course asks students to spend significant time on their own professional writing and presentation skills, and will also survey various contemporary issues in business communication. Course Attributes: Writing Course-Intermediate

- BMGT 275 - Venue Management

  Credits: 3. Offered Autumn. Open to non-business majors. This course is designed to provide some of the basic tools for better understanding the processes involved in the conceptualization, development and production of live-events and successfully managing various types of venues.

- BMGT 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMGT 292 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- BMGT 298 - Management Internship

  Credits: 1 TO 3. (R-3) Offered every term. Extended classroom experience which provides practical application of classroom learning during placements within the business community. The student must complete a learning agreement with a faculty member, relating the placement opportunity to his or her field of study. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums Internship graduation limit 6

- BMGT 340 - Mgmt & Organization Behavior

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business. An intensive examination of the fundamentals of management and organization supported by the application of behavioral science principles to the management of people in organizations.

- BMGT 375 - Business of Film & Television

  Credits: 3. Offered intermittently. Open to non-business majors. The purpose of this class is to gain a basic understanding of the business elements of film and television production. This is done through a semester long project and lectures by visiting television and film professionals.

- BMGT 391 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMGT 392 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq. junior standing in Business and consent of instr.

- BMGT 394 - Seminar/Workshop

  Credits: 1 TO 3. (R-3) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- BMGT 401 - Event Management

  Credits: 3. Offered autumn. Prereq., junior standing; open to non-business majors. Students are introduced to skills that are necessary for managing entertainment events. Topics include: market research; artist research; negotiating events; producing live events; and working with community and non-profit organizations. Students will develop and participate in several live events throughout the semester.

- BMGT 402 - Prin of Entertainment Mgmt I

  Credits: 3. Offered autumn and spring. Prereq., junior standing and consent of instructor; open to non-business majors. Students are introduced to the fundamental aspects of the entertainment business. Topics include: artist development and management; productions; promotions; and venue management and marketing. Students will produce an artist development plan.

- BMGT 403 - Prin of Entertainment Mgmt II

  Credits: 3. Offered spring. Prereq., junior standing; open to non-business majors. Topics include: tour development and marketing; agency relations and responsibilities; and new forms of entertainment media and distribution. Students will produce an event management plan.

- BMGT 410 - Sustainable Business Practices

  Credits: 3. Offered autumn. Prereq., junior standing. This course explores how changing perceptions around environmental and social issues influence current business practices. Through this exploration, we discuss the impact these influences have on business and how adept firms can gain competitive advantage through embracing and integrating them into their core strategies.

- BMGT 420 - Leadership and Motivation

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business and BMGT 340. Study of fundamental concepts, theories, and models of leadership and motivation. Selected topics include: trait and behavioral theories of leadership, charismatic and transformational leadership, power and influence, emotions and justice perceptions in motivation, expectancy and equity theories. Course Attributes: Service Learning/Volunteer Service Learning

- BMGT 444 - Management Communications

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business; BMGT 340. This course focuses on four modules managing external and internal communications: Communication of Innovations; Communications with Company Leadership; PR Crisis Communications; and Business Negotiations. Course projects include team research, team oral presentations, individual written executive reports, case studies and analysis, and competitive negotiations.

- BMGT 448 - Entrepreneurship

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business, BMGT 340, BMKT 325; prereq or coreq., BFIN 322. Focuses on starting and managing a growing business. Topics include recognizing business opportunities, setting strategy for the firm, raising capital, marketing new products, and organizing the managerial team. Students develop a business model canvas and/or write a business plan for themselves or for a local entrepreneur.

- BMGT 458 - Advanced Entrepreneurship

  Credits: 1. (R-3) Offered spring. Prereq., BMGT 448. Focus on managing and marketing a growing business, legal and technology issues for entrepreneurs, and financing new ventures. Students refine an existing or write a new business plan and participate in a business plan competition or write case analyses. UM instructors supervise course content delivered by local and regional experts in entrepreneurship. Four separate one credit weekend seminars are offered.

- BMGT 467 - Global Operations and Supply Chain Management

  Credits: 3. Offered Spring. Prereq., BMGT 322 and BMKT 325, or consent of instructor. The course introduces students to the challenges and opportunities companies face and how they manage the risk associated with the global supply chain. It provides an overview of global supply chain operations management as a field and describes the strategic role it has in today’s intensely competitive business environment.

- BMGT 474 - Entertainment Rsrch & Planning

  Credits: 3. Offered intermittently. Prereq., junior standing and consent of instructor; open to non-business majors. This course will provide students with a better understanding of the processes involved in the conceptualization, development, production and or marketing for businesses, particularly entertainment related entities. This is done through a variety of real world projects.

- BMGT 480 - Cross-Cultural Mgmt

  Credits: 3. Offered autumn. Prereq., junior standing in Business. Study of issues related to cultural diversity within the work force and the problems inherent in the management of a firm's activities on an international scale.

- BMGT 491 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMGT 492 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- BMGT 493 - International Experience

Credits: 1 TO 6. (R-6) offered intermittently. Prereq., junior standing in business. Field-based, experiential courses that focus on international business topics, incl. the culture and business environment of important U.S. trading partners, such as China, Germany, or Italy.

- BMGT 494 - Seminar/Workshop

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- BMGT 498 - Internship

  Credits: 1 TO 6. Offered every term. Prereq., junior standing in Business and consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums Internship graduation limit 6

- BMGT 595 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
  Course Attributes: Internships/Practicums

- BMGT 604 - Competitive Strategy

  Credits: 1. Offered autumn. Prereq., admission to the M.B.A. or M.Acct. program. An introduction to strategic managment with a focus on the analysis of the firm and its environment as the basis for strategic decision making. Level: Graduate

- BMGT 640 - Organizational Behavior

  Credits: 2. Offered autumn. Prereq., admission to the M.B.A. or M-Acct. programs. Professionally oriented strategic overview of intrapersonal, interpersonal, and leadership skills for employees, management, and organizational designers. Topics include diversity, communication, motivation, groups/teams, culture and structure. Level: Graduate

- BMGT 665 - Strategic Mgmt Seminar

  Credits: 1 TO 12. Offered spring. Prereq., admission to the M.B.A. or M-Acct. program and ACTG 605, BFIN 681, BMIS 574, BMGT 604, and BMGT 640; coreq., MBA 603. Analysis of the firm within its industry and the structure of the industry; competitive positioning and competitor analysis; decision-making under conditions of uncertainty; developing a competitive advantage in international markets. Level: Graduate

- BMGT 685 - International Business

  Credits: 2. Offered spring. Prereq., admission to the M.B.A. or M-Acct. programs. Review and analysis of international trade theories and institutions, the role of the multinational enterprise (MNE) in global trade and how the MNEs operate in a global setting. Level: Graduate

Business: Marketing

Back to Top

- BMKT 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMKT 192 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- BMKT 291 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMKT 292 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- BMKT 298 - Internship

Credits: 1 TO 3. (R-3) Offered every term. Extended classroom experience which provides practical application of classroom learning during placements within the business community. The student must complete a learning agreement with a faculty member, relating the placement opportunity to his or her field of study. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums Internship graduation limit 6

- BMKT 325 - Principles of Marketing

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business. The marketing environment, product, price, distribution, and promotion strategies including government regulation and marketing ethics.

- BMKT 337 - Consumer Behavior

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business and BMKT 325; PSYX 100S and 230S recommended. A behavioral analysis of consumer decision making and of the factors influencing consumer decisions, i.e., those decisions directly involved with the obtaining of economic goods and services.

- BMKT 342 - Marketing Research

  Credits: 3. Offered autumn or spring. Prereq., junior standing in Business, BMKT 325. Emphasis on data acquisition and analysis for improved decision making in marketing. Topics include problem definition; secondary data; primary data via observation, interrogation and experimentation; data analysis; written and oral reports. May include field project.

- BMKT 343 - Integrated Marketing Comm

  Credits: 3. Offered autumn or spring. Prereq., junior standing in Business, BMKT 325. An integrated course in promotion strategy. Topics include advertising message design, media selection, promotions, public relations, personal selling, and other selected topics.

- BMKT 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMKT 392 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- BMKT 412 - Non Profit Marketing

  Credits: 3. Offered intermittently. Prereq., junior standing in Business and BMKT 325. Integration of core concepts of marketing into philanthropic and other nonprofit organizations. Includes strategies for large-scale enterprises such as unions, educational and religious institutions to small organizations that provide local support such as cultural services, human and environmental services. Student work with nonprofit organizations creating marketing communications plans in an experiential learning environment.

- BMKT 413 - Sports Marketing

  Credits: 3. Offered intermittently. prereq., junior standing in Business, BMKT 325. Examines the marketing of sports products and non-sports products using sports as a platform. Topics include the use of traditional marketing strategies as well as the use of sponsorship strategies including endorsements, venue naming rights, and licensing.

- BMKT 420 - Integrated Online Marketing

  Credits: 3. Offered autumn or spring. Prereq., junior standing in business, BMKT 325. Exploration and application of marketing communications principles to the internet environment. Students develop individual WordPress websites/blogs, learn about online marketing techniques, and complete online marketing and social media projects.

- BMKT 440 - Marketing Analytics

  Credits: 3. Offered autumn or spring. Prereq., BMKT 325; junior standing in Business or consent of instr. The purpose of this course is to learn about the importance and value of using new measurement tools in marketing and using related research and data to create compelling content. Students in this course are also challenged to bring actual ideas to life.

Note: SoBA requires that credit be earned for one of the math courses below (with a C- or better) before enrolling in ACTG 202.
A student's result on the ALEKS Math Placement Exam does not waive the math requirement.

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA - Lower Secondary Core

Rule: All courses are required

Note: All courses must be completed with a C- or better to satisfy prerequisites for certain major, upper major core, or capstone courses. Students are advised to complete these courses prior to being admitted to an upper-division Business Major. Prerequisites are strictly enforced.

	Course	Credits
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ECNS 202S - Principles of Macroeconomics Offered every term. Prereq., ECNS 201S. The determination of the level of national economic activity, inflation, economic instability, the role of money and financial institutions, and selected topics in public economic policy.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

SoBA - Upper Major Core

Rule: All courses are required

Note: All upper major-core courses must be completed before the capstones can be taken.
Take BMGT 340 in the first semester in the upper-division major as it is a prerequisite course for many Management Major courses.
A student must be listed as a major or minor in business to take these courses. Major or minor in business is defined as junior standing with all primary lower core courses completed, a 2.0 cumulative GPA, and formally admitted to the major or minor.

	Course	Credits

	BFIN 322 - Business Finance Offered every term. Prereq., junior standing in Business. The methodology and practice of business financial decisions.	3 Credits
	BGEN 361 - Principles of Business Law Offered autumn and spring. Prereq., junior major or minor in business. This course examines law as it applies to business transactions. Topics include the nature and sources of law; courts and procedure; contracts, employment; Uniform Commercial Code; property; environmental; business organizations; tort liability; insurance; consumer and creditor protection; bankruptcy; criminal law; and agency law. Credit not allowed for more than one of BGEN 235, BGEN 361 and BADM 257.	3 Credits
	BMGT 322 - Operations Management Offered every term. Prereq., junior major in Business, CSCI 172. A survey of the processes that organizations, public or private, use to produce goods and services. Includes management science topics.	3 Credits
	BMGT 340 - Mgmt & Organization Behavior Offered autumn and spring. Prereq., junior standing in Business. An intensive examination of the fundamentals of management and organization supported by the application of behavioral science principles to the management of people in organizations.	3 Credits
	BMKT 325 - Principles of Marketing Offered autumn and spring. Prereq., junior standing in Business. The marketing environment, product, price, distribution, and promotion strategies including government regulation and marketing ethics.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Management Major - Requirements

Rule: All courses are required

	Course	**Credits**
	BGEN 360 - International Business Offered autumn and spring. Prereq., junior standing in Business. Analysis of business in diverse parts of the globe. Examines the impact of socio-economic, political, legal, educational, and cultural factors on management.	3 Credits
	BMGT 420 - Leadership and Motivation Offered autumn and spring. Prereq., junior standing in Business and BMGT 340. Study of fundamental concepts, theories, and models of leadership and motivation. Selected topics include: trait and behavioral theories of leadership, charismatic and transformational leadership, power and influence, emotions and justice perceptions in motivation, expectancy and equity theories.	3 Credits

	BMGT 444 - Management Communications Offered autumn and spring. Prereq., junior standing in Business; BMGT 340. This course focuses on four modules managing external and internal communications: Communication of Innovations; Communications with Company Leadership; PR Crisis Communications; and Business Negotiations. Course projects include team research, team oral presentations, individual written executive reports, case studies and analysis, and competitive negotiations.	3 Credits
	BMGT 448 - Entrepreneurship Offered autumn and spring. Prereq., junior standing in Business, BMGT 340, BMKT 325; prereq or coreq., BFIN 322. Focuses on starting and managing a growing business. Topics include recognizing business opportunities, setting strategy for the firm, raising capital, marketing new products, and organizing the managerial team. Students develop a business model canvas and/or write a business plan for themselves or for a local entrepreneur.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Management Major - Electives

Rule: Take 12 credits from the list below.

Note: Up to 4 credits of BMGT 458 can count towards the 12 credit elective requirement.
Up to 6 credits of BMGT 491 can count towards the 12 credit elective requirement.
Up to 6 credits of BMGT 493 can count towards the 12 credit elective requirement.
Up to 6 credits of BMGT 494 can count towards the 12 credit elective requirement.
Up to 3 credits of BMGT 498 can count towards the 12 credit elective requirement

	Course	Credits
	BGEN 445 - Sustainability Reporting Offered spring. Prereq., junior, senior, or graduate standing. This course provides students with an understanding of sustainability reporting by organizations. Topics covered include sustainability reporting metrics for the public disclosure of the economic, environmental, and social impacts of organizations. Regulation of sustainability reporting, greenwashing, and external assurance of sustainability reports are also covered.	3 Credits
	BMGT 401 - Event Management Offered autumn. Prereq., junior standing; open to non-business majors. Students are introduced to skills that are necessary for managing entertainment events. Topics include: market research; artist research; negotiating events; producing live events; and working with community and non-profit organizations. Students will develop and participate in several live events throughout the semester.	3 Credits
	BMGT 402 - Prin of Entertainment Mgmt I Offered autumn and spring. Prereq., junior standing and consent of instructor; open to non-business majors. Students are introduced to the fundamental aspects of the entertainment business. Topics include: artist development and management; productions; promotions; and venue management and marketing. Students will produce an artist development plan.	3 Credits

	BMGT 403 - Prin of Entertainment Mgmt II Offered spring. Prereq., junior standing; open to non-business majors. Topics include: tour development and marketing; agency relations and responsibilities; and new forms of entertainment media and distribution. Students will produce an event management plan.	3 Credits
	BMGT 410 - Sustainable Business Practices Offered autumn. Prereq., junior standing. This course explores how changing perceptions around environmental and social issues influence current business practices. Through this exploration, we discuss the impact these influences have on business and how adept firms can gain competitive advantage through embracing and integrating them into their core strategies.	3 Credits
	BMGT 458 - Advanced Entrepreneurship (R-3) Offered spring. Prereq., BMGT 448. Focus on managing and marketing a growing business, legal and technology issues for entrepreneurs, and financing new ventures. Students refine an existing or write a new business plan and participate in a business plan competition or write case analyses. UM instructors supervise course content delivered by local and regional experts in entrepreneurship. Four separate one credit weekend seminars are offered.	1 Credits
	BMGT 467 - Supply Chain Management Offered Spring. Prereq., BMGT 322 and BMKT 325, or consent of instructor. The course introduces students to the challenges and opportunities companies face and how they manage the risk associated with the global supply chain. It provides an overview of global supply chain operations management as a field and describes the strategic role it has in today's intensely competitive business environment.	3 Credits
	BMGT 480 - Cross-Cultural Mgmt Offered autumn. Prereq., junior standing in Business. Study of issues related to cultural diversity within the work force and the problems inherent in the management of a firm's activities on an international scale.	3 Credits
	BMGT 491 - Special Topics (R-6) Offered intermittently. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	BMGT 493 - International Experience (R-6) offered intermittently. Prereq., junior standing in business. Field-based, experiential courses that focus on international business topics, incl. the culture and business environment of important U.S. trading partners, such as China, Germany, or Italy.	1 To 6 Credits
	BMGT 494 - Seminar/Workshop (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.	1 To 6 Credits

	BMGT 498 - Internship Offered every term. Prereq., junior standing in Business and consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
	COMX 415 - Intercultural Communication Offered autumn and spring. Communication principles and processes in cross-cultural environments. Non-Western cultures are emphasized by contrasting them to Western communication norms.	3 Credits
	ECNS 312 - Labor Economics Offered intermittently. Prereq., ECNS 201S. Economic analysis of labor markets. Theories of wage determination, discrimination and poverty with implications for manpower policy.	3 Credits
	PSCI 462 - Human Resource Management Offered spring. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

SoBA - Capstone Courses

Rule: Required; BGEN 499

Note: Students must complete all lower and upper core courses and their prerequisites and have an approved graduation application to register for their capstones.
Students must pass the required comprehensive exam as well as all requisite coursework to earn a passing grade in BGEN 499.
BGEN 499 must be taken at UM.

	Course	**Credits**
	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Upper-Division Writing Requirement

Rule: All courses are required

	Course	**Credits**

	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Symbolic Systems Requirement

Rule: Students complete STAT 216 (preferred) or one other course from the list below to fulfill the Symbolic Systems Requirement.

Note: This is a lower primary core. SoBA requires that credit be earned for STAT 216 (preferred) or one of the other statistics courses below (with a C- or better) prior to being admitted into an upper-division SoBA major.

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

SoBA Expressive Arts Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	**Credits**
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

SoBA Social Science Requirement

Rule: All courses are required

Note: This is a lower primary core course and must be completed with a C- or better prior to a for a student being admitted into an upper-division SoBA major.

	Course	Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Ethical & Human Values Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	Credits
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Management Information Systems Department

Lee Tangedahl, Chair

The Department of Management Information Systems offers a major in Management Information Systems within the Bachelor of Science in Business Administration.

Management Information Systems Major

The management information systems STEM curriculum prepares students to manage an organization's information resources. The major focuses on:
1) analyzing and managing the flows of information within and across the organization's business processes;
2) effectively managing the acquisition and utilization of information technology; and
3) using both information and information technology to enhance the organization's strategic advantage.

The knowledge and skills developed in the curriculum lead to careers in consulting, application development, systems analysis and design, database administration, electronic commerce, telecommunications, network security management, big data analytics and project management.

Certificate in Big Data Analytics

The Big Data Analytics (BDA) certificate is designed to provide students with the tools necessary to compete in the Big Data space. Students will use big data tools that are currently available to capture, analyze, and present big data. They will explore a variety of applications with which Big Data tools can be applied, and they will complete a Big Data project. This certificate is currently aimed at students majoring in business, computer science or mathematics.

Business Finance

Back to Top

- BFIN 267 - Real Estate Theory and Law
  Credits: 4. Offered intermittently through UM Dept. of Continuing Education. Introduction to the theory and legal issues involved in a real estate transaction.

Business: General

Back to Top

- BGEN 105S - Introduction to Business
  Credits: 3. Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S. Course Attributes: Social Sciences Course (S)
- BGEN 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- BGEN 292 - Independent Study
  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- BGEN 361 - Principles of Business Law
  Credits: 3. Offered autumn and spring. Prereq., junior major or minor in business. This course examines law as it applies to business transactions. Topics include the nature and sources of law; courts and procedure; contracts, employment; Uniform Commercial Code; property; environmental; business organizations; tort liability; insurance; consumer and creditor protection; bankruptcy; criminal law; and agency law. Credit not allowed for more than one of BGEN 235, BGEN 361 and BADM 257.
- BGEN 391 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

Business: Management

Back to Top

- BMGT 101S - Intro to Entertainment Mgmt
  Credits: 3. Offered autumn and spring. Open to non-business majors. Designed to provide basic distinctions and concepts necessary for understanding various business aspects that underpin the business of entertainment as well as most other businesses, regardless of context. Course Attributes: Social Sciences Course (S)
- BMGT 322 - Operations Management
  Credits: 3. Offered every term. Prereq., junior major in Business, CSCI 172. A survey of the processes that organizations, public or private, use to produce goods and services. Includes management science topics.
- BMGT 540 - Mgmt & Legal System
  Credits: 3. Online course. Offered autumn. Prereq., admission to the M.B.A. or M-Acct. programs or graduate standing with consent of graduate business program director. Basic management principles, exploration of concepts such as strategic planning, goal-setting and giving feedback,

leadership, motivation, and reward systems. Law as it relates to doing business in the global environment; ethical dimensions of business decision-making. Level: Graduate

- BMGT 650 - Business Ethics

  Credits: 1. BMGT 650-01 and BMGT 650-60 Business Ethics. 1 credit. Offered in the last five weeks of the fall semester. Prerequisites: admission in MBA program. Business Ethics is a course designed to acquaint students with the ethical implications of business decisions, policy, strategy and operations. The students will learn how to (1) develop a system of ethics that will form the foundation for future ethical practices in business; (2) analyze specific contemporary issues in business for their ethical implications and content; and (3) challenge conventional thinking about ethics by introducing broad-based ethical principles and systems to enlighten and inform ethical thinking. Level: Graduate

Business: Management Info Sys

Back to Top

- BMIS 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMIS 192 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- BMIS 270 - MIS Foundations for Business

  Credits: 3. Offered every term. Prereq., WRIT 101. Introduces the development, use, and management of computer-based information systems.

- BMIS 292 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- BMIS 298 - Internship

  Credits: 1 TO 3. (R-3) Offered every term. Extended classroom experience which provides practical application of classroom learning during placements within the business community. The student must complete a learning agreement with a faculty member, relating the placement opportunity to his or her field of study. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internship graduation limit 6

- BMIS 326 - Introduction to Data Analytics

  Credits: 3. Offered autumn and spring. Prereq., STAT 216 or SOCI 202 or PSYX 222 or FORS 201. This course introduces the terminology and application of big data and data analytics. Students will complete cases in a variety of disciplines as they become acquainted with some of the software, tools, and techniques of data analytics.

- BMIS 365 - Business App Development

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business. Provides an understanding of algorithm development, programming, computer concepts and the design and application of data and file structures.

- BMIS 370 - Managing Information and Data

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business and BMIS 365. Managing and exploiting organizational data and information. Designing data and information models.

- BMIS 372 - Information Infrastructures

  Credits: 3. Offered autumn. Prereq., junior standing in Business. Explores the evolution of technological infrastructures with an emphasis on strategic implications. Students develop an enterprise infrastructure and then examine innovations that allow for the design and development of products and services in a global business environment.

- BMIS 373 - Business System Analy & Design

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business. Provides an understanding of the systems development and modification process, including requirements

determination, logical design, physical design, test planning, implementation planning and performance evaluation.

- BMIS 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMIS 392 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- BMIS 394 - Undergraduate Seminar

  Credits: 1 TO 3. (R-3) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- BMIS 465 - Real-Time Data Analytics

  Credits: 3. Offered intermittently. Prereq., STAT 216, BMIS 365 or equivalents. Focuses on analyzing big data in motion using commercially available software.

- BMIS 471 - Fund of Netwrk & Security Mgmt

  Credits: 3. Offered intermittently. Prereq., junior standing. Current topics will focus on the impact of network technologies and infrastructures on facilitating and supporting business organizations. Students learn about design, installation, and configuration of networks as well as implementing security, networking protocols, and virtualization technologies. Includes a hands-on lab to demonstrate the concepts.

- BMIS 472 - Adv Network & Security Mgmt

  Credits: 3. Offered intermittently. Prereq., junior standing and BMIS 471. Focuses on network security and how it aligns with organizational strategy, directory services for access to organizational information, and cybersecurity management. Includes a hands-on lab to demonstrate the concepts.

- BMIS 476 - Integrated Project Mgmt for IS

  Credits: 3. Offered every term Prereq., junior standing in Business and BMIS 365, 370, and 373. Emphasis on project planning, team selection models, and project management techniques. A software package is used to demonstrate how projects are planned, managed, monitored, and controlled.

- BMIS 478 - E Commerce a Managerl Prspctv

  Credits: 3. Offered intermittently. Prereq., junior standing in Business. Focuses on the capabilities of the Internet to support and enable commerce. Provides a managerial perspective on topics including effective web site design, emerging technologies, business models, infrastructure architectures, and security.

- BMIS 479 - Introduction to Consulting

  Credits: 3. Offered intermittently. Prereq., junior standing in Business. Managerial approach to consulting engagements. Includes scoping and writing proposals, presenting to clients, documenting consulting work, and interpersonal skills necessary for successful consulting. Course does not require a technical background.

- BMIS 482 - Big Data Project

  Credits: 3. Offered autumn and spring. Prereq., BMIS 326 and any 2 electives listed in part 4 of the Big Data Analytics Certificate, or consent of instructor. Students will work in cross-disciplinary teams to complete big data projects from different disciplines. There will be emphasis on agile project management.

- BMIS 491 - Special Topics

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BMIS 492 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- BMIS 494 - Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- BMIS 495 - Practicum: Information Systems

  Credits: 3. Offered every term. Prereq., junior standing in Business and consent of instr. Practical hands-on experience with area organizations. Provides application of classroom learning. Course Attributes: Internships/Practicums

- BMIS 498 - Internship

  Credits: 1 TO 6. R-6) Offered every term. Prereq., junior standing in Business and consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- BMIS 541 - Systems & Operations

  Credits: 3. Online course. Offered spring. Prereq., admission to M.B.A. or M-Acct. program or graduate standing with consent of graduate business program director; grade of B or better in BMKT 560. Design and use of information systems to meet the tactical and strategic needs of an enterprise, particularly within the operations function. Topics include systems analysis, data and process modeling, database designs, manufacturing planning and control, forecasting, and quality management. Level: Graduate

- BMIS 575 - Fundamentals of Consulting

  Credits: 2. Offered spring. Prereq., graduate standing. The technical, interpersonal, and consulting skills necessary to effectively work with clients. Focuses on management; does not require a technical background. Level: Graduate

- BMIS 591 - Special Topics

  Credits: 1 TO 3. (R-3) Offered intermittently. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate

- BMIS 601 - Business Intelligence

  Credits: 3. Offered intermittently. Prereq., graduate standing and BMIS 326. The course provides graduate students with the foundational knowledge necessary to transform big data into useful business intelligence. Students get the skills, tools, and techniques required to collect, synthesize, and distribute information to support intelligent decision-making at the managerial level. Level: Graduate

- BMIS 625 - Mining of Text & Unstructured Data

  Credits: 3. Prereq., admission to the MS BA program or instructor consent. An integration of Data Science theory and the actual practice of searching, sorting, relating, and deriving results from textual data. Students will be exposed to machine learning, natural language processing, as well as other computer assisted data mining techniques and then gain hands-on proficiency in the practice of data science using the software from data mining and document analysis vendors

- BMIS 650 - Quantitative Analysis

  Credits: 2. Offered spring. Prereq., admission to the M.B.A. or M-Acct. programs. Quantitative methods supporting managerial decision-making. Theory and logic underlying such methods as linear programming and simulation. Solution of complex problems and practice of interpersonal skills in team projects. Level: Graduate

- BMIS 674 - Mgmt of Information Systems

  Credits: 2. Offered autumn. Prereq., admission to the M.B.A. or M-Acct. program. The tactical/operational responsibilities and roles of the CIO. Includes governance issues, supporting the learning organization, managing the technologies, and managing the development of systems. Focuses on management; does not require a technical background. Level: Graduate

MBA

Back to Top

- MBA 694 - Seminar

  Credits: 1 TO 15. (R-15) Offered every term. Prereq., graduate student in business or consent of business graduate director. Selected topics in business. Level: Graduate

- MIS 260 - Life and Health Insurance
  Credits: 3. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of life and health insurance as well as the legal and regulatory environment for each industry.
- MIS 261 - Life Insurance
  Credits: 1. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of life insurance as well as the life insurance industry's legal and regulatory environment.
- MIS 262 - Health Insurance
  Credits: 1. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of health insurance as well as the health insurance industry's legal and regulatory environment.
- MIS 263 - Property and Casualty Ins.
  Credits: 3. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of property insurance as well as the property insurance industry's legal and regulatory environment.
- MIS 264 - Property Insurance
  Credits: 1. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of property insurance as well as the property insurance industry's legal and regulatory environment.
- MIS 265 - Casualty Insurance
  Credits: 1. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of casualty insurance as well as the casualty insurance industry's legal and regulatory environment.
- MIS 266 - Personal Lines Insurance
  Credits: 1. Offered intermittently through School of Extended and Lifelong Learning (formerly Continuing Education). Introduction to the principles of personal lines insurance as well as the personal lines insurance industry's legal and regulatory environment.

Management Information Systems B.S.

Bachelor of Science - Management Information Systems

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 76

Required Cumulative GPA: 2.0

Note: At least 54 credits must be earned in Business classes (ECNS, SoBA internship courses, and SoBA faculty-led study abroad courses may be counted in OR out of Business) A minimum GPA of 2.0 is required for these courses.
At least 60 credits must be earned outside of SoBA (excluding HHP/ACT activities courses).
At least 28 credits in business AND BMIS 476 must be taken at UM.
All business credits transferred in after matriculating to UM must be pre-approved by the department chair in your major.

SoBA - Primary Lower Core Courses

Rule: All courses are required

Note: null

Note: All primary lower core courses must be completed with a C- or better and a 2.0 GPA must be earned in the seven (7) listed course prior to admission into an upper-division Business Major.
A math course and a statistics course are also required in the primary lower core. See Math Requirements and Symbolic Systems Requirements below. Math 3-4 Credits
Symbolic Systems 3-4 Credits

	Course	Credits
	ACTG 201 - Principles of Fin Acct Offered every term. Prereq. or Coreq. M 115, M 121, M 151 or M 162. Introduction to financial accounting concepts, including transactions analysis, financial statement analysis, and corporate financial reporting practices.	3 Credits
	ACTG 202 - Principles of Mang Acct Offered every term. Prereq., ACTG 201 and M 115, M 121, M 151 or M 162. Continuation of ACTG 201 with a focus on managerial accounting topics.	3 Credits
	BMIS 270 - MIS Foundations for Business Offered every term. Prereq., WRIT 101. Introduces the development, use, and management of computer-based information systems.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		21 Total Credits Required

SoBA Math Requirement

Rule: Students choose one course from the list below to fulfill their Math Requirement

Note: SoBA requires that credit be earned for one of the math courses below (with a C- or better) before enrolling in ACTG 202.
A student's result on the ALEKS Math Placement Exam does not waive this requirement.

	Course	Credits

	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA – Secondary Lower Core Courses

Rule: All courses are required

Note: All courses must be completed with a C- or better to satisfy prerequisites for certain major, upper major core, or capstone courses. Students are advised to complete these courses prior to being admitted to an upper-division Business Major. Prerequisites are strictly enforced.

	Course	**Credits**
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits

	ECNS 202S - Principles of Macroeconomics Offered every term. Prereq., ECNS 201S. The determination of the level of national economic activity, inflation, economic instability, the role of money and financial institutions, and selected topics in public economic policy.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

SoBA - Upper Major Core

Rule: All courses are required

Note: All upper major core courses must be completed before the capstone can be taken.
A student must be listed as a major in business to take these courses. Major or minor in business is defined as junior standing with all primary lower core courses completed, a 2.0 cumulative GPA, and formally admitted to the major or minor.

	Course	Credits
	BFIN 322 - Business Finance Offered every term. Prereq., junior standing in Business. The methodology and practice of business financial decisions.	3 Credits
	BGEN 361 - Principles of Business Law Offered autumn and spring. Prereq., junior major or minor in business. This course examines law as it applies to business transactions. Topics include the nature and sources of law; courts and procedure; contracts, employment; Uniform Commercial Code; property; environmental; business organizations; tort liability; insurance; consumer and creditor protection; bankruptcy; criminal law; and agency law. Credit not allowed for more than one of BGEN 235, BGEN 361 and BADM 257.	3 Credits
	BMGT 322 - Operations Management Offered every term. Prereq., junior major in Business, CSCI 172. A survey of the processes that organizations, public or private, use to produce goods and services. Includes management science topics.	3 Credits
	BMGT 340 - Mgmt & Organization Behavior Offered autumn and spring. Prereq., junior standing in Business. An intensive examination of the fundamentals of management and organization supported by the application of behavioral science principles to the management of people in organizations.	3 Credits
	BMKT 325 - Principles of Marketing Offered autumn and spring. Prereq., junior standing in Business. The marketing environment, product, price, distribution, and promotion strategies including government regulation and marketing ethics.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Management Information Systems - Requirements

Rule: All courses are required

Note: BMIS 365, BMIS 370, and BMIS 476 must be taken at UM.
3 credits of BMIS 498 are required to graduate.

	Course	Credits
	BMIS 365 - Business App Development Offered autumn and spring. Prereq., junior standing in Business. Provides an understanding of algorithm development, programming, computer concepts and the design and application of data and file structures.	3 Credits
	BMIS 370 - Managing Information and Data Offered autumn and spring. Prereq., junior standing in Business and BMIS 365. Managing and exploiting organizational data and information. Designing data and information models.	3 Credits
	BMIS 372 - Information Infrastructures Offered autumn. Prereq., junior standing in Business. Explores the evolution of technological infrastructures with an emphasis on strategic implications. Students develop an enterprise infrastructure and then examine innovations that allow for the design and development of products and services in a global business environment.	3 Credits
	BMIS 373 - Business System Analy & Design Offered autumn and spring. Prereq., junior standing in Business. Provides an understanding of the systems development and modification process, including requirements determination, logical design, physical design, test planning, implementation planning and performance evaluation.	3 Credits
	BMIS 476 - Integrated Project Mgmt for IS Offered every term Prereq., junior standing in Business and BMIS 365, 370, and 373. Emphasis on project planning, team selection models, and project management techniques. A software package is used to demonstrate how projects are planned, managed, monitored, and controlled.	3 Credits
	BMIS 498 - Internship R-6) Offered every term. Prereq., junior standing in Business and consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		18 Total Credits Required

Management Information Systems - Electives

Rule: Take 6 credits from the list below.

Note: Students taking ACTG 321 for an elective must also take the ACTG 203 co requisite course.

	Course	Credits
	ACTG 321 - Acct Information Systems I Offered autumn and spring. Prereq., junior standing in Business. Prereq., or coreq., ACTG 203. Provides thorough understanding of business processes, risks, and internal controls. Computer applications may be used to demonstrate concepts.	3 Credits

	BMIS 326 - Data Analytics Offered autumn and spring. Prereq., STAT 216 or SOCI 202 or PSYX 222 or FORS 201. This course introduces the terminology and application of big data and data analytics. Students will complete cases in a variety of disciplines as they become acquainted with some of the software, tools, and techniques of data analytics.	3 Credits
	BMIS 391 - Special Topics (R-9) Offered intermittently. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	BMIS 465 - Real-Time Data Analytics Offered intermittently. Prereq., STAT 216, BMIS 365 or equivalents. Focuses on analyzing big data in motion using commercially available software.	3 Credits
	BMIS 471 - Fund of Netwrk & Security Mgmt Offered intermittently. Prereq., junior standing. Current topics will focus on the impact of network technologies and infrastructures on facilitating and supporting business organizations. Students learn about design, installation, and configuration of networks as well as implementing security, networking protocols, and virtualization technologies. Includes a hands-on lab to demonstrate the concepts.	3 Credits
	BMIS 472 - Adv Network & Security Mgmt Offered intermittently. Prereq., junior standing and BMIS 471. Focuses on network security and how it aligns with organizational strategy, directory services for access to organizational information, and cybersecurity management. Includes a hands-on lab to demonstrate the concepts.	3 Credits
	BMIS 478 - E Commerce a Managerl Prspctv Offered intermittently. Prereq., junior standing in Business. Focuses on the capabilities of the Internet to support and enable commerce. Provides a managerial perspective on topics including effective web site design, emerging technologies, business models, infrastructure architectures, and security.	3 Credits
	BMIS 479 - Introduction to Consulting Offered intermittently. Prereq., junior standing in Business. Managerial approach to consulting engagements. Includes scoping and writing proposals, presenting to clients, documenting consulting work, and interpersonal skills necessary for successful consulting. Course does not require a technical background.	3 Credits
	BMIS 482 - Big Data Project Offered autumn and spring. Prereq., BMIS 326 and any 2 electives listed in part 4 of the Big Data Analytics Certificate, or consent of instructor. Students will work in cross-disciplinary teams to complete big data projects from different disciplines. There will be emphasis on agile project management.	3 Credits
	BMIS 491 - Special Topics (R-9) Offered autumn and spring. Prereq., junior standing in Business or consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits

	BMIS 492 - Independent Study (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.	1 To 6 Credits
	BMKT 460 - Mktg Hi-Tech Prod & Innov Offered autumn or spring. Prereq., BMKT 325; junior standing in Business or consent of instr. Exploration of concepts and practices related to marketing in fast-paced environment; draws from a range and diversity of industries and contexts including the Internet.	3 Credits
	C&I 341 - Information Managemnt & Design Offered spring. Prereq., CSCI 172. Emphasis on the development and maintenance of a file management system, application of effective design concepts in the creation of professional print and digital images and documents, and the creation of digital videos for use in education and/or business.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 448 - Pattern Recognition Offered intermittently. Prereq., Junior or Senior status. Introduction to the framework of unsupervised learning techniques such as clustering (agglomerative, fuzzy, graph theory based, etc.), multivariate analysis approaches (PCA, MDS, LDA, etc.), image analysis (edge detection, etc.), as well as feature selection and generation. Emphasis will be on the underlying algorithms and their implementation. Credit not allowed for both CSCI 448 and CSCI 548.	3 Credits
	CSCI 464 - Applications Mining Big Data Offered intermittently. Prereq., upper division or consent of instr. Co-convenes with CSCI 564. Introduction to existing data mining software systems and their use, with focus on practical exercises. Topics include data acquisition, data cleansing, feature selection, and data analysis. Credit not allowed for both CSCI 464 and CSCI 564.	3 Credits
	EDU 472 - Dev Digital Rich Workplace Offered spring. Prereq., CSCI 172. Project-based course to gain understanding and the ability to use web development tools to create a functional, well-designed web project. Additional topics/projects include: Web 2.0+ tapping the potential of digital tool; social media—educational and business uses; gamification in education and business, and introductory electronic game development for the classroom and the boardroom.	3 Credits

	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	STAT 451 - Statistical Methods I Offered autumn. Prereq., one year of college mathematics including M 115 or equiv. course in probability or consent of instr. May not be counted toward a major in mathematics. Intended primarily for non-mathematics majors who will be analyzing data. Graphical and numerical summaries of data, elementary sampling, designing experiments, probability as a model for random phenomena and as a tool for making statistical inferences, random variables, basic ideas of inference and hypothesis testing. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

SoBA - Capstone Courses

Rule: All courses are required

Note: Students must complete all lower and upper core courses and their prerequisites and have an approved graduation application to register for their capstones.
Students must pass the required comprehensive exam as well as all requisite coursework to earn a passing grade in BGEN 499.
BGEN 499 must be taken at UM.

	Course	**Credits**
	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits
Minimum Required Grade: C-		4 Total Credits Required

SoBA Upper-Division Writing Requirement

Rule: All courses are required

	Course	**Credits**

	BMGT 486 - Strategic Venture Management Offered every term. Prereq., senior standing in Business, COMX 111, ECNS 202, BGEN 220 with grades C or better and completed upper Business core; coreq., BGEN 499. Integration of all functional areas of business including starting and managing a growing business. Topics include recognizing business opportunities, setting strategy for the firm, raising capital, marketing new products, and organizing a management team. Students write a business plan for themselves or for a local entrepreneur or organization.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Symbolic Systems Requirement

Rule: Students complete STAT 216 (preferred) or one other course from the list below to fulfill the Symbolic Systems Requirement.

Note: This is a primary lower core course. SoBA requires that credit be earned for STAT 216 (preferred) or one of the other statistics courses below (with a C- or better) prior to being admitted into an upper-division SoBA major.

	Course	**Credits**
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Expressive Arts Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	**Credits**

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Social Science Requirement

Rule: All courses are required

Note: This is a primary lower core course and must be completed with a C- or better prior to a student being admitted into an upper-division SoBA major.

	Course	**Credits**
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Ethical & Human Values Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	**Credits**
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Business Administration Minor

Minor - Business Administration

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 27

Required Cumulative GPA: 2.0

Primary Lower Core Courses

Rule: Must complete all of the following courses:

Note: Students must earn a "C-" or better in any prerequisites and primary lower core courses before taking the upper division business minor courses. These seven (7) courses must be completed with a 2.0 GPA.

Student can apply to the Business Minor when they have a "C-" or better in all primary lower core courses, 60 credits, and a 2.0 primary lower core GPA.

	Course	Credits
	ACTG 201 - Principles of Fin Acct Offered every term. Prereq. or Coreq. M 115, M 121, M 151 or M 162. Introduction to financial accounting concepts, including transactions analysis, financial statement analysis, and corporate financial reporting practices.	3 Credits
	ACTG 202 - Principles of Mang Acct Offered every term. Prereq., ACTG 201 and M 115, M 121, M 151 or M 162. Continuation of ACTG 201 with a focus on managerial accounting topics.	3 Credits
	BMIS 270 - MIS Foundations for Business Offered every term. Prereq., WRIT 101. Introduces the development, use, and management of computer-based information systems.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		15 Total Credits Required

Upper Minor Core

Rule: Must complete all of the following courses:

Note: Three of the four upper minor core classes must be completed at the University of Montana - Missoula.

These classes can only be taken after the application to the Business Minor has been approved.

	Course	Credits
	BFIN 322 - Business Finance Offered every term. Prereq., junior standing in Business. The methodology and practice of business financial decisions.	3 Credits
	BGEN 361 - Principles of Business Law Offered autumn and spring. Prereq., junior major or minor in business. This course examines law as it applies to business transactions. Topics include the nature and sources of law; courts and procedure; contracts, employment; Uniform Commercial Code; property; environmental; business organizations; tort liability; insurance; consumer and creditor protection; bankruptcy; criminal law; and agency law. Credit not allowed for more than one of BGEN 235, BGEN 361 and BADM 257.	3 Credits

	BMGT 340 - Mgmt & Organization Behavior Offered autumn and spring. Prereq., junior standing in Business. An intensive examination of the fundamentals of management and organization supported by the application of behavioral science principles to the management of people in organizations.	3 Credits
	BMKT 325 - Principles of Marketing Offered autumn and spring. Prereq., junior standing in Business. The marketing environment, product, price, distribution, and promotion strategies including government regulation and marketing ethics.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Certificate in Big Data Analytics

The Big Data Analytics (BDA) certificate is designed to provide students with the tools necessary to compete in the Big Data space. Students will use big data tools that are currently available to capture, analyze, and present big data. They will explore a variety of applications with which Big Data tools can be applied, and they will complete a Big Data project. This certificate is currently aimed at students majoring in business, computer science, or mathematics.

- Big Data Analytics

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 12

Required Cumulative GPA: 3.0

Note: All students pursuing a BDA Certificate must also complete the degree requirements for a UM major. The 3.0 GPA requirement pertains specifically to the 12 credits required for this certificate, not a student's cumulative GPA.
Please meet with an BDA Certificate Advisor for assistance (Computer Science and Mathematics majors contact their department; all others contact SOBA Advising).
Complete the BDA certificate application (available from the SOBA advising office).

Big Data Analytics Certificate - Foundational Course

Rule: Take the following course.

Note: See individual course descriptions in the catalog for additional grade and prerequisite requirements.

	Course	**Credits**
	BMIS 326 - Data Analytics Offered autumn and spring. Prereq., STAT 216 or SOCI 202 or PSYX 222 or FORS 201. This course introduces the terminology and application of big data and data analytics. Students will complete cases in a variety of disciplines as they become acquainted with some of the software, tools, and techniques of data analytics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Big Data Analytics Certificate – Elective Courses

Rule: Take 6 credits from the list below.

	Course	Credits
	BMIS 465 - Real-Time Data Analytics Offered intermittently. Prereq., STAT 216, BMIS 365 or equivalents. Focuses on analyzing big data in motion using commercially available software.	3 Credits
	BMKT 440 - Marketing Analytics Offered autumn or spring. Prereq., BMKT 325; junior standing in Business or consent of instr. The purpose of this course is to learn about the importance and value of using new measurement tools in marketing and using related research and data to create compelling content. Students in this course are also challenged to bring actual ideas to life.	3 Credits
	CSCI 444 - Data Visualization Offered intermittently. Prereq., M 171; programming experience; and junior, senior, or graduate status; or consent of instr. Visualization fundamentals and applications using special visualization software; formulation of 3-D empirical models; translation of 3-D models into graphical displays; time sequences and pseudo-animation; interactive versus presentation techniques; special techniques for video, CD and other media.	3 Credits
	CSCI 447 - Machine Learning Offered intermittently. Prereq., CSCI 232 or consent of instr. Introduction to the framework of learning from examples, various learning algorithms such as neural networks, and generic learning principles such as inductive bias, Occam's Razor, and data mining. Credit not allowed for both CSCI 447 and CSCI 547.	3 Credits
	CSCI 448 - Pattern Recognition Offered intermittently. Prereq., Junior or Senior status. Introduction to the framework of unsupervised learning techniques such as clustering (agglomerative, fuzzy, graph theory based, etc.), multivariate analysis approaches (PCA, MDS, LDA, etc.), image analysis (edge detection, etc.), as well as feature selection and generation. Emphasis will be on the underlying algorithms and their implementation. Credit not allowed for both CSCI 448 and CSCI 548.	3 Credits
	CSCI 464 - Applications Mining Big Data Offered intermittently. Prereq., upper division or consent of instr. Co-convenes with CSCI 564. Introduction to existing data mining software systems and their use, with focus on practical exercises. Topics include data acquisition, data cleansing, feature selection, and data analysis. Credit not allowed for both CSCI 464 and CSCI 564.	3 Credits

	CSCI 480 - Parallel Computing Prereq., CSCI 205 and 232, or instructor consent. This course is an introduction to parallelism and parallel programming. Topics include the various forms of parallelism on modern computer hardware (e.g. SIMD vector instructions, GPUs, multiple cores, and networked clusters), with coverage of locality and latency, shared vs non-shared memory, and synchronization mechanisms (locking, atomicity, etc). We will introduce patterns that appear in essentially all programs that need to run fast. We will discuss how to recognize these patterns in a variety of practical problems, discuss efficient algorithms for implementing them, and how to compose these patterns into larger applications. We will address computer architecture at a high level, sufficient to understand the relative costs of operations like arithmetic and data transfer. We also introduce useful tools for debugging correctness and performance of parallel programs. Assignments will include significant parallel programming projects. Co-convenes with CSCI 580. Credit not allowed for both CSCI 480 and CSCI 580.	3 Credits
	CSCI 564 - Applications Mining Big Data Offered intermittently. Co-convenes with CSCI 464. Introduction to existing data mining software systems and their use, with focus on practical exercises. Topics include data acquisition, data cleansing, feature selection, and data analysis. Credit not allowed for both CSCI 464 and CSCI 564. Level: Graduate	3 Credits
	CSCI 580 - Parallel Computing Offered intermittently. Prereq., CSCI 232, 205. Parallel processing architectures and programming languages. Co-convenes with CSCI 580. Credit not allowed for both CSCI 480 and CSCI 580. Level: Graduate	3 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Big Data Analytics Certificate – Capstone Course

Rule: Take one of the following two courses.

	Course	Credits
	BMIS 482 - Big Data Project Offered autumn and spring. Prereq., BMIS 326 and any 2 electives listed in part 4 of the Big Data Analytics Certificate, or consent of instructor. Students will work in cross-disciplinary teams to complete big data projects from different disciplines. There will be emphasis on agile project management.	3 Credits
	M 467 - Big Data Analytic Projects Offered spring. Prereq., two courses chosen from STAT 341, M 221 and M 273, and one of M 461 or M 462, or consent of instructor. This course is a practicum course aimed at developing skills needed to solve big data problems facing industry and academics. Problems are brought to the class by local technology-oriented businesses and university researchers. Lecture topics include project management, interacting with clients, and written and oral presentation of results. Additional lecture topics will be selected to address the specific problems brought to the class and may cover data reduction methods, algorithm design and predictive analytics. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Accounting and Finance Department

Bruce A. Costa Ph.D., Chair

The Department of Accounting and Finance prepares ethically aware decision-makers with effective analytical and qualitative business knowledge and skills to become professionals in their respective fields in the region and beyond. We commit to high quality teaching and applying scholarship to professional practice, pedagogy, and theory to enhance the professional accounting and finance fields. The department offers the Master of Accountancy degree and two undergraduate majors within the Bachelor of Science in Business Administration degree: accounting and finance. The department also offers a Certificate in Accounting Information Systems.

Accounting

Back to Top

- ACTG 201 - Principles of Fin Acct
  Credits: 3. Offered every term. Prereq. or Coreq. M 115, M 121, M 151 or M 162. Introduction to financial accounting concepts, including transactions analysis, financial statement analysis, and corporate financial reporting practices.
- ACTG 202 - Principles of Mang Acct
  Credits: 3. Offered every term. Prereq., ACTG 201 and M 115, M 121, M 151 or M 162. Continuation of ACTG 201 with a focus on managerial accounting topics.
- ACTG 203 - Accounting Lab
  Credits: 1. Offered every term. Prereq., ACTG 201 with a grade of C or better. Applying accounting cycle concepts to comprehensive hands-on financial statement cases and/or a practice set and exploring career options.
- ACTG 298 - Internship
  Credits: 1 TO 3. (R 3) Offered autumn and spring. Prereq., last semester in program, minimum grade of “C” in all ACTG courses, and approval of program director. On-the-job training in positions related to the accounting field. This experience increases students' skills, prepares them for initial employment, and increases occupational awareness and professionalism. Students work a minimum of six hours each week at an approved site and attend scheduled one-hour seminars.
  Course Attributes: Internships/Practicums

- ACTG 305 - Corporate Reporting I

  Credits: 3. Offered every term. Prereq., junior standing in Business, ACTG 201 and 202 with grades of C or better or consent of instr. Prereq., or Coreq., ACTG 203. Topics include concepts in financial accounting, assets and related income statement accounts.

- ACTG 306 - Corporate Reporting II

  Credits: 3. Offered every term. Prereq., junior standing in Business, ACTG 203, ACTG 305 with grades of C or better, or consent of instr. Continuation of ACTG 305. Topics include concepts in financial accounting, coverage of the liability and equity side of the balance sheet, the cash flow statement, and several special financial accounting topics.

- ACTG 307 - Corporate Reporting III

  Credits: 2. Offered spring. Prereq., junior standing in Business and ACTG 305; prereq., or coreq., ACTG 306, or consent of instr. Application of accounting principles to complex issues such as post-retirement benefits, accounting changes, bankruptcies, reorganizations, income taxes and other topics.

- ACTG 321 - Acct Information Systems I

  Credits: 3. Offered autumn and spring. Prereq., junior standing in Business. Prereq., or coreq., ACTG 203. Provides thorough understanding of business processes, risks, and internal controls. Computer applications may be used to demonstrate concepts.

- ACTG 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing in Business and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ACTG 392 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- ACTG 394 - Undergraduate Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- ACTG 401 - Principles of Fed Tax - Ind

  Credits: 3. Offered autumn. Prereq., Junior standing in Business or consent of instr. Prereq., or coreq., ACTG 306. The application of the federal income tax law to determine income, deductions and losses. Special topics include property transactions.

- ACTG 410 - Cost/Mgmt Acct I

  Credits: 3. Offered autumn and/or spring. Prereq., junior standing in business or consent of instr. The study of cost management for business and other organizations. Emphasis on how information about costs helps managers make better decisions.

- ACTG 411 - Auditing I

  Credits: 3. Offered spring. Prereq., junior standing in Business, ACTG 321 and ACTG 306, or consent of instr. Introduction to auditing with emphasis on the independent audit of financial statements. Coverage includes professional standards, ethics, audit risk, evidence, internal controls, procedures, opinions, operational and compliance auditing.

- ACTG 420 - Cost/Mgmt Acct II

  Credits: 3. Offered intermittently. Prereq., senior standing in Business and ACTG 410 or consent of instr. Advanced cost management with emphasis on how financial and non-financial information helps managers make better decisions in a wide variety of business and not-for-profit organizations. Current readings in cost management and related topics.

- ACTG 425 - State & Local Gov't Acctg

  Credits: 2. Offered spring. Prereq., junior standing in Business or consent of instr. Prereq., or coreq., ACTG 306. Reporting requirements and generally accepted accounting principles applicable to state and local governmental units.

- ACTG 426 - Acctg for Nonprofits

  Credits: 1. Offered spring. Prereq., junior standing in Business or consent of instr. Prereq., or coreq., ACTG 306. Reporting requirements and generally accepted accounting principles applicable to nonprofit entities, including colleges/universities.

- ACTG 432 - Income Tax Practicum

Credits: 1. Offered spring. Prereq., junior standing in Business. Service course that provides free tax preparation to low income taxpayers and students, in conjunction with the IRS. Students apply their knowledge of tax law to the preparation and e-filing of income tax returns under the direction of a practicing CPA. Designated as a service learning course. Graded credit/no credit only. Course Attributes: Internships/Practicums Service Learning/Volunteer Service Learning

- ACTG 491 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing in Business and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ACTG 492 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of inst.

- ACTG 494 - Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- ACTG 498 - Internship

  Credits: 1 TO 6. Offered every term. Prereq., junior standing in Business and consent of instr. Students are placed with private or governmental organizations to receive on-the-job training. Written reports are required. A maximum of 3 credits count toward graduation. Course Attributes: Internships/Practicums

- ACTG 509 - Financial Rptg & Control

  Credits: 3. Online course. Offered spring. Prereq., admission to M.B.A. or M-Acct. program or graduate standing with consent of graduate business program director. Reporting and using financial information of an enterprise, with a focus on internal and external decision-making. Topics include analysis and recording financial transactions, understanding how these events affect financial statements, and using quantitative tools for internal decision-making. Level: Graduate

- ACTG 605 - Administrative Controls

  Credits: 2. Offered autumn. Prereq., admission to the M.B.A. program. Not open to M-Acct. students. The application of accounting information to managerial and financial decision making. Level: Graduate

- ACTG 615 - Accounting Theory

  Credits: 3. Offered autumn or spring. Prereq., cumulative GPA of 3.0 or better in all accounting fundamental courses taken to date, Business core, accounting core, and admission to M-Acct. program or consent of accounting graduate director. A critical analysis of the concepts underlying the development and application of financial accounting in the United States. Coverage of current accounting standards as well as other current topics in financial accounting. Level: Graduate

- ACTG 616 - Adv. Financial Topics

  Credits: 3. Offered fall or spring. Prerq., cumulative GPA of 3.0 or better in all accounting fundamental courses taken to date, business core, accounting core, admission to M-Acct. program or consent of accounting graduate director. Study of financial accounting topics requiring complex treatment, such as accounting for business combinations, consolidations, investments in other entities, and accounting for non-corporate for-profit entities. Level: Graduate

- ACTG 631 - Advanced Tax

  Credits: 3. Offered autumn or spring. The application of the federal income tax law to corporations and partnerships, and special problems associated with taxation of trusts, estates and gifts. Level: Graduate

- ACTG 632 - Adv Income Tax Prac

  Credits: 1. Offered spring. Prereq., graduate student in business or consent of accounting graduate director and instr. Service course that provides free tax preparation to low income taxpayers and students, in conjunction with the IRS. Graduate students apply their knowledge of tax law to the preparation and e-filing of income tax returns under the direction of a practicing CPA, review the work of undergraduate preparers, and assist in the organization and training of undergraduate preparers. Designated as a service-learning course. Grade option credit/no credit only. Level: Graduate Course Attributes: Internships/Practicums Service Learning/Volunteer Service Learning

- ACTG 641 - Advanced Auditing

  Credits: 3. Offered autumn or spring. Prereq., admissions to M-Acct., cumulative GPA of 3.0 or better in all accounting fundamental courses taken to date, ACTG 411, graduate student in business or consent of accounting graduate director. Research cases in auditing and coverage of contemporary topics in auditing, typically including attestation standards, other reports and services, legal and ethical environment, and fraud detection. Level: Graduate

- ACTG 643 - Fraud/Forensic Acct

  Credits: 2 TO 3. Offered intermittently. Prereq., admission to M-Acct., with grade of B or better in ACTG 321 and 411 or equivalents, or consent of M-Acct. director. A study of fraud motivations, techniques, prevention, and detection. Includes the study of forensic accounting using forensic science, information security, and other forensic auditing/investigation tools and techniques, as they apply in various fraud and financial contexts. Level: Graduate

- ACTG 661 - Acct Law & Ethics

  Credits: 3. Offered autumn or spring. Prereq., cumulative GPA of 3.0 or better in all accounting fundamental courses taken to date, Business core, admission to M-Acct. program or consent of accounting graduate director. Legal issues from the common law and appropriate statutes applicable to the public practice of accounting. The professional responsibilities and ethics of a practicing CPA. Level: Graduate

- ACTG 675 - Contemporary Acct Problems

  Credits: 4. Offered first summer session. Prereq. or coreq., cumulative GPA of 3.0 or better in all accounting fundamental courses taken to date, student must be in good academic standing, ACTG 611, 615, 631, 641, and 661. Integration of accounting theory and practice. Primarily for the student preparing to take the uniform CPA examination. Graded only credit/no credit. Level: Graduate

- ACTG 694 - Seminar

  Credits: 1 TO 3. (R-15) Offered intermittently. Prereq., graduate student in business or consent of business graduate director. Selected topics in accounting. Level: Graduate

- ACTG 696 - Independent Study

  Credits: 1 TO 9. (R-6) Offered every term. Prereq., graduate student in business or consent of business graduate director and consent of instr. Directed study of individual or small groups of students in topics not available in scheduled classes. Level: Graduate Course Attributes: Independent Study

- ACTG 698 - Internship

  Credits: 1 TO 6. (R-3) Offered every term. Prereq., graduate student in business or consent of business graduate director and consent of instr. Placements with private or governmental organizations for practical training. Written reports required. Level: Graduate Course Attributes: Internships/Practicums

- ACTG 699 - Thesis

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., graduate student in business or consent of business graduate director. Grade option credit/no credit only. Level: Graduate

Business Finance

Back to Top

- BFIN 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BFIN 192 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Course material appropriate to the needs and objectives of the individual student.

- BFIN 205S - Personal Finance

  Credits: 3. Offered intermittently. Concepts, strategies and techniques in analyzing financial situations and investment opportunities from the individual's perspective. Course Attributes: Social Sciences Course (S)

- BFIN 292 - Independent Study

  Credits: 1 TO 3. (R-3) Course material appropriate to the needs and objectives of the individual student.

- BFIN 298 - Internship

  Credits: 1 TO 3. (R-3) Offered every term. Extended classroom experience which provides practical application of classroom learning during placements within the business community. The student must complete a learning agreement with a faculty member, relating the placement opportunity to his or her field of study. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internship graduation limit 6

- BFIN 301 - Analysis of Finan Statements

  Credits: 3. Offered intermittently. Prereq., junior standing in Business. Analysis of balance sheets, income and cash flow statements and statements of owners' equity in terms of structure, strategy and performance of the company being analyzed. Emphasis is on the use rather than preparation of financial statements.

- BFIN 322 - Business Finance

  Credits: 3. Offered every term. Prereq., junior standing in Business. The methodology and practice of business financial decisions.

- BFIN 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing in Business and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BFIN 392 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- BFIN 394 - Undergraduate Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- BFIN 410 - $50,000 Portfolio

  Credits: 3. Offered intermittently. Prereq., junior standing in Business, grade of C or better in BFIN 322, and consent of department chair. Students manage a diversified investment portfolio for a semester. Students analyze and discuss investment opportunities and implement their decisions.

- BFIN 420 - Investments

  Credits: 3. Offered autumn. Prereq., junior standing in Business, grade of C or better in BFIN 322 or consent of instr. Principles, practices and methodology in investment analysis and portfolio management.

- BFIN 421 - Real Estate Invtmnt & Analysis

  Credits: 3. Offered intermittently. Prereq., junior standing in Business and BFIN 322 with a C or better, or consent of instr. Introduction to the principles and practices of real estate. Includes the study of real estate law, financing, valuation, brokerage and land use.

- BFIN 424 - Markets, Instns & Fin Enginrng

  Credits: 3. Offered spring. Prereq., junior standing in Business, BFIN 322 with C or better and BFIN 429 with C- or better or BFIN 439 with C- or better, or consent of instr. Topics covered include operations and analysis of the national and international money and capital markets as they affect financial institutions and usage of derivatives to hedge risks.

- BFIN 429 - Fin Mgmt I:Thry/Analysis

  Credits: 3. Offered spring. Prereq., junior standing in Business, grade of C or better in BFIN 322 and ECNS 202S or consent of instr. Understanding the practice of business investment and working capital decisions. Computer models and cases used to demonstrate the management process.

- BFIN 439 - Fin Mgmt II: Analysis/Problems

  Credits: 3. Offered autumn. Prereq., junior standing in Business, grade of C or better in BFIN 322 and ECNS 202S or consent of instr. Topics include business valuation techniques, capital structure, raising capital, mergers and acquisitions, working capital management, and multinational financial management. Course uses computer models and cases to emphasize analysis and decision making.

- BFIN 450 - Banking

  Credits: 3. Offered spring. Prereq., junior standing in Business, grade of C or better in BFIN 322, or consent of instr. The financial management of banking institutions including financial analysis, interest rate risk management, liquidity management, investment and loan portfolio management.

- BFIN 473 - Multinational Financial Mgmt

  Credits: 3. Offered autumn. Prereq., junior standing in Business, BFIN 322 and ECNS 202S, or consent of instr. Students are strongly encouraged to complete BGEN 360 prior to BFIN 473. Topics include financial skills required of corporate executives in international business, exchange rate risk analysis, analysis of global financial systems and assessment of real international investments.

- BFIN 491 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing in Business and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- BFIN 492 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., junior standing in Business and consent of instr.

- BFIN 494 - Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing in Business and consent of instr.

- BFIN 498 - Internship

  Credits: 1 TO 6. Offered every term. Prereq., junior standing in Business and consent of instr. Students are placed with private or governmental organizations to receive on-the-job training. Written reports are required. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- BFIN 522 - Prin Financial Analysis

  Credits: 3. Online course. Offered summer. Prereq., admission to M.B.A. or M-Acct. program or graduate standing with consent of graduate business program director; grade of B or better in ACTG 509. Introduction to financial management and the application of these principles to business decisions. Topics include financial analysis, time value of money, theories of risk and return, stock and bond valuation, capital budgeting, cost of capital, and working capital management. Level: Graduate

- BFIN 651 - Cornerstone of Grad Fin

  Credits: 1. Offered fall. Course is designed to prepare M-Acct. and MBA students who desire an improved foundation in corporate finance. Level: Graduate

- BFIN 681 - Financial Management

  Credits: 2. Offered autumn. Prereq., admission to the M.B.A. or admission to the M-Acct. programs. Advanced theory and analysis in corporate financial management. Level: Graduate

- BFIN 694 - Seminar

  Credits: 1 TO 15. (R-15) Offered intermittently. Prereq., graduate student in business or consent of business graduate director. Selected topics in finance. Level: Graduate

Business: General

Back to Top

- BGEN 445 - Sustainability Reporting

  Credits: 3. Offered spring. Prereq., junior, senior, or graduate standing. This course provides students with an understanding of sustainability reporting by organizations. Topics covered include sustainability reporting metrics for the public disclosure of the economic, environmental, and social impacts of organizations. Regulation of sustainability reporting, greenwashing, and external assurance of sustainability reports are also covered.

The undergraduate accounting program is committed to preparing students to apply accounting and business knowledge in organizations. Students develop competence in a broad range of accounting practices. The curriculum strives to foster critical thinking and problem-solving skills. Students are prepared to enter professional positions in accounting with business, nonprofit, or government organizations. Accounting programs in the School of Business Administration hold separate AACSB International accreditation.

See the School of Business Administration section of the catalog for additional credit restrictions and residency requirements.

Bachelor of Science - Accounting

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 76

Required Cumulative GPA: 2.0

Note: At least 54 credits must be earned in Business classes (ECNS, SoBA internship courses, and SoBA faculty-led study abroad courses may be counted in OR out of Business). A minimum GPA of 2.0 is required for these courses.
At least 60 credits must be earned outside of SoBA (excluding HHP/ACT activities courses).
No more than 30 credits of ACTG (including ACTG 201 and ACTG 202) may count towards the 120 credits required to graduate.
At least 28 credits in business, the capstone courses, AND all required 400-level accounting courses must be taken at UM.
All Business credits transferred in after matriculating to UM must be pre-approved by the department chair in your major.

SoBA - Lower Primary Core Courses

Rule: All courses are required

Note: Unless a higher requirement is specified, all lower primary core courses must be completed with a C- or better and a 2.0 GPA in the seven (7) listed courses prior to admission into an upper-division Business Major. A minimum grade of C or better is required for ACTG 201 and ACTG 202 as a prerequisite for ACTG 203 and ACTG 305.
A math course and a statistics course are also required in the lower primary core. See Math Requirements and Symbolic Systems Requirements below. Math 3-4 credits, Symbolic Systems 3-4 credits, Stat is a primary lower core course.

	Course	Credits
	ACTG 201 - Principles of Fin Acct Offered every term. Prereq. or Coreq. M 115, M 121, M 151 or M 162. Introduction to financial accounting concepts, including transactions analysis, financial statement analysis, and corporate financial reporting practices.	3 Credits
	ACTG 202 - Principles of Mang Acct Offered every term. Prereq., ACTG 201 and M 115, M 121, M 151 or M 162. Continuation of ACTG 201 with a focus on managerial accounting topics.	3 Credits
	BMIS 270 - MIS Foundations for Business Offered every term. Prereq., WRIT 101. Introduces the development, use, and management of computer-based information systems.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

SoBA Math Requirement

Rule: Students choose one course from the list below to fulfill their Math Requirement

Note: SoBA requires that credit be earned for one of the math courses below (with a C- or better) before enrolling in ACTG 202.
A student's result on the ALEKS Math Placement Exam does not waive this math requirement.

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits

Minimum Required Grade: C-	3 Total Credits Required

SoBA – Lower Secondary Core Courses

Rule: All courses are required

Note: All courses must be completed with a "C-" or better to satisfy prerequisites for certain major, upper core, or capstone courses. Students are advised to complete these courses prior to being admitted to an upper-division Business Major. Prerequisites are strictly enforced.

	Course	Credits
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits

Introduction to auditing with emphasis on the independent audit of financial statements. Coverage includes professional standards, ethics, audit risk, evidence, internal controls, procedures, opinions, operational and compliance auditing.	3 Credits
	ACTG 425 - State & Local Gov't Acctg Offered spring. Prereq., junior standing in Business or consent of instr. Prereq., or coreq., ACTG 306. Reporting requirements and generally accepted accounting principles applicable to state and local governmental units.	2 Credits
Minimum Required Grade: C-		21 Total Credits Required

Accounting Major - Electives

Rule: Take 3 credits from the list below.

Note: No more than 3 credits of ACTG 498 may count towards the 120 credits required to graduate.
No more than 30 credits of ACTG (including ACTG 201 and ACTG 202) may count towards the 120 credits required to graduate.
See MAcct Director for information pertaining to the Master's of Accountancy Program or taking the CPA exam.

	Course	**Credits**

	ACTG 307 - Corporate Reporting III Offered spring. Prereq., junior standing in Business and ACTG 305; prereq., or coreq., ACTG 306, or consent of instr. Application of accounting principles to complex issues such as post-retirement benefits, accounting changes, bankruptcies, reorganizations, income taxes and other topics.	2 Credits
	ACTG 420 - Cost/Mgmt Acct II Offered intermittently. Prereq., senior standing in Business and ACTG 410 or consent of instr. Advanced cost management with emphasis on how financial and non-financial information helps managers make better decisions in a wide variety of business and not-for-profit organizations. Current readings in cost management and related topics.	3 Credits
	ACTG 426 - Acctg for Nonprofits Offered spring. Prereq., junior standing in Business or consent of instr. Prereq., or coreq., ACTG 306. Reporting requirements and generally accepted accounting principles applicable to nonprofit entities, including colleges/universities.	1 Credits
	ACTG 432 - Income Tax Practicum Offered spring. Prereq., junior standing in Business. Service course that provides free tax preparation to low income taxpayers and students, in conjunction with the IRS. Students apply their knowledge of tax law to the preparation and e-filing of income tax returns under the direction of a practicing CPA. Designated as a service learning course. Graded credit/no credit only.	1 Credits
	ACTG 498 - Internship Offered every term. Prereq., junior standing in Business and consent of instr. Students are placed with private or governmental organizations to receive on-the-job training. Written reports are required. A maximum of 3 credits count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA - Capstone Courses

Rule: All courses are required

Note: Students must complete all lower primary and secondary core and upper core courses and their prerequisites and have an approved graduation application to register for their capstones.

Students must pass the required comprehensive exam as well as all requisite coursework to earn a passing grade in BGEN 499. BGEN 499 must be taken at UM.

	Course	**Credits**
	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

SoBA Upper-Division Writing Requirement

Rule: All courses are required

	Course	Credits
	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Symbolic Systems Requirement

Rule: Students complete STAT 216 (preferred) or one other course from the list below to fulfill the Symbolic Systems Requirement.

Note: This is a primary lower core course. SoBA requires that credit be earned for STAT 216 (preferred) or one of the other statistics courses below (with a C- or better) prior to being admitted into an upper-division SoBA major.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

SoBA Expressive Arts Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Social Science Requirement

Rule: All courses are required

Note: This is a primary lower core course and must be completed with a C- or better prior to a student being admitted into an upper-division SoBA major.

	Course	Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Ethical & Human Values Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	Credits
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Finance B.S.

The finance curriculum is designed to equip students with a comprehensive foundation in financial management, financial markets and investments. Students will gain competence in making effective decisions, performing complex analyses, providing expert financial advice and utilizing current technology tools and data sources.

Basic Requirements for Finance Major

All students must complete a faculty-approved plan of study during the first semester of their junior year. The plan of study is available from a finance faculty advisor and must be completed and signed by the faculty advisor. Failure to implement and adhere to a program of study may delay graduation. Some courses have grade requirements in the prerequisite course (see the catalog course descriptions). Many of these courses may be taught once a year, so students should see their advisor for the schedule each academic year.

Bachelor of Science - Finance

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 76

Required Cumulative GPA: 2.0

Note: At least 54 credits must be earned in Business classes (ECNS, SoBA internship courses, and SoBA faculty-led study abroad courses may be counted in OR out of Business) A minimum GPA of 2.0 is required for these courses.
At least 60 credits must be earned outside of SoBA (excluding HHP/ACT activities courses).
At least 28 credits in business AND all required 400-level finance courses must be taken at UM.
All business credits transferred in after matriculating to UM must be pre-approved by the department chair in your major.

SoBA - Lower Primary Core Courses

Rule: All courses are required

Note: Unless a higher grade requirement is specified, all Lower primary core courses must be completed with a C- or better and a 2.0 GPA must be earned in the seven (7) listed courses prior to admission into an upper-division Business Major.
A math course and a statistics course are also required as part of the lower primary core. See Math Requirements and Symbolic Systems Requirements below. Math 3-4 Credits
Symbolic Systems 3-4 Credits

	Course	Credits
	ACTG 201 - Principles of Fin Acct Offered every term. Prereq. or Coreq. M 115, M 121, M 151 or M 162. Introduction to financial accounting concepts, including transactions analysis, financial statement analysis, and corporate financial reporting practices.	3 Credits
	ACTG 202 - Principles of Mang Acct Offered every term. Prereq., ACTG 201 and M 115, M 121, M 151 or M 162. Continuation of ACTG 201 with a focus on managerial accounting topics.	3 Credits
	BMIS 270 - MIS Foundations for Business Offered every term. Prereq., WRIT 101. Introduces the development, use, and management of computer-based information systems.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits

	WRIT 101 - College Writing I UM: Offered every term. Prereq., WRIT 095 or proof of passing score on writing diagnostic examination, referral by WRIT 095 instructor-SAT writing score at or above 440, MUSWA at or above 3.5, SAT/ACT essay score at or above 7, or ACT Combined English/Writing score at or above 18. Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Credit not allowed for both WRIT 101 and COM 101. Grading A-F, or NC (no credit). MC: Offered every term. Prereq., WRIT 095 or proof of appropriate SAT/ACT essay, English/Writing, writing section scores, appropriate MUSWA scores, or proof of passing scores on Writing Placement Exam). Expository prose and research paper; emphasis on structure, argument, development of ideas, clarity, style, and diction. Students expected to write without major faults in grammar or usage. Grading A-F, or NC (no credit).	3 Credits
Minimum Required Grade: C-		21 Total Credits Required

SoBA Math Requirement

Rule: Students choose one from the list below to fulfill their Math Requirement

Note: The Finance Department encourages that a student take M 162 to complete his or her math requirement to better prepare the student for a major in Finance. However, M 115, M 121, or M 151 will be accepted for students who choose not to take M 162.
SoBA requires that credit be earned for one of the math courses below (with a C- or better) before enrolling in ACTG 202.
A student's result on the ALEKS Math Placement Exam does not waive this math requirement.

	Course	**Credits**
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA – Lower Secondary Core Courses

Rule: All courses are required

Note: All courses must be completed with a "C-" or better to satisfy BFIN 322, prerequisites for certain major, upper core, or capstone courses. Students are advised to complete these courses prior to being admitted to an upper-division Business Major. Prerequisites are strictly enforced.

	Course	Credits
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
	ECNS 202S - Principles of Macroeconomics Offered every term. Prereq., ECNS 201S. The determination of the level of national economic activity, inflation, economic instability, the role of money and financial institutions, and selected topics in public economic policy.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

SoBA - Upper Core

Rule: All courses are required

Note: BFIN 322 must be completed with a C or higher as a prerequisite to the finance major requirements. All upper core courses must be completed before the capstones can be taken. A student must be listed as a major or minor in business to take these courses. Major or minor in business is defined as junior standing with all primary lower core courses completed, a 2.0 cumulative GPA, and formally admitted to the major or minor.

	Course	Credits

	BFIN 322 - Business Finance Offered every term. Prereq., junior standing in Business. The methodology and practice of business financial decisions.	3 Credits
	BGEN 361 - Principles of Business Law Offered autumn and spring. Prereq., junior major or minor in business. This course examines law as it applies to business transactions. Topics include the nature and sources of law; courts and procedure; contracts, employment; Uniform Commercial Code; property; environmental; business organizations; tort liability; insurance; consumer and creditor protection; bankruptcy; criminal law; and agency law. Credit not allowed for more than one of BGEN 235, BGEN 361 and BADM 257.	3 Credits
	BMGT 322 - Operations Management Offered every term. Prereq., junior major in Business, CSCI 172. A survey of the processes that organizations, public or private, use to produce goods and services. Includes management science topics.	3 Credits
	BMGT 340 - Mgmt & Organization Behavior Offered autumn and spring. Prereq., junior standing in Business. An intensive examination of the fundamentals of management and organization supported by the application of behavioral science principles to the management of people in organizations.	3 Credits
	BMKT 325 - Principles of Marketing Offered autumn and spring. Prereq., junior standing in Business. The marketing environment, product, price, distribution, and promotion strategies including government regulation and marketing ethics.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Finance Major - Requirements

Rule: All courses are required

Note: Finance major courses only offered once per academic year.
All required 400-level finance courses must be taken at UM.

	Course	**Credits**
	BFIN 420 - Investments Offered autumn. Prereq., junior standing in Business, grade of C or better in BFIN 322 or consent of instr. Principles, practices and methodology in investment analysis and portfolio management.	3 Credits
	BFIN 424 - Markets, Instns & Fin Enginrng Offered spring. Prereq., junior standing in Business, BFIN 322 with C or better and BFIN 429 with C- or better or BFIN 439 with C- or better, or consent of instr. Topics covered include operations and analysis of the national and international money and capital markets as they affect financial institutions and usage of derivatives to hedge risks.	3 Credits

	BFIN 429 - Fin Mgmt I:Thry/Analysis Offered spring. Prereq., junior standing in Business, grade of C or better in BFIN 322 and ECNS 202S or consent of instr. Understanding the practice of business investment and working capital decisions. Computer models and cases used to demonstrate the management process.	3 Credits
	BFIN 439 - Fin Mgmt II: Analysis/Problems Offered autumn. Prereq., junior standing in Business, grade of C or better in BFIN 322 and ECNS 202S or consent of instr. Topics include business valuation techniques, capital structure, raising capital, mergers and acquisitions, working capital management, and multinational financial management. Course uses computer models and cases to emphasize analysis and decision making.	3 Credits
	BFIN 450 - Banking Offered spring. Prereq., junior standing in Business, grade of C or better in BFIN 322, or consent of instr. The financial management of banking institutions including financial analysis, interest rate risk management, liquidity management, investment and loan portfolio management.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Finance Major - Electives

Rule: Take 9 credits from the list below.

Note: BFIN 205S is encouraged for Finance majors, but does not count as an elective for the Finance Major.

Note: These 9 credits are selected in consultation with your faculty advisor. A signed track sheet reflecting these courses is required on file in the SoBA Advising Office.
ACTG 305 and ACT 321 have a co-requisite of ACTG 203.
Up to 3 credits of BFIN 498 can count towards the 9 credit elective requirement.

	Course	**Credits**
	ACTG 305 - Corporate Reporting I Offered every term. Prereq., junior standing in Business, ACTG 201 and 202 with grades of C or better or consent of instr. Prereq., or Coreq., ACTG 203. Topics include concepts in financial accounting, assets and related income statement accounts.	3 Credits
	ACTG 321 - Acct Information Systems I Offered autumn and spring. Prereq., junior standing in Business. Prereq., or coreq., ACTG 203. Provides thorough understanding of business processes, risks, and internal controls. Computer applications may be used to demonstrate concepts.	3 Credits
	ACTG 410 - Cost/Mgmt Acct I Offered autumn and/or spring. Prereq., junior standing in business or consent of instr. The study of cost management for business and other organizations. Emphasis on how information about costs helps managers make better decisions.	3 Credits

	BFIN 301 - Analysis of Finan Statements Offered intermittently. Prereq., junior standing in Business. Analysis of balance sheets, income and cash flow statements and statements of owners' equity in terms of structure, strategy and performance of the company being analyzed. Emphasis is on the use rather than preparation of financial statements.	3 Credits
	BFIN 473 - Multinational Finance and FDI Offered autumn. Prereq., junior standing in Business, BFIN 322 and ECNS 202S, or consent of instr. Students are strongly encouraged to complete BGEN 360 prior to BFIN 473. Topics include financial skills required of corporate executives in international business, exchange rate risk analysis, analysis of global financial systems and assessment of real international investments.	3 Credits
	BFIN 498 - Internship Offered every term. Prereq., junior standing in Business and consent of instr. Students are placed with private or governmental organizations to receive on-the-job training. Written reports are required. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
	ECNS 301 - Intermediate Micro with Calc Offered spring and autumn. Prereq., ECNS 201S and M 162 or equiv. Analysis of consumer behavior, production, factor pricing, externalities and public goods.	3 Credits
	ECNS 302 - Intermediate Macroeconomics Offered autumn and spring. Prereq., ECNS 202S. Analysis of national income determination, unemployment, and inflation with emphasis on the role of fiscal and monetary policy.	3 Credits
	ECNS 403 - Introduction to Econometrics Offered autumn. Prereq., an introductory statistics course. Quantitative methods in economics with emphasis on regression analysis.	4 Credits
Minimum Required Grade: C-		9 Total Credits Required

SoBA - Capstone Course

Rule: All courses are required.

Note: Students must complete all lower primary and secondary core and upper core courses (and their prerequisites) and have an approved graduation application to register for their capstone.
Students must pass the required comprehensive exam as well as all requisite coursework to earn a passing grade in BGEN 499. BGEN 499 must be taken at UM

	Course	**Credits**
	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Upper-Division Writing Requirement

Rule: All courses are required

	Course	Credits
	BGEN 499 - Strategic Management Prereq., senior standing in Business, COMX 111A, ECNS 202S, BGEN 220E and all business core. Analysis of external and internal firm environment and strategy formulation. Integration of cumulative business knowledge. Case orientation and class discussion.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Symbolic Systems Requirement

Rule: Student's complete STAT 216 (preferred) or one other course from the list below to fulfill the Symbolic Systems Requirement.

Note: This is a primary lower core course. SoBA requires that credit be earned for STAT 216 (preferred) or one of the other statistics courses below (with a C- or better) prior to being admitted into an upper-division SoBA major.

	Course	Credits
	FORS 201 - Forest Biometrics Offered autumn. Prereq., M 115 or M 121 or M 122 or M 151 or M 162 or M 171 or M 172. Introduction to probability and statistical methods for forestry and environmental sciences covering natural resource applications of common probability distributions, data analysis, hypothesis testing, and regression.	3 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

SoBA Expressive Arts Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	Credits

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Social Science Requirement

Rule: All courses are required

Note: This is a lower primary core course and must be completed with a C- or better prior to being admitted to an upper division SoBA major.

	Course	Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

SoBA Ethical & Human Values Requirement

Rule: All courses are required

Note: Students must complete this course with a C- or better prior to taking the capstones, though earlier completion is strongly encouraged.

	Course	Credits
	BGEN 220E - Bus Ethics & Soc Responsiblty Offered autumn and spring. Focuses on moral judgments, responsibilities to society and their impact on decision making, with particular emphasis on business ethics and values. Addresses organizations and their relationship to the external environment, the law, and various stakeholders.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Accounting Info Systems Certificate

Certificate of Art - Accounting Information Systems

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 25

Required Cumulative GPA: 3.0

Note: All students pursuing an AIS Certificate must also complete the degree requirements for one of the business majors.
The 3.0 GPA requirement pertains specifically to the 25 credits listed below, not a student's cumulative GPA. Please meet with an AIS Certificate Advisor for assistance (see SoBA Advising for list of advisors by major).

Accounting Information Systems Certificate - Requirements

Rule: All courses are required

Note: See individual course descriptions in the catalog for additional grade and prerequisite requirements.

	Course	Credits
	ACTG 203 - Accounting Lab Offered every term. Prereq., ACTG 201 with a grade of C or better. Applying accounting cycle concepts to comprehensive hands-on financial statement cases and/or a practice set and exploring career options.	1 Credits
	ACTG 305 - Corporate Reporting I Offered every term. Prereq., junior standing in Business, ACTG 201 and 202 with grades of C or better or consent of instr. Prereq., or Coreq., ACTG 203. Topics include concepts in financial accounting, assets and related income statement accounts.	3 Credits
	ACTG 306 - Corporate Reporting II Offered every term. Prereq., junior standing in Business, ACTG 203, ACTG 305 with grades of C or better, or consent of instr. Continuation of ACTG 305. Topics include concepts in financial accounting, coverage of the liability and equity side of the balance sheet, the cash flow statement, and several special financial accounting topics.	3 Credits
	ACTG 321 - Acct Information Systems I Offered autumn and spring. Prereq., junior standing in Business. Prereq., or coreq., ACTG 203. Provides thorough understanding of business processes, risks, and internal controls. Computer applications may be used to demonstrate concepts.	3 Credits
	ACTG 411 - Auditing I Offered spring. Prereq., junior standing in Business, ACTG 321 and ACTG 306, or consent of instr. Introduction to auditing with emphasis on the independent audit of financial statements. Coverage includes professional standards, ethics, audit risk, evidence, internal controls, procedures, opinions, operational and compliance auditing.	3 Credits
	BMIS 365 - Business App Development Offered autumn and spring. Prereq., junior standing in Business. Provides an understanding of algorithm development, programming, computer concepts and the design and application of data and file structures.	3 Credits
	BMIS 370 - Managing Information and Data Offered autumn and spring. Prereq., junior standing in Business and BMIS 365. Managing and exploiting organizational data and information. Designing data and information models.	3 Credits
	BMIS 373 - Business System Analy & Design Offered autumn and spring. Prereq., junior standing in Business. Provides an understanding of the systems development and modification process, including requirements determination, logical design, physical design, test planning, implementation planning and performance evaluation.	3 Credits

	BMIS 479 - Introduction to Consulting Offered intermittently. Prereq., junior standing in Business. Managerial approach to consulting engagements. Includes scoping and writing proposals, presenting to clients, documenting consulting work, and interpersonal skills necessary for successful consulting. Course does not require a technical background.	3 Credits
Minimum Required Grade: C-		25 Total Credits Required

International Business Major

Klaus Uhlenbruck, Chair

The Department of Management and Marketing offers three majors within the Bachelor of Science in Business Administration: International Business, Management, and Marketing.

International Business B.S.

Bachelor of Science - International Business

School of Business Admin

Catalog Year: 2016-2017

Degree Specific Credits: 30

Required Cumulative GPA: 2.0

Note: At least 54 credits must be earned in Business classes (ECNS, SoBA internship courses, and SoBA faculty-led study abroad courses may be counted in OR out of Business) A minimum GPA of 2.0 is required for these courses.
At least 60 credits must be earned outside of SoBA (excluding HHP/ACT activities courses).
At least 28 credits in business must be taken at UM.
All business credits transferred in after matriculating to UM must be pre-approved by the department chair in your major.
In addition to the below requirements, students seeking a major in International Business must complete all degree requirements for a major in ACCT, FIN, MGMT, MIS, or MKTG.

International Business Major

Rule: All courses are required

Note: null

	Course	**Credits**
	BFIN 473 - Multinational Finance and FDI Offered autumn. Prereq., junior standing in Business, BFIN 322 and ECNS 202S, or consent of instr. Students are strongly encouraged to complete BGEN 360 prior to BFIN 473. Topics include financial skills required of corporate executives in international business, exchange rate risk analysis, analysis of global financial systems and assessment of real international investments.	3 Credits
	BGEN 360 - International Business Offered autumn and spring. Prereq., junior standing in Business. Analysis of business in diverse parts of the globe. Examines the impact of socio-economic, political, legal, educational, and cultural factors on management.	3 Credits

	BMGT 467 - Supply Chain Management Offered Spring. Prereq., BMGT 322 and BMKT 325, or consent of instructor. The course introduces students to the challenges and opportunities companies face and how they manage the risk associated with the global supply chain. It provides an overview of global supply chain operations management as a field and describes the strategic role it has in today's intensely competitive business environment.	3 Credits
	BMGT 480 - Cross-Cultural Mgmt Offered autumn. Prereq., junior standing in Business. Study of issues related to cultural diversity within the work force and the problems inherent in the management of a firm's activities on an international scale.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

International Business Major - Foreign Language Requirement

Rule: Four semesters or equivalent of one foreign language is required.

Note: A student may be exempt from this requirement if using English as a Second Language. Please see the International Business Advisor for assistance.

Minimum Required Grade: C-

16 Total Credits Required

International Business Major - Track Courses

Rule: Take 6 credits in approved track courses.

Note: These 6 credits are selected in consultation with your faculty advisor. A signed track sheet reflecting these courses is required on file in the SoBA Advising Office.

Minimum Required Grade: C-

6 Total Credits Required

School of Journalism

Larry Abramson, Dean

Dennis Swibold, Director of Faculty Affairs

Courses in the School of Journalism examine the news media -- emphasizing their history, privileges and ethical responsibilities -- and provide instruction in skills required for a wide array of careers that require gathering, verifying and disseminating news and information in the Digital Age. The School of Journalism offers a Bachelor of Arts in Journalism and a Minor in Journalism. Students select courses in writing, reporting, producing, directing, editing and still and video photography. They train to work across multiple platforms including online, audio, video, newspaper and magazine.

A quality education in journalism is built on a strong liberal arts foundation. Students at the pre-professional level are required to take courses outside journalism, including courses in Political Science, Business/Economics and History. They must complete the University's general education requirements as well.

For further information about the school's Master's of Arts program in Environmental and Natural Resource Journalism, contact the Director of Graduate Studies in Journalism, Henriette Löwisch, School of Journalism, University of Montana, Missoula, MT 59812, or (406) 243-2227.

Pre-Professional Program

In the first three or four semesters of study students are enrolled in pre-journalism and take courses in the major and in the liberal arts and sciences. Journalism courses in the pre-professional curriculum must be taken at University of Montana-Missoula, though the directors may occasionally accept substitutes taught at another schools with programs accredited by the Accrediting Council for Education in Journalism and Mass Communications. All non-journalism courses in the curriculum may be completed at any college or university if transfer credits are accepted by UM. Students may enter the pre-professional program during either autumn or spring semester.

Professional Program

Students may apply for admission to the professional program in Journalism once they have successfully completed the pre-professional curriculum. Applications are accepted in autumn and spring. Deadlines for applications are the last Monday of September and February.

Students may apply for admission to the professional program in either semester, but they must have completed at least 45 credits before applying. In addition, applicants must have either completed all courses listed in the pre-professional curriculum or be taking the courses needed to complete the requirements during the semester in which they apply.

An overall grade point average of 2.5, and a GPA of at least 2.5 in the journalism core courses, is required of applicants.

Completed applications are evaluated by the School of Journalism directors and acceptances are made by the dean based on the director's recommendations. The primary admissions criteria are grade point averages, both overall and in the pre-professional program, and progress in completing the pre-professional curriculum. Successful applicants will have demonstrated, among other qualities, promise and professional aptitude through the quality of their course work and their overall performance in the pre-professional program, and will have demonstrated an interest in pursuing a career in journalism. Students with deficiencies in these requirements may on occasion be admitted provisionally. Once deficiencies are removed the student will be given full admission status.

Applications for admission to the professional programs may be obtained online at the School's website. A $15 nonrefundable application fee and transcripts of all academic work must accompany the application. Admission for one academic year cannot be deferred to another academic year without the written consent of the academic director.

Students transferring from other ACEJMC-accredited programs may be admitted on a space available basis. Transfer credit for pre-professional and professional courses taken at other institutions is accepted only for those courses that are deemed equivalent and in which a letter grade of C or better is obtained.

Academic Progression

The general University academic standing requirements are listed separately in this catalog. See index.

Students enrolled in the professional journalism program must maintain satisfactory academic progress. Admission to the professional program requires a cumulative grade average of 2.5 and a pre-journalism course average of 2.5. Any student who has been admitted and whose grade average subsequently falls below a 2.5 must meet with his or her adviser to discuss the student's progress before classes resume the following semester. A student in the professional program who has a cumulative or professional grade point average less than 2.0 will be suspended from the program.

A student dismissed from the program for substandard performance will not be readmitted, except in cases where substantiation is made to the faculty, by written petition, that the substandard performance was the result of circumstances that no longer exist, or that the student has demonstrated the capability and desire to perform satisfactory work since dismissal from the program.

A student leaving the journalism professional program for any reason, whether in good standing or on academic suspension, must reapply for admission.

Journalism B.A.

Bachelor of Arts - Journalism

School of Journalism

Catalog Year: 2016-2017

Degree Specific Credits: 37

Required Cumulative GPA: 2.5

Note: Degree Specific Requirements: must complete at least 37 and no more than 48 JRNL credits. Students must complete at least 72 total credits outside of Journalism.

Pre-Journalism Courses

Rule: 2.5 overall GPA and 2.5 GPA in pre-journalism core.

Note: The lower division core must be completed prior to admission to the School of Journalism professional program. The department strongly recommends students complete 2 semesters of the same foreign language before applying to the professional program.

Minimum Required Grade: C-

38 Total Credits Required

Core Requirements

Rule: Complete with at least a 2.5 in this core.

Note: Must complete these courses in order to apply to the professional programs.

	Course	Credits
	JRNL 100H - Media History and Literacy Offered autumn. A survey of the history, development and role of the media in society, including newspapers, magazines, radio, television, books, movies, recordings and the World Wide Web. The course examines ethical, political, financial and other issues related to mass media. Also included is an introduction to media literacy and critical thinking about the media and their messages.	3 Credits

	JRNL 170 - Elements of News Writing Offered autumn and spring. Prereq. or Co-req., grade of C- or better in WRIT 101. Foundational course in the elements of news writing, with a focus on the style and conventions of writing for print, online and broadcast media.	3 Credits
	JRNL 257 - Beginning Visual Journalism Offered autumn and spring. This course provides an introduction to photo and video journalism using digital cameras. Students will learn the basics of editing still images with Photoshop and video with Final Cut Pro. Students will learn how to take compelling, content-driven photographs using light, composition and depth of field. Students will also learn about capturing quality video, audio and natural sound used to build video sequences. The overall emphasis is on visual storytelling.	3 Credits
	JRNL 270 - Reporting Offered autumn and spring. Prereq., JRNL 170. Fundamentals of interviewing, reporting, writing and audio editing of news stories for print, online and broadcast media.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Math

Rule: Must complete 1 of the following math courses that fulfills the General Education math requirement.

Note: Other courses considered by department as long as meets the General Education Requirement.

	Course	**Credits**
	M 104 - Numbers as News Offered spring. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An exploration of mathematics and statistics as used in the popular media. For students in the School of Journalism only.	3 Credits
	M 105 - Contemporary Mathematics Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An introduction to mathematical ideas and their impact on society. Intended for students wishing to satisfy the general education mathematics requirement.	3 Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits

	M 122 - College Trigonometry Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

American History

Rule: Complete 1 of the following:

	Course	Credits
	HSTA 101H - American History I (AM) Offered autumn. A comprehensive introductory history of Colonial, Revolutionary and 19th century America, to 1877. Lecture-discussion. Credit not allowed for both 101H and 103H.	4 Credits
	HSTA 102H - American History II (AM) Offered spring. A comprehensive introductory history of the U.S. since 1877. Lecture-discussion. Credit not allowed for both HSTA 102H and 104H.	4 Credits
	HSTA 103H - Honors American History I (AM) Offered autumn. Enrollment by consent of instructor. A comprehensive introductory history of Colonial, Revolutionary, and 19th century America, to 1877. Lecture-honors discussion. Credit not allowed for both 103H and 101H.	4 Credits
	HSTA 104H - Honors American History II (AM) Offered spring. Enrollment by consent of instructor. A comprehensive introductory history of the U. S. since 1877. Lecture-honors discussion. Credit not allowed for both HSTA 102H and 104H.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Indigenous and Global General Education Course

Rule: Complete 1 of the following:

	Course	Credits
	ANTY 101H - Anthro & the Human Experience Offered autumn and spring. Offered intermittently in summer. A survey of anthropology which introduces the fundamental concepts, methods and perspectives of the field. The description and analysis of human culture, its growth and change. The nature and functions of social institutions.	3 Credits
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	GPHY 243X - Africa Offered intermittently. A survey of the biophysical and cultural geography of Sub-Saharan Africa. Emphasis is on the region's cultural-historical development and current ecological, demographic, and economic patterns.	3 Credits
	GPHY 245X - The Middle East Offered intermittently. A survey of the biophysical and cultural geography of Southwest Asia and North Africa. Emphasis on environmental change; prehistory; patterns of cultural and historical change; issues of socio-economic, religious, and political diversity; and the broader political significance of the region.	3 Credits
	HSTR 146H - The Silk Road (WRLD) Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	HSTR 231H - Modern Latin America (WRLD) Offered spring. Latin America from wars of independence to the present. Focus on social relations, development models, politics, and popular movements.	3 Credits
	JRNL 105X - Global Current Events Offered autumn and spring. Survey of global news intended to make students familiar with the context and vocabulary necessary to understand the news, what makes it, and the implications that stem from it.	3 Credits
	MCLG 100H - Intro Latin American Studies Offered autumn or spring. Same as ANTY 103H. Multi–disciplinary survey and introduction to Latin America from pre–Columbian times to the present.	3 Credits
	NASX 105H - Intro Native Amer Studies Offered Autumn and Spring. Survey course to acquaint the student with Native American Studies by a general overview of Indian history, culture, philosophy, religious beliefs and contemporary issues.	3 Credits
	NASX 231X - Indig World View Perspectives Offered Spring. Same as ANTY 231X. Examination of Indigenous belief systems, with regard to world views, religious ceremonies, cultural ways and the impact that Anglo-European culture has had upon these systems. Focus on Indigenous peoples of Australia, New Zealand, Canada and the United States	3 Credits

	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	SOCI 212H - Southeast Asian Cult & Civ Offered intermittently. Same as AS and LS 212H. Introduction to the cultures, societies, and contemporary social problems of Southeast Asia.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Political Science Course

Rule: Complete 1 of the following

Note: If PSCI 230 is taken to fulfill the Indigenous and Global General Education Course, PSCI 210 or 220 is required to fulfill this requirement.

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Economics or Business Course

Rule: Complete 1 of the following:

	Course	Credits

	BGEN 105S - Introduction to Business Offered every term. Nature of business enterprise; role of business in society; problems confronting business management; career opportunities in business. Open to non-business majors and business majors of freshman or sophomore standing only. Business majors are advised to register for the course their freshman year. Credit allowed for only one of BGEN 105S, MIS 100S, IS 100S, BADM 100S and BUS 103S.	3 Credits
	ECNS 101S - Economic Way of Thinking Offered autumn and spring. A critical examination of the market mechanism as a social decision-making device to guide the use of a nation's resources. The limitations of these processes in light of current economic problems such as the rise of the large corporation, monopoly, environmental degradation, economic discrimination and the increasing role of the government.	3 Credits
	ECNS 201S - Principles of Microeconomics Offered every term. The nature of a market economy, economic decisions of the household and firm, competition and monopoly, value and price determination, distribution of income and applied microeconomic topics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Modern or Classical Language

Rule: Students must complete the first year sequence of any modern or classical language.

Journalism Professional Program

Rule: Complete all courses.

Note: Must also complete 1 capstone course as designated by the faculty.

	Course	Credits
	JRNL 300 - First Amendmnt and Jrnalism La Offered spring. Prereq., JRNL 270 and admission to professional program, or consent of instr. Overview of issues related to journalism and the law. Exploration of libel, privacy, prior restraints, access and other First Amendment questions along with ethical problems peculiar to media news gathering.	3 Credits
	JRNL 400 - Ethics & Trends in News Media Offered autumn and spring. Prereq. JRNL 270 (for minors) or senior standing in journalism's professional program. Practical ethics case studies from print, online and broadcast media, as well as an examination of the trends that are shaping the evolving news media.	3 Credits
	JRNL 498 - Supervised Internship (R-2) Offered every term. Prereq., consent of instructor; open to students in the professional program with the appropriate intermediate skills. For each credit, students perform the equivalent of six weeks' full-time work for communications organizations. All internships must be pre-approved by the faculty internship supervisor.	1 To 2 Credits

Minimum Required Grade: C-	7 Total Credits Required

Journalism Upper Division Electives

Rule: Complete 5 of the following courses:

Note: null

	Course	Credits
	JRNL 328 - Int Photojournalism Offered autumn and spring. Prereq., Must be admitted to Journalism Professional Program. Students create single photo assignments for newspapers, magazines and online publications. Students also create narrative picture stories and photo essays, one of which is produced in Final Cut Pro, and learn the basics of portable flash units.	3 Credits
	JRNL 330 - News Editing Offered autumn and spring. Prereq., Must be admitted to Journalism Professional Program. Fundamentals of editing and headline writing for print and online media.	3 Credits
	JRNL 331 - Intermediate Web Reporting Offered autumn and spring. Prereq., Must be admitted to Professional Program. Students learn to produce reporting for different websites and digital news sources, with a special emphasis on using digital technologies to broaden sources for stories. Course will also explore the societal, business and ethical effects these emerging technologies are having.	3 Credits
	JRNL 340 - Intermediate Audio Offered autumn. Prereq., admission to Professional Program. Use of audio in news, interview and feature programs. Students will write, gather audio and produce segments and programs using digital audio equipment.	3 Credits
	JRNL 350 - Intermediate Video Photography Offered autumn. Prereq., admission to Professional Program. Digital video photography, storytelling and non-linear editing. Students will be introduced to high-definition video cameras and advanced editing techniques and build on photojournalism skills introduced in JRNL 257.	3 Credits
	JRNL 351 - Intermediate Video Directing Offered spring. Prereq., JRNL 350. Students will learn the fundamentals of production and directing of studio-based programming. Students will work with those enrolled in Intermediate Video Reporting & Producing to create content. Newscasts produced in these courses are not intended for air.	3 Credits
	JRNL 352 - Int Video Reporting and Produc Offered spring. Prereq., JRNL 350. Creation of video news stories and programs including story idea generation, research and interviewing techniques, sound selection, script writing, television anchoring and producing, video photography and editing. Works with Intermediate Video Directing class to create news programs.	3 Credits

	JRNL 362 - Feature Writing Offered autumn and spring. Prereq., Must be admitted to Journalism Professional Program. Classroom instruction and practical experience in applying feature-writing techniques to the coverage of news, entertainment and sports for print and electronic media.	3 Credits
	JRNL 370 - Public Affairs Reporting Offered autumn and spring. Prereq., Must be admitted to Journalism Professional Program. Study and practice of reporting public issues with emphases on news sources, interpretive writing and the coverage of local, state and federal governments.	3 Credits
	JRNL 410 - Native News Honors Project (R-6) Offered spring. Prereq., consent of instr. Researching, photographing and designing stories about Montana's Native American community. Photojournalism students travel with reporters to Montana's seven Indian reservations to document in- depth stories on a single topic.	1 To 3 Credits
	JRNL 411 - Reporting Native News (R-6) Offered spring. Prereq., consent of instr. Researching, reporting and editing stories about Montana's Native American community. Reporters travel to Montana's seven Indian reservations to investigate in depth a single story topic. Editors coach reporters and edit their stories. The stories appear in a publication distributed throughout the state and nation.	1 To 6 Credits
	JRNL 412 - Montana Journalism Review (R-6) Offered spring. Prereq., consent of instr. Students assist writing, editing, design and overall production and distribution of the Montana Journalism Review, a publication of the School of Journalism.	1 To 6 Credits
	JRNL 414 - Investigations Offered autumn. Prereq., JRNL 370 or JRNL 352. Introduction to methods and ethics of investigative reporting, emphasizing computer-assisted research and analysis of public records and databases.	3 Credits
	JRNL 427 - Adv Photo & Multimed Storytell Offered spring. Prereq., JRNL 328 and admission into Professional Program. Students discuss, research, photograph, design, write and produce several documentary-style stories and essays using still photography, video, audio, text and graphics.	3 Credits
	JRNL 428 - Freelance Photography Offered autumn and spring. Prereq., JRNL 328 and admission into Professional Program. A workshop-style class that centers on the technical aspects of digital still and video camera lighting for freelance photography. Includes instruction in basic business practices for freelance work. Students produce weekly assignments including editorial and adventure portraiture, food illustrations, magazine fashion projects and travel stories. Business and marketing practices will include copyright, branding, usage, pricing, licensing and negotiation. Students must provide a professional still digital SLR with lenses and a portable strobe.	3 Credits

	JRNL 429 - Documentary Photojournalism Offered autumn. Prereq., JRNL 427 or consent of instr. Production of an in-depth documentary project involving a social issue with intent to educate, inform and implement change. Students write, shoot and design final project in book form or produce a multimedia project using stills, video, audio and text.	3 Credits
	JRNL 430 - Print & Web Editing & Design Offered spring. Prereq., JRNL 330 or consent of instr. Introduction to basic design principles, typography, color theory and usage, headline and caption writing. Discussion of the newest research on how readers use print and online publications. Students will design newsletter, brochure, newspaper, magazine and websites, plus other publications.	3 Credits
	JRNL 431 - Online Journalism Offered autumn and spring. Prereq., admission to the professional program or consent of instr. Course introduces students to the basics of website design and organization, explores how the Internet can be used to generate sources for stories and directs students in using multimedia reporting techniques for a web-based news site.	3 Credits
	JRNL 433 - Marketing Your Work Offered spring. Prereq., admission to the professional program. This course aims to help upper-division students find buyers for their journalistic work in today's rapidly changing information marketplace. Students will study how to identify news markets, how to establish and maintain relationships with editors, producers and publishers; and how to maintain control of their work while maximizing its value.	2 Credits
	JRNL 440 - Advanced Audio Offered spring. Prereq., JRNL 340 or consent of instr. Students will create long-form, in-depth audio programs such as radio documentaries and radio deliberation programming on a variety of topics. Students will report, interview, host, and write the programs for a variety of outlets such as radio stations, webcasting and online.	3 Credits
	JRNL 470 - Covering Elections Offered autumn of even-numbered years. Prereq., JRNL 370 or consent of instr. Students will produce coverage of Montana elections for newspapers, broadcast stations and the web.	3 Credits
	JRNL 471 - Covering the Legislature Offered spring of odd-numbered years. Prereq., JRNL 370 or consent of instr. Students will produce coverage of Montana’s biennial legislative sessions for newspapers, broadcast stations and the web.	3 Credits
	JRNL 472 - Opinion Writing Offered intermittently. Prereq., JRNL 370 or consent of instr. Practice in writing editorials, columns, op-eds, and opinion blogs. Examines the evolving role of journalism in moderating and stimulating public discourse.	3 Credits
	JRNL 473 - International Reporting Offered intermittently. Prereq., admission to the professional program or consent of instr. Prepares students to report internationally and to develop global sources for local stories. History and practice of foreign correspondence.	3 Credits

	JRNL 474 - Magazine Freelance Writing Offered autumn. Prereq., JOUR 315 or consent of instr. The techniques of reporting, writing and selling articles to regional and national magazines.	3 Credits
	JRNL 480 - Advanced Video Reporting Offered autumn. Prereq., JRNL 352. Teams will create three to five minute television weekly news updates available online and broadcast on commercial stations in Montana. Students will fill all positions needed to produce the updates including reporters, producers and anchors, in tandem with students in JRNL 450, 650.	3 Credits
	JRNL 481 - Adv Video Photo and Directing Offered autumn. Prereq., JRNL 351 or consent of instr. Teams will create three to five minute weekly news updates to be broadcast online and on commercial stations in Montana. Students will fill all positions needed to produce the updates including photographers, editors and directors.	3 Credits
	JRNL 482 - Advanced Video Storytelling Offered autumn. Prereq., JRNL 350 or consent of instr. Teams will generate story ideas about Montana issues, businesses and people. Students will research, write, photograph, interview, edit and create long-form video programs. The programs generated in this course are intended for air on Montana PBS	3 Credits
	JRNL 485 - Griz TV Offered spring. Prereq., JRNL 480 or 481. Techniques and strategies for directing, reporting, and producing a 30 minute live newscast. Students will also produce a weekly online newscast.	3 Credits
	JRNL 488 - Student Documentary Unit Offered spring. Prereq., JRNL 351 or 352 or consent of isntructor. In-depth examination of a topic of importance in Montana. Students will produce a one-hour television documentary to air on MontanaPBS and other outlets. Students will research, report, write, photograph, edit and promote the film. Co-convenes with JRNL 688.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Minimum Required Grade: C-		18 Total Credits Required

Additional courses

Note: Must complete 1 additional JRNL upper-division elective.

School of Law

Paul Kirgis, Dean

Andrew King-Ries, Associate Dean

The Law School is accredited by the American Bar Association and the Association of American Law Schools, and offers the degree of Juris Doctor (J.D.). Prerequisites for admission to the Law School are a baccalaureate degree and Law School Admission Test.

For detailed information concerning the Law School's admission criteria, application procedures, facilities, and official course descriptions, consult the Law School Catalog, which may be obtained by calling (406)243-6169 or visiting the Law School website.

The Law School's administrative regulations are contained in the Law School Student Handbook, which is on the website. The Law School conforms in most instances to the calendar established for the entire University. There are some differences, however, because the Law School operates on a different (and longer) semester system than the rest of the University.

Academic Year Calendar

Access the Law School Academic Calendar on the Law School calendar weg page.

Required Curriculum

First Year	**Credits**
500 Civil Procedure I	3
501 Civil Procedure II	2
502 Contracts I	3
503 Contracts II	2
504 Pretrial Advocacy I	2
505 Pretrial Advocacy II	1
506 Legal Research	2
508 Legal Analysis	1
509 Legal Writing I	3
510 Criminal Law & Proc I	2
511 Criminal Law & Proc II	3
512 Torts I	2
513 Torts II	3
Second Year	**Credits**
550 Property I	2
551 Property II	3
552 Federal Tax(may be taken third year)	3
554 Business Organizations	3
555 Professional Responsibility	3
556 Business Transactions	2
557 Trial Practice	2

558 Constitutional Law	4
560 Evidence	3
Electives (see below)	
Third Year	**Credits**
(minimum of 4 credits required)	
599 Clinical Training II	1-8
600 Clinical Training III	1-6
601 Clinical Training IV	1-6
Electives (see below)	

Elective Courses

(Elective offerings vary from year to year)

- Advanced Criminal Procedure (Law 690, 2 credits)
- Advanced Environmental Law (Law 649, 3 credits)
- Advanced Legal Research (Law 615, 2 credits)
- Advanced Legal Issues in Education (Law 686, 3 credits)
- Advanced Legislation (Law 652, 2 credits)

Davidson Honors College

Brock Tessman, Dean

The Davidson Honors College is a campus-wide association of faculty and students united by a common concern for academic and personal excellence. Its mission is to foster intellectual and civic values, and to support the best possible teaching and learning circumstances for participating faculty and students.

The College offers an academic and social home to talented and motivated students as they pursue their undergraduate education. Students from all major areas in the College of Humanities and Sciences and the professional schools are welcome, as well as students who are undecided about a major. Honors is not a major in itself, but an enhancement to General Education in the liberal arts and sciences as well as to virtually all undergraduate majors on campus.

The Honors College building, at the center of the campus, provides a large student lounge, study rooms, classrooms and a computer center for student use. The Honors Student Association plans and conducts a variety of social and academic activities as well as community service projects throughout the year. Special Honors residence hall floors and living units are available.

The Davidson Honors College also sponsors the University of Montana Office for Civic Engagement, an office that coordinates student service activities in the community and beyond, and supports the integration of community service experience into the academic curriculum.

Curriculum

In accordance with our mission, the DHC is committed to offering students the additional resources, challenges, and encouragement to be active and collaborative learners. DHC students are expected to:

- be intellectually curious;
- develop skills in critical thinking, analytic reasoning, and problem solving;
- increase their abilities to write and speak effectively;
- acquire skills and habits of community and public service;
- develop research and life-long learning skills and habits.

Honors students are expected to pursue these student learning outcomes inside the classroom and out, in their work and their recreation, volunteer service, membership in clubs and organizations, participation in campus and civic governance, independent study, pursuit of their hobbies and interests, and formal course work.

Honors courses are limited in enrollment to 20 students and usually are conducted in a discussion or seminar format. They emphasize critical thinking, the development of written and oral communication skills, direct contact with the faculty, and use of original texts or "hands-on," participatory experience. These courses are

taught by outstanding faculty selected according to their department's standards of excellence. Course offerings vary somewhat and represent many academic departments and subject areas. Honors courses often fulfill General Education and many common major requirements.

At the junior and senior level students are offered a selection of Honors seminars. These seminars are open to students from all disciplines. The aim of these seminars is to assist students in applying different methods of inquiry and research, in using the insights of various disciplines, in integrating the students' knowledge, and in developing well-informed personal stances toward the material and issues studied.

In their senior year, students complete an Honors thesis or research project, assuming responsibility, together with a faculty mentor, for an original scholarly research or creative project. This project may coincide with a departmental requirement, and is intended to prepare students to fulfill roles of intellectual, moral, and cultural leadership as they realize their places in society.

Assessment of Personal and Academic Goals

A college education invites students to formulate goals and reflect on their progress toward attaining them. Davidson Honors College students are responsible for evaluating their aims and attainments from year to year in collaboration with an advisor. Entering students are asked to assess their abilities and resources and begin to formulate interests and aims in light of the student learning outcomes mentioned previously.

Requirements

Davidson Honors College students are required to complete a minimum of seven Honors courses, including HONR 121L and a senior Honors research project (which may be counted as one Honors course). An Honors section of *Introduction to Humanities*, LSH 151L or LSH 152L, may be counted as equivalent to HONR 121L. HONR 120, *Introduction to Honors*, also is required of all first-year students. As this is a one-credit course, it does not count toward the seven Honors courses required to graduate. Details are available in the Davidson Honors College office or on the DHC web site at www.dhc.umt.edu.

It also is recommended that all students include in their curriculum at least one course or independent study project that includes an experience of volunteer community service or study abroad.

To maintain good standing in the Davidson Honors College, students must take at least one Honors course per year and maintain an overall cumulative grade point average of 3.0 or above. Academic progress is reviewed each semester. Students whose grades are below the 3.0 standard are given an academic warning. A student whose cumulative grade point average falls below 3.0 is placed on academic probation and remains in this status until the cumulative grade point average rises to 3.0 or higher. Suspension from the Honors College occurs when the term grade point average of a student on probation is below 3.0. A suspended student may be reinstated when the cumulative grade point average rises to 3.0 or higher.

Graduation through the Davidson Honors College requires a cumulative grade point average of 3.0 or higher, and 3.4 in the major field. Upon successful completion of the requirements, students will receive their bachelor degrees as "University Scholars" in their respective majors and have this distinction noted on their diplomas. Graduation through the Davidson Honors College is not connected with the distinctions "with honors" and "with high honors" bestowed on the recommendation of major departments according to certain grade point averages and/or on the basis of exams or other means of assessment in the senior year.

Scholarships

The Davidson Honors College administers the Presidential Leadership Scholarships for incoming freshmen, and several other scholarship programs for currently enrolled students. For further information about these scholarship programs, contact the Honors College. Honors students and those transferring from other institutions are eligible for the general scholarship program. For further information, contact the Financial Aid Office.

Admission to the DHC

Students applying to the Davidson Honors College should show evidence of academic talent and motivation. Generally, a minimum high school GPA of 3.5 is expected, as well as an ACT score of 27 or higher, or SAT combined score of 1800. These criteria are not absolute, and highly motivated students are encouraged to apply.

Applications are particularly welcomed from older or non-traditional students and students from varied racial and ethnic backgrounds. College transfer students with a record of strong academic performance (GPA of 3.5 or higher) also are welcome to apply. *The Davidson Honors College Application for Admission* must be postmarked or submitted online by . Note that all applicants to the Davidson Honors College also must complete a separate application for admission to the University of Montana-Missoula.

Presidential Leadership Scholarships

The Presidential Leadership Scholarships are the University of Montana's premier academic scholarships, recognizing outstanding talent, academic performance, leadership, and contribution to the community. These awards are renewable for four years, subject to satisfactory performance by the student. Each scholarship includes a full or partial tuition waiver, the value of which varies according to the amount of tuition each year.

Eligible candidates for the Presidential Leadership Scholarship must be recent high school graduates who have not previously enrolled as a regular college or university student. Recent finalists for the Presidential Leadership Scholarship posted an average of 3.98 GPA, SAT combined score of 2100, and ACT composite score of 32.

All Davidson Honors College applications for admission received by of each year will be considered for the Presidential Leadership Scholarship.

Graduate School

Scott Whittenburg - Vice President for Research and Creative Scholarship & Dean of The Graduate School

Graduate education explores and advances knowledge boundaries and re-defines the state-of-the-art in every discipline. A master's degree will improve a person's expertise in their given field while a doctoral degree will promote original research that advances the current knowledge in the field.

The mission of the Graduate School is to improve and advance graduate education at the University of Montana. Our graduate programs train the next generation of scholars and enable the generation of new knowledge that will contribute to the scientific, economic and cultural needs of the state, the nation and the global community in the 21st century. The Graduate School carries out its mission through student advocacy, promotion of diversity and inclusivity, promotion of research, and development of dynamic, synergistic paths for education.

The Graduate School administers admission to masters and doctoral graduate programs at the University of Montana. Questions about specific programs should be directed to the appropriate college or school. There are currently 83 different graduate programs at the University of Montana that provide curricula for Master's, Educational Specialist, and Doctoral degrees. A complete list of programs is found in the Graduate School webpage and on the Degree and Majors webpage. The Skaggs School of Pharmacy, the School of Physical Therapy and Rehabilitation Science, and the School of Law administer the Professional Doctorates in Pharmacy, Physical Therapy, and Juris Doctor, respectively.

Applicants complete an online application, providing the information required by the graduate program of interest. Official test scores are sent to the Graduate School, while transcripts are sent to the program. Many, but not all, graduate programs have a specific application deadline. Each program has an admissions committee that evaluates the application, and the committee's final decision is forwarded as a recommendation to the Graduate School. The applicant then receives an electronic decision letter from the Graduate School.

Please refer to the graduate school website for degree programs offered. For further questions, please call us at 406-243-2572 or via email at grad.school@umontana.edu.

Maureen and Mike Mansfield Center

Abraham Kim, Director

The Maureen and Mike Mansfield Center was established in 1986 to pay tribute to Maureen and Mike Mansfield and to recognize their important contributions to U.S. Asian relations and public policy. The Center is an academic unit within the University of Montana and receives core funding from an endowment managed by the Maureen and Mike Mansfield Foundation. Mansfield Center faculty offer classroom instruction, conduct research, provide training for Asian and U.S. government personnel, and organize various types of conferences, all with a focus on East Asia. The Center faculty collaborate with the University's Asian Studies Program and several other campus units.

The Mansfield Center's Ethics and Public Affairs Program (formerly known as the Center for Ethics) focuses upon the relationship of values to public institutions and affairs. Its courses, seminars, lectures, conferences, and internships examine the role that ethical values can and should play in public life, moral quandaries faced by those who govern philosophical and practical dimensions of political ethics, and issues of leadership and character in public service.

Professor

Robert Saldin

East Asian Studies B.A.

Bachelor of Arts - East Asian Studies

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 44
Required Cumulative GPA: 2.0

Lower DIvision Core Courses

Rule: Complete the following subcategories

6 Total Credits Required

Fundamentals

Rule: Must complete the following course

Note: On occasion the Modern and Classical Languages department offers an alternative Introduction to East Asian Studies course which could fulfill this requirement. Check with the advisor.

	Course	Credits
	HSTR 240 - East Asian Civilizations (WRLD) An interdisciplinary, pluralist, and exploratory introduction to civilizations of East Asia. Primary focus on China, Japan, and Korea, the relations among them and their patterns of interaction with the outside world in pre-modern and modern periods.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Culture and Civilization

Rule: Must complete 1 of the following courses

	Course	Credits
	CHIN 211H - Chinese Culture and Civiliz Offered intermittently. Same as AS and LS 211H. An introduction to the historical, intellectual, political, literary and social developments of China from early times to the present.	3 Credits
	JPNS 150H - Japanese Cult & Civiliz Offered intermittently. Same as AS and LS 210H. The historical, religious, artistic, literary and social developments in Japan from earliest times to the present.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Division Core Courses

Rule: Must complete the following subcategories

18 Total Credits Required

Chinese Studies

Rule: Must complete 2 courses of Chinese Studies

Japanese Studies

Rule: Must complete 2 courses of Japanese Studies

East Asian Studies

Rule: Must complete 2 courses of Japanese, Chinese, Viet Nam, pan-East Asia, or Buddhism

Note: Student may select from courses as they are available.

Language

Rule: Must complete one of the following subcategories

20 Total Credits Required

Chinese Language

Rule: May select the following language sequence

	Course	Credits
	CHIN 101 - Elementary Chinese I Offered autumn. Emphasis on speaking, reading and writing elementary Mandarin.	5 Credits
	CHIN 102 - Elementary Chinese II Prereq., CHIN 101. Offered spring. Continuation of 101.	5 Credits

	CHIN 201 - Intermediate Chinese I Offered autumn. Prereq., CHIN 102 or equiv. Emphasis on oral communication, with continuing development in all major skill areas: listening, speaking, reading and writing.	5 Credits
	CHIN 202 - Intermediate Chinese II Offered spring. Prereq., CHIN 201 or equiv. Continuation of 201.	5 Credits
Minimum Required Grade: C-		20 Total Credits Required

Japanese Language

Rule: May select the following language sequence

	Course	Credits
	JPNS 101 - Elementary Japanese I Offered autumn. Understanding of grammar and basic sentence structures are taught as a foundation for oral comprehension. The students will learn Hiragana and Katakana, two syllabic writing systems, and approximately 400 Kanji ideographs.	5 Credits
	JPNS 102 - Elementary Japanese II Offered spring. Prereq., JPNS 101. Continuation of 101.	5 Credits
	JPNS 201 - Intermediate Japanese I Offered autumn. Prereq., JPNS 102 or equiv. Reading and writing kanji; building oral/aural fluency.	5 Credits
	JPNS 202 - Intermediate Japanese II Offered spring. Prereq., JPNS 201 or equiv. Continuation of JPNS 201.	5 Credits
Minimum Required Grade: C-		20 Total Credits Required

Mansfield Center Course Listing

Mansfield Center

Back to Top

- MANS 101 - Elementary Pashto I
  Credits: 5. Offered intermittently. Prereq., students must be grant eligible. This course is an intensive six-week course teaching Pashto.
- MANS 106 - Elementary Indonesian
  Credits: 5. Indonesian language belongs to category II languages as defined by the DLIFLC (Defense Language Institute Foreign Language Center). The Elementary Indonesian Course is designed for those students who are in their initial Indonesian language acquisition level. Student knowledge can vary from 'zero' (or no knowledge of the language) to some elementary skills in the target language. The course is organized by topics, grammar points and cultural notes. Students develop fluency of comprehension and oral skills to express their needs as well as simple ideas about family, hobbies, jobs, and daily activities. The classes mainly consist of three components: listening, reading, and speaking. There are some writing tasks as optional assignments. At the end of each week, students are given quizzes to recapitulate what they have acquired during the week.

Quizzes include DLPT5-like mock tests (Defense Language Proficiency Test 5), OPI (Oral Proficiency Interview), and written tests.

- MANS 107 - Elementary Korean I

  Credits: 5. The Defense Critical Language and Culture Program (DCLCP) (of The University of Montana's Maureen and Mike Mansfield Center) provides intensive language and culture training for members of the National Guard, Reserve, and Active Duty utilizing a congressionally funded Language Training Center (LTC) contract through the Department of Defense Language and National Security Education Office (DLNSEO)—Grant title: Subaward 2013-LTC-Montana (H98210-13-2-0001). This DCLCP course is designed to meet DoD (Department of Defense) total force Korean language training needs, especially members of the 1st Special Forces Group (Joint Base Lewis McChord, WA) in order to enable the DoD workforce to be better prepared and equipped with the target language, cultural and regional expertise. As a part of DoD Language Training Center, the course is open exclusively for U.S. DoD personnel who would not otherwise enroll into other UMT language course. Nonetheless, we encourage the students to pursue a degree in programs like Eastern Asian Studies, Asian Studies, or political science offered by the University of Montana.

- MANS 108 - Elementary Chinese I

  Credits: 5. The Defense Critical Language and Culture Program's Elementary I is an intensive 120-hour, 30 hours per week course (with 5 hours dedicated to culture and regional studies in English), equivalent to 6 months of college language courses. The course is for Special Forces military students who have previous language training in Chinese language, yet whose skills may have eroded somewhat due to insufficient practice. Students are admitted into the elementary Chinese-Mandarin class if they currently perform at either 0 or 0+ on the Interagency Language Roundtable (ILR) scale. In class, the target language is used exclusively when teaching the language, with no English permitted (unless in a case of an emergency when the Chinese word is unknown). Standard Chinese or Modern Standard Chinese (MSC), also known as Mandarin, Putonghua and Guoyu is the official language of the People's Republic of China, the Republic of China (Taiwan) and one of the four official languages of Singapore. Due to the complexities of this language, the Defense Language Institute categorized MSC as Category IV language, one of the toughest languages to learn for non-native speakers. The majority of the class will be conducted via Video Tele Conferencing (VTC); the remaining portion of the class will be in residence. In order to create communicative and task-based and skill-integration activities in improving students' overall language proficiency level, additional tutoring, counseling and coaching will also be conducted.

- MANS 201 - Intermediate Pashto I

  Credits: 4. Offered intermittently. Prereq., MANS 101 and MANS 102. Students must also be grant eligible. This course is an intensive five-week course teaching Pashto.

- MANS 206 - Intermediate Indonesian Language and Culture

  Credits: 5. This DCLCP course is designed to meet DoD (Department of Defense) Total Force Indonesian language training needs, with an emphasis on the 1st Special Forces Group (Joint Base Lewis McChord, WA) in order to improve their language, cultural and regional expertise. As a part of DoD Language Training Center, the course is open exclusively for U.S. DoD personnel who would not otherwise enroll in other University of Montana language courses. Nonetheless, the DCLCP does encourage its students to pursue degrees in University programs like East Asian Studies, Central Asian Studies, or political science after their discharge from the armed forces.

- MANS 207 - Intermediate Korean I

  Credits: 5. The Defense Critical Language and Culture Program (DCLCP) (of The University of Montana's Maureen and Mike Mansfield Center) provides intensive language and culture training for members of the National Guard, Reserve, and Active Duty utilizing a congressionally funded Language Training Center (LTC) contract through the Department of Defense Language and National Security Education Office (DLNSEO)—Grant title: Subaward 2013-LTC-Montana (H98210-13-2-0001). This DCLCP course is designed to meet DoD (Department of Defense) total force Korean language training needs, especially members of the 1st Special Forces Group (Joint Base Lewis McChord, WA) in order to enable the DoD workforce to be better prepared and equipped with the target language, cultural and regional expertise. As a part of DoD Language Training Center, the course is open exclusively for U.S. DoD personnel who would not otherwise enroll into other UMT language course. Nonetheless, we encourage the students to pursue a degree in programs like Eastern Asian Studies, Asian Studies, or political science offered by the University of Montana.

- MANS 208 - Intermediate Chinese I

  Credits: 5. The Defense Critical Language and Culture Program's Intermediate I is an intensive 120-hour, 30 hours per week course (with 5 hours dedicated to culture and regional studies), equivalent to 6 months of college language courses. The course is for Special Forces military

students who have previous language training in Chinese language, yet whose skills may have eroded somewhat due to insufficient practice. Students are admitted into the elementary Chinese-Mandarin class if they currently perform at either 1 or 1+ on the Interagency Language Roundtable (ILR) scale. In class, the target language is used exclusively, with no English permitted (unless in a case of an emergency when the Chinese word is unknown). Standard Chinese or Modern Standard Chinese (MSC), also known as Mandarin, Putonghua and Guoyu is the official language of the People's Republic of China, the Republic of China (Taiwan) and one of the four official languages of Singapore. Due to the complexities of this language, the Defense Language Institute categorized MSC as Category IV language, one of the toughest languages to learn for non-native speakers. The majority of the class will be conducted via Video Tele Conferencing (VTC); the remaining portion of the class will be in residence. In order to create communicative and task-based and skill-integration activities in improving students' overall language proficiency level, additional tutoring, counseling and coaching will also be conducted

- MANS 295 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Experimental offerings of new courses or one-time offerings of current topics.

- MANS 296 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently.

- MANS 306 - Advanced Indonesian Language and Culture

  Credits: 5. This DCLCP course is designed to meet DoD (Department of Defense) Total Force Indonesian language training needs, with an emphasis on the 1st Special Forces Group (Joint Base Lewis McChord, WA) in order to improve their language, regional, and cultural expertise. As a part of DoD Language Training Center, the course is open exclusively for U.S. DoD personnel who would not otherwise enroll in other University of Montana language courses. Nonetheless, the DCLCP does encourage its students to pursue degrees in University programs like East Asian Studies, Central Asian Studies, or political science after their discharge from the armed forces

- MANS 307 - Advanced Korean I

  Credits: 5. The Defense Critical Language and Culture Program (DCLCP) (of The University of Montana's Maureen and Mike Mansfield Center) provides intensive language and culture training for members of the National Guard, Reserve, and Active Duty utilizing a congressionally funded Language Training Center (LTC) contract through the Department of Defense Language and National Security Education Office (DLNSEO)—Grant title: Subaward 2013-LTC-Montana (H98210-13-2-0001). This DCLCP course is designed to meet DoD (Department of Defense) total force Korean language training needs, especially members of the 1st Special Forces Group (Joint Base Lewis McChord, WA) in order to enable the DoD workforce to be better prepared and equipped with the target language, cultural and regional expertise. As a part of DoD Language Training Center, the course is open exclusively for U.S. DoD personnel who would not otherwise enroll into other UMT language course. Nonetheless, we encourage the students to pursue a degree in programs like Eastern Asian Studies, Asian Studies, or Political Science offered by the University of Montana.

- MANS 308 - Advanced Chinese I

  Credits: 5. The Defense Critical Language and Culture Program's Advanced I is an intensive 120-hour, 30 hours per week (with 5 hours dedicated to culture and regional studies in the target language), equivalent to 6 months of college language courses. The course is for Special Forces military students who have previous language training in Chinese language, yet whose skills may have eroded somewhat due to insufficient practice. Students are admitted into the advanced Chinese-Mandarin class if they currently perform at either 2 or 2+ on the Interagency Language Roundtable (ILR) scale. In class, the target language is used exclusively, with no English permitted (unless in a case of an emergency when the Chinese word is unknown). Standard Chinese or Modern Standard Chinese (MSC), also known as Mandarin, Putonghua and Guoyu is the official language of the People's Republic of China, the Republic of China (Taiwan) and one of the four official languages of Singapore. Due to the complexities of this language, the Defense Language Institute categorized MSC as Category IV language, one of the toughest languages to learn for non-native speakers. The majority of the class will be conducted via Video Tele Conferencing (VTC); the remaining portion of the class will be in residence. In order to create communicative and task-based and skill-integration activities in improving students' overall language proficiency level, additional tutoring, counseling and coaching will also be conducted.

- MANS 395 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- MANS 494 - Mansfield Center Seminar

Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary.

- MANS 495 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- MANS 496 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- MANS 595 - Special Topics
  Credits: 1 TO 12. (R-12) Offered intermittently. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate

Maureen and Mike Mansfield Library

Shali Zhang, Dean of Libraries

The Maureen and Mike Mansfield Library at the University of Montana provides an array of information resources and services in support of the teaching, learning, and research programs of the University. These resources include print collections and access to networked research databases, electronic journals e-books, media materials, and a web-based integrated library cataloging and discovery platform. Library services include in-depth research and reference assistance, an extensive instruction program integrated into the university curriculum, and full-service computing and media facilities. Extensive services for online education students and faculty are available to provide an equitable educational experience.

The Maureen and Mike Mansfield Library comprises the heart of UM's library system. Collections exceed 1.75 million volumes, more than 800,000 electronic books, access to over 75,000 print and electronic journals, an expanding array of electronic databases, over 72,000 media, a federal government depository collection and an Archives and Special Collections. These resources are supplemented by an active interlibrary loan service through which items from other libraries can be loaned to UM students and faculty. The Mansfield Library is open seven days a week for 111 hours per week during the academic semesters.

Over 130 computers available for student use and wireless access throughout the building provides fast and stable internet connectivity in support of access to electronic resources and access to other networked information. Three state-of-the-art instructional classrooms underscore the goal of the library as a learning library in which students learn how to access and evaluate information in support of their advancing academic careers. Study carrels, group study rooms, study tables, and soft seating on all floors of the library provide a variety of study environments.

The Mansfield Library at Missoula College UM (located on the East Campus) supports its curricular programs. Students and faculty at both campuses have access to all library resources and services. Students at Bitterroot College UM, in Hamilton, also have full access to the Mansfield Library's resources and services. The library collections at the affiliated UM campuses are located in Butte at Montana Tech, and Highlands College of Montana Tech; in Dillon at The Carson Library of the University of Montana-Western; and in Helena at Helena College the University of Montana.

Department Faculty

Professors

Barry Brown, Head of Access and Collection Services; Science Librarian
Kim Granath, Head of Information and Research Services; Public Health Librarian
Donna E. McCrea, Head of Archives and Special Collections
Sue Samson, Humanities Librarian and Instruction Coordinator
Shali Zhang, Dean of Libraries

Associate Professors

Susanne Caro, Government Documents Librarian
Julie Edwards, Ethnic Studies Librarian and Diversity Coordinator
Teressa Keenan, Head of Bibliographic and Research Services Division; Metadata Librarian
Tammy Ravas, Visual and Performing Arts Librarian and Media Coordinator
Megan Stark, Undergraduate Services Librarian
Kate Zoellner, Education and Human Sciences Librarian

Assistant Professors

Adrienne Alger, Online Learning and Instructional Technology Librarian
Wendy Walker, Digital Initiatives Librarian
Jaci Wilkinson, Web Services Librarian

Adjunct Assistant Professors

Natalie Bond, Political Papers Archivist
Jill Howard, Workshop Coordinator
Kimberly Swanson, Missoula College Liaison

School of Extended and Life Long Learning

Roger Maclean, Dean

The School of Extended & Lifelong Learning (SELL) is the outreach arm of the University of Montana. SELL partners with external organizations and academic units to provide innovative and flexible education experiences and personal growth opportunities for a variety of audiences. SELL's mission is realized through service, innovation and collaboration. By creating relationships based on integrity and professionalism, SELL advances quality lifelong learning opportunities that transform lives.

SELL is located in the James E. Todd building, east of the University Center. The building includes meeting space, available to rent by both on and off-campus entities, including state-of-the-art technology in every room and video conferencing capabilities. In addition, SELL provides conference and event planning, including equipment rental, technical support and logistical assistance.

We provide educational opportunities for community members

SELL is responsive to community needs, and seeks partnerships that help enrich the lives of community members. We design training programs tailored to help local companies meet their goals, and provide meeting space or planning services for educational conferences.

Individuals aged +50, enjoy MOLLI short courses in the fine arts, humanities, current and political affairs and natural and social sciences. These lifetime learners enjoy courses without the added pressure of grades, tests, or homework.

Community members who are looking to enhance their career potential need not look any further than our Professional Development program.

Interested in Beekeeping? We even have something for you. SELL offers an online certificate program for serious beekeepers that is taught by one of the nation's premier bee research teams. Beekeeping is just one example of the creative educational programming that is incubated at SELL.

We Support UM

SELL supports the entire campus community by offering a range of administrative, design and technical services associated with Summer Semester, Wintersession, and UMOnline. SELL's Innovation Studio helps faculty members bring their subject matter to life with instructional design, content creation, and accessibility support.

We accommodate all your conference planning and meeting needs

If you need help planning a conference, symposium, or large educational event, SELL has a Conference Planning Services team that can help make your event a success.

Need meeting space? The Continuing Education Conference Center at SELL can accommodate your needs with meeting rooms that can seat anywhere from 100-200 people and have state-of-the-art equipment and in-house technical support.

These are just a sampling of the ways SELL meets educational needs and provides diverse learning opportunities. We strive to broaden educational access by meeting our audiences where they are, thinking outside the box, and providing excellent customer service.

The University of Montana Western

The unique mission of the University of Montana Western emphasizes experiential learning combining theory and practice through projects and field experiences. Montana Western students learn by doing, collaborating directly with their professors and fellow students in a mentorship environment.

In order to better facilitate this type of learning, UMW adopted a course scheduling system, named Experience One (X1). Under X1, students take a single course at a time for 18 days for three hours per day. Montana Western is the first and only public four-year university in the country to fully adopt this system.

Montana Western embraces the privilege and obligations associated with its mission as a higher education institution within the beautiful landscape of southwest Montana. This mission infuses the University's curriculum: in its century-long tradition for excellence in professional programs in teacher education, business and technology; in its strong interdisciplinary arts and science programs; and in its two-year associate degree programs responding to regional needs.

Montana Western offers the Bachelor of Science degree in: Elementary Education, Secondary Education with options in traditional subject areas, Biology, Business Administration, Early Childhood Education, Environmental Interpretation, Environmental Science, Health & Human Performance, Mathematics, and Natural Horsemanship. In addition, Montana Western offers Bachelor of Arts (BA) and Bachelor of Applied Science (BAS) degrees. Bachelor of Arts options include English, Interdisciplinary Social Science, and Visual Arts. Bachelor of Applied Science students may use an Associate of Applied Science (AAS) degree as a base for the BAS degree with most of the credits from the two-year degree transferring into the BAS at Montana Western. Montana Western also offers Associate of Arts and Associate of Science degrees for those who want to obtain their general education before transferring to another campus; Associate of Applied Science degrees for those needing entry-level job skills in Business, Early Childhood Education, Education Studies, Equine Studies, Natural Horsemanship, and Tourism & Recreation; and certificate programs in Early Childhood Technology, and Information Technology & Network Administration.

Individualized education has been a campus hallmark for over 100 years. Approximately 1,400 students enroll at Montana Western each fall. Class sizes are kept small (average class size is 18 students). The faculty is nationally recognized for its excellence, creativity, and genuine concern for maintaining the Montana Western tradition of high quality academic and personal experience.

In addition to fulfilling academic life, Montana Western offers National Association of Intercollegiate Athletics Frontier Conference sports in football, volleyball, men's and women's basketball, men's and women's National Intercollegiate Rodeo Association teams, and Equestrian team competition. A varied sports program is also available for students seeking intramural activities.

With close proximity to Yellowstone, Grand Teton, and Glacier national parks, Montana Western's geographic location makes an ideal setting for individuals who enjoy the rugged outdoors. With a friendly, small town atmosphere, Dillon offers many of the amenities of a much larger community. Ranching, mining and tourism are the chief industries of the area. Montana Western's picturesque 34-acre campus and friendly atmosphere enhance the community and area. For more informationm visit the University of Montana Western website or call (877) 683-7331.

Helena College University of Montana

Helena College offers two-year programs in business, trades, technical, and health occupations designed to meet the state's business and industry needs for technologically-skilled workers. All of the curricula are industry-approved and emphasize learning in a hands-on environment. In addition, the college offers an Associate of Science degree and Associate of Arts degree designed to transfer to four-year institutions. The college, founded in 1939, is fully accredited by the Northwest Commission on Colleges and Universities (NWCCU), approved by the Montana State Board of Nursing, certified and licensed by the Federal Aviation Administration, and certified by the National Institute for Automotive Service Excellence.

Helena College students take a full complement of courses in mathematics, communications, computer literacy, and career development. Located in Helena, Montana's beautiful capitol city, the College offers its programs in modern classrooms, shops, and labs, both near the Capitol building and at the Helena airport. For more information, call (406) 447-6900.

Montana Tech of The University of Montana

Opening its doors in 1900 as the Montana School of Mines, Montana Tech has a century-old reputation as one of the finest science and engineering universities in the nation. Early curricula at the Montana State School of Mines were designed around mining and electrical engineering.

Today, Montana Tech specializes in the areas of science, technology, engineering, math, and healthcare disciplines and has repeatedly been recognized among the top 10% of all universities in America. Enrollment on campus sits at 2,945 students on its two campuses. The university offers 13 certificate programs, 14 associate degrees, 25 undergraduate programs, 10 masters programs, and a doctoral program in Materials Science. The north campus offers four-year and graduate degrees while the south campus, Highlands College, offers associate degrees and certificate programs, continuing education, and customized training.

Montana Tech is a friendly campus where students get involved in a wide array of campus events and activities as well as abundant outdoor recreational opportunities. Student satisfaction surveys consistently give the university high marks for its quality of student life. The student body presents a national and global snapshot with 43 states and 24 foreign countries represented.

Montana Tech emphasizes teamwork, collaboration, and hands-on learning and has a long-standing reputation for producing outstanding graduates. For the past 10 years, Montana Tech graduates have enjoyed a 92% placement rate, including acceptance into professional and graduate programs, and graduates from our School of Mines report an average starting salary of $66,186. Many of the university's alumni have attained senior leadership positions in the minerals, energy, and natural resource industries as well as business. Over 16% of Montana Tech alumni give back to the campus each year.

Located in the heart of the mountains of Southwest Montana, the 98-acre main campus can be seen for miles. With over $20 million in recently completed building and renovation projects and another $12.5 million currently under construction, the campus blends its historical buildings with new state-of the-art laboratory and instructional facilities. Highlands College is located seven miles south of the main campus.

The Montana Bureau of Mines and Geology, Montana's geologic and hydrogeologic research arm, is housed on the campus of Montana Tech. Montana Tech's commitment to research is evident in significant recent investments in major instrumentation, support for creative scholarship by faculty and graduate students, and a vibrant undergraduate research program.

Inquiries to Montana Tech should be directed to 1-800-445-Tech or visit the Montana Tech website.

Affiliated

Fees

General

The student expense information provided in this catalog is based upon the rates for the 2015-16 academic year as submitted to and approved by The Montana Board of Regents of the Montana University System. The Board of Regents reserves the right to adjust fees at any time. Current information may be obtained by contacting Business Services by mail at Business Services, Lommasson Center, University of Montana-Missoula, Missoula, Montana 59812; by phone at 406-243-2223; by email at um.statements@mso.umt.edu; or by visiting the Business Services website.

Paying the Registration Bill

A student's registration is not complete until it is "paid." Paying the registration bill confirms registration of the courses listed on the registration bill and the student's acceptance of the associated tuition and fee charges. **Even if financial aid and/or scholarships cover the full cost of the registration bill, all students are required to complete their registration by clicking the "Pay Registration Bill" button in CyberBear. FAILURE TO PAY THE REGISTRATION BILL WILL RESULT IN THE CANCELLATION OF CLASSES FOR THE SEMESTER.** Please see the published payment deadlines on the Registrar's Calendar web page.

Foreign and Canadian checks are not accepted. Credit card payment is accepted using VISA and MasterCard. Payment may be completed electronically via the student's CyberBear account. Payments can be made online via CyberBear:

- E-check
- Credit or debit card

Payment may be mailed to:

University of Montana

Business Services

32 Campus Drive

Missoula, MT 59812

All payments received in the mail should include the student's UM ID number and must be received on or before the published payment deadlines which can be found at the Registrar's Calendar web page.

Payment by credit or debit card can be made via the telephone by calling Business Services at (406) 243-2223 during our normal business hours which can be found at the Business Services website.

Tuition and Madatory Fee Schedules

The tuition and mandatory fee schedules are posted on the Business Services Tuition and Fees web page. Different fee schedules apply to each type of student: undergraduate lower/upper, Missoula College, graduate first/advanced, graduate TA/RA first/advanced, law fall/spring, WUE undergraduate lower/upper, WUE Missoula College, post-baccalaureate, distance undergraduate lower/upper, distance Missoula College, distance graduate first/advanced, or distance post-baccalaureate. The full schedule of fees and fee definitions are available at Business Services Tuition and Fees web page or by calling Business Services at 406-243-2223. Students enrolled at 12 or more credits are assessed at the same rate. Students who are enrolled less than 12 credits are assessed per credit. Students enrolled for 6 credits or fewer have the option of paying an additional amount to cover the ASUM activity fee, campus recreation fee, health service fee, and athletic fee.

A distance learning fee is assessed on all online courses to partially defray costs associated with courses delivered online over the World Wide Web. Online courses are assessed an additional fee of $48.00 per credit. If a student is registered for all distance classes, they have the option to request a change to a distance only student. Students enrolled in all online courses for a term are not assessed some of the mandatory fees that apply to students enrolled in face-to-face courses. The student needs to complete the Distance Only Change of Status form which can be found on the UM Online website.

Montana resident high school eligible students may enroll in Early to College courses through the UM-Missoula College campus. The tuition rate is 50% of the resident Missoula College two-year tuition rate. Mandatory and non-mandatory fees are not assessed except for applicable course fees. Early to College students are not eligible to elect campus services such as the student insurance, Campus Recreation Center, Athletic fee, AUSM fee, and Campus Health Service (may not be all-inclusive).

Audited courses are assessed at the same tuition and fees as courses taken for credit or no-credit.

Delivery of Student Credit Balance Refunds

The University of Montana processes all student credit balance refunds, and refunds are delivered based on the option the student has selected as explained at the Business Services Refund web page. The student needs to select an option only once unless they change or close their bank account or wish to change their option. If the student does not select an option, a check will be sent to their current mailing address. Even if a student does not expect to receive refunds due to financial aid, it is still important to select an option. For instance, a student may have a credit balance if classes are dropped or they withdraw that would create a credit balance refund.

Additional Course Fees

The Board of Regents may approve additional course fees at any time. Additional course fees frequently are assessed for selected courses in subjects such as: Accounting Technology, Art, Biology, Biochemistry, Building Maintenance Engineering, Business, Chemistry, Computer Technology, Culinary Arts, Curriculum and Instruction, Dance, Diesel Equipment Technology, Drama, Educational Leadership, Electronics Technology, Forestry, Geology, Health and Human Performance, Heavy Equipment Operation, Journalism, Legal Studies, Mathematics, Metals Processes, Microbiology, Military Science, Music, Nursing, Pharmacy, Physical Therapy, Resource Conservation, Respiratory Therapy, Science, Secretarial Technology, Small Engines, Surgical Technology, Truck, Welding, and Wildlife Biology. This listing may not be all-inclusive and does not preclude a specific fee from being assessed. The current report on Non-Mandatory Fees can be found on the Business Services Tuition and Fees web page.

Special fees are assessed for extended field trips in various departments.
An Educational Service Fee is charged for the off-campus M.B.A. and M.P.A. programs.
A fee is charged for cooperative education internships.
Purchase of supplies, equipment, or tools may be required by certain programs.

Certain programs will also have an additional program tuition added based on the major in which a student is admitted. The programs listed may not be all inclusive and they are Foreign and Conservation Program, Law Program, Masters in Athletic Training Program, Medical Technology Internship Program, Pharmacy Program, Physical Therapy Program, Public Health Program, School of Business Program, Social Work Program and Wildlife Biology Program.

Law School Fees

The proposed 2014-15 School of Law fees for 15 credits are approximately $3,237 for autumn and $3,212 for spring for an in-state student and $11,175 for autumn and $11,150 for spring for an out-of-state student. The Health Service fee is included. Health insurance coverage is available to students for an additional charge.

Law Special Fees

All persons who apply for admission to the School of Law must pay an acceptance fee of $300.00 ($150.00 is refundable if written notice is received by the due date if student does not want to attend), which is applied toward payment of fees upon entering and attending the School of Law in the semester for which the application was made.

In addition to the above fees, Law School students must pay an additional $145.00 per credit per semester. The amount is applied to instructional costs.

All law students are assessed a $25.00 law activity fee during autumn. An additional Academic Facilities fee of $50 per semester plus $1.25 per credit hour is also assessed.

School of Extended and Life Long Learning (SELL)

Fees, room and board costs for SELL summer programs, and fees for registration in SELL continuing education are contained in separate publications. These publications can be obtained by contacting the School of Extended and Lifelong Learning and Summer Programs by phone at 406-243-2900; by mail at University of Montana-Missoula, Missoula, MT 59812; or by visiting the School for Extended and Lifelong Learning website.

Refund Policy

Refund for Dropped Classes

Students who have paid their registration bill may drop classes through the first fifteen days of the Autumn and Spring semesters. Adjustments of the associated tuition & fees and financial aid will be made to their student account during that time. **Beginning with the sixteenth class day, there is no refund for classes dropped, and there is a $10 fee for each class dropped.** Students who finalized with financial aid should always check with the Financial Aid Office and Business Services before dropping classes to make sure they fully understand the financial impacts of dropping classes as that may result in the student having to immediately repay grant aid they received or make them ineligible to receive aid that has not been disbursed yet.

Refund for Withdrawal from the University

If a student decides to withdraw from classes or has ceased to attend classes after paying their registration bill, the student should contact the University of Montana Registrar's Office in Griz Central, located in the Lommasson Center, and complete an Official Withdrawal form to begin the official withdrawal process. This procedure will enable the University to prorate the tuition and fees assessed based upon the date of withdrawal. A percentage-based refund of tuition and fees does occur when a student officially withdraws before the first day of classes or within the first 15 class days of each term. Students ceasing to attend classes who do not complete an Official Withdrawal form and as a result do not receive any passing grades for the semester will be considered an unofficial withdrawal and will not receive any consideration for refund of tuition and fees.

Students who desire to continue the Blue Cross Health Insurance must contact the Curry Health Center prior to withdrawal. Otherwise, the insurance premiums will automatically be refunded and coverage will be lost upon the date of their withdrawal.

For students receiving federal financial aid, they must be attending classes to remain eligible for the federal financial aid they have received or could be eligible to receive. A post-withdrawal disbursement will be made if a student shows eligibility for Title IV aid. If a student drops courses, stops attending classes (Unofficial Withdrawal), never starts attending a class, or officially withdraws from the University of Montana by completing and submitting the Official Withdrawal form, the University and/or the student may be required to return federal funds awarded to the student. **It is very important for students receiving federal financial aid to contact Business Services at (406) 243-2223 PRIOR to completing the official withdrawal process or if they are not going to attend their classes.** If a student officially withdraws during the first fifteen days of class, the tuition and fees will be re-assessed for the semester based upon the official date of withdrawal. If a student does not complete the Official Withdrawal form and ceases attending and receives no passing grades for the semester the student is an Unofficial Withdrawal. A student's official or unofficial withdrawal date is determined by:

- the date the student began the institution's withdrawal process or officially notified the institution of intent to withdraw;
- the midpoint of the period for a student who leaves without notifying the institution (unofficial);
- or the last date of attendance by the student at a documented academically related activity.

Students who withdraw from the University after paying their registration bill will receive pro-rated assessment of tuition and fees according to the following schedule. The Summer term is also is subject to a pro-rated assessment of tuition and fees based on the length of each of the sessions within a Summer term.

	Before classes begin	1st Week	2nd Week	3rd Week	4th week or Later
Registration	none	none	none	none	none
Tuition/Fees	100%	90%	75%	50%	none
Blue Cross Ins. **	100%	100%	100%	100%	none
Other Fees	varies	varies	varies	varies	varies

Charges for room and board will be re-assessed on a pro-rated basis. During the final two weeks of the semester, room charges will not be re-assessed. Student who do not formally and completely withdraw are not eligible for a refund. The student will need to contact both the Residence Life Office located at 101 Turner Hall and UM Dining located on the first floor of the Lommasson Center.

The University of Montana will reassess the tuition and fees for students using the Deferred Payment Plan if the student officially withdraws during the first fifteen days of a semester. The student may still owe a balance to the University.

Return of Title IV Funds (Federal Financial Aid)

The University of Montana Refund Policy exists for calculating the amount of the federal financial aid that is subject to return when a student officially or unofficially withdraws on or before the 60% point of the term for which the aid was or could have been disbursed. The federal "Return of Title IV Funds" formula dictates the amount of Federal Title IV aid that must be returned to the federal government by the University and the student. The federal formula is applicable to a student receiving Title IV Funds if that student officially or unofficially withdraws. The University of Montana is required to return the Title IV funds to the federal government, U.S. Department of Education, within 45 days of determining the student is no longer attending. A student's official or unofficial withdrawal date is determined by:

- the date the student began the institution's withdrawal process or officially notified the institution of intent to withdraw;
- the midpoint of the period for a student who leaves without notifying the institution (unofficial);
- or, the last date of attendance by the student at a documented academically related activity.

The federal formula requires a return of Title IV aid if the student received federal financial assistance in the form of a Federal Pell Grant, TEACH Grant, Iraq/Afghanistan Service Grant, Federal Supplemental Educational Opportunity Grant (SEOG), Federal Perkins Loan, Federal Direct Loan (subsidized or unsubsidized), or Federal Parent or Graduate PLUS loans for students who officially or unofficially withdraw on or before completing 60% of the semester. The percentage of Title IV aid to be returned is equal to the number of calendar days remaining in the semester (based on the official withdrawal date) divided by the number of calendar days in the semester (scheduled academic breaks of five consecutive days or more are excluded). After all Title IV aid return requirements have been satisfied, any credit balances on a student's account will be first applied to satisfy outstanding University tuition, fees, and institutional charges, then to any Grant overpayments and finally any remaining credit balances will then be refunded to the student.

If you officially or unofficially withdraw from the University of Montana before completing 60% of the semester, you may have to repay any unearned financial aid funds that were already disbursed to you. A post-withdrawal disbursement will be made if a student shows eligibility for Title IV aid. Please contact staff in The University's Business Services, located in Griz Central or call 406-243-2223, if you have any questions about refund of tuition and fees or the calculation of the return of federal financial aid PRIOR TO WITHDRAWING OR CEASING TO ATTEND.

Distribution Priority for Return of Title IV Funds

1. Federal Unsubsidized Stafford Loan
2. Federal Subsidized Stafford Loan
3. Federal Perkins Loan
4. Federal Graduate PLUS Loan
5. Federal Parent PLUS Loan
6. Federal Pell Grant Program
7. Federal SEOG Program
8. Federal TEACH Grant
9. Federal Iraq/Afghanistan Service Grant
10. State, Private, or Institutional Aid
11. The Student

Hardship Withdrawal Policy

A hardship withdrawal may be granted to a student who experiences a catastrophic unanticipated condition or event after the fifteenth class day of a semester, if the condition prevents the student from completing academic course work. If medical, this must be documented by a health care provider. A medical hardship withdrawal will only be granted in cases of extreme hardship resulting from a serious or life threatening medical condition. In order for a student to petition to receive a hardship withdrawal from the University of Montana, the student must contact the Registrar's Office or Business Services to complete and submit the hardship petition. Upon approval of a hardship petition, the Registrar's Office will enter the appropriate withdrawal information on the student's academic record.

Students withdrawing during the first fifteen class days of a semester for medical reasons should contact the Curry Health Center in order to maintain their health insurance coverage if they are covered by the student health insurance. Otherwise, the medical insurance premiums will be automatically refunded and coverage will be lost.

The hardship petition process is not the appropriate venue to resolve or petition academic matters. Such concerns must be addressed in the student's respective department, school, or college. In addition, the hardship petition process is not an alternative means to drop classes after the normal drop date, to remove unwanted grades, or preclude resulting academic/financial aid actions (warning, probation, suspension, etc.).

Other Costs and Policies

Late Registration

A student who does not complete registration, including payment of tuition & fees in CyberBear, by the seventh class day is assessed a late registration fee of $80.00. An additional late registration fee is assessed on the 16th class day if the registration bill is not paid. After the fifteenth class day, a petition is required to register and, if approved, the total late registration fee of $160.00 is assessed.

Returned Checks

A charge of $25.00 will be assessed on checks (paper or electronic) returned from the bank. Any paper or electronic check tendered in payment of registration fees and not honored by the bank upon which it is drawn may result in cancellation of a student's registration. If the student's registration is cancelled, the student will be required to re-register and may be subject to the late registration fees in addition to the $25.00 service charge.

Fee Policy on Drop/Adds

Students must pay for all courses for which they are enrolled at registration. However, within the first fifteen class days, they may drop or add courses. The courses for which students are enrolled on the fifteenth class day will determine any fee adjustments (see fee schedule) or financial aid adjustments. Beginning the sixteenth class day, courses dropped will not result in a reduction of fees but courses added will increase credit hour enrollment and may result in an additional tuition and fees charges. Payment is due within 10 days of the day courses are added.

CyberBear will not allow a student to drop all courses. Dropping all courses is considered a withdrawal from the University. Please refer to the Withdrawal Policy section in the catalog for information on how to withdraw and the associated Refund Policy.

Drop/Add Processing Fee

A $10.00 processing fee will be charged for each course that is added or dropped after the fifteenth instructional day. See the summer class schedule for summer session deadlines.

Deferred Payment Plan

The University of Montana offers a payment plan to help students and their families pay their tuition, mandatory fees, and room and board. Eligibility is based on the following criteria:

- ü Making payments as scheduled.
- ü Existing credit history with the University.
- ü Fully complete and sign all required documents.

The plan provides for the payment of at least one fourth of the total fees along with a $30.00 administrative charge at the time of registration, payment of one fourth approximately 30 days after registration and payment of the full balance approximately 90 days after registration.

Registration, tuition and mandatory fees less any Financial Aid may be deferred. Student insurance and non-mandatory/course fees may not be deferred.

Deferred Payment Plan (DPP) applications must be submitted via CyberBear. The instructions (at right) will lead you to the DPP application. Be prepared to fill out the necessary application forms including parent and spouse information and two references. Your application will be reviewed by Business Services within 3 business days and you will be notified UM email on the status of your application.

The signing and adherence to the terms and conditions of a promissory note will be required and no fees may be deferred by any person who owes the University any fees, fines, loans or other charges or who has previously deferred fees and failed to make timely payments. A $15.00 fee will be assessed each time a payment is late.

This plan is not available for the summer session.

Monthly Bill Statements

Monthly bill statements are mailed on accounts that do not have an active UM email. An electronic notification will be e-mailed to the official University of Montana e-mail account . It is the student's responsibility to check their mail and official University of Montana e-mail account for these statements and notices. Payments for billed amounts are due by the due date indicated on the statements and electronic message. Failure to make

timely payments will result in an interest charge assessed on balances not paid in full by the following monthly billing. Payments can be made (1) online in CyberBear; (2) at the cashiers station located in Griz Central (2nd floor Lommasson Center); or by mailing payments to Student Accounts, Business Services, The University of Montana, 32 Campus Drive #2304, Missoula, MT 59812-2304.

Non Payment

A student who owes regular fees and charges including room and board or has an overdue debt owed to the University for any fees, fines, or other charges will not be able to register, secure any transcript or record, or access any University facilities or services until the full amount due has been paid or satisfactorily resolved with Business Services. Interest may be charged at the rate of 10% on the balance due from the day after the due date until the full amount has been paid and any attorney's fees or other costs or charges necessary for the collection of the amount owed may be added to the balance due. The University of Montana also reserves the right to use the Montana State Department of Revenue to offset and receive any funds being refunded by the State of Montana. The University of Montana reserves the right to refer unpaid accounts to third-party collection agents under contract with the University of Montana.

Determination of In-State Fee Status

The Montana University System classifies all students as either in-state or out-of-state. This classification affects admission decisions and fee determinations. The basic rules for making the classification are found in Board of Regents' Policy. It is each student's responsibility to secure and review a copy of the policy. Failure to be aware of the rules will not be cause for granting any exceptions to them. A copy of the policy is available from the Admissions Office or the Registrar's Office. It is important to bear in mind that each residency determination is based on the unique set of facts found in each individual's case. Students participating in the Western Undergraduate Exchange or the National Student Exchange programs are not eligible to gain residency. If you have questions concerning your particular case, be sure to contact the unit to which you are applying for admission or at which you are already enrolled. Generally, the Admissions Office or the Registrar's Office will be able to assist you.

With certain exceptions, in order to be eligible for in-state status, a person must meet a 12-month durational residency test. You will have to demonstrate a bona fide intent to become a Montana resident. The 12-month period does not start until some act indicative of intent to establish residency is taken. Mere presence in Montana, enrollment at a unit or rental agreements will not serve to start this period. Sufficient acts to start the period are registration to vote, obtaining a Montana driver's license, registration of a motor vehicle in Montana, purchase of a home in Montana or filing of a resident Montana tax return. The 12-months must be completed by the 15th instructional day to qualify for that term.

Your actions during the 12 month waiting period will be used to determine whether you are in the state as a bona fide resident or merely for educational purposes. The decision on your residency will not generally depend on just one factor. The following are the things you need to do that will support a claim of bona fide residency.

1. Register to vote if you are a voter
2. License a vehicle if you operate one in Montana
3. Obtain a driver’s license if you drive
4. Be physically present in Montana, not out of the state of Montana, for more than a total of 30 days
5. Can Not be claimed as a tax exemption by residents of another state or file taxes as a resident of another state
6. Provide at least 51% of your own financial support (this means you will need to document to us that you have contributed approximately $6000 towards your support during the twelve month waiting period)
7. File a Montana resident income tax return (this is important for all who claim residency in Montana, regardless of the amount of earnings)
8. Only register for six (6) credits or less per semester (including summer school) during the twelve month waiting period. Registering for more than 6 credits creates a strong presumption that you are here for educational purposes, and may disqualify you from achieving in-state status.

Be certain to secure the Board of Regents residency Policy and questionnaire from the Registrar’s Office in the Lommasson Center 201 or at the Registration Counter in Griz Central . At the end of your twelve month waiting period you must complete the residency questionnaire and attach copies of your driver’s license, vehicle registration, voter’s registration and proof of your earnings for the twelve months and return it to the Registrar’s Office for review. This documentation can be submitted to the Registrar’s Office up to 30 days in advance of the petitioners start date and not later than the 15h instructional day of the semester for which the status is sought. When a student petitions or meets the requirements after the 15th instructional day, a change in classification, if granted, will not be retroactive and will become effective for the next term. Reclassification is not automatic and will not occur unless the individual so petitions. It is the student’s responsibility to meet any filing deadlines that are imposed by the appropriate unit of the System. All students should check with the appropriate office to determine the time limits for filing. The appeal process is given in the Regents' policy.

Costs of On-Campus Services

»Housing and Dining Services

Students living in University residence halls are required to contract for a meal plan with Dining Services. Room and board rates are the same for in-state and out of-state students. Occupants may select any meal plan to obtain the number of meals preferred and choose from a variety of room options.

Students who are approved to move out of the residence halls and terminate their meal plan contract will receive a prorated refund based upon the days remaining in the semester less the cancellation fee.

Residence Halls

Rates subject to change

2014-2015 Autumn/Spring Semester room rates in University residence halls are:

Residence Hall	Room Type				
	Double Room	Triple Room	Single Room	3-Person Pod	4-Person Suite
Aber Hall	$1,747	NA	NA	NA	NA
Craig Hall	$1,872	$1,747	NA	NA	NA
Duniway Hall	$1,747	NA	$2,156	NA	NA
Elrod Hall	$1,747	$1,747	Standard - $1,991 Large - $2,156	NA	NA
Jesse Hall	$1,747	NA	NA	NA	NA
Knowles Hall	$1,747	$1,747	NA	NA	NA
Miller Hall	$1,747	NA	$2,277	$2,277	NA
Pantzer Hall	NA	NA	$2,461	NA	$2,461
Turner Hall	$1,872	NA	$1,991	NA	NA

Rates include $6.00 per semester social fee.

Early arrival prior to opening day costs an additional $20.00 per day.

»Dining Services

Dining Services meal plan prices 2012-2013 academic year.

*The prices below are subject to approval by the Board of Regents and may change.

Meal Plan	Autumn/Spring Semester
All Campus	$2,148.00
Food Zoo Plus	$1,938.00
Food Zoo	$1,833.00

Students living in residence halls are required to contract for one of the two meal plans. All meal plans are available to off-campus students, faculty and staff.

Lewis and Clark Village

Rent is $452.00 per month per person regardless of which size apartment you are assigned to. Each resident will be responsible for their own rent payment. Residents may choose to pay either by the semester or by the month. Rent includes a furnished apartment with all utilities paid including cable TV. You must make your own arrangements for telephone service.

»University Villages

Rates subject to change

University Villages housing is available. An application together with $25 processing fee should be submitted to Residence Life Office, 101 Turner Hall, Missoula, MT 59812. A $300 deposit will be required when apartment is assigned.

Housing Apartment Rates (monthly)

Apartment Type	**University Village Building**		
	Craighead and Sisson	**Elliot**	**Toole**
	(All Utilities paid)	(Tenant pays Heat & Elec.)	(Tenant pays Heat & Elec.)
Studio	$567.00	$361.00	$454.00
1-Bedroom	$630.00	$430.00	$599.00
2-Bedroom	$759.00	$533.00	$724.00
3-Bedroom	$852.00	$593.00	$819.00
4-Bedroom	$897.00	None	None

NOTE: These rates are monthly and effective July 1, 2014 through June 30, 2015. All rates include cable TV, water, garbage, and sewer. Tenants are responsible for telephone service and utilities.

Vehicle Registration Fee

All vehicles parking on campus must display current campus vehicle registration between the hours of 7:00 a.m. and 5:00 p.m. Monday through Friday year round. Students, staff or faculty may purchase window or hanger decals for $185.00 per year. Students have the option of purchasing semester decals for $92.50. Reserved parking is available on a first come, first serve basis for $555.00 a year. Car pools of three or more commuting drivers may register for $10.00 per person for the year.

Motorcycles are issued decals at $35.00 per year. Day passes (all day parking) for $3.00 per day may be purchased from the Office of Public Safety or the University Center and are valid in all "A" decal required lots only. Hourly pay parking is available for $1.00 per hour. The above prices are subject to change pending approval by the Board of Regents.

Partial refunds on decal are available only through the 15th class day. No refunds will be given on motorcycle, car pool or half semester vehicle registrations.

If a vehicle is sold, transferred or destroyed, the parking decal must be removed and returned to the Office of Public Safety for replacement. There is a $10 replacement fee for all decals lost, stolen or not returned.

More information can be found at the UM Police parking web page.

Other Campus Services

On campus there are other services provided such as the swimming pool, laundry facilities, locker rental, a full service bookstore, prescription pharmacy, testing programs, etc. The rates charged for these services are too varied to present in this publication. If more information is required concerning these services, contact the department providing the service.

Veterans' Benefits for Education Assistance Under Public Law 95-202 and Public Law 815

For Veteran information visit the UM Veterans website.

Financial Aid

Financial aid services are available from two campus locations: the South Avenue location of the Missoula College (MC), and Financial Aid Station located on the second floor of the Lommasson Center Building in Griz Central. Students specific information including the status of the student's aid application is available in CyberBear. General financial aid information including forms, policies and scholarship information is available at the Financial Aid Office website.

Missoula College students:

Enrollment Services-Financial Aid Office

909 South Avenue West
Missoula, MT 59801
(406) 243-7886
Fax (406) 243-7901

All students:

Enrollment Services-Financial Aid
Lommasson Center - Griz Central
Missoula, MT 59812-1254
(406)243-5373
Fax (406) 243-4930
Both offices are fully accessible.

Notice: Any policy is subject to change without advance notice if required by federal or state law, Board of Regents, or Enrollment Services-Financial Aid Office.

Acceptance to UM

Students must be accepted for admission (or readmission) to the University in a degree seeking program before financial aid requests are considered. Students accepted into non-degree categories are not eligible for any financial aid.

Presidential Leadership Scholarships

This award is open to incoming freshmen who have demonstrated high academic achievements, leadership and promise for success through their high school experiences. The award is renewable for four years based on meeting eligibility requirements. The application is available from Enrollment Services-Admissions, the Davidson Honors College, and high school counselors in Montana. The application is also available on-line on the Davidson Honors College website. The application deadline is December 31.

Campus-Wide Scholarships

The University offers a campus-wide scholarship program. Students should apply each year as most scholarships are awarded on an annual basis. Students holding a UM General renewable scholarship will have their awards automatically renewed if they continue to meet the eligibility criteria so need not submit an application again in subsequent years..

Requests for applications for continuing UM students, beginning November 1st, may be directed to the Enrollment Services-Financial Aid Office. The application is also located on line on the Financial Aid Office website. The filing deadline is February 1. Students are notified in March.

New, incoming students who have applied for admission to UM by December 31 will be considered for any scholarships that may be applicable. Notification will be done in March.

The Western Undergraduate Exchange (WUE) scholarship may be available for applicants from participating states. Application for a WUE scholarship is accomplished by applying for admissions to UM. Contact Enrollment Services-Admissions for further information.

Departmental Scholarships

Many departments, including the Missoula College, offer scholarships based on skill or academic potential. Students should contact their major departments for deadlines and more information.

Financial Aid Application

All students who wish to receive any federal funds, including federal parent loans, need based or most non-need based assistance, must file the Free Application for Federal Student Aid (FAFSA). The application is available on the Federal Student Aid (FAFSA) website. Students whose FAFSAs are received and processed by the Department of Education by February 15, and who complete all other documentation requirements are given priority for limited funds. Those who complete requirements later are considered only for federal loan programs and federal Pell Grants.

Determination of Eligibility

Eligibility for need-based financial aid is determined by subtracting the Expected Family Contribution (as determined from filing the FAFSA), scholarships, and other educational assistance from private or public agencies from the Cost of Attendance.

Financial Aid Package

Packages of need-based aid can include a combination of grants, loans and work-study. Students using the FAFSA automatically apply for all possibilities with one application. The types of aid offered will include federal subsidized and unsubsidized student loans for graduate or undergraduate students and federal Pell Grants for undergraduates if qualified. For those who file the FAFSA early and complete all requirements for additional documentation promptly, additional campus aid will be considered. This aid includes federal and state grants for undergraduate students. Federal Perkins loans and either federal or state work study will be considered for all early filers for both degree-seeking undergraduates and graduate students.

Non-need based aid, in the form of unsubsidized federal loans, for students and parents of dependent students will be considered for those families who file the FAFSA and accept these loans.

Distribution of Aid

All financial aid is awarded by the Enrollment Services-Financial Aid Office and distributed through Business Services, usually by crediting aid to the student's account. Aid is disbursed beginning the week before classes to students who have accepted their aid, submitted all required documents weeks in advance of the date and have finalized their registration in Cyberbear. Loans may be canceled under certain conditions if the student no longer desires the debt. Students who are offered work study must obtain employment and complete additional paperwork at the Enrollment Services-Financial Aid Office. Students who work are paid bi-weekly based on the timecard submitted by students and the supervisors.

Additional Requirements for Loans

In order to meet federal requirements, students who receive a federal student loan at the University of Montana must complete an entrance interview requirement and sign a promissory note before a loan will be disbursed. Instructions for entrance and exit counseling and the promissory notes are available on the Enrollment Services-Financial Aid Office website for the University of Montana-Missoula. Select the "Loans" link.

Study Abroad and Financial Aid

Students who desire to study abroad and who enroll in courses that are approved by The University of Montana should contact the Enrollment Services-Financial Aid Office. Instructions will be provided for using financial aid with this type of study.

Other Requirements and Guidelines for Retaining Financial Aid

Financial aid for full-time is based on maintaining a minimum of twelve (12) credits each term.

Students enrolled for less than full-time may receive financial aid. Most grants will be pro-rated based on credit load. Loans are not pro-rated but require a minimum of six credits.

Students enrolling for fewer than six credits are not considered for financial aid with two exceptions; (1) undergraduates who are seeking their first degree may be eligible for a reduced federal Pell Grant, and (2) tuition waivers may be available for those who qualify.

Students can only receive aid for credits that are required for their degree programs. If a student chooses to repeat a course for which they previously received a passing grade that course can only be counted toward their aid enrollment status one more time.

Employment

The Enrollment Services-Financial Aid Office coordinates federal and state work study programs. Open positions are posted on the electronic job board located on the Career Services Student Employment web page.

Non-work study student employment positions are also posted electronically at Career Services Student Employment web page.

Satisfactory Progress

Any student receiving financial aid is required to make satisfactory academic progress in a program leading to a degree. Students must maintain a minimum cumulative grade point average (GPA) and complete a minimum of 70% of all credits attempted. The minimum GPA for undergraduate, Law and Pharmacy students is a 2.0.

Physical Therapy doctoral students need to maintain at least a 2.5 GPS. Graduate students need to maintain at least a 3.0 GPA.

A student must also be able to complete their degree within 150% of the length of their program measured in credits attempted. For instance, a student pursuing a 120 credit bachelor's degree would need to complete their degree prior to attempting 180 credits.

Complete information is available in the Enrollment Services-Financial Aid Office or at the Financial Aid Office website. Select the "Maintaining eligibility" link.

Short Term Loans

Limited short term loan money may be available to registered students who are eligible and submit complete applications. Among other conditions the student must have pending financial aid that will result in a refund to the student to qualify for the loan.

»Tuition Waivers

The Montana Board of Regents has authorized the waiver of tuition for certain categories of students. Applications for any of the tuition waivers listed must be made in writing to the Enrollment Services-Financial Aid Office. The request must be made prior to the start of the semester in which students expect the waiver.

Minimum academic standards are necessary to receive tuition waivers. Other requirements and limitations may apply. Contact the Enrollment Services-Financial Aid Office for application forms or more information.

Montana Veterans Tuition Waiver

- bonafide resident of the State of Montana for fee purposes
- Honorable Discharge
- at one time qualified for veterans benefits under Title 38 of the U.S. Code, but are no longer eligible
- served during a time of war as determined by the Attorney General (World War II, 12-7-41 to 9-2-45; Korean War, 6-22-50 to 1-31-55; Vietnam War, 1-1-64 to 5-7-75; or post-Vietnam world conflicts under certain conditions. Contact the Enrollment Services-Financial Aid Office for further information.)

»American Indian Student Tuition Waivers

- resident of the State of Montana for one year immediately prior to enrollment at The University of Montana-Missoula
- documentation proving at least one-quarter degree blood
- meet admissions guidelines of the University
- must have financial need as determined by the Enrollment Services-Financial Aid Office
- meet satisfactory academic progress according to the standards of the Enrollment Services-Financial Aid Office

»Senior Citizens Tuition Waiver

- permanent resident of the State of Montana
- 65 years of age or older

»University of Montana Employees

- instate resident
- employed at least three-quarter time on the date of registration and for the entire semester
- must be after probationary employment period
- approval from department head & Human Resources every semester

Montana University System Honors Scholarship

- awarded by Board of Regents to top graduating high school seniors in Montana
- student must submit form received from the Regents to The University of Montana Enrollment Services-Financial Aid Office for activation of this waiver

Other

There are several other tuition waivers including war orphans, MUS employees' families, surviving dependents of a Montana National Guard Member, and surviving spouse or children of any Montana firefighter or peace officer killed in the line of duty. Contact the Enrollment Services-Financial Aid Office for details.

All students are afforded the opportunity to apply for two, three and four year scholarships provided by Army ROTC. The scholarships pay for all mandatory tuition and fees, a monthly stipend and $450.00 per semester for books. The monthly stipend for scholarship students is $300.00 in the freshman year; $350.00 in the sophomore year; $450.00 in the junior year and $500.00 in the senior year.

Additional financial assistance opportunities are provided to students that are interested in joining the U.S. Army Reserve or the Montana State National Guard. These programs are referred to as the Simultaneous Membership Program, since the student is involved in the National Guard or Reserves at the same time they are involved in ROTC. These programs have financial benefits that range from $15,000 for a two year program to $50,000 for a four year program. These benefits are very complex and are best understood by stopping in to visit with the Military Science Enrollment Officer.

Students have the opportunity to enroll in both the basic and advance courses offered by the Department of Military Science in the College of Arts and Sciences. The Basic Course is simply the Freshman and sophomore level courses offered by Army ROTC Instructors and no financial benefits are received for enrolling unless the student is on a scholarship. The Advanced Course refers to our junior and senior level courses. All advanced course students are contracted and receive financial benefits. We welcome student involvement in Land Navigation and Drill and Conditioning courses but no benefits are provided for enrollment in these classes.

Residence Life and UM Dining

Residence Halls

The University of Montana-Missoula residence halls are a part of the University and Missoula communities. The campus is a center for educational, cultural, and social activities. Residing in residence halls places the student at the center of these activities. Our mission is to provide safe, clean, healthy and affordable living and learning facilities that foster an inclusive community living environment for students, staff, faculty, and guests. Services provided in these facilities support and nurture educational experiences and personal development at the University of Montana. The University houses nearly 2,300 students in nine residence halls on campus. The residence halls staff is made up of resourceful people. Sharing ideas, observations, or questions with them will benefit residents. Resident assistants offer help and resources when students experience problems with University life. The residence hall room rate includes a furnished room with all utilities, use of laundry facilities, Internet access, and cable TV.

The Montana Board of Regents requires all freshmen and students who have earned fewer than 30 semester credits to reside in the University's residence halls. Students are required to continue living in the residence halls for two semesters or until the student earns 30 semester credits. Any student who moves in to the residence halls at the beginning of the semester is required to reside in the residence halls for the entire semester. Students must be enrolled for at least seven credits to be eligible to live in a residence hall unless they have prior approval from the Director of Residence Life. Exceptions to residence hall living may be made for students who reside with a family member and for students who are married or are single parents. Other exceptions are made under special circumstances on an individual basis. Any student requesting an exception to the residency requirements must submit a request in writing, accompanied by supporting documentation, to the Director of Residence Life. Students are not released from the residency requirements until they receive an official notification from the Director of Residence Life. Students who have earned 30 semester credits or more are not subject to the residency requirements, but are encouraged to live on campus. Housing in the residence halls is assigned on an Academic Year basis, including Fall Semester and Spring Semester. Students requestion to move out during the semester or at the end of Fall Semester must be approved. Housing is available for Spring Semester only for newly admitted students for Spring Semester. All students living in the residence halls are required to contract for one of the on-campus meal plans with UM Dining.

Rooms in residence halls are assigned in order of application completion. The residence halls application is accompanied by a $225.00 fee. $25.00 is a non-refundable processing fee, and $200.00 is a prepayment for housing. Application forms, cacellation policies, and additional information may be obtained from the Residence Life Office website.

UM Disability Services for Students and Residence Life work together to ensure that students with disabilities can participate in all Residence Life programs. If you have a disability and will need to request reasonable modifications for housing, please indicate the type of modifications you are requesting on the housing application and contact Disability Services for Students. Medical documentation may be required. Please note that timely housing applications and requests for accessibility are critical if you wish to have accessible housing when you arrive on campus. To contact Disability Services for Students, please call 406-243-2243.

Lewis & Clark Village

(Upperclass and Graduate Housing)

Lewis & Clark Village offers two and three-bedroom apartments designated for single students without dependents at the University of Montana who will have accumulated at least 60 credit hours by the time they move into the apartments. Lewis & Clark Village is also available to single students who have acquired 30-59 credits and have a 3.0+ GPA with no prior conduct. The apartments are located off campus just south of Dornblaser Stadium on South Higgins Avenue. They are within easy walking or biking distance from the University and are adjacent to the Park n' Ride, which provides free and easy transportation to the UM campus. The apartments are furnished with all utilities paid including cable TV and Internet access.

Prospective tenants may submit applications together with a requested roommate(s). If a tenant does not have a roommate preference, the Residence Life Office will assign roommates based on like gender. As space allows, we will attempt to take in to consideration other living preferences such as age, smoking, alcohol tolerance, and length of agreement.

Applications for the Lewis & Clark Village are available from the Residence Life Office website. Your application must be accompanied by $375.00, $25.00 of which is a non-refundable processing fee, and $350.00 of which is a security deposit.

A complete set of policies, photos, and a site map are available on the Residence Life Office website.

University Villages

The University has 566 apartments for married students, single students with dependents, and students with disabilities who have a live-in care attendant. All apartments are within walking distance of the campus. University Villages consists of three villages with units ranging from studio to four-bedroom apartments.

Housing is assigned according to the date of application and notification is given approximately twenty (20) days before housing becomes available. All applications must be updated every six (6) months in order for applicants to remain on the assignment list. A $350.00 security deposit must be submitted when an apartment is assigned. The security deposit is refundable when the rental agreement is terminated provided the apartment rental fees are current and no damage or cleaning fees are assessed. The security deposit is forfeited if the student cancels after accepting the assigned apartment.

Due to the demand for University Villages housing, applications for University Villages should be submitted well in advance before the desired movi-in date. Applications mus be accompanied by a $25.00 non-refundable processing fee. To apply for University Villages or for additional information on eligibility and policies, visit the Residence Life Office website.

Personal Property

The University of Montana-Missoula is not responsible, by state law, for damage to, or theft of, the personal property of students on campus (for example: damage to clothing or a stereo due to fire, smoke or water). Students are encouraged to adequately insure their personal property and to protect their property by locking their room/apartment and car and taking other simple precautions to prevent theft and damage.

Dining Services

Winner of 22 international dining awards and home to nationally renowned chefs, University Dining Services (UDS) is dedicated to bringing you a variety of delicious, well-balanced meals at reasonable prices. Our extensive selection of dining options include: the Food Zoo, the Cascade Country Store, La Peak, Biz Buzz, Think Tank, Recess, Doc's Sandwiches, Garden City Greens, Soups N Such, Pizza Hut, Wing Street, Famous Dave’s BBQ, Ui-Cha! (Vietnamese), Byte Me Burgers, Eson Gib Sushi, Casa Nina and two Jus Chilln' restaurants. All University Dining Services and Jus Chilln' locations accept cash, checks, Visa/Mastercard, UMoney and appropriate meal plans.

The Food Zoo, located in the Lommasson Center, is our buffet style restaurant which features an ever-changing choice of entrees, homemade soups, an extensive salad bar, daily pastas and gourmet pizzas, fresh fruits, Bear Claw Bakery desserts, cooked-to-order specials, and vegetarian and vegan options.

The Cascade Country Store, located at the west end of the Lommasson Center, boasts a bright, food-court style atmosphere with pizzas, Mexican specialties, grilled favorites and a fresh deli. Soups, salads, Bear Claw Bakery pastries, a wide variety of grocery items, organic products, and health and beauty aids are just some of the options available. The expansive outside deck is a popular stop for many students.

La Peak, located in the Cascade Country Store , features Craven's gourmet coffee and espresso drinks, fresh crepes, breakfast sandwiches and Bear Claw Bakery goodies. The lodge-like atmosphere makes La Peak a great place to socialize with friends.

The University Center Food Court, located on the second floor of the University Center, features a contemporary, open atmosphere, and exceptional cuisine. Food choices include Pizza Hut, Garden City Greens, Soups N Such, Ui-Cha! (Vietnamese), Wing Street, Famous Dave’s BBQ, Doc's Sandwiches, Eson Gib Sushi and the award winning Casa Nina.

Biz Buzz, located on the lower level of the Gallagher Business Building can help you jump start your day with a fresh cup of Craven's coffee, espresso, or Chai tea. They also serve delicious hot paninis, fresh baked pastries from Bear Claw Bakery, bagels, sandwiches, soups and salads.

The Think Tank, located above the Urey Lecture Hall, offers Liquid Planet gourmet coffee, espresso, Chai tea, Italian soda, ice-cold beverages, and grab and go items like sandwiches, soups, salads, and snacks. Whether you need that morning boost or a lunch on the go, the Think Tank has you covered.

Recess is our newest coffee shop. Located in the Phyllis J. Washington Education Building, Recess offers Liquid Planet gourmet coffee and espresso, Chai teas, bagels, Bear Claw Bakery pastries, sandwiches and Italian sodas. For a satisfying break between classes, stop by Recess.

There are two Jus Chilln' locations on the main campus. One is located on the first floor of the University Center. The other can be found at the Fitness & Recreation. Both restaurants feature Liquid Planet gourmet coffees, smoothies, baked goods and grab and go items. Enjoy delicious soups and sandwiches at the UC location.

Meal Plans

To ensure you have healthy and nutritious food options, The University of Montana requires students living in a residence hall to purchase a meal plan. A meal plan is a pre-paid purchase of meals for the entire semester. UM Dining Services offers two meal plans designed for students living on campus: the ALL CAMPUS and the LOMMASSON PLUS. Each plan provides a Weekly Meal Plan Fund designed to ensure that meals can be purchased for the entire semester. Food purchases are deducted from your Weekly Meal Plan Fund and may be used as quickly or as modestly as you choose. Weekly Meal Plan Funds reset every Sunday morning; unused Weekly Meal Plan Funds are NOT carried forward from one week to the next. For full details, visit the UM Dining Servcies website and click on "Meal Plans" or call 406-243-6325. The ALL CAMPUS Meal Plan provides campus-wide dining flexibility and is accepted at all Dining Services locations. The LOMMASSON PLUS Meal Plan is accepted at the Lommasson Center restaurants *(The Food Zoo, Cascade Country Store),* La Peak, and Jus' Chill'n located in the Campus Fitness and Recreation Center.

A student may convert their meal plan from ALL CAMPUS to the LOMMASSON PLUS Meal Plan only once during the first two weeks of the semester. Upgrades, from the LOMMASSON PLUS Meal Plan to the ALL CAMPUS Meal Plan, are accepted throughout the semester.

The COMMUTER MEAL PLAN is designed for students living off the main campus who want the convenience of pre-purchased campus dining. Open your COMMUTER MEAL PLAN account with as little as $20.00. For deposits of $50.00 or more UDS will add a 10% premium to your account. COMMUTER MEAL PLAN funds may be used at any of UDS' 14 restaurants, both Jus Chill'n locations on the main campus and the College of Technology snack bars. Make additional deposits anytime ($20 minimum). Payment methods include cash, check, credit card UMoney and Cyberbear/student account (some restrictions apply, call 406-243-6325 for details).

For more information on meal plans and other special dining services, please contact the University Dining Services main office at (406)243-6325 or visit the UM Dining Servcies website.

Career Services

The Office of Career Services assists prospective, current and alumni students in developing viable career objectives, choosing academic majors and creating the plans necessary to achieve those goals. Assistance is also provided to students who wish to modify their career and academic goals to improve their employment options. Career Services provides a wide array of services designed to facilitate the transition from education to employment, including: career counseling and assessments; workshops on resume writing, interviewing and job search strategies; taped mock interviews; on-campus interviews with employers; Griz eRecruiting, UM's on-line recruitment system; and student employment.

Career Services maintains an extensive on-line library of current resources on general and specific career and educational options, resume, interviewing and job search reference materials and employment resources.

A variety of employment and career fairs are hosted each year to bring students and employers together to discuss volunteer, internship, research, part-time and full-time employment opportunities. The Student Employment Fair, Big Sky Career and Academic Enrichment Fair and Health Professions Fair are held each Fall semester. The Educators' Career Fair is open to teaching, administrative, school counseling, speech language pathology, and school psychology professionals and is held each spring semester.

All UM students are eligible to establish a free Griz eRecruiting account which allows students to post their resumes on the web for viewing by and referral to employers, participate in the on-campus recruiting program and view and apply for current job and internship vacancies in the online jobs database.

For additional information, contact the Office of Career Services at 154 Lommasson Center, call (406) 243-2022, e-mail: careers@umontana.edu or visit the UM Career Services website.

Student Employment

Student Employment is an online job posting system for employers and online job search and application process for students. This makes it possible to post jobs for on-and off-campus, work-study, non-work-study, and volunteer employment. Student Employment works closely with Financial Aid and Student Payroll to assure students are being hired and paid within the established guidelines. Student Employment hosts a free Student Employment Fair during the first week of classes every fall. We also coordinate National Student Employment Week and the Student Employee of the Year (SEOTY) Award.

For additional information, contact the office of Student Employment at 154 Lommasson Center, call (406) 243-2239, email studentjobs@umontana.edu or visit the UM Student Employment website.

Testing Services

The Office of Testing Services is a member of the National College Testing Association and Consortium of College Testing Centers and is recognized as a NCTA certified test center. Testing Services subscribes to the NCTA professional standards and guidelines, providing the administration of educational, professional licensing, and certification exams. Examples of our services include:

- National standardized academic admissions exams (ACT, GRE, GMAT, MCAT, LSAT, PCAT, MAT, TOEFL, etc.)
- Professional certification exams (CPA, PRAXIS, NREMT, PTCE, DANB, MPRE, ACSM, ACE, Microsoft Office, etc.)
- Information technology certifications (CompTIA, Adobe, Cisco, Microsoft, etc.)
- College credit by examination through CLEP and DSST
- Proctoring services for UM students, online, and distance learning programs

For additional information, contact Testing Services at Lommasson Center, Suite 154, call (406) 243-2175, or testingservices@umontana.edu, or visit the UM Testing Services website.

Internship Services

The University of Montana offers internships in most disciplines. Internships can be part- or full-time, paid or unpaid, and generally run the length of an academic semester. Internships are supervised by key faculty members and allow students to work in positions related to their academic and career goals while utilizing knowledge, theory, and skills learned in the classroom. Learning objectives complemented by faculty-assigned reflective learning projects or reports distinguish and showcase internships as essential educational experiences. Internships are available locally, state-wide, and throughout the nation in various settings, including non-profit agencies, small businesses, multi-national corporations, and city, state, and federal government offices. International internships are also available, many through a partnership with IE3 Global Internships. More detailed information is available at Internship Services, Lommasson Center 154; (406) 243-2815; fax (406)243-5866; or visit the website at: www.umt.edu/internships.

Disability Services for Students

Students with disabilities can expect access at the University of Montana-Missoula. Wherever possible, the University exceeds mere compliance with the civil rights laws of Section 504 of the Rehabilitation Act, the Americans with Disabilities Act, and the Montana Human Rights Act. The University's programs are readily accessible to and usable by people with disabilities. The campus assures Program access is delivered to the maximum extent feasible and in the most integrated manner possible.

Disability Services for Students, a student affairs office, leads the University's program access efforts for students. Disability Services provides and coordinates reasonable modifications and advocates for an accessible and hospitable learning environment. We encourage self-determination and self-reliance by students with disabilities. Examples of services include priority registration, physical accessibility arrangements, academic adjustments, auxiliary aids (readers, scribes, sign language interpreters, etc.), alternative testing, conversion of print textbooks to e-text, assistive technology assistance, and other reasonable modifications. To achieve equal access, Disability Services vigorously pursues the removal of informational, physical, and attitudinal barriers to all University programs.

Students with disabilities should plan ahead and get in touch with Disability Services prior to arriving on campus. For additional information, contact Disability Services for Students in Lommasson Center 154, by phone at (406) 243-2243 (Voice/Text), by video phone at (406) 203-0591, or or by email at dss@umontana.edu. Please visit the UM Disability Services for Students website to find details on our services.

The UM Veteran's Education and Transition Services (VETS) Office

The University of Montana's Veteran’s Office has moved to the new Veteran's Education and Transition Services (VETS) location. The VETS Office is located on the Southeast corner of the Mountain Campus at 1000 E. Beckwith Avenue, where Beckwith Ave. becomes Campus Drive. The office serves all UM veterans and their family members, including those attending the Missoula College. VETS Office hours are M-F 8 a.m. - 5 p.m.

Contact information:

UM VETS Office
1000 E. Beckwith Avenue

406-243-5444 Fax

Foreign Student and Scholar Services

The office of Foreign Student and Scholar Services (FSSS) assumes responsibility for the general welfare of foreign students at the University of Montana from admission to gradation and practical training. It provides direct support services, consultation, and liaison. The office assists in the reception and orientation of foreign students and helps with their integration into the University and community. It interprets immigration regulations and laws and assists students in maintaining legal status and obtaining benefits related to their visa status. Staff members provide advising for academic and personal concerns, cultural adjustment, financial problems, and other concerns that arise.

The staff works with the International Student Association and other student groups, as well as the Missoula International Friendship Program to sponsor cultural activities, a speaker's bureau, a community hospitality program for students, leadership opportunities for students, and the annual International Culture and Food Festival. FSSS coordinates the UM Global Partner Program, a campus peer-mentioning program. It offers educational fields trips; winter and summer break activities, as well as initial and on-going orientation and educational programs on relevant topics. FSSS manages the campus' International House, an activity center for inter-cultural events.
Foreign Student and Scholar Services works closely with other service and advising offices on campus to optimize those services and their visibility to foreign students.

Foreign Student and Scholar Services prepares certificates or petitions for the Exchange visitor J-1 visa and advises foreign scholars who need to change or extend their visa status, travel temporarily out of the United States or bring dependents to this country. Finally, the office serves as liaison to federal agencies dealing with foreign student and scholar concerns, such as the US Citizenship and Immigration Service, Department of Labor, Department of State, Internal Revenue Service and Social Security Administration. For more information visit the Foreign Student and Scholar Services website or contact us at fsss@umontana.edu.

Office of International Programs

The Office of International Programs (OIP) promotes and provides international life-changing experiences and related educational opportunities, serving as a resource that contributes to the culture of a globally-minded community through its several different sections. The OIP is responsible for the recruitment of all international students to UM through a variety of programs including Study Abroad, Partner Programs, English Language Institute, Undergraduate Pathway (UP) Program, and Full Admissions. The OIP works with its partners to receive sponsored international students and administer their programs. The English Language Institute (ELI) department of the OIP serves international students who wish to improve their English language and academic skills in order to pursue studies at UM or another higher education institution. The OIP also offers students the exciting opportunity to study abroad in one of over 50 countries through three different UM sponsored programs: Faculty-Directed Programs, Partner Universities, and International Student Exchange Programs (ISEP). Global Gateway, an innovative educational service portal within the OIP, develops partnerships with the UM campus, local schools, and community organizations that promote cultural awareness and sharing foreign cultures, traditions, and customs. For additional information, visit OIP in the International Center, call (406) 243-2288, email oip@umontana.edu, or visit the International Programs website.

English Language Institute

UM offers an intensive English program through the English Language Institute. Students are enrolled in 20 hours of class each week. ELI's curriculum addresses the needs of international students whose scores are below UM language requirement scores of 525 ITP/ 70iBT. ELI courses also address the needs of students who want to raise their English language proficiency in order to gain admission to a university or college where English is the language of instruction. Through this program, ELI students can begin their university studies at UM in several ways. They can successfully participate in the ELI/UM Bridge Program, show their academic readiness through ELI coursework, or meet the TOEFL requirements. For more information, visit the English Language Institute website.

Curry Health Center

406-243-2122

Curry Health Center provides affordable, accessible, high quality, student-centered health services to University of Montana students to enhance student learning, promote personal health and development and teach important life skills.

Curry Health Center is YOUR campus based health care center, with services designed to meet the needs of college students and the campus community.

General Information

The Curry Health Fee is paid at registration by students who enroll for seven credits or more (excluding distance only students). Students taking less than seven credits per semester may elect to pay the Health Fee at any time during the semester. The Curry Health Center provides a wide range of primary health care and health

promotion services at discounted rates well below what students would generally find in the Missoula community.

Services in Wellness and Student Advocacy Resource Center (SARC) are available to all students. Services in Medical, Counseling and Dental are available only to students who pay the Curry Health Fee.

We recognize the busy nature of student schedules and seek to provide accessibility for both urgent needs and more routine care via appointments or walk-ins. We are happy to coordinate care with providers "back home" or assist with referral to community resources for problems beyond the scope of the Curry Health Center.

Medical Services

406-243-4330

Curry Health Center provides both primary health care services as well as walk-in care services to the University of Montana student population.

- Traveler's Health (Traveler's Health Services are also available to UM Faculty and Staff)
- Allergy Shots
- Appointment & Walk-In Care
- Preventive Care
- Injury & Illness
- Women’s & Men’s Health
- Saturday Clinic
- Lab & X-ray

Counseling

406-243-4711

Mental Health Crisis Line

800-273-TALK

Counseling provides rapid access and brief therapy for University of Montana students.

- Individual & Groups
- Psychiatry
- Crisis Services

Behavioral Health Options

- Alcohol Classes
    - Out-Patient Counseling
    - Substance Use Counseling

Dental

406-243-5445

Dental care is available to students who have paid the Curry Health Fee. The Dental Clinic's primary focus is on urgent and preventative care. While urgent care is given priority, routine dental care is also provided as time allows. Charges for dental services are set at a substantially lower rate than the private sector.

Services Provided

1. Urgent dental care.
2. Fillings, root canals, simple extractions, crown and bridge procedures (as time permits).
3. Teeth cleaning, periodontal scaling, and oral hygiene instructions.
4. Routine exams and X-rays (‘checkups') on a limited basis-one per year.
5. Night guards for TMJ disorders and protection from grinding.

Referrals to specialists or other dentists are provided for students whose dental needs are beyond the scope/capabilities of the clinic, e.g., oral surgery, complex root canals, orthodontics, dentures, etc. Charges incurred at private offices are the student's responsibility.

The Student Insurance plan does **not** cover dental charges.

Wellness

406-243-2809

Wellness at Curry Health Center provides health education and wellness services to students to help them stay safe and healthy, now and in the future.

- Safer Sex Resources
  - Tobacco Quit Kits
  - Personal Health Coaching
  - Stress Management
  - Peer Educator Training

Student Advocacy Resource Center (SARC)

406-243-5244

24- Hour Crisis Support Line

406-243-6559

Our advocates and staff provide support to anyone who has experienced sexual assault, relationship violence, stalking, and discrimination. The goal of our confidential advocacy services is to help ensure client safety and support personal autonomy, worth, dignity and power.

Our services are comprehensive and we actively listen, believe in, assist and support our clients. SARC interns and professional staff provide brief counseling services for students who have experienced sexual assault or relationship violence. Based upon your decisions and choices, we also provide referrals and connections within the justice, medical, and social service systems.

Your communications with SARC are confidential. Law enforcement, University administration, faculty, and/or family members will not be contacted by SARC unless you request us to do so. Additionally, you have the option of being completely anonymous in your interactions with SARC.

Services provided

- Drop-in Support Center and 24-hour Support Line
- Crisis Intervention and Case Management
- Academic, Medical, and Law Enforcement Advocacy
- Individual and Group Counseling

Health Services Pharmacy

406-243-5171

The Health Services Pharmacy, located in the Curry Health Center building, offers students a complete prescription service and accepts many 3rd party insurance plans at very reasonable rates. The pharmacy is operated by the School of Pharmacy in cooperation with Curry Health Center and is used for training pharmacy students under the supervision of registered pharmacists.

Insurance Billing

406-243-2844

Because of your privacy rights and concerns, Curry Health Center will not automatically bill your insurance plan for services received at Curry Health Center. If you would like to file an insurance claim for services received at Curry Health Center, you must request this through the clinic that you received services from. Curry Health Center will provide a “Walkout Statement” to you that you can send to your insurance. Because your insurance company reimburses you directly, you are responsible for paying charges incurred at Curry Health Center, not your insurance company.

Curry Health Center is not a Medicare/Medicaid provider, nor do we accept direct payments from insurance companies.

UM Police Department

The UM Police Department is composed of the UMPD Police and UMPD-Parking Division. Both areas of UMPD work in partnership with the campus community to provide the most professional, effective public safety services possible. From parking management to crime prevention, the University of Montana Police Department is dedicated to supporting an environment which is safe and conducive to learning.

UMPD - Police

The University of Montana Police Department (UMPD) serves and protects the students, staff, faculty, and all people and property within the University of Montana campus and properties.

Both Police Dispatchers and Officers are on duty 24 hours a day, every day of the year. Our Police Officers and Dispatchers are certified and trained by the Montana Law Enforcement Academey (MLEA). UM Police Officers have the exclusive responsibility to act upon law-enforcement matters and perform police functions for the UM

Main Campus and the Missoula College. UM Police Officers investigate all crimes and enforce federal, state, and local laws as well as University of Montana policies.

All sworn UMPD officers have successfully completed training at the Montana Law Enforcement Academy (MLEA) or equivalent training recognized by the Montana Peace Officer Standards and Training council. Our officers have the same authority and powers of arrest as any officer in the state In addition to the MLEA training, UMPD officers receive additional training throughout the year.

UMPD - Parking Division

The Parking Division of UMPD is dedicated to managing a shared resource to provide the best alternatives and access to the University of Montana campus. Parking is limited. To help alleviate some of this congestion UMPD helps fund ASUM Transportation and Mountain Line Transportation. This helps provide free alternative transportation options to our students, faculty, and staff.

All surface parking lots as well as street parking require permits specific to the area from 7 a.m. to 5 p.m., Monday through Friday. Although permits are not required by UMPD after hours and on weekends, Quick Stops, Service and Delivery, and ADA spots are enforced 24 hours. Events on campus may also charge for parking after hours. **Caution: Read signs carefully.** Each surface parking lot is signed at the entrance and further restrictions are usually designated within the lot.

Visitors here for special events are advised to make arrangements with the department with which they have business prior to their visit.

For more information, visit the UM Police Department website.

University Center

The University Center enriches campus life by providing student-focused opportunities, programs, services, and space.

- The University Center is student-focused. We provide students from diverse backgrounds with the guidance and resources to define and participate in their own learning and development. Student learning, discovery, and engagement are at the core of our work.
- The University Center is committed to providing a broad range of opportunities that enrich the university experience. Through activities, governance, employment, and volunteerism students develop life-long leadership and professional skills.
- The University Center designs programs and activities that appeal to a wide variety of student interests. Our core values – learning, leadership, diversity, and fun – reflect our commitment to relevant and intentional programs that enhance students' overall educational experience.
- The University Center offers a myriad of convenient services including an art gallery, hi-tech study lounge, game room, theater, conferencing services, shipping and mail center, bank and ATMs, copy center, full-service hair salon, bookstore, market, food court, and campus OneCard.
- The University Center provides an inclusive, clean, well-maintained, and environmentally-conscious space for the campus and greater community to meet, study, and interact.

Visit us online at the University Center website.

Sports and Recreation

Organized sports and recreational activities are an important part of academic and leisure life at the University.

Intercollegiate Athletics

The University of Montana-Missoula is a Division I member of the National Collegiate Athletic Association and the Big Sky Conference. The athletic program consists of 15 varsity teams. The men's program includes competition in basketball, cross country, football (Football Championship Subdivision), indoor and outdoor track, and tennis. The women's program offers competition in basketball, cross country, tennis, indoor and outdoor track, volleyball, golf, softball, and soccer. Athletic scholarships are offered in all sports.

Campus Recreation

The Campus Recreation Department offers a wide variety of services to the students, faculty and staff of The University of Montana. A comprehensive intramural sports program provides opportunities for men's, women's and co-recreational team competition and individual events. An outstanding Fitness Program offers yoga, pilates, strength training and other sports specific conditioning.

Recreational facilities include gymnasiums, weight rooms, and indoor running track, handball and racquetball courts, multipurpose fitness studios, tennis courts, indoor swimming pool, indoor climbing wall, and a golf course. Sports equipment such as balls, bats, gloves, etc. can be checked out for free and other equipment such as volleyball, nets, badminton sets, and horseshoes require a cash deposit.

The Outdoor Program offers services to students, faculty, staff and the general public, supplying information, training, and education about outdoor pursuits and sports. Classes are offered on a non-credit basis for activity credits through the Health and Human Performance Department. The Outdoor Program also organizes outdoor trips and hosts high adventure and educational films and lectures.

University Golf Course

The University of Montana-Missoula has a picturesque nine/eighteen hole golf course open to students, faculty, and staff, as well as the general public. It is located approximately one-half mile south of the main campus.

The course has a clubhouse restaurant, driving range, putting and chipping green. The pro shop is well-stocked and club and cart rentals are available. Private lessons are offered by appointment with an assortment of rate structures.

Grizzly Pool

The University of Montana Grizzly Pool is a 7-lane, 25-yard indoor pool. Present programs include: fitness swims, recreational swims, classes for all ages (infant to adult), life guarding and WSI classes, pool rentals, Swim Shop, and competitive skills lessons.

Facilities

Information Technology

Information Technology (IT) provides computing, network, and telecommunications infrastructure, supports enterprise level software, and offers a range of technology support services for the Missoula campus. The organization also coordinates with the other Montana University System campuses, the local community, and the State of Montana to ensure consistency of offerings and policy. IT at the University of Montana is led by a Chief Information Officer (CIO), who reports to UM's President and sits on the President's cabinet and council of vice presidents.

Central IT is organized into five major units of service delivery:

- **Enterprise Information Systems,** responsible for Banner deployment, including student, finance and Human Resource modules.
- **Central Computing Services,** responsible for IT facilities, servers and database administration.
- **Network and Telecommunication Services,** responsible for the campus network infrastructure, telephone system and UM's network connectivity across Montana.
- **Directory Services,** responsible for central authentication, directory and email services.
- **Technology Support Services** , responsible for a variety of client support services including contracted support services, UM’s helpdesk, web application development, web content support services, software licensing, classroom technology support and computer lab management.

For more information, visit the IT website or call (406) 243-4357.

Montana Forest and Conservation Experiment Station

The Montana Forest and Conservation Experiment Station was established by the Montana Legislature in 1937 and is devoted to scientific investigation of natural resource problems. The station serves as a research unit of The Montana University System with the Dean of the College of Forestry and Conservation functioning as station director. The station seeks, through its research; demonstration; and outreach, to enhance public understanding of forestry and conservation and to contribute to responsible management of Montana’s natural resources.

The Shafizadeh Rocky Mountain Center for Wood and Carbohydrate Chemistry

The Center is a research facility in the Department of Chemistry and Biochemistry specializing in development of new chemical products from carbohydrates (monosaccharides to polysaccharide) found in grains and wood. Targeted applications include consumer products and environmentally-safe industrial products such as biodegradable synthetic polymers, pharmaceutical components, and materials for industrial processing.

Stella Duncan Memorial Research Institute

The Institute was created initially by a bequest from an alumna of the University; her original interest was in the causes and treatment of bronchial asthma. Asthma is intimately associated with immune response, which involves Somatic Hypermutation. Our work focuses on the *in vivo* mechanism of mutagenesis associated with Somatic Hypermutation, in the tumor suppressor gene *p53*, responsible for about half of human cancers, and in other mutable systems. We have recently published a manuscript on this mechanism in the journal, Carcinogenesis. Our basic research in this area has led to a deeper understanding of the immune response, which could open the way for new treatments that counteract or modify hypersensitive responses occurring in allergic asthma.

Institute for Tourism and Recreation Research

In 1987, the Institute for Tourism and Recreation Research (ITRR) was established to conduct objective research in tourism and recreation and serves as the research arm for Montana's tourism and recreation industry. ITRR is housed in the College of Forestry and Conservation. ITRR's mission is to provide leadership, direction, and information to assist the tourism and recreation industry in making informed decision about planning, marketing, policy, and management. Furthermore, it is ITRR's mission to conduct valid, reliable, and objective research designed to assist public agencies, businesses, and non-profit firms who provide visitor services or manage parks, recreation areas, and other facilities used by visitors.

Wilderness Institute

The Wilderness Institute seeks to further the understanding of wilderness, natural resources, protected areas, and public lands through education, research, and stewardship.

The Institute administers the Wilderness and Civilization program, an interdisciplinary program in natural resources conservation that offers students courses in environmental policy, ecological literature, Native American studies, field studies, and conservation ecology through in-depth small-class discussions, field trips, service projects, and public lecture series. Students receive a minor in Wilderness Studies upon completion of the program.

Services

Use the links at the lower left to navigate to pages featuring various University of Montanan services and organizations, detailed information regarding expenses, and more.

Community Services

Bureau of Business and Economic Research

The Bureau of Business and Economic Research has been providing information about Montana's state and local economies for over 60 years and is proud to be the most comprehensive economic analysis center in the state.

House on the campus of The University of Montana-Missoula, the Bureau is the research and public service branch of the School of Business Administration. On an ongoing basis, the Bureau:

- analyzes local, state, and national economies
- provides annual income, employment and population forecasts
- conducts extensive research on forest products, manufacturing, health care and Montana Kids Count
- designs and conducts comprehensive survey research at its on-site call center
- presents annual economic outlook seminars in cities throughout Montana
- publishes the award-winning Montana Business Quarterly

Montana Cooperative Wildlife Research Unit

The Montana Cooperative Wildlife Research Unit performs research designed to address the needs of cooperators, bridging the gap between applied and basic wildlife science. Our studies provide new insights useful to management and conservation, based on understanding the ecological mechanisms that underlie habitat requirements and demography of individual and coexisting wildlife species. Research emphases within the Unit include ecology and management of carnivores, applied landscape ecology, management of large game, interactions between forest management and wildlife, environmental influences (predators, habitat, ungulates) on demography and diversity of birds, habitat requirements and community ecology of birds, and comparative demography and life history strategies of birds in differing environmental and geographical contexts. Other research topics are addressed as needed, in keeping with the Cooperative Research Program's mission to best meet the needs of the cooperators by remaining flexible and open to new areas of inquiry. When Cooperator's needs occur outside Unit expertise, the assistance of appropriate University faculty will be recruited.

Unit staff will advance the training and education of graduate students at the University of Montana by teaching up to one graduate-level course per year in wildlife science, chairing graduate committees of Unit students, and serving on graduate committees of non-Unit students. Technical support and training will be provided to Cooperators and other agencies as the need exists.

Objectives of Coop Units

- Conduct research into the ecology of renewable natural resources, and to investigate the production, utilization, management, protection, and restoration of such resources. This research will be relevant to the needs of the State, the geographical region, and the Nation.
- Provide technical and professional education on the graduate and professional levels, in the fields of renewable natural resource sciences.

- Make available to resource managers, land owners, other researchers, and other interested public, such facts, methods, literature, and new findings discovered through research.
- To disseminate research findings through the publication of reports, bulletins, circulars, films, and journal and magazine articles.

Montana Campus Compact

The University of Montana is a member in good standing of The Montana Campus Compact. MTCC is a statewide coalition of college presidents and chancellors committed to renewing the public purposes of higher education by promoting campus-community collaborations and civic engagement activities. Since 1993, these campus leaders have represented two-and four-year, public, private, religiously affiliated, community, and tribal colleges across Montana. MTCC supports and encourages activities such as volunteering, community service, and service-learning through its programs, which include:

- MTCC Campus Corps
- Service-Learning Workshops and Faculty Development
- MTCC VISTA Project
- Compact Service Corps
- Montana Athletes in Service Award
- Careers in the Common Good Scholarships

For more information regarding MTCC member benefits and services, please contact the MTCC headquarters office at (406) 243-5177 or online at the Montana Campus Compact website. For MTCC services at UM, please contact the Office for Civic Engagement at (406) 243-5531 or see their listing under The Office For Civic Engagement.

The Office for Civic Engagement

The Office for Civic Engagement (OCE) is honored to serve as The University of Montana's primary agent of community activism and civic responsibility. It is our mission to cultivate civic competency through curricular and community-based experiences. We accomplish this by collaborating to build networks of reciprocity and partnership between campus and community, engaging people in service to connect people to place to provide for engaged participation in a democratic society, and enriching student learning and scholarly pursuits. The OCE is a unit of the Davidson Honors College and operates as an affiliate of the statewide Montana Campus Compact (MTCC) organization (see separate listing). The OCE is located in the Davidson Honors College, room 015, and can be reached at (406) 243-5531 or the Office for Civic Engagement website.

OCE Programs:

- Student Volunteer Programs - Throughout the school year, OCE coordinates several community service programs for students to get actively involved in the community including Service Saturdays, Alternative Breaks, Adopt-A-Family and more. The OCE hosts the Volunteer Fair each semester to connect students with local nonprofit organizations and volunteer opportunities.
- Pathways of Service Leadership Program - This new program is designed to develop students as leaders through an inclusive process that revolves around service as the vehicle for leadership development and social change in preparation for social impact careers after graduation.
- AmeriCorps* VISTA - The OCE provides students and recent graduates with the opportunity to engage in national service.
- Nonprofit Administration Programs - The OCE facilitates the minor in nonprofit administration and the Nonprofit Leadership Alliance national certificate program in nonprofit administration. Both are degree enhancement programs designed to assist students to achieve skills and abilities in preparation for careers in the nonprofit sector. The OCE also coordinates the Online Professional Certificate Program in Nonprofit Administration, a series of short courses designed for busy professionals who want to hone their skills in specific areas such as grant writing, financial management and fund raising, and serves as the primary advising office for MPA students in the nonprofit administration track.
- Service Learning - Service learning is an innovative method of teaching and learning in which students, faculty, and community partners work together to enhance student learning by applying academic knowledge in a community-based setting. The OCE works with faculty and departments to create meaningful service learning partnerships with community organizations and attain service learning designation status for their courses. Students can search for these courses using the service learning attribute in CyberBear.

Nonprofit Leadership Alliance

The University of Montana is an affiliate of the national Nonprofit Leadership Alliance (NLA). The NLA program at UM is designed to be a degree enhancement certification program that complements a student's major. The program provides students with academic and extra-curricular opportunities to gain skills and abilities in

preparation for professional careers in the nonprofit sector. All Nonprofit Leadership Alliance students acquire knowledge and skills in general nonprofit management, fund-raising principles and practices, board committee development, program planning, and grant writing. Upon completion of the NLA requirements, students receive the national Certified Nonprofit Professional (CNP) credential. The Office for Civic Engagement operates the Nonprofit Leadership Alliance program in addition to the minor in non-profit administration. For more information contact (406) 243-5159 or browse the Nonprofit Leadership Alliance website.

The Clinical Psychology Center

The Clinical Psychology Center (CPC) is operated by the Department of Psychology at the University of Montana. The CPC provides confidential assessment, consultation, intervention, and psychotherapy services. We are able to support children, adolescents, adults, couples, families, and groups.

The CPC is a training clinic, staffed by doctoral students in Clinical Psychology and School Psychology. Although we are located on the University of Montana campus, the CPC serves the entire Missoula community. Our services are provided by student clinicians under direct supervision of licensed clinicians from the Department of Psychology faculty.

You may contact the clinic at (406) 243-2367 or by email at CPCFrontDesk@mso.umt.edu. For more information, visit the Clinical Psychology Center website.

UM Physical Therapy Clinic

The Nora Staael Evert Physical Therapy Clinic at the University of Montana provides services that include physical therapy and wellness to University of Montana students, faculty, and staff and active individuals of all ages in the community. In addition to physical therapy services, the UMPT Clinic also provides physical therapy and fitness programs for people with physical limitations, disabilities, and chronic illnesses. Programs and services include neurology and chronic disease PT services, sports and orthopedic PT services, and the New Directions Wellness Center.

For more information, you may contact the clinic at (406) 243-4006 or visit the offices in the Skaggs Building, room 129.

Organizations

Alumni Association

The University of Montana Alumni Association, established in 1901 by Eloise Knowles, represents more than 85,000 graduates, former students, and friends around the world. The mission of the Association, with offices in Brantly Hall, is to "identify and serve the needs of this University, its alumni, students and friends." The Alumni Association sponsors and helps coordinate Homecoming, Charter Day, Distinguished Alumni awards, Senior Recognition Day, scholarships, internships, and commencement reunions. The Association also connects alumni with currently enrolled students who are exploring career options. Visit the Alumni website for more information.

Associated Students of the University of Montana (ASUM)

Associated Students of the University of Montana (ASUM) Student Government

The Associated Students of the University of Montana is the recognized representative body for both undergraduate and graduate students at the University of Montana. Through ASUM, UM students can voice their opinions and concerns, establish new programs and services for the benefit of all UM students, volunteer on a variety of influential committees, and fund almost 200 student groups on campus. As the only elected, legitimate voice for all UM students, the ASUM Senate meets weekly to discuss topics and find solutions to issues pertinent to students at UM. ASUM offers a variety of beneficial services to students that have paid the student activity fee, and works in the best interest of all UM students. For more information, please contact ASUM at 243-2451, check out the ASUM website, or stop by the ASUM office at UC 104.

ASUM Child Care Preschool and Family Resources

The ASUM Childcare Preschool and Family Resources operates five child care and early education centers. Child care is available to students, faculty, and staff. The centers are open for children 18 months to 6 years old. The program provides referrals to private residences providing child care for children ages new born to 12 years as well as a variety of family resources. For more information, please contact us at 243-2542, the ASUM Child Care Preschool and Family Resources website, or stop by the Child Care office at UC 119.

ASUM Legal Services

ASUM Legal Services provide limited, low-cost legal services to activity fee paying students at The University of Montana and Missoula College. For more information, please contact us at 243-6213, the ASUM Legal Services website, or stop by ASUM Legal at UC 112.

ASUM Off-Campus Renter Center

The Renter Center provides counseling for student renters experiencing issues with their landlord, encourages positive neighborhood relationships, assists students with finding housing, and advocates for renters. Additionally, the agency maintains the Off-Campus Housing Finder and a Rate Your Landlord Application located on the agency website. The Renter Center also runs the Neighborhood Ambassador Program, which works to improve the quality of life in the neighborhoods surrounding the UM campus by bridging the communication gap between student renters and permanent residents. For more information, please contact us at 243-2017, the ASUM Off-Campus Renter Center website, or stop by the Off-Campus Renter Center at UC 118.

ASUM Transportation

The ASUM Office of Transportation promotes and provides transportation options to the University of Montana campus community. Getting to campus and finding a parking space can be frustrating and expensive, and the Office of Transportation offers several convenient alternatives. The UDASH bus operates 3 daytime transit routes: from UM to ride lots and student housing at South Campus every 5-10 minutes (Red Line); between Missoula College and UM every 15 minutes (Blue Line); and between Russell and Wyoming Streets and UM via 5th and 6th Streets every 30 minutes (Purple Line). UDASH also operates late night bus service between downtown, UM, and South Campus student housing with service every 15-30 minutes (Gold Line). The Office of Transportation also provides information and personalized trip planning for Mountain Line, Missoula's city bus. Both bus services are free and open to the public.

In addition to bus service, the Office of Transportation provides interest-free bike loans up to $1,000 for 18 months, bike repair stations around campus, bike tune-up classes and events, and low-cost semester-long bike rentals. The office also operates the Yellow UBike program offering free-two day bike checkouts through the Mansfield Library.

More information is available on the Office of Transportation website, by phone at 243-4599, or in person in UC 105.

KBGA Radio

KBGA College Radio, 89.9 FM, is the student-run, college radio station for The University of Montana. Also available streaming online on the KBGA Radio website, we provide a diverse format of music and talk programming 24 hours a day. We are a non-commercial, educational station, so everyone is welcome to become a DJ. For more information, please contact us at 243-6759, the KBGA Radio website, or stop by the KBGA office at UC 208.

Montana Kaimin

The Montana Kaimin is the University's student-run newspaper. Published since 1899, it has worked hard to serve, entertain, and inform students with issues that are important to them. Publication begins the first week of school and it is printed on Wednesdays during the fall and spring semesters. The Kaimin website is updated daily during fall and springe semesters. For more information and past editions, please contact us at (406) 243-6646, through the Montana Kaimin website, or at our offices in Don Anderson Hall, 208.

UM Productions

UM Productions is a student-run/student-funded organization whose goal is to bring quality events to The University of Montana and the Missoula community. UM Productions strives to provide students with hands-on experiences and employment opportunities and bring concerts and events that are focused on diversity with a strong dedication to the arts. Check out our website for upcoming events and job opportunities. For more information please contact us at 243-4981, on the UM Productions website, or stop by the office at UC 104.

Student Political Action Office

The Student Political Action office is a resource for students who have a desire to participate in the political process at the local, state and federal levels. Through a student committee, the SPA office works to represent student interests by working with City Council, the State Legislature and the Montana Delegation. For more information, please contact us at 243-2451, the Student Political Action Committee website, or stop by the ASUM office UC 105.

ASUM Student Resolution Officer

The Student Resolution Officer is your representative for handling student complaints against a faculty member or university administrator that cannot be resolved informally. The Student Resolution Office advocates for students in a three-step dispute resolution process. For more information, please contact the Resolution Officer at 406-243-5431, the ASUM Student Resolution Officer website, or stop by the ASUM office at UC 105.

ASUM Student Clubs and Organizations

ASUM recognizes and offers funding for 200 student organizations and special interest clubs. Find out about a student group that interests you and the many benefits student groups receive by checking out the ASUM Student Groups website or stopping by the ASUM office at UC 105.

Fraternities and Sororities

The Greek Community of The University of Montana provides a comprehensive educational, social, and living experience for members through the promotion of friendship, leadership, personal development, academics, and services to the University and the Missoula community. The Greek members donate their time and support to over 50 recognized philanthropies. Additionally, they involve themselves in a wide variety of campus leadership organizations, such as Residence Life Staff, PRO's, ASUM Senate, Advocates, Peer Advising, and Mortar Board.

The Greek system has six (6) national fraternities (Sigma Alpha Epsilon, Sigma Chi, Sigma Nu, Kappa Sigma and Sigma Phi Epsilon) and four national sororities (Alpha Phi, Delta Gamma, Kappa Alpha Theta and Kappa Kappa Gamma). Information about Greeks can be obtained in the Office of Greek Life (UC 209B), or by visiting the greek life website, or calling 243-2005.

Peace Corps

Peace Corps service is a life-defining leadership experience. The Peace Corps is a 27-month commitment during which volunteers provide technical assistance in six program areas: education, agriculture, environment, health, youth and community development, business and information and communications technology. Peace Corps volunteers live, learn, and work with a community in one of more than 70 countries overseas.

The Peace Corps Office provides support to students and community members interested in pursuing service with the United States Peace Corps. During walk-in hours and scheduled appointments, Returned Peace Corps Volunteers provide guidance about the application process, as well answer questions about their first-hand experiences living, learning and working with a community overseas. In addition, Peace Corps staff table on-campus and in the community, visit classrooms, and host information sessions, application workshops, and Returned Peace Corps Volunteer panels. For additional information, please visit the Peace Corps Campus Representative at 154 Lommasson Center, call (406) 243-2839, e-mail: peacecorps@umontana.edu or visit the Peace Corps website.

Office for Student Success

Office for Student Success

The mission of the Office for Student Success (OSS) is to help students successfully transition to college, progress academically and ultimately become graduates of the University of Montana. OSS initiates and leads collaboration with academic departments, state and local organizations and administrative units across campus to define, implement and assess programs that support students academically, financially and socially.

OSS delivers direct support services to students in the form of academic advising, math and writing tutoring, and freshman/sophomore programming. The Undergraduate Advising Center and the Writing Center are administered by the OSS.

Undergraduate Advising Center

The Undergraduate Advising Center is a university service staffed by professional advisors and peer advising assistants committed to helping undergraduate students achieve a successful college experience. The UAC programs guide students as they transition to college, assisting them in clarifying academic goals and exploring majors.

Advisors in the UAC work with both faculty and full-time advisors in each of the Colleges to assist students in making decisions about major areas of study and to ensure smooth transitions to and from majors. Working collaboratively, the full-time advisors of the Center consult with academic departments to provide new and creative opportunities for students to explore majors and careers that align with their abilities, interests, and strengths.

UAC advisors are the advisor of record for first year students who plan to major in Business, Pre-Nursing, Psychology, or Communication Studies and all students who have not yet declared a major.

The Writing Center

The Writing Center administers programs to help undergraduate and graduate students in all disciplines become more independent, versatile, and effective writers, readers, and thinkers. Writing Center tutors engage students in structured discussions about writing, challenging them to develop as writers and thinkers who contribute to local and global conversations. Focused on the development of the writer, tutors help students to recognize their strengths and weaknesses as communicators and to practice strategies appropriate to various writing contexts.

The Writing Center also collaborates with faculty to positively impact student performance. These collaborations include delivery of discipline-specific writing workshops across the curriculum and professional development opportunities such as workshops on how to design writing assignments and how to provide students with effective feedback on their writing. In an effort to support all writers at the University of Montana, the Writing Center also supports faculty and staff writers by providing one-to-one consultations on their professional writing projects.

Four Bear Four-Year Graduation Plan

The Four Bear Four Year Graduation program is designed for students committed to completing their degree at the University of Montana within four years. Four Bear participants are provided with registration priority after signing the Four Bear contract in the first year. The program pays tuition and mandatory fees past the planned graduation time provided the student has met all of the requirements for continued participation. Pharmacy is an exception to the four-year plan; students are given five or six years to complete this degree.

Most department sections in the catalog include a suggested four-year course of study to complete a major. Four-Bear students must meet with their advisors in order to customize a plan to fit individual circumstances and academic.

The courses listed under the Missoula College section are those taught exclusively on the Missoula College campuses, however Missoula College also offers lower division courses from the Mountain Campus.
