University of Montana Catalog (2016-2017)

University of Montana Catalog 2016 - 2017

The University of Montana capitalizes on its unique strengths to create knowledge, provide an active learning environment for students, and offer programs and services responsive to the needs of Montanans. The University delivers education and training on its four campuses and through telecommunications to sites inside and outside of Montana. With public expectations on the rise, the University asks its students, faculty, and staff to do and accomplish even more than they have in the past. The University has a commitment to education defined in the broadest sense as personal development and citizen preparation, workforce development and training, graduate education and research, service learning, and community building on and off the campuses. The University enhances its programs through continuous quality review for improvement and remains fully accountable to the citizenry through annual audits and performance evaluations.

Disclaimer

As of Monday, August 29, 2016, the 2016-2017 catalog is available online. Final changes/preparations are continuing before we have a final catalog in the very near future. The University of Montana is updating much of the technology behind the scenes in order to better present the online catalog.

The University and its colleges and schools reserve the right to change the rules, the calendar regulating admission and registration, the instruction in and the graduation from the University and any other regulations affecting the student. The University also reserves the right to withdraw or adjust courses and programs as they appear in the catalog at any time. Please direct questions about the catalog and the information contained within to the Registrar's Office or the department offering the courses.

The Montana University System - Mission

The following Strategic Plan was adopted by the Board of Regents in July 2006, and updated in January 2010.

More information is available on the Office of the Provost website.

Mission

The Mission of the Montana University System is to serve students through the delivery of high quality, accessible postsecondary educational opportunities, while actively participating in the preservation and advancement of Montana's economy and society.

Vision

We will prepare students for success by creating an environment of ideas and excellence that nurtures intellectual, social, economic, and cultural development. We will hold academic quality to be the prime attribute of our institutions, allocating human, physical, and financial resources appropriate to our educational mission. We will encourage scientific development and technology transfer, interactive information systems, economic development and lifelong learning. We will protect academic freedom, practice collegiality, encourage diversity, foster economic prosperity, and be accountable, responsive, and accessible to the people of Montana.

Introduction

The Montana University System Strategic Plan is the primary planning document of the Board of Regents.The Plan sets forth an agenda for higher education in Montana by delineating the strategic directions, goals, and objectives that guide the Montana University System (MUS).

History

In July 2006, after several years of study, public dialogue, and internal deliberations, the Board of Regents approved the Strategic Plan. Since then, updates have occurred annually, including revisions to strategic initiatives as well as a refreshing of the data within each goal. The development of the Strategic Plan began with two primary initiatives.

The first was to work more closely with the interim legislature to develop a set of mutually agreed upon accountability measures that would guide the MUS and evaluate progress. Working with the Postsecondary Education Policy and Budget (PEPB) subcommittee of the 57th Legislature, the Board of Regents did develop this set of accountability measures in July 2002. Subsequently, the PEPB subcommittee has updated the accountability measures. This latest set of agreed-upon measures evolved into "shared policy goals" and work to form one base for this strategic plan.

The second initiative was to work with the PEPB Subcommittee to explore new ways for the MUS take a more direct leadership role in the state's economic development. This overall effort, called "Shared Leadership for a Stronger Montana Economy", engaged a broad range of Montanans to prioritize specific initiatives that would help establish a new role for the MUS in strengthening the state's economy. The Governor's Office and several legislative interim committees were included in the effort.

In July 2004, the Board of Regents and the PEPB subcommittee met jointly and agreed on three priority initiatives for immediate implementation:

- Develop stronger business-university system partnerships for workforce training;
- Remove barriers to access for postsecondary education; and
- Expand distance learning programs and training.

Goals

The Strategic Plan is comprised of three primary goals that contain a series of sub-goal statements and objectives within each area.

Goal 1: Access & Affordability

Increase the overall educational attainment of Montanans through increased participation, retention and completion rates in the Montana University System.

Goal 2: Workforce & Economic Development

Assist in the expansion and improvement of the state's economy through the development of high value jobs and the diversification of the economic base.

Goal 3: Efficiency & Effectiveness

Improve institutional and system efficiency and effectiveness Maintaining the high quality of our institutions and the education provided to our students is not listed as an explicit goal. This is because it is THE MOST IMPORTANT consideration for every goal and initiative of the Montana University System and is considered to be an integral part of every component of this strategic plan.

University of Montana - Mission

Mission

The University of Montana capitalizes on its unique strengths to create knowledge, provide an active learning environment for students, and offer programs and services responsive to the needs of Montanans. The University delivers education and training on its four campuses and through telecommunications to sites inside and outside of Montana. With public expectations on the rise, the University asks its students, faculty, and staff to do and accomplish even more than they have in the past. The University has a commitment to education defined in the broadest sense as personal development and citizen preparation, workforce development and training, graduate education and research, service learning, and community building on and off the campuses. The University enhances its programs through continuous quality review for improvement and remains fully accountable to the citizenry through annual audits and performance evaluations.

University of Montana Missoula - Mission

Mission

University of Montana-Missoula pursues academic excellence as demonstrated by the quality of curriculum and instruction, student performance, and faculty professional accomplishments. The University accomplishes this mission, in part, by providing unique educational experiences through the integration of the liberal arts, graduate study, and professional training with international and interdisciplinary emphases. The University also educates competent and humane professionals and informed, ethical, and engaged citizens of local and global communities; and provides basic and applied research, technology transfer, cultural outreach, and service benefiting the local community, region, State, nation and the world.

Vision Statements

In pursuit of its mission, University of Montana-Missoula will:

1. Educate students to become ethical persons of character and values, engaged citizens, competent professionals, and informed members of a global and technological society.
2. Increase the diversity of the students, faculty, and staff for an enriched campus culture.

3. Attain the Carnegie Commission status of Doctoral Research–Extensive University (50 or more doctorates in at least 15 fields annually) and increase funded research to $100,000,000 annually by 2011.
4. Pursue more partnerships–especially with local communities, businesses and industries, public schools, community and tribal colleges, state and local governments and universities abroad–and expand the training and technology transfer programs to promote community and economic development.
5. Develop the capability and infrastructure for use of information technology to increase the efficiency and productivity of the campus and the state; and
6. Involve and engage the faculty, staff, students, alumni, partners, and friends of the University in institutional governance.

Equal Opportunity

University of Montana is committed to a program of equal opportunity for education, employment and participation in University activities without regard to race, color, gender, age, religion, creed, political ideas, marital or family status, physical or mental disability, national origin or ancestry, gender identity, or sexual orientation.

Accreditation

The University of Montana-Missoula is accredited by the Northwest Commission on Colleges and Universities (NWCCU).

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future.

Institutional integrity is also addressed through accreditation. Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding an institution's accredited status by the Northwest Commission on Colleges and Universities should be directed to the administrative staff of the institution.

Individuals may also contact:

Northwest Commission on Colleges and Universities

8060 165th Avenue N.E., Suite 100

Redmond, WA 98052

The 2016-2017 Academic Calendar (as well as previous and future calendars) may be viewed on the Provost Office web page.

A Listing of Important Dates and Deadlines may be viewed on the Registrar's Office Calendar web page.

University of Montana - Missoula Strategic Goals

The planning context for the University of Montana is framed by the Montana Board of Regents Strategic Plan. The UM Strategic Plan is also known as Core Themes. It is updated annually and its progress is continuously monitored through the compilation and analysis of key outcomes data.

The following five strategic issues form the foundation of the new UM Strategic Plan. The degree to which the University of Montana attends and adheres to these goals will ultimately determine its continued success and value.

PARTNERING FOR STUDENT SUCCESS

The University will help its students succeed academically and personally so they graduate well-prepared for their careers or further education. The Partnering for Student Success plan identifies six key objectives critical to student success and sets forth actions to promote a successful first year for entering freshmen and to address the needs of returning students. UM seeks to improve students' success by addressing their preparedness for college-level work, improving their transition to college, providing an integrated early curriculum, increasing student engagement and support, and emphasizing faculty and staff development. As part of the plan, UM created the Office for Student Success, which is charged with developing, implementing, and coordinating initiatives to increase students' persistence toward graduation.

EDUCATION FOR THE GLOBAL CENTURY

UM will offer an educational experience at all degree levels that provides graduates the foundation to make positive impacts on a world that is increasingly interconnected. The University's Academic Strategic Plan, endorsed by the Faculty Senate in 2009, identified the need to create a gateway-to-discovery experience focused on the challenges of the global century for all incoming students at each level of postsecondary education. At the same time, the University recognizes the need to support and strengthen foundational academic programs. For all students, curricula will focus on producing workers and leaders who make a difference in the cultural and economic fabric of Montana and the world.

DISCOVERY AND CREATIVITY TO SERVE MONTANA AND THE WORLD

The University will transform discovery and creativity into knowledge, applications and experiences in ways that benefit the state, region, nation and world. Scholarship, research, and creative work are central to the lives of faculty, students, and staff, and to academic programming at the University of Montana. Therefore, UM supports research, scholarship, and creative work across the natural and physical sciences, social and behavioral sciences, arts, and humanities, and works to enhance opportunities for interdisciplinary connections. By fostering an entrepreneurial spirit in the community of research and technology, UM transforms discovery into application.

DYNAMIC LEARNING ENVIRONMENT

UM will enhance its character as a place where people are passionate about learning, discovery and growth. The University of Montana is consistently recognized as one of the most attractive and enticing campuses in the nation. Community and campus engagement literally means that the lives of the students, faculty, staff, alumni, and friends of the University are centered on the campus. Examples range from sold-out athletic events that feature perennial championship teams, to galleries, campus theaters, and arenas filled to capacity for performances featuring local and world famous artists. UM builds a vibrant and dynamic learning environment, where the natural surroundings are integrated into the curriculum.

PLANNING-ASSESSMENT CONTINUUM

The University will model transparency, systematic communication and sound decision-making to ensure that resources are marshaled to achieve UM's mission. The Planning-Assessment Continuum characterizes a cultural orientation of the University of Montana designed to facilitate desired outcomes, clarify the University's vision and mission, and communicate and demonstrate to internal and external stakeholders that the University is making the best use of its resources. Executive leadership provides communication of mission and vision, clear and consistent processes, overarching mission-driven goals, equitably applied parameters, and rules enforcement, while faculty, staff, and students provide ideas, process improvements, work, action, and other vital contributions to the direction of the University.

Bachelor Degree Admission – Entering Freshmen

Academic Eligibility

The University continues to raise the academic standards required for full admission to Baccalaureate programs, and the process will continue in future years. For the current academic year both in-state and out-of-state high school graduates will be offered full admission if they meet the requirements below.

Some departments reserve the right to set higher admission standards for their undergraduate programs. Applicants to these programs will be admitted to the appropriate pre-major program by Enrollment Services-Admissions. Application to the undergraduate degree program is an additional, separate process administered by the department and arranged for by the student seeking acceptance.

1. Graduation from a state accredited high school.
2. Successful completion of the following College Preparatory program:

- Four years of English.
- Three years of math, including Algebra I, Geometry and Algebra II (or the sequential content equivalent of these courses). Students are encouraged to take a math course in their senior year.
- Three years of social studies, including one year global studies (i.e., world history or world geography), one year American history and one year of additional course work (i.e., government, psychology, economics).
- Two years of laboratory science. One year must be earth science, biology, chemistry, or physics; the other year can be one of those sciences or another approved college prep laboratory science.
- Two years chosen from the following: foreign language (preferably two years), computer science, visual and performing arts, or vocational education units.

3. Students must meet one of the following admissions requirements:

- ACT composite of 22, or
- SAT combined score of 1540, or
- a 2.50 cumulative grade point average, or
- class rank in the upper half of the graduating class.
- Students whose tests or GPA are significantly below this level may be admitted on a conditional basis.

4. Students must meet a minimum Math Proficiency score of:

- 22 on the ACT Math section or
- 520 on the SAT Math section or
- A score of 3 or above on the AP Calculus AB or BC Subject Exams. In lieu of the above requirement, students can complete a Rigorous High School Core that includes four years of math with grades of C or higher and three years of lab science or
- 4 on the International Baccalaureate Calculus Exam.

5. Students must meet a minimum Writing Proficiency score of:

- 18 on the Combined English/Writing section of the Optional Writing Test or a 7 on the Writing Subscore of the ACT; or
- 440 on the Writing Section of the SAT or a 7 on the Essay the SAT; or
- 3.5 on the Montana University System Writing Assessment; or
- 3 on the AP English Language or English Literature Examination; or
- 4 on the International Baccalaureate Language A1 Exam or
- 50 on the CLEP Subject Exam in Composition.

Home-Schooled Students

Information on admission requirements for home-schooled students or students who graduate from a non-accredited high school can be found at the UM admissons home school web page.

Traditional-Age Freshmen with GED

GED freshmen are those students who have passed the GED and enter college within three years of the date they would have graduated from high school. Admission will be determined by current University of Montana criteria for GED freshmen. All GED freshmen applicants are required to take the ACT or SAT.

Non-Traditional Freshmen

Non-traditional freshmen are those students who are over 21 years old and who did not enter college for a period of at least three years from the date of high school graduation. Admission will be determined by current University of Montana criteria for non-traditional students. Non-traditional freshmen will be admitted conditionally if test scores are not posted on the high school transcript or if a student has never taken the ACT or SAT.

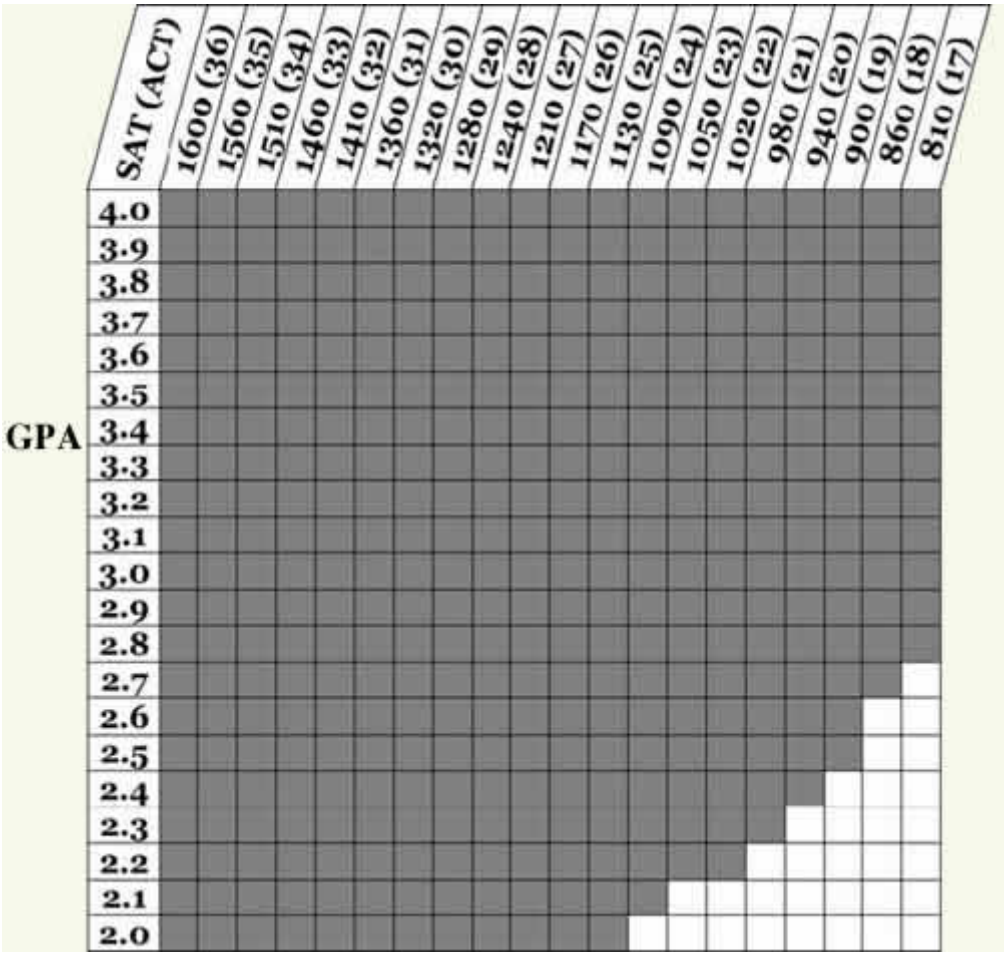
The following students are exempt from Standards 1, 2, 3, 4 and 5 above:

- Summer Only Students
- Part-time students taking seven or fewer college-level semester credits.

Conditional Acceptance

Students who have a high school diploma or its recognized equivalent, but do not otherwise meet the admission requirements, may be admitted on a conditional basis. To be admitted conditionally, the Admissions Committee must determine that a student could be successful by taking advantage of the academic support services that are available. Students will be granted full admission after completing 24 credits with a grade point average of at least 2.0. Students are expected to complete the 24 credits within two semesters but must complete them within three semesters. In cases where academic preparation falls well below the admission standards listed above, applicants will be directed to the Missoula College where courses can be taken to strengthen their preparation for success at the University of Montana.

Future trends in Admission Eligibility at UM



In future years, the academic criteria for full admission to Baccalaureate programs at The University will continue to rise. Students who fail to meet these stricter admission standards may be admitted on a conditional basis (see above).

How to Apply

Applications for admission are available from Enrollment Services-Admissions by request or are available on the University Admissions website. An application for admission is complete when Enrollment Services-Admissions receives the credentials described below.

1. Application form. Applications must be complete and signed.
2. Application Fee. The fee is $30. This non-refundable fee is payable once at the undergraduate level provided payment is followed by enrollment. Record of payment will remain on file for one year for students who do not enroll. Applications are not processed prior to payment of this fee. The University of Montana-Missoula waives the application fee for students who have attended

an affiliate campus: Montana Tech or Highlands College (former College of Technology) in Butte, Helena College (formerly Helena College of Technology), and University of Montana-Western in Dillon.
3. Test scores. Official ACT or SAT results should be sent directly from the testing company or may be posted on the high school transcript.
4. Final high school transcripts. Transcripts should be submitted after graduation and must include a graduation date and final GPA. Eligibility for admission and scholarships will be verified from this transcript.
5. Immunization Form. All students are required to submit a completed Medical Requirement Form to the Curry Health Center prior to registration. It is important that the immunization record be complete, accurate and validated by a health official.

When to Apply

Applications and all required documents submitted by the following dates will receive priority consideration:

- March 1 - Fall semester
- November 15 - Spring semester

Applications received after the priority dates are considered on a space-available basis.

Transfer Students

Academic Eligibility

Undergraduate degree applicants who have graduated from high school or have earned a HiSET or GED and have attempted twelve or more college level credits must meet the academic eligibility requirements described here. Any undergraduate degree transfer applicant who has attempted fewer than twelve college level credits must meet the academic eligibility requirements for freshman mentioned in the freshman admission section.

Applicants must present a 2.00 (C) cumulative grade average (on a 0-4 scale) for all college level work attempted to be eligible for admission.

How to Apply

Applications for admission are available from Enrollment Services-Admissions by request or are available on the University Admissions Transfer web page.

Receipt of the following credentials in Enrollment Services-Admissions constitutes a complete application for admission:

1. Application Form. Applications must be complete and signed.
2. Application Fee. The fee is $30.00. This non-refundable fee is payable once at the undergraduate level provided payment is followed by enrollment. Record of payment will remain on file for one year for students who do not enroll. An application cannot be considered prior to payment of this fee. The University of Montana-Missoula waives the application fee for students who have attended an affiliate campus: Montana Tech, Montana Tech College of Technology, Helena College of Technology, and University of Montana Western.
3. Official College/University Transcripts. The student must supply a complete official transcript from each regionally accredited college or university attended, and from each college or university attended holding candidate status for regional accreditation. Applications from students who are enrolled at the transfer school while applying to UM will be considered for admission based on current official transcripts showing all academic work completed and posted to date. The final official transcript must be on file before the second registration at UM. Academic eligibility will be reviewed upon receipt of the complete transcript.
4. Immunization Form. All students are required to submit a completed Medical Requirement Form to the Curry Health Center two weeks prior to registration. It is important that the immunization record be complete and accurate and validated by a health official. Students born after December 31, 1956 must submit proof of immunization or titer against Rubella and measles (Rubeola). Students will not be allowed to register until the Curry Health Center has received proof of immunization.

When to Apply

Applications and all required documents submitted by the following dates will receive priority consideration:

- March 1 - Autumn semester
- November 15 - Spring semester

Applications received after the priority dates are considered on a space-available basis.

General Education for Transfer Students

Students transferring credits from other institutions must meet all requirements by transfer, by examination, or by completing courses at the University of Montana-Missoula.

According to Board of Regents policy, students who can demonstrate that they have completed an approved lower-division general education requirement at an approved Montana institution of higher education will be deemed to have completed general education requirements except for the advanced writing requirements in their majors.

Montana University System transfer students who have completed the lower-division course work in an approved general education program prior to admission should request that the Registrar of the other school certify completion of these requirements to the Admissions Office.

Students who have earned 20 or more credits equivalent to the approved Montana University System Transfer Core (see MUS Transfer core website) as a degree-seeking student at another institution prior to their initial registration at UM-Missoula may choose to complete the MUS Transferable General Education Curriculum to satisfy all UM lower division General Education requirements. Students will still have to complete UM's advanced writing requirement.

In order to determine if transfer course work satisfies General Education requirements, the credits for each course are rounded. For example, if a student transfers in two N-courses each worth 2.66 credits, each course counts as 3 N-credits towards the Group XI requirement. On the other hand, an L-course worth 2.49 credits does not satisfy the Group V requirement of 3 L-credits.

Students who have completed a bachelor degree at the University or elsewhere will be presumed to have completed the General Education Requirement.

Admissions & New Student Services will evaluate all transfer credits for General Education credit. Students who wish to appeal that evaluation may petition the Graduation Appeals Subcommittee of the Academic Standards and Curriculum Review Committee, but such petitions must be initiated during the first semester of the student's attendance following that evaluation.

Writing Course Requirement Regarding Transfer Students

The Admissions Office (406-243-6266) evaluates transcripts for course equivalencies with the exception of UM's approved writing courses. If transfer students believe a transfer course meets the approved writing course requirement defined in the Faculty Senate Writing Committee guidelines they may petition for an exemption through the Writing Committee. These students must provide the following information to the Writing Committee. Appeal information should be submitted to the Faculty Senate Office, UH 221, camie.foos@mso.umt.edu, 243-5553.

1. A cover letter outlining the basis for the request. Include pertinent information such as contact information, student ID number, and how you fulfilled this requirement in a course at your previous institution.
2. A syllabus and course description. The course must include at least 16 pages of writing for assessment and at least 50% of the course grade should be based on your performance on writing assignments.
3. Three papers from any college class with original instructor comments. Original instructor comments are those grading and feedback markings on papers that are returned to the student for revision or at the end of the term. Papers without these comments will not be considered. At least one of these papers must be at least six pages long and include a bibliography or works cited. Your papers should demonstrate your ability to:

- Use writing to learn and synthesize new concepts
- formulate and express written ideas that are developed, logical, and organized
- Compose written texts that are appropriate for a given audience, purpose, and context
- Revise written work based on comments from the instructor
- Find, evaluate, and use information effectively and ethically
- Begin to use discipline-specific writing conventions
- Demonstrate appropriate English language usage.

Incomplete packets will not be evaluated.

This information pertains only to the intermediate writing course, not the advanced writing requirement. Students should speak to their major department regarding any issues relating to the advanced writing requirement.

Bachelor of Applied Science Admission

Academic Eligibility

Applicants must hold an Associate of Applied Science degree from an accredited institution with a minimum cumulative grade average of 2.5.

How to Apply

UM baccalaureate applications are available from Enrollment Services-Admissions or the Missoula College by request or are available on the Missoula College website. Applicants should contact the Bachelor of Applied Science advisor at Missoula College, 406-243-7801. The applicant and advisor meet to discuss application procedures as well as degree plan identification and required approval.

Receipt of the following constitutes a complete application toward completing a B.A.S. degree:

1. Application Form. Applications must be complete and signed.
2. Official college/university transcripts. The student must supply a complete official transcript from each regionally accredited college or university attended.
3. Application Fee. The fee is $30 (if the applicant is new to The University of Montana system).
4. Immunization Form. All students are required to submit a completed Medical Requirement Form to the Curry Health Center two weeks prior to registration if the applicant is new or has been absent for more then 24 months from the University of Montana system.

When to Apply

Applications from students who hold an A.A.S. degree with a GPA of 2.5 are accepted on a continuing basis. Applicants in the process of completing the A.A.S. degree are encouraged to begin the application process during their final semester. Students are not, however, admitted until after the A.A.S. degree has been awarded.

General Admission Information

Advanced Placement (AP) Program/College Level Examination Program (CLEP)

College credit may be granted based on achievement in college level high school courses, provided the University has received satisfactory scores from the College Level Entrance Examination Program (CLEP) or the Advanced Placement Program (AP) examinations.

It should not be assumed that credit granted by other colleges/universities would be allowed by UM. Specific questions regarding the Advanced Placement Program should be directed to Enrollment Services-Admissions.

The University policy for awarding credit on the basis of AP/CLEP is available on the Admissions Advanced-Credit web page.

International Baccalaureate

The University of Montana recognizes IB achievement and grants college credit provided the University has received satisfactory scores from the International Baccalaureate Program. University policy on awarding IB credit is available on the Admissions Advanced-Credit web page.

Foreign Language Placement

Transfer credit is not granted for high school foreign languages. Placement testing is done by the Department of Modern and Classical Languages and Literatures to determine appropriate class placement for entering students.

Immunization Requirements

Montana state law requires postsecondary students to provide proof of immunization. Students must complete the Medical Requirement Form and return the form to the Curry Health Center prior to orientation and registration.

Registration cannot be completed without this documentation. A Medical Requirement Form is sent with the admission acceptance letter. For additional information visit the Curry Health Center website.

High School Pilot Program

Area high school juniors and seniors of outstanding ability can enroll in University classes under the High School Pilot Program. Students must have approval from their high school counselor/principal and parent/guardian if under age 18.High school students earn college credit, receive an early introduction to University opportunities and are able to develop skills and knowledge beyond the high school level. For more information, contact the

Coordinator of the High School Pilot Program, Enrollment Services-Admissions, Lommasson Center 101, The University of Montana-Missoula, Missoula, MT 59812 or phone (406) 243-6266. For opportunities in the Missoula College, phone (406) 243-7828.

Dual Credit Program

The Dual Credit Program enables high school juniors and seniors of outstanding ability to earn college credit in certain high school courses. Students must have approval from their high school counselor/principal and parent/guardian if under age 18. For information, contact the Missoula College at (406) 243-7828.

International Student Exchange Program (ISEP)

The University of Montana is a member of the International Student Exchange Program (ISEP), which allows University of Montana students to spend a semester, a year, or a summer abroad at one of ISEP's 141 member institutions in 42 foreign countries. ISEP offers reciprocal exchanges (students pay their home tuition, room and board, and create a space for an incoming international student) and ISEP-Direct programs (students pay a program fee covering tuition, room and board through the University of Montana to ISEP). Other expenses for which the student is responsible include: books and supplies, local transportation, round-trip airfare, or personal expenses.

For information on ISEP, please contact International Programs, International Center, The University of Montana-Missoula, Missoula, MT 59812 or phone (406) 243 2288.

National Student Exchange (NSE)

The University of Montana-Missoula participates in the National Student Exchange (NSE) program with 190 other state colleges and universities. This program offers students the opportunity to become better acquainted with different social and educational patterns in other areas of the United States. NSE encourages students to experience new life and learning styles, appreciate differing cultural perspectives, learn more about themselves and others and broaden their educational backgrounds through specialized courses or unique programs which may not be available on the home campus. Qualified students may participate in the exchange program for up to one academic year. For more information, contact the Coordinator of the National Student Exchange Program, Enrollment Services-Admissions, Lommasson Center 101, The University of Montana-Missoula, Missoula, MT 59812 or phone (406) 243-6266. Find more information on the National Student Exchange website.

Special Admission Committee

A special admission committee reviews applications from students who do not meet the regular admission standards.

Enrollment Limitation

The University of Montana-Missoula may deny or condition admission, readmission, or continuing enrollment of any individual who, in the judgment of the University, presents an unreasonable risk to the safety and welfare of the campus and persons thereon. In making such judgment, the University may, among other things, take into account the individual's history and experience relative to (a) violence and destructive tendencies, (b) behavior on other college campuses, and (c) any rehabilitative therapy the individual may have undergone.

The University of Montana-Missoula adopts the following Admission Review Procedures:

The Assistant Vice President for Enrollment, the Dean of the Graduate School or the Chair of the Admissions Committees of the various professional schools at The University of Montana-Missoula shall be responsible for the administration of the Admissions Review procedures established to implement Board of Regents policy. When the responsible admissions officer has reason to believe an applicant may present an unreasonable risk to the safety and welfare of the campus and persons thereon, additional information regarding the applicant's background and experiences shall be requested. No applicant's admission may be barred automatically, solely by reason of a criminal conviction, if state supervision has terminated, or solely by reason of a youth court adjudication. The responsible admissions officer may request additional information in the following instances: (1) When an applicant has been convicted of a felony; (2) When an applicant has been adjudicated as a danger to others or to self; (3) When an applicant has been suspended or expelled for disciplinary reasons from other educational institutions, either before or after the applicant has been accepted at The University of Montana-Missoula; (4) When, on the basis of other facts, the Assistant Vice President for Enrollment or other responsible officer has reason to believe an applicant may present an unreasonable risk to the safety and welfare of the campus and persons thereon.

After obtaining additional information, the responsible admissions officer may admit the applicant or refer the application to the Admissions Review Committee for review and recommendation.

Evaluation of Transfer Credits

Evaluation of transfer credits is determined by Enrollment Services-Admissions at the time of admission. The evaluation is included in the acceptance packet and in the advising materials distributed during orientation. All college-level credits from regionally accredited colleges and universities will be accepted for transfer. Credits from colleges or universities that are candidates for regional accreditation will be accepted only after the student has successfully completed twenty semester credits at UM. Course work from unaccredited schools is not accepted or evaluated unless an individual exception is requested by the student and approved by a committee composed of the Academic Vice President, Assistant Vice President for Enrollment and the Registrar.

Enrollment Services-Admissions determines whether or not courses are college-level, the appropriate grading and credit conversion and the applicability of the transfer courses to UM's general education requirements. Transfer courses graded C- or above will count toward general education and major, minor, option or certificate requirements. Transfer courses with grades of D or D- transfer as elective credit. The student's major department may further evaluate the applicability of transfer courses to the student's selected program of study. College-level courses which do not have an equivalent at UM will be accepted as elective credits.

Up to 15 credits of vocational-technical course work from regionally accredited schools are accepted as free electives in transfer toward an AA, AS, or baccalaureate program. Up to 20 credits may transfer for students completing an AAS degree. Missoula College technical courses are designated by a course number suffix of "T."

Elective credit may be given for military courses according to the recommendations in the American Council (ACE) Service Guide. Elective credit may also be given for training programs recommended by the ACE Guide.

The University of Montana database of courses transferable from colleges and universities is available on the Admissions transfer credit web page.

Students who wish to appeal a decision regarding acceptance of transfer credit should contact Enrollment Services-Admissions to receive information on the appeal process.

Evaluation of Transfer Credit-Missoula College

Missoula College students must submit official transcripts for evaluation. If a student feels that a course taken at another institution may substitute for a specific Missoula College course, the evaluation will be done by the associate dean and the chair of the department of the equivalent course. Transfer courses graded C- or above will count toward general education requirements. Transfer courses with grades of D or D- transfer as elective credit. The student's major department may require a grade above C- to meet specific major requirements.

Western Interstate Commission for Higher Education

The Western Interstate Commission for Higher Education's Professional Student Exchange Program enables students in thirteen western states to enroll in out of state professional programs when those programs are not available in their home states. Exchange students receive preference in admission. They pay reduced levels of tuition: for most students, resident tuition in public institutions or reduced standard tuition at private schools. The home state pays a support fee to the admitting schools to help cover the cost of students' education.

The following professional programs are not available in Montana but are supported by the Montana WICHE program. They are dentistry, medicine, occupational therapy, optometry, osteopathic medicine, podiatry, public health and veterinary medicine.

The Certifying Officer for the State of Montana can be contacted for specific details about the program. WICHE Student Exchange Program, Montana University System, 2500 Broadway, Helena, MT 59620. (406)444-6570 or Fax: (406) 444-1469.

Western Undergraduate Exchange Program (WUE)

The Western Undergraduate Exchange (WUE) Scholarship program at The University of Montana-Missoula is a highly competitive academic merit based scholarship which strictly monitored. Awards are decided upon a comprehensive review of a student's cumulative G.P.A. and test scores. When undergraduate students apply and are admitted from a WUE state they are automatically considered for the WUE, if not eligible for the WUE they are reviewed for other awards. The WUE states are limited to students who are legal residents of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming. Please note: Only first time incoming freshman and new transfer students are eligible for the WUE scholarship. *Currently enrolled students not originally awarded WUE, post-baccalaureate students and returning students are not eligible for WUE.*

The amount of the WUE scholarship will always represent the 150% of the cost of Montana resident tuition and fees. The WUE scholarship will automatically be renewed each semester providing students follow all conditions of the WUE Scholarship.

The conditions of the WUE Scholarship are:

- The award is in effect for four years or until completion of a bachelor's degree (120 credits) whichever comes first.

- You must maintain a 3.0 grade point average and register for at least 15 credits each consecutive term of enrollment. Please note that completion of 15 credits per semester leads to graduation within four years.
- Tuition and fees at UM between 12 – 21 credits costs the same. The best way to maximize your tuition dollars is by taking advantage of this cost savings during your scholarship eligibility.
- You may not earn Montana residency for fee purposes at any unit of the Montana University System.
- If you change your status to Distance Only or if you transfer your enrollment to the Missoula College your Western Undergraduate Exchange Scholarship will no longer apply.

To be eligible for the WUE scholarship first time incoming freshman and transfer students must apply for admission and be admitted to The University of Montana. Awarding of the WUE will occur on a space available rolling basis with priority given to those who apply before December 31st. Further details are available from the Enrollment Services-Admissions Office website.

Student Conduct Code

The Student Conduct Code, embodying the ideals of academic honesty, integrity, human rights and responsible citizenship, governs all student conduct at The University of Montana-Missoula. Student enrollment presupposes a commitment to the principles and policies embodied in this Code. The Student Conduct Code sets forth University jurisdiction, student rights, standards of academic and general student conduct, disciplinary sanctions for breach of the standards of student conduct and procedures to be followed in adjudicating charges of both academic and general misconduct. The Vice President for Student Affairs is responsible for procedural administration of the Student Conduct Code for all general conduct. The Provost and Vice President for Academic Affairs is responsible for all academic conduct. Copies of the Student Conduct Code can be obtained from the offices of the Vice President for Student Affairs, the Provost and Vice President for Academic Affairs, Residence Life, and Associated Students of The University of Montana-Missoula (ASUM). The Student Conduct Code also can be accessed from the Vice President for Student Affairs Student Conduct Code web page.

Service Members Opportunity College

The University is a member of Service members Opportunity Colleges, a consortium of over 1300 institutions pledged to be reasonable in working with service members and veterans trying to earn degrees.

vetsoffice@umontana.edu

Associate of Applied Science, Associate of Arts and Certificate Admission

The Associate of Applied Science and Certificate of Applied Science programs in the Missoula College are designed to lead an individual directly to employment in a specific career path. In some instances, particularly in allied health, the degree is a prerequisite for taking a licensing examination. Students may pursue a baccalaureate degree at the University of Montana after completing an AAS degree through a Bachelor of Applied Science degree plan. The Associate of Arts degree is a University of Montana transfer degree which offers students the opportunity to complete a 60 credit transfer degree toward completing a baccalaureate degree at the University of Montana or other accredited institutions of higher education.

Academic Eligibility

To be eligible for admission, students must have graduated from an accredited high school or passed the HiSET or GED. Students interested in becoming University of Montana (Mountain Campus) students must meet the admission requirements of the University of Montana.

How to Apply

Applications are available from Enrollment Services-Admissions or the Missoula College by request or are available on the Missoula College website.

An application for admission is complete when the Missoula College receives the credentials described below.

1. Application form. Applications must be completed and signed.
2. Application fee. The fee is $30. This non-refundable application fee is payable once at the undergraduate level provided payment is followed by enrollment. Record of payment will remain on file for one year for students who do not enroll. The University of Montana-Missoula waives the application fee for students who have attended an affiliate campus: Montana Tech and the Missoula College, UM Helena College of Technology, and University of Montana-Western.

3. Proof of high school graduation/HiSET/GED. An official high school transcript with graduation date or GED score report must be sent to the Missoula College.
4. All students are required to submit a completed Medical Requirement Form to the Curry Health Center two weeks prior to registration. It is important that the immunization record be complete and accurate and validated by a health official. Students born after December 31, 1956 must submit proof of immunization or titer against Rubella and measles (Rubeola). Students will not be allowed to register until the Curry Health Center has received proof of immunization.

Critical Information Required Prior to Advising and Completion of Registration:

All students are required to take either the ACT, SAT or Compass-E-Write test and submit scores (associated with writing) to the Admissions Office.Montana students may submit the Montana University System Writing Assessment Score (MUSWA) in lieu of these tests.

In addition to providing the required placement scores for writing courses, the academic departments of the Missoula College require course placement information for math courses. Students must provide ALEKS placement score information or transfer course approval. This information is critical to the advising process and the student registration process; neither of which will be completed without the information being supplied prior to the process.

When to Apply

Applications are considered on a first come, first-served basis. The Missoula College will notify applicants of their status once their application has been processed.

International Student Admission

The University of Montana-Missoula International Programs-International Admissions Office will issue the Immigration Form I-20 (necessary for obtaining an F 1 student visa) to international applicants who are academically eligible for the undergraduate degree status (see above) and who supply complete credentials as described below. In certain situations an international applicant may not need an I- 20; in these cases, International Programs-International Admissions should be contacted for individual advice regarding admission status, academic eligibility, and admission requirements. International students are encouraged to submit ACT or SAT scores if available, but ACT or SAT scores are not required for admission.

How to Apply

Receipt of the following credentials constitutes a complete international application for admission:

1. International application form. This form can be obtained by contacting International Programs-International Admissions. The form must be complete and signed. Applications are also available on the UM Admissions International web page .
2. $30.00 paper application fee. This non refundable fee is payable once at the undergraduate level when payment is followed by enrollment. In all other cases record of payment will remain on file for one year. Payment of this fee is expected prior to consideration of the application. The University of Montana-Missoula waives the application fee for students who have attended an affiliate campus: Montana Tech and the Division of Technology, Helena College of Technology, and Western Montana College.
3. Academic Credentials:
    1. Official or certified copies of non-U.S. academic credentials beginning with secondary school and continuing through the highest level of achievement. The transcripts must be in the original language accompanied by an English translation. The applicant may make the translation themselves. Photocopied, scanned, or emailed copies will not be accepted.
    2. U.S. transcripts. Complete official transcripts showing all U.S. high school and college/university attendance.
4. Statement of Financial Support. The applicant must submit a certified statement from a bank or sponsor verifying that adequate financial resources are available to pay for the student's estimated expenses for the first year (tuition, fees, room, board, miscellaneous expenses, student health insurance, expenses of dependents, etc.). This estimated amount is adjusted annually and is available by contacting International Programs-International Admissions.
5. English Language Proficiency.
   Montana University System campuses require international-student applicants to present evidence of proficient English use. Campuses may impose additional requirements on applicants from other countries in order to assure student success.

   The University of Montana considers applicants to be international students if they are neither U.S. citizens, immigrants (permanent residents) nor refugees. These applicants may include holders of F (student) visas, J (exchange visitor) visas, and M (vocational training) visas.

   All international students must be academically prepared and demonstrate sufficient proficiency in English to qualify for admission. In order to demonstrate sufficient proficiency, students must meet one of the following admissions standards at the undergraduate level:

Proficiency Examination	Full Admission	Conditional Admission
TOEFL iBT	70 and above	69 and below
TOEFL PBT	525 and above	524 and below
TOEFL CBT	193 and above	192 and below
IELTS	6.0 (no band below 5.5)	5.5 (no band below 5.0)
MELAB	74 and above	73 and below
SAT - Writing Score	440 and above	
ACT - English Writing	18 and above	
STEP EIKEN	Grade Pre-1	
UM English Language Institute	525 TOEFL ITP or recommendation from ELI	
ELS Language Center	Successful completion of Program Level 112	
Kaplan Aspect	Successful completion of Higher Intermediate Level 112	
Vancouver English Centre	Successful completion of Level 11	
All inquiries about evidence of English proficiency and English language proficiency test scores should be directed to Enrollment Services-Admissions.		

EXEMPTIONS

Exemptions to the English proficiency policy may be considered for any one of the following:

- applicants whose native language is English;
- applicants with two or more years of attendance at an institution of higher education where English is the primary language of instruction; or
- applicants who transfer an equivalent for WRIT 101.

Students who are citizens of the following countries need not submit proof of English language proficiency unless English is not the student's native language. These countries include: Australia, Canada, Ireland, New Zealand, the United Kingdom, and South Africa.

Students who have test scores below the minimum requirement may be eligible for conditional admission.

Any questions concerning the evidence of proficiency in English should be directed to International Programs-International Admissions. When the student arranges to take one of the proficiency tests, he or she should request that examination results be sent directly to INternational Programs-International Admissions, The University of Montana-Missoula, Missoula, Montana 59812. (Code N. 4489 00)

FULL ADMISSION

The University of Montana will consider for full admission only those undergraduate students

providing evidence of English language proficiency in the form of one of the scores listed above:

Full Admission with Academic Support: International-student applicants qualify for admission with academic support if they have (i) completed one of the English proficiency examinations (either TOEFL, IELTS, or MELAB) and (ii) earned scores within the ranges presented below:

	Full Admission	**Full Admission with Academic Support**	
Proficiency Exam	Superior Proficiency	**Advanced Proficiency**	**Intermediate Proficiency**

iBT TOEFL	92 or higher	81to 91	70 to 80
PBT TOEFL	575 or higher	550 to 574	525 to 549
CBT TOEFL.	234 or higher	213 to 233	192 to 212
IELTS	6.5 (no band <6.0)	6.5 (no band <5.5)	6.0 (no band < 5.0)
MELAB	83 or higher	78 to 82	74 to 77
All inquiries about evidence of English proficiency and English language proficiency test scores should be directed to Enrollment Services-Admissions.			

Any student scoring in the advanced or intermediate proficiency ranges are strongly recommended to enroll in academic support service courses.

• During their first semester of attendance, advanced-proficiency students may take 3 but no more than 6 credits coursework in English as an Academic Second Language (EASL).

• During their first two semesters in attendance, intermediate-proficiency students may take 6 but no more than 12 credits of coursework in EASL.

Academic Support coursework entails EASL courses, credited toward a degree. The University offers EASL 250 and 251 (intermediate) as well as 450 and 451 (advanced) in order to assist international students in becoming ready for and effective in mainstream college coursework.

See http://www.umt.edu/catalog/cat/cas/linguist.html.

CONDITIONAL ADMISSION

Students who do not meet the required English language proficiency for full admission but are otherwise academically qualified may seek eligibility for conditional admission. Students submit International applications and all required supporting documents to the Admissions Office, and upon a review of their academic eligibility, students may then be admitted conditionally. Enrollment Services issues the conditional-acceptance letter and an I-20 form and then forwards this information to the English Language Institute.

Summary: An iBT score of 70 is required for full admission; an iBT score between 70-93 places an academic-support recommendation on full admission. These international students are encouraged to complete one or more Academic Support courses which count for degree credit.

Justification: A score below 70 iBT indicates a pre-emergent proficiency for academic purposes, failing a full-admission standard; a score between 70-93 iBT indicates emerging proficiency for academic purposes, thus meeting a full-admission standard with a recommendation for academic support with a projected increase of 12 iBT points per semester; emerging proficiency is intermediate (70-81) and advanced (82-93). These students enroll in a program of study delivering academic support that respects timely passage toward a program of study leading to degree. This range reflects most universities' admissions standards and sets a ceiling with those of prestigious ones.

*It is **recommended**, (i) this policy be revisited for review and revision to respond to developments, (ii) an admission deadline for international-student applications be May 15, 2015 for Academic Year 2015-2016, and (iii) ASCRC coordinate its recommendations for this undergraduate international-student standard with Graduate Council, setting the graduate international-student standard.*

When to Apply

Applications and all required documents must be received by the following dates:

- Autumn Semester Deadline – May 15
- Spring Semester Deadline – October 15

Applications received after the deadline will be considered for admission for the next term.

Undergraduate Nondegree Status

An applicant who wishes to pursue studies for his or her personal growth and who does not wish to work toward a formal degree at the University of Montana-Missoula may apply as an undergraduate nondegree student. This option is not available to freshmen unless they are applying to the Missoula College. Each applicant should understand that acceptance to this category does not constitute acceptance into a degree granting program. Applicants admitted as undergraduate nondegree students are not eligible for financial aid.

Academic Eligibility

Each applicant must certify on the application form that he or she has graduated from a high school that is fully accredited by its state department of education, or has passed the HiSET or General Educational Development (GED) test. To be considered for nondegree status, a student must have attempted 12 or more college level

credits. This category is not open to students currently on academic suspension from The University of Montana.

If a person is admitted as an undergraduate non-degree student and later wishes to change to a degree program, he or she will be required to file an application for readmission, furnish the required supporting credentials and meet the regular admissions standards for the intended program. Readmission applications are available from Enrollment Services-Admissions, the Missoula College, or the Registrar's Office.

How to Apply

Applications for admission are available from Enrollment Services-Admissions by request or are available on the UM Admissions website.

Receipt of the following credentials in Enrollment Services-Admissions or the Missoula College constitutes a complete application for admission to the undergraduate nondegree status:

1. Application form. Applications must complete and signed.
2. Application fee. The fee is $30.00. This non-refundable fee is payable once at the undergraduate level provided payment is followed by enrollment. Record of payment will remain on file for one year for students who do not enroll. An application cannot be considered prior to payment of this fee. The University of Montana-Missoula waives the application fee for students who have attended an affiliate campus: Montana Tech and the Division of Technology, Helena College of Technology, and University of Montana-Western.
3. Immunization Form. All applicants are required to submit a completed Medical Requirement Form to the Curry Health Center two weeks prior to registration. The form must be complete, accurate and validated by a health official.

When to Apply

Applications and all required documents submitted by the following dates will receive priority consideration:

- March 1 - Autumn semester
- November 15 - Spring semester

Applications received after the priority dates are considered on a space-available basis.

Graduate Nondegree Status

Graduate nondegree status allows students who have not been formally admitted to a graduate degree program to receive graduate credit for courses.

Up to nine semester nondegree graduate credits (or the credits earned during a single semester, whichever is greater) may be applied toward a subsequent graduate degree program, with the approval of the student's program chair and the graduate dean. Acceptance as a graduate nondegree student does not imply future admission to a degree program.

Graduate nondegree students may take U/G courses for either graduate or undergraduate credit, as defined by the university catalog. Graduate credits will be assigned automatically unless a request for undergraduate credit is submitted to the Graduate School by the fifth week of the semester. Undergraduate credits taken as a graduate nondegree student cannot be applied to a subsequent graduate degree.

Applicants admitted as graduate nondegree students are NOT ELIGIBLE for federal financial aid. Graduate nondegree students are assessed the graduate level tuition and fees at the master's level rate for all credits taken.

Applicants must have earned a baccalaureate degree (or higher degree) from a regionally accredited college or university prior to enrollment in the graduate nondegree status.

Applicants seeking graduate nondegree status must apply online at the UM Graduate School website and pay a $60 non-refundable application fee. Deadline for submitting a graduate nondegree application is prior to the fifteenth day of classes each semester.

Graduate Nondegree Readmission

Students who previously attended The University of Montana in a graduate nondegree status and have not been enrolled for 24 months or more may use the graduate nondegree readmission form to reapply for the same status.

Graduate nondegree readmission forms can be downloaded from the Forms section of the Graduate School homepage: www.umt.edu/gradFromer graduate nondegree students applying for readmission pay a $20 non-refundable application fee.

Graduate Degree

Graduate degree admission is for candidates seeking to complete a Master's,Specialist, or Doctoral program at UM. Program information and deadlines are listed at: www.umt.edu/grad/Programs. Each academic department conducts the initial evaluation of completed application packets and submits the packets, with recommendations for admission or denial, to the Graduate School for final decisions.

Applicants seeking graduate status must apply online atthe UM Graduate School website and pay a $60 non-refundable fee.

Distance Education

The University of Montana provides the opportunity to apply as a Distance Education only student. Students who are interested in applying for this status must meet the University's general admission requirements for freshman and transfer students. This admission status is designed for students who are registering for online courses only and do not plan to take any courses on campus. When applying for this status, students are not required to provide proof of immunization or complete a Medical Requirement Form. Since Distance Education only students have some of the mandatory fees waived, they are not eligible for health insurance, services provided by the Curry Health Center, athletic event discounts or the Campus Recreation facilities.

Currently enrolled students or former University of Montana students must change their status by completing a Distance Learning Change of Status Form.

HiSET or GED (General Education Development)

A person who is not a graduate from an accredited high school may be eligible for admission by earning passing scores on the HiSET or GED test. HiSET or GED students who have been out of high school for less than three years or are under the age of 21 must also submit ACT or SAT scores. For additional information and test center locations in Montana, contact the Office of Public Instruction, Helena, MT 59601.

Former University of Montana-Missoula Students - Readmission

Readmission to the University After 24 Months of Non-attendance

If former students are planning to attend a summer session or an academic year semester but were not in attendance during the immediately preceding 24 months, then they must apply for readmission before being eligible to register for courses. Students should reapply by July 1 for autumn semester attendance, and by November 1 for spring semester attendance. See the Admissions section of this catalog.

Missoula College (formerly College of Technology) students must reapply for readmission at the Missoula College Registrar's Office (909 South Avenue) or online at the UM Admissions Missoula College web page.

Mountain Campus students (seeking baccalaureate or higher degrees) must apply for readmission via the Enrollment Services Office in the Emma Lommasson Center or online at the UM Admissions web page.

Some specific programs at the Missoula College require students who do not enroll for a semester or more (excluding summer) to apply for readmission into that program.

All students who are both in good standing and (i) currently enrolled or (ii) readmitted to the University may pre-register for the subsequent semester, unless a registration hold exists on the student's record.

Students previously enrolled at The University of Montana-Missoula who have interrupted their enrollment for more than 24 months or more must submit an application for readmission. Applications for readmission may be obtained from the Registrar's Office, the Griz Central Registration Counter, Enrollment Services-Admissions, all located in the Emma B. Lommasson Center (EL), or the Missoula College Registrar's Office.

Former undergraduate degree students who do not plan to change their status and who have attended another college/university since attending The University of Montana-Missoula, even if their absence from UM has been less than two years in duration, must submit college transcripts.

Former students who are applying for readmission must comply with Immunization Requirements as listed in this catalog.

Former undergraduate students are not required to pay the undergraduate application fee unless they are changing from an undergraduate status to a graduate status or vice versa. The application fee is paid only once at the undergraduate level. For additional information, contact the Registrar's Office at 406-243-2939 or visit us on the Registrar's readmissions web page.

Advising

Academic advising is critical to student success at University of Montana. All undergraduate students are required to meet with their advisor at least once each semester to review educational progress, discuss future plans and secure schedule approval prior to registration. Additional meetings are recommended for information and guidance on dropping and/or adding courses, changing/declaring majors, exploring available resources and ensuring that graduation requirements are met.

Faculty and professional advisors, as well as peer advising assistants facilitate positive academic advising experiences by:

- helping students to develop mentoring relationships with faculty and professional staff

- encouraging students to fulfill their obligation to plan in advance for advising sessions
- educating students to understand and accept their responsibilities in the advising process and for advising decisions, and
- promoting frank and productive dialogue about the student's academic goals.

Students improve their academic planning and success by fully using the advising services and by learning about the academic requirements of their major fields, and the University policies for registration and graduation. The UM catalog is the official source of information on these matters. Although advisors are available to assist students, it is important for students to realize that the ultimate responsibility for meeting all graduation requirements is their own.

Mountain Campus Students

When students indicate a major on their application form, it becomes their initial declared major.

Advisor information and assignment is done through the student's major department. If the student is undeclared, pre-Communication Studies, pre-Psychology or Freshman Business, he/she is assigned to a professional advisor at the Undergraduate Advising Center (www.umt.edu/uac).

To change a major, a student must submit an official Change of Major form to the Registration Desk at Griz Central. Once the new major is formally declared, the student should seek advising from the department.

Students with academic advising questions or concerns may contact the Undergraduate Advising Center, Lommasson Suite 269, The University of Montana, Missoula, MT 59812, www.umt.edu/uac, or by phone at (406)243-2835.

Missoula CollegeStudents

Students are assigned an academic advisor in their major (program) upon acceptance to the Missoula College.

Academic programs are identified by the major the student declared on his/her Admissions application, or by an official change of major form filed by the student.

For questions regarding assigned advisors, or to change advisors, students can contact Student Services at 243-7882 or in the Missoula College Administration building.

For other questions or concerns about advising, students may contact their Department offices, Student Services (243-7882) or the Retention Coordinator (243-7878).

Academic Support Services

Many programs at The University of Montana-Missoula offer services to help students who are experiencing academic difficulty. Faculty academic advisors assist in academic planning and make appropriate referrals to other services as necessary. Students with declared majors are assigned a faculty advisor by the relevant Department Chair. Students who are Undeclared, pre-Nursing, or a pre-major in Psychology, Communication Studies, or Business are assigned a professional advisor in the Undergraduate Advising Center located in the Lommasson Center.

Coursework is available to help students in specific areas. Developmental math and writing courses are delivered by the College of Technology, and include M 65 prealgebra, M 90 Introductory Algebra, M 95 Intermediate Algebra, and WRIT 95 Developmental Writing. Curriculum and Instruction 160 and AASC 101 focus on study skills, and Freshman Seminar UNC 101 and AASC 100 (Introduction to University Experience) provide an overview of university systems and processes. The Financial Aid Office, the Counseling Center, the Curry Health Center, the Career Services, and the Clinical Psychology Center provide one-to-one counseling to help with financial issues, personal concerns, and career and major choices.

Several tutoring programs are available to all students through the Office for Student Success. STUDY JAM provides early evening group study tables in the UC Commons for selected courses (e.g., Chemistry, Biology, Physics, Spanish, Economics, and Statistics). The Writing Center supports students in becoming more effective writers and provides tutoring at several locations across campus; 406-243-2266). The Math Learning Centers provide tutoring at all levels of math coursework in two drop-in math tutoring centers. Math PiLOT oversees the ALEKS online placement testing for math and advises students who may be struggling in a math course. Missoula College students may receive tutoring in math, writing and a variety of other subjects through the Academic Support Center. The Counseling Center offers workshops on a variety of topics designed to enhance student academic performance.

TRiO Student Support Services

For students who qualify, TRiO Student Support Services is a federally funded program offering academic support services, including one-on-one academic advising, career search and counseling (using a national career database), mentoring for Native American students, a two-credit study skills class, and tutoring at no cost. To qualify, a student must meet one of the following criteria: first-generation (neither parent has completed a four-year college degree), financial need based on family income (usually met if receiving a Pell grant), or a documented disability. For more information, visit TRiO at Lommasson Center 154, call 406-243-5032, or the TRiO website.

The Academic Support Center (ASC) on the Missoula College campus offers a variety of services to support and enhance students' academic success. Students can receive tutoring in math, writing and numerous other areas. Skills assessments, accommodated test services and make-up testing are also offered at the ASC. Working with the Retention Coordinator students can develop study skills, participate in academic coaching and other student support activities, as well as complete the reinstatement process activities if necessary. For information related to these services, contact the ASC at 243-7826 or the Retention Coordinator at 243-7878.

Degree/Certificate Requirements for Graduation

»Catalog Governing Graduation

Students may graduate fulfilling University and departmental major requirements in any single University of Montana-Missoula catalog under which the student has been enrolled during the six years prior to graduation. (For example, the 2013-2014 catalog can be used through summer 2020). The student MUST meet major requirements under the same catalog under which the student is meeting University requirements (general education requirements); minor requirements may be satisfied under a different catalog within the six year period. University or departmental requirements may change to comply with accreditation requirements, professional certification and licensing requirements, etc.

Students transferring to the University of Montana-Missoula may choose to graduate fulfilling requirements under the UM catalog in effect when they were enrolled at their original institution, provided the chosen catalog is not more than six years old at the time of graduation. Eligible students who choose an earlier catalog must notify the Admissions Office at the time of admission so their transfer work can be evaluated accordingly

»Applying for Certificate and Degree Candidacy

To become a candidate for a degree, the student must file formal application at the Registration Counter in Griz Central the beginning of the semester preceding the semester in which he or she expects to graduate. Deadline dates are specified in the Class Schedule. In the Missoula College, candidates for certificates and degrees must file a formal application with the Registrar's Office in the College at the beginning of the semester in which they expect to graduate

»Credits Required for a Certificate of Completion

See individual College or School catalog sections for certificate course and credit requirements. Course and credit requirements vary by program.

»Credits Required for a Degree

»Associate of Applied Science

To receive an Associate of Applied Science (A.A.S.) Degree from the Missoula College, a student must fulfill the following criteria:

1. Complete a minimum of 60 credits, of which 51% must be from UM. Possess a minimum grade average of 2.00 in all work attempted at the University of Montana-Missoula and a minimum grade of C- in all classes that count toward program requirements.
2. Courses numbered below 100 do not count toward the 60 credit requirement, but do fulfill financial aid credit load requirements.
   Complete the specialized program degree requirements including the following related subject ara of core collegiate-level courses:
    1. **Communication:** the ability to formulate and adapt messages to a variety of audiences through written, verbal, and nonverbal processes.
    2. **Computation:** the ability to complete basic algebraic manipulations and achieve mathematical literacy.
    3. **Human Relations:** the ability to analyze social problems and structure, ethical norms of professions and society, human behavior, or human values systems.
    4. **Computer Literacy:** the ability to utilize a modern computing system including web applications and an office productivity suite to research, develop and produce information in a 21st century society.
    5. **Professional Competency:** To ensure all graduates the opportunity to apply specialized skills in a professional environment, it is recommended student complete a program-related internship, field experience, clinical experience, capstone project, or professional certification activity.

»Associate of Arts

A total of 60 credits is required for graduation with an Associate of Arts (A.A.) degree. The minimum grade average for graduation is 2.00 in courses taken on the traditional letter grade (A F) basis. To receive an Associate of Arts degree all students must complete successfully all the general education requirements for a baccalaureate degree.

»Bachelor Degrees

A total of 120 credits is required for graduation with a bachelor degree; except a greater number is required in teacher education programs, pharmacy, physical therapy and the Bachelor of Applied Science. See the College of Health Professions and Biomedical Sciences section of this catalog.

Students may elect to earn two or more bachelor degrees. Those deciding to earn two or more degrees must complete all the requirements of the majors for each degree. In addition, students must earn for each degree a minimum of 30 credits beyond the number required for the first degree. The degrees may be earned concurrently or at different times.

»Upper-Division Requirement

All students must complete a minimum of 39 credits in courses numbered 300 and above to meet graduation requirements for the first baccalaureate degree. Upper division credits transferred from other four year institutions will count toward the 39 credit requirement.

»Residency Requirements for Degrees/Certificates

University of Montana credit is the credit earned in any course which has been approved to be listed in the University of Montana-Missoula catalog and which has been approved for offering by the department chair and dean of the school or college in which the course is taught. University of Montana-Missoula credit may be offered at any location.

Requirements for Missoula College **Certificate of Completion and Associate of Applied Science Degree**

A minimum of 51% of the required number of credits must be earned from the University of Montana-Missoula

Requirements for the Associate of Arts Degree

A minimum of 30 credits of the required number must be earned from the University of Montana-Missoula.

Requirements for the First Bachelor Degree

A first bachelor degree is defined as any bachelor degree earned by a student who has not previously earned a bachelor degree from the University of Montana-Missoula. Thus, the requirements below also apply to any student who previously earned a bachelor degree at another institution and now is seeking a bachelor degree from the University of Montana-Missoula.

a) A minimum of 30 credits of the required number must be earned from the University of Montana-Missoula. b) A minimum of 30 credits of the required number must be earned in study on the University of Montana-Missoula campus.

c) Of the last 45 credits required for the degree, at least 30 of these must be earned from the University of Montana- Missoula. Students attending elsewhere on a University approved exchange may be exempt from this requirement with the prior written approval of their major department chair or dean.

Requirements for the Second Bachelor Degree

In regard to residency requirements, a second bachelor degree is defined as any bachelor degree earned by a student who previously had earned a bachelor degree from the University of Montana-Missoula.

A minimum of 20 credits of the required 30 credits must be earned in study on the University of Montana-Missoula campus.

»Credit Maximums

The amount of credit which may be counted toward the minimum credit requirements for the bachelor (B.A./B.S.), associate of science (A.S.), and associate of arts (A.A.) degrees is limited in certain areas follows:

Category	For Bachelor Degree	For AA or AS Degree
Technical courses (course number suffix of 'T') - up to 15 technical course credits can be applied toward the minimum credit requirement for all students, except up to 20 technical course credits can be applied to the minimum course credits for students with an earned A.A.S. degree.	15-20	15-20

Career skills	0	0
Study skills courses (e.g. AASC 101, C&I 160)	2	2
Physical education activity/skills courses (e.g. DANC 325, ACT 101-287, ACTV, MSL 106 and 203)	4	4
Military Science Leadership Courses (contracted students may present 24 credits)	12	12
Music performance (MUSI 102A, 123, 135A, 136A, 235, 236, 218)	6	6
Ensemble music (MUSI 112A, 114A, 110A, 131A and 122A)	8	8
Credit/No Credit credits	18	18
Internship credits in 198/298/398/498	6	6

Credits attempted in these areas which are beyond the maximum applicable will remain on the students' permanent record but cannot be used toward graduation.

»Grade Average Requirement

A minimum grade average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation.

»Graduation with Honors or High Honors

Students will be awarded their certificates, associate of applied science, and bachelor degrees with honors if they receive the recommendation of their major department or school and the faculty of the University of Montana-Missoula. At the time of graduation they must have a 3.40 or higher grade average in the following four areas:

1. All work attempted at the University of Montana- Missoula.
2. The combination of all work attempted at the University of Montana-Missoula and all other work, including failing grades, transferred to this University.
3. All work attempted in the major field at the University of Montana-Missoula.
4. The combination of all work attempted in the major field at the University of Montana-Missoula and all other work in the major field, including failing grades, transferred to this University.

Students will be awarded their certificates, associate of applied science, and bachelor degrees with high honors if they have the recommendations mentioned above and, at the time of graduation, have a 3.70 or higher grade average in the four areas listed.

In the School of Law, the grade average for honors is computed on law credits only.

General Education

Preamble

The University of Montana-Missoula's General Education Program provides a broad academic base that supports both undergraduate learning at the University of Montana-Missoula and continued learning following graduation. While the General Education Program offers students considerable flexibility in selecting courses, it has a set of common educational objectives for all students.

In accordance with the mission of the University of Montana- Missoula, these objectives are to develop competent and humane individuals who are informed, ethical, literate, and engaged citizens of local and global communities. Students should become acquainted with issues facing contemporary society, participate in the creative arts, develop an understanding of science and technology, cultivate an appreciation of the humanities, and examine the history of different American and global cultures. Upon completion of the general education requirements students should be able to articulate ideas orally and in writing, understand and critically evaluate tangible and abstract concepts, and employ mathematical and other related skills appropriate to a technologically focused society.

In summary, the General Education Program is designed to provide a high quality intellectual foundation that accommodates all UM students whether in liberal arts or professional programs. This foundation will be reinforced, expanded, and refined as students continue through their course of study. Students are encouraged to prepare for productive roles in their chosen fields by cultivating civic awareness vital to the greater community and a democratic society. The acquired skills will allow students to examine critically the human experience and achieve genuine confidence in their knowledge and abilities. For the General Education Program to accomplish its goals, students must assume primary responsibility for their growth and education.

General Education Requirements

Overview

General Education Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the following General Education Requirements. Students who have completed an approved lower-division general education program at an approved Montana institution of higher education should refer to the catalog section on General Education for Transfer Students.

All General Education courses must be at least 3 credits, must be introductory and foundational, and have no more than one pre-requisite. The General Education Committee may allow exceptions for upper-division courses, courses fewer than three credits, and for courses with more than one pre-requisite, if the proposing unit can justify such an exception.

Some courses may satisfy both the "Writing Course" requirement (1.2) and one of the Groups IV through XI.

Some courses may satisfy both Group II and Group III Symbolic Systems.

Some courses may satisfy both Group IX and one of the Groups IV through VIII.

Some courses may satisfy both Group X and one of the Groups IV through VIII. No course may satisfy both Group IX and Group X.

Many of the general education courses listed below require prerequisites be met before registration. The prerequisites are listed in the individual course descriptions.

NOTE! ***All courses taken to satisfy General Education Requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better*.**

Students are cautioned that approved courses may change from year to year. To be used for General Education credit, a course must be listed as approved in the Class Schedule for the semester a student registers for it.

Group Letter and Description	**Credits**
Group I: English Writing Skills 1. Composition course WRIT 101 or 201(ENEX 101, WTS 101, ENEX 200) or an equivalent 2. One designated Writing Course 3. Upper-Division Writing Requirement (as specified by major department)	3 1-3 3
Group II: Mathematics	3
Group III: Modern and Classical Languages or Symbolic Systems Successful completion of a second semester language is the default option (test out provisions apply). Students may substitute a symbolic system sequence required by their major and approved by the General Education Committee. The list of programs granted exceptions and their alternative options are found in the listing of those majors.	0-9
Group IV: Expressive Arts	3
Group V: Literary and Artistic Studies	3
Group VI: Historical and Cultural Studies	3

Group VII: Social Sciences	3
Group VIII: Ethics and Human Values	3
Group IX: American and European Perspectives	3
Group X: Indigenous and Global Perspectives	3
Group XI: Natural Sciences One Natural Science course must include a laboratory experience.	6
Total	*28-49

*Some courses satisfy more than one group (see list at the end of this section).

Group I: Writing

Requirements:

Students must satisfy the following three requirements in order:

1. Introductory College Writing;
2. Intermediate College Writing;
3. Advanced College Writing

Introductory College Writing

Students must complete WRIT 101, WRIT 201, or an equivalent composition course with a grade of C-minus or better. Students with Language and Composition AP scores of 4 or better are exempted from this requirement.

Entering students who are placed into WRIT 095, based on their standardized test scores, must successfully complete WRIT 095 prior to enrolling in WRIT 101 or WRIT 201. Such students may challenge their placement with specific scores from the University Writing Assessment. Entering student who place into WRIT 201 may choose to take WRIT 101 instead.

Intermediate College Writing

Students must pass one Intermediate College Writing course with a grade of C-minus or better. The courses satisfying this requirement are listed in the catalog. Students are exempted from this requirement by transferring more than 27 semester credits at the time of their initial registration at the University. Transfer students transferring fewer than 27 credits need to petition the Writing Committee to have writing courses from other institutions accepted for this requirement. View details regarding this process on the transfer student admission page of the catalog.

Advanced College Writing

All students must complete one Advanced College Writing course with a grade of C-minus or better. The courses satisfying this requirement differ according to the student's major. Students should consult the University catalog and their major advisor for the specific courses that fulfill this requirement.

Students may not use the same writing course to meet both the Intermediate College Writing and the Advanced College Writing requirement.

Intermediate Writing Courses

The following courses are designated as Intermediate Writing Courses for 2016-2017. Students are cautioned that courses may change from year to year. To be used for General Education, a course must be listed as Intermediate Writing in the catalog and in the Class Schedule for the semester a student registers for it.

Course #	**Title**

HSTR 358	Russia since 1881
HSTR 401	The Great Historians
IRSH 380	Topics in Irish Studies
JRNL 270	Reporting
LIT 110L	Introduction to Literature
LIT 120L	Poetry
LIT 202L	The Environmental Imagination
LIT 210L	American Literature I
LIT 211L	American Literature II
LIT 220L	British Literature: Medieval Renaissance
LIT 221L	British Literature: Enlightenment to Romantics
LIT 222L	British Literature: Victorian to Contemporary
LSCI 391	Who Owns Culture (one time only Autumn 2016)
LSH 151L	Introduction to the Humanities Bible, Greeks, Romans
LSH 152L	
MART 300	Visions of Film
NASX 280	Native American Studies Research Theories Methods
NASX 235X	Oral and Written Traditions of Native America
NRSM 200	Natural Resources Professional Writing
PHL 210E	Moral Philosophy

THTR 330H	Theatre History I
WRIT 121	Introduction to Technical Writing
WRIT 201	Advanced Composition
WRIT 221	Intermediate Technical Writing
WRIT 325	Writing in the Sciences

Advanced Writing Courses

The following courses are designated as Advanced Writing Courses for 2015-2016. Students should consult with their advisor regarding the requirement specified by their major.

Course #	**Title**
AHAT 342	Rehab of Athletic Injuries
ANTY 314	Principles of Forensic Anthropology
ANTY 400	History of Anthropology
ANTY 402	Quantitative Ethnographic Methods
ANTY 408	Advanced Anthropological Statistics
ANTY 430	Social Anthropology
ANTY 450	Archaeological Theory
ANTY 451	Cultural Resource Management
ANTY 455	Artifact Analysis
ARTH 350	Contemporary Art and Art Criticism
ARTH 434	Latin American Art
BGEN 499	Strategic Management
BIOH 462	Principles of Medical Physiology
BMGT 486	Strategic Venture Management
CHMY 305E	Ethics and Writing in Science
COMX 347	Rhetoric, Nature, Environmentalism
COMX 413	Communication and Conflict-Writing
COMX 414	Communication in Personal Relationships
COMX 421	Communication in Nonprofit Organization

COMX 422	Communication and Technology
COMX 424	Risk, Crisis and Communication
COMX 445	Rhetorical Criticism and Theory
COMX 447	The Rhetorical Construction of Woman
COMX 449	The Rhetoric of U.S. Women's Activism, 1960 - present
CSCI 315E	Computer Ethics and Society
CSCI 499	Senior Thesis/Project
CSD 430	Senior Capstone I
DANC 494	Seminar/Workshop (Junior/Senior Dance Seminar)
ECNS 488	Research Method & Thesis Design
ECNS 499	Senior Thesis/Capstone
EDU 397	Methods: PK-8 Language Arts
EDEC 454	PK-3 Language Arts and Reading Methods
ENST 382	Environmental Law
ENST 335L	The Environmental Vision
ENST 367	Environmental Politics and Policy
ENST 487	Globalization, Justice and the Environment
GEO 320	Global Water Cycle
GEO 499	Senior Thesis/Capstone
GPHY 335	Water Policy
GPHY 433	Cultural Ecology
GPHY 499	Senior Thesis/Capstone
GRMN 351H	German Culture to 1900
GRMN 352H	German Culture from 1900 to the Present
HEE 301	Methods of Secondary HE
HSTA 415/AAS 415	The Black Radical Tradition
HSTA 417/AAS 417	Prayer and Civil Rights
HSTA 418	Women and Slavery

HSTA 419	Southern Women in Black and White
HSTA 422	Research: U.S. After WWII
HSTA 461	Research in Montana History
HSTA 471	Writing Women's Lives
HSTR 400	Historical Research Seminar
HSTR 418	Research Seminar: Britain in the Long Eighteenth Century
HSTR 437	U.S. Latin American Relations
JPNS 311	Classical Japanese Literature in English Translation
JPNS 312	Japanese Literature from Medieval to Modern Times
JRNL 340	Intermediate Audio
JRNL 352	Int. Video Reporting and Producing
JRNL 362	Feature Writing
JRNL 370	Public Affairs Reporting
KIN 447	Analytical and Communication Techniques
LING 473	Language and Culture
LING 484	North American Indigenous Languages and Linguistics
LIT 300	Literary Criticism
LIT 304	U.S. Writers of Color
LIT 314	The American Novel
LIT 316	Topics in Postcolonial Studies
LIT 327	Shakespeare
LIT 342	Montana Writers
LIT 343	African American Literature
LIT 353L	Milton
LIT 376	Literature and Other Disciplines
LIT 494	Seminar: Literature Capstone
LSH 484	Novel Ancient and Modern
M 499	Senior Thesis

M 429	History of Mathematics
MART 450	Topics in Film and Media
MCLG 315	Major Hispanic Authors
MCLG 494/RUSS 494	Seminar in Russian Studies
MUSI 302H	Music History II
MUSI 415	Music of the 20th Century to the Present
MUSI 416	Topics in Music History
MUSI 417	Cultural Studies in Music
NASX 494	Reading Seminar in Native American Studies
PHAR 550	Drug Literature Evaluation
PHL 499	Senior Seminar
PHSX 330	Methods of Communicating Physics
PSCI 400	Advanced Writing in Political Sciences
PSYX 320	Research Methods III
PSYX 400	History and Systems of Psychology
PTRM 451	Tourism and Sustainability
PTRM 482	Wilderness and Protected Area Management
RUSS 494	Seminar in Russian Studies
SOCI 438	Seminar in Crime and Deviance
SOCI 441	Capstone: Inequality and Social Justice
SOCI 460	Capstone in Rural & Environmental Change
SOCI 488	Writing for Sociology
SW 300	Human Behavior in the Social Environment
SW 310	Social Welfare Policies and Services
THTR 331Y	Theatre History II
WGSS 363	Feminist Theory and Methods
WILD 408	Advanced Fisheries Science
WILD 470	Conservation of Wildlife Populations

Group II Mathematics

Mathematical literacy implies an appreciation of the beauty of mathematics, an ability to apply mathematical reasoning, and an understanding of how mathematics and statistics are used in many arenas. Mathematical literacy may be attained through the study of the properties of numbers, mathematical modeling, geometry, data analysis and probability, with the overarching goal of learning mathematical reasoning and problem solving.

Mathematical literacy cannot be achieved in a single course. However, for the purposes of general education, the mathematical literacy requirement can be met by any one of the following:

1. achieving a grade of C-or better in one of the following courses which address different aspects of mathematical literacy: M 104, 105, 115, 118, 121, 122, 132, 135, 151, 162 and STAT 216; or a mathematics course of 3 or more credits for which one of these is a prerequisite.
2. achieving a score of 50 or better on the CLEP College Algebra Test, the CLEP College Precalculus Test, or the CLEP College Mathematics Test.
3. passing the Mathematical Literacy Examination administered by the Department of Mathematical Sciences. To qualify to take the Mathematical Literacy Examination, a student must have achieved a score of 630 or better on the SAT Math exam or a score of 28 or better on the ACT Math exam. A student may take the Mathematical Literacy Examination only once. Further details are available from the Department of Mathematical Sciences.

Students must complete the mathematical literacy requirement by the time they have earned 30 credits; if not, they must register for a mathematical sciences course every semester until they have completed the requirement. Because many other courses at the university assume some mathematical literacy, it is strongly recommended that all students complete their mathematical literacy requirement as soon as possible.

Upon completion of the mathematical literacy requirement, a student will be able to effectively apply mathematical or statistical reasoning to a variety of applied or theoretical problems.

Group III: Modern and Classical Language

The language requirement can be met in any of the following ways:

1. by achieving a C- or better in a second-semester language course offered at the University of Montana (see list of courses below);*
2. by achieving a grade of C- or above in a language course numbered 201 or above at the University of Montana (see list of courses below);
3. by presenting a transcript record of completion with a grade of C- or better of a second-semester (or more advanced) language course at an accredited college or university;
4. by achieving an appropriate score on a placement exam administered by the offering department;
5. by receiving verification of an appropriate level of proficiency in any other natural language in collaboration with the department of Modern and Classical Languages and Literatures. Note that the student's native language, if it is not English, can be used to fulfill this requirement.

* Three 3-credit courses of Irish are required to fulfill the general education requirement.

Upon completion of the Modern and Classical Languages requirement, the student will have a basic functional knowledge of a second natural language sufficient to:

read and write if the language is classical, such as Latin or classical Greek;

speak and aurally comprehend, if the language does not have a written tradition, such as Salish;

perform all four skills (speaking, aural comprehension, reading, and writing) if the language is modern and has a written tradition, such as Japanese or French;

demonstrate both receptive (visual comprehension) and expressive (manual production) proficiency if the language is American Sign Language.

The courses listed below require prerequisites be met before registration. The prerequisites for the following courses are listed in the individual course descriptions.

Course Subject Code	**Course Number**
ARAB	102 or 201 or 202 or 301 or 302
CHIN	102 or 201 or 202 or 301 or 302
CSD	132
FRCH	102 or 201 or 202 or 301

GRMN	102 or 201 or 202 or 301 or 302
GRK	102 or 201 or 202
ITLN	102
JPNS	102 or 201 or 202 or 301 or 302
LATN	102 or 201 or 202
LSH or MCLG	191 - Elementary Hindi 2 sections only
NASX	142
RUSS	102 or 201 or 202 or 301 or 302
SPNS	102 or 201 or 202 or 301
*IRSH	101 and 102 and 103

- * Three 3 credit courses of Irish are required to fulfill the general education requirement
- Students may satisfy the requirement by demonstrating equivalent skill in any of these or other languages in testing administered by the Department of Modern and Classical Languages and Literatures.

- International students from non English speaking countries may satisfy this requirement by presenting a TOEFL score of 580 or greater, or by successful completion of ESL/LING 250 or 450, or by presenting a department approved application for degree.

Group III: Exceptions to the Modern and Classical Language requirement - Symbolic Systems

The majors listed below have been granted exceptions to the Modern and Classical Language requirement. Students graduating in any one of these majors may substitute the symbolic system course or courses designated by the major.

Each of these courses presents the foundations of a symbolic system, defined as a relationship that maps real-world objects, principles and doctrines with abstractions of the real-world.

Symbolic systems facilitate communication in specialized ways but do not comprise a spoken or written language by which members of a culture typically communicate with each other.

Upon completion of a symbolic systems course or courses, students will be able to:

1. demonstrate an understanding of the symbols and the transformations of the system;
2. relay and interpret information in terms of the given symbolic system;
3. apply creative thinking using the symbolic system in order to solve problems and communicate ideas;

Major	Symbolic Systems Course(S)
Accounting & Finance	STAT 216
Biology	M 162 or M 171 or M 181
Chemistry	M 162 or M 171 or M 181 (or any course for which one of them is a prerequisite)
Computer Science	CSCI 131 and CSCI 136
Curriculum & Instruction	M 133 and 234
Ecological Restoration	FORS 201 or STAT 216

Forestry	FORS 201 or STAT 216
Geoscience	M 162 or M 171 or M 181
Health and Human Performance: Exercise Science, Pre-Professional Exercise Science, Pre-Athletic Training	M 121 or M 151 and STAT 216, PSYX 222. SOCI 202 or EDU 421
Health and Human Performance: Health Enhacement, Community Health and Prevention Sciences	M 115 and STAT 216, PSYX 222. SOCI 202 or EDU 421
Management Information Systems	STAT 216, SOCI 202, FORS 201, or PSYX 222
Management & Marketing	STAT 216, SOCI 202, FORS 201, or PSYX 222
Mathematics or combined Mathematics /Computer Science or Computer Science/Mathematics	M 171 or M 181 (or any course for which one of them is a prerequisite)
Media Arts - Bachelor of Fine Arts Only (BA students take Foreign Language)	MART 340 and 341
Medical Laboratory Science	M 162 or M 171 or M 181
Microbiology	M 162 or M 171 or M 181
Music and Music Education	MUSI 105, 106, 140 & 141
Neuroscience	M 162 and STAT 216 or PSYX 222
Pharmacy	M 162 and STAT 216 or PSYX 222 or SOCI 202
Parks, Tourism and Recreation Management	FORS 201, STAT 216, WILD 240 or SOCI 202
Resource Conservation	FORS 201, STAT 216, WILD 240 or SOCI 202
Theatre - Bachelor of Fine Arts (Acting Emphasis)	THTR 210, 211 & 310
Theatre - Bachelor of Fine Arts (Design/Technology Emphasis)	THTR 255 & THTR 345 or 355
Wildlife Biology	M 162 or higher and WILD 240

Students are advised that most courses meeting the symbolic systems exception have prerequisites, as indicated in the chart below:

Course	Title	Pre-requisite(s)
CSCI 135	Fundamentals of Computer Science I	Computer programming experience in a language such as BASIC, Pascal, C, etc.; coreq., M 095 D or consent of instr. CSCI 104 highly recommended as prereq. or coreq
CSCI 136	Fundamentals of Computer Science II	CSCI 135 ; coreq., M 151 or consent of instr
EDU 421	Statistical Procedures in Education	M 115 or equiv. or consent of instr
FORS 201	Forest Biometrics	M 115 or M 151 or equivalent

M 133	Geometry and Measurement for Elementary Teachers	M 132
M 162	Applied Calculus	Appropriate placement score or one of M 121, 122, or 151
M 171	Calculus I	M 122 or 151 or appropriate placement score
M 181	Honors Calculus I	Consent of Instructor
M 234	Higher Mathematics for Elementary School Teachers	M 132
MUSI 105	Music Theory I	Coreq., MUSI 140
MUSI 106	Music Theory II	MUSI 105 and Coreq., MUSI 141
MUSI 139	Language of Music II	MUSI 138
MUSI 140	Aural Perception I	Coreq., MUSI 105
MUSI 141	Aural Perception II	MUSI 140 and Coreq., MUSI 106
PSYX 222	Psychological Statistics	PSYX 100S, 120: M 115, 162, or 171
SOCI 202	Social Statistics	M 115 or consent of instructor
STAT 216	Statistics	M 115 (preferred), or one of M 121, 135, 151, 162 or 171, or ALEKS placement >= 4
STAT 451	Statistical Methods	One year of college mathematics including M 115 or equiv. course in probability or consent of instr.
THTR 211	Voice and Speech II	THTR 210
THTR 310	Voice and Speech III	THTR 211
THTR 345	Flat Pattern Design and Drafting	THTR 255
THTR 355	Computer-Aided Drafting and Computer Applications for the Theatre	THTR 255
WILD 240	Introduction to Biostatistics	M 162

Group IV: Expressive Arts (A)

Expressive Arts courses are activity-based and emphasize the value of learning by doing in an artistic context. Upon completion of an Expressive Arts course, students will be able to express themselves in the making of an original work or creative performance; understand the genres and/or forms that have shaped the medium; and critique the quality of their own work and that of others.

Course #	Title

ARTZ 103A	Art for Non-Majors
ARTZ 105A	Visual Language: Drawing
ARTZ 106A	Visual Language: 2-D Design
ARTZ 108A	Three Dimensional Fundamentals
ARTZ 131A	Ceramics for Non-Majors
ARTZ 211A	Drawing I
ARTZ 221A	Painting I
ARTZ 231A	Ceramics I
ARTZ 251A	Sculpture I
ARTZ 271A	Printmaking I
ARTZ 284A	Photo I - Techs and Processes
ARTZ 302A	Elementary School Art
ARTZ 394A	Environmental Draw Seminar
COMX 111A	Introduction to Public Speaking
COMX 217A	Oral Interpretation of Literature
CRWR 210A	Introduction Fiction Workshop
CRWR 211A	Introduction Poetry Workshop
CRWR 212A	Introduction Nonfiction Workshop
CRWR 312A	Interm Nonfiction Workshop
DANC 100A	Introduction to Modern Dance
DANC 108A	Dance Forms
DANC 110A	Introduction to Ballet
DANC 115A	Introduction to Jazz Dance
DANC 118A	Dance Forms: Tap
DANC 129A	Dance Performance Lab I
DANC 130A	Introduction to Dance
DANC 160A	Dance Forms: Irish
DANC 165A	Dance Forms: African
DANC 170A	Dance Forms: Tribal Style Belly

DANC 200A	Contemporary Modern II
DANC 210A	Ballet II
DANC 215A	Jazz Dance II
DANC 220A	Creative Practice I
DANC 229A	Dance Performance Lab II
ENST 373A	Nature Works
JRNL 140A	Beginning Radio/Audio Storytelling
MART 112A	Intro to Non-Lin Editing
MART 111A	Intro to Photoshop
MUSI 102A	Performance Study
MUSI 108A	Orchestras: USMO (Orchestras)
MUSI 110A	Opera Theatre
MUSI 111A	Singing for Non-Majors
MUSI 112A	Choir: Chamber Choral
MUSI 114A	Band: UM Concert Band
MUSI 122A	Percussion Ensemble: UM
MUSI 123A	World Percussion Ensemble
MUSI 131A	Jazz Ensemble: UM Jazz Bands
MUSI 135A	Keyboard Skills I
MUSI 136A	Keyboard Skills II
MUSI 155A	Marching: Grizzly Marching Band
MUSI 160A	Beginning Guitar
MUSI 162A	Chamber Ensembles
MUSI 267A	Composers' Workshop I
MUSI 304A	Sound in the Natural World
MUST 227A	Mountain Electroacoustic Laptop Ensemble I
THTR 102A	Introduction to Theatre Design
THTR 106A	Theatre Production I: Run Crew
THTR 107A	Theatre Production I: Construction Crew

THTR 113A	Introduction to Voice Acting
THTR 120A	Introduction to Acting I
THTR 220A	Acting I
THTR 239A	Creative Drama/Dance: K-8

Group V: Literary and Artistic Studies (L)

In these courses, students develop familiarity with significant works of artistic representation, including literature, music, visual art, and/or performing arts. Through this experience, students enhance their analytical skills and explore the historical, aesthetic, philosophical, and cultural features of these works.

Upon completion of a Literary and Artistic Studies course, students will be able to:

1. analyze works of art with respect to structure and significance within literary and artistic traditions, including emergent movements and forms; and
2. develop coherent arguments that critique these works from a variety of approaches, such as historical, aesthetic, cultural, psychological, political, and philosophical.

Course #	Title
ARTH 160L	Global Visual Culture
ARTH 250L	Introduction to Art Criticism
CHIN 313L	Classical Chinese Literature
CHIN 314L	Traditional Chinese Literature (Traditional Chinese Literature in English Translation)

THTR 101L	Introduction to Theatre
THTR 235L	Dramatic Literature
WGSS 163L	Historical and Literary Perspectives on Women

Group VI: Historical and Cultural Studies (H)

These courses present the historical or cultural contexts of ideas and institutions, and examine cultural development or differentiation in the human past. They are foundational in that they are wide-ranging in chronological, geographical, or topical focus, or in that they introduce students to methods of inquiry specific to a particular discipline.

Upon completion of a Historical and Cultural Studies course, students will be able to:

1. synthesize ideas and information with a view to understanding the causes and consequences of historical developments and events;
2. evaluate texts or artifacts within their historical and/or cultural contexts;
3. analyze human behavior, ideas, and institutions within their respective historical and/or cultural contexts.

RLST 232H/SSEA 232H	Buddhism
RUSS 105H	Introduction to Russian Culture
THTR 330H	Theatre History I

Group VII: Social Sciences (S)

Social science courses describe and analyze human social organization and interaction, employing social data at a broad scale with statistical relevance, experimental data on individuals or groups, or qualitative data based on observation and discourse.

Upon completion of a Social Sciences course, students will be able to:

1. Describe the nature, structure, and historical development of human behavior, organizations, social phenomena, and/or relationships;
2. use theory in explaining these individual, group, or social phenomena; and/or
3. understand, assess, and evaluate how conclusions and generalizations are justified based on data

SOCI 275S	Gender and Society
WGSS 263S	Women, Men, and Sexuality

Group VIII: Ethics and Human Values (E)

Ethics and Human Values courses familiarize students with one or more traditions of ethical thought. These courses rigorously present the basic concepts and forms of reasoning that define and distinguish each tradition. The focus of these courses may be on one or more of these traditions, or on a concept such as justice or the good life as conceptualized within one or more of these traditions, or on a professional practice within a particular tradition.

Upon completion of an Ethics and Human Values course, students will be able to:

1. correctly apply the basic concepts and forms of reasoning from the tradition or professional practice they studied to ethical issues that arise within those traditions or practices;
2. analyze and critically evaluate the basic concepts and forms of reasoning from the tradition or professional practice they studied.

Course #	Title
AHMS 270E	Medical Law and Ethics

ANTY 326E	Indigenous Peoples and Global Development
ANTY 403E	Ethics and Anthropology
BGEN 220E	Business Ethics and Social Responsibility
CHMY 305E	Ethics and Writing in Science
CLAS 365E	Roots of Western Ethics
CSCI 215E	Ethics and Information
CSCI 216E	Technology, Ethics, and Society
CSCI 315E	Computer, Ethics, and Society
EDU 407E	Ethics and Policy Issues
GEO 304E	Science and Society
HONR 122E	Ways of Knowing II
HONR 320E	Research Portfolio Seminar
HSTR 272E	Terrorism: Violence in the Modern World
HSTR 374E	War, Peace, and Society
HTH 475E	Legal & Ethical Issues in the Health & Exercise Professions
LSH 389E	Placebos: The Power of Words
NASX 303E	Ecological Perspectives of Native American Traditions
NASX 304E	Native American Beliefs and Philosophy
NRSM 449E	Climate Change Policy and Ethics
NRSM 489E	Ethics, Forestry and Conservation
PHAR 514E	CASE Studies in Pharmacy Ethics
PHL 110E	Introduction to Ethics
PHL 112E	Introduction to Ethics and the Environment
PHL 114E	Introduction to Political Ethics
PHL 210E	Moral Philosophy
PHL 321E	Philosophy and Biomedical Ethics
PSCI 250E	Introduction to Political Theory
RLST 281E	Comparative Ethics
SW 410E	Social Work Ethics

Group IX: Democracy and Citizenship (Y)

These courses ground students in the ideas, institutions, and practices of democratic societies and their historical antecedents. Knowledge gained through courses in the Y perspective prepares students to understand the rights and responsibilities of engaged citizenship and to assess the characteristics, contributions, and contradictions of democratic systems.

Upon completion of a Democracy and Citizenship course, students will be able to:

1. Demonstrate informed and reasoned understanding of democratic ideas, institutions and practices, from historical and/or contemporary perspectives;
2. Analyze and evaluate the significance and complexities of engaged citizenship; and
3. Articulate the causes and consequences of key historical and/or contemporary struggles within democratic systems or their antecedents, including but not limited to those pertaining to issues of diversity, equity, and justice.

Course #	Title
ANTY 122S	Race and Minorities
ARTH 201H	Art of World Civilizations II: Renaissance to Modern
GRMN 340L	Nature and the Environment in German Literature and Film
GRMN 351H	German Culture to 1900
GRMN 352H	German Culture, 1900 to Present
HONR 122E	Ways of Knowing II
HSTA 101H/103H	American History I/ Honors American History I
HSTA 102H/104H	American History II/ Honors American History II
HSTR 101H/103H	Western Civilization I /Honors Western Civilization I
HSTR 102H/104H	Western Civilization II / Honors Western Civilization II
JRNL 100H	Media History and Literacy
JRNL 102Y	News Literacy
LIT 222L	British Literature: Victorian to Contemporary
MCLG 105Y, RUSS 105Y	Introduction to Russian Culture
MUSI 301H	Music History I
MUSI 302H	Music History II
PHL 101Y	Introduction to Philosophy
PHL 102Y	Topical Introduction to Philosophy
PHL 261Y	History of Ancient Philosophy
PHL 262Y	History of Modern Philosophy
PSCI 210S	Introduction to American Government
RUSS 105H	Introduction to Russian Culture

THTR 101L	Introduction to Theatre
THTR 331Y	Theatre History II

Group X: Cultural & International Diversity (X)

These courses foster an appreciation for diverse cultures, their histories and contemporary forms, and their positions in world spheres of power and change. This includes knowledge of diverse cultures in comparative and thematic frameworks. Knowledge gained through courses in the X perspective prepares students to cultivate ways of thinking that foster an understanding of the complexities of indigenous or international cultures and global issues, past and present.

Upon completion of a course in this group, students will be able to:

1. Demonstrate an understanding of the diverse ways humans structure their social, political, and cultural lives;
2. Interpret human activities, ideas, and institutions with reference to diverse cultural, historical and geo-political perspectives and physical environments; and
3. Recognize the complexities of inter-cultural and international communications and collaborative endeavors, and relate this to the complex challenges of the 21 st century.

Course #	Title
AAST 141H/HIST 141H	Black: Africa to Hip-Hop and Beyond, An introduction
ANTY 101H	Anthropology and the Human Experience

RLST 232H/SSEA 232H	Buddhism
RLST 234X	Hinduism
RLST 238X	Japanese Religion
SSEA 202X	Introduction to India
WGSS 150X	Women's Rights and Women's Roles around the World

Group XI: Natural Science (N)

These courses present scientific conclusions about the structure and function of the natural world, and demonstrate or exemplify scientific questioning and validation of findings.

Upon completion of a Natural Science course, a student will be able to:

1. understand the general principles associated with the discipline(s) studied;
2. understand the methodology and activities scientists use to gather, validate and interpret data related to natural processes;
3. detect patterns, draw conclusions, develop conjectures and hypotheses, and test them by appropriate means and experiments;
4. understand how scientific laws and theories are verified by quantitative measurement, scientific observation, and logical/critical reasoning;
5. and understand the means by which analytic uncertainty is quantified and expressed in the natural sciences

Natural Science courses without a laboratory experience

Course #	Title

Policies and Procedures

Academic Calendar

The Academic Calendar for the current academic year, as well as past and future years, may be found on the Academic Calendar web page.

Registration and Course Information

Registration for Courses

Students who have no prior attendance at the University must apply for admission and be admitted before being eligible to register for courses. See the Admissions section of this catalog or the admissions website.

Detailed instructions regarding registration and course offerings are available on the Registrar web pages for registration information and course schedule information.

Students must complete course registration during the scheduled registration period or be subject to payment of a late registration fee, if allowed to register. Registration is not complete nor is any academic credit awarded until all course tuition and fees for the semester have been paid.

Adding, Dropping and Other Course Changes

Adding, Dropping and Other Course Changes – Summary Tables

Students who request to add, drop or change the grading option must have all registration holds cleared in order for the request to be honored. The following information does NOT apply to the School of Law. Law school students should see the School of Law website for information.

Autumn & Spring Semesters

Instructional Days	Day 1-7	Day 8-15	Day 16-45	Day 46 – Last Regular Class Day/ Friday Before Finals Week	After Last Regular Class Day
Add a Course	CyberBear	Course Add/Change Form with instructor signature	Course Add/Change Form with advisor* and instructor signature	Course Add/Change Form with advisor* and instructor signature	Only registration errors can be corrected; use the Course Add/ Change Form with advisor* and instructor signature

Special Sessions

Special Session courses, offered during any term, will vary from the sessions listed above. For example, a course taught over a period of five weeks is considered a "special session" course if its start and end dates are different than the published regular term dates. Please check with the Registrar's Office for specific dates related to changing registration in a special session course.

Adding, Dropping and Other Course Changes – Detailed Information

All guidelines and timelines that follow refer to the traditional autumn and spring semesters, which are generally 74-75 days in length. The timelines that apply to Summer Sessions and Winter Session are detailed in the tables above. Important Dates are listed on the Registrar's Office calendar web page. Please see the Business Services/Student Accounts website for information regarding how fees are impacted by dropping/adding courses, as well as the refund schedule for a complete withdrawal from the University of Montana.

Adding, Dropping or Other Course Changes – First Through Seventh (1 – 7) Instructional Day of the Semester

During this timeframe, students may use CyberBear to add courses, drop courses, change grading options, and/or change variable credits. Access to CyberBear for adding courses or changing sections ends at 5:00 p.m. Mountain Time on the seventh day of classes.

Adding, Dropping or Other Course Changes – Eighth Through Fifteenth (8 – 15) Instructional Day of the Semester

During this timeframe, with consent of the course instructor, students may add courses or change sections with a signed paper-Registration Override Form or an instructor-approved electronic override (via CyberBear). Fees are reassessed each night during this time period. Added courses and credits may result in additional fees.

Students may drop courses, change grading option (including audit), and/or change variable credits via CyberBear until 5:00 p.m. Mountain Time on the fifteenth day.

Adding, Dropping or Other Course Changes – Sixteenth Through Forty fifth (16 – 45) Instructional Day of the Semester

During this timeframe, students must complete a paper Course Drop Form or Course Add/Change Form as well as obtain the signature of both the course instructor and student's advisor to (i) drop/add a course and/or (ii) make changes of section, grading option, or credit. The ability to change to or from audit is no longer available at this time. Completed forms must be returned to the GrizCentral Registration Counter (or the Registrar's Office at the Missoula College Campus) no later than close of business on the forty-fifth instructional day of a semester. A $10.00 processing fee is charged for each drop or add. Added courses and credits may result in additional fees. There are no refunds or reductions of fees for courses dropped after the 15th day (or equivalent), and a grade of W (withdrawn) is recorded for each dropped course.

Adding, Dropping, or Other Course Changes – Forty sixth Instructional Day of the Semester Through the Last Regular Class Day/Friday before Finals Week

During this timeframe, a Course Add/Change Form must be completed by the student and signed by the course instructor and the student's advisor to add a course, change the grade option, or change variable credits. Changing to or from audit is not permitted during this time. Not all requests for adds, changing grade options, or changing variable credits are approved. Advisors have the right to indicate they do not recommend approval of the request. However, it is the course instructor's decision to approve or deny the request to add/change a course.

Completed forms must be returned to the GrizCentral Registration Counter (or the Registrar's Office at the Missoula College Campus) no later than close of business on the Last Day of Regular Classes. A $10.00 processing fee is charged for each add. Added courses and credits may result in additional fees.

During this timeframe, students may drop courses only by petition. Note that not all petitions are approved, and that documented justification is required. Some examples of documented circumstances that may merit approval are: accident or illness, family emergency, or other circumstances beyond the student's control. Instructors and advisors have the right to indicate they do not recommend the drop. However, it is the decision of the Dean of the student's major to approve or deny the request to drop courses.

To petition to drop a course, a Course Drop Form must be completed, with the signature of the student's advisor, the course instructor, and the Dean of the student's major. Completed forms must be returned to the GrizCentral Registration Counter (or the Registrar's Office at the Missoula College Campus) no later than close of business on the Last Regular Class Day/Friday before Finals Week. A $10.00 processing fee is charged for each drop. There are no refunds or reductions of fees for courses dropped, and the instructor assigns a grade of WP (withdrawn/passing) if a student's course work has been passing or WF (withdrawn/failing) if failing. These grades do not affect grade averages but they are recorded on a student's transcript.

The opportunity to drop a course for the current term ends on the last day of instruction before scheduled final exams. Dropping a course taken in a previous term or altering grading option or audit status for such a course is not allowed. The only exceptions are for students who have received a grade of NF (never attended/fail).

Law School Students - See the School of Law section of this catalog for links to the School of Law website, which will list the add and drop deadlines for law courses.

Cancellation of Courses

The University reserves the right to cancel any course.

Common Course Numbering - Montana University System

All universities, 4-year and 2-year colleges that are part of the Montana University System are now required to use the same course numbering for undergraduate courses. With common course numbering, transfer students can be reassured that they will receive credit for undergraduate courses taken at another Montana institution, as long as the admitting institution offers that same course. This transparency will make it easier for students to continue their higher education at any state-supported campus.

Effective Autumn Semester 2009, all units of the Montana University System (MUS) began to offer classes using new subject abbreviations and new numbers that are common across all MUS units. Subject areas and numbers continue to be renumbered as of the publication of this catalog. Information regarding Common Course Numbering at the University of Montana is available at the Common Course Numbering web page.

Withdrawal from the University

Students who withdraw from the University (withdrawing from ALL classes) while a semester is in progress must complete withdrawal forms which are obtained from the Registration Counter in Griz Central (Lommasson Center) or the Registrar's Office at Missoula College. Drop/add forms cannot be used to withdraw from school and students are not allowed to drop all their courses on the Internet. International students must first contact the Foreign Student Advisor before withdrawing as visa status will be affected. Medical withdrawals are granted only for a student's significant health problems and must be documented by a healthcare provider.

See the Expenses section of this catalog for fee information relating to withdrawal from The University.

If a student receiving financial aid withdraws they may have to repay aid received in the current semester and it may affect eligibility in the future semesters. If a student stops attending classes without formally withdrawing they too may have to repay aid received in the current semester and may be ineligible for aid in future terms. Students who reside in a University residence hall or in family housing must notify the Residence Life Office or the Family Housing Office of the withdrawal.

Students who purchase health insurance with registration will receive a refund and lose coverage if withdrawn during the first fifteen instructional days unless a student is granted a medical withdrawal. Withdrawal after the fifteenth day will not result in a refund but coverage will continue through the remainder of the semester.

When withdrawal forms are completed in Griz Central or the Registrar's Office at Missoula College, before the last two weeks of the semester, grades of W (withdrawal) are assigned. Beginning two weeks from the end of the term, students may not withdraw from the University except for very unusual circumstances, as described below.

Retroactive Withdrawals:

In exceptional cases, a student may appeal for a retroactive withdrawal for a previous semester in attendance, all such appeals are reviewed by a committee. Forms and instrucitons are located at this link: http://www.umt.edu/registrar/PDF/RetroWithdrawalPetition.pdf

Hardship Withdrawals:

In the case of extreme medical, family or other emergencies that are documented and have impacted a student's ability to attend and succeed in courses, a student may appeal for a hardship withdrawal from the universit. Such appeals are reviewed by a committe and are considered on a case by case basis. To apply for a hardship petition contact Student Accounts at 406-243-2223.

Prerequisites and Co-requisties

"Prerequisite" indicates that the course(s) or requirement(s) described must have been met/satisfactorily completed (grade of C- or better, unless otherwise specified in the course description in the catalog) before the student may take the course that requires the listed pre-requisite. Failure to complete satisfactorily the pre-requisite will result in the student being dropped from the course which requires the pre-requisite. If credit for a pre-requisite was earned via the Advanced Placement (AP) Examination Program, the AP score is recorded on a student's academic record with a grade of "CR* (prior to Autumn Semester 2012), or a score of AP3, AP4, or AP5 (Autumn Semester 2012 and thereafter). "Co-requisite" indicates the course or courses must be taken concurrently (in the same academic term) with the course described. In some cases a co-requisite may be completed prior to the semester in which the course that requires the co-requisite is taken.

Course Numbering System

- 001-099 Courses below college level. Credit not allowed toward a degree.
- 100-199 Primarily for freshmen.
- 200-299 Primarily for sophomores.
- 300-399 Primarily for juniors.
- 400-499 Primarily for seniors.
- 500-699 Primarily for graduate students.
- Senior (5th year) courses in Pharmacy are numbered 500 to 599.
- 800 cross-listed courses, used for secondary or other listing.

Undergraduates in Graduate Courses

Post-baccalaureates and seniors holding a 3.0 (or greater) grade point average may, with consent of instructor, enroll in 500-level courses for undergraduate credit. Variance from these requirements cannot be petitioned.

Cross-listed and Equivalent Courses

A few courses are approved to be offered jointly by two or more departments. In such cases, the course description will provide information for registration.

In certain cases, a course description indicates credit is not allowed for a particular course and for another course offered by a different department. These courses are very similar in content, although offered separately, and credit is not allowed toward a degree for both courses.

Technical Courses

A few courses at the Missoula College are shown with a course number suffix of "T" and are primarily technical in nature. The courses will be required in a specific Certificate of Applied Science program or a specific Associated of Applied Science program or professional industry certificate offered by the College. Up to 15 credits of vocational-technical course work from regionally accredited schools are accepted as free elective in transfer toward an AA, AS, or baccalaureate program. Up to 20 credits may transfer for students completing an AAS degree. Refer to vocational technical credits in the Admissions section or Credit Maximums section.

Full-Time Student Defined

Undergraduate Students

Full Time:	12 or more enrolled credits
1/2 Time:	6 -11 enrolled credits
<1/2 Time:	5 or fewer enrolled credits
Not Enrolled:	0 enrolled credits (withdrawn/graduated, etc.)

Graduate Students

*Full Time:	9 or more enrolled credits

1/2 Time: 6 – 8 enrolled credits

<1/2 Time: 5 or fewer enrolled credits.

Not enrolled: 0 enrolled credits (withdrawn/graduated, etc.)

* One credit of PSYX 638 Clinical Psychology Internship per semester is equivalent to full-time enrollment for students in the Clinical Psychology Ph.D. Program.

* One credit of PSYX 588 School Psychology Internship (equivalent to PSYX638) per semester is equivalent to full-time enrollment for students in the School Psychology PhD Program.

In most baccalaureate programs a student must earn at least 15 credits per semester to graduate in a four year period. One and two year programs usually require enrollment in between 15 and 19 credits per semester.

Maximum Credit Load

Generally, an undergraduate student should register for no more than 21 credits during a semester. The credit load would include physical education activity courses, and also remedial courses (those numbered below 100), credits from which do not count toward a certificate or degree.

Permission to enroll for more than the maximum credit load given above may be approved by the student's faculty advisor.

Final Examinations

Final examinations for the semester are scheduled in two-hour segments, one for each course. The segments should be considered as class meetings to be treated by the instructor as he or she thinks educationally appropriate. The time scheduled for final examinations is the only time period during which final examinations are to be given. If an instructor elects not to give a final examination during the designated week, under no circumstances are final examinations to be given during the week preceding the scheduled final examination days.

Students may seek relief from writing more than two examinations during the same day. Students who are scheduled for more than two examinations may contact the appropriate faculty to arrange an alternate testing time during the scheduled final examination period. If satisfactory arrangements cannot be made, the student should seek the assistance of his or her dean.

University Employee Registration

University employees who have applied and have been accepted for admission to the University may register with the approval of the employee's supervisor. Waivers of some fees are granted to some faculty and staff members who are at least three quarter time salaried employees on the date of registration. Additional information and the necessary forms are available in the Office of Human Resource Services in the Lommasson Center.

Grading and Academic Standing Information

Grading System

The University uses two types of grading: traditional letter grades and credit/ no credit grades. At the option of the instructors some courses are offered only on the traditional letter grade basis or only on the credit/no credit basis. Other courses are open to either type of grading, at the option of the student. Courses offered on the A -F basis only or CR/NCR only will be indicated in the Class Schedule or via CyberBear. Grades preceded by an R indicate remedial courses. Grades preceded by an E indicate academic forgiveness was granted.

The instructor has the first fifteen (15) class days of the semester to change the grading option for their course. If a change does occur from the original published grading option, the students in the class and the Registrar's office must be notified of the change not later than the fifteenth (15) class day.

Traditional Letter Grading (A-F)

Traditional Letter Grades represent an assessment of the overall quality of work performed in a given course. A-Excellent; B-Good; C-Satisfactory; D-Poor, F-Failure. When assigning traditional letter grades, instructors may, at their discretion, utilize the symbols + or -. Use of the + or - will be limited to A-, B+, B-, C+, C-, D+, and D-. Other grade symbols used are: I-Incomplete; N-work on the course may be continued in later semesters (when work is completed, the final grade assigned applies to all semesters of the course); NF-no record of academic performance; W-withdrawal from a course or course dropped after the fifteenth instructional day; WP-course dropped after the forty-fifth instructional day with passing work; WF-course dropped after the forty-fifth instructional day with failing work; AUD-auditor registration. (AUD is recorded for all students who register in courses as auditors, intending to listen to the courses without earning credit or being graded. The same fees are

assessed as when registering for credit. Any attendance or participation expectations are established by the instructor of the course. If attendance expectations are not met, the instructor may request a notation be placed on the student's academic record indicating attendance was not satisfactory.) Remedial courses do not count in credits earned, nor in grade point averages, nor do they count toward graduation.

Credit/No Credit Grading (CR/NCR)

Student Option: To encourage students to venture into courses where they might otherwise hesitate because of uncertainty regarding their aptitude or preparation, they may enroll in some courses on a credit/no credit basis. Freshmen and sophomores are discouraged from taking more than one course a semester on a credit/no credit basis.

No more than 18 CR credits may be counted toward graduation requirements at the baccalaureate level. Courses taken to satisfy General Education Requirements must be taken for traditional letter grade. Courses required for the student's major or minor must be taken for traditional letter grade.

A grade of CR is assigned for work deserving credit (A through D-) and a grade of NCR is assigned for work of failing quality (F). CR and NCR grades do not affect grade point averages. The grades of CR and NCR are not defined in terms of their relationship to traditional grades for graduate course work.

Election of the credit/no credit option must be indicated at registration time or within the first 15 class days on CyberBear. Between the 16th day and the last day of instruction before finals week, a student may request a change from credit/no credit enrollment to an enrollment under the A-F grade system, or the reverse, by means of a Course Add/Change Form; note that not all such requests are approved. See instructions above.

The University cautions students that many graduate and professional schools and some employers do not recognize non-traditional grades (i.e., those other than A through F) or may discriminate against students who use the credit/no credit option for many courses. Moreover, students are cautioned that some degree programs may have different requirements regarding CR/NCR credits, as stipulated in the catalog.

No Credit Grading in Composition (CN)

Students enrolled in WRIT 095 and WRIT 101 are graded by the traditional letter grades of A through F or are given NC for no credit. The NC grade is awarded when exceptional progress has occurred but the student needs to repeat the course. The NC grade does not affect grade point average.

Incomplete Grade Policy

It is assumed that students have the responsibility for completing the requirements of the courses in which they are enrolled within the time framework of the semester

A grade of Incomplete (I) may be given when, in the opinion of the instructor, there is a reasonable probability that students can complete the course without retaking it.

The incomplete is not an option to be exercised at the discretion of a student. In all cases it is given at the discretion of the instructor within the following guidelines:

1. A mark of incomplete may be assigned students when:
    - The student has been in attendance and doing passing work up to three weeks before the end of the semester, and
    - For reasons beyond the student's control and which are acceptable to the instructor, the student has been unable to complete the requirements of the course on time. Negligence and indifference are not acceptable reasons.
2. The instructor sets the conditions for the completion of the course work, and communicates them to the departmental office.
3. When a student has met the conditions for making up the incomplete, the instructor will assign a grade based upon an evaluation of the total work done by the student in the course.
4. An incomplete which is not made up within one calendar year automatically will revert to the alternate grade which was assigned by the instructor at the time the incomplete was submitted.
5. An incomplete remains on the permanent record and is accompanied by the final grade, for example, IA, IB, IC, etc.

Faculty Options for Grading Mode

* A faculty member may elect to grade an entire class using the traditional letter grading option (A-F).

* A faculty member may elect to grade an entire class using the credit/no credit option (CR/NCR). This method of grading is used in courses where more precise grading is inappropriate.

* A faculty member may elect to grade an entire class with the open grade mode option which allows students to choose between traditional letter grading and credit/no credit grading. When a course is offered with the open grade mode option, then the default grading at the time of registration defaults to traditional letter grading. It is the student’s responsibility to make the change to credit/no credit grading if this is their preference.

* Faculty members must choose the grade mode option for their courses at the time when courses are being proposed for a particular semester or within the first 15 instructional days of the semester.

* Courses graded credit/no credit only and courses graded A-F only will be identified in the Class Schedule or via CyberBear.

Credit Definition

Credit is defined in terms of semester hours. In general, 1 semester hour credit is allowed for 1 hour of lecture each week of the semester, or an average of 2 hours of laboratory each week of the semester.

In determining semester hour recommendations, evaluators use the following guidelines:

1. One semester credit hour for each 15 hours of classroom contact plus 30 hours of outside preparation or the equivalent; or
2. One semester credit hour for each 30 hours of laboratory work plus necessary outside preparation or its equivalent, normally expected to be 15 hours; or
3. One semester credit hour for not less than 45 hours of shop instruction (contact hours) or the equivalent.

Computation of Cumulative Grade Point Average

Quality points are assigned as follows: 4 quality points for each credit of A; 3.7 quality points for each credit of A-; 3.3 quality points for each credit of B+; 3 quality points for each credit of B; 2.7 quality points for each credit of B-; 2.3 quality points for each credit of C+; 2 quality points for each credit of C; 1.7 quality points for each credit of C-; 1.3 quality points for each credit of D+; 1 quality point for each credit of D; and 0.7 quality points for each credit of D-.

The cumulative grade average is computed by dividing the total quality points earned by the total number of credits attempted, excluding courses assigned W, WF, WP, CR, NC, NCR, I, AUD, or N grades and courses numbered under 100 (grade is preceded by an R). For repeated courses, excluding courses assigned W. WF, WP, CR, NC, NCR, I, AUD, or N grades, only the last grade earned will count toward the cumulative grade average. Grades for courses transferred from other colleges and universities are not included in the calculation of the grade average for graduation.

Repeating a Course

Repeat Fee Structure:

- 1st repeat - $25.00
- 2nd repeat - $35.00
- 3rd repeat - $50.00

The fee is assessed when a single course is repeated. The repeat fee is assessed for all students who repeat courses, not just those wanting to replace a grade for a course they took previously. Exemptions from the fee will be allowed for individuals with disabilities or financial hardship based upon recommendations from the Office of Disability Services or the Financial Aid Office.

Initial grades will be marked as repeated and remain on the transcript, but they will not be used to in the GPA calculation. Grades of AUD, I, N, NC, NCR, NP, NF, W, WP, or WF may not be used to replace grades. An F grade will be used to replace grades. If the last grade received is an F, no credit is given for previous passing grades. All courses repeated remain on the permanent record but only the last grade received is used to determine credits earned. Only the last grade received is used in calculating the grade point average.

If students receiving federal financial aid repeat a course previously passed they can only receive financial aid to do so a second time. On a third attempt the course will not be counted in the enrollment status for determining aid eligibility.

If enrollment in a course is closed, a student who is repeating or auditing the course may be required by the instructor to drop the course. This rule grants enrollment preference to those students attempting to register for the course for the first time for credit. It is the responsibility of the student who is not allowed to remain in the course to formally drop the course to avoid a failing grade for that course.

Repeating a course in the School of Law is governed by a different policy. See the School of Law section of this catalog.

Credit By Examination

Under certain circumstances, a currently registered student may receive credit by examination for a course in which he or she has not been regularly enrolled. The student must have a minimum cumulative grade average of 2.00 and an entering freshman must present a high school scholastic record equivalent to a 2.00 grade average to be eligible to earn credit by examination in any course.

Each school or department may determine those courses, if any, for which credit may be earned by examination. The dean of the school or the chair of the department must approve any arrangements prior to testing for such credit. On the successful completion of an examination, the department notifies the Registrar's Office. There are no fees for this type of credit by examination and grading may be credit/no credit or traditional letter grade.

Undergraduate Academic Performance

The cumulative grade average is calculated by dividing the total quality points earned by the total number of credits attempted, excluding courses assigned W, WF, WP, CR, NC, NCR, I, AUD, or N grades and courses numbered under 100 (grade is preceded by an R). Grades for courses transferred from other colleges and universities are not included in the calculation of the grade average for graduation. However, for determination of graduation honors/high honors, grades for all work transferred to this University, including failing grades are factored into the calculation.

Dean's List (Honor Roll)

To qualify for the Dean's List, students must be undergraduates, must earn a semester grade average of 3.50 or higher, and receive grades of A or B in at least 9 credits. No grades of C+, C, C-, D+, D, D-, F, NC or NCR are allowed.

Undergraduate Academic Probation

An undergraduate student will be placed on academic probation if at the end of any semester his/her cumulative grade average drops below 2.00. The effect of the academic probation is to serve notice to the student that the quality of his/her work is below an acceptable level and that continuation of unsatisfactory work during their next semester of enrollment will result in academic suspension. Academic probation status is recorded on the student's academic transcript and semester grades. Students placed on probation should contact their academic advisor immediately to seek assistance and direction.

Undergraduate Academic Suspension

An undergraduate student will be placed on academic suspension at the end of any semester if the student was on academic probation during his/her prior semester of attendance and the student's cumulative grade average remains below 2.00. Exceptions are made if the student earns at least a 2.00 grade average for the current semester without raising the cumulative grade average to the required minimum. In such cases, students remain on academic probation. A student placed on academic suspension may not re enroll at the University unless the student has been reinstated. Reinstatement will require, at minimum, one full semester of non-enrollment at any campus of the Montana university system. Academic suspensions are noted on final grades and academic transcripts. Additional information can be found on the Office for Student Success Academic Standing web page .

Reinstatement from Academic Suspension

As noted above, an undergraduate student will be academically suspended at the end of a semester if placed on academic probation during the previous semester of attendance and the student's cumulative graduate point average (CGPA) remains below the 2.00 CGPA required for good academic standing.

Students who have been suspended for academic reasons and seek reinstatement must receive the approval of the academic dean of the school or college in which they intend to enroll. [If seeking reinstatement in the Missoula College, contact the Retention and Advising Coordinator at MC.] Typically, retroactive grade changes, dropped courses or withdrawals do not reverse the academic suspension status that is recorded on the transcript, unless there was an error or grading mistake.

Academic reinstatement is not automatic.The student must provide the reasons for previous poor academic performance along with a carefully prepared plan for improvement that is completed with the help of an academic advisor. A student denied reinstatement may appeal the denial in writing to the President of the University within ten days of receiving the notice of denial. The decision to deny reinstatement normally will not be reversed unless there is evidence the decision was made arbitrarily.

If a suspended and reinstated student has not attended UM for more than two years, the student must also complete an application for readmission through the Registrar's Office. The readmission form re-activates the student's record and, along with the reinstatement form, allows the student to register for courses.

Appeal of Academic Suspension

Students may appeal a suspension in cases where there are compelling and documented circumstances. If the appeal is approved by the dean of the student's college, the student may return to

the university without sitting out a semester. Appeals are considered where the student has otherwise demonstrated an ability to succeed at the university and the compelling circumstances that led to the poor performance have been resolved. An appeal of academic suspension will only be granted one time, on the approval of the appropriate dean. See the Appeal of Suspension Form, which details eligibility criteria and appropriate procedures.
http://www.umt.edu/registrar/PDF/AppealofSuspension.pdf

Academic Forgiveness

- A University of Montana – Missoula undergraduate, seeking their first undergraduate degree, who returns to the university after a minimum absence of three years and completes 30 credits of academic study with a minimum cumulative GPA of 2.5 is eligible for Academic Forgiveness.
- Academic Forgiveness allows a student who has met the requirements in statement #1 to select a prior semester or semesters he/she wishes to have excluded from calculation in the cumulative GPA. The semester(s) chosen must have occurred prior to his/her return to the university.
- Receiving Academic Forgiveness for a semester or semesters results in all credits and grades earned in the semester to be excluded from the student's GPA calculation. A student will not be allowed to select specific grades and credits to retain while excluding others earned within the same semester. The excluded courses and grades will remain on the transcript; however, they may not be used to fulfill any university requirements.
- Only University of Montana – Missoula grades and credits will be excluded.
- All excluded courses are still counted as attempted courses in determining if a student is meeting the Pace standard of the financial aid satisfactory academic progress (SAP) policy. If the terms being forgiven include courses a student previously passed the result could be that the student would now be out of compliance with the SAP policy and would have to do a financial aid appeal to have aid eligibility reinstated
- A student will be granted Academic Forgiveness only one time.
- Students who receive Academic Forgiveness will be bound by the University Catalog in effect at the time of their return to The University or any subsequent catalog in accordance with University policy.
- Students wishing to apply for Academic Forgiveness will contact the Registrar's Office for the appropriate form. The Registrar's Office will be responsible for verifying eligibility and notifying the student of approval.
- Other options exist for students who have not left the university, such as course repeat, withdrawals, and other mechanisms listed under academic policies in this catalog.

Students wishing to apply for Academic Forgiveness may obtain the form at the GrizCentral registration counter, or on the Registrar's Academic Forgiveness web page.

Transcript of Academic Record

A transcript of a student's academic record may be obtained from the Registrar's Office in the Lommasson Center, or the Registrar's Office at the Missoula College, upon the written and signed request of the student. In compliance with federal and state laws designed to protect student privacy, transcripts are not released without the student's authorizing signature.

Transcripts are usually available within two to five working days after receipt of the signed request. There is a charge for each official transcript. Payment must be received before transcripts are released. Transcripts and other services are withheld if the student owes a debt to the University. Special handling requests require extra fees.

Students may also order an academic transcript on-line for an additional fee through the National Student Clearinghouse service. Copies ordered via this service can be delivered electronically, hard copy or direct electronic data exchange. Additional information regarding ordering options and fees may be viewed via the Registrar's Website.

Any student who enrolled after summer semester 1991 may view his or her academic record in CyberBear

Student Rights and Responsibilites

Privacy and Release of Student Education Records (FERPA)

What is FERPA?

FERPA (Family Educational Rights and Privacy Act) was enacted in 1974. It is a set of regulations that applies to those institutions, such as the University of Montana, that receive funding from the Department of Education.

FERPA was written specifically for students and guarantees them the right to inspect and review their education records, the right to seek to amend education records, and the right to have some control over the disclosure of information from those education records.

Resources for Students

Notification Regarding Release of Student Directory Information

The Family Educational Rights and Privacy Act (FERPA) of 1974 (20 U.S.C. § 1232g; 34 CFR Part 99) is a federal law that protects the privacy of student education records. "Education records" are "those records, files documents, and other materials which 1) contain information directly related to a student; and 2) are maintained by an educational institution. (20 U.S.C. § 1232g(a)(4)(A); 34 CFR § 99.3). FERPA applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

Generally speaking, FERPA allows the University to disclose education records or personally identifiable information from education records in the following circumstances: with the written consent of the student, if the disclosure meets one of the statutory exemptions, or if the disclosure is directory information and the student has not placed a hold on release of directory information.

The University defines the following information as public (directory) information:

- Student's name
- Email address
- Telephone number
- Dates of attendance
- Degrees and awards received
- Major and minor field(s) of studies
- Class
- Participation in officially recognized activities and sports
- Most recent previous educational agency or institution attended by the student
- Weight and height, if student is a member of an intercollegiate athletic team

FERPA allows the University to release a student's directory information to anyone unless the student informs the University Office of the Registrar that he or she does not wish directory information to be released.

NO to Release of Directory Information

If you do not wish to authorize the release of directory information and do not want your directory information to appear in the University Student Directory, you must inform the Office of the Registrar of this by completing a *UM Confidentiality Request Form* which can be obtained from the Registrar's Office Website. You should allow at least three business days for processing.

You should be aware ...

You should be aware that restricting the release of your directory information has other consequences. For instance, a FERPA restriction makes it difficult or impossible for potential employers to verify your enrollment, or to verify the fact that you have earned a degree from the University. The University cannot notify your home town paper about awards and honors you receive (e.g., Dean's list). For this reason alone, many students choose to remove their FERPA restriction.

Change from NO to YES

At any time after restricting the release of your directory information, you may change your mind and choose to authorize the University to release directory information and for it to appear in the University Student Directory. You can grant such authorization at any time by going to the Registrar's Office at 201 Lommasson with a valid photo identification.

Notification of Students' Rights Under FERPA

FERPA also affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student's education records within 45 days of the day the University receives a request for access.

To inspect and review his or her education records, a student should submit to the university official(s) or office(s) having custody of the particular record(s), a written request that identifies the record(s) the student wishes to inspect.

1. The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.

(*This process cannot be used to challenge a grade* .)

A student who wishes to ask the University to amend a record should write the appropriate University dean or director responsible for custody of the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the University discloses personally identifiable information from the student's education records, except that the University will disclose the following information without a student's consent:

1. Disclosure to school officials with legitimate educational interests. A **school official** is a person employed by the University in an administrative, supervisory, academic, research, or support staff position (including, but not limited to University Police Department personnel, and Curry Health staff); a contractor, consultant, or other outside service provider retained to provide various institutional services and functions under contract or by statute instead of using University employees or officials (including, but not limited to an attorney, auditor, collection agent, information systems specialist, teaching affiliate, and clinical mentor); a person serving on the Board of Regents, staff in the Office of the Commission of Higher Education, the Institutional Review Board, and any other University board, committee or council; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a **legitimate educational interest** if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.

1. Compliance with a lawfully issued subpoena or judicial order.
2. Requests in connection with a student's application for financial aid.
3. Information submitted to accrediting organizations.
4. To other agencies or institutions that have requested the records and in which the student seeks or intends to enroll or is already enrolled so long as the disclosure is for purposes related to the student's enrollment or transfer.
5. Requests by federal and state authorities and authorized third parties designated by federal and state authorities to evaluate a federal or state supported education program; to researchers performing certain types of studies; in connection with statewide longitudinal data systems studies and tracking.
6. In the case of emergencies, the University may release information to appropriate persons in connection with an emergency, if the knowledge of such information is necessary to protect the health or safety of a student or other persons.
7. To the extent otherwise permitted by law, the results of a disciplinary proceeding or investigation conducted by the University to an alleged victim of a crime.
8. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

Student Rights

Public Safety Report and Alcohol and Drug Guidelines

The health and safety of students, faculty, staff, and visitors are of paramount concern to The University of Montana. Each year the University publishes an annual report outlining on-campus security and safety information and crime statistics. The report provides important information for security awareness and crime

prevention programs, emergency procedures and reporting crimes, plus law enforcement and safety services on campus.

Additionally, the booklet contains the University's policy on sexual assault and information about support services for victims of sexual assault. The booklet also includes information about the University's drug and alcohol policy, programs and support services for substance abuse, and risk management guidelines for University-related events.

The booklet is available by writing or calling the Office of Public Safety (406) 342-6131 or the Office of the Vice President for Student Affairs (406) 243-5225, The University of Montana, Missoula, Missoula, MT 59812. The information can also be accessed on the University of Montana Student Affairs website and the University of Montana Public Safety website.

Student Complaint Procedures

Under the terms of the Collective Bargaining Agreement between The University of Montana University Faculty Association and The Montana University System, there is a formal procedure for students who have a complaint against a faculty member or an administrator. Information about this procedure is available at the Vice President for Student Affairs website. The ASUM Student Resolution Officer is available to answer questions about procedures and to assist with the process. Time restrictions are important, so students should review procedures immediately if they feel they may have complaints. The Resolution Officer receives voice mail at 243-5431 or email at asum.resolutionoff@mso.umt.edu.

Notice to Students with Disabilities

Students with disabilities may obtain assistance with the registration process and the relocation of classes (if needed) through Disability Services in Lommasson Center 154 (406) 243 2243 VOICE/TDD.

Student Conduct Code

The Student Conduct Code, embodying the ideals of academic honesty, integrity, human rights and responsible citizenship, governs all student conduct at The University of Montana-Missoula. Student enrollment presupposes a commitment to the principles and policies embodied in this Code. The Student Conduct Code sets forth University jurisdiction, student rights, standards of academic and general student conduct, disciplinary sanctions for breach of the standards of student conduct and procedures to be followed in adjudicating charges of both academic and general misconduct.

The Vice President for Student Affairs is responsible for procedural administration of the Student Conduct Code for all general conduct. The Provost and Vice President for Academic Affairs is responsible for all academic conduct. Copies of the Student Conduct Code can be obtained from the offices of the Vice President for Student Affairs, the Provost and Vice President for Academic Affairs, Residence Life, and Associated Students of University of Montana-Missoula (ASUM). The Student Conduct Code also can be accessed on the Vice President for Student Affairs Conduct Code web page.

Plagiarism Warning

Plagiarism is the representing of another's work as one's own. It is a particularly intolerable offense in the academic community and is strictly forbidden. Students who plagiarize may fail the course and may be remanded to Academic Court for possible suspension or expulsion. (See Student Conduct Code that follows in this section of the catalog.)

Students must always be very careful to acknowledge any kind of borrowing that is included in their work. This means not only borrowed wording but also ideas. Acknowledgment of whatever is not one's own original work is the proper and honest use of sources. Failure to acknowledge whatever is not one's own original work is plagiarism.

Class Attendance/Absence Policy

Students who are registered for a course but do not attend the first two class meetings may be required by the instructor to drop the course. This rule allows for early identification of class vacancies to permit other students to add classes. Students not allowed to remain must complete a drop form or drop the course through CyberBear to avoid receiving a failing grade. Students who know they will be absent should contact the instructor in advance.

Students are expected to attend all class meetings and complete all assignments for courses in which they are enrolled. Instructors may excuse brief and occasional absences for reasons of illness, injury, family emergency, religious observance or participation in a University sponsored activity. (University sponsored activities include for example, field trips, ASUM service, music or drama performances, and intercollegiate athletics.) Instructors shall excuse absences for reasons of military service or mandatory public service.

Instructors may establish absence policies to conform to the educational goals and requirements of their courses. Such policies will ordinarily be set out in the course syllabus. Customarily, course syllabi will describe the procedures for giving timely notice of absences, explain how work missed because of an excused absence may be made up, and stipulate any penalty to be assessed for absences.

The UM Faculty Senate encourages the faculty to accommodate students incurring an excused absence by allowing them to make up missed work when this can be done in a manner consistent with the educational goals of their courses. Students expecting to incur excused absences should consult with their instructors early in the term to be sure that they understand the absence policies for each of their courses.

Major and Minor Requirement Information

Declaring a Major and Changing a Major

Students indicate on the application for admission the major or majors in which they are interested. Students undecided as to a field of interest may elect to be Undeclared while making program and career decisions. Students must declare a major in a degree granting program prior to completion of 45 credits or after three semesters, whichever occurs first.

Students must complete a major in order to earn a degree or certificate.

Students may change their majors or minors by obtaining the proper approval on a change of major or minor form available from the Registration Counter in Griz Central in the Lommasson Center. Because of enrollment limitations, students must request a change to a program in the Missoula College by completing an application for admission and submitting it to the College. Students whose initial admission was to the Missoula College may change to a major outside the College by submitting an application for admission to Enrollment Services-Admissions & New Student Services in the Lommasson Center.

Credits Required for a Major

Students in a bachelor degree program must complete a minimum of 30 credits in their major. Most majors require more.

Students may elect to earn a single degree with more than one major. Students may complete a double major (two majors) or any number of majors. All requirements for the majors must be completed even though students will receive a single degree such as a Bachelor of Arts with majors in Psychology and Sociology. It is only necessary to complete the total credit requirement for a single bachelor degree.

Courses completed to satisfy the requirements of a major also may be applied toward the General Education Requirement if they appear on the list of approved courses at the time they are taken.

Students in programs in the Missoula College complete requirements as listed in the Missoula College section of this catalog.

Credit Limitations in a Major

A maximum of 60 credits in the student's major may be counted toward the baccalaureate degree, except some options in Health and Human Performance and Education, majors in Computer Science, and majors in the Schools of Business Administration, College of Visual and Performing Arts, Journalism, Law, The College of Health Professions and Biomedical Sciences and the College of Forestry and Conservation are allowed more. Students with combined majors, as opposed to two majors, are allowed to apply 75 credits in the major.

Grade Requirement

Courses taken to satisfy the requirements of the major must be completed with a grade of C- or better.

A minimum grade average of 2.00 in all work attempted in the major at the University of Montana-Missoula is required for graduation.

Major Concentration

Groups of courses have been identified which lead to a specialization within one major or between two or more majors. These specializations are called concentrations. The names of approved concentrations will be recorded on the permanent records of those students who have satisfactorily completed the requirements as given in the catalog governing their graduation. A student desiring a particular concentration must satisfy the requirements of the major offering it. If one concentration is offered within two or more majors, the student must satisfy the requirements of only one.

Only courses listed within the supporting major count toward the 60 credit limitation in the major. Courses in other fields do not count toward the maximum of 60 credits in the major even though they may be required or elected for the concentration.

If one major has two or more concentrations, a student may satisfy the requirements for more than one concentration so long as the maximum credit limitations are observed.

Minor Requirements

Baccalaureate students may elect to complete one or more minors in fields outside their majors. Minors may be in fields unrelated to students' majors or they may be complementary or supportive of majors. A student may not take a minor in the same field of study as his or her major.

A student will not be required to satisfy the requirements of a minor in order to graduate unless that minor is required by the student's major department or school.

Courses completed to satisfy the requirements of a minor also may be applied toward the General Education Requirement if they appear on the list of approved courses at the time they are taken.

Credits Required for a Minor

To complete a minor, students must earn at least 18 credits in an approved minor listed in this catalog and complete a baccalaureate degree.

Students possessing a baccalaureate degree from an accredited college or university may earn a minor if they have been accepted by the University as an undergraduate degree student. In addition to meeting minor requirements, students must earn from the University of Montana-Missoula a minimum of 9 credits in the minor field and 15 credits overall.

Grade Requirement

Courses taken to satisfy the requirements of the major and the minor must be completed with a grade of C- or better. Some majors require a C or higher grade for some of the required courses. Specific information regarding the major requirements can be found in the majors individual section of the catalog.

A minimum grade average of 2.00 in all work attempted in the minor at the University of Montana-Missoula is required for graduation with the minor.

Teaching Minors

Teaching minors are separate entities from degree minors as described in this section. Teaching minors are identified and requirements listed in the College of Education section of this catalog.

Colleges, Schools and Programs

The offerings listed below are for undergraduate and professional programs. For detailed information about The Graduate School and graduate programs offered at the University of Montana visit the Graduate School Programs webpage. To find out more about a specific graduate program, please contact the department.

South and Southeast Asian Studies

Ruth Vanita, Director

The Liberal Studies Program offers undergraduates at the University of Montana-Missoula an opportunity to study South and Southeast Asian peoples, cultures, histories, and societies, as well as their literary, artistic and religious traditions. The region includes India, Nepal, Bhutan, Tibet, Sri Lanka, Pakistan, Bangladesh, Myanmar (Burma), Thailand, Laos, Cambodia, Vietnam, Malaysia, Brunei, Singapore, Indonesia, East Timor, and the Philippines.

The South Asianist faculty of Liberal Studies and the Dean of the College of Humanities and Sciences work closely with those faculty from other disciplines at the University of Montana who have research and teaching interests in the area, and competence in regional languages.

Students may choose to minor in South and Southeast Asia with a major in any discipline. They must register with Professor Ruth Vanita, the advisor, and are encouraged to plan their course sequence at least one semester in advance, in consultation with an assigned core faculty advisor from those listed below.

South/Southeast Asian Studies

Back to Top

- SSEA 195 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, offerings of new courses, or one-time offerings of current topics. Course Attributes: Internships/Practicums
- SSEA 202X - Introduction to India
  Credits: 3. Offered alternate years. This course introduces students to the history, economy, political and legal system, society, culture, religions, and literary and artistic traditions of India, which is the world's largest secular democracy and the birthplace of four major world religions. Course Attributes: Cultural Intl Diversity (X)
- SSEA 232H - Buddhism
  Credits: 3. Offered autumn. Same as RLST 232H. A historical introduction to the development of Buddhist thought and practice in the cultures of Asia and the West. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- SSEA 234X - Hindu Religious Traditions

Credits: 3. Offered spring, odd-numbered years. Same as RLST 234X. Critical exploration of selected aspects of Hindu thought, narrative and practice, both in contemporary and historical perspective. Focus primarily on India, but with consideration of Hinduism's transformation and impact beyond South Asia. Course Attributes: Cultural Intl Diversity (X)

- SSEA 295 - Special Topics
  Credits: 1 TO 12. (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Internships/Practicums
- SSEA 330X - Peoples and Cultures of World
  Credits: 3. Offered intermittently. Same as ANTY 330X. Ethnographic survey of societies and cultures of Indonesia and the Philippines.
- SSEA 342 - Topics Comparative Lit & Rel
  Credits: 3. Offered intermittently. Same as LSH 342. These courses compare major traditions, texts and trends in two or more world civilizations or cultures. Works of literature and/or philosophy are examined in their historical contexts, and in relation to each other.
- SSEA 353 - Topics So. Asian Religions
  Credits: 3. Offered intermittently. No prerequisites. This course will examine select topics of central importance with respect to the history of interaction between the major religions (Hinduism, Islam, Buddhism, Jainism and Sikhism) of South Asia.
- SSEA 366 - Tibetan Civilization
  Credits: 3. Offered intermittently. No prerequisites. An exploration of the history and culture of a unique civilization that has influenced greatly the cultures of Himalayan, East and South Asia. Special attention will be given to Tibetan religions, modernity, and globalization as they have presented profound challenges to Buddhist traditions.
- SSEA 368 - Contemporary Buddhism in SSEA
  Credits: 3. Offered intermittently. No prerequisites. Like other major religions, modernity and globalization have presented profound challenges to Buddhist traditions. In this course we will explore various contemporary issues that have affected Theravada Buddhist societies-colonial and post-colonial revivalism, religious nationalism, women's rights and social reform-as case studies of some of the major ways religions have confronted modernity.
- SSEA 395 - Special Topics
  Credits: 1 TO 12. (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Internships/Practicums
- SSEA 495 - Special Topics
  Credits: 1 TO 12. (R-12) Seminar designed for students with a minor in South and Southeast Asian Studies. Regional or temporal focus may vary. Course Attributes: Internships/Practicums

SSEA Social Sciences courses

Rule: Choose 3-6 credits from the following courses.

	Course	Credits
	SSEA 330X - Peoples and Cultures of World Offered intermittently. Same as ANTY 330X. Ethnographic survey of societies and cultures of Indonesia and the Philippines.	3 Credits
	SSEA 440 - Contemporary Issues of SE Asia Offered spring odd years. Same as ANTY 440 (ANTH 340). Prereq. SSEA 102. An examination of the major issues that affect the contemporary experience of Southeast Asians.	3 Credits
Minimum Required Grade: C-		3-6 Total Credits Required

Women's, Gender and Sexuality Studies

Elizabeth Hubble, Director

Women's, Gender and Sexuality Studies, an interdisciplinary program founded in 1990, encourages the production, discussion, and dissemination of knowledge about women's experiences, oppressions, and achievements in Montana, the U.S., and the world. In the last decade this focus has broadened to include study of the social and cultural construction of gender, sex, and sexualities. By fostering awareness of cultural and international diversity, as well as of the circulations of power mediated by race, class, age, and sexual orientation, Women's, Gender, and Sexuality Studies encourages students to think critically and to envision justice for all peoples.

The Women's, Gender and Sexuality Studies program is administered by the director, with assistance from the program coordinator, in consultation with the Women's, Gender and Sexuality Studies Executive Committee, an interdisciplinary group of faculty and professional associates with teaching, research, and scholarly interests in women, gender and sexuality.

Students may include Women's, Gender and Sexuality Studies in their studies in two ways. They can major in Women's, Gender and Sexuality Studies, or they can complete the Women's, Gender and Sexuality Studies minor. Students may select coursework from a wide variety of courses offered in the humanities, social sciences, natural sciences, law, education and other disciplines. Women's, Gender and Sexuality Studies offers scholarships and sponsors or co-sponsors a variety of events including lectures, discussions, and performances that make a vibrant contribution to both the campus and the Missoula community life.

To be admitted, students must register with the Women's, Gender and Sexuality Studies director, who will explain major or minor requirements and supervise their program.

Back to Top

- WGSS 150X - Women's Rights and Women's Roles Around the World
  Credits: 3. Offered autumn in odd-numbered years. This course offers an interdisciplinary perspective on women's participation in family, community, and political life around the world. This course will use a comparative approach to familiarize students with multiple societies in the Americas, Europe, Africa, Asia, and Australia and examine transnational themes that range across time and place. Guest lectures, field trips, and films will expose students to different approaches to the study of women's lives, work, and activism and to the range of women's activities around the world. In the second part of the course, students will collaborate on further research and design a final project presentation. Course Attributes: Cultural Intl Diversity (X)
- WGSS 163L - Hist/Lit Persp Women
  Credits: 3. Offered autumn. Formerly PHL 151H, LS 119H, WGS 119H, WGGS 163H. This is an introduction to the discipline and scope of Western thought from antiquity to the present focusing on women as the subject rather than men. The objective of the course is to provide an understanding and critical appreciation of seminal texts by and about women through readings, class discussion and written assignments. Course Attributes: Lit & Artistic Studies (L)
- WGSS 250 - Media Representations of Women, Men, and Sexuality
  Credits: 3. Offered autumn in even-numbered years. This course is designed as a survey introduction to a variety of issues related to gender and sexuality in the mass media and pop culture. The goal of the course is to familiarize students with the breadth of these issues while at the same time providing them tools to critically analyze and engage with modern media. The course focuses largely on mass mediated forms such as television, film, music, sports, news, advertising and new media. An underlying understanding within the course is a recognition of the inextricable interconnections between gender, race, ethnicity, class, sexual orientation and so forth. Therefore, the course is invested in exploring the ways in which differences in identity produce different mediated representations and experiences of media. The course is comprised of class discussions based on readings, class presentations, and viewing and interpreting various mediated texts and documentaries. The course readings are both practical and theoretical, and while many of them focus on specific case studies, they are intended to provoke thoughtfulness in each student such that it can be applied to a variety of media.
- WGSS 263S - Women, Men, and Sexuality
  Credits: 3. Offered autumn. Broad overview of gender and women's issues from a social science perspective. Relevant topics related to the sociological and psychological aspects of gender across culture are explored, including masculinity, femininity, violence, reproductive health, cultural diversity in the expression of gender, issues in sexual orientation, and media contributions to these issues. Course Attributes: Social Sciences Course (S)
- WGSS 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- WGSS 294 - Seminar
  Credits: 1 TO 6. (R-6) Offered intermittently. A review and discussion of current research. Topics vary.
- WGSS 363 - Feminist Theory and Methods

Credits: 3. Offered spring. In-depth exposure to feminist views and critique of the ethics and methods of scientific, social, and literary inquiry. Includes exposure to primary sources and current societal and global issues and movements, research finding, and literature exemplifying these methods of inquiry and the gendered dimensions of such inquiry. Course Attributes: Writing Course-Advanced

- WGSS 390 - Undergraduate Research
  Credits: 1 TO 6. (R-6) Offered intermittently. Directed individual research and study appropriate to the back ground and objectives of the student. Course Attributes: Research & Creative Schlrshp
- WGSS 391 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- WGSS 392 - Independent Study
  Credits: 1 TO 12. (R-12) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.
- WGSS 398 - Coop Education/Internship
  Credits: 1 TO 6. R-6) Offered intermittently. Prereq., consent of director. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums
- WGSS 463 - WGS Capstone
  Credits: 2. Offered spring. Capstone course for the Women's and Gender Studies majors and minors.
- WGSS 490 - Undergraduate Research
  Credits: 1 TO 6. (R-6) Offered intermittently. Directed individual research and study appropriate to the back ground and objectives of the student. Course Attributes: Research & Creative Schlrshp
- WGSS 491 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- WGSS 492 - Independent Study
  Credits: 1 TO 9. (R-9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.
- WGSS 595 - Special Topics
  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate Course Attributes: Internships/Practicums
- WGSS 596 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Independent Study
- WGSS 598 - Internship
  Credits: 1 TO 6. (R-6) Offered by special arrangement. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Level: Graduate Course Attributes: Internships/Practicums

Electives

Rule: Additional Elective WGSS Credits (18 credits (11 credits must be UD))

Note: Interdisciplinary courses and courses that appear on the WGSS curriculum list that do not fall within the Humanities and Social Science lists may be substituted with the approval of co-directors.

WGSS Internship/Independent Study (392, 398, 492) courses may count for either the Humanities Core or the Social Science Core, depending on the topic.

List of regularly offered courses that would fulfill the WGSS elective credits (unless indicated, all courses are 3 credits). (These courses are offered, in general, every one, two, or three years. Students are advised to check with the WGSS Office for individual semester course listings.)

Humanities Core

Rule: Must complete 9 credits from the following:

	Course	Credits
	COMX 380 - Gender and Communication Offered yearly. The meaning of gender in our culture. Examines how gender is displayed and perpetuated through social institutions such as the media and through our private and public verbal and nonverbal interactions.	3 Credits
	COMX 447 - Rhetorical Constrctn of Woman Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
	COMX 449 - Rhetoric of Women's Activism Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
	HSTA 370H - Wmn Amer Colonial to Civil War Offered autumn. Interpretive overview of major themes and events in U.S. womens history to 1865. Same as WGS 370H.	3 Credits

	HSTA 371H - Wmn Amer Civil War to Present Offered spring. Interpretive overview of major themes and events in U.S. women's history from 1865 to the present. Same as WGS 371.	3 Credits
	HSTA 385 - Families & Children in America (AM) Historical overview of families and children in the United States from the colonial era to the present. Topics include changing patterns of family life, the evolution of attitudes toward children and youth, the relationship between the American family and the nation-state, and debates over "family values" from the nation's founding to the present.	3 Credits
	LIT 379L - Gender & Sexuality in Eng. Fic Offered alternate years. Same as LSH 327L. Major 20th century novels and short stories written in English in different parts of the world and how these texts explore changing concepts of gender and sexuality.	3 Credits
	LSH 329 - Fathers & Daughters in Lit Prereq., WRIT 101. Examines how relationships between fathers and daughters have been represented, celebrated and critiqued in literature in the Western world, from antiquity to the present. Includes discussion of changing patriarchal formations, symbolic and adoptive fatherhood, incestuous rape, homosexuality and role reversals. Texts include Greek tragedy, Shakespeare, romantic poetry, novel, and graphic novel. Both male and female authors.	3 Credits
	RLST 370 - Mysticism (R-6) An inquiry into the literature and interpretation of mysticism in the major religious traditions. Each offering will focus on a specific tradition or period.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Social Science Core

Rule: Must complete 9 credits from the following:

	Course	Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	BIOL 265 - Human Sexuality Offered autumn. Same as ANTY 227. Biological, behavioral, cross-cultural aspects of human sexuality to help students place their own sexuality and that of others in a broader perspective. Includes sexual anatomy, physiology, development, reproduction, diseases, determination, as well as gender development and current issues.	3 Credits

	COUN 242S - Intimate Relationships Offered autumn and spring semester. This course covers the fascinating, multi-faceted world of intimate relationships and explores the topic from empirical and theoretical perspectives. The examination of intimate relationships in this course will look at the subject through cultural, biological, social and developmental lenses and will explore specific topics such as attraction, communication, friendship, sexuality, love, conflict, power and violence, loss, social cognition, and repairing relationships.	3 Credits
	COUN 485 - Counseling Theories Offered autumn. Prereq., PSYX 100S. Same as PSYX 442 and SW 485. Introduction to the primary theories that constitute the intellectual foundation for common counseling and psychotherapy techniques, with a special focus on gender, interpersonal influence strategies, and diversity issues.	3 Credits
	PSYX 348 - Psychology of Family Violence Offered spring. Prereq., PSYX 100S. Same as WGS 385. Exploration of theoretical explanations for the presence of violence in American families; research and interventions in such areas as child physical and sexual abuse, battering of women, marital rape, spousal homicide, etc.	3 Credits
	S W 323 - Women & Soc Action Amer Offered intermittently. Prereq., one of SW 100, SOCI 101S, or ANTY 101H or consent of instr. Same as WS 323. Focus on women's experiences of and contributions to social change in North, South and Central America in the mid to late-20th century. Through case studies, testimonials, discussions with activists and Internet connections examine social constructions of gender, compare forms of social action in diverse cultural, political and historical contexts, link practice to theories of social participation, and reflect on lessons learned from women's experiences.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 275S - Gender and Society Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits

	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
	WGSS 250 - Media Representations Offered autumn in even-numbered years. This course is designed as a survey introduction to a variety of issues related to gender and sexuality in the mass media and pop culture. The goal of the course is to familiarize students with the breadth of these issues while at the same time providing them tools to critically analyze and engage with modern media. The course focuses largely on mass mediated forms such as television, film, music, sports, news, advertising and new media. An underlying understanding within the course is a recognition of the inextricable interconnections between gender, race, ethnicity, class, sexual orientation and so forth. Therefore, the course is invested in exploring the ways in which differences in identity produce different mediated representations and experiences of media. The course is comprised of class discussions based on readings, class presentations, and viewing and interpreting various mediated texts and documentaries. The course readings are both practical and theoretical, and while many of them focus on specific case studies, they are intended to provoke thoughtfulness in each student such that it can be applied to a variety of media.	3 Credits

College of Humanities and Sciences

Christopher M. Comer, Dean

Jenny McNulty, Associate Dean

S. Melanie Hoell, Director of Advising

Homepage

The College of Humanities and Science is the intellectual core of the University of Montana. We fulfill the central purpose for which the University was chartered in 1893: to provide a liberal education and integrated knowledge of the humanities and the sciences.

A liberal arts education gives students the means to think broadly and test the value of diverse ideas, beliefs and facts. It empowers them to continue the learning process throughout life. By studying the ways of thinking and expression that are characteristic of the humanities and the social and natural sciences, students will be educated citizens. They will be enabled to think critically about scientific methods and findings, social analysis, creativity in the arts and humanities, aesthetics and values. Equally important is effective expression of one's understandings. Clear thinking, cogent expression, and solid values provide the foundation of successful careers.

A particular strength of the College is the breadth of its disciplines and programs. This breadth makes possible a varied and flexible curriculum that advances both general programs and specialized education on the undergraduate and graduate levels. Another strength is the quality of the faculty. Its members have a distinguished record of teaching, research and creation of new knowledge, and service to our communities. Their commitment to undergraduate liberal arts education is demonstrated by the quality of the graduates the College has produced. The pre-professional education received here has enabled University of Montana graduates to compete successfully for admission to graduate schools across the nation. A third strength of the

College is its commitment to students as they pursue their academic studies at the University. This is reflected in close student/faculty relationships and in the continuous attention given by the College to the effect that policies, procedures, and administrative practices have on students' educational experience.

Forensic Anthropology

Bachelor of Arts - Anthropology; Forensic Anthropology Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 36

Required Cumulative GPA: 2.0

Note: For a degree in Anthropology with an option in Forensic Anthropology the student must meet all the general requirements for the major, including the completion of ANTY 310, ANTY 314, and an approved option elective field or laboratory course. Note that in addition to fulfilling option requirements these ANTY courses also fulfill certain major requirements.

Lower Division Core Courses

Rule: Complete all courses

	Course	Credits

	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits
	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits
	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Anthropology or Cognate Electives

Rule: Complete 12 credits.

Note: The student must complete CJUS 125N, either SOCI 211S OR SOCI 221 and 12 elective credits from approved courses in criminology or disciples for which a branch of the forensic sciences exists. The student should work with their advisor to select these elective courses.

Minimum Required Grade: C-

12 Total Credits Required

Upper Division Writing Requirement

Rule: Complete either an upper-division writing course from the approved list in the catalog, or one of the following courses listed below.

	Course	**Credits**
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits

	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea I-Theory and Methods

Rule: Complete 3 credits in Theory and 3 credits in Methods. Students in the Forensic Anthropology Option should satisfy this requirement with ANTY 312, 415, 450, or 456.

Minimum Required Grade: C-

6 Total Credits Required

Anthropological Theory

Rule: Complete one of the following

	Course	Credits
	ANTY 312 - Human Evolution Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.	3 Credits

	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 404 - Anthropological Museology Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.	3 Credits
	ANTY 415 - Emergence Modern Humans Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.	3 Credits
	ANTY 430 - Social Anthropology Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	ANTY 458 - Arch of Hunter-Gatherers Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.	3 Credits
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Anthropological Methods

Rule: Complete one of the following. . Forensic Anthropology Option students should fill this requirement with a course consistent with the Option Elective below.

	Course	**Credits**

	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 412 - Osteology Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.	4 Credits
	ANTY 413 - Forensic and Mortuary Arch Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.	3 Credits
	ANTY 416 - Dental Anthropology Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 454 - Lithic Technology Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	ANTY 466 - Archaeological Survey (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.	1 To 12 Credits

	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	ANTY 495 - Field Experience: (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology.	1 To 12 Credits
	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea II, III, IV

Rule: Complete 6 credits from 2 of 3 Subareas
Minimum Required Grade: C-
6 Total Credits Required

Subarea II: Human Adaptation and Diversity

Rule: Complete one of the following

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 133H - Food and Culture Offered spring. Examination of the ways culture shapes the satisfaction of a biological need; food production, preparation, choices, customs, taste, taboos, beverages, spices and food distribution around the globe.	3 Credits
	ANTY 211N - Anthropological Genetics Offered intermittently. Genetics-related problems that confront individuals and society. Variation and natural selection in human populations. Designed for non-biology majors.	3 Credits

	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 418 - Evol and Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea III: World Societies and Cultures

Rule: Complete one of the following

	Course	**Credits**
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	ANTY 241H - Central Asian Culture and Civ Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits

	ANTY 251H - Foundations of Civilization Offered intermittently. Focus on the worldwide evolution of human society from Stone Age hunter-gatherers to the beginnings of modern civilization. Approached through the colorful and exciting world of archaeologists and the sites they excavate.	3 Credits
	ANTY 254H - Arch Wonders of the World Offered spring even numbered years. This course highlights the classical civilizations of the ancient world, fields such as Egyptology and Classical Archaeology, and the major archaeological discoveries which are associated with them.	3 Credits
	ANTY 323 - Native People of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 351H - Archaeology of North America Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures.	3 Credits
	ANTY 352X - Archaeology of Montana Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions.	3 Credits
	ANTY 353 - PaleoIndian Archaeology Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?	3 Credits
	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits
	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
	ANTY 444 - Artistic Tradtns Central Asia Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits

	ANTY 457 - Arch of the Pacific Northwest Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.	3 Credits
	ANTY 459 - Archof the Arctic/Subarctic Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.	3 Credits
	ANTY 465 - Arch of the SW United States Offered autumn even-numbered years. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea IV: Concepts and Issues

Rule: Complete one of the following

	Course	Credits
	ANTY 216 - Primates in Peril Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits

	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	ANTY 440 - Contemporary Issues of SE Asia Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Forensic Anthropology Option

Rule: Must complete the following subcategories

15-16 Total Credits Required

Option Requirements

Rule: Complete the following courses

	Course	Credits
	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Option Electives

Rule: A 400-level course with a lab or field component in physical anthropology, archaeology, non-human osteology, geographic information systems (GIS), subsurface imaging, chemical analysis, genetic/evolutionary analysis, or multivariate statistics. Minimum grade C-.

Anthropology Department

Tully J. Thibeau, Chair

Anthropology is the study of people, both ancient and contemporary, in their biological, archaeological, cultural, and linguistic context. Anthropology uses a holistic approach to integrate findings from the social sciences, natural sciences, and humanities. The primary educational mission of the Department of Anthropology is teaching, research, and professional service in order to impart the critical importance of understanding the human condition and its relevance to an increasingly diverse world. To accomplish this task, the Department of Anthropology provides a curriculum that will help students understand and appreciate the range of human cultures as well as the significance of biological evolution of the human condition. Through our undergraduate and graduate programs, students not only achieve a broad cross-cultural education but also prepare to apply their anthropological knowledge in their chosen career paths. A minor, Bachelor of Arts, Master of Arts, and Doctor of Philosophy degrees are offered in Anthropology, with options or specializations available at every level. For undergraduates, the B.A. can include an option in Archaeology, Cultural and Ethnic Diversity, Forensic Anthropology, Linguistics, Medical Anthropology - or a general degree crafted to the interests of the student. Parallel missions to promote the study of human diversity and experience are advanced by the Linguistics Program, which is also housed in the Department. Additional offerings include certificates in Forensic Science and Historic Preservation; these certificates are interdisciplinary by nature, but are administered within the Anthropology Department.

Department Faculty

Professors

Gregory Campbell, Professor
Kelly Dixon, Professor
John Douglas, Professor
S. Neyooxet Greymorning, Professor
Ardeshir Kia, Associate Director, Central and Southwest Asia Program

Douglas MacDonald, Professor & Graduate Program Coordinator
Kimber Haddix McKay, Professor
Mizuki Miyashita, Professor, Linguistics Program Director
Anna Prentiss, Professor
Gilbert Quintero, Professor
Randall Skelton, Professor

Ashley Kendell, Visiting Assistant Professor
Meradeth Snow, Assistant Professor

Lecturers

D. Garry Kerr, Adjunct Instructor
Richard Sattler, Adjunct/Lecturer

Emeritus Professors

Thomas A. Foor, Professor Emeritus

Anthropology

Back to Top

- ANTY 101H - Anthro & the Human Experience
  Credits: 3. Offered autumn and spring. Offered intermittently in summer. A survey of anthropology which introduces the fundamental concepts, methods and perspectives of the field. The description and analysis of human culture, its growth and change. The nature and functions of social institutions. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- ANTY 102H - Intro to South & S. East Asia
  Credits: 3. Offered intermittently. An introduction to South and Southeast Asian regions, cultures, societies, and histories, with particular emphasis on artistic, religious and literary traditions from prehistory to the present. Countries include India, Indonesia, Vietnam, Thailand, Sri Lanka, Pakistan and Nepal. An overview approach with different materials and emphases. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- ANTY 103H - Intro Latin American Studies
  Credits: 3. Offered intermittently. Multidisciplinary survey and introduction to Latin America from pre- Columbian times to the present. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- ANTY 104 - Ancient Migrations
  Credits: 3. Offered intermittently. An exploration of migrations in human prehistory and history as known from DNA studies, the archaeological record, historical linguistics, the human fossil record and history. How these migrations have impacted the culture, institutions, and biology of contemporary societies and populations.
- ANTY 122S - Race and Minorities
  Credits: 3. Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups. Course Attributes: Social Sciences Course (S) Democracy and Citizenship (Y)
- ANTY 133X - Food and Culture

Credits: 3. Offered spring. Examination of the ways culture shapes the satisfaction of a biological need; food production, preparation, choices, customs, taste, taboos, beverages, spices and food distribution around the globe. Course Attributes: Cultural Intl Diversity (X)

- ANTY 141H - The Silk Road

  Credits: 3. Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)

- ANTY 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ANTY 198 - Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, and 498) may count toward graduation. Course Attributes: Internships/Practicums

- ANTY 210N - Intro to Physical Anthropology

  Credits: 3. Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation. Course Attributes: Natural Science Course (N)

- ANTY 211N - Anthropological Genetics

  Credits: 3. Offered intermittently. Genetics-related problems that confront individuals and society. Variation and natural selection in human populations. Designed for non-biology majors. Course Attributes: Natural Science Course (N)

- ANTY 213N - Physical Anthropology Lab

  Credits: 1. Prereq., or coreq., ANTY 210N. Offered autumn and spring. This lab course allows students to more deeply explore the concepts and materials covered in Introduction to Physical Anthropology. Students will engage in lab based activities involving human genetics and processes of evolution, biology and behavior of non-human primates, human evolution, and modern human adaptation and variation. Course Attributes: Natural Science Lab Course (N)
  Natural Science Course (N)

- ANTY 216 - Primates in Peril

  Credits: 3. Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.

- ANTY 220S - Culture & Society

  Credits: 3. Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices. Course Attributes: Social Sciences Course (S) Cultural Intl Diversity (X)

- ANTY 241H - Central Asian Culture and Civ

  Credits: 3. Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)

- ANTY 250S - Intro to Archaeology

  Credits: 3. Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies. Course Attributes: Social Sciences Course (S)

- ANTY 251H - Foundations of Civilization

  Credits: 3. Offered intermittently. Focus on the worldwide evolution of human society from Stone Age hunter-gatherers to the beginnings of modern civilization. Approached through the colorful and exciting world of archaeologists and the sites they excavate. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)

- ANTY 254H - Arch Wonders of the World

Credits: 3. Offered spring even numbered years. This course highlights the classical civilizations of the ancient world, fields such as Egyptology and Classical Archaeology, and the major archaeological discoveries which are associated with them. Course Attributes: Hist & Cultural Studies (H) Writing Course-Intermediate Cultural Intl Diversity (X)

- ANTY 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings relating to current problems or new developments in the discipline.

- ANTY 310 - Human Variation

  Credits: 3. Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features. Course Attributes: Writing Course-Intermediate

- ANTY 312 - Human Evolution

  Credits: 3. Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.

- ANTY 314 - Principles of Forensic Anthro

  Credits: 3. Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.

- ANTY 318 - Casting & Facial Approximation

  Credits: 3. Offered spring. Prereq., ANTY 314 and consent of instr. An exploration of techniques for conservation and replication of skeletal elements, facial reconstruction, and other techniques for identification of individuals from their skeletal remains.

- ANTY 323 - Native People of Montana

  Credits: 3. Offered spring. The history and culture of the Indian tribes in Montana.

- ANTY 323X - Native Peoples of Montana

  Credits: 3. Offered spring. The history and culture of the Indian tribes in Montana. Course Attributes: Cultural Intl Diversity (X)

- ANTY 326E - Indigenous Peoples & Globl Dev

  Credits: 3. Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world. Course Attributes: Ethical & Human Values Course Cultural Intl Diversity (X)

- ANTY 330X - Peoples and Cultures of World

  Credits: 3. (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures. Course Attributes: Cultural Intl Diversity (X)

- ANTY 333 - Culture and Population

  Credits: 3. Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.

- ANTY 336 - Myth, Ritual and Religion

  Credits: 3. Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.

- ANTY 347 - Central Asia and Its Neighbors

  Credits: 3. Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.

- ANTY 349 - Social Change in NnWstrn Socts

  Credits: 3. Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.

- ANTY 351H - Archaeology of North America

  Credits: 3. Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)

- ANTY 352X - Archaeology of Montana

  Credits: 3. Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions. Course Attributes: Cultural Intl Diversity (X)

- ANTY 353 - PaleoIndian Archaeology

  Credits: 3. Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?

- ANTY 354H - Mesoamerican Prehistory

  Credits: 3. Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures. Course Attributes: Hist & Cultural Studies (H)

- ANTY 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ANTY 398 - Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., 9 credits in anthropology; consent of faculty supervisor and cooperative education officer. Practical application of classroom learning through internship in a number of areas such as museology, cultural resource management, and forensics. A maximum of 6 credits of Internship (198, 298, 398, and 498) may count toward graduation. Course Attributes: Internships/Practicums

- ANTY 400 - History of Anthropology

  Credits: 3. Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.

- ANTY 401 - Anthropological Data Analysis

  Credits: 3. Offered autumn. Prereq., M 104, M 105, M 115, M 121, M 122, M 135, M 151 or consent of instr. An analysis of the foundations of anthropological scaling and measurement.

- ANTY 402 - Quan Ethnographic Field Methds

  Credits: 3. Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats. Course Attributes: Writing Course-Advanced

- ANTY 403E - Ethics and Anthropology

  Credits: 3. Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology. Course Attributes: Ethical & Human Values Course

- ANTY 404 - Anthropological Museology

  Credits: 3. Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.

- ANTY 408 - Advanced Anthro Statistics

  Credits: 3. Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis. Course Attributes: Writing Course-Advanced

- ANTY 409 - Preceptorship in Anthropology

  Credits: 1 TO 3. (R-6) Offered autumn and spring. Prereq., ANTY 210N, 220S, 250S and consent of instr. Assisting a faculty member by tutoring, grading objective exams, conducting review sessions,

and carrying out other class-related responsibilities. Open to juniors, senior, and graduate students with consent of the faculty member with whom they serve. Proposals must be approved by department chair.

- ANTY 412 - Osteology

  Credits: 4. Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.

- ANTY 413 - Forensic and Mortuary Arch

  Credits: 3. Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.

- ANTY 415 - Emergence Modern Humans

  Credits: 3. Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.

- ANTY 416 - Dental Anthropology

  Credits: 3. Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.

- ANTY 418 - Evol and Genet Var Human Pops

  Credits: 3. Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.

- ANTY 422 - Mind, Culture and Society

  Credits: 3. Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.

- ANTY 423 - Culture and Identity

  Credits: 3. Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.

- ANTY 426 - Culture, Health and Healing

  Credits: 3. Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.

- ANTY 427 - Anthropology of Gender

  Credits: 3. Offered spring. Comparative study of the history and significance of gender in social life.

- ANTY 430 - Social Anthropology

  Credits: 3. Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography. Course Attributes: Writing Course-Advanced

- ANTY 431 - Ethnographic Field Methods

  Credits: 3. Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.

- ANTY 432 - Med Anth Global Health

  Credits: 2. Offered intermittently. The course is designed to enhance student understanding of ‘global health’ from the perspective of medical anthropologists and clinicians involved in health care delivery in many settings in the developing world. Students will read broadly in medical anthropology, and will hear the real-life perspectives of health development program designers, project managers, and clinicians.

- ANTY 433 - Indig Global Health & Healing

Credits: 3. Offered spring even-numbered years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.

- ANTY 435 - Drugs, Culture and Society

  Credits: 3. Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.

- ANTY 440 - Cont. Issues of SSEA

  Credits: 3. Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.

- ANTY 442 - Cities/Landscapes Central Asia

  Credits: 3. Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.

- ANTY 444 - Artistic Tradtns Central Asia

  Credits: 3. Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.

- ANTY 450 - Archaeological Theory

  Credits: 3. Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology. Course Attributes: Writing Course-Advanced

- ANTY 451 - Cultural Resource Management

  Credits: 3. Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.

- ANTY 452 - GIS in Archaeology

  Credits: 3. Offered intermittently. Prereq., ANTY 250s. Anthropological and archaeological data acquisition, management, and analysis using Geographic Information Systems (GIS) tools and techniques.

- ANTY 454 - Lithic Technology

  Credits: 3. Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.

- ANTY 455 - Artifact Analysis

  Credits: 3. Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives. Course Attributes: Writing Course-Advanced

- ANTY 456 - Historical Archaeology

  Credits: 3. Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.

- ANTY 457 - Arch of the Pacific Northwest

  Credits: 3. Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.

- ANTY 458 - Arch of Hunter-Gatherers

  Credits: 3. Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.

- ANTY 459 - Archof the Arctic/Subarctic

  Credits: 3. Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern

Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.

- ANTY 465 - Arch of the SW United States

  Credits: 3. Offered autumn even-numbered years. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.

- ANTY 466 - Archaeological Survey

  Credits: 1 TO 12. (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.

- ANTY 467 - Archaeological Field School

  Credits: 3 TO 12. (R-12) Offered summer. Prereq., ANTY 250S and consent of instructor. Provides students with a well-rounded experience in archaeological field methods. Field schools will typically occur at archaeological site locations away from campus. During the archaeological field experience, students may learn methods of excavation, survey, research, and analysis to facilitate their transition to careers as professional archaeologists.

- ANTY 476 - Methods for Native Languages

  Credits: 3. (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.

- ANTY 491 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ANTY 492 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- ANTY 494 - Seminar/Workshop

  Credits: 3. Offered spring even-numbered years. Advanced analysis of historical and contemporary issues involving human communities, cultures, and economies of a particular region, and that region’s role in the world.

- ANTY 495 - Field Experience:

  Credits: 1 TO 12. (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology. Course Attributes: Internships/Practicums

- ANTY 500 - Cont Anthro Thought

  Credits: 3. Offered autumn. Prereq., graduate standing or consent of instructor. A review of major contributions to current anthropological theory, with an emphasis on the application of theory to anthropological problems. Significant advances in general theory, symbolic anthropology, critical theory, cultural studies, and postmodernism. Level: Graduate

- ANTY 501 - Historical Anthropology

  Credits: 3. Offered spring even numbered years. The location, use, and value of written records in anthropological research. Level: Graduate

- ANTY 510 - Sem Human Var & Evol

  Credits: 3. (R-6) Offered autumn. Prereq., ANTY 515. Various topics related to genetic evidence of human biological evolution, morphological and genetic diversity of modern humans, and problems of "race". Level: Graduate

- ANTY 512 - Adv Forensic Anthropology

  Credits: 3. (R-6) Offered spring. Prereq., ANTY 515 and consent of instr. Review of traditional methods and exploration of new methods of skeletal analysis, as applied to cases from the forensic collection. Level: Graduate

- ANTY 513 - Sem Bioarch & Skel Biol

  Credits: 3. (R-6) Offered spring. Prereq., ANTY 515 or consent of instructor. Theoretical and methodological approaches to the analysis of human skeletal remains derived from archaeological contexts. Demography, health and disease, diet and nutrition, growth, activity patterns, and measures of biological relatedness are interpreted within a biocultural framework. Level: Graduate

- ANTY 514 - Sem Paleoanth & Evol Analy

  Credits: 3. (R-6) Offered intermittently. Prereq., ANTY 515 or consent of instructor. Exploration of selected aspects of the human fossil, archaeological, & genetic records and the theories and methods of evolutionary analysis used to analyze them. Level: Graduate

- ANTY 515 - Theor & Meth in Bioanth

  Credits: 3. Offered autumn. A detailed review of the body of theory that is foundational for the study of human evolution, human variation, bioarchaeology, forensic anthropology, and primatology, along with a consideration of major methods used to analyze data in these fields. Level: Graduate

- ANTY 520 - Contemporary Ethnography

  Credits: 3. Offered autumn. A review and discussion of current ethnographic research. Level: Graduate

- ANTY 521 - Applied Anthropology

  Credits: 3. Offered spring odd-numbered years. Study of ways in which anthropological skills may be used in non-academic fields. Level: Graduate

- ANTY 522 - Medical Anthropology

  Credits: 3. Offered intermittently. An examination of selected issues and trends in contemporary theory and methodology within medical anthropology. Seminar assignments and discussions focus on understanding the application of anthropological concepts and methods in medical settings and are organized around several topics, including cultural conceptualizations of health, illness and risk; global health; the social and cultural construction of illness; drug and pharmaceutical use; and mental health in cultural context. Level: Graduate

- ANTY 550 - Seminar in Archaeology

  Credits: 3. Offered autumn odd-numbered years. A review and discussion of current research. Topics vary. Level: Graduate

- ANTY 551 - Sem Historical Archaeology

  Credits: 3. Offered autumn odd-numbered years. An exploration of theories, methods, and literature in historical archaeology. Level: Graduate

- ANTY 553 - Evolutionary Archaeology

  Credits: 3. Offered autumn even-numbered years. Examination of method and theory in Darwinian evolutionary archaeology. Seminar assignments and discussions focus on human behavioral ecology, cultural transmission, and macroevolution. Level: Graduate

- ANTY 593 - Professional Project

  Credits: 1 TO 10. (R-10) Offered every term. Prereq., consent of instr. Preparation of a professional paper appropriate to the needs and objectives of the individual student. Level: Graduate

- ANTY 595 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
  Course Attributes: Internships/Practicums

- ANTY 596 - Independent Study

  Credits: 1 TO 9. (R-9) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Independent Study

- ANTY 597 - Research

  Credits: 1 TO 10. (R-10) Offered every term. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student. Level: Graduate

- ANTY 598 - Internship

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., graduate standing and consent of faculty supervisor. Practical application of classroom learning through internship in a number of areas such as museology, cultural resource management and forensics. Written reports are required. Level: Graduate Course Attributes: Internships/Practicums

- ANTY 599 - Thesis

Credits: 1 TO 10. (R-10) Offered every term. Prereq., consent of instr. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate

- ANTY 600 - Issues Cultural Herit

  Credits: 3. Offered autumn. Prereq., consent of instr. Doctoral dissertation research activties.A review of the range of topics that fall under the umbrella of cultural heritage and a review of theory and practice in one or more of these topics. Level: Graduate

- ANTY 601 - Resrch Design & Proposal Prep

  Credits: 3. Offered spring. Prereq., graduate standing. Seminar in the development of anthropological research designs and proposals. Level: Graduate

- ANTY 602 - Cultl Herit Policy & Pract

  Credits: 3. Offered spring odd-numbered years. Prereq., graduate standing. Exploration of critical issues in cultural heritage policy emphasizing the regulatory basis for federal CRM, public anthropology, and indigenous people's issues. Hands-on training in the design and production of federal planning documents. Level: Graduate

- ANTY 694 - Seminar Cultural Heritage

  Credits: 1 TO 6. (R-6) Offered intermittently. A review and discussion of current research. Topics vary. Level: Graduate

- ANTY 697 - Advanced Research

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Independent research projects, other than dissertation. Level: Graduate

- ANTY 699 - Dissertation

  Credits: 1 TO 10. (R-10) Offered every term. Doctoral dissertation research activities. Level: Graduate

Criminal Justice

Back to Top

- CJUS 125N - Fund of Forensic Science

  Credits: 3. Offered autumn and online spring. A survey of the forensic sciences and related disciplines and their use in criminal investigations, the role of forensic scientists in the investigative process and as expert witnesses. Course Attributes: Natural Science Course (N)

- CJUS 488 - For Sci Crime Lab & Beyond

  Credits: 3. Offered spring and online in autumn. Examination of the forensic sciences with emphases on the non-crime lab forensic sciences, new technologies, and new directions in the forensic sciences.

English as a Second Language

Back to Top

- EASL 195 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- EASL 250 - Interm Eng Acad Purpose I

  Credits: 3. Offered autumn and spring. Prereq., 525 to 549 on the Paper-Based TOEFL or equivalent. Concentration on academic tasks prompting comprehension of evidence offered to support opinion; gathering facts to be stated in narrative/descriptive patterns is emphasized as distinct from practicing summary exposition. This course is highly recommended to all international students with TOEFL scores between 525 and 549. Student Option Grade Mode (traditional or credit/no credit).

- EASL 251 - Inter Eng Acad Purposes II

  Credits: 3. Offered autumn and spring. Prereq., 525 to 549 on the Paper-Based TOEFL or equivalent. Concentration on academic tasks guiding identification of main ideas underlying formal speech (broadcasts, lectures, interviews); recognition of intent of discussion and status of

detail therein bearing on readings is emphasized. This course is highly recommended to all international students with TOEFL scores between 525 and 549. Student Option Grade Mode (traditional or credit/no credit).

- EASL 450 - Adv Eng Acad Purposes I

  Credits: 3. Offered autumn and spring. Prereq., 550 to 574 on the Paper-Based TOEFL or equivalent. Concentration on academic tasks prompting the collection and comprehension of evidence used to draw inferences regarding debatable issues; explanation of connection between evidence and inference is emphasized. This course is highly recommended to all international students with TOEFL scores between 550 and 574. Student Option Grade Mode (traditional or credit/no credit).

- EASL 451 - Adv Eng Acad Purposes II

  Credits: 3. Offered autumn and spring. Prereq., 550 to 574 on the Paper-Based TOEFL or equivalent. Concentration on academic tasks obliging comprehension of main ideas/details furnished in spoken media (broadcasts, lectures, discussions); detection of intended message and essential facts related to readings is emphasized.This course is highly recommended to all international students with TOEFL scores between 550 and 574. Student Option Grade Mode (traditional or credit/no credit).

Historic Preservation

Back to Top

- HPRV 400 - Historic Preservation

  Credits: 3. Offered spring even-numbered years. This course is intended to provide a comprehensive foundation to historic preservation practice and issues.Topics include the history and theory of the American historic preservation movement, identification and documentation of historic properties, preservation technology, strategies for conservation of historic resources and a critical examination of the philosophy and principles of preservation.

Linguistics

Back to Top

- LING 191 - Special Topics

  Credits: 1 TO 6. (R–6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- LING 198 - Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- LING 270S - Introduction to Linguistics

  Credits: 3. Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning. Course Attributes: Social Sciences Course (S)

- LING 375X - Endangered Languages

  Credits: 3. Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages. Course Attributes: Cultural Intl Diversity (X)

- LING 391 - Special Topics

  Credits: 1 TO 9. (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- LING 398 - Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services

office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- LING 465 - Structure & History of English

  Credits: 3. Offered once per year. The development of the English language from a historical perspective contrasted with the phonological and grammatical structure of English from a modern linguistic point of view; specifically designed for teachers.

- LING 470 - Linguistic Analysis

  Credits: 3. Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).

- LING 471 - Phonetics and Phonology

  Credits: 3. Offered autumn. Prereq., LING 470. A study of phonetic and phonological systems from as many as 20 languages, most of them non–Indo–European; training in how to do linguistic analysis as well as linguistic theory. This course co-convenes with LING 571. Course Attributes: Co-Convened Course

- LING 472 - Generative Syntax

  Credits: 3. Offered autumn. Prereq., LING 470. A study of the human language sentence–formation system, the means for expressing semantic information as propositional content. Emphasis on the abstraction of utterances in the form of mathematical objects. This course co-convenes with LING 572. Course Attributes: Co-Convened Course

- LING 473 - Language and Culture

  Credits: 3. Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573. Course Attributes: Co-Convened Course Writing Course-Advanced

- LING 474 - Historical Linguistics

  Credits: 3. Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574. Course Attributes: Co-Convened Course

- LING 475 - Linguistic Field Methods

  Credits: 3. Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575. Course Attributes: Co-Convened Course

- LING 477 - Bilingualism

  Credits: 3. Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.

- LING 478 - Learner Language

  Credits: 3. Offered spring. Prereq., LING 270S or equivalent. Observing/describing language learners' behaviors and, to a degree, advances toward proficiency (i.e., fluency plus accuracy); the presence of error as conditioned by a priori knowledge of language and implications for child and adult development; and applying typical methods of linguistic analysis to the (non-) systematic variants in language form characterizing developmental processes as a way of trying to explain variable behavior.

- LING 480 - Tchg Engl as For Lang

  Credits: 3. Offered autumn online. Prereq., LING 270 or equiv. Same as ENLI 480. The application of principles of modern linguistics to the problems of teaching English as a foreign language.

- LING 484 - NA Indigenous Lang & Ling

  Credits: 3. Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584. Course Attributes: Co-Convened Course Writing Course-Advanced

- LING 489 - Morphology

  Credits: 3. Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589. Course Attributes: Co-Convened Course

- LING 491 - Special Topics

  Credits: 1 TO 6. (R–6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- LING 492 - Independent Study

  Credits: 1 TO 9. (R–9) Offered intermittently. Prereq., consent of instr. Special projects in linguistic analysis.

- LING 494 - Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., LING 270 or LING 470. A review and discussion of advanced topics covering descriptive linguistics, linguistic theory and subjects related to the analysis of human languages.

- LING 495 - ESL Practicum

  Credits: 1 TO 3. Offered autumn and spring. Prereq., or coreq., LING 480. Offered every term. Students with a teaching major take the course for 3 credits; others take it for 1 credit and do one third of the work.

- LING 498 - Internship

  Credits: 1 TO 6. Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- LING 559 - Preceptorship

  Credits: 1. (R–4) Offered autumn and spring. Prereq., consent of instr. Materials development, assessment and evaluation of learners' needs and interests in teaching English as an academic second Language to international students attending universities with English instruction. Level: Graduate

- LING 570 - Seminar in Linguistics

  Credits: 3. (R–12) Offered autumn and spring. Advanced topics in linguistic analysis. Level: Graduate

- LING 571 - Phonetics and Phonology

  Credits: 3. Offered autumn. A study of phonetic and phonological systems from as many as 20 languages, most of them non–Indo–European; training in how to do linguistic analysis as well as linguistic theory. This course co-convenes with LING 471. Graduate students taking LING 571 will complete additional requirements and their work will be of a more advanced nature. Level: Graduate Course Attributes: Co-Convened Course

- LING 572 - Generative Syntax

  Credits: 3. Offered autumn. Prereq., LING 470 or equivalent.An investigation of human language sentence–formation systems, construed as functions (combinatorial computations) mapping utterances (physical sounds) to propositions (mental meanings). Emphasis on abstracting away from observable cross-linguistic data in favor of underlying formal (i.e., computational) structures. This course is co-convened with LING 472. Level: Graduate Course Attributes: Co-Convened Course

- LING 573 - Language and Culture

  Credits: 3. Offered spring. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 473. Graduate students will complete additional requirements and their work will be of a more advanced nature. Level: Graduate Course Attributes: Co-Convened Course

- LING 574 - Historical Linguistics

  Credits: 3. Offered spring even-numbered years. An introduction to the study of language change over time. Topics include:methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of

historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 474. Graduate students will complete additional requirements and their work will be of a more advanced nature. Level: Graduate Course Attributes: Co-Convened Course

- LING 575 - Linguistic Field Methods

  Credits: 3. Offered spring odd-numbered years. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This courses co-convenes with LING 475. Graduate students will complete additional requirements and their work will be of a more advanced nature. Level: Graduate Course Attributes: Co-Convened Course

- LING 584 - NA Indigenous Lang and Ling

  Credits: 3. Offered autumn odd-numbered years. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 484. Graduate students will complete additional requirements and their work will be of a more advanced nature. Level: Graduate Course Attributes: Co-Convened Course

- LING 589 - Morphology

  Credits: 3. Offered spring. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 489. Graduate students taking LING 589 will complete additional requirements and their work will be of a more advanced nature. Level: Graduate Course Attributes: Co-Convened Course

- LING 595 - Special Topics

  Credits: 1 TO 9. (R–9) Offered intermittenly. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics. Level: Graduate Course Attributes: Internships/Practicums

- LING 596 - Independent Study

  Credits: 1 TO 3. (R–6) Offered intermittenly. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Service Learning/Volunteer

- LING 598 - Internship

  Credits: 1 TO 6. (R–6) Offered intermittenly. Extended classroom experience which provides practical application of classroom learning during placements off campus. Level: Graduate Course Attributes: Internships/Practicums

- LING 599 - Professional Paper

  Credits: 1 TO 6. (R–6) Offered intermittenly. Preparation of a professional paper appropriate to the needs and objectives of the indiviumdual student. Level: Graduate

- LING 699 - Thesis

  Credits: 1 TO 6. (R–6) Offered autumn and spring. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate

Archaeology

Bachelor of Arts - Anthropology; Archaeology Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 36

Required Cumulative GPA: 2.0

Note: For a degree in Anthropology with an option in Archeology, student must complete all the general major requirements, including a total of nine credits of Archeology Option core requirements. Note that in addition to fulfilling option requirements these ANTY courses also fulfill certain major requirements.

Lower Division Core Courses

Rule: Complete all courses

	Course	Credits
	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits
	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits
	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Anthropology or Cognate Electives

Rule: Complete 12 credits.

Note: The student must complete six credits from one of the following allied disciplines (Biology, Geography, Geology) and six credits from one of the following allied disciplines(Computer Science, Environmental Studies, Forestry, History, Mathematical Sciences, or Native American Studies.

Minimum Required Grade: C

12 Total Credits Required

Upper Division Writing Requirement

Rule: Complete either an upper-division writing course from approved list in catalog, or one of the following courses listed below.

	Course	Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits

	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea I-Theory and Methods

Rule: Complete 3 credits in Theory and 3 credits in Methods
Minimum Required Grade: C
6 Total Credits Required

Anthropological Theory

Rule: Complete one of the following

	Course	Credits
	ANTY 312 - Human Evolution Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 404 - Anthropological Museology Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.	3 Credits
	ANTY 415 - Emergence Modern Humans Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.	3 Credits
	ANTY 430 - Social Anthropology Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	ANTY 458 - Arch of Hunter-Gatherers Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.	3 Credits
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Anthropological Methods

Rule: Complete one of the following

	Course	Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 412 - Osteology Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.	4 Credits
	ANTY 413 - Forensic and Mortuary Arch Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.	3 Credits
	ANTY 416 - Dental Anthropology Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 454 - Lithic Technology Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.	3 Credits

	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	ANTY 466 - Archaeological Survey (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.	1 To 12 Credits
	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	ANTY 495 - Field Experience: (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology.	1 To 12 Credits
	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subarea II, III, IV

Rule: Complete 6 credits from 2 of 3 Subareas
Minimum Required Grade: C
6 Total Credits Required

Subarea II: Human Adaptation and Diversity

Rule: Complete one of the following

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits

	ANTY 133H - Food and Culture Offered spring. Examination of the ways culture shapes the satisfaction of a biological need; food production, preparation, choices, customs, taste, taboos, beverages, spices and food distribution around the globe.	3 Credits
	ANTY 211N - Anthropological Genetics Offered intermittently. Genetics-related problems that confront individuals and society. Variation and natural selection in human populations. Designed for non-biology majors.	3 Credits
	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 418 - Evol and Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subarea III: World Societies and Cultures

Rule: Complete one of the following

	Course	**Credits**

	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	ANTY 241H - Central Asian Culture and Civ Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits
	ANTY 251H - Foundations of Civilization Offered intermittently. Focus on the worldwide evolution of human society from Stone Age hunter-gatherers to the beginnings of modern civilization. Approached through the colorful and exciting world of archaeologists and the sites they excavate.	3 Credits
	ANTY 254H - Arch Wonders of the World Offered spring even numbered years. This course highlights the classical civilizations of the ancient world, fields such as Egyptology and Classical Archaeology, and the major archaeological discoveries which are associated with them.	3 Credits
	ANTY 323 - Native People of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 351H - Archaeology of North America Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures.	3 Credits
	ANTY 352X - Archaeology of Montana Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions.	3 Credits
	ANTY 353 - PaleoIndian Archaeology Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?	3 Credits
	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits

	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
	ANTY 444 - Artistic Tradtns Central Asia Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits
	ANTY 457 - Arch of the Pacific Northwest Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.	3 Credits
	ANTY 459 - Archof the Arctic/Subarctic Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.	3 Credits
	ANTY 465 - Arch of the SW United States Offered autumn even-numbered years. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subarea IV: Concepts and Issues

Rule: Complete one of the following

	Course	**Credits**
	ANTY 216 - Primates in Peril Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits

	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	ANTY 440 - Contemporary Issues of SE Asia Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits

	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Archeology Core Courses

Cultural and Ethnic Diversity

Bachelor of Arts - Anthropology; Cultural and Ethnic Diversity Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 36

Required Cumulative GPA: 2.0

Note: For a degree in Anthropology with an option in Cultural and Ethnic Diversity, the student must meet all the general requirements for the major, including the four required courses for this option (ANTY 122S, ANTY 310, ANTY 423, and ANTY 330X). Note that in addition to fulfilling option requirements these ANTY courses also fulfill certain major requirements.

Lower Division Core Courses

Rule: Complete all courses

	Course	**Credits**
	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits
	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits

	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Anthropology or Cognate Electives

Rule: Complete 12 credits.

Note: The student must complete six credits, with adviser approval, in one of the following disciplines (Anthropology, History, or Sociology), and six upper-division credits in one of the following allied disciplines (African-American Studies, Central and Southwest Asian Studies, East Asian Studies, Latin American Studies, Native American Studies, or Women's and Gender Studies).

Minimum Required Grade: C

12 Total Credits Required

Upper Division Writing Requirement

Rule: Complete either an upper-division writing course from approved list in catalog, or one of the following courses listed below.

	Course	**Credits**
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits

	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea I-Theory and Methods

Rule: Complete 3 credits in Theory and 3 credits in Methods
Minimum Required Grade: C
6 Total Credits Required

Anthropological Theory

Rule: Complete one of the following

	Course	Credits
	ANTY 312 - Human Evolution Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits

	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 404 - Anthropological Museology Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.	3 Credits
	ANTY 415 - Emergence Modern Humans Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.	3 Credits
	ANTY 430 - Social Anthropology Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	ANTY 458 - Arch of Hunter-Gatherers Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.	3 Credits
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Anthropological Methods

Rule: Complete one of the following

	Course	**Credits**

	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 412 - Osteology Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.	4 Credits
	ANTY 413 - Forensic and Mortuary Arch Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.	3 Credits
	ANTY 416 - Dental Anthropology Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 454 - Lithic Technology Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	ANTY 466 - Archaeological Survey (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.	1 To 12 Credits

	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	ANTY 495 - Field Experience: (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology.	1 To 12 Credits
	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subarea II, III, IV

Rule: Complete 6 credits from 2 of 3 Subareas
Minimum Required Grade: C
6 Total Credits Required

Subarea II: Human Adaptation and Diversity

Rule: Complete one of the following

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 133H - Food and Culture Offered spring. Examination of the ways culture shapes the satisfaction of a biological need; food production, preparation, choices, customs, taste, taboos, beverages, spices and food distribution around the globe.	3 Credits
	ANTY 211N - Anthropological Genetics Offered intermittently. Genetics-related problems that confront individuals and society. Variation and natural selection in human populations. Designed for non-biology majors.	3 Credits

	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 418 - Evol and Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subarea III: World Societies and Cultures

Rule: Complete one of the following

	Course	Credits
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	ANTY 241H - Central Asian Culture and Civ Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits

	ANTY 251H - Foundations of Civilization Offered intermittently. Focus on the worldwide evolution of human society from Stone Age hunter-gatherers to the beginnings of modern civilization. Approached through the colorful and exciting world of archaeologists and the sites they excavate.	3 Credits
	ANTY 254H - Arch Wonders of the World Offered spring even numbered years. This course highlights the classical civilizations of the ancient world, fields such as Egyptology and Classical Archaeology, and the major archaeological discoveries which are associated with them.	3 Credits
	ANTY 323 - Native People of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 351H - Archaeology of North America Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures.	3 Credits
	ANTY 352X - Archaeology of Montana Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions.	3 Credits
	ANTY 353 - PaleoIndian Archaeology Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?	3 Credits
	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits
	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
	ANTY 444 - Artistic Tradtns Central Asia Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits

	ANTY 457 - Arch of the Pacific Northwest Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.	3 Credits
	ANTY 459 - Archof the Arctic/Subarctic Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.	3 Credits
	ANTY 465 - Arch of the SW United States Offered autumn even-numbered years. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subarea IV: Concepts and Issues

Rule: Complete one of the following

	Course	Credits
	ANTY 216 - Primates in Peril Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits

	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	ANTY 440 - Contemporary Issues of SE Asia Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Culutural and Ethnic Diversity Option Requirements

Rule: Complete all courses

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits

Linguistics

Bachelor of Arts - Anthropology; Linguistics Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 39

Required Cumulative GPA: 2.0

Note: For a degree in Anthropology with an option in Linguistics the student must meet all the general requirements for the major, in addition to completing LING 470, LING 473, and two courses from the following: LING 375X, 471, 472, 474, 475, 477, 478, 484, or 489.

Lower Division Core Courses

Rule: Complete all courses

	Course	Credits
	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits

	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits
	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits

Rule: Complete one of the following

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 133H - Food and Culture Offered spring. Examination of the ways culture shapes the satisfaction of a biological need; food production, preparation, choices, customs, taste, taboos, beverages, spices and food distribution around the globe.	3 Credits
	ANTY 211N - Anthropological Genetics Offered intermittently. Genetics-related problems that confront individuals and society. Variation and natural selection in human populations. Designed for non-biology majors.	3 Credits

	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 418 - Evol and Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea III: World Societies and Cultures

Rule: Complete one of the following

	Course	**Credits**
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	ANTY 241H - Central Asian Culture and Civ Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits

	ANTY 251H - Foundations of Civilization Offered intermittently. Focus on the worldwide evolution of human society from Stone Age hunter-gatherers to the beginnings of modern civilization. Approached through the colorful and exciting world of archaeologists and the sites they excavate.	3 Credits
	ANTY 254H - Arch Wonders of the World Offered spring even numbered years. This course highlights the classical civilizations of the ancient world, fields such as Egyptology and Classical Archaeology, and the major archaeological discoveries which are associated with them.	3 Credits
	ANTY 323 - Native People of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 351H - Archaeology of North America Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures.	3 Credits
	ANTY 352X - Archaeology of Montana Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions.	3 Credits
	ANTY 353 - PaleoIndian Archaeology Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?	3 Credits
	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits
	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
	ANTY 444 - Artistic Tradtns Central Asia Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits

	ANTY 457 - Arch of the Pacific Northwest Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.	3 Credits
	ANTY 459 - Archof the Arctic/Subarctic Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.	3 Credits
	ANTY 465 - Arch of the SW United States Offered autumn even-numbered years. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea IV: Concepts and Issues

Rule: Complete one of the following

	Course	Credits
	ANTY 216 - Primates in Peril Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits

	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	ANTY 440 - Contemporary Issues of SE Asia Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Linguistics Option Requirements

Rule: Must complete the following subcategories

12 Total Credits Required

Option Requirements

Rule: Complete all courses

	Course	Credits
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
Minimum Required Grade: C		6 Total Credits Required

Option Electives

Rule: Complete 2 courses

	Course	Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	LING 471 - Phonetics and Phonology Offered autumn. Prereq., LING 470. A study of phonetic and phonological systems from as many as 20 languages, most of them non–Indo–European; training in how to do linguistic analysis as well as linguistic theory. This course co-convenes with LING 571.	3 Credits
	LING 472 - Generative Syntax Offered autumn. Prereq., LING 470. A study of the human language sentence–formation system, the means for expressing semantic information as propositional content. Emphasis on the abstraction of utterances in the form of mathematical objects. This course co-convenes with LING 572.	3 Credits

	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 478 - Learner Language Offered spring. Prereq., LING 270S or equivalent. Observing/describing language learners' behaviors and, to a degree, advances toward proficiency (i.e., fluency plus accuracy); the presence of error as conditioned by a priori knowledge of language and implications for child and adult development; and applying typical methods of linguistic analysis to the (non-) systematic variants in language form characterizing developmental processes as a way of trying to explain variable behavior.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Medical Anthropology

Bachelor of Arts - Anthropology; Medical Anthropology Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 36

Required Cumulative GPA: 2.0

Note: For a degree in Anthropology with an option in Medical Anthropology, the student must meet all of the general requirements for the major, including completing ANTY 426, in addition to completing three of the following courses: ANTY 333, ANTY 418, ANTY 422, or ANTY 435. Note that in addition to fulfilling option requirements these ANTY courses also fulfill certain major requirements.

Lower Division Core Courses

Rule: Complete all courses

	Course	Credits
	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits
	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits
	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Anthropology or Cognate Electives

Rule: Complete 12 credits.

Note: Speak to your academic adviser for a full list of approved Anthropology or Cognate electives.

Minimum Required Grade: C

12 Total Credits Required

Upper Division Writing Requirement

Rule: Complete either an upper-division writing course from approved list in catalog, or one of the following courses listed below.

	Course	Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits

	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea I-Theory and Methods

Rule: Complete 3 credits in Theory and 3 credits in Methods

Minimum Required Grade: C

6 Total Credits Required

Anthropological Theory

Rule: Complete one of the following

	Course	Credits
	ANTY 312 - Human Evolution Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 404 - Anthropological Museology Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.	3 Credits
	ANTY 415 - Emergence Modern Humans Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.	3 Credits
	ANTY 430 - Social Anthropology Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	ANTY 458 - Arch of Hunter-Gatherers Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.	3 Credits
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits

Minimum Required Grade: C	3 Total Credits Required

Anthropological Methods

Rule: Complete one of the following

	Course	Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 412 - Osteology Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.	4 Credits
	ANTY 413 - Forensic and Mortuary Arch Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.	3 Credits
	ANTY 416 - Dental Anthropology Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits

	ANTY 454 - Lithic Technology Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	ANTY 466 - Archaeological Survey (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.	1 To 12 Credits
	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	ANTY 495 - Field Experience: (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology.	1 To 12 Credits
	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits

	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits

	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Medical Anthropology Option

Rule: Must complete the following subcategories

12 Total Credits Required

Option Requirements

Rule: Complete the following course

	Course	Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Option Electives

Rule: Complete 3 courses

	Course	Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits

	ANTY 418 - Ecol Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C		9 Total Credits Required

Anthropology Minor

Minor - Anthropology (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 18
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: Must complete all of the following:

	Course	**Credits**
	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits
	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits

	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Subarea 1 Elective

Rule: Must complete 1 of the following:

Note: If ANTY 466 or ANTY 495 are taken, they must be taken for 3 credits

	Course	Credits
	ANTY 312 - Human Evolution Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 404 - Anthropological Museology Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits

	ANTY 412 - Osteology Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.	4 Credits
	ANTY 413 - Forensic and Mortuary Arch Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.	3 Credits
	ANTY 415 - Emergence Modern Humans Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.	3 Credits
	ANTY 416 - Dental Anthropology Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.	3 Credits
	ANTY 430 - Social Anthropology Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 454 - Lithic Technology Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits

	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	ANTY 458 - Arch of Hunter-Gatherers Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.	3 Credits
	ANTY 466 - Archaeological Survey (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.	1 To 12 Credits
	ANTY 467 - Archaeological Field School (R-12) Offered summer. Prereq., ANTY 250S and consent of instructor. Provides students with a well-rounded experience in archaeological field methods. Field schools will typically occur at archaeological site locations away from campus. During the archaeological field experience, students may learn methods of excavation, survey, research, and analysis to facilitate their transition to careers as professional archaeologists.	3 To 12 Credits
	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	ANTY 495 - Field Experience: (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology.	1 To 12 Credits
	LING 472 - Generative Syntax Offered autumn. Prereq., LING 470. A study of the human language sentence–formation system, the means for expressing semantic information as propositional content. Emphasis on the abstraction of utterances in the form of mathematical objects. This course co-convenes with LING 572.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subareas 2,3 and 4 Electives

Rule: Must complete 1 of the following:

	Course	**Credits**

	AAS 415 - The Black Radical Tradition Offered intermittently. Same as HSTA 415. Prereq., HSTR 200 and only open to majors and minors in history or consent of instructor. From slave revolts through to the Move rebellion in Philadelphia, this course examines how the African-American community has engaged in radical efforts to change the status quo in the name of seeking justice.	3 Credits
	ANTY 216 - Primates in Peril Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.	3 Credits
	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 323 - Native People of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	ANTY 351H - Archaeology of North America Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures.	3 Credits

	ANTY 352X - Archaeology of Montana Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions.	3 Credits
	ANTY 353 - PaleoIndian Archaeology Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?	3 Credits
	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits
	ANTY 418 - Ecol Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	ANTY 440 - Cont. Issues of SSEA Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.	3 Credits
	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits

	ANTY 444 - Artistic Tradtns Central Asia Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits
	ANTY 457 - Arch of the Pacific Northwest Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.	3 Credits
	ANTY 459 - Archof the Arctic/Subarctic Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.	3 Credits
	ANTY 465 - Arch of the SW United States Offered autumn even-numbered years. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits

	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Anthropology B.A.

Anthropology is an interconnected discipline and majors are urged to acquire a broad background especially in the natural and social sciences and the humanities. Recommended areas of study are biology, economics, English, geography, geology, history, communication studies, linguistics, Native American studies, philosophy, political science, psychology, religious studies, and sociology.

Bachelor of Arts - Anthropology

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 36

Required Cumulative GPA: 2.0

Note: There are no prerequisites to the undergraduate major. The major requires 36 credits in Anthropology, Linguistics, or Native American Studies, 12 of which must be the core offerings. In addition to the core courses, students are required to have a course in quantitative methods. Students must complete the core courses and the quantitative course with a letter grade of C- or better

Lower Division Core Courses

Rule: Complete all courses

	Course	**Credits**
	ANTY 210N - Intro to Physical Anthropology Offered autumn and spring. An introduction to human evolutionary biology including processes of evolution, primate studies, hominid paleontology, and human variation.	3 Credits
	ANTY 220S - Culture & Society Offered autumn and spring. Study of social organization of non-western societies; emphasis on variations in ecology, social structure, economic, political and religious beliefs and practices.	3 Credits
	ANTY 250S - Intro to Archaeology Offered autumn and spring. What archaeologists do and how they reconstruct past human cultures. Methodological and theoretical approaches to understanding and explaining past human societies.	3 Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits

Minimum Required Grade: C-	12 Total Credits Required

Anthropology or Cognate Electives

Rule: Complete 12 credits.

Note: Speak to your academic adviser for a full list of approved Anthropology or Cognate electives.

Minimum Required Grade: C-

12 Total Credits Required

Upper Division Writing Requirement

Rule: Complete either an upper-division writing course from approved list in catalog, or one of the following courses listed below.

	Course	Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits

	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea I-Theory and Methods

Rule: Complete 3 credits in Theory and 3 credits in Methods
Minimum Required Grade: C-
6 Total Credits Required

Anthropological Theory

Rule: Complete one of the following

	Course	Credits
	ANTY 312 - Human Evolution Offered autumn. Prereq., ANTY 210N. An exploration of the fossil and archaeological records of the evolution of human beings, and of current methods and theories used in interpreting these data.	3 Credits
	ANTY 400 - History of Anthropology Offered autumn. Prereq., ANTY 101H and 220S. The development of theory and method in cultural anthropology to the present. Various archaeological, ethnological and socio-psychological theories in the light of historical anthropology.	3 Credits
	ANTY 403E - Ethics and Anthropology Offered intermittently. Prereq., ANTY 101H or 220S, or consent of instr. Ethical and anthropological modes of inquiry in relation to each other. Focus on the sociocultural subfield as well as ethical issues in physical anthropology and archaeology.	3 Credits
	ANTY 404 - Anthropological Museology Offered spring even-numbered years. Prereq., ANTY 101H. Introduction to anthropological museums, museum work and museum theory.	3 Credits
	ANTY 415 - Emergence Modern Humans Offered spring. Prereq., ANTY 210N. An exploration of the emergence of "modern" humans and their relationships with Neanderthals. Exploration of what it means to be "a modern human" through an examination of human evolutionary history.	3 Credits

	ANTY 430 - Social Anthropology Offered spring even-numbered years. Seminar style senior capstone course for cultural anthropology students. This course focuses on bringing theory and methods together in written and visual ethnography.	3 Credits
	ANTY 450 - Archaeological Theory Offered autumn odd-numbered years. Prereq., ANTY 250S. Historical trends and current major theories and methods in archaeology.	3 Credits
	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	ANTY 458 - Arch of Hunter-Gatherers Offered autumn even-numbered years. Introduction to the archaeological study of hunter-gatherer societies. Primary emphasis on archaeological method and theory.	3 Credits
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Anthropological Methods

Rule: Complete one of the following

	Course	Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 408 - Advanced Anthro Statistics Offered intermittently. Prereq., ANTY 401 or consent of inst. Focus on techniques used for microcomputer-based data management and multivariate analysis.	3 Credits
	ANTY 412 - Osteology Offered autumn. Prereq., ANTY 314 and consent of instr. A detailed examination of the human skeleton with an emphasis on identifying individual bones and their structures. Specifically extended to fragmentary skeletal elements. Direct hands-on experience required.	4 Credits

	ANTY 413 - Forensic and Mortuary Arch Offered spring. Prereq., ANTY 314 and consent of instr. Practical approaches to locating, documenting and recovering human skeletal remains, including surface scatters and burials. Emphasis on interpretations of evidence for recovery scene formation and mortuary behavior.	3 Credits
	ANTY 416 - Dental Anthropology Offered intermittently. Prereq., ANTY 210N. The use of information from teeth in investigating evolutionary trends, the relationships between human groups, subsistence change, and culture change.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 454 - Lithic Technology Offered autumn odd-numbered years. Prereq., ANTY 250S and consent of instr. Analysis of stone artifacts and debitage.	3 Credits
	ANTY 455 - Artifact Analysis Offered spring. Prereq., ANTY 250S and consent of instr. Laboratory approaches and techniques for analyzing material culture from technological, stylistic, and chronological perspectives.	3 Credits
	ANTY 466 - Archaeological Survey (R-12) Prereq., ANTY 250S. Offered autumn. A field course in Montana archaeology.	1 To 12 Credits
	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	ANTY 495 - Field Experience: (R- 12) Offered intermittently. Prereq., consent of instr. Organized field experience in anthropology.	1 To 12 Credits

	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea II, III, IV

Rule: Complete 6 credits from 2 of 3 Subareas
Minimum Required Grade: C-
6 Total Credits Required

Subarea II: Human Adaptation and Diversity

Rule: Complete one of the following

	Course	Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 133H - Food and Culture Offered spring. Examination of the ways culture shapes the satisfaction of a biological need; food production, preparation, choices, customs, taste, taboos, beverages, spices and food distribution around the globe.	3 Credits
	ANTY 211N - Anthropological Genetics Offered intermittently. Genetics-related problems that confront individuals and society. Variation and natural selection in human populations. Designed for non-biology majors.	3 Credits
	ANTY 310 - Human Variation Offered autumn. Prereq., ANTY 210N or consent of instr. Introduction to human biological variation, and to the methods and theories that are used to explain the distribution of variable features.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits

	ANTY 417 - Adaptation & Nutritional Anth Offered intermittently. Prereq., ANTY 210N. An examination of the adaptation of human populations to the environment and food supply via evolutionary, physiological, and cultural mechanisms.	3 Credits
	ANTY 418 - Ecol Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea III: World Societies and Cultures

Rule: Complete one of the following

	Course	Credits
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	ANTY 241H - Central Asian Culture and Civ Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits
	ANTY 251H - Foundations of Civilization Offered intermittently. Focus on the worldwide evolution of human society from Stone Age hunter-gatherers to the beginnings of modern civilization. Approached through the colorful and exciting world of archaeologists and the sites they excavate.	3 Credits

	ANTY 254H - Arch Wonders of the World Offered spring even numbered years. This course highlights the classical civilizations of the ancient world, fields such as Egyptology and Classical Archaeology, and the major archaeological discoveries which are associated with them.	3 Credits
	ANTY 323X - Native Peoples of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 351H - Archaeology of North America Offered autumn. The origins, backgrounds and development of Pre-Columbian American peoples and cultures.	3 Credits
	ANTY 352X - Archaeology of Montana Offered spring. The origins, distributions and development of aboriginal cultures in Montana and surrounding regions.	3 Credits
	ANTY 353 - PaleoIndian Archaeology Offered spring or winter, even-numbered years. Examines archaeological, linguistic, biological and skeletal data to determine from where and when Native Americans arrived in North America. Examines archaeological sites from such diverse places as Montana, Siberia, Virginia, and Chile to answer the most intriguing question in contemporary American archaeology today: how, when and from where did people first arrive in the Americas?	3 Credits
	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits
	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
	ANTY 444 - Artistic Tradtns Central Asia Offered autumn odd-numbered years. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits
	ANTY 457 - Arch of the Pacific Northwest Offered autumn odd-numbered years. Introduction to the study of archaeology in the Pacific Northwest region inclusive of the Northwest Coast and Columbia/Fraser-Thompson Plateau. Understanding hunter-gatherer adaptations, evolution of social complexity, and ancient history of contemporary native peoples in the region.	3 Credits

	ANTY 459 - Archof the Arctic/Subarctic Offered spring even-numbered years. Introduction to the study of Arctic and Subarctic archaeology emphasizing the Pleistocene and Holocene prehistory of North America and eastern Siberia. Understanding of methodological problems associated with archaeology in a northern context, the evolution of Inuit, Eskimo, Aleut and Athapaskan cultures, and hunter-gatherer adaptations to northern interior and coastal environments.	3 Credits
	ANTY 465X - Arch of the SW United States Offered intermittently. The development of the prehistoric communities in the southwestern United States from ancient times to the dawn of history in the area.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Subarea IV: Concepts and Issues

Rule: Complete one of the following

	Course	Credits
	ANTY 216 - Primates in Peril Offered intermittently. An overview of the living primates and their behavior with a focus on conservation issues that have an impact on primates.	3 Credits
	ANTY 314 - Principles of Forensic Anthro Offered autumn. Prereq., ANTY 210N. A study of techniques for recovering skeletal material, identifying and interpreting human skeletal remains, keeping records, interacting with the law enforcement system and documenting human rights abuses.	3 Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 336 - Myth, Ritual and Religion Offered autumn odd-numbered years. Theories and practices concerning supernatural phenomena, and the comparative study of world religions and cosmological traditions of indigenous peoples throughout the world.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits

	ANTY 423 - Culture and Identity Offered spring. The comparative study of identity formation along and across racial, ethnic, and ethno-national lines. Emphasis on issues of ethnogenesis, cultural resistance, transformation, domination, colonialism as well as sharing to understand both the cultural commonalties and differences in identity formation.	3 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits
	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	ANTY 440 - Contemporary Issues of SE Asia Offered intermittently. Prereq., ANTY 102H. An examination of the major issues that affect the contemporary experience of South and Southeast Asians.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Forensic Studies Certificate

The certificate in forensic studies is designed so that students may complete the requirements either as resident students at UM-Missoula or completely online through UM-Missoula's online facility.

To earn a certificate in forensic studies the student must complete a minimum of 18 credits, including 6 credits in core forensic science courses.

Certificate of Art - Forensic Studies

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 18

Required Cumulative GPA: 2.0

Note: The Certificate in Forensic Studies is primarily designed as a step toward a baccalaureate degree for those interested in a career in the forensic sciences or a related field. It is also designed as an avenue for law enforcement agents, forensic scientists, or other professionals in the justice system to satisfy mandatory continuing education requirements for continued employment or promotion.

Core Courses

Rule: All courses required.

	Course	Credits
	CJUS 125N - Fund of Forensic Science Offered autumn and online spring. A survey of the forensic sciences and related disciplines and their use in criminal investigations, the role of forensic scientists in the investigative process and as expert witnesses.	3 Credits
	CJUS 488 - For Sci Crime Lab & Beyond Offered spring and online in autumn. Examination of the forensic sciences with emphases on the non-crime lab forensic sciences, new technologies, and new directions in the forensic sciences.	3 Credits
Minimum Required Grade: C		6 Total Credits Required

Science Electives

Rule: Must complete 6 credits

Note: To meet this requirement, students must complete six credits in courses with a suffix of "N" (courses that have been designated as University of Montana- Missoula General Education Group XI, Natural Sciences) in any department. Any Criminology courses offered through the Sociology department also count towards meeting this requirement. Courses numbered under 100 may not be counted toward meeting this requirement. Minimum grade required is C-.

Minimum Required Grade: C

6 Total Credits Required

Communication Elective

Rule: Must complete a 3 credit course

Note: To meet this requirement, student must complete one, 3-credit course related to written, oral, or pictorial communication, including selected courses in Art, Curriculum & Instruction, Communication Studies, Computer Science, English, Forestry, Journalism, Linguistics, and Media Arts. Courses numbered under 100 may not be counted toward meeting this requirement. WRIT 101 will not be accepted as fulfilling this requirement.

Minimum Required Grade: C-

3 Total Credits Required

Ethics Elective

Rule: Must complete a 3 credit course

Note: To meet this requirement, student must complete one, 3-credit course that has been designated as a University of Montana - Missoula General Education Group VIII (Ethics and Human Values) course in any department.

Minimum Required Grade: C

3 Total Credits Required

Historic Preservation Certificate

Historic Preservation is the interdisciplinary field that seeks to identify, document, preserve and protect significant structures, sites and landscapes.

Certificate of Applied Science - Historic Preservation

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 21

Required Cumulative GPA: 2.0

Note: Historic Preservation is the interdisciplinary field that seeks to identify, document, preserve and protect significant structures, sites and landscapes. To earn a certificate in historic preservation the student must complete a minimum of 21 credits.

Core Courses

Rule: must complete all courses

	Course	Credits
	ANTY 451 - Cultural Resource Management Offered autumn. Introduction to the laws and practice of cultural resource/heritage property management. Focus on the management of archaeological sites, historic structures, and traditional cultural places due to federal laws. Emphasis is on laying foundation of CRM practices for students interested in pursuing it as a potential career.	3 Credits
	ANTY 456 - Historic Archaeology Offered spring. Prereq., ANTY 250S or consent of instr. Understanding and interpreting the past through historical archaeological remains, methods, and theories. Focuses on historical archaeological sites and topics from the American West, but also examines the field's global perspective.	3 Credits
	GPHY 465 - Planning Princ & Processes Offered autumn even-numbered years. Prereq., upper-division or graduate standing. Surveys planning principles, practices and issues in urban and rural environments. Attention is devoted to Montana, state planning programs in the United States., and federal programs and policies that influence land-use planning. Emphasizes skills and techniques used in plan development and implementation.	3 Credits
	HPRV 400 - Historic Preservation Offered spring even-numbered years. This course is intended to provide a comprehensive foundation to historic preservation practice and issues.Topics include the history and theory of the American historic preservation movement, identification and documentation of historic properties, preservation technology, strategies for conservation of historic resources and a critical examination of the philosophy and principles of preservation.	3 Credits

	THTR 335H - Architectural History Offered autumn. Knowledge and understanding of architectural styles, designs and choices of the built environment from prehistoric megalithic architecture to the start of the modern age.	3 Credits
Minimum Required Grade: C		15 Total Credits Required

History Electives

Rule: Must complete three credits

	Course	Credits
	HSTA 320 - Birth of Modern US (AM) The history of the U.S. from 1877 to 1920 is largely the story of Americans responding to profound social, cultural and economic change. In an effort to bring order to their changing world, Americans created new institutions, retooled their ideologies, and improved the nation's infrastructure. The order they created is, in modified form, still with us today. Students will explore the myriad changes that transformed the United States during this period and study the social, political, and cultural struggles that shaped the emergence of Modern America.	3 Credits
	HSTA 321 - America in Crisis (AM) This era in U.S. history was marked by a series of crises: the contested transition to modernity during the 1920s, the Great Depression, and World War II and its aftermath. This course will explore how Americans responded to these crises, why they responded to them the way they did, and how their responses altered the society in which they lived.	3 Credits
	HSTA 322 - American History: WWII to Pres (AM) The Cold War and its consequences, the civil rights revolution, affluence and anxiety, counter-culture, political radicalism, feminism, the Nixon years, Watergate and after.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Internship or Independent Study

Rule: Must complete three credits

Note: Internship must be with an approved, appropriate preservation-based agency or focused on an approved preservation-based topic.

	Course	Credits
	ANTY 398 - Internship Offered intermittently. Prereq., 9 credits in anthropology; consent of faculty supervisor and cooperative education officer. Practical application of classroom learning through internship in a number of areas such as museology, cultural resource management, and forensics. A maximum of 6 credits of Internship (198, 298, 398, and 498) may count toward graduation.	1 To 6 Credits

	ANTY 492 - Independent Study (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
Minimum Required Grade: C		3 Total Credits Required

Linguistics Minor

Minor - Linguistics (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 18

Required Cumulative GPA: 2.0

Note: To earn a Minor in Linguistics, students must complete 18 credits beyond their major degree requirements.

Upper Division Core Courses

Rule: Complete the following subcategories of courses

9 Total Credits Required

Core Course

Rule: Must complete the following course

	Course	**Credits**
	LING 470 - Linguistic Analysis Offered autumn. An in-depth examination of the formal properties of language, concentrating on the core areas of linguistic analysis (phonetics, phonology, morphology, syntax and semantics).	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Additional Core Courses

Rule: Must complete 2 of the following 3 courses

	Course	**Credits**
	LING 471 - Phonetics and Phonology Offered autumn. Prereq., LING 470. A study of phonetic and phonological systems from as many as 20 languages, most of them non–Indo–European; training in how to do linguistic analysis as well as linguistic theory. This course co-convenes with LING 571.	3 Credits

	LING 472 - Generative Syntax Offered autumn. Prereq., LING 470. A study of the human language sentence–formation system, the means for expressing semantic information as propositional content. Emphasis on the abstraction of utterances in the form of mathematical objects. This course co-convenes with LING 572.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
Minimum Required Grade: C		6 Total Credits Required

Elective Courses

Rule: Must complete 3 of the following courses

Note: Please note: In earning this minor, neither LING 270S nor LING 465 may be taken after LING 470. In addition, only 1 of LING 270S and LING 465 may be counted towards the minor. LING 471, LING 472, and LING 489 may be taken as an elective, if not taken as a required core course.

	Course	Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits
	LING 375X - Endangered Languages Offered intermittently. Survey of endangered languages and the communities in which those endangered languages are spoken. Topics to be addressed include linguistic diversity, language endangerment, language shift and loss, language maintenance efforts, and prospects for the future of these languages.	3 Credits
	LING 465 - Structure & History of English Offered once per year. The development of the English language from a historical perspective contrasted with the phonological and grammatical structure of English from a modern linguistic point of view; specifically designed for teachers.	3 Credits
	LING 471 - Phonetics and Phonology Offered autumn. Prereq., LING 470. A study of phonetic and phonological systems from as many as 20 languages, most of them non–Indo–European; training in how to do linguistic analysis as well as linguistic theory. This course co-convenes with LING 571.	3 Credits
	LING 472 - Generative Syntax Offered autumn. Prereq., LING 470. A study of the human language sentence–formation system, the means for expressing semantic information as propositional content. Emphasis on the abstraction of utterances in the form of mathematical objects. This course co-convenes with LING 572.	3 Credits
	LING 473 - Language and Culture Offered spring. Prereq., LING 470. Technical study of the relationships between grammatical categories and world view. This course co-convenes with LING 573.	3 Credits

	LING 474 - Historical Linguistics Offered spring even-numbered years. Prereq., LING 470. An introduction to the study of language change over time. Topics include: methods for studying language change (the comparative method and internal reconstruction); types of language change (sound change, borrowing, analogical change, lexical, syntactic, and semantic change); and explanations for language change. The principles of historical reconstruction and comparative method in the analysis of linguistic variation and change. This course co-convenes with LING 574.	3 Credits
	LING 475 - Linguistic Field Methods Offered spring odd-numbered years. Prereq., LING 470. Writing up linguistic data; developing techniques for eliciting linguistic data by working with a native speaker of a less commonly taught language. This course co-convenes with LING 575.	3 Credits
	LING 477 - Bilingualism Offered autumn. Prereq., LING 270S or equiv. Societal and individual bilingualism: topics include language policy, maintenance, interference, code-switching and mixting, and bilingual education.	3 Credits
	LING 478 - Learner Language Offered spring. Prereq., LING 270S or equivalent. Observing/describing language learners' behaviors and, to a degree, advances toward proficiency (i.e., fluency plus accuracy); the presence of error as conditioned by a priori knowledge of language and implications for child and adult development; and applying typical methods of linguistic analysis to the (non-) systematic variants in language form characterizing developmental processes as a way of trying to explain variable behavior.	3 Credits
	LING 484 - NA Indigenous Lang & Ling Offered autumn odd-numbered years. Prereq. LING 470. Description and analysis of grammatical features of Indigenous languages of North America. This course co-convenes with LING 584.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits

	LING 481 - The ESL Professional Offered intermittently. Prereq. or coreq., LING 491; prereq., LING 480 or consent of instr. Professional development techniques for the independent language teacher: language test construction, self–critique of teaching strategies, materials development, curriculum evaluation and design, and electronic and print media resources for the language teaching professional.	3 Credits
	LING 489 - Morphology Offered spring. Prereq., LING 470. A survey of the morphological features of several unrelated languages to provide the student with a broad overview of how languages compare and contrast. This course co-convenes with LING 589.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

African-American Studies

Tobin Miller Shearer, Program Director

African-American Studies at the University of Montana connects African and African-American (including Latin America and the Caribbean) history, experiences, and perspectives with the 21st century. The goal of the African-American Studies curriculum is to develop basic knowledge of, and appreciation for, the diverse experiences of the African Diaspora, and their contributions to the nations into which they were incorporated. Through this study students will recognize that the African-American narrative connects to the core issues of nation formation, identity politics, social movements, and the liberal state. Those who take this minor will likewise be equipped to talk alongside, through, and in the midst of the racial fracture lines that mark this nation as a country where the color of one's skin is socially significant. In all these efforts, we promote scholarship that is driven first and foremost by an interest in creating knowledge and furthering our understanding of the African-American experience. The interdisciplinary curriculum of African-American Studies includes course offerings from the following academic disciplines: anthropology, economics, English, geography, history, music, political science, and sociology. Some topics of study include: African heritage and cultural continuity among African-Americans; African-American identity issues and cultural variation; the history of African-American protest and

resistance, including the abolitionist, anti-lynching, and civil rights movements; the Harlem Renaissance; the social dynamics of integration and segregation; and the various circumstances of, and prospects for, African Americans in the 21st century.

African-American Studies

Back to Top

- AAS 342H - Afr Amer Hist to 1865

  Credits: 3. Offered intermittently. Same as HSTA 342H. Survey of the African-American experience from the African background to the end of the Civil War. Focus on Black American quest for the American Dream, and how Blacks attempted to deal with the challenges of enslavement and racism. Course Attributes: Historical & Cultural Course

- AAS 343H - Afr Amer Hist Since 1865

  Credits: 3. Offered intermittently. Same as HSTA 343H (HIST 379H). Study of the African-American experience since the Civil War. Change and continuity in the African-American experience, the fight against Jim Crow, the struggle for civil rights, and post-civil rights economic, political, social and cultural developments and challenges. Course Attributes: Historical & Cultural Course

- AAS 347 - Voodoo, Muslim, Church

  Credits: 3. Offered intermittently. Same as HSTA 347. The African-American religious experience encompasses Islam, Christianity, Santería, voodoo, and many others. In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course is the question, “How did religion shape the experience of the African-American community?” Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history. Course Attributes: Writing Course-Approved

- AAS 415 - The Black Radical Tradition

  Credits: 3. Offered intermittently. Same as HSTA 415. Prereq., HSTR 200 and only open to majors and minors in history or consent of instructor. From slave revolts through to the Move rebellion in Philadelphia, this course examines how the African-American community has engaged in radical efforts to change the status quo in the name of seeking justice. Course Attributes: Writing Course-Advanced

- AAS 417 - Prayer & Civil Rights

  Credits: 3. (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how

religion spilled out of sanctuaries into the streets during the civil rights era. Course Attributes: Writing Course-Advanced

African-American Studies

Back to Top

- AAST 141H - Black: From Africa to Hip-Hop
  Credits: 3. Offered autumn. Same as HIST 141H. This course introduces students to the primary questions, themes, and approaches to African-American Studies. In addition to examining key historical periods such as Reconstruction, the Harlem Renaissance, and the Civil Rights era, students will encounter Hip-Hop, African-American film, African-American religion, and contemporary identity politics. This course concludes by discussing the reasons for and new directions in African-American studies, including diaspora studies, Pan-Africanism, and post-colonial studies. Overall students will gain new insight into the social, cultural, political, and intellectual, experiences of a diverse people and into the history and contemporary experience of the United States. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- AAST 208H - Discovering Africa
  Credits: 3. Offered intermittently. Same as HIST 208H. Interdisciplinary study of the history of pre-colonial Africa, focusing on social, economic, political and cultural institutions and traditions including the wealth, diversity and complexity of ancient and classical African civilizations and cultures. Course Attributes: Hist & Cultural Studies (H)
- AAST 260 - African Americans and Native Americans
  Credits: 3. Offered intermittently. A study of the broad scope of relations between African Americans and Native Americans in colonial and United States history. Topics explored through history, sociology, and cultural anthropology.
- AAST 262 - Abolitionism: The First Civil Rights Movement
  Credits: 3. Offered spring. Same as HIST 262. Interdisciplinary, historical perspective on the early 19th century movement to abolish slavery and racial discrimination in the United States.
- AAST 291 - Special Topics
  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- AAST 372 - African-American Identity
  Credits: 3. Offered intermittently. Interdisciplinary course designed to explore and illuminate the multifaceted nature and development of African-American group and individual identity.
- AAST 392 - Independent Study
  Credits: 1 TO 9. (R-9) Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- AAST 491 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- AAST 492 - Independent Study
  Credits: 1 TO 9. (R-9) Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.
- AAST 499 - Capstone/Thesis
  Credits: 1 TO 6. (R-6) Prereq., consent of instr.

African-American Studies Electives

Rule: 6 credits required from the following electives, 3 of which must be in an upper division course

Note: Several of these courses are cross-listed with history (HSTA) and maybe taken under that subject:
AAS 347 = HSTA 347;
AAS 415 = HSTA 415;
AAS 417 = HSTA 417

	Course	Credits

	AAST 208H - Discovering Africa Offered intermittently. Same as HIST 208H. Interdisciplinary study of the history of pre-colonial Africa, focusing on social, economic, political and cultural institutions and traditions including the wealth, diversity and complexity of ancient and classical African civilizations and cultures.	3 Credits
	AAST 260 - African Amer and Native Amer Offered intermittently. A study of the broad scope of relations between African Americans and Native Americans in colonial and United States history. Topics explored through history, sociology, and cultural anthropology.	3 Credits
	AAST 262 - Abolitionism Offered spring. Same as HIST 262. Interdisciplinary, historical perspective on the early 19th century movement to abolish slavery and racial discrimination in the United States.	3 Credits
	AAST 291 - Special Topics (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	AAST 372 - African-American Identity Offered intermittently. Interdisciplinary course designed to explore and illuminate the multifaceted nature and development of African-American group and individual identity.	3 Credits
	AAST 491 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	HSTA 327 - Atlantic World Slavery (AM) Offered alternate years. This course will examine the development and demise of slavery in the early modern Atlantic world, from the late fifteenth to the late nineteenth centuries. Specifically, we will explore the ways the transatlantic slave trade forged economic and cultural connections between Europe, Africa, and the Americas, thereby causing immeasurable suffering while conditioning conceptions of race, reshaping politics and religion, and transforming the ecology of nearly a third of the globe.	3 Credits
	HSTA 347 - Voodoo,Muslim,Church:Black Rel (AM) The African American religious experience encompasses Islam, Christianity, Santeria, voodoo, and many others. In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course question, "How did religion shape the experience of the African-American community?" Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history. Same as AAS 347.	3 Credits

	HSTA 415 - The Black Radical Tradition Offered intermittently. Same as HSTA 415. Prereq., HSTR 200 and only open to majors and minors in history or consent of instructor. From slave revolts through to the Move rebellion in Philadelphia, this course examines how the African-American community has engaged in radical efforts to change the status quo in the name of seeking justice.	3 Credits
	HSTA 417 - Prayer & Civil Rights (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how religion spilled out of sanctuaries into the streets during the civil rights era.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Other Electives

Rule: 9 credits are required from the following courses. At least 2 of the courses must be from different disciplines.

Note: FRCH 391: Special Topics must be African-American Literature. Students can also take HSTR 388 and HSTR 409.

	Course	**Credits**
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	ECNS 217X - Issues in Economic Development Offered intermittently. Prereq., ECNS 201S. Study of the processes of economic growth and development in the less developed world.	3 Credits

	FRCH 391 - Special Topics (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 9 Credits
	GPHY 243S - Africa Offered autumn even numbered years. A survey of the biophysical and cultural geography of Sub Saharan Africa. Emphasis is on the region's cultural historical development and current ecological, demographic, and economic patterns.	3 Credits
	HSTA 361 - The American South (AM) Social history of the American South with particular attention to race, class, and gender.	3 Credits
	HSTA 382H - History of American Law (AM) Issues in the social history of law from the colonial period to the present.	3 Credits
	HSTA 420 - America Divided, 1848-1865 (AM) Offered intermittently. Same as AAS 420. This course explores the period in American history from the close of the Mexican War through the conclusion of the Civil War. Topics include slavery and sectionalism; race and racism; immigration and ethno-religious conflict; military mobilization and wartime dissent; the meaning of freedom in the age of emancipation. This course is intended to hone skills fundamental to the historical discipline: the critical analysis of primary sources; independent primary research and historical writing; engagement with and assessment of historical scholarship; the construction of a historiographical essay. Upper division writing course for the history major.	3 Credits
	HSTR 262H - Islamic Civil: Classical Age (WRLD) A concise history of the Islamic world from the 6th century to the fall of the Abbasid Empire in the 13th century, focusing primarily on the teachings of Islam and the causes for the rapid expansion of the Islamic empire.	3 Credits
	LIT 343 - African American Lit Offered intermittently. Prereq., LIT 300 or consent of instr. Selected works by African-American authors. Course may define a narrowed focus such as poetry, women writers, etc.	3 Credits
	LIT 420 - Critical Theory (R-9) Offered autumn or spring. Prereq., LIT 300 and six credits in literature courses numbered 300 or higher or consent of instr. Study and application of one or more theoretical approaches to interpreting texts (e.g., aesthetic post-structural, new historicist, classical, Renaissance, Romantic, narrative, psychoanalytic, formalist, neo-Marxist, feminist, gender, cultural studies and reader-response theory).	3 Credits
	MUSI 130L - History of Jazz Offered autumn. The development of jazz in the 20th century with emphasis on critical listening and the recognition of important trends and people in its history.	3 Credits
	PSCI 326 - Politics of Africa Offered autumn. Prereq., junior standing or consent of instr. Development of the political systems of sub-Saharan Africa. Analysis of the interaction between African and Western social, political, and economic forces. Consideration of African political thought.	3 Credits

	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

African-American Studies B.A.

Bachelor of Arts - African-American Studies

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 36
Required Cumulative GPA: 2.0

Core Courses

Rule: Students must complete the following courses

	Course	**Credits**
	AAST 141H - Black: Africa to Hip-Hop Offered autumn. Same as HIST 141H. This course introduces students to the primary questions, themes, and approaches to African-American Studies. In addition to examining key historical periods such as Reconstruction, the Harlem Renaissance, and the Civil Rights era, students will encounter Hip-Hop, African-American film, African-American religion, and contemporary identity politics. This course concludes by discussing the reasons for and new directions in African-American studies, including diaspora studies, Pan-Africanism, and post-colonial studies. Overall students will gain new insight into the social, cultural, political, and intellectual, experiences of a diverse people and into the history and contemporary experience of the United States.	3 Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits

	HSTA 342H - Afr Amer Hist to 1865 (AM) Offered intermittently. Same as AAS 342H. Survey of the African American experience from the African background to the end of the Civil War. Focus on Black American quest for the American Dream, and how Blacks attempted to deal with the challenges of enslavement and racism.	3 Credits
	HSTA 343H - Afr Amer Hist Since 1865 (AM) Same as AAS 343H. Study of the African American experience since the Civil War. Change and continuity in the African American experience, the fight against Jim Crow, the struggle for civil rights, and post-civil rights economic, political, social and cultural developments and challenges.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
Minimum Required Grade: C-		18 Total Credits Required

Elective Courses

Rule: 15 Credits required, 6 of which must be at the upper division

Note: Capstone:
Each student must also perform a 3-credit capstone project as an independent study in which they conduct a research project, service project, or artistic project focused on an issue pertinent to the African-American community. All projects must be approved by the AAS director.

	Course	**Credits**
	AASC 291 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	AAST 208H - Discovering Africa Offered intermittently. Same as HIST 208H. Interdisciplinary study of the history of pre-colonial Africa, focusing on social, economic, political and cultural institutions and traditions including the wealth, diversity and complexity of ancient and classical African civilizations and cultures.	3 Credits
	AAST 260 - African Amer and Native Amer Offered intermittently. A study of the broad scope of relations between African Americans and Native Americans in colonial and United States history. Topics explored through history, sociology, and cultural anthropology.	3 Credits
	AAST 262 - Abolitionism Offered spring. Same as HIST 262. Interdisciplinary, historical perspective on the early 19th century movement to abolish slavery and racial discrimination in the United States.	3 Credits

	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	CRWR 491 - Special Topics (R-6) Offered Intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	ECNS 217X - Issues in Economic Development Offered intermittently. Prereq., ECNS 201S. Study of the processes of economic growth and development in the less developed world.	3 Credits
	ECNS 312 - Labor Economics Offered intermittently. Prereq., ECNS 201S. Economic analysis of labor markets. Theories of wage determination, discrimination and poverty with implications for manpower policy.	3 Credits
	FILM 484 - Film Directors (R-9) Offered every year. Prereq. FILM 103L. Intensive study of the life and work of one major film director.	3 Credits
	FRCH 339 - Surv African Cinema Offered intermittently. A diachronic survey of African cinema accompanied by interpretation and evaluation of textual dimensions of films through filmic critical theory.	3 Credits
	GPHY 141S - Geography of World Regions Offered autumn and/or spring. An overall view of how the lands and peoples of the world are organized into coherent geographical regions, how landscapes differ from region to region, and how the people differ in terms of their traits, beliefs, ways of life, and economic livelihood.	3 Credits
	GPHY 243 - Africa Offered intermittently. A survey of the biophysical and cultural geography of Sub-Saharan Africa. Emphasis is on the region's cultural-historical development and current ecological, demographic, and economic patterns.	3 Credits
	HSTA 262 - Abolitionism (AM) Same as AAS 262. Interdisciplinary, historical perspective on early 19th century movement to abolish slavery and racial discrimination in the United States.	3 Credits
	HSTA 347 - African American Religious Exp (AM) The African American religious experience encompasses Islam, Christianity, Santeria, voodoo, and many others. In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course question, "How did religion shape the experience of the African-American community?" Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history. Same as AAS 347.	3 Credits

	HSTA 361 - The American South (AM) Social history of the American South with particular attention to race, class, and gender.	3 Credits
	HSTA 382H - History of American Law (AM) Issues in the social history of law from the colonial period to the present.	3 Credits
	HSTA 391 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	HSTA 415 - The Black Radical Tradition Offered intermittently. Same as HSTA 415. Prereq., HSTR 200 and only open to majors and minors in history or consent of instructor. From slave revolts through to the Move rebellion in Philadelphia, this course examines how the African-American community has engaged in radical efforts to change the status quo in the name of seeking justice.	3 Credits
	HSTA 417 - Prayer & Civil Rights (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how religion spilled out of sanctuaries into the streets during the civil rights era.	3 Credits
	HSTA 491 - Special topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.	1 To 12 Credits
	HSTR 262H - Islamic Civil: Classical Age (WRLD) A concise history of the Islamic world from the 6th century to the fall of the Abbasid Empire in the 13th century, focusing primarily on the teachings of Islam and the causes for the rapid expansion of the Islamic empire.	3 Credits
	LIT 191 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	LIT 291 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits

	LIT 304 - U.S. Writers of Color Offered intermittently. Prereq., LIT 300 or consent of instr. Selected readings from African American, Asian American, Chicano/a, Latino/a, and Native American literatures.	3 Credits
	LIT 343 - African American Lit Offered intermittently. Prereq., LIT 300 or consent of instr. Selected works by African-American authors. Course may define a narrowed focus such as poetry, women writers, etc.	3 Credits
	LIT 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	LIT 420 - Critical Theory (R-9) Offered autumn or spring. Prereq., LIT 300 and six credits in literature courses numbered 300 or higher or consent of instr. Study and application of one or more theoretical approaches to interpreting texts (e.g., aesthetic post-structural, new historicist, classical, Renaissance, Romantic, narrative, psychoanalytic, formalist, neo-Marxist, feminist, gender, cultural studies and reader-response theory).	3 Credits
	LIT 491 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	MUSI 130L - History of Jazz Offered autumn. The development of jazz in the 20th century with emphasis on critical listening and the recognition of important trends and people in its history.	3 Credits
	PSCI 326 - Politics of Africa Offered autumn. Prereq., junior standing or consent of instr. Development of the political systems of sub-Saharan Africa. Analysis of the interaction between African and Western social, political, and economic forces. Consideration of African political thought.	3 Credits
	PSCI 348 - US Multicultural Politics Offered intermittently. Examines the politics of diversity in the U.S., including national community, identity, citizenship, immigration, assimilation, and racial issues such as voting rights, affirmative action, segregation and integration, and public opinion.	3 Credits
	PSCI 443 - Politics of Social Movements Offered spring. Prereq., junior standing or consent of instr. The role of social movements in shaping the politics of power, reflected in public policy, electoral politics, relations of class, race, and gender, and people's understanding of the world and their place in it.	3 Credits

	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	WGSS 363 - Feminist Theory and Methods Offered spring. In-depth exposure to feminist views and critique of the ethics and methods of scientific, social, and literary inquiry. Includes exposure to primary sources and current societal and global issues and movements, research finding, and literature exemplifying these methods of inquiry and the gendered dimensions of such inquiry.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Sociology Department

Dusten Hollist, Chairs

"Sociology is the study of social life, social change, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations, and societies, and how people interact within these contexts. Since human behavior is shaped by social factors, the subject matter of sociology ranges from the intimate family to the hostile mob; from organized crime to religious cults; from the divisions of race, gender and social class to the shared beliefs of a common culture" (American Sociological Association 2002:1). The Sociology faculty at UM bring diverse theoretical perspectives to their courses and use a wide array of methodological strategies in their research and teaching. Their interests range from social issues facing our local community and the Northern Rocky Mountain region, to national and global concerns. Faculty research addresses both theoretical issues, such as the causes of criminal behavior, and practical matters, such as the effectiveness of prison rehabilitation programs or the impact of legislation on family policy and poverty programs.

In addition to a general sociology major, students may choose one of three options for structuring their course work. The general Sociology major provides a broad foundation in sociological theory and research, together with exposure to a variety of courses in the main substantive areas of the discipline. Students interested in crime and criminal justice can choose an option in Criminology, while students concerned with the causes and consequences of social inequality can select an option Inequality and Social Justice. Students interested in rural and environmental issues can pursue an option in Rural and Environmental Change. These options allow students to concentrate their studies in a particular area of interest while still acquiring a solid foundation in the discipline of Sociology.

Department Faculty

Professors

Robert Balch, Professor Emeritus
James Burfeind, Professor
Dan Doyle, Professor of Criminology and Sociology
Dusten Hollist, Professor, Chair
Celia Winkler, Professor

Associate Professors

Kathy J. Kuipers, Associate Professor, Director Graduate Studies

Daisy Rooks, Associate Professor
Teresa Sobieszczyk, Associate Professor, Sociology

Assistant Professors

Jackson Bunch, Assistant Professor

Adjunct Faculty

D'Shane Barnett, Adjunct Instructor
Scott Byington, Adjunct Instructor
John Domitrovich, Adjunct Instructor
Katherine Mallon, Adjunct Instructor
Peter Ore, Adjunct Instructor
Stella Phipps, Data Wrangler | Adjunct Instructor
Dustin Satterfield, Adjunct Instructor

Lecturers

Rayna Sage, Adjunct Instructor

Chemical Addiction Studies

Back to Top

- CAS 433 - Adv Addiction Studies
  Credits: 3. Offered spring. Same as PSYX 441 and SW 423. Examination of chemical dependency and behavioral compulsion, including alcohol and other drugs, gambling, eating disorders, sexual addictions. Ecosystems perspective on etiology, treatment, prevention, family dynamics, community response, and societal contributors.

Sociology

Back to Top

- SOCI 101S - Introduction to Sociology
  Credits: 3. Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors. Course Attributes: Social Sciences Course (S)
- SOCI 130S - Soc of Alternative Religions
  Credits: 3. Offered spring. Unconventional religious groups in American society. Topics include recruitment, conversion, commitment, defection, leadership, belief systems, organizational structure and change. Course Attributes: Social Sciences Course (S)
- SOCI 191 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- SOCI 202 - Social Statistics
  Credits: 3. Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.
- SOCI 211S - Introduction to Criminology
  Credits: 3. Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts. Course Attributes: Social Sciences Course (S)
- SOCI 212S - Social Issues Southeast Asia
  Credits: 3. Offered every other year. Introduction to the cultures, societies, and contemporary social problems of Southeast Asia. Course Attributes: Social Sciences Course (S)

- SOCI 220S - Race, Gender & Class

  Credits: 3. Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status. Course Attributes: Social Sciences Course (S)

- SOCI 221 - Criminal Justice System

  Credits: 3. Offered spring. A systematic survey of crime and the administration of justice in the United States, including the organizational structures, processes, and dynamics of law enforcement, criminal adjudication, and corrections.

- SOCI 270 - Intro Development Sociology

  Credits: 3. Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.

- SOCI 275S - Gender and Society

  Credits: 3. Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements. Course Attributes: Social Sciences Course (S)

- SOCI 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- SOCI 306 - Sociology of Work

  Credits: 3. Offered intermittently. An introduction to contemporary sociological debates on work including overwork, working poor, housework, globalization, mechanization, routinization, surveillance, and unions. Special focus on gender and class impacts on working life.

- SOCI 312 - Criminal Adjudication

  Credits: 3. Offered spring odd-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of adjudicatory processes applied to the criminally accused. Includes pretrial, trial, and sentencing practices and procedures. Special attention to the sociological dimensions of criminal adjudication: its cultural underpinnings, structural characteristics and interactional dynamics.

- SOCI 314 - Extraordinary Group Behavior

  Credits: 3. Offered intermittently. Prereq., SOCI 101S. The study of emergent social behavior including rumors, crowds, crazes, riots, panics, terrorism, revolutions and social movements.

- SOCI 318 - Sociological Research Methods

  Credits: 3. Offered every term. Prereq., SOCI 101S, Sociology majors only, or consent of instr. Methods of research in the social sciences including naturalistic observation, interviewing, measurement, experiments, surveys, content analysis, and basic data analysis. Required of all majors.

- SOCI 325 - Social Stratification

  Credits: 3. Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.

- SOCI 330 - Juvenile Delinquency

  Credits: 3. Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.

- SOCI 332 - Sociology of the Family

  Credits: 3. Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.

- SOCI 335 - Juvenile Justice System

  Credits: 3. Offered autumn. Prereq., SOCI 101S and 211S or 330. An analysis of the juvenile justice system in the United States, including the historical development of policies and practices. The role of various social agencies in defining, preventing, and responding to delinquency.

- SOCI 345 - Sociology of Organizations

  Credits: 3. Offered intermittently. Prereq., SOCI 101S. Historical and analytical study of organizations as social systems, with an emphasis on applying theoretical models to analyzing organizational behavior and change.

- SOCI 346 - Rural Sociology

  Credits: 3. Offered intermittently. Prereq., SOCI 101S recommended. Demographic, economic and sociocultural change in rural communities with an emphasis on global economy, political structure, urbanization, and economic and social infrastructure. Special attention given to the rural west and Montana.

- SOCI 350 - The Community

  Credits: 3. Offered intermittently. Prereq., SOCI 101S. The study of families, peer groups, neighborhoods, voluntary associations, power structures, social classes and large scale organizations as they come together in local communities.

- SOCI 355 - Population and Society

  Credits: 3. Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.

- SOCI 362 - Sociology of Law Enforcement

  Credits: 3. Offered autumn even-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of policing in society, with emphasis on the cultural context in which it occurs, its structural characteristics, and social psychological processes.

- SOCI 382 - Soc Psych and Social Structure

  Credits: 3. Offered autumn. Prereq., SOCI 101S. The study of the behavior of individuals in social contexts ranging from small groups to societies. Topics include attitude change, conformity, power, status, self-concept formation, and decision-making.

- SOCI 386 - Preceptorship in Sociology

  Credits: 2 TO 3. Offered autumn and spring. Prereq., SOCI 101S and consent of instr. Assisting a faculty member by tutoring, conducting review sessions, helping students with research projects, and carrying out other class-related responsibilities. Open to juniors and seniors with instructor's consent. Proposals must be approved by department chair. Course Attributes: Internships/Practicums

- SOCI 391 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of new courses or one time offerings of current topics.

- SOCI 398 - Internship

  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- SOCI 423 - Sociology of Corrections

  Credits: 3. Offered spring. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of the purposes, structures, and processes of jails, prisons, and community corrections, including probation and parole. Emphasis on historical development and current trends and issues in corrections.

- SOCI 435 - Law and Society

  Credits: 3. Offered spring even-numbered years. Prereq., SOCI 101S. The study of the law and society, including the origin, institutionalization, and impact of law and legal systems.

- SOCI 438 - Seminar in Crime & Deviance

  Credits: 3. Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only. Course Attributes: Writing Course-Advanced

- SOCI 441 - Capstone: Inequal and Soc Just

Credits: 3. Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation. Course Attributes: Writing Course-Advanced

- SOCI 442 - ISJ Service Learning

  Credits: 3 TO 4. Prereq, consent of instr. Supervised fieldwork and research in settings relevant to Inequality and Social Justice, building participatory research and critical thinking skills; relationships with people in groups marginalized by systems of inequality; citizenship awareness. Course Attributes: Service Learning

- SOCI 443 - Sociology of Poverty

  Credits: 3. Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.

- SOCI 446 - Prost & Human Trafficking

  Credits: 3. Offered every other year. Exploration of prostitution and human trafficking, their incidence, causes, implications for individuals and society, and responses from non-governmental organizations and governments. Highlights various feminist and human rights approaches to these phenomena.

- SOCI 455 - Classical Sociological Theory

  Credits: 3. Offered autumn and spring. Prereq., SOCI 101S, or consent of instr. Exploration of the classical foundations of sociological theories, emphasizing Marx, Durkheim, and Weber. Required of all sociology majors.

- SOCI 460 - Capstone: Rural and Env Change

  Credits: 3. Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only. Course Attributes: Writing Course-Advanced

- SOCI 470 - Environmental Sociology

  Credits: 3. Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.

- SOCI 471 - Gender and Global Development

  Credits: 3. Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.

- SOCI 485 - Political Sociology

  Credits: 3. Offered spring odd-numbered years. Prereq., junior or senior standing. Analysis of power; states; institutional interrelationships; production and transmisison of ideologies; political participation and membership; social movements.

- SOCI 488 - Writing for Sociology

  Credits: 3. Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only. Course Attributes: Writing Course-Advanced

- SOCI 491 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., SOCI 101S. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- SOCI 492 - Independent Study

  Credits: 1 TO 3. (R-9) Offered every term. Prereq., SOCI 101S and consent of instr. Individual work with a faculty supervisor in an area of special interest. Proposals must be approved by department chair. Course Attributes: Independent Study

- SOCI 494 - Seminar/Workshop

Credits: 2 TO 3. Offered intermittently. Prereq., SOCI 101S and at least junior standing. Selected sociological topics.

- SOCI 498 - Internship

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., SOCI 101S, 318 and 202; 2.75 GPA; junior standing and consent of instr. Supervised placement in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice. Course Attributes: Internships/Practicums Service Learning/Volunteer Service Learning

- SOCI 520 - Contemp Social Theory

  Credits: 3. Offered autumn. Sociology Graduate Student or consent of instr. The major sociological theories developed since World War I, including an examination of the critical issues under debate. Level: Graduate

- SOCI 530 - Criminological Theory

  Credits: 3. Offered autumn. Consent of instr. Advanced study of the major theories of crime and criminality; includes the concepts, propositions, and causal logic, together with relevant research findings. Level: Graduate

- SOCI 538 - Sem in Crime & Deviance

  Credits: 3. Offered intermittently. Consent of instructor. Graduate-level studies of a specific criminological topic or issue with special emphasis on theory, research, policy, and practice. Level: Graduate

- SOCI 545 - Sem in Inequality & Soc Justic

  Credits: 3. Offered spring. Graduate student in Sociology or consent of instr. Advanced study of variable topics in inequality and social justice held in a small group setting that maximizes opportunities for graduate student research, discussion, and writing. Level: Graduate

- SOCI 561 - Qualitative Methods

  Credits: 3. Offered spring. Consent of instr. Introduction to the basic methods used to conduct qualitative studies including ethnography, interviewing, observation and/or focus group. Includes hands-on fieldwork projects, data coding and analysis, and research ethics. Draws on examples and literature from sociology. Students should have had undergraduate research methods training. Level: Graduate

- SOCI 562 - Quantitative Methods

  Credits: 3. Offered autumn. Prereq., SOCI 101S, 318 and 202. Introduction to the basic methods used to conduct quantitative sociological research and program evaluation including proposal development, survey design, sampling techniques, data analysis, and dissemination of findings. Level: Graduate

- SOCI 563 - Social Data Analysis

  Credits: 3. Offered spring. Consent of instr. A hands-on introduction to preparing sociological reports and documents, performing research and statistical tasks common to the field. Presumes no previous knowledge of microcomputers. Level: Graduate

- SOCI 590 - Sociology Internship

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Supervised placement for graduate students in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice.. Level: Graduate Course Attributes: Internships/Practicums Research & Creative Schlrshp

- SOCI 594 - Graduate Seminar

  Credits: 3. (R-9) Offered intermittently. Selected sociological topics. Level: Graduate

- SOCI 595 - Special Topics

  Credits: 1 TO 12. (R-12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate Course Attributes: Internships/Practicums

- SOCI 596 - Independent Study

  Credits: 1 TO 6. (R-6)Offered every term. Prereq., consent of instr. Work with a faculty supervisor in an area of special interest. Level: Graduate Course Attributes: Independent Study

- SOCI 597 - Graduate Research

Credits: 2 TO 3. (R-9) Offered every term. Directed research. Student must develop a specific research or evaluation proposal which is approved by the instructor prior to registration. Those students electing the professional paper option may apply three credits of 597 toward graduation. Level: Graduate

- SOCI 598 - Internship
  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate Course Attributes: Internships/Practicums
- SOCI 599 - Thesis/Professional Paper
  Credits: 1 TO 6. (R-6) Offered every term. Students may apply six credits of 599 toward graduation. Level: Graduate

Sociology B.A.

General Sociology Major:

Students whose primary interest is in a general sociology major are urged to develop a plan of study with their advisor; they must take three electives in addition to the core courses and major content requirements listed above. Any sociology course, including courses from any of the three options, may be included in your study plan. The general sociology major prepares students for positions which require a bachelor's degree in one of the social science disciplines, including employment in a variety of government and private-sector agencies, or for a graduate program in sociology. It also provides valuable preparation for related fields such as law, social work, education, counseling, politics, and public administration.

Bachelor of Arts - Sociology

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 39

Required Cumulative GPA: 2.0

Note: No more than 60 sociology credits may count toward graduation.

Lower Division Core Courses

Rule: All courses listed are required

	Course	**Credits**
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Upper Division Core Courses

Rule: All courses listed are required

	Course	Credits
	SOCI 318 - Sociological Research Methods Offered every term. Prereq., SOCI 101S, Sociology majors only, or consent of instr. Methods of research in the social sciences including naturalistic observation, interviewing, measurement, experiments, surveys, content analysis, and basic data analysis. Required of all majors.	3 Credits
	SOCI 455 - Classical Sociological Theory Offered autumn and spring. Prereq., SOCI 101S, or consent of instr. Exploration of the classical foundations of sociological theories, emphasizing Marx, Durkheim, and Weber. Required of all sociology majors.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Major Content Elective Courses

Rule: Choose 4 courses from those listed. 2 must be numbered 300 or above.
Note: SOCI 211S or SOCI 330 will count towards the 12 credits but not both.

	Course	Credits
	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 270 - Intro Development Sociology Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.	3 Credits
	SOCI 275S - Gender and Society Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements.	3 Credits
	SOCI 306 - Sociology of Work Offered intermittently. An introduction to contemporary sociological debates on work including overwork, working poor, housework, globalization, mechanization, routinization, surveillance, and unions. Special focus on gender and class impacts on working life.	3 Credits
	SOCI 308 - Soc of Education Offered intermittently. Prereq., SOCI 101S. The structure and operation of the educational system in the United States, with special attention to the organization and effectiveness of schools.	3 Credits

	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
	SOCI 345 - Sociology of Organizations Offered intermittently. Prereq., SOCI 101S. Historical and analytical study of organizations as social systems, with an emphasis on applying theoretical models to analyzing organizational behavior and change.	3 Credits
	SOCI 346 - Rural Sociology Offered intermittently. Prereq., SOCI 101S recommended. Demographic, economic and sociocultural change in rural communities with an emphasis on global economy, political structure, urbanization, and economic and social infrastructure. Special attention given to the rural west and Montana.	3 Credits
	SOCI 350 - The Community Offered intermittently. Prereq., SOCI 101S. The study of families, peer groups, neighborhoods, voluntary associations, power structures, social classes and large scale organizations as they come together in local communities.	3 Credits
	SOCI 355 - Population and Society Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.	3 Credits
	SOCI 382 - Soc Psych and Social Structure Offered autumn. Prereq., SOCI 101S. The study of the behavior of individuals in social contexts ranging from small groups to societies. Topics include attitude change, conformity, power, status, self-concept formation, and decision-making.	3 Credits
	SOCI 470 - Environmental Sociology Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.	3 Credits
	SOCI 485 - Political Sociology Offered spring odd-numbered years. Prereq., junior or senior standing. Analysis of power; states; institutional interrelationships; production and transmisison of ideologies; political participation and membership; social movements.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Writing Course

Rule: Must complete 1 of the following courses

Note: A non-sociology upper division writing course from another department may be substituted for this requirement with departmental consent.

	Course	Credits
	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
	SOCI 460 - Capstone: Rural and Env Change Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 488 - Writing for Sociology Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

General Sociology Electives

Rule: Choose 5 of the following courses:

	Course	Credits
	ENST 225 - Community & Enviornment Offered autumn. Same as SOCI 225. Exploration of the ways that communities address their environmental concerns. Introduction of relevant social science concepts.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	SOCI 130S - Soc of Alternative Religions Offered spring. Unconventional religious groups in American society. Topics include recruitment, conversion, commitment, defection, leadership, belief systems, organizational structure and change.	3 Credits

	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 221 - Criminal Justice System Offered spring. A systematic survey of crime and the administration of justice in the United States, including the organizational structures, processes, and dynamics of law enforcement, criminal adjudication, and corrections.	3 Credits
	SOCI 312 - Criminal Adjudication Offered spring odd-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of adjudicatory processes applied to the criminally accused. Includes pretrial, trial, and sentencing practices and procedures. Special attention to the sociological dimensions of criminal adjudication: its cultural underpinnings, structural characteristics and interactional dynamics.	3 Credits
	SOCI 314 - Extraordinary Group Behavior Offered intermittently. Prereq., SOCI 101S. The study of emergent social behavior including rumors, crowds, crazes, riots, panics, terrorism, revolutions and social movements.	3 Credits
	SOCI 335 - Juvenile Justice System Offered autumn. Prereq., SOCI 101S and 211S or 330. An analysis of the juvenile justice system in the United States, including the historical development of policies and practices. The role of various social agencies in defining, preventing, and responding to delinquency.	3 Credits
	SOCI 362 - Sociology of Law Enforcement Offered autumn even-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of policing in society, with emphasis on the cultural context in which it occurs, its structural characteristics, and social psychological processes.	3 Credits
	SOCI 386 - Preceptorship in Sociology Offered autumn and spring. Prereq., SOCI 101S and consent of instr. Assisting a faculty member by tutoring, conducting review sessions, helping students with research projects, and carrying out other class-related responsibilities. Open to juniors and seniors with instructor's consent. Proposals must be approved by department chair.	2 To 3 Credits
	SOCI 423 - Sociology of Corrections Offered spring. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of the purposes, structures, and processes of jails, prisons, and community corrections, including probation and parole. Emphasis on historical development and current trends and issues in corrections.	3 Credits
	SOCI 435 - Law and Society Offered spring even-numbered years. Prereq., SOCI 101S. The study of the law and society, including the origin, institutionalization, and impact of law and legal systems.	3 Credits
	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits

	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
	SOCI 442 - ISJ Service Learning Prereq, consent of instr. Supervised fieldwork and research in settings relevant to Inequality and Social Justice, building participatory research and critical thinking skills; relationships with people in groups marginalized by systems of inequality; citizenship awareness.	3 To 4 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	SOCI 444 - Issues in Inequality Offered intermittently. Consent of instr. Analysis of selected topics in inequality and social justice. Possible topics include Native Americans, disabilities, age, sexual orientation, and gender.	3 Credits
	SOCI 460 - Capstone: Rural and Env Change Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
	SOCI 488 - Writing for Sociology Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 492 - Independent Study (R-9) Offered every term. Prereq., SOCI 101S and consent of instr. Individual work with a faculty supervisor in an area of special interest. Proposals must be approved by department chair.	1 To 3 Credits
	SOCI 494 - Seminar/Workshop Offered intermittently. Prereq., SOCI 101S and at least junior standing. Selected sociological topics.	2 To 3 Credits
	SOCI 498 - Internship (R-6) Offered every term. Prereq., SOCI 101S, 318 and 202; 2.75 GPA; junior standing and consent of instr. Supervised placement in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice.	1 To 6 Credits

Minimum Required Grade: C-	15 Total Credits Required

Criminology

Criminology Option:

Criminology has been an area of study within sociology since the inception of the discipline at the turn of the twentieth century. Contemporary criminology examines the making of laws, the nature and extent of crime, the causes of crime, and society's efforts to control crime through the juvenile and criminal justice systems. The option builds upon the required course work in sociology and allows students to pursue extended study of crime and the criminal justice system. In addition, the option provides opportunity for practical experience in juvenile and criminal justice systems through internship placement. The criminology option prepares students for employment in public and private criminal justice agencies, as well as graduate study in sociology, criminal justice, and law.

Bachelor of Arts - Sociology; Criminology Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 39

Required Cumulative GPA: 2.0

Note: No more than 60 sociology credits may count toward graduation.

Lower Core Courses

Rule: All courses are required

	Course	Credits
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits

Minimum Required Grade: C-		6 Total Credits Required

Upper Core Courses

Rule: All courses are required

	Course	Credits

	SOCI 318 - Sociological Research Methods Offered every term. Prereq., SOCI 101S, Sociology majors only, or consent of instr. Methods of research in the social sciences including naturalistic observation, interviewing, measurement, experiments, surveys, content analysis, and basic data analysis. Required of all majors.	3 Credits
	SOCI 455 - Classical Sociological Theory Offered autumn and spring. Prereq., SOCI 101S, or consent of instr. Exploration of the classical foundations of sociological theories, emphasizing Marx, Durkheim, and Weber. Required of all sociology majors.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Major Content Courses

Rule: Choose 4 of the following courses. 2 must be numbered 300 or above.

Note: Students may count only 1 course from their respective option as a major content course.

Note: SOCI 211S or SOCI 330 can count towards the 12 credits but not both.

	Course	**Credits**
	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 270 - Intro Development Sociology Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.	3 Credits
	SOCI 275S - Gender and Society Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements.	3 Credits
	SOCI 306 - Sociology of Work Offered intermittently. An introduction to contemporary sociological debates on work including overwork, working poor, housework, globalization, mechanization, routinization, surveillance, and unions. Special focus on gender and class impacts on working life.	3 Credits
	SOCI 308 - Soc of Education Offered intermittently. Prereq., SOCI 101S. The structure and operation of the educational system in the United States, with special attention to the organization and effectiveness of schools.	3 Credits

	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
	SOCI 345 - Sociology of Organizations Offered intermittently. Prereq., SOCI 101S. Historical and analytical study of organizations as social systems, with an emphasis on applying theoretical models to analyzing organizational behavior and change.	3 Credits
	SOCI 346 - Rural Sociology Offered intermittently. Prereq., SOCI 101S recommended. Demographic, economic and sociocultural change in rural communities with an emphasis on global economy, political structure, urbanization, and economic and social infrastructure. Special attention given to the rural west and Montana.	3 Credits
	SOCI 350 - The Community Offered intermittently. Prereq., SOCI 101S. The study of families, peer groups, neighborhoods, voluntary associations, power structures, social classes and large scale organizations as they come together in local communities.	3 Credits
	SOCI 355 - Population and Society Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.	3 Credits
	SOCI 382 - Soc Psych and Social Structure Offered autumn. Prereq., SOCI 101S. The study of the behavior of individuals in social contexts ranging from small groups to societies. Topics include attitude change, conformity, power, status, self-concept formation, and decision-making.	3 Credits
	SOCI 470 - Environmental Sociology Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.	3 Credits
	SOCI 485 - Political Sociology Offered spring odd-numbered years. Prereq., junior or senior standing. Analysis of power; states; institutional interrelationships; production and transmisison of ideologies; political participation and membership; social movements.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Writing Course

Rule: Must complete 1 of the following courses

Note: A non-sociology upper division writing course from another department may be substituted for this requirement with departmental consent.

	Course	Credits
	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
	SOCI 460 - Capstone: Rural and Env Change Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 488 - Writing for Sociology Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Criminology Option

Rule: Complete 15 option credits

15 Total Credits Required

Option Core

Rule: Complete SOCI 221 and either SOCI 211 or SOCI 330.

Note: Students should complete this core before taking any Criminology elective courses. The chosen course cannot count towards the major content course requirement.

	Course	Credits
	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits

	SOCI 221 - Criminal Justice System Offered spring. A systematic survey of crime and the administration of justice in the United States, including the organizational structures, processes, and dynamics of law enforcement, criminal adjudication, and corrections.	3 Credits
	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Option Electives

Rule: Choose 3 of the following courses

	Course	Credits
	SOCI 312 - Criminal Adjudication Offered spring odd-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of adjudicatory processes applied to the criminally accused. Includes pretrial, trial, and sentencing practices and procedures. Special attention to the sociological dimensions of criminal adjudication: its cultural underpinnings, structural characteristics and interactional dynamics.	3 Credits
	SOCI 335 - Juvenile Justice System Offered autumn. Prereq., SOCI 101S and 211S or 330. An analysis of the juvenile justice system in the United States, including the historical development of policies and practices. The role of various social agencies in defining, preventing, and responding to delinquency.	3 Credits
	SOCI 362 - Sociology of Law Enforcement Offered autumn even-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of policing in society, with emphasis on the cultural context in which it occurs, its structural characteristics, and social psychological processes.	3 Credits
	SOCI 423 - Sociology of Corrections Offered spring. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of the purposes, structures, and processes of jails, prisons, and community corrections, including probation and parole. Emphasis on historical development and current trends and issues in corrections.	3 Credits
	SOCI 435 - Law and Society Offered spring even-numbered years. Prereq., SOCI 101S. The study of the law and society, including the origin, institutionalization, and impact of law and legal systems.	3 Credits

	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 498 - Internship (R-6) Offered every term. Prereq., SOCI 101S, 318 and 202; 2.75 GPA; junior standing and consent of instr. Supervised placement in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice.	1 To 6 Credits
Minimum Required Grade: C-		9 Total Credits Required

Inequality and Social Justice

Inequality is at the core of most sociological inquires. The option in inequality and social justice examines the causes and consequences of inequalities based on class, gender, race/ethnicity, disability, age, and sexual orientation. Social inequalities at the local, national, and global levels are studied, as are the political, legal, and social processes that contribute to or reduce inequalities. Ethical elements of social justice are considered with regard to inequality. An option in inequality and social justice prepares students for employment in a variety of government and private-sector agencies, especially in social services, or for graduate school in Sociology. It also provides valuable preparation for related fields such as law, social work, education, counseling, politics, and public administration.

Bachelor of Arts - Sociology; Inequality and Social Justice Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 39

Required Cumulative GPA: 2.0

Note: No more than 60 sociology credits may count toward graduation.

Lower Core Courses

Rule: All courses are required

	Course	**Credits**
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Upper Core Courses

Rule: All courses are required

	Course	Credits
	SOCI 318 - Sociological Research Methods Offered every term. Prereq., SOCI 101S, Sociology majors only, or consent of instr. Methods of research in the social sciences including naturalistic observation, interviewing, measurement, experiments, surveys, content analysis, and basic data analysis. Required of all majors.	3 Credits
	SOCI 455 - Classical Sociological Theory Offered autumn and spring. Prereq., SOCI 101S, or consent of instr. Exploration of the classical foundations of sociological theories, emphasizing Marx, Durkheim, and Weber. Required of all sociology majors.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Major Content Courses

Rule: Choose 4 courses from those listed. 2 must be numbered 300 or above.

Note: Students may count only 1 course from their respective option as a major content course.

Note: SOCI 211S or SOCI 330 can count towards the 12 credits but not both.

	Course	Credits
	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 270 - Intro Development Sociology Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.	3 Credits
	SOCI 275S - Gender and Society Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements.	3 Credits
	SOCI 306 - Sociology of Work Offered intermittently. An introduction to contemporary sociological debates on work including overwork, working poor, housework, globalization, mechanization, routinization, surveillance, and unions. Special focus on gender and class impacts on working life.	3 Credits

	SOCI 308 - Soc of Education Offered intermittently. Prereq., SOCI 101S. The structure and operation of the educational system in the United States, with special attention to the organization and effectiveness of schools.	3 Credits
	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
	SOCI 345 - Sociology of Organizations Offered intermittently. Prereq., SOCI 101S. Historical and analytical study of organizations as social systems, with an emphasis on applying theoretical models to analyzing organizational behavior and change.	3 Credits
	SOCI 346 - Rural Sociology Offered intermittently. Prereq., SOCI 101S recommended. Demographic, economic and sociocultural change in rural communities with an emphasis on global economy, political structure, urbanization, and economic and social infrastructure. Special attention given to the rural west and Montana.	3 Credits
	SOCI 350 - The Community Offered intermittently. Prereq., SOCI 101S. The study of families, peer groups, neighborhoods, voluntary associations, power structures, social classes and large scale organizations as they come together in local communities.	3 Credits
	SOCI 355 - Population and Society Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.	3 Credits
	SOCI 382 - Soc Psych and Social Structure Offered autumn. Prereq., SOCI 101S. The study of the behavior of individuals in social contexts ranging from small groups to societies. Topics include attitude change, conformity, power, status, self-concept formation, and decision-making.	3 Credits
	SOCI 470 - Environmental Sociology Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.	3 Credits

	SOCI 485 - Political Sociology Offered spring odd-numbered years. Prereq., junior or senior standing. Analysis of power; states; institutional interrelationships; production and transmisison of ideologies; political participation and membership; social movements.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Writing Course

Rule: Must complete 1 of the following courses

Note: A non-sociology upper division writing course from another department may be substituted for this requirement with departmental consent.

	Course	Credits
	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
	SOCI 460 - Capstone: Rural and Env Change Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 488 - Writing for Sociology Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Inequality and Social Justice Option

Rule: Complete 15 credits in the following categories

Minimum Required Grade: C-

15 Total Credits Required

Option Core

Rule: Complete SOCI 441 and either SOCI 220S or SOCI 275S.

Note: Students should complete SOCI 220S or SOCI 275S first, and complete at least 2 ISJ electives before taking SOCI 441.

	Course	Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 275S - Gender and Society Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Option Electives

Rule: Choose 3 of the following courses

Note: It is recommended that students take SOCI 442 or SOCI 498 concurrent with SOCI 441.

	Course	Credits
	SOCI 314 - Extraordinary Group Behavior Offered intermittently. Prereq., SOCI 101S. The study of emergent social behavior including rumors, crowds, crazes, riots, panics, terrorism, revolutions and social movements.	3 Credits
	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
	SOCI 435 - Law and Society Offered spring even-numbered years. Prereq., SOCI 101S. The study of the law and society, including the origin, institutionalization, and impact of law and legal systems.	3 Credits
	SOCI 442 - ISJ Service Learning Prereq, consent of instr. Supervised fieldwork and research in settings relevant to Inequality and Social Justice, building participatory research and critical thinking skills; relationships with people in groups marginalized by systems of inequality; citizenship awareness.	3 To 4 Credits

	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
	SOCI 485 - Political Sociology Offered spring odd-numbered years. Prereq., junior or senior standing. Analysis of power; states; institutional interrelationships; production and transmisison of ideologies; political participation and membership; social movements.	3 Credits
	SOCI 498 - Internship (R-6) Offered every term. Prereq., SOCI 101S, 318 and 202; 2.75 GPA; junior standing and consent of instr. Supervised placement in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice.	1 To 6 Credits
Minimum Required Grade: C-		9 Total Credits Required

Rural and Environmental Change

Rural environments, residents and agencies are facing rapid social, economic, demographic and political change. This option develops analytical and practical skills for understanding rural and environmental change globally and in the American West, and its policy implications in such areas as rural health, welfare and work; community development and assessment; native peoples and natural resource management. An option in rural and environmental change prepares students for employment with either a government, private, or non-profit agency concerned with the above topics or for pursuing an advanced degree in sociology.

Requirements, in addition to courses in the core and content areas, include:

Bachelor of Arts - Sociology; Rural and Environmental Change Option

College Humanities & Sciences

Catalog Year: 2016-2017

Teaching Sociology

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Teacher Preparation in Sociology

Students who want to be licensed to teach sociology at the high school level must complete the BA degree requirements in sociology (general sociology, no option required). They also must complete a teaching major or minor in a second field of their choice and the professional licensure program in the College of Education. Students may also earn a teaching minor in sociology. See the Department of Curriculum & Instruction for information about admission to the Teacher Education Program and completion of these licensure programs.

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 42

Required Cumulative GPA: 2.0

Note: No more than 60 sociology credits may count toward graduation. Students who want to be licensed to teach sociology at the high school level must complete the BA degree requirements in sociology (general sociology, no option required). They also must complete a teaching major or minor in a second field of their choice and the professional licensure program in the College of Education.

General Sociology Requirements

Rule: Choose 5 of the following courses:

	Course	Credits
	ENST 225 - Community & Enviornment Offered autumn. Same as SOCI 225. Exploration of the ways that communities address their environmental concerns. Introduction of relevant social science concepts.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	SOCI 130S - Soc of Alternative Religions Offered spring. Unconventional religious groups in American society. Topics include recruitment, conversion, commitment, defection, leadership, belief systems, organizational structure and change.	3 Credits

	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 221 - Criminal Justice System Offered spring. A systematic survey of crime and the administration of justice in the United States, including the organizational structures, processes, and dynamics of law enforcement, criminal adjudication, and corrections.	3 Credits
	SOCI 312 - Criminal Adjudication Offered spring odd-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of adjudicatory processes applied to the criminally accused. Includes pretrial, trial, and sentencing practices and procedures. Special attention to the sociological dimensions of criminal adjudication: its cultural underpinnings, structural characteristics and interactional dynamics.	3 Credits
	SOCI 314 - Extraordinary Group Behavior Offered intermittently. Prereq., SOCI 101S. The study of emergent social behavior including rumors, crowds, crazes, riots, panics, terrorism, revolutions and social movements.	3 Credits
	SOCI 335 - Juvenile Justice System Offered autumn. Prereq., SOCI 101S and 211S or 330. An analysis of the juvenile justice system in the United States, including the historical development of policies and practices. The role of various social agencies in defining, preventing, and responding to delinquency.	3 Credits
	SOCI 362 - Sociology of Law Enforcement Offered autumn even-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of policing in society, with emphasis on the cultural context in which it occurs, its structural characteristics, and social psychological processes.	3 Credits
	SOCI 386 - Preceptorship in Sociology Offered autumn and spring. Prereq., SOCI 101S and consent of instr. Assisting a faculty member by tutoring, conducting review sessions, helping students with research projects, and carrying out other class-related responsibilities. Open to juniors and seniors with instructor's consent. Proposals must be approved by department chair.	2 To 3 Credits
	SOCI 423 - Sociology of Corrections Offered spring. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of the purposes, structures, and processes of jails, prisons, and community corrections, including probation and parole. Emphasis on historical development and current trends and issues in corrections.	3 Credits
	SOCI 435 - Law and Society Offered spring even-numbered years. Prereq., SOCI 101S. The study of the law and society, including the origin, institutionalization, and impact of law and legal systems.	3 Credits

	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits
	SOCI 442 - ISJ Service Learning Prereq, consent of instr. Supervised fieldwork and research in settings relevant to Inequality and Social Justice, building participatory research and critical thinking skills; relationships with people in groups marginalized by systems of inequality; citizenship awareness.	3 To 4 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	SOCI 444 - Issues in Inequality Offered intermittently. Consent of instr. Analysis of selected topics in inequality and social justice. Possible topics include Native Americans, disabilities, age, sexual orientation, and gender.	3 Credits
	SOCI 460 - Capstone: Rural and Env Change Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
	SOCI 488 - Writing for Sociology Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 492 - Independent Study (R-9) Offered every term. Prereq., SOCI 101S and consent of instr. Individual work with a faculty supervisor in an area of special interest. Proposals must be approved by department chair.	1 To 3 Credits
	SOCI 494 - Seminar/Workshop Offered intermittently. Prereq., SOCI 101S and at least junior standing. Selected sociological topics.	2 To 3 Credits

	SOCI 498 - Internship (R-6) Offered every term. Prereq., SOCI 101S, 318 and 202; 2.75 GPA; junior standing and consent of instr. Supervised placement in an agency or business which involves work experience related to criminology, sociology, rural and environmental change and/or inequality and social justice.	1 To 6 Credits
Minimum Required Grade: C-		15 Total Credits Required

Teaching Licensure Requirements

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major GPA of 2.75 is required to be eligible for student teaching. This major does not qualify as a single field endorsement. Individuals must complete a second teaching major or minor in another content area.

Teaching Methods Course

Rule: Complete the following course.

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Social Studies.

	Course	**Credits**

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Minor - Sociology (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 21

Required Cumulative GPA: 1.7

Note: To earn a minor in sociology the student must complete a minimum of 21 credits in sociology with at least 9 of these credits at the upper-division level.

Lower Division Core Courses

Rule: All courses are required

	Course	Credits
	SOCI 101S - Introduction to Sociology Offered every term. Overview of the principles and concepts used in the study of human social interaction, groups, communities and societies. Required of all majors.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Division Core Courses

Rule: All courses are required

	Course	Credits
	SOCI 318 - Sociological Research Methods Offered every term. Prereq., SOCI 101S, Sociology majors only, or consent of instr. Methods of research in the social sciences including naturalistic observation, interviewing, measurement, experiments, surveys, content analysis, and basic data analysis. Required of all majors.	3 Credits
	SOCI 455 - Classical Sociological Theory Offered autumn and spring. Prereq., SOCI 101S, or consent of instr. Exploration of the classical foundations of sociological theories, emphasizing Marx, Durkheim, and Weber. Required of all sociology majors.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Minor Content Courses

Rule: Choose 2 of the following courses

	Course	Credits

	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 220S - Race, Gender & Class Offered autumn. Same as WGS 220S. Analysis of the intersecting structure and dynamics of race, gender and class. Focus on power relationships, intergroup conflict and minority-group status.	3 Credits
	SOCI 270 - Intro Development Sociology Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.	3 Credits
	SOCI 275S - Gender and Society Offered spring. Exploration of the social construction of gender, especially in western, post-industrial societies such as the U.S.; gender ideologies affect the social definition and position of gendered individuals in work, family, sexual relationships, gendered divisions of labor, and social movements.	3 Credits
	SOCI 306 - Sociology of Work Offered intermittently. An introduction to contemporary sociological debates on work including overwork, working poor, housework, globalization, mechanization, routinization, surveillance, and unions. Special focus on gender and class impacts on working life.	3 Credits
	SOCI 308 - Soc of Education Offered intermittently. Prereq., SOCI 101S. The structure and operation of the educational system in the United States, with special attention to the organization and effectiveness of schools.	3 Credits
	SOCI 325 - Social Stratification Offered intermittently. Prereq., SOCI 101S or SOCI 220S or SOCI 275S. The origins, institutionalization and change of class, status, prestige, power and other forms of social inequality. Special attention to the effects of stratification on individuals.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
	SOCI 345 - Sociology of Organizations Offered intermittently. Prereq., SOCI 101S. Historical and analytical study of organizations as social systems, with an emphasis on applying theoretical models to analyzing organizational behavior and change.	3 Credits
	SOCI 346 - Rural Sociology Offered intermittently. Prereq., SOCI 101S recommended. Demographic, economic and sociocultural change in rural communities with an emphasis on global economy, political structure, urbanization, and economic and social infrastructure. Special attention given to the rural west and Montana.	3 Credits
	SOCI 350 - The Community Offered intermittently. Prereq., SOCI 101S. The study of families, peer groups, neighborhoods, voluntary associations, power structures, social classes and large scale organizations as they come together in local communities.	3 Credits

	SOCI 355 - Population and Society Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.	3 Credits
	SOCI 382 - Soc Psych and Social Structure Offered autumn. Prereq., SOCI 101S. The study of the behavior of individuals in social contexts ranging from small groups to societies. Topics include attitude change, conformity, power, status, self-concept formation, and decision-making.	3 Credits
	SOCI 470 - Environmental Sociology Offered autumn. Introduction to environmental sociology and the social dimensions of environmental change. Case studies of major environmental problems as applications of environmental sociological perspectives.	3 Credits
	SOCI 485 - Political Sociology Offered spring odd-numbered years. Prereq., junior or senior standing. Analysis of power; states; institutional interrelationships; production and transmisison of ideologies; political participation and membership; social movements.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

General Sociology Electives

Rule: Choose 2 of the following courses

	Course	Credits
	ENST 225 - Community & Enviornment Offered autumn. Same as SOCI 225. Exploration of the ways that communities address their environmental concerns. Introduction of relevant social science concepts.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	SOCI 130S - Soc of Alternative Religions Offered spring. Unconventional religious groups in American society. Topics include recruitment, conversion, commitment, defection, leadership, belief systems, organizational structure and change.	3 Credits
	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
	SOCI 221 - Criminal Justice System Offered spring. A systematic survey of crime and the administration of justice in the United States, including the organizational structures, processes, and dynamics of law enforcement, criminal adjudication, and corrections.	3 Credits

	SOCI 312 - Criminal Adjudication Offered spring odd-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of adjudicatory processes applied to the criminally accused. Includes pretrial, trial, and sentencing practices and procedures. Special attention to the sociological dimensions of criminal adjudication: its cultural underpinnings, structural characteristics and interactional dynamics.	3 Credits
	SOCI 314 - Extraordinary Group Behavior Offered intermittently. Prereq., SOCI 101S. The study of emergent social behavior including rumors, crowds, crazes, riots, panics, terrorism, revolutions and social movements.	3 Credits
	SOCI 335 - Juvenile Justice System Offered autumn. Prereq., SOCI 101S and 211S or 330. An analysis of the juvenile justice system in the United States, including the historical development of policies and practices. The role of various social agencies in defining, preventing, and responding to delinquency.	3 Credits
	SOCI 362 - Sociology of Law Enforcement Offered autumn even-numbered years. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of policing in society, with emphasis on the cultural context in which it occurs, its structural characteristics, and social psychological processes.	3 Credits
	SOCI 386 - Preceptorship in Sociology Offered autumn and spring. Prereq., SOCI 101S and consent of instr. Assisting a faculty member by tutoring, conducting review sessions, helping students with research projects, and carrying out other class-related responsibilities. Open to juniors and seniors with instructor's consent. Proposals must be approved by department chair.	2 To 3 Credits
	SOCI 423 - Sociology of Corrections Offered spring. Prereq., SOCI 101S, 221 and either 211S or 330. An examination of the purposes, structures, and processes of jails, prisons, and community corrections, including probation and parole. Emphasis on historical development and current trends and issues in corrections.	3 Credits
	SOCI 435 - Law and Society Offered spring even-numbered years. Prereq., SOCI 101S. The study of the law and society, including the origin, institutionalization, and impact of law and legal systems.	3 Credits
	SOCI 438 - Seminar in Crime & Deviance Offered every term. Consent of instructor. Advanced studies in criminology theory, research, and practice. This course will meet the upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 441 - Capstone: Inequal and Soc Just Offered spring. SOCI 101S and two inequality and social justice courses and consent of instr. Research and writing on Inequity and Social Justice. Students bring together readings from other inequality content courses and/or independent readings, research methods training, and data and/or internship experience to write a final research paper on a topic of their choice within the ISJ area. Meets advanced writing expectation.	3 Credits

	SOCI 442 - ISJ Service Learning Prereq, consent of instr. Supervised fieldwork and research in settings relevant to Inequality and Social Justice, building participatory research and critical thinking skills; relationships with people in groups marginalized by systems of inequality; citizenship awareness.	3 To 4 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
	SOCI 444 - Issues in Inequality Offered intermittently. Consent of instr. Analysis of selected topics in inequality and social justice. Possible topics include Native Americans, disabilities, age, sexual orientation, and gender.	3 Credits
	SOCI 460 - Capstone: Rural and Env Change Offered spring. Prereq., SOCI 101S and consent of instr. Advanced study of issues in rural, environmental, and development sociology with an emphasis on theoretical perspectives and applications. Meets upper-division writing expectation for sociology majors only.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
	SOCI 488 - Writing for Sociology Offered autumn and spring. Consent of instr. Advanced study of variable topics or issues in sociology, with emphasis on writing for the discipline. This course satisfies the upper-division writing expectation for sociology majors only.	3 Credits

Teaching Sociology Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching

areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - Sociology (Minor); Track: Teaching Sociology

College Humanities & Sciences

Teaching Licensure Requirements

Note: Individuals completing a teaching minor must also complete a teaching major in another content area. Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching.

Teaching Methods Course

Rule: Complete the following course.

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Social Studies.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Minor - International Development Stds (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 21

Required Cumulative GPA: 2.5

Note: The IDS minor requires 21 credits. At least twelve of these credits must come from the CORE IDS courses and as many as nine credits can come from CONTENT courses. At least seven credits must be upper division credits.

Core Courses

Rule: Must complete at least 12 credits from the following courses:

	Course	Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	COMX 204X - International & Dvlpmnt Comm Offered yearly. International Communication is concerned with information exchange across national borders while Development Communication focuses on the historical, current, and prospective role of communication technologies in social change, improving living conditions, and enhancing life prospects - mainly in developing countries.	3 Credits
	ECNS 217X - Issues in Economic Development Offered intermittently. Prereq., ECNS 201S. Study of the processes of economic growth and development in the less developed world.	3 Credits
	ECNS 450 - Adv. Topics in Economic Dev. Offered intermittently. Prereq., ECNS 201S and ECNS 202S, or consent of instructor. Advanced treatment of the processes of economic growth and development in the less developed world.	3 Credits
	ENST 487 - Globalization, Justice & Envir Offered autumn. Study of current trends in economic globalization and its effects on efforts to work for social justice and environmental sustainability, particularly in the Global South. Examination of different models and theories of globalization, analysis of ethical issues raised, and assessment of alternatives proposed.	3 Credits
	GPHY 141S - Geography of World Regions Offered autumn and/or spring. An overall view of how the lands and peoples of the world are organized into coherent geographical regions, how landscapes differ from region to region, and how the people differ in terms of their traits, beliefs, ways of life, and economic livelihood.	3 Credits

	NRSM 170 - International Envir. Change Offered spring. An introduction to natural and anthropogenic environmental change from ancient to contemporary times. Exploration of the historical role and importance of ecological disturbance on the development and maintenance of terrestrial ecosystems around the world. Introduction to fields of study available in the College of Forestry and Conservation.	3 Credits
	NRSM 424 - Community Forestry & Conservtn Offered spring. Co-convened with NRSM 524. In-depth examination of the history, theory and management issues faced in community-driven forestry and conservation in the United States and abroad. Cannot get credit for both NRSM 424 and NRSM 524.	3 Credits
	NRSM 475 - Environment & Development Offered spring. Co-convened with NRSM 575. Examines key social forces that influence how individuals, groups and nation-states understand and live within their bio-physical environments, especially policies and processes relating to development, corporate capitalism, globalization, culture, class and other forms of power and social relations. Pays close attention to ways both indigenous and introduced resource use and management practices (including conservation) variably impact people of different races, classes, genders, cultures and livelihood practices. Cannot get credit for both NRSM 475 and NRSM 575.	3 Credits
	PSCI 431 - Politics of Global Migration Prereq., junior standing or consent of instr. Exploration of the elective and forced migration of peoples within countries and across national boundaries. Geographical coverage includes Asia, North and Central America, Africa, and Europe. Attention to policy and gender issues surrounding economic and political migration.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
	PTRM 451 - Tourism & Sustainability Offered spring. Prereq., PTRM 210, or consent of instructor. Theories and conceptual models are applied to analyzing relationships between the integration of planning theories to sustainability concepts.	3 Credits
	S W 323 - Women & Soc Action Amer Offered intermittently. Prereq., one of SW 100, SOCI 101S, or ANTY 101H or consent of instr. Same as WS 323. Focus on women's experiences of and contributions to social change in North, South and Central America in the mid to late-20th century. Through case studies, testimonials, discussions with activists and Internet connections examine social constructions of gender, compare forms of social action in diverse cultural, political and historical contexts, link practice to theories of social participation, and reflect on lessons learned from women's experiences.	3 Credits
	S W 465 - Social Work Global Context Offered spring even-numbered years. Prereq., upper-division or graduate standing. Examination of globalization, human rights, poverty, international aid, and gender issues; their relationship to social work and social justice, and strategies for action.	3 Credits

	SOCI 270 - Intro Development Sociology Offered autumn. Introduction to sociological perspectives on international development, globalization, and sustainability. Rural and environmental issues emphasized.	3 Credits
	SOCI 471 - Gender and Global Development Offered every other year. Prereq., SOCI 270 or consent of instructor. Advanced perspectives on the relationships between gender and colonization, international development, and globalization.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Content Courses

Rule: Must complete up to 9 credits from the following courses

Note: Under MANS 495 'Special Topics' please select the section 'Transitions from War to Peace'.

	Course	Credits
	ANTY 326E - Indigenous Peoples & Globl Dev Offered spring odd-numbered years. This class will examine the impact of global development on tribal and Indigenous peoples. Topics will include land issues, health, employment, and cultural change caused by global development and explore how these societies are resisting and adapting to their changing world.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	BGEN 160S - Issues in Sustainability Offered every term. Same as CCN 160S. This literature-intensive course is intended to expose the student to a variety of essays addressing the balance of economic development with the principles of sustainability and social equity. The student is offered an introduction to sustainability concepts, natural systems/cycles and environmental economics. Natural capitalism and triple bottom line maximization is explored, along with the role of corporations and small businesses in sustainable development. A survey of issues surrounding corporate social responsibility and sustainability-driven innovation will be conducted.	3 Credits
	COMX 415 - Intercultural Communication Offered autumn and spring. Communication principles and processes in cross-cultural environments. Non-Western cultures are emphasized by contrasting them to Western communication norms.	3 Credits

	COMX 421 - Comm in Non-Profit Organizatns Offered yearly. Focuses on issues in nonprofit organizational communication at macro and micro levels. Topics include: organizational identity, change processes, public relations, fund-raising, advocacy, socialization, stress and burnout, board management and professionalization.	3 Credits
	ECNS 101S - Economic Way of Thinking Offered autumn and spring. A critical examination of the market mechanism as a social decision-making device to guide the use of a nation's resources. The limitations of these processes in light of current economic problems such as the rise of the large corporation, monopoly, environmental degradation, economic discrimination and the increasing role of the government.	3 Credits
	ECNS 433 - Economics of the Environment Offered intermittently. Prereq., ECNS 201S. Outlines a theoretical framework for the analysis of environmental problems, including concepts of market failure and externalities, materials balance and property rights. The policy implications of this analytical model are explored for a range of topics including pollution and the preservation of natural environments and species. Formally cross-listed with EVST 440.	3 Credits
	ECNS 445 - Int Env Econ & Clim Change Offered autumn every other year. Same as CCS 445. Prereq., ECNS 201S. An introduction to the economics of various policy approaches towards climate change and other international environmental issues such as trans-boundary pollution problems, international trade and the environment and pollution haven hypothesis.	3 Credits
	ENST 493 - Study Abroad: Envir Justice LA Offered intermittently. Two week travel seminar to one or more Latin American countries to examine Latin American perspectives on environmental justice and efforts toward sustainable development within the context of the global economy and U. S. foreign policy. Required one-credit seminar offered spring semester to provide background readings.	3 Credits
	FORS 320 - Forest Environmental Economics Offered autumn. Prereq., ECNS 201S; and M 121 and M 122 or M 151 or M 162 or M 171 or M 172. Economic techniques to support decision making about the allocation of scarce resources, and management of forests for timber and other ecosystem services.	3 Credits
	GPHY 121S - Human Geography Offered autumn and spring. Introduction to Human Geography focuses upon the linkages between geography and society including analysis of regions, ethnic groups, urban landscapes, migration and population change, geopolitics, economics, and cultural differences.	3 Credits
	GPHY 243S - Africa Offered autumn even numbered years. A survey of the biophysical and cultural geography of Sub Saharan Africa. Emphasis is on the region's cultural historical development and current ecological, demographic, and economic patterns.	3 Credits

	GPHY 245X - The Middle East Offered intermittently. A survey of the biophysical and cultural geography of Southwest Asia and North Africa. Emphasis on environmental change; prehistory; patterns of cultural and historical change; issues of socio-economic, religious, and political diversity; and the broader political significance of the region.	3 Credits
	GPHY 432 - Human Role Environ Change Offered intermittently. A systematic examination of the ways in which the major physical systems and ecosystems of the earth have been modified by human activity, and approaches to the rehabilitation of these systems.	3 Credits
	GPHY 433 - Cultural Ecology Offered most springs. Prereq., WRIT 101 or WRIT 201 and one Intermediate Writing Course or Consent of Instructor. Examines issues related to culture and the natural environment. Topics include cultural origins and diversity, geography of religion, geolinguistics, plant and animal domestication, livelihood systems, folk and popular culture, ethnic geography, political patterns, demography, industries, urban genesis, and the transformation of environmental systems.	3 Credits
	GPHY 434 - Food and Famine Offered intermittently. Exploration of the production, distribution, and consumption of food; the causes and consequences of hunger; and measures that might be taken to relieve hunger.	3 Credits
	GPHY 444 - High Asia Offered intermittently. A study of the geography and mountain-society interactions in High Asia. The course includes attention to the theory and methodology of mountain geography, with attention to physical and human systems and their interaction.	3 Credits
	HSTR 231H - Modern Latin America (WRLD) Offered spring. Latin America from wars of independence to the present. Focus on social relations, development models, politics, and popular movements.	3 Credits
	HSTR 241H - Central Asian Cult & Civ (WRLD) Same as ANTY 241H. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits
	HSTR 384 - Hist Internat Human Rights (WRLD) Offered intermittently. A treatment of the powerful global influence of visions of human rights upon the historical and contemporary world in which movements such as abolitionism, women's rights, humanitarian law, racial equality, decolonization and democratization, and the impact of the Universal Declaration of Human Rights.	3 Credits
	MANS 495 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits

	NASX 475 - Tribal Sovereignty Offered Spring. An examination of the evolution of tribal governments from a historical and political perspective. Particular attention is devoted to the issues of tribal sovereignty and tribal-state conflicts.	3 Credits
	NRSM 352 - Mountain Environment and Dev Offered summer only. Coreq., PTRM 353. This course covers the contentious issues surrounding environment and development in the Himalaya using the Garhwal region of India as the example.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 325 - Politics of Latin America Offered autumn. Prereq., junior standing. Latin American politics from both historical and contemporary perspectives.	3 Credits
	PSCI 326 - Politics of Africa Offered autumn. Prereq., junior standing or consent of instr. Development of the political systems of sub-Saharan Africa. Analysis of the interaction between African and Western social, political, and economic forces. Consideration of African political thought.	3 Credits
	PSCI 327 - Politics of Mexico Offered spring. Prereq., junior standing or consent of instr. A review of contemporary politics of Mexico from the Revolution to the present.	3 Credits
	PSCI 443 - Politics of Social Movements Offered spring. Prereq., junior standing or consent of instr. The role of social movements in shaping the politics of power, reflected in public policy, electoral politics, relations of class, race, and gender, and people's understanding of the world and their place in it.	3 Credits
	PTRM 353 - Tourism & Sustnbility Himalaya Offered summer only. Coreq. NRSM 352. In this course we will explore the opportunities and challenges of development with particular reference to nature-based tourism and sustainability in an isolated but rapidly globalizing region of the Himalaya. Students will learn through extensive readings, class discussions, direct field experience (including living in a remote mountain village), meetings with development officials, sustainability activists and stakeholders in the region.	3 Credits

	S W 324 - Gender and Welfare Offered intermittently. Prereq., SW 100 or consent of instr. Same as WGS 324. Exploration of the relationship between gender ideologies and the development of social welfare policies. Examination of historic and contemporary social welfare policies, practices and debates in the United States through a gender lens.	3 Credits
	SOCI 212S - Social Issues Southeast Asia Offered every other year. Introduction to the cultures, societies, and contemporary social problems of Southeast Asia.	3 Credits
	SOCI 346 - Rural Sociology Offered intermittently. Prereq., SOCI 101S recommended. Demographic, economic and sociocultural change in rural communities with an emphasis on global economy, political structure, urbanization, and economic and social infrastructure. Special attention given to the rural west and Montana.	3 Credits
	SOCI 355 - Population and Society Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.	3 Credits
	SOCI 443 - Sociology of Poverty Offered autumn. Prereq. junior or senior standing or consent of instr. An examination of the roots, prevalence, and social characteristics of poverty. Analysis of policies intended to end poverty.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Psychology Department

Christine Fiore, Chair

Psychology is the science of the behavior of humans and other animals. The psychologist, using scientific methods, seeks to understand the causes and purposes of behavior. Psychologists pursue their research and its application in academia, business, government, health, military and social service. The department offers training that leads to the Bachelor of Arts, Master of Arts, Educational Specialist, and Doctor of Philosophy degrees.

Department Faculty

Professors

Bryan Cochran, Professor of Psychology and Director of Clinical Training
Lucian Conway, Professor Social Psychology
Christine Fiore, Ph.D., Professor and Department Chair
Stuart Hall, Professor Physiological Psychology and Clinical Neuropsychology
Lois Muir, Professor Developmental Psychology
David Schuldberg, Professor / Grant Evaluator
Tom Seekins, Professor Developmental Psychology
Paul Silverman, Professor Developmental Psychology; Chair, Interdisciplinary Minor in Human and Family Development
Allen Szalda-Petree, Professor, Experimental Psychology
Jennifer Waltz, Professor Clinical Psychology

Associate Professors

Duncan G Campbell, Associate Professor Clinical Psychology
Daniel J. Denis, Associate Professor of Quantitative Psychology
Greg Machek, Associate Professor of School Psychology
Gyda Swaney, Associate Professor Clinical Psychology

Assistant Professors

Jacqueline Brown, Ph.D. Assistant Professor of School Psychology
Anisa Goforth, Assistant Professor of Psychology and Director of the School Psychology Graduate Training Program
Nathan Insel, Assistant Professor, Behavioral & Systems Neuroscience
Yoonhee Jang, Assistant Professor
Craig McFarland, Assistant Professor, Clinical Neuropsychology
Rachel Severson, Assistant Professor, Developmental Psychology

Adjunct Faculty

Raurie Birch, Director, Clinical Psychology Center
Laura Kirsch, Adjunct Instructor
Nicole McCray, Adjunct Instructor

Research Faculty

Ann Cook, Research Professor Bioethics
Rosemary Hughes, Research Professor
Craig Ravesloot, Research Associate Professor Clinical Psychology

Biology-Human

Back to Top

- BIOH 380 - Cellular and Molecular Neuroscience

  Credits: 3. Prereq., BIOB 260 and BIOH 280. The material covered will give students a practical knowledge of the subcellular organization and function of the nervous system. Students will learn how brain energy metabolism is a dynamic, and highly regulated process. We will explore the variety forms of neuronal chemical communication that may not conform to basic concepts of synaptic signaling. We will study processes that are involved in the growth and guidance of axons leading to the formation as well as the elimination of synapses. We will learn about the processes that are involved in the regulation of sexual differentiation of the nervous system. We will explore the basic mechanisms involved in learning and memory. Finally, Students will learn about the molecular and cellular mechanisms associated with neurodegenerative disease.

- BIOH 441 - CNS Diseases

  Credits: 3. This course is designed as a special topics course within the new neuroscience major that focuses on developing an understanding of common diseases affecting the Central Nervous System (CNS), such as stroke, traumatic brain injury, Alzheimer disease, Parkinson's disease, schizophrenia, amyotrophic lateral sclerosis, epilepsy, etc.) For each of the CNS disorders surveyed (which will vary from year to year), an emphasis will be placed on framing the symptoms and etiology of the disease within the context of the normal neuronal function at the anatomical, cellular and molecular levels. Where feasible, lectures will be supplemented with presentations by clinicians with expertise in the field. Students will also develop an appreciation for the linkages between basic and translational research in neurological diseases as well as the importance of disease models in the development of new therapies.

Psychology

Back to Top

- PSYX 100S - Intro to Psychology

  Credits: 4. Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S. Course Attributes:
  Social Sciences Course (S)

- PSYX 105 - Careers in Psychology

  Credits: 1. Offered intermittently. Exploration of the various careers available in the general area of mental health research and practice.

- PSYX 120 - Research Methods I

  Credits: 3. Offered every term. Prereq., PSYX 100S. Experimental and other quantitative methods employed in the scientific study of behavior.

- PSYX 191 - Special Topics

  Credits: 1 TO 6. (R 6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.

- PSYX 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- PSYX 222 - Psychological Statistics

Credits: 3. Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.

- PSYX 233 - Fund of Psychology of Aging

  Credits: 3. Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.

- PSYX 250N - Fund of Biological Psychology

  Credits: 3. Offered every term. Prereq., PSYX 100S. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed. Course Attributes: Natural Science Course (N)

- PSYX 270 - Fund Psychology of Learning

  Credits: 3. Offered autumn. Prereq., PSYX 100S. Basic theory and research on the nature of animal learning and behavior.

- PSYX 280 - Fund of Memory and Cognition

  Credits: 3. Offered intermittently. Prereq., PSYX 100S. The acquisition and uses of knowledge. An examination of research and theories of human learning, memory, and thinking.

- PSYX 290 - Supervised Research

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course Attributes: Research & Creative Schlrshp

- PSYX 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Internships/Practicums

- PSYX 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr.

- PSYX 294 - Seminar/Workshop

  Credits: 1. (R 3) Offered intermittently. Prereq., consent of instr.; coreq., another psychology course. Taken in conjunction with another psychology course to provide additional content and discussion for honors students. Consent of the corequisite course instructor is required for this course.

- PSYX 298 - Internship

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instructor. Extended classroom experience which provides practical application of classroom learning during placements off-campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums Service Learning/Volunteer Internship graduation limit 6 Service Learning

- PSYX 320 - Research Methods III

  Credits: 3. Offered every term. Prereq., PSYX 222. An appreciation of the experimental approach to the scientific study of behavior through student-conducted experiments. Course Attributes: Writing Course-Advanced

- PSYX 340 - Abnormal Psychology

  Credits: 3. Offered every term. Prereq., PSYX 100S. Description and classification of abnormal behavior.

- PSYX 345 - Child & Adolescent Psych Dis

  Credits: 3. Offered intermittently. Prereq., PSYX 100S and 230. Study of causes, characteristics, assessment and treatment of emotional, social and intellectual disorders. The age span studied will range from infancy through adolescence.

- PSYX 348 - Psychology of Family Violence

  Credits: 3. Offered spring. Prereq., PSYX 100S. Same as WGS 385. Exploration of theoretical explanations for the presence of violence in American families; research and interventions in such areas as child physical and sexual abuse, battering of women, marital rape, spousal homicide, etc.

- PSYX 352 - Comparative Psychology

Credits: 3. Offered autumn. Prereq., PSYX 250N. Advanced evaluation and analysis of animal behavior through the synthesis of theory, research, and methods found in comparative psychology, behavioral biology, ethology, and sociobiology.

- PSYX 356 - Human Neuropsychology

  Credits: 3. Offered spring. Prereq., PSYX 250N. Study of the organization of the nervous system, functional neuroanatomy, neuropathology, neurological disorders, behavioral neurology, and clinical neuropsychology.

- PSYX 360 - Social Psychology

  Credits: 3. Offered every term. Individual behavior as a function of interpersonal interaction.

- PSYX 362 - Multicultural Psychology

  Credits: 3. Offered autumn even-numbered years. Current theories and research on culture, race, and ethnicity, and how the sociocultural context influences psychological processes.

- PSYX 376 - Prin Cognit Behav Mod

  Credits: 3. Offered intermittently. Prereq., PSYX 270S. Study of basic principles, assumptions, methodology and applications of behavior modification. Discussion of current literature relevant to behavioral assessment and treatment of major psychological disorders.

- PSYX 377 - Personalized Student Instr

  Credits: 3. Offered every term. Prereq., consent of instr. Experience with the personalized student instruction method of teaching, gained through participating as a proctor in the introductory psychology course.

- PSYX 378 - Intro to Clinical Psyc

  Credits: 3. Offered intermittently. Prereq., PSYX 340. Clinical psychology as a science and a profession. Theoretical models and techniques of assessment and intervention. Case illustrations.

- PSYX 383 - Health Psychology

  Credits: 3. Prereq., PSYX 100S and PSYX 250N. This course will provide an overview of the growing field of health psychology, with particular attention to the biological, psychological, and social determinants of health. The course will also provide overviews of major illnesses for which psychologists can and do play a major role and will examine the tools and techniques that clinical health psychologists employ in medical settings.

- PSYX 385 - Psychology of Personality

  Credits: 3. Offered intermittently Prereq., PSYX 100S. Introduction to theories and research in personality. Intensive survey of theoretical concepts and a detailed examination of experimental methods and experiments in the field of personality.

- PSYX 390 - Adv Supervised Research

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., 12 credits in psychology including PSYX 290 and consent of instr. Course Attributes: Research & Creative Schlrshp

- PSYX 391 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., nine credits in psychology and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PSYX 392 - Independent Study

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instr.

- PSYX 398 - Internship

  Credits: 1 TO 3. (R-3) Offered every term. Prereq., consent of instructor. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums Service Learning/Volunteer Service Learning

- PSYX 400 - History & System in Psychology

  Credits: 3. Offered every term. Prereq., 15 credits in psychology. Origin and development of basic concepts and methods in scientific psychology. Course Attributes: Writing Course-Advanced

- PSYX 442 - Counseling Theories in Context

Credits: 3. Offered autumn. Prereq., PSYX 100S. Same as COUN 485 and SW 485. This course introduces students to the primary theories that constitute the intellectual foundation for common counseling and psychotherapy techniques, with a special focus on gender, interpersonal influence strategies and diversity issues.

- PSYX 491 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq.,12 credits in psychology and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PSYX 494 - Seminar/Workshop

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., nine credits in psychology and consent of instr. Topics of current interest with critical examination of the literature. Course Attributes: Omnibus Course

- PSYX 499 - Senior Thesis

  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., junior or senior standing and consent of instr. Preparation of a thesis or manuscript based on research for presentation and/or publication.

- PSYX 501 - Teaching of Psychology

  Credits: 3. Offered autumn. Prereq., graduate standing in psychology and consent of instr. Exploration and practice of effective teaching techniques. Level: Graduate

- PSYX 511 - Professional Issues

  Credits: 1. Offered autumn. Prereq., graduate standing in clinical psychology. Introduction to the professional role and skills in the clinical psychology field. Level: Graduate

- PSYX 512 - Field Placement-Clinical

  Credits: 1 TO 12. (R-12) Offered every term. Prereq., graduate standing in psychology and consent of instr. Supervised assessment and intervention experience in applied clinical settings. Level: Graduate

- PSYX 520 - Adv Psyc Stat I

  Credits: 3. Offered autumn. Prereq., undergraduate statistics and consent of instr. Introduction to descriptive and inferential statistics, probability distributions, null hypothesis significance testing, one and two sample techniques, analysis of variance and the general linear model. Level: Graduate

- PSYX 521 - Adv Psyc Stat II

  Credits: 4. Offered spring. Prereq., PSYX 520 or consent of instr. Multiple comparisons among means, factorial ANOVA, random effects and mixed models, correlation, simple and multiple regression, analysis of covariance. Level: Graduate

- PSYX 522 - Multivariate Statistics

  Credits: 3. Offered autumn. Prereq., PSYX 520 and 521. Introduction to matrix algebra, multivariate analysis of variance, multivariate analysis of covariance, simple slopes in multiple regression, discriminant analysis, canonical correlation, principal components analysis, factor analysis, cluster analysis. Level: Graduate

- PSYX 523 - Research Design

  Credits: 3. Offered spring. Prereq., graduate standing in psychology. The examination and application of the principles and methods of experimental and quasi-experimental research design in psychology. Level: Graduate

- PSYX 524 - Tests & Measurement

  Credits: 3. Offered autumn. Prereq., graduate standing in psychology or education. Introduction to measurement emphasizing correspondence between research and practice. Provides a theoretical and practical basis for evaluating and using measurement data. Level: Graduate

- PSYX 525 - Psyc Evaluation I

  Credits: 3. Offered autumn. Prereq., undergraduate statistics and consent of instr. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed. Individual tests of aptitudes and intellectual abilities; psychometric considerations in clinical assessment; objective personality assessment. Level: Graduate

- PSYX 526 - Psyc Eval II:App and Obj

Credits: 3. Offered spring. Prereq., enrollment in doctoral program in psychology and consent of instr. Objective methods in psychological assessment; psychological evaluation techniques in the clinical context. Level: Graduate

- PSYX 530 - Clin and Diag Interviewing

  Credits: 3. Offered autumn. Prereq., graduate standing in clinical psychology, school psychology, or counseling. Microcounseling skills development through interactive practice and feedback. Level: Graduate

- PSYX 531 - Prin of Psychotherapy

  Credits: 3. Offered autumn. Prereq., enrollment in doctoral program in clinical psychology. The philosophical and scientific bases of major systems of psychotherapy are reviewed. Psychotherapy research methods, issues, and findings are introduced. Level: Graduate

- PSYX 532 - Adv Psychopathology

  Credits: 3. Offered autumn. Prereq., graduate standing in psychology or consent of instr. Symptoms, etiology, diagnostic criteria and treatment of the major psychological disorders, with an emphasis on current research findings. Level: Graduate

- PSYX 534 - Applied Clinical Methods

  Credits: 1 TO 4. (R-24) Offered every term. Prereq., graduate standing in the clinical program and consent of instr. Theoretical and applied work in a supervised clinical setting. Level: Graduate

- PSYX 535 - Child Interventions

  Credits: 3. (R-12) Offered spring. Prereq., graduate standing in the clinical or school psychology program and consent of instructor. Review of clinical research and methodology in youth mental health. Specific treatment interventions are explored for the practitioner and also may serve as a valuable base for engaging in psychological consultation with youth and families. Level: Graduate

- PSYX 536 - AdvcdChld/Adol Psychopathology

  Credits: 3. Offered spring. Prereq., graduate standing in psychology or consent of instr. Advanced study of the characteristics, etiology, assessment, and treatment of the emotional, social, and intellectual problems covering the span from infancy through adolescence. DSM and Education Code criteria will be compared. Level: Graduate

- PSYX 537 - Child Assessment

  Credits: 3. Offered every other year spring semester. Provides an intensive introduction to diagnostic, behavioral, and personality assessment of children and adolescents. Level: Graduate

- PSYX 540 - Adv Development Psyc

  Credits: 3. Offered intermittently. Prereq., undergraduate course in developmental psychology or consent of instr. Psychological and behavioral development through the life span. Level: Graduate

- PSYX 545 - Field Placement Humn Devel

  Credits: 1 TO 6. (R-9) Offered autumn and spring. Prereq., PSYX 540 or equiv. Individualized, applied experience working with and/or observing a particular population of interest, including children, adolescents, or older adults. Involves the completion of an independent project, which may comprise program assessment, research proposal development, etc. Level: Graduate

- PSYX 550 - Ad Social Psychology

  Credits: 3. Offered every other year. Prereq., consent of instr. Theory and experiment in the analysis of individual behavior in relation to social stimuli. Level: Graduate

- PSYX 551 - Advanced Personality

  Credits: 3. Offered autumn odd-numbered years. Prereq., graduate standing in psychology or consent of instr. Theory and research on human personality and behavior. Emphasis on issues and topics of historical and contemporary importance. Level: Graduate

- PSYX 560 - Advanced Learning & Cognition

  Credits: 3. Offered spring odd-numbered years. Prereq., undergraduate course in perception, cognition, or learning, or consent of instr. A survey of principles, theories, and methods pertaining to how humans and animals learn and represent the world. Level: Graduate

- PSYX 565 - Advanced Cognition

  Credits: 3. Offered autumn odd-numbered years. Prereq., undergraduate course in perception, cognition, or learning, or consent of instr. Examination of the acquisition of knowledge through

perception and learning, the retention of knowledge, and the use of knowledge through thinking and reasoning. Level: Graduate

- PSYX 571 - Adv Physiological Psyc

  Credits: 3. Offered autumn even-numbered years. Prereq., consent of instr. Brain mechanisms and behavior; electrophysiological correlates of behavior. Level: Graduate

- PSYX 580 - Professional School Psych

  Credits: 3. Offered autumn. Prereq., graduate standing in school psychology. The theory, role, and function of school psychology as a profession; includes historical precursors and fit with current systems of psychology. Level: Graduate

- PSYX 582 - Behav Assmnt & Intervention

  Credits: 3. Offered autumn. Prereq., graduate standing in psychology or consent of instr. Covers Schoolwide Positive Behavior Supports in a three-tiered model. Introduces theoretical and practical applications of behavioral assessment and intervention. Students develop skills using behavioral observation, sampling and intervention design/implementation through supervised experience in applied settings. Level: Graduate

- PSYX 583 - Ed Assmnt & Intervention

  Credits: 4. Offered spring. Prereq., graduate standing in psychology or education. Develops educational assessment and intervention skills using problem-solving strategies to make educational decisions. Students develop assessment and intervention design/implementation through supervised experience in applied settings. Level: Graduate

- PSYX 587 - School Psyc Methods

  Credits: 3. (R-9) Offered every term. Prereq., graduate standing in school psychology and consent of instr. Applied school psychology work in a supervised setting. Level: Graduate

- PSYX 588 - School Psyc Internship

  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., enrollment in school psychology program or consent of instr. Supervised work experience in the role and functions of school psychologists. Level: Graduate

- PSYX 594 - Seminar

  Credits: 1 TO 12. (R-12) Offered intermittently. A review and discussion of current research. Topics vary. Level: Graduate

- PSYX 595 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
  Course Attributes: Internships/Practicums

- PSYX 596 - Independent Study

  Credits: 1 TO 9. (R-9) Offered autumn and spring Prereq., consent of instr. Assigned readings and other special study projects. Level: Graduate Course Attributes: Independent Study

- PSYX 597 - Research

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Independent supervised research projects, other than thesis or dissertation. Level: Graduate

- PSYX 599 - Thesis/Research Project

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. M.A. thesis or M.A. Research project Level: Graduate

- PSYX 625 - Clinical Assessment

  Credits: 3. Offered annually. Prereq., advanced graduate standing in clinical psychology program and consent of instructor. Students will conduct a variety of clinical assessments, including personality and neuropsychological testing. Students will gain experience with all phases of clinical assessment (e.g., interviewing, test administration, report writing, etc.) Level: Graduate

- PSYX 630 - Ethics, Prof & Cult Iss

  Credits: 3. Offered spring. Occasionally shifted to autumn. Prereq., enrollment in doctoral program in clinical, experimental, or school psychology. Review of ethical principles and professional standards of psychologists. Analysis of the influence of cultural factors upon professional conduct. Level: Graduate

- PSYX 631 - Intervention
  Credits: 3. (R-12) Offered every term. Prereq., graduate standing in the clinical psychology program and consent of instr. Review of clinical research and methodology. Specific treatment interventions are explored for the practitioner and also may serve as a valuable base for engaging in psychological consultation. Each offering will have a unique title. Level: Graduate
- PSYX 632 - Curr Clinical Topics
  Credits: 3. (R-12) Offered intermittently. Prereq., graduate standing in psychology and consent of instr. Current topics in clinical psychology with reviews of theory, research, and methodology. Each offering will have a unique title. Level: Graduate
- PSYX 634 - Adv App Clinical Methods
  Credits: 1 TO 4. (R-6) Offered every term. Prereq., PSYX 534 and consent of instr. Advanced clinical work in a supervised setting. Level: Graduate
- PSYX 638 - Clin Psyc Internship
  Credits: 1 TO 3. (R-6) Offered every term. Prereq., proficiency in clinical techniques. Clinical internship offered by the psychology staff of a hospital, clinic or other approved agency in coordination with The University of Montana Clinical Psychology Program. Level: Graduate Course Attributes: Internships/Practicums
- PSYX 680 - Consultation and Supervision
  Credits: 3 TO 4. Offered spring even-numbered years. Prereq., graduate standing in school psychology. Theoretical background and case conceptualization in academic and behavioral consultation and supervision and how this can be applied in school-based settings. Level: Graduate
- PSYX 694 - Seminar
  Credits: 1 TO 12. (R-12) Offered intermittently. A review and discussion of current research. Topics vary. Level: Graduate
- PSYX 697 - Advanced Research
  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Independent research projects, other than thesis or dissertation. Level: Graduate
- PSYX 699 - Dissertation
  Credits: 1 TO 18. (R-18) Offered every term. Prereq., consent of instr. Doctoral dissertation research activities. Level: Graduate

Psychology B.A.

Bachelor of Arts - Psychology

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 43

Required Cumulative GPA: 2.0

Note: A minimum of 60 credits must be in non-psychology courses. PSYX 290, 292, and 298 are limited to 6 credit hours. PSYX 392 and 398 are limited to 3 credit hours. PSYX 340, 360, and 385 may only count once. PSYX is limited to 3 credit hours.

Lower Core Courses

Rule: Must complete all of the following courses

Note: May substitute SOCI 318 for PSYX 120.

	Course	**Credits**

	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	PSYX 120 - Research Methods I Offered every term. Prereq., PSYX 100S. Experimental and other quantitative methods employed in the scientific study of behavior.	3 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
Minimum Required Grade: C		10 Total Credits Required

Foundation Courses

Rule: Must complete 4 of the following coiurses

	Course	Credits
	PSYX 230 - Developmental Psychology Offered autumn, spring, summer. Prereq., PSYX 100S. The study of human physical, cognitive and psychosocial development throughout the life span. Content covers major theories, the influence of genetics, and the environment from a chronological aspect. Appropriate for Social Work, Nursing, Addiction Studies, Education, and Psychology.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
	PSYX 340 - Abnormal Psychology Offered every term. Prereq., PSYX 100S. Description and classification of abnormal behavior.	3 Credits
	PSYX 360 - Social Psychology Offered every term. Individual behavior as a function of interpersonal interaction.	3 Credits
	PSYX 385 - Psychology of Personality Offered intermittently Prereq., PSYX 100S. Introduction to theories and research in personality. Intensive survey of theoretical concepts and a detailed examination of experimental methods and experiments in the field of personality.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Fundamentals Courses

Rule: Must complete 2 of the following courses

	Course	Credits

	PSYX 250N - Fund of Biological Psychology Offered every term. Prereq., PSYX 100S. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed.	3 Credits
	PSYX 270 - Fund Psychology of Learning Offered autumn. Prereq., PSYX 100S. Basic theory and research on the nature of animal learning and behavior.	3 Credits
	PSYX 280 - Fund of Memory and Cognition Offered intermittently. Prereq., PSYX 100S. The acquisition and uses of knowledge. An examination of research and theories of human learning, memory, and thinking.	3 Credits
Minimum Required Grade: C		6 Total Credits Required

Upper Division Electives

Rule: Must complete 5 3-credit courses from the following list

Note: May not include PSYX 392, PSYX 398, or PSYX 499.

	Course	**Credits**
	COUN 485 - Counseling Theories Offered autumn. Prereq., PSYX 100S. Same as PSYX 442 and SW 485. Introduction to the primary theories that constitute the intellectual foundation for common counseling and psychotherapy techniques, with a special focus on gender, interpersonal influence strategies, and diversity issues.	3 Credits
	PSYX 320 - Research Methods III Offered every term. Prereq., PSYX 222. An appreciation of the experimental approach to the scientific study of behavior through student-conducted experiments.	3 Credits
	PSYX 340 - Abnormal Psychology Offered every term. Prereq., PSYX 100S. Description and classification of abnormal behavior.	3 Credits
	PSYX 345 - Child & Adolescent Psych Dis Offered intermittently. Prereq., PSYX 100S and 230. Study of causes, characteristics, assessment and treatment of emotional, social and intellectual disorders. The age span studied will range from infancy through adolescence.	3 Credits
	PSYX 348 - Psychology of Family Violence Offered spring. Prereq., PSYX 100S. Same as WGS 385. Exploration of theoretical explanations for the presence of violence in American families; research and interventions in such areas as child physical and sexual abuse, battering of women, marital rape, spousal homicide, etc.	3 Credits
	PSYX 352 - Comparative Psychology Offered autumn. Prereq., PSYX 250N. Advanced evaluation and analysis of animal behavior through the synthesis of theory, research, and methods found in comparative psychology, behavioral biology, ethology, and sociobiology.	3 Credits

	PSYX 356 - Human Neuropsychology Offered spring. Prereq., PSYX 250N. Study of the organization of the nervous system, functional neuroanatomy, neuropathology, neurological disorders, behavioral neurology, and clinical neuropsychology.	3 Credits
	PSYX 360 - Social Psychology Offered every term. Individual behavior as a function of interpersonal interaction.	3 Credits
	PSYX 362 - Multicultural Psychology Offered autumn even-numbered years. Current theories and research on culture, race, and ethnicity, and how the sociocultural context influences psychological processes.	3 Credits
	PSYX 376 - Prin Cognit Behav Mod Offered intermittently. Prereq., PSYX 270S. Study of basic principles, assumptions, methodology and applications of behavior modification. Discussion of current literature relevant to behavioral assessment and treatment of major psychological disorders.	3 Credits
	PSYX 377 - Personalized Student Instr Offered every term. Prereq., consent of instr. Experience with the personalized student instruction method of teaching, gained through participating as a proctor in the introductory psychology course.	3 Credits
	PSYX 378 - Intro to Clinical Psyc Offered intermittently. Prereq., PSYX 340. Clinical psychology as a science and a profession. Theoretical models and techniques of assessment and intervention. Case illustrations.	3 Credits
	PSYX 383 - Health Psychology Prereq., PSYX 100S and PSYX 250N. This course will provide an overview of the growing field of health psychology, with particular attention to the biological, psychological, and social determinants of health. The course will also provide overviews of major illnesses for which psychologists can and do play a major role and will examine the tools and techniques that clinical health psychologists employ in medical settings.	3 Credits
	PSYX 385 - Psychology of Personality Offered intermittently Prereq., PSYX 100S. Introduction to theories and research in personality. Intensive survey of theoretical concepts and a detailed examination of experimental methods and experiments in the field of personality.	3 Credits
	PSYX 390 - Adv Supervised Research (R-3) Offered every term. Prereq., 12 credits in psychology including PSYX 290 and consent of instr.	1 To 3 Credits
	PSYX 391 - Special Topics (R-6) Offered intermittently. Prereq., nine credits in psychology and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	PSYX 400 - History & System in Psychology Offered every term. Prereq., 15 credits in psychology. Origin and development of basic concepts and methods in scientific psychology.	3 Credits

	PSYX 491 - Special Topics (R-6) Offered intermittently. Prereq.,12 credits in psychology and consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	PSYX 494 - Seminar/Workshop (R-6) Offered intermittently. Prereq., nine credits in psychology and consent of instr. Topics of current interest with critical examination of the literature.	1 To 6 Credits
	S W 423 - Addiction Studies Offered spring. Same as PSYX 441 and SOCI 433. Examination of chemical dependency and behavioral compulsions, including alcohol and other drugs, gambling, eating disorders, sexual addictions. Ecosystems perspective on etiology, treatment, prevention, family dynamics, community response, and societal contributors. Students engage in a service learning community project which is integrated into the classroom through initial training, regular reflection, and other activities.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Math Electives

Rule: Must complete 1 of the following courses

	Course	Credits
	M 115 - Probability and Linear Math Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.	3 Credits
	M 121 - College Algebra Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.	3 Credits
	M 151 - Precalculus Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.	4 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits

	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
Minimum Required Grade: C		3 Total Credits Required

Teaching Psychology

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Teacher Preparation in Psychology

Students who want to be licensed to teach psychology at the high school level must complete the BA degree requirements in psychology (general option). They also must complete a teaching major or minor in a second field of their choice and the professional licensure program in the College of Education. Students may also earn a teaching minor in psychology. See the Department of Curriculum and Instruction for information about admission to the Teacher Education Program and completion of these licensure programs.

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Human and Family Development Minor

Minor - Human and Family Development (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 24

Required Cumulative GPA: 2.5

Note: To earn a minor the student must complete 24 credits, with 11 at the 300 level or above. All students are required to take a 12-credit core curriculum and, with the help of a faculty advisor, to develop a written statement of goals and interests along with a planned curriculum that includes 12 additional credits of electives consistent with the stated goals and interests. At least 6 credits of electives must be outside of the student's major.

Core Courses

Rule: Must complete the following subcategories

12 Total Credits Required

Subcategory 1

Rule: Must complete 1 of the following courses

	Course	Credits
	PSYX 230 - Developmental Psychology Offered autumn, spring, summer. Prereq., PSYX 100S. The study of human physical, cognitive and psychosocial development throughout the life span. Content covers major theories, the influence of genetics, and the environment from a chronological aspect. Appropriate for Social Work, Nursing, Addiction Studies, Education, and Psychology.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subcategory 2

Rule: Must complete all of the following courses:

Note: HFD 494 may be taken for 1 credit. HFD 498 must be taken for a minimum of 2 credits. Education majors may take EDEC 396 to fulfill this requirement.

	Course	Credits
	HFD 494 - Seminar in Human Development (R-3) Offered autumn. Discussion of selected problems in human development. Emphasis on integrating theory and practice.	1 To 3 Credits
	HFD 498 - Internship (R-4) Prereq., consent of chair. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 4 Credits
Minimum Required Grade: C		3 Total Credits Required

Subcategory 3

Rule: Must complete 1 of the following courses

	Course	Credits
	COMX 311 - Family Communication Offered yearly. An examination of communication in marriage/romantic partnership, parent-child, and extended family relationships. Topics include intimacy, power, decision-making, problem solving, identity formation, and interpersonal perception.	3 Credits

	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subcategory 4

Rule: Must complete 1 of the following courses

	Course	Credits
	C&I 520 - Educational Research Offered every term. Same as EDLD 520. Open to graduate level students in Education Leadership, Counseling, or Curriculum and Instruction majors. An understanding of basic quantitative and qualitative research methodology and terminology, particularly as they are used in studies presented in the professional literature. Level: Graduate	3 Credits
	COMX 460 - Research Methods Offered autumn and spring. Open only to majors in COMM. Prereq., Grade of C- or better in EDLD 486 or PSYX 222 or SOCI 202 or STAT 216. Introduction to the major types of communication research and the foundations of quantitative research methods.	3 Credits
	PSYX 120 - Research Methods I Offered every term. Prereq., PSYX 100S. Experimental and other quantitative methods employed in the scientific study of behavior.	3 Credits
	PSYX 320 - Research Methods III Offered every term. Prereq., PSYX 222. An appreciation of the experimental approach to the scientific study of behavior through student-conducted experiments.	3 Credits
	S W 400 - Social Work Research Offered autumn and spring. Prereq., SW 360; Social Work major. Utilization of social research findings in social work practice. Techniques for the collection and analysis of clinical data. Special emphasis on research methodology for the assessment of practitioner and program effectiveness.	3 Credits
	SOCI 318 - Sociological Research Methods Offered every term. Prereq., SOCI 101S, Sociology majors only, or consent of instr. Methods of research in the social sciences including naturalistic observation, interviewing, measurement, experiments, surveys, content analysis, and basic data analysis. Required of all majors.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Elective Courses

Rule: Must complete 12 credits from any of the courses listed in the subcategories below; at least 6 credits must be taken outside of the student's major

Note: The list of electives is categorized to assist the student wishing to focus on one of these areas. Students may plan curricula which do not correspond to these categories, but should choose among courses from this list. Occasionally "special topics" courses are offered. Students may use these as electives with the consent of their advisors.
Check with departments regarding variable-credit 395 and 495-Special Topics listings.

12 Total Credits Required

Early Childhood

Rule: May complete any of the following courses

Note: Must complete all course work prior to taking HFD 498

	Course	Credits
	C&I 421 - Issues in Early Intervention Offered autumn odd-numbered years. Issues involved when serving young children with disabilities; family and child advocacy; least restrictive placements in early childhood settings; transitions concerning families, special education service providers and receiving schools; ;case management in rural communities; transdisciplinary teaming process; and preschool individualized education programs. Includes practicum hours in campus-based CO-TEACH preschool.	3 Credits
	CSD 210 - Speech & Lang Devel Offered autumn. Sophomore standing or greater. Topics include typical speech and language development, phonology, semantic, morphological, syntax, and pragmatics, along with individual differences, second language acquisition and literacy.	3 Credits
	EDEC 310 - Child in the Family Offered spring even-numbered years. Prereq., PSYX 100S. Physical, social, emotional and intellectual development, learning theories and child rearing practices related to children 0-6 years of age.	3 Credits
	EDEC 330 - Early Childhood Education Offered spring odd-numbered years. Theory and techniques of teaching in pre-school and primary levels of education. Observation and participation in pre-school programs. Recommended for kindergarten and primary teachers.	3 Credits
	EDEC 396 - EC Fieldwork/Practicum Offered autumn and spring. Practicum experiences including observational assessment of children, study of the planning process, team teaching of a one week unit plan, and planning and directing parent/teacher conferences. Students will complete selected readings and assignments on child development, early childhood ecological arrangements, and classroom management. Weekly seminars include early childhood pedagogy, adapted and regular physical education. Must attend mandatory meeting at 12:00 or 4:00 p.m. on first day of the semester.	3 Credits

	EDSP 403 - Curric/Mthds Early Spec Educ Offered autumn even-numbered years. Principles in selecting and adapting early childhood curriculum materials for young children with disabilities; development, implementation and evaluation of individualized education programs; and appropriate teaching strategies for the early childhood special education classroom. Includes a practicum.	3 Credits
	EDSP 462 - Spec Ed Law, Policy, Practice Offered autumn and even-numbered summers. Historic and current perspectives on laws, policies and practices of the special education and related fields. Coverage of all aspects of the special education process including collaborative practices.	3 Credits
	EDU 345 - Excptnlty & Clsrm Mgmt Offered autumn and spring. Prereq., Admission to the Teacher Education Program in secondary and K-12. Focus on classroom management and the characteristics and instructional adaptations for exceptional students in the regular classroom. Addresses the Individuals with Disabilities Education Act and subsequent reauthorizations, presents practices for working with students who are at-risk and students with disabilities in inclusive settings, and includes technological considerations.	3 Credits
	EDU 491 - Special Topics/Exp Courses (R-6) Offered intermittently. Special courses experimental in nature dealing with a relatively narrow, specialized topic of particular current interest. Credit not allowed toward a graduate degree.	1 To 6 Credits
	EDU 494 - Seminar:Refl Pract & App Rsrch (R-9) Required seminar during student teaching. Prereq., admission to the Teacher Education Program. Focuses on learning to conduct research on P-12 student performance to determine teaching effectiveness. Includes on-campus and/or on-line planning, conducting, and analyzing classroom practice.	1 To 9 Credits
	HFD 498 - Internship (R-4) Prereq., consent of chair. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 4 Credits
	PSYX 290 - Supervised Research (R-6) Offered every term. Prereq., consent of instr.	1 To 6 Credits
	PSYX 378 - Intro to Clinical Psyc Offered intermittently. Prereq., PSYX 340. Clinical psychology as a science and a profession. Theoretical models and techniques of assessment and intervention. Case illustrations.	3 Credits
Minimum Required Grade: C		0-12 Total Credits Required

School-Age

Rule: May complete any of the following courses

	Course	Credits
	EDU 221 - Ed Psych & Measuremnt Offered autumn and spring. Prereq., admission to Teacher Education program in secondary and K-12. Analysis of fundamental psychological concepts underlying classroom teaching and management, learning and evaluation including educational measurement. Emphasis on cognition, developmental, and motivational aspects of learning.	3 Credits
	EDU 345 - Excptnlty & Clsrm Mgmt Offered autumn and spring. Prereq., Admission to the Teacher Education Program in secondary and K-12. Focus on classroom management and the characteristics and instructional adaptations for exceptional students in the regular classroom. Addresses the Individuals with Disabilities Education Act and subsequent reauthorizations, presents practices for working with students who are at-risk and students with disabilities in inclusive settings, and includes technological considerations.	3 Credits
	PHAR 110N - Use & Abuse of Drugs Offered autumn and spring. Drug dependence and abuse.	3 Credits
	PSYX 339 - Curr Tpcs/Development Psyc Offered intermittently. Prereq., PSYC 240S or 245. Topical reviews of theories, research and applications in developmental psychology.	3 Credits
	PSYX 376 - Prin Cognit Behav Mod Offered intermittently. Prereq., PSYX 270S. Study of basic principles, assumptions, methodology and applications of behavior modification. Discussion of current literature relevant to behavioral assessment and treatment of major psychological disorders.	3 Credits
	PSYX 378 - Intro to Clinical Psyc Offered intermittently. Prereq., PSYX 340. Clinical psychology as a science and a profession. Theoretical models and techniques of assessment and intervention. Case illustrations.	3 Credits
	S W 300 - Hum Behav & Soc Environ Offered autumn and spring. Prereq., SW 100 and 200, and junior standing in Social Work. Using the ecological-social systems framework, the integration of knowledge and concepts from the social and behavioral sciences for analysis and assessment of problems and issues relevant to professional social work practice.	3 Credits
	S W 420 - Child Abuse/Child Welfare Offered autumn. Prereq., junior standing or consent of instr. Signs and symptoms of physical and sexual abuse and neglect, family dynamics in abuse and neglect, the legal context, programs of prevention and intervention, foster care, special needs adoptions and related issues in child welfare.	3 Credits

	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
Minimum Required Grade: C		0-12 Total Credits Required

Adolescence

Rule: May complete any of the following courses

	Course	Credits
	EDSP 462 - Spec Ed Law, Policy, Practice Offered autumn and even-numbered summers. Historic and current perspectives on laws, policies and practices of the special education and related fields. Coverage of all aspects of the special education process including collaborative practices.	3 Credits
	EDU 221 - Ed Psych & Measuremnt Offered autumn and spring. Prereq., admission to Teacher Education program in secondary and K-12. Analysis of fundamental psychological concepts underlying classroom teaching and management, learning and evaluation including educational measurement. Emphasis on cognition, developmental, and motivational aspects of learning.	3 Credits
	EDU 345 - Excptnlty & Clsrm Mgmt Offered autumn and spring. Prereq., Admission to the Teacher Education Program in secondary and K-12. Focus on classroom management and the characteristics and instructional adaptations for exceptional students in the regular classroom. Addresses the Individuals with Disabilities Education Act and subsequent reauthorizations, presents practices for working with students who are at-risk and students with disabilities in inclusive settings, and includes technological considerations.	3 Credits
	PHAR 110N - Use & Abuse of Drugs Offered autumn and spring. Drug dependence and abuse.	3 Credits
	PSYX 339 - Curr Tpcs/Development Psyc Offered intermittently. Prereq., PSYC 240S or 245. Topical reviews of theories, research and applications in developmental psychology.	3 Credits

	PSYX 345 - Child & Adolescent Psych Dis Offered intermittently. Prereq., PSYX 100S and 230. Study of causes, characteristics, assessment and treatment of emotional, social and intellectual disorders. The age span studied will range from infancy through adolescence.	3 Credits
	PSYX 376 - Prin Cognit Behav Mod Offered intermittently. Prereq., PSYX 270S. Study of basic principles, assumptions, methodology and applications of behavior modification. Discussion of current literature relevant to behavioral assessment and treatment of major psychological disorders.	3 Credits
	PSYX 378 - Intro to Clinical Psyc Offered intermittently. Prereq., PSYX 340. Clinical psychology as a science and a profession. Theoretical models and techniques of assessment and intervention. Case illustrations.	3 Credits
	S W 300 - Hum Behav & Soc Environ Offered autumn and spring. Prereq., SW 100 and 200, and junior standing in Social Work. Using the ecological-social systems framework, the integration of knowledge and concepts from the social and behavioral sciences for analysis and assessment of problems and issues relevant to professional social work practice.	3 Credits
	S W 450 - Children and Youth at Risk Offered autumn or spring. Focus on the aspects of society that pose a threat to today's youth and the ramification of those threats on youth development and behavior. Resilience and protective factors for youth at risk and strategies to work with those youth. Attention to related systems in Missoula and Montana, including juvenile justice, mental health, child protection, substance abuse, and education.	3 Credits
	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
Minimum Required Grade: C		0-12 Total Credits Required

Gerontology

Rule: May complete any of the following courses

	Course	**Credits**
	AHHS 325 - Introduction to Gerontology Offered spring. Prereq., junior standing or consent of instr. An interdisciplinary discussion of the health and social issues of older persons, utilizing didactic presentations, clinical demonstrations, and curricular modules.	3 Credits

	AHHS 327 - MGS Meeting (R-3) Offered spring. Attendance and participation in the Montana Gerontology Society meeting held annually in April.	1 Credits
	AHHS 430 - Health Aspects of Aging Offered spring. Overview of the health aspects of aging in the United States including biological theories of aging, normal physiological changes associated with aging systems, common pathological problems associated with aging, cultural and ethnic differences in the health of elders, health promotion and healthy aging, and the health care continuum of care for older persons.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
	PSYX 339 - Curr Tpcs/Development Psyc Offered intermittently. Prereq., PSYC 240S or 245. Topical reviews of theories, research and applications in developmental psychology.	3 Credits
	S W 455 - Social Gerontology Offered autumn. Examination of the field of social gerontology, including an examination of the major bio/psycho/social/cultural/spiritual theories of aging, the service system, social and health issues, family and care-giving dynamics, social policy, and end of life concerns.	3 Credits
Minimum Required Grade: C		0-12 Total Credits Required

Family Development

Rule: May complete any of the following courses

	Course	**Credits**
	COMX 311 - Family Communication Offered yearly. An examination of communication in marriage/romantic partnership, parent-child, and extended family relationships. Topics include intimacy, power, decision-making, problem solving, identity formation, and interpersonal perception.	3 Credits
	COMX 414 - Comm in Personal Relationshps Offered yearly. Prerequisite, COMX 115S or consent of instructor. An examination of the functions, types, and historical context of close personal relationships with an in-depth study of the role of communication in friendships and romantic relationships.	3 Credits
	EDEC 310 - Child in the Family Offered spring even-numbered years. Prereq., PSYX 100S. Physical, social, emotional and intellectual development, learning theories and child rearing practices related to children 0-6 years of age.	3 Credits

	PSYX 348 - Psychology of Family Violence Offered spring. Prereq., PSYX 100S. Same as WGS 385. Exploration of theoretical explanations for the presence of violence in American families; research and interventions in such areas as child physical and sexual abuse, battering of women, marital rape, spousal homicide, etc.	3 Credits
	S W 423 - Addiction Studies Offered spring. Same as PSYX 441 and SOCI 433. Examination of chemical dependency and behavioral compulsions, including alcohol and other drugs, gambling, eating disorders, sexual addictions. Ecosystems perspective on etiology, treatment, prevention, family dynamics, community response, and societal contributors. Students engage in a service learning community project which is integrated into the classroom through initial training, regular reflection, and other activities.	3 Credits
	SOCI 332 - Sociology of the Family Offered autumn. Prereq., SOCI 101S. Historical, cross-cultural, and analytical study of the family. Emphasis on ideology, social structures, and agency affecting family composition and roles.	3 Credits
Minimum Required Grade: C		0-12 Total Credits Required

Psychology Minor

Minor - Psychology (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0

Lower Division Core Requirements

Rule: Must complete the following courses

	Course	**Credits**
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits
	PSYX 120 - Research Methods I Offered every term. Prereq., PSYX 100S. Experimental and other quantitative methods employed in the scientific study of behavior.	3 Credits
Minimum Required Grade: C		7 Total Credits Required

Minor Electives

Rule: Complete the following subcategories, taking at least 6 upper division credits
Minimum Required Grade: C
12 Total Credits Required

Subcategory 1

Rule: Must complete 1 course

	Course	Credits
	PSYX 230 - Developmental Psychology Offered autumn, spring, summer. Prereq., PSYX 100S. The study of human physical, cognitive and psychosocial development throughout the life span. Content covers major theories, the influence of genetics, and the environment from a chronological aspect. Appropriate for Social Work, Nursing, Addiction Studies, Education, and Psychology.	3 Credits
	PSYX 360 - Social Psychology Offered every term. Individual behavior as a function of interpersonal interaction.	3 Credits
	PSYX 385 - Psychology of Personality Offered intermittently Prereq., PSYX 100S. Introduction to theories and research in personality. Intensive survey of theoretical concepts and a detailed examination of experimental methods and experiments in the field of personality.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subcategory 2

Rule: Must complete 1 course

	Course	Credits
	PSYX 340 - Abnormal Psychology Offered every term. Prereq., PSYX 100S. Description and classification of abnormal behavior.	3 Credits
	PSYX 345 - Child & Adolescent Psych Dis Offered intermittently. Prereq., PSYX 100S and 230. Study of causes, characteristics, assessment and treatment of emotional, social and intellectual disorders. The age span studied will range from infancy through adolescence.	3 Credits
	PSYX 376 - Prin Cognit Behav Mod Offered intermittently. Prereq., PSYX 270S. Study of basic principles, assumptions, methodology and applications of behavior modification. Discussion of current literature relevant to behavioral assessment and treatment of major psychological disorders.	3 Credits

	PSYX 378 - Intro to Clinical Psyc Offered intermittently. Prereq., PSYX 340. Clinical psychology as a science and a profession. Theoretical models and techniques of assessment and intervention. Case illustrations.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

Subcategory 3

Rule: Must complete 2 courses

	Course	Credits
	PSYX 250N - Fund of Biological Psychology Offered every term. Prereq., PSYX 100S. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed.	3 Credits
	PSYX 270 - Fund Psychology of Learning Offered autumn. Prereq., PSYX 100S. Basic theory and research on the nature of animal learning and behavior.	3 Credits
	PSYX 280 - Fund of Memory and Cognition Offered intermittently. Prereq., PSYX 100S. The acquisition and uses of knowledge. An examination of research and theories of human learning, memory, and thinking.	3 Credits
	PSYX 352 - Comparative Psychology Offered autumn. Prereq., PSYX 250N. Advanced evaluation and analysis of animal behavior through the synthesis of theory, research, and methods found in comparative psychology, behavioral biology, ethology, and sociobiology.	3 Credits
	PSYX 356 - Human Neuropsychology Offered spring. Prereq., PSYX 250N. Study of the organization of the nervous system, functional neuroanatomy, neuropathology, neurological disorders, behavioral neurology, and clinical neuropsychology.	3 Credits
Minimum Required Grade: C		6 Total Credits Required

Additional Electives

Rule: Must complete additional Psychology electives to achieve 21 degree credits

Minimum Required Grade: C

2 Total Credits Required

Teaching Psychology Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - Psychology (Minor); Track: Teaching Psychology

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 24
Required Cumulative GPA: 2.0

Lower Division Core Requirements

Rule: Must complete the following courses

	Course	Credits
	PSYX 100S - Intro to Psychology Offered every term. Introduction to the scientific study of behavior in humans and other animals. Credit not allowed for both PSY 100S and PSYC 100S.	4 Credits

Minimum Required Grade: C

2 Total Credits Required

Teaching Licensure Requirements

Note: Individuals completing a teaching minor must also complete a teaching major in another content area. Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching.

Teaching Methods Course

Rule: Complete the following course.

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Social Studies.

	Course	**Credits**

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C		3 Total Credits Required

Bachelor of Science - Neuroscience; Cellular and Molecular Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 76
Required Cumulative GPA: 2.0

Biology/Psychology Core Courses

Rule: Must complete all of the following courses:

Note: BCH 110/111 maybe substituted for BIOB 160N/161N.
BIOH 458 satisfies the Upper Division Writing Requirement for the Major.

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
	BIOB 272 - Genetics and Evolution Offered spring. Prereq., either BIOB 260 OR both BIOB 160N and BIOB 170N/171N; and one of M 121, 122, 151, 162, or 171. Principles and mechanisms of inheritance and evolution. Population genetics, fossil record, macroevolution, speciation, extinction, systematics, molecular evolution.	4 Credits
	BIOH 280 - Fundamental Neuroscience Course will focus on the molecular and cellular underpinnings of the functions of the brain and nervous system. The topics will range from the basis of electrical and chemical signaling to the organization of the sensory systems and mechanisms involved in learning, memory, and complex behaviors.	3 Credits

	BIOH 380 - Molecular Neuroscience Prereq., BIOB 260 and BIOH 280. The material covered will give students a practical knowledge of the subcellular organization and function of the nervous system. Students will learn how brain energy metabolism is a dynamic, and highly regulated process. We will explore the variety forms of neuronal chemical communication that may not conform to basic concepts of synaptic signaling. We will study processes that are involved in the growth and guidance of axons leading to the formation as well as the elimination of synapses. We will learn about the processes that are involved in the regulation of sexual differentiation of the nervous system. We will explore the basic mechanisms involved in learning and memory. Finally, Students will learn about the molecular and cellular mechanisms associated with neurodegenerative disease.	3 Credits
	BIOH 458 - Neuroscience Research Prereq., senior standing in Neuroscience. Theory and practical experience in neuroscience experiment design, data collection, results analysis and report creation. Students will generally assist with ongoing research as well as attend formal classroom presentations and discussions. Students will be required to work with the course writing instructor to undertake the writing process and develop a primary literature review, an abstract and final report based on the experiments conducted and the data collected. Students with well-developed research ideas and skills may be allowed to undertake supplemental independent research.	4 Credits
	PSYX 250N - Fund of Biological Psychology Offered every term. Prereq., PSYX 100S. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed.	3 Credits
Minimum Required Grade: C-		23 Total Credits Required

Other Required Courses

Rule: Must complete all of the following courses:
Note: PSYX 222 may be substituted for STAT 216.

	Course	**Credits**
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
	CHMY 221 - Organic Chemistry I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits

	CHMY 222 - Organic Chemistry I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chemistry II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		35 Total Credits Required

Additional Major Courses

Rule: Must complete all of the following courses:

	Course	**Credits**

	BCH 480 - Advanced Biochemistry I Offered autumn. Prereq., CHMY 223. Primarily for science majors. The chemistry of biomolecules, with emphasis on the structure and function of proteins, carbohydrates, lipids and nucleic acids. The chemistry and regulation of the transfer and expression of genetic information, protein synthesis. Credit not allowed for both BCH 380 and 480-482.	3 Credits
	BCH 482 - Advanced Biochemistry II Offered spring. Prereq., BCH 480 or equiv. Continuation of BCH 480. Enzyme kinetics, metabolism, especially macromolecule biosyntheses and energy acquisition pathways, and the associated energetics and molecular physiology. Credit not allowed for both BCH 380 and BCH 480-482.	3 Credits
	BIOB 425 - Adv Cell & Molecular Biology Offered spring. Prereq., BIOB 260 and 272; BCH 380 strongly recommended. Cell structure and function, cell cycle, cellular signaling, molecular basis of cancer, regulated cell death, membrane transport, organelle dynamics, cytoskeleton, cell adhesion, and the molecular basis of learning and memory.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Rule: Choose at least 1 of the following Courses:

	Course	Credits
	BIOB 301 - Developmental Biology Offered autumn. Prereq., BIOB 260; BIOB 272 recommended. An analysis of the origin and development of form and patterns in organisms, stressing the processes of growth and differentiation in plants and animals. Graded traditional letter grade only.	3 Credits
	BIOH 365 - Human AP I for Health Profsns Offered autumn. Prereq., CHMY 121N or CHMY 141N; BIOB 160N or BIOH 112 or 113. Introduction to basic cellular structure and function. The fundamental facts and concepts of the anatomy and physiology of cells and tissues, the integumentary, musculoskeletal, nervous and special senses with an emphasis on clinical application for students preparing for careers in health care. Laboratory component includes presentation of cadaver prosections and models.	0 To 4 Credits
	BIOL 435 - Comparative Animal Physiology Offered spring. Prereq., BIOB 260 or equivalent. Animal physiology with emphasis on diversity of functional processes, with strong links to broader ecological and evolutionary contexts.	3 Credits
	CSD 411 - Neuroanatomy & Physiology Offered spring. Prereq.,BIOH 330. Focused study on the anatomy of the nervous system and how the nervous system supports behaviors inherent to communication. Students will be introduced to anatomical terms, structures, and functions. Clinical implications will be discussed as well.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Rule: Choose at least 1 of the following Courses:

	Course	Credits
	BIOB 375 - General Genetics Offered spring. Prereq., BIOB 260 and 272. This course will focus on the molecular genetics of eukaryotes, with special emphasis on transmission genetics and gene structure and regulation.	3 Credits
	BIOB 468 - Endocrinology Offered alternate years. Prereq., BIOB 260 and 272. Integration of fundamental concepts of endocrinology (such as hormone release, hormone transport and receptor activation) into complex systems (such as reproduction).	3 Credits
	BMED 610 - Neuropharmacology Offered alternate years. Prereq., BMED 613 or 661 or consent of instr. Focus on current areas of research and research technologies in neuropharmacology. Development of presentations and research grant proposals. Level: Graduate	3 Credits
	BMED 646 - Neurotoxicology Offered alternate years. Prereq., BMED 641 or 661. Mechanisms of major neurotoxins and neurological disease. Level: Graduate	3 Credits
	KIN 330 - Motor Learning and Control Offered autumn and spring. Prereq., BIOH 201N or BIOH 365. Focused on developing an understanding of the anatomy and physiology within the nervous system necessary for movement. Establishes an understanding of the basic science involved in the control of motor tasks, and uses this foundation to evaluate case studies that will focus on sport performance, clinical deficits, age-related alterations, learning of motor tasks following injury, and other motor-related tasks.	3 Credits
	PSYX 356 - Human Neuropsychology Offered spring. Prereq., PSYX 250N. Study of the organization of the nervous system, functional neuroanatomy, neuropathology, neurological disorders, behavioral neurology, and clinical neuropsychology.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Intersection Courses

Rule: Choose at least 1 of the following Courses:

	Course	Credits

	BIOE 406 - Behavior & Evolution Offered autumn. Prereq., BIOB 272. Diversity of animal behavior in an evolutionary context including inheritance of behavior, diets, avoidance responses, mating systems and sexual selection, parental care, and evolution of animal groups and societies.	3 Credits
	DANC 345 - Teaching for the Disabled (R-4) Offered autumn and spring. Students interact with adults with developmental disabilities in an adaptive dance class where movement is used as a therapeutic modality for people with cognitive and physical impairments. Students interact with the participants, engage as role models and gain beginning teaching experience.	1 Credits
	ECNS 491 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	HTH 430 - Hlth and Mind/Body/Spirit Offered autumn. Prereq., junior standing. Overview of how the mind/body/spirit relationship affects health. Examination of current research exploring how thoughts, emotions, attitudes, and beliefs influence and mediate health outcome. Exploration of the theoretical applications of mind/body/spirit in health and healing used in contemporary society.	3 Credits
	LIT 491 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	LSH 389E - Placebos: The Power of Words Situated at the crossroads of medicine and the humanities, this course looks into the changing reputation of the placebo effect, with special attention to the power of words to induce therapeutic—or counter-therapeutic—effects.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Neuroscience B.A. Cognitive Neuroscience option

Bachelor of Science - Neuroscience; Cognitive Neuroscience Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 70
Required Cumulative GPA: 2.0

Biology/Psychology Core Courses

Rule: Must complete all of the following courses:

Note: BIOH 458 satisfies the Upper Division Writing Requirement for the Major.

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
	BIOB 272 - Genetics and Evolution Offered spring. Prereq., either BIOB 260 OR both BIOB 160N and BIOB 170N/171N; and one of M 121, 122, 151, 162, or 171. Principles and mechanisms of inheritance and evolution. Population genetics, fossil record, macroevolution, speciation, extinction, systematics, molecular evolution.	4 Credits
	BIOH 280 - Fundamental Neuroscience Course will focus on the molecular and cellular underpinnings of the functions of the brain and nervous system. The topics will range from the basis of electrical and chemical signaling to the organization of the sensory systems and mechanisms involved in learning, memory, and complex behaviors.	3 Credits
	BIOH 380 - Molecular Neuroscience Prereq., BIOB 260 and BIOH 280. The material covered will give students a practical knowledge of the subcellular organization and function of the nervous system. Students will learn how brain energy metabolism is a dynamic, and highly regulated process. We will explore the variety forms of neuronal chemical communication that may not conform to basic concepts of synaptic signaling. We will study processes that are involved in the growth and guidance of axons leading to the formation as well as the elimination of synapses. We will learn about the processes that are involved in the regulation of sexual differentiation of the nervous system. We will explore the basic mechanisms involved in learning and memory. Finally, Students will learn about the molecular and cellular mechanisms associated with neurodegenerative disease.	3 Credits

	BIOH 458 - Neuroscience Research Prereq., senior standing in Neuroscience. Theory and practical experience in neuroscience experiment design, data collection, results analysis and report creation. Students will generally assist with ongoing research as well as attend formal classroom presentations and discussions. Students will be required to work with the course writing instructor to undertake the writing process and develop a primary literature review, an abstract and final report based on the experiments conducted and the data collected. Students with well-developed research ideas and skills may be allowed to undertake supplemental independent research.	4 Credits
	PSYX 250N - Fund of Biological Psychology Offered every term. Prereq., PSYX 100S. Introduction to the study of how psychological processes are supported by biological processes. Mechanisms across levels of analysis, from cells to individuals, are addressed.	3 Credits
Minimum Required Grade: C-		23 Total Credits Required

Other Required Courses

Rule: Must complete all of the following courses:

Note: PSYX 222 may be substituted for STAT 216.
CHMY 141N/143N/221/222 may be substituted for CHMY 121N/123/124.

	Course	**Credits**
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 123 - Intro to Organic & Biochem Offered autumn and spring. Prereq., "C-" or equiv. in CHMY 121N or CHMY 141N or consent of instr. Second semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 124 - Intro to Organic & Biochem Lab Offered autumn and spring. Prereq. or coreq., CHMY 123. Laboratory to accompany CHMY 123.	2 Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits

	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		25 Total Credits Required

Additional Major Courses

Rule: Must complete all of the following courses:

__	**Course**	**Credits**
	BCH 380 - Biochemistry Offered autumn and spring. Prereq., CHMY 223 or BIOB 260. Fundamental biochemistry; chemistry and metabolism of biomolecules, energy relationships in metabolism; storage, transmission, and expression of genetic information. Credit not allowed for both BCH 380 and 480-482.	4 Credits
	PSYX 270 - Fund Psychology of Learning Offered autumn. Prereq., PSYX 100S. Basic theory and research on the nature of animal learning and behavior.	3 Credits
	PSYX 280 - Fund of Memory and Cognition Offered intermittently. Prereq., PSYX 100S. The acquisition and uses of knowledge. An examination of research and theories of human learning, memory, and thinking.	3 Credits
	PSYX 356 - Human Neuropsychology Offered spring. Prereq., PSYX 250N. Study of the organization of the nervous system, functional neuroanatomy, neuropathology, neurological disorders, behavioral neurology, and clinical neuropsychology.	3 Credits
Minimum Required Grade: C-		13 Total Credits Required

Rule: Choose at least 2 of the following Courses:

	Course	Credits
	BIOB 301 - Developmental Biology Offered autumn. Prereq., BIOB 260; BIOB 272 recommended. An analysis of the origin and development of form and patterns in organisms, stressing the processes of growth and differentiation in plants and animals. Graded traditional letter grade only.	3 Credits
	BIOH 365 - Human AP I for Health Profsns Offered autumn. Prereq., CHMY 121N or CHMY 141N; BIOB 160N or BIOH 112 or 113. Introduction to basic cellular structure and function. The fundamental facts and concepts of the anatomy and physiology of cells and tissues, the integumentary, musculoskeletal, nervous and special senses with an emphasis on clinical application for students preparing for careers in health care. Laboratory component includes presentation of cadaver prosections and models.	0 To 4 Credits
	BMED 610 - Neuropharmacology Offered alternate years. Prereq., BMED 613 or 661 or consent of instr. Focus on current areas of research and research technologies in neuropharmacology. Development of presentations and research grant proposals. Level: Graduate	3 Credits
	BMED 646 - Neurotoxicology Offered alternate years. Prereq., BMED 641 or 661. Mechanisms of major neurotoxins and neurological disease. Level: Graduate	3 Credits
	KIN 330 - Motor Learning and Control Offered autumn and spring. Prereq., BIOH 201N or BIOH 365. Focused on developing an understanding of the anatomy and physiology within the nervous system necessary for movement. Establishes an understanding of the basic science involved in the control of motor tasks, and uses this foundation to evaluate case studies that will focus on sport performance, clinical deficits, age-related alterations, learning of motor tasks following injury, and other motor-related tasks.	3 Credits
	PSYX 352 - Comparative Psychology Offered autumn. Prereq., PSYX 250N. Advanced evaluation and analysis of animal behavior through the synthesis of theory, research, and methods found in comparative psychology, behavioral biology, ethology, and sociobiology.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Intersection Courses

Rule: Choose at least 1 of the following Courses:

	Course	Credits

	BIOE 406 - Behavior & Evolution Offered autumn. Prereq., BIOB 272. Diversity of animal behavior in an evolutionary context including inheritance of behavior, diets, avoidance responses, mating systems and sexual selection, parental care, and evolution of animal groups and societies.	3 Credits
	DANC 345 - Teaching for the Disabled (R-4) Offered autumn and spring. Students interact with adults with developmental disabilities in an adaptive dance class where movement is used as a therapeutic modality for people with cognitive and physical impairments. Students interact with the participants, engage as role models and gain beginning teaching experience.	1 Credits
	ECNS 491 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	HTH 430 - Hlth and Mind/Body/Spirit Offered autumn. Prereq., junior standing. Overview of how the mind/body/spirit relationship affects health. Examination of current research exploring how thoughts, emotions, attitudes, and beliefs influence and mediate health outcome. Exploration of the theoretical applications of mind/body/spirit in health and healing used in contemporary society.	3 Credits
	LIT 491 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	LSH 389E - Placebos: The Power of Words Situated at the crossroads of medicine and the humanities, this course looks into the changing reputation of the placebo effect, with special attention to the power of words to induce therapeutic—or counter-therapeutic—effects.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Political Science Department

Karen Adams, Chair

Political Science is the systematic study of politics. Politics influence how people and institutions exercise and resist power. Political Science, therefore, is concerned with how nations and communities are governed and who governs them. The departmental faculty members have as their mission the engagement and enlightenment of their students, professional colleagues, and fellow citizens about the nature of politics.

The department offers a varied undergraduate curriculum covering domestic, foreign, and international politics. By meeting the requirements outlined below, a student may earn a bachelor's degree in political science or in political science-history; a minor in political science or global public health; or a bachelor's degree in political science with an option in one of the following: American politics, international relations and comparative politics, public administration, non-profit administration, international development studies, or public law. A Master of Arts degree in political science and a Master of Public Administration degree are also offered.

The scope of the faculty's interest and research is wide. They bring special insights gained through study and residence in Europe, Russia, Africa, Central Asia, India, the Far East and Latin America, as well as in Montana and Washington, D.C.

Courses offered in the department are designed to: (1) assist students to secure a broad liberal education and to equip them with the foundations for American citizenship; (2) provide undergraduate preparation for those students who propose to continue study at the graduate level with the ultimate goal of college teaching and research; (3) offer a broad program of training for those students who plan careers in government or politics; 4) assist in preparing students for careers in teaching at both the elementary and secondary levels; (5) provide a sound background for those students who intend to enroll in law and other professional schools.

The major fields of political science are (1) American government and politics with national, state and local government, and public law as sub-fields; (2) public administration; (3) political theory; (4) comparative government; (5) international relations, organization and law. Majors are eligible for membership in Pi Sigma Alpha, the national political science honorary and are active in student political activities. The Department of Political Science secures a number of legislative and administrative internships in state and local government each year. Internships and other learning opportunities in Washington, D.C., are also available.

Department Faculty

Professors

Jeffrey Greene, American Government & Public Administration
Ramona Grey, Co-coordinator of the Grad Program
Paul Haber, Globalization, Latin America, Environmental Politics, Social Movements
Peter Koehn, Comparative Government & Politics & Public Administration

Associate Professors

Karen Ruth Adams, Associate Professor and Chair, International Relations
Christopher Muste, American Politics, Public Opinion, Political Psychology, News Media & Co-coordinator of the M.A. Program
Robert Saldin

Assistant Professors

Abhishek Chatterjee, International & Comparative Politics, International Political Economy
Sara Rinfret, Political Science and Public Administration
Eric Schluessel, Assistant Professor of History and Political Science

Adjunct Faculty

Geoff Badenoch, American Politics
Anna Conley, Adjunct Professor
Eva-Maria Maggi, Visiting Assistant Professor
William McLauchlan, Public Law
Keri McWilliams, Non-Profit Administration
Trisha Miller, Public Administration
Nicholas Potratz, Model United Nations

Affiliates

Anthony Johnstone, Associate Professor
Abraham Kim, Executive Director
Dane Scott, Associate Professor of Ethics; Director of the Center for Ethics
Brock Tessman, Dean, Davidson Honors College
Andrea Vernon, Director of Office of Civic Engagement

Emeritus Professors

Forest Grieves, Comparative Government & Politics & International Relations
Louis Hayes, Comparative Government & Politics & International Relations
James Lopach, American Government & Public Law
Jon Tompkins, Professor Emeritus
Terry Weidner, International Relations & Comparative Politics

Political Science

Back to Top

- PSCI 151 - Intro to Civic Engagement

  Credits: 2. This course is an extensive service learning course that requires students to conduct at least 55 hours of volunteer work. Students participate in community needs analysis, organization analysis, and long term volunteer work.

- PSCI 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PSCI 191S - Special Topics

  Credits: 1 TO 6. (R 6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics. Course Attributes: Internships/Practicums Social Sciences Course (S)

- PSCI 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- PSCI 210S - Intro to American Government

  Credits: 3. Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government. Course Attributes: Social Sciences Course (S) Democracy and Citizenship (Y)

- PSCI 220S - Intro to Comparative Govt

  Credits: 3. Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures. Course Attributes: Social Sciences Course (S)

- PSCI 227 - Global Health Issues

  Credits: 3. Offered spring. Treats current public-health challenges in industrialized and low-income countries, including chronic and infectious illnesses. In comparative perspective, the course explores the individual, environmental, resource, and governance context of public-health policy, interventions, and outcomes and address questions of human rights and ethics, health equity and justice, regional problems and contributors, and the concerns of vulnerable populations along with possibilities for health advocacy.

- PSCI 230X - Intro to International Rel

  Credits: 3. Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change. Course Attributes: Cultural Intl Diversity (X)

- PSCI 250E - Intro to Political Theory

  Credits: 3. Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society. Course Attributes: Ethical & Human Values Course

- PSCI 320 - Exp Offering: Comp Politics

  Credits: 1 TO 6. (R- 6) Offered intermittently. Experimental or one-time offerings in the subfield of comparative politics. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 321 - Post-Communist Politics

  Credits: 3. Offered spring. Prereq junior standing or consent of instructor. Historical and contemporary analysis of politics in post-communist states with an emphasis on Eastern Europe and Russia.

- PSCI 322 - Politics of Europe

  Credits: 3. Offered autumn. Prereq., junior standing or consent of instr. Comparative analysis of parliamentary forms of government and politics with emphasis on Great Britain, France and

Germany.

- PSCI 324 - Climate Policies: China & U.S.

  Credits: 3. Offered every other year. Same as CCS 324. Explores historic, current, and future greenhouse-gas emissions of the United States and China, reasons why both are the two largest C02 emitters, and prevailing national and subnational government policies and nongovernmental actions that affect emissions mitigation and adaptation.

- PSCI 325 - Politics of Latin America

  Credits: 3. Offered autumn. Prereq., junior standing. Latin American politics from both historical and contemporary perspectives.

- PSCI 326 - Politics of Africa

  Credits: 3. Offered autumn. Prereq., junior standing or consent of instr. Development of the political systems of sub-Saharan Africa. Analysis of the interaction between African and Western social, political, and economic forces. Consideration of African political thought.

- PSCI 327 - Politics of Mexico

  Credits: 3. Offered spring. Prereq., junior standing or consent of instr. A review of contemporary politics of Mexico from the Revolution to the present.

- PSCI 328 - Politics of China

  Credits: 3. Prereq., junior standing or consent of instr. Institutions and political development in China.

- PSCI 330 - Exp Offering: Intrnt Relations

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., junior standing. Experimental or one-time offerings in the subfield of international relations. Course Attributes:
  15 cr grad limit/Spec Topics

- PSCI 332 - Global Environmental Pol.

  Credits: 3. Offered fall. Prereq. PSCI 230X and junior standing or consent of instructor. This course focuses on the unique set of collective action problems faced by global actors in the governance of the environment and the institutions they use to overcome those problems. Themes include the tragedy of the commons, climate change, and environmental security.

- PSCI 334 - International Security

  Credits: 3. Offered Spring. Prereq. PSCI 230 and junior standing or consent of instr. Explores the meaning, sources, and future of human, national, and international security. Considers a range of historical and contemporary threats (interstate war, civil war, terrorism, crime, natural disaster, human accident, disease, and deprivation), assesses the vulnerability of individuals and states to each threat, and evaluates national and international strategies to reduce them.

- PSCI 335 - American Foreign Policy

  Credits: 3. Prereq., PSCI 230X and junior standing or consent of instr. American diplomatic, economic and defense policies since World War II and their significance in international politics.

- PSCI 336 - European Union

  Credits: 3. Offered spring. Prereq junior standing or consent of instructor. Historical and contemporary analysis of political and economic integration in Europe with a focus on the political system of the European Union.

- PSCI 337 - Model United Nations

  Credits: 3. Offered autumn. Prereq., sophomore standing or consent of instr. History and structure of the UN. Contemporary global problems, and the UN's role in addressing them. Class has both active learning and service learning dimensions. Students plan, organize and run the annual Montana Model UN high school conference.

- PSCI 340 - Exp Offering: American Govt

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of American government. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 341 - Political Parties and Election

  Credits: 3. Offered spring even-numbered years. Prereq., PSCI 210S and junior standing. Political party organization, nominations, campaigns and elections in the United States.

- PSCI 342 - Media, Public Opinion, Polling

Credits: 3. Offered intermittently. Prereq., PSCI 210S. Study of the role played by mass media in shaping public opinion, policy agendas, and governmental institutions.

- PSCI 344 - State and Local Government

  Credits: 3. Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.

- PSCI 346 - American Presidency

  Credits: 3. Offered autumn. Prereq., PSCI 210S. The constitutional foundation and evolution of the executive branch, the structure of the office and executive functions and powers.

- PSCI 348 - US Multicultural Politics

  Credits: 3. Offered intermittently. Examines the politics of diversity in the U.S., including national community, identity, citizenship, immigration, assimilation, and racial issues such as voting rights, affirmative action, segregation and integration, and public opinion.

- PSCI 350 - Exp Offering: Political Theory

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of political theory. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 352 - American Political Thought

  Credits: 3. Offered spring. Prereq., PSCI 250E or consent of instr. The study of representative political thinkers is used to illustrate the theme of American democracy as a multifaceted experiment with self-government.

- PSCI 354 - Contemp Issues in Pol Theory

  Credits: 3. (R-6) Offered intermittently in autumn. Prereq., PSCI 250E or consent of instr. and junior standing. Topics variable. Research and assessment of current political and social issues through the study of a representative text and related literature.

- PSCI 357 - Ancient & Medieval Pol Phil

  Credits: 3. Offered autumn. The classical western tradition, beginning with the ancient Greeks, spanning the Christian era, and ending with the high Renaissance period. Examination of the political ideas/values of these different times, exploring broad questions concerning human nature, the origins of the state, and the meaning of legitimate authority.

- PSCI 360 - Exp Offering: Public Admin

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental or onetime offerings in the subfield of public administration or policy. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 361 - Public Administration

  Credits: 3. Offered autumn. Prereq., PSCI 210S and junior standing. Legal and institutional setting of the administrative system; dynamics of organization and processes of public management.

- PSCI 365 - Pub Policy Issues and Analysis

  Credits: 3. Examines a variety of public policy issues including economic, social welfare, health care, environmental and criminal justice policy. Emphasis is placed on substantive policies and policy analysis.

- PSCI 370 - Courts and Judicial Politics

  Credits: 3. Offered spring. Prereq., PSCI 210S and junior standing. Introduction to American courts with emphasis on judicial policy making.

- PSCI 391 - Special Topics

  Credits: 1 TO 9. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 400 - Adv Writing in Pol Science

  Credits: 1. (R-3) Offered every term. Coreq., any upper-division political science course. Designed for political science students to satisfy their upper-division writing expectation for the major or for students desiring additional experience in writing. Course Attributes: Writing Course-Advanced

- PSCI 401 - Nonprofit Hum Resource Mgt

Credits: 2. On-line course offered every year. Addresses human resource needs specific to nonprofits, including payroll, employment law, and other legal issues.

- PSCI 402 - Nonprofit Volunteer Mgt

  Credits: 2. On-line course offered every year. Addresses the process of recruiting and retaining volunteers at a nonprofit organization, including case studies and hands-on projects.

- PSCI 403 - Nonprofit Prog Plan & Eval

  Credits: 2. On-line course offered every year. Explores program planning for nonprofits from top-to-bottom, including needs assessment and evaluation.

- PSCI 405 - Nonprofit Advocacy

  Credits: 2. On-line course offered every year. Explores and reviews the role of nonprofit organizations in advocacy.

- PSCI 406 - Nonprofit Board Management

  Credits: 2. Online course offered every year. Explores policymaking and fundraising roles and responsibilities of the board; strategies for board recruitment, orientation, and evaluation; and executive director/board relationships.

- PSCI 410 - Nonprofit Strategic Plan

  Credits: 2. Online course offered every year. This course explores the importance of visionary leadership and strategic planning to the success of nonprofit agencies.

- PSCI 411 - Nonprofit Grant Writing

  Credits: 2. Online course offered every year. Students learn how to write the essential parts of a grant proposal and how to search for appropriate funding sources.

- PSCI 412 - Nonprofit Fundraising

  Credits: 2. Online course offered every year. The course will cover all major aspects of a fundraising plan including: annual fund, major gifts, capital campaigns, planned giving, grants and special events. The course will also give students the foundation and tools needed to implement these plans into action.

- PSCI 413 - Nonprofit Financial Mgt

  Credits: 2. Online course offered every year. This course explores special issues related to nonprofit financials including accounting basics, budgeting, financial statement ratios, management controls and nonprofit income tax reporting processes.

- PSCI 420 - Exp Offering: Comp Politics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of comparative politics. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 422 - Revolution & Reform in China

  Credits: 3. Offered autumn. A history of the rise and fall of the Maoist regime and the complicated impact of the epochal post Mao reform movement.

- PSCI 430 - Exp Offering: Intrnt Relations

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing. Experimental or one-time offerings in the subfield of international relations. Course Attributes:
  15 cr grad limit/Spec Topics

- PSCI 431 - Politics of Global Migration

  Credits: 3. Prereq., junior standing or consent of instr. Exploration of the elective and forced migration of peoples within countries and across national boundaries. Geographical coverage includes Asia, North and Central America, Africa, and Europe. Attention to policy and gender issues surrounding economic and political migration.

- PSCI 433 - International Law & Org

  Credits: 3. Offered fall. Prereq. PSCI 230 and junior standing or consent of instr. Introduction to classical principles and contemporary issues of the law of nations and the organizations created to facilitate international cooperation.

- PSCI 440 - Exp Offering: American Govt

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of American government. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 442 - Environmental Policy

  Credits: 3. Prereq., PSCI 210S. This course surveys environmental politics and policy, primarily in the United States. We will examine the nature and scope of environmental, energy, and natural resource problems; contrasting perspectives on their severity and policy implications; the goals and strategies of the environmental community and its opponents; public opinion on the environment; scientific, economic, political, and institutional forces that shape policymaking and implementation; approaches to environmental policy analysis; and selected issues in environmental policy both within the U.S. and globally.

- PSCI 443 - Politics of Social Movements

  Credits: 3. Offered spring. Prereq., junior standing or consent of instr. The role of social movements in shaping the politics of power, reflected in public policy, electoral politics, relations of class, race, and gender, and people's understanding of the world and their place in it.

- PSCI 444 - Am Political Participation

  Credits: 3. Offered intermittently. Prereq., PSCI 210S. Examination of the individual and institutional factors affecting voter turnout, the influences on voter decision making, and non-electoral forms of participation in the United States.

- PSCI 445 - Political Psychology

  Credits: 3. Offered intermittently. Applies psychological theories such as personality, emotion, cognition, and social influence to political attitudes and actions, including political opinion formation, conformity, prejudice, genocide, and political leadership.

- PSCI 448 - Health Care Policy

  Credits: 3. offered autumn. Focuses on sociopolitical environment influencing health policy in the United States including health politics and policy development, political structure and process, health care financing, public opinion and special interest groups, political leadership, policy reform and global health.

- PSCI 449 - Environmental Health Policy

  Credits: 3. Offered spring. Focuses on environmental health policy in the U.S., its evolution, current status, and areas of change.

- PSCI 450 - Exp Offering: Political Theory

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of political theory. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 452 - Utopianism and its Critics

  Credits: 3. Offered intermittently. Prereq., junior standing. Examination of classic and contemporary utopias, from Plato's Republicto Barbara Goodwin's Justice by Lottery as well as their critics.

- PSCI 453 - Modern Political Theory

  Credits: 3. Offered autumn. Prereq., PSCI 250E or consent of instr and Junior Level or higher. Analysis of Hobbes, Locke, Rousseau, Burke, James and John Stuart Mill, Marx and Lenin with regard to their "modern" views of the purpose(s) of political inquiry, the nature of citizenship and popular sovereignty. Particular attention to contemporary implications of ideas. Course Attributes: Co-Convened Course

- PSCI 460 - Exp Offering: Public Admin

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., junior standing. Experimental or onetime offerings in the subfield of public administration or policy. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 461 - Administrative Law

  Credits: 3. Offered autumn. Prereq., PSCI 210S and junior standing. The legal foundations of public administration with emphasis on legislative delegation, administrative rulemaking and adjudication, judicial review, and public participation.

- PSCI 462 - Human Resource Management

  Credits: 3. Offered spring. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees.

- PSCI 463 - Development Administration

Credits: 3. Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.

- PSCI 466 - Nonprofit Adm & Pub Svc

  Credits: 3. Offered autumn. Prereq., junior standing. Investigation of the aspects involved in nonprofit management and public service and the complexity of the role of nonprofit organizations in society.

- PSCI 467 - Adv Nonprofit Adm

  Credits: 3. Offered spring. Prereq., PSCI 466. In-depth exploration of the special issues related to nonprofit management including fund raising, budgeting, and program planning.

- PSCI 468 - Public Policy

  Credits: 3. Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.

- PSCI 469 - Ethics and Public Policy

  Credits: 3. Offered spring. Focuses on the ethical challenges faced by public servants in government agencies.

- PSCI 471 - American Constitutional Law

  Credits: 3. Offered autumn. Prereq., junior standing or consent of instr. Survey of U.S. Supreme Court's interpretation of the U.S. Constitution's provisions on separation of powers, federalism, civil rights, and civil liberties.

- PSCI 474 - Civil Rights Seminar

  Credits: 3. Offered spring. Prereq., PSCI 471 or consent of instr. Intensive analysis, discussion, and writing about key U.S. Supreme Court constitutional cases on expression, religion, privacy, criminal justice, and discrimination.

- PSCI 480 - Research Goals and Strategies

  Credits: 3. We explore the main methods used in political science research, focusing on research design, best research practices, and pitfalls in research. Students develop their own research design as the final course project.

- PSCI 481 - Origins of Democracy and Authoritarianism

  Credits: 3. Prereq., PSCI 220S. This course will examine in some detail the meaning of the terms "democracy" and "authoritarianism" in a way that permits measurement and analysis, and then seek to explain conditions under which regimes or political systems that can be given the respective appellations emerge.

- PSCI 482 - Politics of the World Economy

  Credits: 3. Prereq., PSCI 220S and PSCI 230X. This course is an introduction to some basic concepts, tools, and problems in international political economy. Particularly, it seeks to examine the implications of the 'economic' relations among 'states' (the terms are in quotes because we will further examine these concepts in some depth throughout the class). Co-convened with PSCI 582. Course Attributes: Co-Convened Course

- PSCI 491 - Special Topics

  Credits: 1 TO 3. (R-9) Offered intermittently. Prereq., consent of instr. and junior standing.Experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: 15 cr grad limit/Spec Topics

- PSCI 492 - Independent Study

  Credits: 1 TO 3. (R-6) Offered every term. Prereq., nine credits in political science courses numbered at the 300- or 400-level and consent of instr. Research in fields appropriate to the needs and objectives of the individual student. Course Attributes: 7 cr grad limit/In Stdy/Intern

- PSCI 498 - Intern/coop education/omnibus

  Credits: 1 TO 6. Offered every term. Prereq., sophomore standing and consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Offered credit/no credit only. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- PSCI 501 - Public Administration

  Credits: 3. Offered autumn. Advanced analysis of processes of public management; examination of public administrators' involvement in policy making. Level: Graduate

- PSCI 503 - Policy Analysis

  Credits: 3. Offered spring. The role of public administrators in the policymaking process with emphasis on methods of policy analysis and program evaluation. Level: Graduate

- PSCI 504 - Organization Theory

  Credits: 3. Offered spring. Concepts and theories relevant to the administration of complex organizations, including administrative structure, behavior, process and functions. Level: Graduate

- PSCI 505 - Budgeting & Finance

  Credits: 3. Offered spring. Seminar focusing on principles of public finance and analysis of budgeting as a primary tool of public sector management. Level: Graduate

- PSCI 520 - Comparative Government

  Credits: 3. Offered autumn. Prereq., graduate standing or consent of instr. Concentrated reading and examination of selected subject areas in the field of comparative government. Level: Graduate

- PSCI 521 - Globalization

  Credits: 3. Offered spring. Prereq., senior or graduate standing or consent of instr. Critical examination of contemporary globalization topics from a number of theoretical and political perspectives. Topics include but are not limited to international political economy, security, social movements, democratization, international development, climate change, immigration, and global governance. Level: Graduate

- PSCI 522 - Human Resource Management

  Credits: 3. Offered autumn. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees. Level: Graduate

- PSCI 523 - Administrative Law

  Credits: 3. Offered autumn. The legal foundations of public administration with emphasis on legislative delegation, administrative rulemaking and adjudication, judicial review, and public participation. Level: Graduate

- PSCI 524 - Management Skills

  Credits: 3. Offered spring. Focus on developing the skills required of managers in nonprofit and government organizations, such as competency in self-assessment, oral and written presentations, managing stress, communicating supportively, motivating, managing conflict, empowering and delegating, succeeding in multicultural contexts, and participating in interviews. Level: Graduate

- PSCI 525 - Strategic Planning

  Credits: 3. Prereq., graduate student. Focus on the means by which public and nonprofit agencies can carry out their missions effectively. Level: Graduate

- PSCI 526 - Issues in State Government

  Credits: 3. Examination of the evolution and development of state governments since the founding period by focusing on the basic political institutions and a broad range of public policy issues that affect governing in the states. Level: Graduate

- PSCI 527 - Performance Measurement

  Credits: 3. Offered intermittently. Focus on the process by which organizations routinely and systematically gather data to assess progress in achieving their goals. Level: Graduate

- PSCI 529 - Intro to Nonprofit Orgs

  Credits: 3. This course is one of the core courses required for MPA students completing the Nonprofit Administration Track. The course provides an introduction to nonprofit organizations and the nonprofit sector within which they are embedded. It investigates such topics as the nature of the nonprofit sector, the diverse kinds of nonprofits in existence, the phenomenon of charitable giving, philanthropy, and volunteering, and the legal framework that establishes nonprofit organizations and regulates their activities. This course is appropriate for graduate students from many disciplines in addition to MPA students due to the diverse nature of the nonprofit sector in fields such as environmental studies, communication studies, sociology, social work and law. Level: Graduate

- PSCI 530 - International Relations

  Credits: 3. Offered autumn. Prereq., consent of instr. Concentrated reading and examination of selected subject areas in the field of international relations. Level: Graduate

- PSCI 540 - American Government

  Credits: 3. Offered spring. Prereq., consent of instr. Concentrated reading and examination of selected subject areas in the field of American government. Level: Graduate

- PSCI 547 - Legislative Relations

  Credits: 3. Online course offered every other year. Focuses on the methods and issues involved in establishing effective working relationships between agencies and the legislative process. Level: Graduate

- PSCI 550 - Political Theory

  Credits: 3. Offered spring. Prereq., consent of instr. Concentrated reading and examination of selected subject areas in the field of political theory. Level: Graduate

- PSCI 553 - Political Theory

  Credits: 3. Ccovers political thinkers from the 16th c., beginning with Thomas Hobbes, to the early 20th century, ending with Marx. Graduate students will consider a fundamental question: what is the purpose of political inquiry? A fundamental question precisely because what people take to be the purpose of political theory determines what they study, who they study, and how they study it. Co-convening course with PSCI 453. Course Attributes: Co-Convened Course

- PSCI 561 - Ethics in Public Admin

  Credits: 3. Prereq., Graduate student. Online course offered every other year. Explores the role of ethics and integrity in public administration and the moral obligations of citizenship. Level: Graduate

- PSCI 563 - Improving Work Culture

  Credits: 3. Online course offered every other year. Focuses on the complexity of the core components of strategic management: program culture and work process management and the considerations necessary to institutionalize positive change. Level: Graduate

- PSCI 582 - Politics of the World Economy

  Credits: 3. Prereq., PSCI 220S and PSCI 230X. This course is a graduate-level introduction to some basic concepts, tools, and problems in international and comparative political economy. Particularly, it seeks to examine the implications of the 'economic' relations among 'states' (the terms are in quotes because we will further examine these concepts in some depth throughout the class). Co-convened with PSCI 482. Course Attributes: Co-Convened Course

- PSCI 586 - MA Research Project

  Credits: 1 TO 4. (R-6) Offered every term. Prereq., consent of instructor. Offered as Credit/No Credit only. Level: Graduate

- PSCI 594 - Seminar

  Credits: 1 TO 9. (R-9) Offered intermittently. Topic varies. Level: Graduate

- PSCI 595 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate

- PSCI 596 - Independent Study

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Independent Study

- PSCI 598 - Internship

  Credits: 1 TO 6. (R-6) Offered every term. Prereq., consent of instr. Offered credit/no credit only. Directed individual research and study appropriate to the back ground and objectives of the student. Level: Graduate Course Attributes: Internships/Practicums

- PSCI 599 - Thesis

  Credits: 1 TO 6. (R-6) Offered every term. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate

Political Sciences B.A.

Bachelor of Arts - Political Science

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 37

Required Cumulative GPA: 2.0

Note: Students pursuing a general political science degree must take a minimum of 37 credits of political science, including one 300-400 level course in four of the five major fields. 21 of the 37 credits must be in upper-division courses. No more than 7 credits of independent study (PSCI 492) and internship (PSCI 498) combined may count toward the 37 required credits. In addition, no more than 15 total credits in special topics courses (e.g., PSCI 320, 391) may count toward the 37 required credits. A maximum of 60 PSCI credits can count towards the Political Science Major.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Writing

Rule: Must complete the following course

	Course	Credits

	PSCI 400 - Adv Writing in Pol Science (R-3) Offered every term. Coreq., any upper-division political science course. Designed for political science students to satisfy their upper-division writing expectation for the major or for students desiring additional experience in writing.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Required Upper Division Field Courses

Rule: Must complete 1 upper division course in 4 of the 5 fields:

Note: Any field course can also be counted toward a Political science option. Student must take an additional four courses from the following options.

Minimum Required Grade: C-

12 Total Credits Required

Public Administration

Rule: May select one of the following courses:

	Course	Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits
	PSCI 360 - Exp Offering: Public Admin (R-6) Offered intermittently. Experimental or onetime offerings in the subfield of public administration or policy.	1 To 6 Credits
	PSCI 361 - Public Administration Offered autumn. Prereq., PSCI 210S and junior standing. Legal and institutional setting of the administrative system; dynamics of organization and processes of public management.	3 Credits
	PSCI 365 - Pub Policy Issues and Analysis Examines a variety of public policy issues including economic, social welfare, health care, environmental and criminal justice policy. Emphasis is placed on substantive policies and policy analysis.	3 Credits
	PSCI 391 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	PSCI 448 - Health Care Policy offered autumn. Focuses on sociopolitical environment influencing health policy in the United States including health politics and policy development, political structure and process, health care financing, public opinion and special interest groups, political leadership, policy reform and global health.	3 Credits

	PSCI 449 - Environmental Health Policy Offered spring. Focuses on environmental health policy in the U.S., its evolution, current status, and areas of change.	3 Credits
	PSCI 461 - Administrative Law Offered autumn. Prereq., PSCI 210S and junior standing. The legal foundations of public administration with emphasis on legislative delegation, administrative rulemaking and adjudication, judicial review, and public participation.	3 Credits
	PSCI 462 - Human Resource Management Offered spring. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
	PSCI 466 - Nonprofit Adm & Pub Svc Offered autumn. Prereq., junior standing. Investigation of the aspects involved in nonprofit management and public service and the complexity of the role of nonprofit organizations in society.	3 Credits
	PSCI 467 - Adv Nonprofit Adm Offered spring. Prereq., PSCI 466. In-depth exploration of the special issues related to nonprofit management including fund raising, budgeting, and program planning.	3 Credits
	PSCI 468 - Public Policy Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits
	PSCI 469 - Ethics and Public Policy Offered spring. Focuses on the ethical challenges faced by public servants in government agencies.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Political Theory

Rule: May select 1 of the following courses:

	Course	**Credits**
	PSCI 350 - Exp Offering: Political Theory (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of political theory.	1 To 6 Credits

	PSCI 352 - American Political Thought Offered spring. Prereq., PSCI 250E or consent of instr. The study of representative political thinkers is used to illustrate the theme of American democracy as a multifaceted experiment with self-government.	3 Credits
	PSCI 354 - Contemp Issues in Pol Theory (R-6) Offered intermittently in autumn. Prereq., PSCI 250E or consent of instr. and junior standing. Topics variable. Research and assessment of current political and social issues through the study of a representative text and related literature.	3 Credits
	PSCI 357 - Ancient & Medieval Pol Phil Offered autumn. The classical western tradition, beginning with the ancient Greeks, spanning the Christian era, and ending with the high Renaissance period. Examination of the political ideas/values of these different times, exploring broad questions concerning human nature, the origins of the state, and the meaning of legitimate authority.	3 Credits
	PSCI 450 - Exp Offering: Political Theory (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of political theory.	1 To 9 Credits
	PSCI 452 - Utopianism and its Critics Offered intermittently. Prereq., junior standing. Examination of classic and contemporary utopias, from Plato's Republicto Barbara Goodwin's Justice by Lottery as well as their critics.	3 Credits
	PSCI 453 - Modern Political Theory Offered autumn. Prereq., PSCI 250E or consent of instr and Junior Level or higher. Analysis of Hobbes, Locke, Rousseau, Burke, James and John Stuart Mill, Marx and Lenin with regard to their "modern" views of the purpose(s) of political inquiry, the nature of citizenship and popular sovereignty. Particular attention to contemporary implications of ideas.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Comparative Government

Rule: May select 1 of the following courses:

	Course	**Credits**
	PSCI 320 - Exp Offering: Comp Politics (R- 6) Offered intermittently. Experimental or one-time offerings in the subfield of comparative politics.	1 To 6 Credits
	PSCI 321 - Post-Communist Politics Offered spring. Prereq junior standing or consent of instructor. Historical and contemporary analysis of politics in post-communist states with an emphasis on Eastern Europe and Russia.	3 Credits

	PSCI 322 - Politics of Europe Offered autumn. Prereq., junior standing or consent of instr. Comparative analysis of parliamentary forms of government and politics with emphasis on Great Britain, France and Germany.	3 Credits
	PSCI 324 - Climate Policies: China & U.S. Offered every other year. Same as CCS 324. Explores historic, current, and future greenhouse-gas emissions of the United States and China, reasons why both are the two largest C02 emitters, and prevailing national and subnational government policies and nongovernmental actions that affect emissions mitigation and adaptation.	3 Credits
	PSCI 325 - Politics of Latin America Offered autumn. Prereq., junior standing. Latin American politics from both historical and contemporary perspectives.	3 Credits
	PSCI 326 - Politics of Africa Offered autumn. Prereq., junior standing or consent of instr. Development of the political systems of sub-Saharan Africa. Analysis of the interaction between African and Western social, political, and economic forces. Consideration of African political thought.	3 Credits
	PSCI 327 - Politics of Mexico Offered spring. Prereq., junior standing or consent of instr. A review of contemporary politics of Mexico from the Revolution to the present.	3 Credits
	PSCI 328 - Politics of China Prereq., junior standing or consent of instr. Institutions and political development in China.	3 Credits
	PSCI 329 - Politics of Japan Offered autumn. Prereq., junior standing or consent of instr. Institutions and political development in Japan.	3 Credits
	PSCI 420 - Exp Offering: Comp Politics (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of comparative politics.	1 To 9 Credits
	PSCI 422 - Revolution & Reform in China Offered autumn. A history of the rise and fall of the Maoist regime and the complicated impact of the epochal post Mao reform movement.	3 Credits
	PSCI 443 - Politics of Social Movements Offered spring. Prereq., junior standing or consent of instr. The role of social movements in shaping the politics of power, reflected in public policy, electoral politics, relations of class, race, and gender, and people's understanding of the world and their place in it.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

International Relations

Rule: May select 1 of the following courses:

	Course	Credits

	PSCI 330 - Exp Offering: Intrnt Relations (R-6) Offered intermittently. Prereq., junior standing. Experimental or one-time offerings in the subfield of international relations.	1 To 6 Credits
	PSCI 332 - Global Environmental Pol. Offered fall. Prereq. PSCI 230X and junior standing or consent of instructor. This course focuses on the unique set of collective action problems faced by global actors in the governance of the environment and the institutions they use to overcome those problems. Themes include the tragedy of the commons, climate change, and environmental security.	3 Credits
	PSCI 334 - International Security Offered Spring. Prereq. PSCI 230 and junior standing or consent of instr. Explores the meaning, sources, and future of human, national, and international security. Considers a range of historical and contemporary threats (interstate war, civil war, terrorism, crime, natural disaster, human accident, disease, and deprivation), assesses the vulnerability of individuals and states to each threat, and evaluates national and international strategies to reduce them.	3 Credits
	PSCI 335 - American Foreign Policy Prereq., PSCI 230X and junior standing or consent of instr. American diplomatic, economic and defense policies since World War II and their significance in international politics.	3 Credits
	PSCI 336 - European Union Offered spring. Prereq junior standing or consent of instructor. Historical and contemporary analysis of political and economic integration in Europe with a focus on the political system of the European Union.	3 Credits
	PSCI 337 - Model United Nations Offered autumn. Prereq., sophomore standing or consent of instr. History and structure of the UN. Contemporary global problems, and the UN's role in addressing them. Class has both active learning and service learning dimensions. Students plan, organize and run the annual Montana Model UN high school conference.	3 Credits
	PSCI 430 - Exp Offering: Intrnt Relations (R-9) Offered intermittently. Prereq., junior standing. Experimental or one-time offerings in the subfield of international relations.	1 To 9 Credits
	PSCI 431 - Politics of Global Migration Prereq., junior standing or consent of instr. Exploration of the elective and forced migration of peoples within countries and across national boundaries. Geographical coverage includes Asia, North and Central America, Africa, and Europe. Attention to policy and gender issues surrounding economic and political migration.	3 Credits
	PSCI 433 - International Law & Org Offered fall. Prereq. PSCI 230 and junior standing or consent of instr. Introduction to classical principles and contemporary issues of the law of nations and the organizations created to facilitate international cooperation.	3 Credits

	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

American Politics

Rule: May select 1 of the following courses:

	Course	Credits
	PSCI 340 - Exp Offering: American Govt (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of American government.	1 To 6 Credits
	PSCI 341 - Political Parties and Election Offered spring even-numbered years. Prereq., PSCI 210S and junior standing. Political party organization, nominations, campaigns and elections in the United States.	3 Credits
	PSCI 342 - Media, Public Opinion, Polling Offered intermittently. Prereq., PSCI 210S. Study of the role played by mass media in shaping public opinion, policy agendas, and governmental institutions.	3 Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits
	PSCI 346 - American Presidency Offered autumn. Prereq., PSCI 210S. The constitutional foundation and evolution of the executive branch, the structure of the office and executive functions and powers.	3 Credits
	PSCI 348 - US Multicultural Politics Offered intermittently. Examines the politics of diversity in the U.S., including national community, identity, citizenship, immigration, assimilation, and racial issues such as voting rights, affirmative action, segregation and integration, and public opinion.	3 Credits
	PSCI 352 - American Political Thought Offered spring. Prereq., PSCI 250E or consent of instr. The study of representative political thinkers is used to illustrate the theme of American democracy as a multifaceted experiment with self-government.	3 Credits

	PSCI 365 - Pub Policy Issues and Analysis Examines a variety of public policy issues including economic, social welfare, health care, environmental and criminal justice policy. Emphasis is placed on substantive policies and policy analysis.	3 Credits
	PSCI 370 - Courts and Judicial Politics Offered spring. Prereq., PSCI 210S and junior standing. Introduction to American courts with emphasis on judicial policy making.	3 Credits
	PSCI 440 - Exp Offering: American Govt (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of American government.	1 To 9 Credits
	PSCI 443 - Politics of Social Movements Offered spring. Prereq., junior standing or consent of instr. The role of social movements in shaping the politics of power, reflected in public policy, electoral politics, relations of class, race, and gender, and people's understanding of the world and their place in it.	3 Credits
	PSCI 444 - Am Political Participation Offered intermittently. Prereq., PSCI 210S. Examination of the individual and institutional factors affecting voter turnout, the influences on voter decision making, and non-electoral forms of participation in the United States.	3 Credits
	PSCI 445 - Political Psychology Offered intermittently. Applies psychological theories such as personality, emotion, cognition, and social influence to political attitudes and actions, including political opinion formation, conformity, prejudice, genocide, and political leadership.	3 Credits
	PSCI 468 - Public Policy Cycle Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Degree Electives

Rule: Must complete 12 additional elective credits from PSCI courses numbered 300 and above
Note: PSCI courses may only count toward one category of requirements.
Minimum Required Grade: C-
12 Total Credits Required

American Politics

Bachelor of Arts - Political Science; American Politics Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 40

Required Cumulative GPA: 2.0

Note: Students majoring in Political Science with an option in American Politics option must take a minimum of 40 credits of political science, including one 300-400 level course in four of the five major fields. 21 of the 40 credits must be in upper-division courses. No more than 7 credits of independent study (PSCI 492) and internship (PSCI 498) combined may count toward the 40 required credits. In addition, no more than 15 total credits in special topics courses (e.g., PSCI 320, 391) may count toward the 40 required credits. A maximum of 60 PSCI credits can count towards the Political Science Major.
Students can use the same 300/400 course to fulfill both the upper-division core and the option requirements, but may not double-count the course credits.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Required Upper Division Courses

Rule: Must complete the following course:

	Course	Credits
	PSCI 400 - Adv Writing in Pol Science (R-3) Offered every term. Coreq., any upper-division political science course. Designed for political science students to satisfy their upper-division writing expectation for the major or for students desiring additional experience in writing.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Degree Electives

Rule: Must complete 5 of the following courses

	Course	Credits
	PSCI 340 - Exp Offering: American Govt (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of American government.	1 To 6 Credits
	PSCI 341 - Political Parties and Election Offered spring even-numbered years. Prereq., PSCI 210S and junior standing. Political party organization, nominations, campaigns and elections in the United States.	3 Credits

International Relations and Comparative Politics

Bachelor of Arts - Political Science; Internat Rel & Compar Politics Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 40

Required Cumulative GPA: 2.0

Note: Students majoring in Political Science with an option in International Relations and Comparative Politics must take a minimum of 40 credits of political science. 21 of the 40 credits must be in upper-division courses. No more than 7 credits of independent study (PSCI 492) and internship (PSCI 498) combined may count toward the 40 required credits. In addition, no more than 15 total credits in special topics courses (e.g., PSCI 320, 391) may count toward the 40 required credits. A maximum of 60 PSCI credits can count towards the Political Science Major.
Students can use the same 300/400 course to fulfill both the upper-division core and the option requirements, but may not double-count the course credits.
It is strongly recommended that a student complete either a) a minimum of two years of foreign language study or b) an internship or study-abroad program.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	**Credits**
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits

	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Required Upper Division Course

Rule: Must complete the following course:

	Course	Credits
	PSCI 400 - Adv Writing in Pol Science (R-3) Offered every term. Coreq., any upper-division political science course. Designed for political science students to satisfy their upper-division writing expectation for the major or for students desiring additional experience in writing.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Degree Electives

Rule: Must complete the following subcategories

Note: 3 of these credits can be counted toward fulfilling the upper-division core.

15-18 Total Credits Required

International Relations Field Courses

Rule: Must complete 3 of the following courses

	Course	Credits
	PSCI 330 - Exp Offering: Intrnt Relations (R-6) Offered intermittently. Prereq., junior standing. Experimental or one-time offerings in the subfield of international relations.	1 To 6 Credits
	PSCI 332 - Global Environmental Pol. Offered fall. Prereq. PSCI 230X and junior standing or consent of instructor. This course focuses on the unique set of collective action problems faced by global actors in the governance of the environment and the institutions they use to overcome those problems. Themes include the tragedy of the commons, climate change, and environmental security.	3 Credits

	PSCI 334 - International Security Offered Spring. Prereq. PSCI 230 and junior standing or consent of instr. Explores the meaning, sources, and future of human, national, and international security. Considers a range of historical and contemporary threats (interstate war, civil war, terrorism, crime, natural disaster, human accident, disease, and deprivation), assesses the vulnerability of individuals and states to each threat, and evaluates national and international strategies to reduce them.	3 Credits

	PSCI 468 - Public Policy Cycle Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Public Administration

Bachelor of Arts - Political Science; Public Administration Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 40

Required Cumulative GPA: 2.0

Note: Students majoring in Political Science with an option in Public Administration must take a minimum of 40 credits of political science, including one 300-400 level course in four of the five major fields. 21 of the 40 credits must be in upper-division courses. No more than 7 credits of independent study (PSCI 492) and internship (PSCI 498) combined may count toward the 40 required credits. In addition, no more than 15 total credits in special topics courses (e.g., PSCI 320), 391) may count toward the 40 required credits. A maximum of

60 PSCI credits can count towards the Political Science Major.
Students can use the same 300/400 course to fulfill both the upper-division core and the option requirements, but may not double-count the course credits.
A legislative or administrative internship is strongly recommended.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Required Upper Division Courses

Rule: Must complete the following courses

	Course	Credits
	PSCI 361 - Public Administration Offered autumn. Prereq., PSCI 210S and junior standing. Legal and institutional setting of the administrative system; dynamics of organization and processes of public management.	3 Credits
	PSCI 400 - Adv Writing in Pol Science (R-3) Offered every term. Coreq., any upper-division political science course. Designed for political science students to satisfy their upper-division writing expectation for the major or for students desiring additional experience in writing.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Degree Electives

Rule: Must complete 4 of the following courses

	Course	Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits
	PSCI 360 - Exp Offering: Public Admin (R-6) Offered intermittently. Experimental or onetime offerings in the subfield of public administration or policy.	1 To 6 Credits
	PSCI 365 - Pub Policy Issues and Analysis Examines a variety of public policy issues including economic, social welfare, health care, environmental and criminal justice policy. Emphasis is placed on substantive policies and policy analysis.	3 Credits
	PSCI 460 - Exp Offering: Public Admin (R-9) Offered intermittently. Prereq., junior standing. Experimental or onetime offerings in the subfield of public administration or policy.	1 To 9 Credits
	PSCI 461 - Administrative Law Offered autumn. Prereq., PSCI 210S and junior standing. The legal foundations of public administration with emphasis on legislative delegation, administrative rulemaking and adjudication, judicial review, and public participation.	3 Credits
	PSCI 462 - Human Resource Management Offered spring. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
	PSCI 466 - Nonprofit Adm & Pub Svc Offered autumn. Prereq., junior standing. Investigation of the aspects involved in nonprofit management and public service and the complexity of the role of nonprofit organizations in society.	3 Credits
	PSCI 467 - Adv Nonprofit Adm Offered spring. Prereq., PSCI 466. In-depth exploration of the special issues related to nonprofit management including fund raising, budgeting, and program planning.	3 Credits
	PSCI 468 - Public Policy Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits

	PSCI 469 - Ethics and Public Policy Offered spring. Focuses on the ethical challenges faced by public servants in government agencies.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Required Upper Division Field Courses

Rule: Must complete 1 upper division course in 4 of the 5 fields:
Note: Any field course can also be counted toward a Political science option.
Minimum Required Grade: C-
12 Total Credits Required

Public Administration

Rule: May select 1 of the following courses:

	Course	Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits
	PSCI 360 - Exp Offering: Public Admin (R-6) Offered intermittently. Experimental or onetime offerings in the subfield of public administration or policy.	1 To 6 Credits

Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Teaching Government

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Bachelor of Arts - Political Science; Track: Teaching Government

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 40

Required Cumulative GPA: 2.0

Note: Students with a teaching major in political science must also complete a teaching major or minor in a second field. For the political science teaching major, students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major GPA of 2.75 is required to be eligible for student teaching.

Political science major requirements include: a minimum of 37 credits of political science, including one 300-400 level course in four of the five major fields. 21 of the 37 credits must be in upper-division courses. No more than 7 credits of independent study (PSCI 492) and internship (PSCI 498) combined may count toward the 37 required credits. In addition, no more than 15 total credits in special topics courses (e.g., PSCI 320, 391) may count toward the 37 required credits. A maximum of 60 PSCI credits can count towards the Political Science Major.
PSCI courses may only count toward one category of requirements.

Lower Division Core

Rule: Must complete all of the following courses:

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Core

Rule: Must complete the following course:

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Social Studies.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits

	PSCI 400 - Adv Writing in Pol Science (R-3) Offered every term. Coreq., any upper-division political science course. Designed for political science students to satisfy their upper-division writing expectation for the major or for students desiring additional experience in writing.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Rule: Complete four upper-division electives.
Minimum Required Grade: C-
12 Total Credits Required

Upper Division Field Courses

Rule: Must complete 1 course in 4 of the following 5 fields:

Note: Any field course can also be counted toward a Political science option. Student must take an additional four courses from the following options.
Minimum Required Grade: C-
12 Total Credits Required

Public Administration

Rule: May select 1 of the following courses:

	Course	Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits
	PSCI 360 - Exp Offering: Public Admin (R-6) Offered intermittently. Experimental or onetime offerings in the subfield of public administration or policy.	1 To 6 Credits
	PSCI 361 - Public Administration Offered autumn. Prereq., PSCI 210S and junior standing. Legal and institutional setting of the administrative system; dynamics of organization and processes of public management.	3 Credits
	PSCI 365 - Pub Policy Issues and Analysis Examines a variety of public policy issues including economic, social welfare, health care, environmental and criminal justice policy. Emphasis is placed on substantive policies and policy analysis.	3 Credits
	PSCI 391 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits

	PSCI 448 - Health Care Policy offered autumn. Focuses on sociopolitical environment influencing health policy in the United States including health politics and policy development, political structure and process, health care financing, public opinion and special interest groups, political leadership, policy reform and global health.	3 Credits
	PSCI 449 - Environmental Health Policy Offered spring. Focuses on environmental health policy in the U.S., its evolution, current status, and areas of change.	3 Credits
	PSCI 461 - Administrative Law Offered autumn. Prereq., PSCI 210S and junior standing. The legal foundations of public administration with emphasis on legislative delegation, administrative rulemaking and adjudication, judicial review, and public participation.	3 Credits
	PSCI 462 - Human Resource Management Offered spring. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
	PSCI 466 - Nonprofit Adm & Pub Svc Offered autumn. Prereq., junior standing. Investigation of the aspects involved in nonprofit management and public service and the complexity of the role of nonprofit organizations in society.	3 Credits
	PSCI 467 - Adv Nonprofit Adm Offered spring. Prereq., PSCI 466. In-depth exploration of the special issues related to nonprofit management including fund raising, budgeting, and program planning.	3 Credits
	PSCI 468 - Public Policy Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits
	PSCI 469 - Ethics and Public Policy Offered spring. Focuses on the ethical challenges faced by public servants in government agencies.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Political Theory

Rule: May select 1 of the following courses:

	Course	Credits
	PSCI 350 - Exp Offering: Political Theory (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of political theory.	1 To 6 Credits
	PSCI 352 - American Political Thought Offered spring. Prereq., PSCI 250E or consent of instr. The study of representative political thinkers is used to illustrate the theme of American democracy as a multifaceted experiment with self-government.	3 Credits
	PSCI 354 - Contemp Issues in Pol Theory (R-6) Offered intermittently in autumn. Prereq., PSCI 250E or consent of instr. and junior standing. Topics variable. Research and assessment of current political and social issues through the study of a representative text and related literature.	3 Credits
	PSCI 450 - Exp Offering: Political Theory (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of political theory.	1 To 9 Credits
	PSCI 451 - Ancient & Medieval Pol Phil Offered autumn. Prereq., PSCI 250E or consent of instr and junior standing. The classical western tradition, beginning with the ancient Greeks, spanning the Christian era, and ending with the high Renaissance period. Examination of the political ideas/values of these different times, exploring broad questions concerning human nature, the origins of the state, and the meaning of ?legitimate? authority.	3 Credits
	PSCI 452 - Utopianism and its Critics Offered intermittently. Prereq., junior standing. Examination of classic and contemporary utopias, from Plato's Republicto Barbara Goodwin's Justice by Lottery as well as their critics.	3 Credits
	PSCI 453 - Modern Political Theory Offered autumn. Prereq., PSCI 250E or consent of instr and Junior Level or higher. Analysis of Hobbes, Locke, Rousseau, Burke, James and John Stuart Mill, Marx and Lenin with regard to their "modern" views of the purpose(s) of political inquiry, the nature of citizenship and popular sovereignty. Particular attention to contemporary implications of ideas.	3 Credits

Teaching Social Studies

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Global Public Health Minor

Minor - Global Public Health (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 21

Required Cumulative GPA: 2.0

Note: Students must take all core courses from The University of Montana's curriculum, but can receive content credit for relevant practicum and internships experience and for relevant courses taken at other universities if approved by the program director.

Required Courses

Rule: Must complete all of the following:

	Course	Credits
	BIOM 227 - Vectors and Parasites Offered spring. Prereq., college level general biology class is recommended but not required. An introduction to the major groups of parasites and arthropod-borne pathogens infecting humans worldwide. The class will stress the biology, transmission dynamics, prevention and control of these organisms.	3 Credits
	PSCI 227 - Global Health Issues Offered spring. Treats current public-health challenges in industrialized and low-income countries, including chronic and infectious illnesses. In comparative perspective, the course explores the individual, environmental, resource, and governance context of public-health policy, interventions, and outcomes and address questions of human rights and ethics, health equity and justice, regional problems and contributors, and the concerns of vulnerable populations along with possibilities for health advocacy.	3 Credits

Minimum Required Grade: C-	6 Total Credits Required

Core Electives

Rule: Must complete 9 credits from the following courses:

Note: The student should select the Ethnobotany of Amerindians section of PHAR 391 Special Topics.
The student should select the Public Health Genetics section of PHAR 491 Special Topics.

	Course	Credits
	AHHS 430 - Health Aspects of Aging Offered spring. Overview of the health aspects of aging in the United States including biological theories of aging, normal physiological changes associated with aging systems, common pathological problems associated with aging, cultural and ethnic differences in the health of elders, health promotion and healthy aging, and the health care continuum of care for older persons.	3 Credits
	ANTY 349 - Social Change in NnWstrn Socts Offered autumn, odd-numbered years. Study of the processes of change, modernization and development.	3 Credits
	ANTY 426 - Culture, Health and Healing Offered autumn. Cross-cultural comparisons of theories and concepts and health and illness. Examination of the impact of these concepts upon health practices and treatment of disease around the world.	3 Credits
	BIOM 400 - Medical Microbiology Offered autumn. Microbial structure and functions, pathogenic microorganisms, virology, immunology. Credit not allowed toward a major in microbiology.	3 Credits
	BIOM 427 - General Parasitology Offered autumn. Prereq., BIOB 272. Parasitism as a biological phenomenon, origin of parasitism, adaptations and life cycles, parasite morphology, fine structure, physiology, parasites and their environment.	2 Credits
	BIOM 428 - General Parasitology Lab Offered autumn. Coreq., BIOM 427. Taxonomy, morphology and identification of parasitic protozoa, helminths and arthropods.	2 Credits
	CHTH 355 - Theory Pract Comm Hlth Ed Offered autumn. Prereq., KIN 205. History, philosophy, and theory related to community health education and health promotion. Includes the application of program development principles and health promotion strategies to community health programs.	3 Credits
	CHTH 445 - Prgrm Plan in Comm Health Offered spring. Prereq., CHTH 355. Overview of the issues, approaches, and techniques community health educators and professionals utilize in planning and implementing programs to assist communities in improving health status and reducing risky behaviors and their determinants. This course co-convenes with HHP 541.	3 Credits

	COMX 425 - Comm in Health Organizations Offered every other year. Not open to PCOM. This course explores the key issues at the intersection of health communication and organizational communication by considering communication processes that occur in a number of distinct contexts of health organizations. Through case studies and health campaigns students explore contemporary concerns and theory in the area of health communication.	3 Credits
	ECNS 310 - Intro Health Economics Offered intermittently. Prereq., economics course. Survey of market forces that govern the production and consumption of medical care in the U.S. market; uncertainty, asymmetric information, and concentrations of market power resulting in inefficient outcomes. Topics include cost escalations, role of medical insurance, and problems of an aging population.	3 Credits
	PHAR 320 - Am Ind Health Issues Offered spring. An overview of the health issues, health care delivery, health disparities, and social determinants of health that impact American Indians. Also, provides an overview in careers in health and cultural awareness for students.	3 Credits
	PHAR 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	PHAR 491 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	PHL 321E - Philosophy & Biomedical Ethics Offered intermittently. Prereq., upper-division standing or consent of instr. An examination of ethical problems raised by the practice of medicine and by recent developments in medically-related biological sciences.	3 Credits
	PSCI 431 - Politics of Global Migration Prereq., junior standing or consent of instr. Exploration of the elective and forced migration of peoples within countries and across national boundaries. Geographical coverage includes Asia, North and Central America, Africa, and Europe. Attention to policy and gender issues surrounding economic and political migration.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
	S W 465 - Social Work Global Context Offered spring even-numbered years. Prereq., upper-division or graduate standing. Examination of globalization, human rights, poverty, international aid, and gender issues; their relationship to social work and social justice, and strategies for action.	3 Credits

	SOCI 355 - Population and Society Offered spring. Prereq., SOCI 101S. An introduction to contemporary world population problems including population growth, trafficking, fertility, mortality, population policy, and the relationship between population and environment. Emphasizes gender issues in international context.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Content Electives

Rule: Must complete 6 credits from the following courses

	Course	Credits
	ANTY 227 - Human Sexuality Offered autumn. Biological, behavioral, and cross-cultural aspects of human sexuality to help students place their own sexuality and that of others in a broader perspective. Includes sexual anatomy, physiology, development, reproduction, diseases, sex determination, as well as gender development and current issues.	3 Credits
	ANTY 333 - Culture and Population Offered autumn, even-numbered years. The relationship between population processes and culture to the human condition; survey data, methodologies, theories of demographic and culture change.	3 Credits
	ANTY 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	ANTY 402 - Quan Ethnographic Field Methds Offered autumn. This course is designed to enhance student understanding of field methods that generate quantitative data describing human behavior. The toolkit of a student completing this course will include knowledge of basic methods that will get you from observing behavior to discussing your research and findings in a professional manner in oral or written formats.	3 Credits
	ANTY 418 - Evol and Genet Var Human Pops Offered spring. Prereq. ANTY 310. Human genetic variation examined from a molecular perspective. Emphasis on the role of infectious disease and other factors as a selective factor in human evolution and exploration of the implications of these associations for human genetic variation.	3 Credits
	ANTY 422 - Mind, Culture and Society Offered autumn even-numbered years. Prereq., ANTY 220S or consent of instr. The study of socialization, personality, cognition, and mental health cross-culturally.	3 Credits
	ANTY 431 - Ethnographic Field Methods Offered spring odd-numbered years. Prereq., ANTY 220S or consent of instr. Introduction to socio-cultural anthropological methods including participant observation, interviewing and narrative techniques and analysis of qualitative data.	3 Credits

	ANTY 435 - Drugs, Culture and Society Offered intermittently. Drug use in a cross-cultural perspective. The role of drugs in cultural expression and social interaction. Examination of the prehistory of drug use, drug use in traditional non-Western and Western societies, and drug use in the context of global sociocultural change.	3 Credits
	BIOB 130N - Evolution and Society Offered intermittently. A focus on relationships between evolutionary biology and important social issues, including the evolution of drug-resistant diseases, the construction and use of genetically-modified organism, human evolutionary biology, and experimental laboratory evolution.	3 Credits
	BIOH 112 - Human Form and Function I Offered autumn. Explores the fundamentals of structure and function at basic cellular and tissue levels, in addition to the anatomy and physiology of the integumentary, musculoskeletal, and nervous systems.	3 Credits
	BIOH 113 - Human Form and Function II Offered spring. Explores the fundamental structures and functions of the endocrine, cardiovascular, respiratory, digestive, urinary and reproductive systems.	3 Credits
	BIOH 462 - Principles Medical Physiology Offered spring. Prereq., C (2.00) or better in BIOH 365, 370, and either CHMY 123 or 143N or consent of instr. An advanced course in human physiology for students preparing for careers in health care.	3 Credits
	BIOM 250N - Microbiology for Hlth Sciences Offered spring. Infectious diseases, including concepts of virulence, resistance, prevention and control of microbial diseases in the individual and in the community. If laboratory experience is desired, the student may enroll concurrently in BIOM 251. Credit not allowed toward a major in microbiology.	3 Credits
	BIOM 402 - Medical Bacteriology& Mycology Offered spring. Prereq., BIOM 360, 361. A study of the pathogenic bacteria and fungi and the diseases they produce.	3 Credits
	BIOM 435 - Virology Offered spring. Prereq., BIOB 260, and either BIOM 360 or BIOM 400. The general nature of viruses, with emphasis on the molecular biology of animal and human viruses. Co-convenes with BIOM 535.	3 Credits
	COMX 204X - International & Dvlpmnt Comm Offered yearly. International Communication is concerned with information exchange across national borders while Development Communication focuses on the historical, current, and prospective role of communication technologies in social change, improving living conditions, and enhancing life prospects - mainly in developing countries.	3 Credits
	COMX 415 - Intercultural Communication Offered autumn and spring. Communication principles and processes in cross-cultural environments. Non-Western cultures are emphasized by contrasting them to Western communication norms.	3 Credits
	COMX 485 - Communication and Health Offered yearly. Theory and research on the health correlates of human interaction.	3 Credits

	ECNS 217X - Issues in Economic Development Offered intermittently. Prereq., ECNS 201S. Study of the processes of economic growth and development in the less developed world.	3 Credits
	HTH 430 - Hlth and Mind/Body/Spirit Offered autumn. Prereq., junior standing. Overview of how the mind/body/spirit relationship affects health. Examination of current research exploring how thoughts, emotions, attitudes, and beliefs influence and mediate health outcome. Exploration of the theoretical applications of mind/body/spirit in health and healing used in contemporary society.	3 Credits
	NASX 303E - Ecol Persp in Nat Amer Trad Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources.	3 Credits
	NASX 304E - Native American Beliefs/Philos Offered Autumn and Spring. A study of selected ethical systems; origins, world views; religious beliefs and the way they have been affected by western civilization.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
	NUTR 221N - Basic Human Nutrition Offered autumn and spring. The principles of science as applied to current concepts and controversies in the field of human nutrition.	3 Credits
	PSCI 324 - Climate Policies: China & U.S. Offered every other year. Same as CCS 324. Explores historic, current, and future greenhouse-gas emissions of the United States and China, reasons why both are the two largest C02 emitters, and prevailing national and subnational government policies and nongovernmental actions that affect emissions mitigation and adaptation.	3 Credits
	PSCI 326 - Politics of Africa Offered autumn. Prereq., junior standing or consent of instr. Development of the political systems of sub-Saharan Africa. Analysis of the interaction between African and Western social, political, and economic forces. Consideration of African political thought.	3 Credits
	PSCI 348 - US Multicultural Politics Offered intermittently. Examines the politics of diversity in the U.S., including national community, identity, citizenship, immigration, assimilation, and racial issues such as voting rights, affirmative action, segregation and integration, and public opinion.	3 Credits
	PSYX 362 - Multicultural Psychology Offered autumn even-numbered years. Current theories and research on culture, race, and ethnicity, and how the sociocultural context influences psychological processes.	3 Credits

	PUBH 595 - Special Topics (R-12) Offered intermittently. Open to PUBH majors only. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Previous topics have included Global Health and Epidemiology of Infectious Disease. Level: Graduate	1 To 12 Credits
	S W 300 - Hum Behav & Soc Environ Offered autumn and spring. Prereq., SW 100 and 200, and junior standing in Social Work. Using the ecological-social systems framework, the integration of knowledge and concepts from the social and behavioral sciences for analysis and assessment of problems and issues relevant to professional social work practice.	3 Credits
	S W 310 - S W Policy & Services Offered autumn and spring. Prereq., SW 200; Social Work major. Social welfare history, program planning and analysis with review of selected policies on the national level. Includes international comparisons. Upper-division writing course.	3 Credits
	S W 323 - Women & Soc Action Amer Offered intermittently. Prereq., one of SW 100, SOCI 101S, or ANTY 101H or consent of instr. Same as WS 323. Focus on women's experiences of and contributions to social change in North, South and Central America in the mid to late-20th century. Through case studies, testimonials, discussions with activists and Internet connections examine social constructions of gender, compare forms of social action in diverse cultural, political and historical contexts, link practice to theories of social participation, and reflect on lessons learned from women's experiences.	3 Credits
	S W 324 - Gender and Welfare Offered intermittently. Prereq., SW 100 or consent of instr. Same as WGS 324. Exploration of the relationship between gender ideologies and the development of social welfare policies. Examination of historic and contemporary social welfare policies, practices and debates in the United States through a gender lens.	3 Credits
	S W 410E - Social Work Ethics Offered autumn and spring. Prereq., SW 200, admission into the BSW program. Analysis of specific ethical dilemmas from personal, professional and policy perspectives. Focus on ethical issues common to the helping professions and utilizing codes of ethics as guides to decision-making. The relationship between professional ethical issues and the development of social policy.	3 Credits

Through case studies, the class examines how people plan, communicate and make good decisions in high-risk situations, as well as how to manage crisis public relations effectively.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Youth and Adult Development

Rule: May complete 3 credits from the following courses:

	Course	Credits
	PSYX 230 - Developmental Psychology Offered autumn, spring, summer. Prereq., PSYX 100S. The study of human physical, cognitive and psychosocial development throughout the life span. Content covers major theories, the influence of genetics, and the environment from a chronological aspect. Appropriate for Social Work, Nursing, Addiction Studies, Education, and Psychology.	3 Credits
	PSYX 233 - Fund of Psychology of Aging Offered every term. An overview of theories and research findings in the psychology of adulthood and aging.	3 Credits
	SOCI 330 - Juvenile Delinquency Offered spring. Prereq., SOCI 101S. The study of juvenile delinquency as a social phenomenon, including the emergence of "juvenile delinquency" as a social and legal concept, the nature of delinquency, and theoretical explanations of delinquent behavior.	3 Credits
	SOCI 335 - Juvenile Justice System Offered autumn. Prereq., SOCI 101S and 211S or 330. An analysis of the juvenile justice system in the United States, including the historical development of policies and practices. The role of various social agencies in defining, preventing, and responding to delinquency.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Human Resources Development and Supervision

Rule: May complete 3 credits from the following courses:

	Course	Credits
	COMX 220S - Intro to Organizational Comm Offered yearly. Theory and research on communication in organizations. Focus on topics such as productivity, power, culture, socialization, technology and globalization covering a wide range of organizations including corporations, government, educational institutions, non-profit agencies and media organizations.	3 Credits
	PSCI 462 - Human Resource Management Offered spring. Study of the essential elements of human resource management, including analysis and evaluation of work, and the selection, management, and evaluation of public employees.	3 Credits

	PTRM 380 - Rec Admin & Leadership Offered spring. The theories, principles and practices that shape the administration of recreation opportunities offered through public, nonprofit and private agencies and organizations. Course content includes leadership roles of recreation managers, organizational structure, management, legality, risk management, staffing, communication and public relations.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Nonprofit Program Planning

Rule: May complete 3 credits from the following courses:

	Course	Credits
	PTRM 485 - Recreation Planning Offered spring. Prereq., PTRM 217S and PTRM 300. Offered autumn. Needs of recreation opportunities and response to those needs through planning, demand assessment and resource analysis.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Nonprofit Marketing

Rule: May complete 3 credits from the following courses:

	Course	Credits
	BMKT 343 - Integrated Marketing Comm Offered autumn or spring. Prereq., junior standing in Business, BMKT 325. An integrated course in promotion strategy. Topics include advertising message design, media selection, promotions, public relations, personal selling, and other selected topics.	3 Credits
	BMKT 412 - Non Profit Marketing Offered intermittently. Prereq., junior standing in Business and BMKT 325. Integration of core concepts of marketing into philanthropic and other nonprofit organizations. Includes strategies for large-scale enterprises such as unions, educational and religious institutions to small organizations that provide local support such as cultural services, human and environmental services. Student work with nonprofit organizations creating marketing communications plans in an experiential learning environment.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Nonprofit Accounting/Financial Management

Rule: May complete 3 credits from the following courses:

	Course	Credits
	ACTG 201 - Principles of Fin Acct Offered every term. Prereq. or Coreq. M 115, M 121, M 151 or M 162. Introduction to financial accounting concepts, including transactions analysis, financial statement analysis, and corporate financial reporting practices.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Political Science Minor

Minor - Political Science (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 21
Required Cumulative GPA: 2.0
Note: Nine of the 21 required credits must be in 300-400-level courses.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

	PSCI 336 - European Union Offered spring. Prereq junior standing or consent of instructor. Historical and contemporary analysis of political and economic integration in Europe with a focus on the political system of the European Union.	3 Credits
	PSCI 337 - Model United Nations Offered autumn. Prereq., sophomore standing or consent of instr. History and structure of the UN. Contemporary global problems, and the UN's role in addressing them. Class has both active learning and service learning dimensions. Students plan, organize and run the annual Montana Model UN high school conference.	3 Credits
	PSCI 430 - Exp Offering: Intrnt Relations (R-9) Offered intermittently. Prereq., junior standing. Experimental or one-time offerings in the subfield of international relations.	1 To 9 Credits
	PSCI 431 - Politics of Global Migration Prereq., junior standing or consent of instr. Exploration of the elective and forced migration of peoples within countries and across national boundaries. Geographical coverage includes Asia, North and Central America, Africa, and Europe. Attention to policy and gender issues surrounding economic and political migration.	3 Credits
	PSCI 433 - International Law & Org Offered fall. Prereq. PSCI 230 and junior standing or consent of instr. Introduction to classical principles and contemporary issues of the law of nations and the organizations created to facilitate international cooperation.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

American Politics

Rule: May select 1 of the following courses:

	Course	Credits
	PSCI 340 - Exp Offering: American Govt (R-6) Offered intermittently. Experimental or one-time offerings in the subfield of American government.	1 To 6 Credits
	PSCI 341 - Political Parties and Election Offered spring even-numbered years. Prereq., PSCI 210S and junior standing. Political party organization, nominations, campaigns and elections in the United States.	3 Credits
	PSCI 342 - Media, Public Opinion, Polling Offered intermittently. Prereq., PSCI 210S. Study of the role played by mass media in shaping public opinion, policy agendas, and governmental institutions.	3 Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits
	PSCI 346 - American Presidency Offered autumn. Prereq., PSCI 210S. The constitutional foundation and evolution of the executive branch, the structure of the office and executive functions and powers.	3 Credits
	PSCI 348 - US Multicultural Politics Offered intermittently. Examines the politics of diversity in the U.S., including national community, identity, citizenship, immigration, assimilation, and racial issues such as voting rights, affirmative action, segregation and integration, and public opinion.	3 Credits
	PSCI 352 - American Political Thought Offered spring. Prereq., PSCI 250E or consent of instr. The study of representative political thinkers is used to illustrate the theme of American democracy as a multifaceted experiment with self-government.	3 Credits
	PSCI 365 - Pub Policy Issues and Analysis Examines a variety of public policy issues including economic, social welfare, health care, environmental and criminal justice policy. Emphasis is placed on substantive policies and policy analysis.	3 Credits
	PSCI 370 - Courts and Judicial Politics Offered spring. Prereq., PSCI 210S and junior standing. Introduction to American courts with emphasis on judicial policy making.	3 Credits
	PSCI 440 - Exp Offering: American Govt (R-9) Offered intermittently. Experimental or one-time offerings in the subfield of American government.	1 To 9 Credits

	PSCI 443 - Politics of Social Movements Offered spring. Prereq., junior standing or consent of instr. The role of social movements in shaping the politics of power, reflected in public policy, electoral politics, relations of class, race, and gender, and people's understanding of the world and their place in it.	3 Credits
	PSCI 444 - Am Political Participation Offered intermittently. Prereq., PSCI 210S. Examination of the individual and institutional factors affecting voter turnout, the influences on voter decision making, and non-electoral forms of participation in the United States.	3 Credits
	PSCI 445 - Political Psychology Offered intermittently. Applies psychological theories such as personality, emotion, cognition, and social influence to political attitudes and actions, including political opinion formation, conformity, prejudice, genocide, and political leadership.	3 Credits
	PSCI 468 - Public Policy Cycle Offered intermittently. Prereq., Junior standing. Follows specific policy problem through each stage of the public policy cycle, including how policy is formulated in the legislative branch, implemented by the executive branch and reviewed by the judicial branch.	3 Credits
Minimum Required Grade: C-		0-3 Total Credits Required

Teaching Government Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - Political Science (Minor); Track: Teaching Government

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 24

Required Cumulative GPA: 2.0

Note: Nine of the 21 required credits must be in 300-400-level courses.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits
	PSCI 210S - Intro to American Government Offered every term. Not open to senior level political science majors except with consent of instructor. Constitutional principles, structures, and the political processes of the national government.	3 Credits
	PSCI 220S - Intro to Comparative Govt Offered every term. Not open to senior level political science majors except with consent of instr. Introduction to the basic political concepts, themes, values and dilemmas as they apply to the world's diverse societies and cultures.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 250E - Intro to Political Theory Offered spring. Analysis of the various attempts (from Plato to Marx) to explain, instruct, and justify the distribution of political power in society. Emphasis is placed upon those theories whose primary concern is to define the nature of the "good" society.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Teaching Licensure Requirements

Note: Individuals completing a teaching minor must also complete a teaching major in another content area. Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching.

Required Upper Division Field Courses

Rule: Must complete 1 course in 3 of the 5 following options:
Minimum Required Grade: C-
9 Total Credits Required

Public Administration

Rule: May select 1 of the following courses:

	Course	Credits
	PSCI 344 - State and Local Government Offered intermittently. Prereq., PSCI 210S and junior standing. Analysis of American state and local government with emphasis on governmental organization, intergovernmental relations, local government powers, and self-government charters. Special attention to Montana.	3 Credits

	PSCI 360 - Exp Offering: Public Admin (R-6) Offered intermittently. Experimental or onetime offerings in the subfield of public administration or policy.	1 To 6 Credits
	PSCI 361 - Public Administration Offered autumn. Prereq., PSCI 210S and junior standing. Legal and institutional setting of the administrative system; dynamics of organization and processes of public management.	3 Credits

Teaching Methods Course

Rule: Complete the following course.

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Social Studies.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits

Physics and Astronomy Department

Andrew S. Ware, Chair

Physics is considered to be the most fundamental of all disciplines in the natural sciences. In physics we try to describe and understand a myriad of physical phenomena ranging from subatomic to cosmological scales by quantifying the relationships among different physical quantities. Not only does physics have its own merit as a challenging but exciting scientific endeavor, it provides the basis for understanding underlying processes in astronomy, biology, chemistry, geology, computer science, engineering, and even in behavioral sciences. Applications of physics are virtually unlimited: computers, communications, energy production, medical technology, and space flight, to name just a few. The Department of Physics and Astronomy offers a range of physics courses from introductory to advanced undergraduate level in both experimental and theoretical physics with computational methods in mind. In addition, we offer introductory to advanced astronomy and astrophysics courses in which astronomical applications of physics are emphasized. These courses deal with the Universe, from the solar system to clusters of galaxies, both theoretically and observationally. The Department of Physics and Astronomy offers the Bachelor of Arts degree with a major in physics. Graduates with this degree are prepared for further study in physics or related fields at the masters or Ph.D. level, as well as a wide variety of technical positions in industry.

In addition, the department offers three options that combine a solid background in the study of physics with in-depth study in other fields. These options allow for specialization in related fields and provide appropriate background for certain employment opportunities and for continued graduate or professional study. For more details, see the related sections of this catalog.

- Teaching Broadfield Science

Department Faculty

Professors

Daniel Reisenfeld, Chair, Professor of Physics & Astronomy
Eijiro Uchimoto, Professor
Andrew Ware, Professor

Associate Professors

Nate McCrady, Associate Professor

Assistant Professors

Paul Janzen, Assistant Professor
David Macaluso, Assistant Professor

Adjunct Faculty

Brad Halfpap, Adjunct Associate Professor

Lecturers

Alex Bulmahn, Lecturer
Diane Friend, Lecturer

Research Faculty

Vladimir Kovalev, Assistant Research Professor

Astronomy

Back to Top

- ASTR 131N - Planetary Astronomy

Credits: 3. Offered autumn. Prereq., high school algebra and geometry. An introduction to observational, historical, and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope. Course Attributes: Natural Science Course (N)

- ASTR 132N - Stars, Galaxies, and Universe

  Credits: 3. Offered spring. Prereq., high school algebra and geometry. An introduction to stars, stellar evolution, galaxies, and cosmology. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope. Course Attributes: Natural Science Course (N)

- ASTR 134N - Planetary Astronomy Lab

  Credits: 1. Offered autumn. Prereq. or coreq., ASTR 131N Laboratory exercises in observational and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- ASTR 135N - Stars Galaxies andUniverse Lab

  Credits: 1. Offered spring. Prereq. or coreq., ASTR 132N. Laboratory exercises in observational, stellar, and galactic astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- ASTR 142N - The Evolving Universe

  Credits: 4. Offered spring. Prereq., working knowledge of precalculus (ie., college algebra and college trigonometry). Overview of recent developments in planetary system formation, stars, galaxies, and cosmology. Some astronomical observing required outside of normal class hours. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- ASTR 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses or one-time offerings of current topics.

- ASTR 198 - Internship

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internship graduation limit 6

- ASTR 292 - Independent Study

  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student.

- ASTR 351 - Planetary Science

  Credits: 3. Offered autumn even-numbered years. Prereq., PHSX 215N-216N or 205N-206N and M 162 or 171. Same as GEO 317. Physical and geological characteristics of planets, satellites, asteroids, comets, and meteoroids, with an emphasis on comparative planetology.

- ASTR 353 - Galactic Astrophysics

  Credits: 3. Offered spring odd-numbered years. Prereq., ASTR 132N, PHSX 217N-218N, M 273. The nature of the Milky Way galaxy and other galaxies, galactic evolution, the large scale structure of the universe, active galaxies and quasars, and cosmology, including the early universe.

- ASTR 362 - Observational Astronomy

  Credits: 3. Offered autumn even-numbered years. Prereq., ASTR 132N or 142N, PHXS 217N-218N. Laboratory study of the probabilistic behavior of light, data acquisition with telescopes, digital imaging and spectroscopy. Emphasis on fundamental statistical tools, scientific computer programming, and written and oral presentation of scientific results.

- ASTR 363 - Stellar Astr & Astrophys I

  Credits: 3. Offered autumn odd-numbered years. Prereq., ASTR 132N, M 273, and PHSX 217N-218N; PHSX 343 recommended. Detailed application of physical laws to determine the nature of the stars; analysis of stellar spectra and atmospheres; solar astrophysics; structure of stars and their evolution.

- ASTR 365 - Stellar Ast & Astrophys II

Credits: 3. Offered spring even-numbered years. Prereq., ASTR 363. Continuation of ASTR 363.

- ASTR 391 - Special Topics
  Credits: 1 TO 9. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- ASTR 392 - Independent Study
  Credits: 1 TO 6. Course material appropriate to the needs and objectives of the individual student.
- ASTR 398 - Internship
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.
  Course Attributes: Internships/Practicums
- ASTR 494 - Senior Capstone Seminar
  Credits: 1. Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.
- ASTR 499 - Seminar/Workshop
  Credits: 1. Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.

Electrical Engineering

Back to Top

- EELE 201 - Circuits I for Engineering
  Credits: 4. Prereq., PHSX 217N and EGEN 101. Introduction to circuit analysis; Ohm's and Kirchhoff's Laws; resistors, capacitors, inductors, dependent sources, ideal op-amps; the complete response of first order circuits; complex frequency and phasors; steady-state AC circuits, coupled inductors and ideal transformers.
- EELE 203 - Circuits II for Engineers
  Credits: 4. Prereq., EELE 201; Coreq., M 274. Natural and forced response of R-L-C circuits, frequency response of R-L-C circuits and Bode plots, frequency response, slew-rate and DC imperfections of real op-amps; Laplace Transform, Fourier series and Fourier Transform techniques in circuit analysis; basic R-L-C and op-amp filters; two port networks.

General engineering Core

Back to Top

- EGEN 101 - Intro to Eng Cal & Prob Solv
  Credits: 3. Offered autumn. Prereq. or coreq., M 151, or M 121 and M 122, or M 171 or M 172 or ALEX score of 5 or Maplesoft score of 15. An introduction to engineering calculations, problem solving, and design. Students are taught to solve and present engineering problems on computers using spreadsheet and graphic software (AutoCAD). In addition, there will be discussions on engineering failures and engineering ethics.
- EGEN 201 - Engineering Statics
  Credits: 3. Prereq., PHSX 215N, M 171; prereq., or coreq., M 172. Equilibrium of particles and rigid bodies; addition and resolution of forces, vector algebra, moments and couples, resultants and static equilibrium, equivalent force systems, centroids, center of gravity, free body method of analysis, two and three dimensional equilibrium, trusses, frames, friction, and method of virtual work.
- EGEN 202 - Engineering Mechanics - Dynamics
  Credits: 3. Prereq., EGEN 201, M 172. Particle and rigid body kinematics and kinetics; rectilinear, curvilinear, and relative motion, equations of motion, work and energy, impulse and momentum, systems of particles, rotation, rotating axes, rigid body analysis, angular momentum, vibration, and time response.
- EGEN 335 - Fluid Mechanics

Credits: 3. Prereq., EGEN 201, M 311. An introduction to the basic concepts of fluid mechanics including the fundamental properties of fluids, fluid statics, kinematics of fluid motion, and similitude. The conservation of mass, energy, and momentum are introduced with applications to compressible and incompressible fluids. Laminar and turbulent boundary layers are introduced.

Physics

Back to Top

- ### PHSX 101 - Freshman Physics Experience

  Credits: 1. Offered autumn. This course is intended for all incoming students either majoring in physics or considering majoring in physics. This seminar course presents an overview of the undergraduate experience as a physics major. Seminars on recent developments in physics and astronomy and opportunities for undergraduate involvement in research and instruction are included.

- ### PHSX 102 - Preparation for Physics

  Credits: 2. Intended primarily for students who wish to learn or review preparatory material to succeed in the algebra-based physics sequence. Basic physical quantities and their mathematical relationships will be explored along with development of problem solving skills. The course also includes selected mathematical topics, such as trigonometry and vectors that are essential for studying physics.

- ### PHSX 141N - Einstein's Relativity

  Credits: 3. Offered spring. Prereq., working knowledge of high school physics and high school calculus, or consent of instr. Modern theoretical study of space, time, the principle of relativity, and its implications. Analysis of apparent paradoxes, and applications to particle physics. Course Attributes: Natural Science Course (N)

- ### PHSX 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- ### PHSX 198 - Internship

  Credits: 1 TO 9. (R-6) Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- ### PHSX 205N - College Physics I

  Credits: 4. Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N. Course Attributes: Natural Science Course (N)

- ### PHSX 206N - College Physics I Laboratory

  Credits: 1. Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- ### PHSX 207N - College Physics II

  Credits: 4. Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N. Course Attributes: Natural Science Course (N)

- ### PHSX 208N - College Physics II Laboratory

  Credits: 1. Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- PHSX 215N - Fund of Physics w/Calc I

  Credits: 4. Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N. Course Attributes: Natural Science Course (N)

- PHSX 216N - Physics Laboratory I w/Calc

  Credits: 1. Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- PHSX 217N - Fund of Physics w/Calc II

  Credits: 4. Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N. Course Attributes: Natural Science Course (N)

- PHSX 218N - Physics Laboratory II w/Calc

  Credits: 1. Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- PHSX 225N - Gen Science: Phys & Chem Sci

  Credits: 5. Offered autumn. Prereq., M 095 or equiv. Integrated lectures, discussions, laboratory exercises, and demonstrations on topics in chemical and physical science for prospective elementary school teachers and the non-scientist. A two-hour laboratory session is required each week. Course Attributes: Natural Science Lab Course (N) Natural Science Course (N)

- PHSX 291 - Special Topics

  Credits: 1 TO 9. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHSX 292 - Independent Study

  Credits: 1 TO 9. (R-9) Course material appropriate to the needs and objectives of the individual student. Course Attributes: Omnibus Course

- PHSX 301 - Intro Theoretical Physics

  Credits: 3. Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.

- PHSX 311 - Oscillations and Waves

  Credits: 2. Offered autumn. Prereq., PHSX 217N-218N or 207N-208N; Prereq. or coreq. M 273. Detailed study of oscillations and waves at the intermediate level, to develop physical intuition and mathematical skills needed for analyzing a wide range of periodic phenomena encountered in physics.

- PHSX 320 - Classical Mechanics

  Credits: 3. Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.

- PHSX 323 - Intermediate Physics Lab

  Credits: 3. Offered spring. Prereq., PHSX 217N-218N or PHSX 207N-208N and PHSX 311. Laboratory course in the application of analog and digital electronics to experimental physics, with additional emphasis on data analysis techniques.

- PHSX 327 - Optics

  Credits: 3. Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.

- PHSX 330 - Communicating Physics

Credits: 3. Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles. Course Attributes: Writing Course-Advanced

- PHSX 333 - Computational Physics

  Credits: 3. Offered spring odd-numbered years. Prereq., PHSX 217N-218N; coreq., any upper-division PHXS course. Solution of advanced problems in physics using computational methods. Students will learn a variety of numerical methods, including FORTRAN programming techniques.

- PHSX 343 - Modern Physics

  Credits: 3. Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.

- PHSX 391 - Special Topics

  Credits: 1 TO 12. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHSX 392 - Honors Physics

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of instr. Independent research in topics of current interest in physics.

- PHSX 423 - Electricity & Magnetism I

  Credits: 3. Offered autumn. Prereq, PHSx 301. Electricity and magnetism at the intermediate level.

- PHSX 425 - Electricity & Magnetism II

  Credits: 3. Offered spring. Prereq., PHSX 423. Continuation of PHSX 423. Electricity and magnetism at the intermediate level.

- PHSX 444 - Advanced Physics Lab

  Credits: 3. Offered autumn. Prereq., PHSX 343 or equiv., PHSX 327 or equiv.; PHSX 322 suggested but not required. Advanced experiments in classical and modern physics, including optics, spectroscopy, laser science, atomic, nuclear, and particle physics, Data analysis techniques for experimental scientists. Recommended for students entering graduate school in any experimental science.

- PHSX 446 - Thermodyn & Stat Mech

  Credits: 3. Offered spring even-numbered years. Prereq., PHSX 343; coreq., M 311. Topics in thermodynamics and statistical mechanics.

- PHSX 451 - Elementary Particle Physics

  Credits: 3. Offered alternate odd years. Prereq., PHSX 301 and PHSX 343. This course will provide a sound introduction to the Standard Model of particle physics introducing students to the fundamental particles, fundamental forces, and the Feynman calculus.

- PHSX 461 - Quantum Mechanics I

  Credits: 3. Offered autumn. Prereq., PHSX 311, PHSX 343; prereq. or coreq., M 311. Introduction to quantum mechanics. Topics include Schroedinger equation, piecewise constant potential, harmonic oscillator, hydrogen atom, angular momentum theory, electron spin.

- PHSX 462 - Quantum Mechanics II

  Credits: 3. Offered spring. Prereq., PHSX 461 or consent of instr. Advanced topics in quantum mechanics including linear vector spaces and Dirac notation, quantum dynamics, time-dependent perturbation theory, and scattering theory.

- PHSX 491 - Special Topics

  Credits: 3. (R-6) Offered intermittently. Prereq., PHSX 461 or consent of instr. Studies of a topic in advanced modern physics including nuclear physics, solid state physics, and quantum optics. The topic chosen will vary according to instructor.

- PHSX 492 - Independent Study

  Credits: 1 TO 9. (R-9) Offered intermittently. University omnibus option for independent work. Course Attributes: Omnibus Course

- PHSX 499 - Senior Capstone Seminar

Credits: 1. Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.

- PHSX 595 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
  Course Attributes: Internships/Practicums
- PHSX 597 - Research
  Credits: 1 TO 6. (R-9) Offered intermittently. Prereq., consent of instr. Research in selected physics topics. Level: Graduate
- PHSX 598 - Internship
  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate Course Attributes: Internships/Practicums
- PHSX 599 - Thesis
  Credits: 1 TO 9. (R-9) Offered intermittently. Thesis preparation and execution. Level: Graduate

Physics B.A.

Bachelor of Arts - Physics

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 61
Required Cumulative GPA: 2.0

Lower Division Physics

Rule: Must complete all of the courses in one of the two options:
Note: Calculus-based Physics sequence is strongly recommended.
Note: The Physics with Calculus series (PHSX 215N - 218N) is strongly recommended.
Minimum Required Grade: C-
10 Total Credits Required

College Physics

Rule: May complete all of the following courses

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits

	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics with Calculus

Rule: May complete all of the following courses

	Course	**Credits**
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits

Minimum Required Grade: C-	10 Total Credits Required

Upper Division Physics

Rule: Complete the following courses

	Course	Credits
	PHSX 301 - Intro Theoretical Physics Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.	3 Credits
	PHSX 311 - Oscillations and Waves Offered autumn. Prereq., PHSX 217N-218N or 207N-208N; Prereq. or coreq. M 273. Detailed study of oscillations and waves at the intermediate level, to develop physical intuition and mathematical skills needed for analyzing a wide range of periodic phenomena encountered in physics.	2 Credits
	PHSX 320 - Classical Mechanics Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.	3 Credits
	PHSX 323 - Intermediate Physics Lab Offered spring. Prereq., PHSX 217N-218N or PHSX 207N-208N and PHSX 311. Laboratory course in the application of analog and digital electronics to experimental physics, with additional emphasis on data analysis techniques.	3 Credits
	PHSX 327 - Optics Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.	3 Credits
	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits
	PHSX 423 - Electricity & Magnetism I Offered autumn. Prereq, PHSx 301. Electricity and magnetism at the intermediate level.	3 Credits
	PHSX 444 - Advanced Physics Lab Offered autumn. Prereq., PHSX 343 or equiv., PHSX 327 or equiv.; PHSX 322 suggested but not required. Advanced experiments in classical and modern physics, including optics, spectroscopy, laser science, atomic, nuclear, and particle physics, Data analysis techniques for experimental scientists. Recommended for students entering graduate school in any experimental science.	3 Credits

	PHSX 461 - Quantum Mechanics I Offered autumn. Prereq., PHSX 311, PHSX 343; prereq. or coreq., M 311. Introduction to quantum mechanics. Topics include Schroedinger equation, piecewise constant potential, harmonic oscillator, hydrogen atom, angular momentum theory, electron spin.	3 Credits
	PHSX 499 - Senior Capstone Seminar Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.	1 Credits
Minimum Required Grade: C-		27 Total Credits Required

Physics Electives

Rule: Choose any 2 courses designated with PHSX prefix, for 6 total credits
Note: PHSX 425 and PHSX 462 are strongly recommended

	Course	**Credits**
	PHSX 141N - Einstein's Relativity Offered spring. Prereq., working knowledge of high school physics and high school calculus, or consent of instr. Modern theoretical study of space, time, the principle of relativity, and its implications. Analysis of apparent paradoxes, and applications to particle physics.	3 Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
	PHSX 333 - Computational Physics Offered spring odd-numbered years. Prereq., PHSX 217N-218N; coreq., any upper-division PHXS course. Solution of advanced problems in physics using computational methods. Students will learn a variety of numerical methods, including FORTRAN programming techniques.	3 Credits
	PHSX 425 - Electricity & Magnetism II Offered spring. Prereq., PHSX 423. Continuation of PHSX 423. Electricity and magnetism at the intermediate level.	3 Credits
	PHSX 446 - Thermodyn & Stat Mech Offered spring even-numbered years. Prereq., PHSX 343; coreq., M 311. Topics in thermodynamics and statistical mechanics.	3 Credits
	PHSX 462 - Quantum Mechanics II Offered spring. Prereq., PHSX 461 or consent of instr. Advanced topics in quantum mechanics including linear vector spaces and Dirac notation, quantum dynamics, time-dependent perturbation theory, and scattering theory.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Math Requirements

Rule: Complete all of the following courses

Note: M 317, M 412, and M 418 are recommended as well

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Computer Science Requirements

Rule: Choose 1 of the following

Note: PHSX 333 or CSCI 250 is strongly recommended

	Course	Credits
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits

	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
	PHSX 333 - Computational Physics Offered spring odd-numbered years. Prereq., PHSX 217N-218N; coreq., any upper-division PHXS course. Solution of advanced problems in physics using computational methods. Students will learn a variety of numerical methods, including FORTRAN programming techniques.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Advanced College Writing Requirement

Rule: Must take the following course

Note: May substitute another advanced writing course as approved by the department chair.

	Course	**Credits**
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Foreign Language

Note: Students must also complete a 2 semester language sequence or have equivalent placement.

Astronomy B.A.

The astronomy option provides a thorough study of astronomy and astrophysics as well as a solid background in physics and mathematics. Graduates from this program have gone on to graduate programs in astronomy and astrophysics while others have found career opportunities at national astronomical observatories.

Bachelor of Arts - Physics; Astronomy Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 65

Required Cumulative GPA: 2.0

Lower Division Physics Core

Rule: Must complete all of the courses in one of the two options:

Note: Calculus-based physics sequence is strongly recommended.

Note: The Physics with Calculus series (PHSX 215N - 218N) is strongly recommended.

10 Total Credits Required

College Physics

Rule: May complete all of the following courses

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics with Calculus

Rule: May complete all of the following courses:

	Course	Credits

	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Lower Division Astronomy Core

Rule: Must complete all of the courses in one of the two options:

4 Total Credits Required

Astronomy Core: Option 1

Rule: May complete all of the following courses

	Course	**Credits**
	ASTR 132N - Elementary Astronomy II Offered spring. Prereq., high school algebra and geometry. An introduction to stars, stellar evolution, galaxies, and cosmology. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
	ASTR 135N - Elementary Astronomy Lab II Offered spring. Prereq. or coreq., ASTR 132N. Laboratory exercises in observational, stellar, and galactic astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	1 Credits

Minimum Required Grade: C-	4 Total Credits Required

Astronomy Core: Option 2

Rule: May complete the following course

	Course	Credits
	ASTR 142N - The Evolving Universe Offered spring. Prereq., working knowledge of precalculus (ie., college algebra and college trigonometry). Overview of recent developments in planetary system formation, stars, galaxies, and cosmology. Some astronomical observing required outside of normal class hours.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Upper Division Physics Core

Rule: Must complete the following courses

	Course	Credits
	PHSX 301 - Intro Theoretical Physics Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.	3 Credits
	PHSX 311 - Oscillations and Waves Offered autumn. Prereq., PHSX 217N-218N or 207N-208N; Prereq. or coreq. M 273. Detailed study of oscillations and waves at the intermediate level, to develop physical intuition and mathematical skills needed for analyzing a wide range of periodic phenomena encountered in physics.	2 Credits
	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits
	PHSX 461 - Quantum Mechanics I Offered autumn. Prereq., PHSX 311, PHSX 343; prereq. or coreq., M 311. Introduction to quantum mechanics. Topics include Schroedinger equation, piecewise constant potential, harmonic oscillator, hydrogen atom, angular momentum theory, electron spin.	3 Credits
	PHSX 499 - Senior Capstone Seminar Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.	1 Credits

Minimum Required Grade: C-	12 Total Credits Required

Upper Division Astronomy Core

Rule: Must complete the following courses

Note: ASTR 351 and ASTR 362 are recommended as well

	Course	Credits
	ASTR 353 - Galactic Astrophysics Offered spring odd-numbered years. Prereq., ASTR 132N, PHSX 217N-218N, M 273. The nature of the Milky Way galaxy and other galaxies, galactic evolution, the large scale structure of the universe, active galaxies and quasars, and cosmology, including the early universe.	3 Credits
	ASTR 363 - Stellar Astr & Astrophys I Offered autumn odd-numbered years. Prereq., ASTR 132N, M 273, and PHSX 217N-218N; PHSX 343 recommended. Detailed application of physical laws to determine the nature of the stars; analysis of stellar spectra and atmospheres; solar astrophysics; structure of stars and their evolution.	3 Credits
	ASTR 365 - Stellar Ast & Astrophys II Offered spring even-numbered years. Prereq., ASTR 363. Continuation of ASTR 363.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Major Electives

Rule: Complete the following subcategories of courses

12 Total Credits Required

Physics Electives

Rule: Choose 3 of the following courses

	Course	Credits
	PHSX 320 - Classical Mechanics Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.	3 Credits
	PHSX 327 - Optics Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.	3 Credits
	PHSX 423 - Electricity & Magnetism I Offered autumn. Prereq, PHSx 301. Electricity and magnetism at the intermediate level.	3 Credits

	PHSX 425 - Electricity & Magnetism II Offered spring. Prereq., PHSX 423. Continuation of PHSX 423. Electricity and magnetism at the intermediate level.	3 Credits
	PHSX 446 - Thermodyn & Stat Mech Offered spring even-numbered years. Prereq., PHSX 343; coreq., M 311. Topics in thermodynamics and statistical mechanics.	3 Credits
	PHSX 462 - Quantum Mechanics II Offered spring. Prereq., PHSX 461 or consent of instr. Advanced topics in quantum mechanics including linear vector spaces and Dirac notation, quantum dynamics, time-dependent perturbation theory, and scattering theory.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Physics Laboratory Electives

Rule: Choose 1 of the following laboratory courses

	Course	Credits
	ASTR 362 - Observational Astronomy Offered autumn even-numbered years. Prereq., ASTR 132N or 142N, PHXS 217N-218N. Laboratory study of the probabilistic behavior of light, data acquisition with telescopes, digital imaging and spectroscopy. Emphasis on fundamental statistical tools, scientific computer programming, and written and oral presentation of scientific results.	3 Credits
	PHSX 323 - Intermediate Physics Lab Offered spring. Prereq., PHSX 217N-218N or PHSX 207N-208N and PHSX 311. Laboratory course in the application of analog and digital electronics to experimental physics, with additional emphasis on data analysis techniques.	3 Credits
	PHSX 444 - Advanced Physics Lab Offered autumn. Prereq., PHSX 343 or equiv., PHSX 327 or equiv.; PHSX 322 suggested but not required. Advanced experiments in classical and modern physics, including optics, spectroscopy, laser science, atomic, nuclear, and particle physics, Data analysis techniques for experimental scientists. Recommended for students entering graduate school in any experimental science.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Math Requirements

Rule: Complete the following courses

Note: M 317, M 412, and M 418 are recommended as well

	Course	Credits

	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Computer Science Electives

Rule: Choose 1 of the following courses

Note: PHSX 333 or CSCI 250 is strongly recommended.

	Course	**Credits**
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits

	PHSX 333 - Computational Physics Offered spring odd-numbered years. Prereq., PHSX 217N-218N; coreq., any upper-division PHXS course. Solution of advanced problems in physics using computational methods. Students will learn a variety of numerical methods, including FORTRAN programming techniques.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Physics with Calculus

Rule: May complete all of the following courses

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits

	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Upper Division Physics

Rule: Complete the following courses

	Course	Credits
	PHSX 301 - Intro Theoretical Physics Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.	3 Credits
	PHSX 311 - Oscillations and Waves Offered autumn. Prereq., PHSX 217N-218N or 207N-208N; Prereq. or coreq. M 273. Detailed study of oscillations and waves at the intermediate level, to develop physical intuition and mathematical skills needed for analyzing a wide range of periodic phenomena encountered in physics.	2 Credits
	PHSX 320 - Classical Mechanics Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.	3 Credits
	PHSX 333 - Computational Physics Offered spring odd-numbered years. Prereq., PHSX 217N-218N; coreq., any upper-division PHXS course. Solution of advanced problems in physics using computational methods. Students will learn a variety of numerical methods, including FORTRAN programming techniques.	3 Credits
	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits
	PHSX 423 - Electricity & Magnetism I Offered autumn. Prereq, PHSx 301. Electricity and magnetism at the intermediate level.	3 Credits

	PHSX 499 - Senior Capstone Seminar Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.	1 Credits
Minimum Required Grade: C-		18 Total Credits Required

Physics Elective

Rule: Choose 1 of the following courses

Note: PHSX 322, 425, and 461 are strongly recommended

	Course	Credits
	PHSX 141N - Einstein's Relativity Offered spring. Prereq., working knowledge of high school physics and high school calculus, or consent of instr. Modern theoretical study of space, time, the principle of relativity, and its implications. Analysis of apparent paradoxes, and applications to particle physics.	3 Credits
	PHSX 323 - Intermediate Physics Lab Offered spring. Prereq., PHSX 217N-218N or PHSX 207N-208N and PHSX 311. Laboratory course in the application of analog and digital electronics to experimental physics, with additional emphasis on data analysis techniques.	3 Credits
	PHSX 327 - Optics Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.	3 Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
	PHSX 425 - Electricity & Magnetism II Offered spring. Prereq., PHSX 423. Continuation of PHSX 423. Electricity and magnetism at the intermediate level.	3 Credits
	PHSX 444 - Advanced Physics Lab Offered autumn. Prereq., PHSX 343 or equiv., PHSX 327 or equiv.; PHSX 322 suggested but not required. Advanced experiments in classical and modern physics, including optics, spectroscopy, laser science, atomic, nuclear, and particle physics, Data analysis techniques for experimental scientists. Recommended for students entering graduate school in any experimental science.	3 Credits
	PHSX 446 - Thermodyn & Stat Mech Offered spring even-numbered years. Prereq., PHSX 343; coreq., M 311. Topics in thermodynamics and statistical mechanics.	3 Credits

	PHSX 461 - Quantum Mechanics I Offered autumn. Prereq., PHSX 311, PHSX 343; prereq. or coreq., M 311. Introduction to quantum mechanics. Topics include Schroedinger equation, piecewise constant potential, harmonic oscillator, hydrogen atom, angular momentum theory, electron spin.	3 Credits
	PHSX 462 - Quantum Mechanics II Offered spring. Prereq., PHSX 461 or consent of instr. Advanced topics in quantum mechanics including linear vector spaces and Dirac notation, quantum dynamics, time-dependent perturbation theory, and scattering theory.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Math Requirements

Rule: Complete the following courses

Note: M 307, STAT 341, and STAT 458 are recommended as well

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 225 - Intro to Discrete Mathematics Offered autumn. Prereq., one of M 162, 171, or 181 or consent of instr. Mathematical concepts used in computer science with an emphasis on mathematical reasoning and proof techniques. Elementary logic, sets, functions and relations, combinatorics, mathematical induction, recursion and algorithms. Mathematics majors should take M 307 instead of 225.	3 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
		21 Total Credits Required

Computer Science Requirements

Rule: Complete the following subcategories of courses

20 Total Credits Required

Computer Science Core Courses

Rule: Must complete all of the following courses

	Course	Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 232 - Data Structures and Algorithms Offered autumn. Prereq., 'B-' or better in CSCI 136; or consent of instr. Abstract data types, algorithm analysis, stacks, queues, lists, recursion, trees, hashing, graphs, and applications of data structures in algorithm development. Python programming language used.	4 Credits
	CSCI 332 - Design/Analysis of Algorithms Offered spring. Prereq., CSCI 232 and M 225 or consent of instr. Algorithm design, analysis, and correctness. Commonly used algorithms including searching and sorting, string search, dynamic programming, branch and bound, graph algorithms, and parallel algorithms. Introduction to NP-complete problems.	3 Credits
Minimum Required Grade: C-		13 Total Credits Required

Computer Science Electives

Rule: Choose an additional 7 credits from any CSCI courses number 200 and above

Note: CSCI 205, 250, 361, 415, and 477 are recommended

Advanced College Writing Requirement

Rule: Must take the following course

Note: May substitute another advanced writing course as approved by the department chair.

	Course	Credits

	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Foreign Language

Note: Students must also complete a 2 semester language sequence or have equivalent placement.

Teaching Physics

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Bachelor of Arts - Physics; Track: Teaching Physics

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 76

Required Cumulative GPA: 2.0

Lower Division Physics

Rule: Must complete all of the courses in one of the two options:

Note: Calculus-based Physics sequence is strongly recommended.

Note: The Physics with Calculus series (PHSX 215N - 218N) is strongly recommended.

Minimum Required Grade: C-

10 Total Credits Required

College Physics

Rule: May complete all of the following courses

	Course	**Credits**

	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics with Calculus

Rule: May complete all of the following courses

	Course	**Credits**
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits

	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Upper Division Physics

Rule: Must complete the following subcategories
Minimum Required Grade: C-
22 Total Credits Required

Required Upper Division Courses

Rule: All courses are required

	Course	Credits
	PHSX 301 - Intro Theoretical Physics Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.	3 Credits
	PHSX 320 - Classical Mechanics Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.	3 Credits
	PHSX 327 - Optics Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.	3 Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits

	PHSX 423 - Electricity & Magnetism I Offered autumn. Prereq, PHSx 301. Electricity and magnetism at the intermediate level.	3 Credits
	PHSX 461 - Quantum Mechanics I Offered autumn. Prereq., PHSX 311, PHSX 343; prereq. or coreq., M 311. Introduction to quantum mechanics. Topics include Schroedinger equation, piecewise constant potential, harmonic oscillator, hydrogen atom, angular momentum theory, electron spin.	3 Credits
	PHSX 499 - Senior Capstone Seminar Offered autumn. Prereq., junior or senior standing in physics. Each student will present a seminar on research performed prior to or during their senior year.	1 Credits
Minimum Required Grade: C-		22 Total Credits Required

Upper Division Elective Courses

Rule: Must take 3 additional upper division elective courses

Math Requirements

Rule: Complete all of the following courses

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Computer Science Requirements

Rule: Choose 1 of the following

Note: PHSX 333 is strongly recommended

	Course	Credits
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Statistics

Rule: Must complete 1 of the following courses

	Course	Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Advanced College Writing Requirement

Rule: Must take the following course

Note: May substitute another advanced writing course as approved by the department chair.

	Course	Credits

	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Teaching Licensure Requirements

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major GPA of 2.75 is required to be eligible for student teaching. This major does not qualify as a single field endorsement. Individuals must complete a second teaching major or minor in another content area.

Allied Science

Rule: Must complete the following subcategories

20-21 Total Credits Required

Astronomy

Rule: Must complete the following courses

	Course	**Credits**
	ASTR 131N - Elementary Astronomy I Offered autumn. Prereq., high school algebra and geometry. An introduction to observational, historical, and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
	ASTR 132N - Elementary Astronomy II Offered spring. Prereq., high school algebra and geometry. An introduction to stars, stellar evolution, galaxies, and cosmology. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Chemistry

Rule: Must complete the following courses

	Course	**Credits**

	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 485 - Laboratory Safety Offered autumn. Prereq., one year of college chemistry. Awareness of and methods of control of hazards encountered in laboratory work. Awareness of legal constraints on work with chemicals. Sources of information regarding chemical hazards.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Biology

Rule: Must complete 1 of the following courses

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Geology

Rule: Must complete the following courses

	Course	Credits
	GEO 101N - Intro to Physical Geology Offered autumn and spring. General geology including the work of wind, flowing water, glacial ice, gravity, earthquakes, volcanoes and plate tectonics in shaping the earth.	3 Credits
	GEO 102N - Intro to Physical Geology Lab Offered autumn and spring. Prereq. or coreq., GEO 101N (preferred) or 105N or 108N. A series of laboratory and field experiences designed around basic geologic processes and materials. Familiarization with common minerals, rocks, land forms, and structures. Intended to provide laboratory experience primarily with GEO 101N, but can be taken with or following any of the other freshman GEO courses listed above.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Environmental

Rule: Must complete 1 of the following courses

	Course	Credits
	ENSC 105N - Environmental Science Offered autumn. Provides students with opportunities to use class knowledge to make a difference; helps students build all of the following: scientific literacy; skills in critical thinking, research and self-instruction; an understanding of the scientific basis of environmental issues, policies and laws; habits of sustainable living, scientifically-informed, active participation in social decisions, and service to their community and to the earth.	3 Credits
	ENST 472 - Gen Sci: Conserv Ed Offered autumn and spring. A study of the foundations of environmental science and conservation education with applications to community service and teaching.	3 Credits
	GEO 105N - Oceanography Offered spring. The ocean covers 70 % of the globe, and yet vast regions remain unexplored. Interactions between the atmosphere and the sea moderate and control our climate. Nearly 40 % of the world's population lives within 100 kilometers of the coast. The oceans are geographically, environmentally, culturally, and economically critical to society. This course introduces oceanography, including the origin of water and ocean basins; marine resources; atmospheric circulation; air-sea interaction; ocean-climate feedback; currents, tides, and coastal processes; marine ecology; and use and misuse of the oceans.	3 Credits

	GEO 108N - Climate Change Offered autumn. The geoscience perspective on the earth's climate system. Climate processes and feedbacks, climate history from early earth to the ice ages, present and future changes due to natural processes and human activities.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Teaching Licensure Course

Rule: Must complete the following course

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Science.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Teaching Broadfield Science

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Bachelor of Arts - Physics; Teaching Broadfield Science Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 79

Required Cumulative GPA: 2.0

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major GPA of 2.75 is required to be eligible for student teaching.

Physics Requirements

Rule: Must complete all of the following subcategories

Minimum Required Grade: C-

24 Total Credits Required

Required Physics Courses

Rule: All courses are required

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits

	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 301 - Intro Theoretical Physics Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.	3 Credits
	PHSX 311 - Oscillations and Waves Offered autumn. Prereq., PHSX 217N-218N or 207N-208N; Prereq. or coreq. M 273. Detailed study of oscillations and waves at the intermediate level, to develop physical intuition and mathematical skills needed for analyzing a wide range of periodic phenomena encountered in physics.	2 Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits
Minimum Required Grade: C-		21 Total Credits Required

Physics Elective

Rule: Must complete 1 additional upper division Physics course

Math Requirements

Rule: All courses are required

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits

	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Statistics Requirements

Rule: Must complete 1 of the following courses

	Course	Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Astronomy Requirements

Rule: All courses are required

	Course	Credits
	ASTR 131N - Elementary Astronomy I Offered autumn. Prereq., high school algebra and geometry. An introduction to observational, historical, and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
	ASTR 134N - Elementary Astronomy Lab I Offered autumn. Prereq. or coreq., ASTR 131N Laboratory exercises in observational and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Geology Requirements

Rule: Must complete the following subcategories

7 Total Credits Required

Required Geology Courses

Rule: All courses are required

	Course	Credits
	GEO 101N - Intro to Physical Geology Offered autumn and spring. General geology including the work of wind, flowing water, glacial ice, gravity, earthquakes, volcanoes and plate tectonics in shaping the earth.	3 Credits
	GEO 102N - Intro to Physical Geology Lab Offered autumn and spring. Prereq. or coreq., GEO 101N (preferred) or 105N or 108N. A series of laboratory and field experiences designed around basic geologic processes and materials. Familiarization with common minerals, rocks, land forms, and structures. Intended to provide laboratory experience primarily with GEO 101N, but can be taken with or following any of the other freshman GEO courses listed above.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Geology Electives

Rule: Must complete 1 of the following courses

	Course	Credits
	ASTR 351 - Planetary Science Offered autumn even-numbered years. Prereq., PHSX 215N-216N or 205N-206N and M 162 or 171. Same as GEO 317. Physical and geological characteristics of planets, satellites, asteroids, comets, and meteoroids, with an emphasis on comparative planetology.	3 Credits
	GEO 105N - Oceanography Offered spring. The ocean covers 70 % of the globe, and yet vast regions remain unexplored. Interactions between the atmosphere and the sea moderate and control our climate. Nearly 40 % of the world's population lives within 100 kilometers of the coast. The oceans are geographically, environmentally, culturally, and economically critical to society. This course introduces oceanography, including the origin of water and ocean basins; marine resources; atmospheric circulation; air-sea interaction; ocean-climate feedback; currents, tides, and coastal processes; marine ecology; and use and misuse of the oceans.	3 Credits

	GEO 108N - Climate Change Offered autumn. The geoscience perspective on the earth's climate system. Climate processes and feedbacks, climate history from early earth to the ice ages, present and future changes due to natural processes and human activities.	3 Credits
	GEO 200 - Historical Geology Offered autumn. Traces the history of the earth since its inception 4.5 billion years ago. Presents scientific theories for the origin of the earth and the nature of important earth shaping events of the past, including the development of the oceans, atmosphere and climate.	2 Credits
Minimum Required Grade: C-		3 Total Credits Required

Biology Requirements

Rule: Must complete all of the following courses

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits
	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
	BIOB 272 - Genetics and Evolution Offered spring. Prereq., either BIOB 260 OR both BIOB 160N and BIOB 170N/171N; and one of M 121, 122, 151, 162, or 171. Principles and mechanisms of inheritance and evolution. Population genetics, fossil record, macroevolution, speciation, extinction, systematics, molecular evolution.	4 Credits
Minimum Required Grade: C-		12 Total Credits Required

Chemistry Requirements

Rule: Must complete all of the following courses

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
	CHMY 485 - Laboratory Safety Offered autumn. Prereq., one year of college chemistry. Awareness of and methods of control of hazards encountered in laboratory work. Awareness of legal constraints on work with chemicals. Sources of information regarding chemical hazards.	1 Credits
Minimum Required Grade: C-		11 Total Credits Required

Advanced College Writing Requirement

Rule: Must take the following course

Note: May substitute another advanced writing course as approved by the department chair.

	Course	Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Teaching Methods Requirement

Rule: Complete the following course.

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Science.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Minor - Physics (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 24
Required Cumulative GPA: 2.0
Note: Mathematics prerequisites for the physics minor are M 171, 172, 273, and 311

Required Lower Division Courses

Rule: Must complete all of the following courses in one of the two options:
Note: The Physics with Calculus series (PHSX 215N - 218N) is strongly recommended.

10 Total Credits Required

College Physics

Rule: May complete all of the following courses:

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics with Calculus

Rule: May complete all of the following courses:

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Upper Division Core Course

Rule: Must complete the following course:

	Course	Credits
	PHSX 301 - Intro Theoretical Physics Offered spring. Prereq., M 273; coreq., PHSX 217N-218N. Selected topics from applied linear algebra, ordinary and partial differential equations, vector analysis, complex variables, and Fourier series. Applications to classical mechanics, electromagnetism, and quantum mechanics.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Elective Courses

Rule: Must complete 11 credits from the following courses

Note: Eight of the eleven required credits must be upper division courses.

	Course	Credits
	PHSX 141N - Einstein's Relativity Offered spring. Prereq., working knowledge of high school physics and high school calculus, or consent of instr. Modern theoretical study of space, time, the principle of relativity, and its implications. Analysis of apparent paradoxes, and applications to particle physics.	3 Credits
	PHSX 291 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	PHSX 311 - Oscillations and Waves Offered autumn. Prereq., PHSX 217N-218N or 207N-208N; Prereq. or coreq. M 273. Detailed study of oscillations and waves at the intermediate level, to develop physical intuition and mathematical skills needed for analyzing a wide range of periodic phenomena encountered in physics.	2 Credits
	PHSX 320 - Classical Mechanics Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.	3 Credits
	PHSX 323 - Intermediate Physics Lab Offered spring. Prereq., PHSX 217N-218N or PHSX 207N-208N and PHSX 311. Laboratory course in the application of analog and digital electronics to experimental physics, with additional emphasis on data analysis techniques.	3 Credits
	PHSX 327 - Optics Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.	3 Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits
	PHSX 333 - Computational Physics Offered spring odd-numbered years. Prereq., PHSX 217N-218N; coreq., any upper-division PHXS course. Solution of advanced problems in physics using computational methods. Students will learn a variety of numerical methods, including FORTRAN programming techniques.	3 Credits
	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits
	PHSX 423 - Electricity & Magnetism I Offered autumn. Prereq, PHSx 301. Electricity and magnetism at the intermediate level.	3 Credits

	PHSX 444 - Advanced Physics Lab Offered autumn. Prereq., PHSX 343 or equiv., PHSX 327 or equiv.; PHSX 322 suggested but not required. Advanced experiments in classical and modern physics, including optics, spectroscopy, laser science, atomic, nuclear, and particle physics, Data analysis techniques for experimental scientists. Recommended for students entering graduate school in any experimental science.	3 Credits
	PHSX 446 - Thermodyn & Stat Mech Offered spring even-numbered years. Prereq., PHSX 343; coreq., M 311. Topics in thermodynamics and statistical mechanics.	3 Credits
	PHSX 461 - Quantum Mechanics I Offered autumn. Prereq., PHSX 311, PHSX 343; prereq. or coreq., M 311. Introduction to quantum mechanics. Topics include Schroedinger equation, piecewise constant potential, harmonic oscillator, hydrogen atom, angular momentum theory, electron spin.	3 Credits
	PHSX 462 - Quantum Mechanics II Offered spring. Prereq., PHSX 461 or consent of instr. Advanced topics in quantum mechanics including linear vector spaces and Dirac notation, quantum dynamics, time-dependent perturbation theory, and scattering theory.	3 Credits
Minimum Required Grade: C-		11 Total Credits Required

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Astronomy Minor

Minor - Astronomy (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 25

Required Cumulative GPA: 2.0

Note: Mathematics prerequisites for the Astronomy minor are M 171, M 172, and M 273

Lower Division Physics Courses

Rule: Must complete all of the courses in one of the two options:

Note: The Physics with Calculus series (PHSX 215N - 218N) is strongly recommended.

10 Total Credits Required

> ### *College Physics*
> **Rule:** May complete all of the following courses:

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits

Physics with Calculus

Rule: May complete all of the following courses:

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits

	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Lower Division Astronomy Courses

Rule: Complete the following subcategories of courses

6-7 Total Credits Required

Core Course

Rule: Complete all of the following courses

	Course	**Credits**
	ASTR 131N - Elementary Astronomy I Offered autumn. Prereq., high school algebra and geometry. An introduction to observational, historical, and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Core Elective

Rule: Choose 1 of the following courses

	Course	**Credits**
	ASTR 132N - Elementary Astronomy II Offered spring. Prereq., high school algebra and geometry. An introduction to stars, stellar evolution, galaxies, and cosmology. Students will have a chance to visit UM’s state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits

	ASTR 142N - The Evolving Universe Offered spring. Prereq., working knowledge of precalculus (ie., college algebra and college trigonometry). Overview of recent developments in planetary system formation, stars, galaxies, and cosmology. Some astronomical observing required outside of normal class hours.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Electives

Rule: Must complete 3 of the following courses

	Course	Credits
	ASTR 351 - Planetary Science Offered autumn even-numbered years. Prereq., PHSX 215N-216N or 205N-206N and M 162 or 171. Same as GEO 317. Physical and geological characteristics of planets, satellites, asteroids, comets, and meteoroids, with an emphasis on comparative planetology.	3 Credits
	ASTR 353 - Galactic Astrophysics Offered spring odd-numbered years. Prereq., ASTR 132N, PHSX 217N-218N, M 273. The nature of the Milky Way galaxy and other galaxies, galactic evolution, the large scale structure of the universe, active galaxies and quasars, and cosmology, including the early universe.	3 Credits
	ASTR 362 - Observational Astronomy Offered autumn even-numbered years. Prereq., ASTR 132N or 142N, PHXS 217N-218N. Laboratory study of the probabilistic behavior of light, data acquisition with telescopes, digital imaging and spectroscopy. Emphasis on fundamental statistical tools, scientific computer programming, and written and oral presentation of scientific results.	3 Credits
	ASTR 363 - Stellar Astr & Astrophys I Offered autumn odd-numbered years. Prereq., ASTR 132N, M 273, and PHSX 217N-218N; PHSX 343 recommended. Detailed application of physical laws to determine the nature of the stars; analysis of stellar spectra and atmospheres; solar astrophysics; structure of stars and their evolution.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Teaching Physics Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Minor - Physics (Minor); Track: Teaching Physics

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 56
Required Cumulative GPA: 2.0

Lower Division Physics

Rule: Must complete all of the courses in one of the two options:
Note: Calculus-based Physics sequence is strongly recommended.
Note: The Physics with Calculus series (PHSX 215N - 218N) is strongly recommended.

College Physics

Rule: May complete all of the following courses

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics with Calculus

Rule: May complete all of the following courses

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Upper Division Physics

Rule: Complete the following courses

	Course	Credits
	PHSX 320 - Classical Mechanics Offered autumn. Prereq., PHSX 301, M 311. Topics in classical mechanics at the intermediate level, emphasizing Lagrangian and Hamiltonian dynamics.	3 Credits
	PHSX 327 - Optics Offered spring. Prereq., PHSX 311. Intermediate level study of light and optics, including geometrical optics, wave optics, optical instruments, coherence, polarization, and special topics.	3 Credits
	PHSX 330 - Communicating Physics Offered spring even-numbered years. Prereq., PHSX 217N-218N or PHSX 207N-208N. Oral and written communication skills in physics, to include teaching high school and college physics, presenting seminars, and writing technical and non-technical physics articles.	3 Credits

	PHSX 343 - Modern Physics Offered autumn. Prereq., one year of college physics; coreq., M 273. Includes historical background for development of modern physics and an introduction to quantum mechanics, atomic and nuclear physics. Credit not allowed for graduate degree in physics.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Math Requirements

Rule: Complete all of the following courses

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Computer Science Requirements

Rule: Choose 1 of the following

Note: PHSX 333 is strongly recommended

	Course	Credits

	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Statistics

Rule: Must complete 1 of the following courses

	Course	Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Teaching Licensure Requirements

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching. Individuals completing a teaching minor must also complete a teaching major in another content area.

Allied Science

Rule: Must complete the following subcategories

10-11 Total Credits Required

> ### *Astronomy*
>
> **Rule:** Must complete 1 of the following courses

	Course	Credits
	ASTR 131N - Elementary Astronomy I Offered autumn. Prereq., high school algebra and geometry. An introduction to observational, historical, and planetary astronomy. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
	ASTR 132N - Elementary Astronomy II Offered spring. Prereq., high school algebra and geometry. An introduction to stars, stellar evolution, galaxies, and cosmology. Students will have a chance to visit UM's state-of-the-art planetarium and observe with our 0.4 meter telescope.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry

Rule: Must complete the following courses

	Course	Credits
	CHMY 121N - Intro to General Chemistry Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry.	3 Credits
	CHMY 485 - Laboratory Safety Offered autumn. Prereq., one year of college chemistry. Awareness of and methods of control of hazards encountered in laboratory work. Awareness of legal constraints on work with chemicals. Sources of information regarding chemical hazards.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Biology

Rule: Must complete 1 of the following courses

	Course	Credits
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits

	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOE 172N - Introductory Ecology Offered autumn. An introduction to ecological principles, stressing the structure and function of natural communities and examining human's role in these ecosystems.	3 Credits
	BIOO 105N - Introduction to Botany Offered spring. Introduction to the plant kingdom including anatomy, physiology and ecology.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Teaching Licensure Course

Rule: Must complete the following course

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Science.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Philosophy Department

Paul Muench, Chair

Philosophy is the search for an understanding of how the world as a whole hangs together and of how we are to assume our place in the world. Philosophy pursues its goal first of all historically. It is the trustee of the heritage of great philosophical texts, and it engages those texts in conversation with contemporary problems. Second, philosophy turns to the contemporary world directly and tries to illuminate and advance its concerns with ethics and art, with science and technology, with ecology and feminism, with law and medicine. Bachelor of Arts and Master of Arts degrees are offered.

Bachelor of Arts and Master of Arts degrees are offered. More information is available online at the Philosophy Department website:

Department Faculty

Professors

Albert Borgmann, Regents Professor Emeritus of Philosophy
Bridget Clarke, Associate Professor of Philosophy
Armond Duwell, Professor of Philosophy
Christopher Preston, Professor of Philosophy
David Sherman, Professor of Philosophy
Deborah Slicer, Professor of Philosophy, Graduate Advisor

Associate Professors

Soazig Le Bihan, Associate Professor of Philosophy
Paul Muench, Associate Professor of Philosophy
Matthew Strohl, Associate Professor of Philosophy

Adjunct Faculty

Patrick Burke, Adjunct Instructor of Philosophy
Melodie Stenger

Emeritus Professors

Thomas Huff, Adjunct Professor / Professor of Philosophy, Emeritus
Fred McGlynn, Professor Emeritus

Philosophy

Back to Top

- PHL 101Y - Introduction to Philosophy
  Credits: 3. (R-12) Offered yearly. An introduction to philosophy through examination of the thought of selected great philosophers or traditional positions on classical philosophical problems. Course Attributes: Democracy and Citizenship (Y)
- PHL 102Y - Topical Intro to Philosophy
  Credits: 1 TO 4. (R-9) Offered yearly. An introduction to philosophy through examination of a selected topic (such as existentialism, philosophy of film, technology and the good life, science and society, philosophy of religion). Course Attributes: Democracy and Citizenship (Y)
- PHL 110E - Introduction to Ethics
  Credits: 3. Offered every term. An examination of the Western vision of morality through the careful study of selected writings from Aristotle, Kant and Mill. Additional works in ethics may supplement primary readings. Course Attributes: Ethical & Human Values Course
- PHL 112E - Intro Ethics and Environment
  Credits: 3. Offered intermittently. An introductory-level ethics course with a special interest in the natural environment. The course will (a) introduce students to the three classical traditions in ethics - virtue, Kantianism, and utilitarianism, (b) ground these theories in questions about the moral status of non-humans and our moral duties to non-humans, (c) include an applied section

that covers animal welfare, biotechnology, and other current topics. Course Attributes: Ethical & Human Values Course

- PHL 114E - Intro to Political Ethics

  Credits: 3. Offered intermittently. An examination of the issues of political ethics through the careful study of selected writings from the three great Western political traditions: classical natural law theory, modern individualism, and contemporary distributive justice. Course Attributes: Ethical & Human Values Course

- PHL 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHL 198 - Internship

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services Office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- PHL 210E - Moral Philosophy

  Credits: 3. Offered autumn and spring. Prereq., philosophy major or minor, or consent of instr. An examination of leading approaches to moral philosophy through a careful reading of classical texts in the Western tradition. A more thorough treatment of the material offered in PHL 110E. Intended primarily for philosophy majors and minors. Course Attributes: Ethical & Human Values Course Writing Course-Intermediate

- PHL 233 - Intro to Logic: Deduction

  Credits: 3. Offered autumn and spring. Understanding general principles of reasoning and the habits of clear and correct thinking. Emphasis on the analysis of the logical structure of claims in natural language and the skills of elementary deductive inference.

- PHL 235 - Intro to Logic: Induction

  Credits: 3. Offered intermittently. Prereq., PHL 233 or equivalent, or consent of instr. A study of the formal principles of reasoning from evidence.

- PHL 241N - Hist & Philosophy of Science

  Credits: 3. Offered intermittently. The epistemological and metaphysical developments of natural philosophy or science. The origins of science in ancient Greece, and its subsequent developments during the scientific revolution. Developments in biology, especially Darwinism and genetics, and developments in physics. Course Attributes: Hist & Cultural Studies (H) Natural Science Course (N)

- PHL 261Y - History of Ancient Philosophy

  Credits: 3. Offered autumn. Introduction to the central works of Plato and Aristotle, with an overview of Presocratic and Hellenistic philosophy. Course Attributes: Democracy and Citizenship (Y)

- PHL 262Y - History of Modern Philosophy

  Credits: 3. Offered spring. A survey of the history of philosophy from Descartes to Kant, which includes other continental rationalists and the British Empiricists. Course Attributes: Democracy and Citizenship (Y)

- PHL 291 - Special Topics

  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHL 292 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- PHL 298 - Internship

  Credits: 1 TO 6. (R-9) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- PHL 301 - Knowledge and Reality

  Credits: 3. (R-9) Offered intermittently. Prereq., upper-division standing or consent of instr. Selected topics in one or more of the following areas: epistemology (the study of knowledge), philosophy of science, metaphysics. Intended primarily for non-majors.

- PHL 311 - The Good, Right, Beautiful

  Credits: 3. (R-9) Offered intermittently. Prereq., upper-division standing or consent of instr. Selected topics in one or more of the following areas: ethics, philosophy of mind/action, aesthetics. Intended primarily for non-majors.

- PHL 316 - Historical Figures in Phil

  Credits: 3. (R-9)Offered intermittently. Prereq., upper-division standing or consent of instr. Study of one or more historically significant philosophers. Intended primarily for non-majors.

- PHL 321E - Philosophy & Biomedical Ethics

  Credits: 3. Offered intermittently. Prereq., upper-division standing or consent of instr. An examination of ethical problems raised by the practice of medicine and by recent developments in medically-related biological sciences. Course Attributes: Ethical & Human Values Course

- PHL 323 - Ethics of Climate Change

  Credits: 3. This course examines some of the fundamental issues raised by global climate change and considers how environmental ethics might help to address these issues. Students will become acquainted with the essential elements of climate change science and be provided with an introduction to contemporary approaches to environmental ethics that have developed out of the primary ethical traditions of western thought: deontological (Kantian) ethics, utilitarian ethics, and virtue ethics. In addition, the course examines alternative understandings of the appropriate relationship between humans and the natural world including: “Deep Ecology” and Native American perspectives.

- PHL 351 - Philosophy and Feminism

  Credits: 3. Offered intermittently. Prereq., upper-division standing or consent of instr. Study of what distinguishes feminist from traditional approaches to ethics. May also examine other relevant areas of philosophy, including epistemology, political theory, philosophy of science and environment.

- PHL 363H - Ancient Greek and Roman Philosophy

  Credits: 3. Offered intermittently. Examination of the thought of the philosophers of Greece and Rome as expressed in original works read in English translation. Ancient philosophy studied within its historical, linguistic and cultural setting. Course Attributes: Hist & Cultural Studies (H)

- PHL 370 - Philosophy of Religion

  Credits: 3. Offered intermittently. Prereq., upper-division standing or consent of instr. An examination of one or more of the classic problems of Western philosophy of religion, such as the traditional arguments for and against the existence of God, the relationship of faith and reason, the status of religious experience, the problem of evil, and the problem of reconciling divine omniscience with human freedom.

- PHL 390 - Research

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the background and objectives of the student. Course Attributes: Research & Creative Schlrshp

- PHL 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHL 392 - Independent Study

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- PHL 394 - Seminar

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary.

- PHL 398 - Internship

Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- PHL 405 - 20th Century Analytic Phil

  Credits: 3. (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Intensive study of the work of one or more philosophers (such as Frege, Russell, Wittgenstein) or historical introduction to the major issues and figures of 20th century philosophy in the analytic tradition (with readings from Frege, Russell, Wittgenstein, Quine and others).

- PHL 406 - Contemp Issues Analytic Phil

  Credits: 3. (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Examination of contemporary issues in analytic philosophy focusing on one or more of the following topics: philosophy of language, epistemology, metaphysics, philosophy of mind.

- PHL 412 - Ethics and Public Affairs

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of morally relevant issues in government, journalism, education and other social institutions. Issues considered may include just war theory, deception, confidentiality, conflict of interest, privacy, paternalism responsibilities in conflict with other institutions, and responsibilities across national boundaries, among others.

- PHL 422 - Environmental Philosophy

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Critical exploration of selected philosophical and literary texts pertinent to the ethics of human relationships with the natural environment.

- PHL 427 - Topics in Philosophy of Art

  Credits: 1 TO 4. (R-9) Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of philosophical problems related to particular arts and discussion of the nature of the arts. Topics considered may include music, visual arts, literature, and film.

- PHL 429 - Philosophy in Literature

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Philosophical thought in selected works of literature.

- PHL 445 - Central Issues Phil of Science

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A consideration of philosophical issues relating to the nature of modern physical science: method, explanation, theory, progress, space/time, causality, relation of science to philosophy.

- PHL 449 - Hist Moral and Political Phil

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Reading and interpretation of selected writings in the history of moral philosophy and/or political philosophy.

- PHL 450 - Contemp Moral/Political Theory

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Recent theories in ethics and their implications; recent work in political theory, emphasizing contemporary liberalism and its critics.

- PHL 455 - Phil of Society and Culture

  Credits: 3. Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A philosophical examination of cultural forces shaping modern society, forces such as science, technology, or domesticity.

- PHL 462 - Early Modern Philosophy

  Credits: 3. (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more of the major philosophers from the early modern period (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume).

- PHL 464 - Kant

  Credits: 3. Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Reading and interpretation of selected works.

- PHL 465 - Plato

  Credits: 3. Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.

- PHL 466 - Aristotle

  Credits: 3. Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.

- PHL 467 - 19th Century Continental Phil

  Credits: 3. (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 19th century continental philosophers (such as Hegel, Schopenhauer, Kierkegaard, Marx, Nietzsche).

- PHL 468 - 20th Century Continental Phil

  Credits: 3. (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 20th century continental philosophers (such as Heidegger, Husserl, Sartre, Merleau-Ponty, Ricoeur, Derrida) or several texts representing a major movement in 20th century continental thought (such as Phenomenology, Existentialism, Hermeneutics, Post-structuralism).

- PHL 490 - Research

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the background and objectives of the student. Course Attributes: Research & Creative Schlrshp

- PHL 491 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- PHL 492 - Independent Study

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.

- PHL 494 - Seminar

  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary.

- PHL 498 - Internship

  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- PHL 499 - Senior Seminar

  Credits: 3. (R-9) Offered spring. Prereq., senior standing and philosophy major or philosophy minor, or consent of instr. Research in problems in philosophy. Course Attributes: Writing Course-Advanced

- PHL 501 - Philosophy of Technology

  Credits: 3. (R-6) Offered once every two years. Reading and interpretation of selected writings that address central issues in the philosophy of technology. Level: Graduate

- PHL 502 - Topics in Value Theory

  Credits: 3. (R-6) Offered once every two years. Reading and interpretation of selected writings in value theory. Level: Graduate

- PHL 504 - Topics in Environ Philosophy

  Credits: 3. (R-9) Offered yearly. Same as ENST 504. Critical study/discussion of current (as well as benchmark) texts and issues in environmental ethics, environmental politics, and the philosophy of ecology. Interdisciplinary; open to interested students from all disciplines. Level: Graduate

- PHL 505 - Issues in the Anthropocene

  Credits: 3. (R-6) Offered once every two years. Reading and interpretation of selected writings in contemporary environmental philosophy. Level: Graduate

- PHL 507 - Philosophical Foundations of Ecology

Credits: 3. Offered once every two years. In this seminar we will look at some of the key papers in philosophy of ecology (and perhaps, more broadly, environmental philosophy). Some of the topics covered will be: whether nature can be thought to be in balance, the complexity-stability debate, the role and nature of models in ecology, whether there are laws of ecology, whether communities and ecosystems are "super-organisms" or simple aggregates, what biodiversity is and why we should care about it.

- PHL 510 - Phil Forum Colloquium
  Credits: 1. (R-3) Offered autumn and spring. Prereq., graduate standing. Discussion and further exploration of issues presented at the weekly Philosophy Forum. Level: Graduate
- PHL 590 - Research
  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the background and objectives of the student. Level: Graduate Course Attributes: Research & Creative Schlrshp
- PHL 591 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- PHL 592 - Independent Study
  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate
- PHL 593 - Professional Paper
  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Faculty-Led Study Abroad
- PHL 594 - Seminar
  Credits: 1 TO 9. (R-9) Offered intermittently. A review and discussion of current research. Topics vary. Level: Graduate
- PHL 598 - Internship
  Credits: 1 TO 12. (R-12) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. Level: Graduate Course Attributes: Internships/Practicums
- PHL 599 - Thesis
  Credits: 1 TO 6. (R-9) Offered every semester. Prereq., approval of a thesis proposal by the student's thesis committee. Level: Graduate

Philosophy B.A.

Bachelor of Arts - Philosophy

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 33

Required Cumulative GPA: 1.7

Philosophy Lower-Division Core

Rule: All courses are required.

Note: General Education fulfillment through the lower-division core: PHL 210E fulfills the "approved writing course" and "Ethics & Human Values."
Both PHL 261Y and PHL 262Y fulfill "American & European Perspectives".

	Course	Credits
	PHL 210E - Moral Philosophy Offered autumn and spring. Prereq., philosophy major or minor, or consent of instr. An examination of leading approaches to moral philosophy through a careful reading of classical texts in the Western tradition. A more thorough treatment of the material offered in PHL 110E. Intended primarily for philosophy majors and minors.	3 Credits
	PHL 233 - Intro to Logic: Deduction Offered autumn and spring. Understanding general principles of reasoning and the habits of clear and correct thinking. Emphasis on the analysis of the logical structure of claims in natural language and the skills of elementary deductive inference.	3 Credits
	PHL 261Y - History of Ancient Philosophy Offered autumn. Introduction to the central works of Plato and Aristotle, with an overview of Presocratic and Hellenistic philosophy.	3 Credits
	PHL 262Y - History of Modern Philosophy Offered spring. A survey of the history of philosophy from Descartes to Kant, which includes other continental rationalists and the British Empiricists.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Philosophy Upper-Division Core

Rule: Complete four courses (12 credits) with one course (3 credits) in each of the following four core areas.
Minimum Required Grade: C-
12 Total Credits Required

I. History

Rule: Complete one course (3 credits).

Note: Special Topics courses taught at the 400-level (PHL 491 [PHIL 495]) may count as upper-division core courses provided that they have a suitable content (consult the department advisor).

	Course	Credits
	PHL 462 - Early Modern Philosophy (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more of the major philosophers from the early modern period (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume).	3 Credits
	PHL 464 - Kant Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
	PHL 465 - Plato Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.	3 Credits

	PHL 466 - Aristotle Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

II. Value Theory

Rule: Complete one course (3 credits).

Note: Special Topics courses taught at the 400-level (PHL 491 [PHIL 495]) may count as upper-division core courses provided that they have a suitable content (consult the department advisor).

	Course	Credits
	PHL 412 - Ethics and Public Affairs Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of morally relevant issues in government, journalism, education and other social institutions. Issues considered may include just war theory, deception, confidentiality, conflict of interest, privacy, paternalism responsibilities in conflict with other institutions, and responsibilities across national boundaries, among others.	3 Credits
	PHL 422 - Environmental Philosophy Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Critical exploration of selected philosophical and literary texts pertinent to the ethics of human relationships with the natural environment.	3 Credits
	PHL 427 - Topics in Philosophy of Art (R-9) Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of philosophical problems related to particular arts and discussion of the nature of the arts. Topics considered may include music, visual arts, literature, and film.	1 To 4 Credits
	PHL 429 - Philosophy in Literature Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Philosophical thought in selected works of literature.	3 Credits
	PHL 449 - Hist Moral and Political Phil Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Reading and interpretation of selected writings in the history of moral philosophy and/or political philosophy.	3 Credits
	PHL 450 - Contemp Moral/Political Theory Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Recent theories in ethics and their implications; recent work in political theory, emphasizing contemporary liberalism and its critics.	3 Credits

	PHL 455 - Phil of Society and Culture Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A philosophical examination of cultural forces shaping modern society, forces such as science, technology, or domesticity.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

III. Continental Philosophy

Rule: Complete one course (3 credits).

Note: Special Topics courses taught at the 400-level (PHL 491 [PHIL 495]) may count as upper-division core courses provided that they have a suitable content (consult the department advisor).

	Course	Credits
	PHL 467 - 19th Century Continental Phil (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 19th century continental philosophers (such as Hegel, Schopenhauer, Kierkegaard, Marx, Nietzsche).	3 Credits
	PHL 468 - 20th Century Continental Phil (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 20th century continental philosophers (such as Heidegger, Husserl, Sartre, Merleau-Ponty, Ricoeur, Derrida) or several texts representing a major movement in 20th century continental thought (such as Phenomenology, Existentialism, Hermeneutics, Post-structuralism).	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

IV. Analytic Philosophy

Rule: Complete one course (3 credits).

Note: Special Topics courses taught at the 400-level (PHL 491 [PHIL 495]) may count as upper-division core courses provided that they have a suitable content (consult the department advisor).

	Course	Credits
	PHL 405 - 20th Century Analytic Phil (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Intensive study of the work of one or more philosophers (such as Frege, Russell, Wittgenstein) or historical introduction to the major issues and figures of 20th century philosophy in the analytic tradition (with readings from Frege, Russell, Wittgenstein, Quine and others).	3 Credits

	PHL 406 - Contemp Issues Analytic Phil (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Examination of contemporary issues in analytic philosophy focusing on one or more of the following topics: philosophy of language, epistemology, metaphysics, philosophy of mind.	3 Credits
	PHL 445 - Central Issues Phil of Science Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A consideration of philosophical issues relating to the nature of modern physical science: method, explanation, theory, progress, space/time, causality, relation of science to philosophy.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Required Upper-Division Electives in Philosophy

Rule: Students must complete two courses (6 credits).

Note: Any course taken for an Upper-Division Core area would not also apply to the Upper-Division Elective requirement.

	Course	Credits
	PHL 301 - Knowledge and Reality (R-9) Offered intermittently. Prereq., upper-division standing or consent of instr. Selected topics in one or more of the following areas: epistemology (the study of knowledge), philosophy of science, metaphysics. Intended primarily for non-majors.	3 Credits
	PHL 311 - The Good, Right, Beautiful (R-9) Offered intermittently. Prereq., upper-division standing or consent of instr. Selected topics in one or more of the following areas: ethics, philosophy of mind/action, aesthetics. Intended primarily for non-majors.	3 Credits
	PHL 316 - Historical Figures in Phil (R-9)Offered intermittently. Prereq., upper-division standing or consent of instr. Study of one or more historically significant philosophers. Intended primarily for non-majors.	3 Credits
	PHL 321E - Philosophy & Biomedical Ethics Offered intermittently. Prereq., upper-division standing or consent of instr. An examination of ethical problems raised by the practice of medicine and by recent developments in medically-related biological sciences.	3 Credits
	PHL 323 - Ethics of Climate Change This course examines some of the fundamental issues raised by global climate change and considers how environmental ethics might help to address these issues. Students will become acquainted with the essential elements of climate change science and be provided with an introduction to contemporary approaches to environmental ethics that have developed out of the primary ethical traditions of western thought: deontological (Kantian) ethics, utilitarian ethics, and virtue ethics. In addition, the course examines alternative understandings of the appropriate relationship between humans and the natural world including: “Deep Ecology” and Native American perspectives.	3 Credits

	PHL 351 - Philosophy and Feminism Offered intermittently. Prereq., upper-division standing or consent of instr. Study of what distinguishes feminist from traditional approaches to ethics. May also examine other relevant areas of philosophy, including epistemology, political theory, philosophy of science and environment.	3 Credits
	PHL 363H - Ancient Greek and Roman Phil Offered intermittently. Examination of the thought of the philosophers of Greece and Rome as expressed in original works read in English translation. Ancient philosophy studied within its historical, linguistic and cultural setting.	3 Credits
	PHL 370 - Philosophy of Religion Offered intermittently. Prereq., upper-division standing or consent of instr. An examination of one or more of the classic problems of Western philosophy of religion, such as the traditional arguments for and against the existence of God, the relationship of faith and reason, the status of religious experience, the problem of evil, and the problem of reconciling divine omniscience with human freedom.	3 Credits
	PHL 390 - Research (R-9) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the background and objectives of the student.	1 To 9 Credits
	PHL 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	PHL 392 - Independent Study (R-9) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	PHL 394 - Seminar (R-9) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary.	1 To 9 Credits
	PHL 398 - Internship (R-6) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
	PHL 405 - 20th Century Analytic Phil (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Intensive study of the work of one or more philosophers (such as Frege, Russell, Wittgenstein) or historical introduction to the major issues and figures of 20th century philosophy in the analytic tradition (with readings from Frege, Russell, Wittgenstein, Quine and others).	3 Credits
	PHL 406 - Contemp Issues Analytic Phil (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Examination of contemporary issues in analytic philosophy focusing on one or more of the following topics: philosophy of language, epistemology, metaphysics, philosophy of mind.	3 Credits

	PHL 412 - Ethics and Public Affairs Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of morally relevant issues in government, journalism, education and other social institutions. Issues considered may include just war theory, deception, confidentiality, conflict of interest, privacy, paternalism responsibilities in conflict with other institutions, and responsibilities across national boundaries, among others.	3 Credits
	PHL 422 - Environmental Philosophy Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Critical exploration of selected philosophical and literary texts pertinent to the ethics of human relationships with the natural environment.	3 Credits
	PHL 427 - Topics in Philosophy of Art (R-9) Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of philosophical problems related to particular arts and discussion of the nature of the arts. Topics considered may include music, visual arts, literature, and film.	1 To 4 Credits
	PHL 429 - Philosophy in Literature Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Philosophical thought in selected works of literature.	3 Credits
	PHL 445 - Central Issues Phil of Science Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A consideration of philosophical issues relating to the nature of modern physical science: method, explanation, theory, progress, space/time, causality, relation of science to philosophy.	3 Credits
	PHL 449 - Hist Moral and Political Phil Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Reading and interpretation of selected writings in the history of moral philosophy and/or political philosophy.	3 Credits
	PHL 450 - Contemp Moral/Political Theory Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Recent theories in ethics and their implications; recent work in political theory, emphasizing contemporary liberalism and its critics.	3 Credits
	PHL 455 - Phil of Society and Culture Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A philosophical examination of cultural forces shaping modern society, forces such as science, technology, or domesticity.	3 Credits
	PHL 462 - Early Modern Philosophy (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more of the major philosophers from the early modern period (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume).	3 Credits
	PHL 464 - Kant Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
	PHL 465 - Plato Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.	3 Credits

	PHL 466 - Aristotle Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
	PHL 467 - 19th Century Continental Phil (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 19th century continental philosophers (such as Hegel, Schopenhauer, Kierkegaard, Marx, Nietzsche).	3 Credits
	PHL 468 - 20th Century Continental Phil (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 20th century continental philosophers (such as Heidegger, Husserl, Sartre, Merleau-Ponty, Ricoeur, Derrida) or several texts representing a major movement in 20th century continental thought (such as Phenomenology, Existentialism, Hermeneutics, Post-structuralism).	3 Credits
	PHL 490 - Research (R-9) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the background and objectives of the student.	1 To 9 Credits
	PHL 491 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	PHL 492 - Independent Study (R-9) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	PHL 494 - Seminar (R-9) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary.	1 To 9 Credits
	PHL 498 - Internship (R-6) Offered intermittently. Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		6 Total Credits Required

Senior Seminar

Rule: Students must complete PHL 499 (PHIL 480). 3 credits.

Note: This capstone course is normally taken during the spring semester of senior year.

General Education fulfillment: PHL 499 fulfills the "Upper Division Writing Expectation for the major"

	Course	**Credits**

	PHL 499 - Senior Seminar (R-9) Offered spring. Prereq., senior standing and philosophy major or philosophy minor, or consent of instr. Research in problems in philosophy.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Modern and Classical Language Requirement

Note: Students who major in philosophy must demonstrate third semester proficiency in a foreign language either by completing three semesters of one foreign language, with grades of C- (1.67) or better, or by receiving an equivalent score on a competence exam. Recommended languages for philosophy are Ancient Greek, Latin, French, and German.

Philosophy Minor

Minor - Philosophy (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 18

Required Cumulative GPA: 2.0

Note: Students must complete a minimum of 18 credits in philosophy; at least 6 credits must be in courses numbered 300 and higher.

Lower Division Core

Rule: Must complete all of the following courses:

Note: General Education fulfillment through the lower-division core: PHL 210E fulfills the "approved writing course"
and "Ethics & Human Values." Both PHL 261Y and PHL 262Y fulfill "American & European Perspectives".

	Course	**Credits**
	PHL 210E - Moral Philosophy Offered autumn and spring. Prereq., philosophy major or minor, or consent of instr. An examination of leading approaches to moral philosophy through a careful reading of classical texts in the Western tradition. A more thorough treatment of the material offered in PHL 110E. Intended primarily for philosophy majors and minors.	3 Credits
	PHL 233 - Intro to Logic: Deduction Offered autumn and spring. Understanding general principles of reasoning and the habits of clear and correct thinking. Emphasis on the analysis of the logical structure of claims in natural language and the skills of elementary deductive inference.	3 Credits
	PHL 261Y - History of Ancient Philosophy Offered autumn. Introduction to the central works of Plato and Aristotle, with an overview of Presocratic and Hellenistic philosophy.	3 Credits

	PHL 262Y - History of Modern Philosophy Offered spring. A survey of the history of philosophy from Descartes to Kant, which includes other continental rationalists and the British Empiricists.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Core Area Requirement

Rule: Students must complete at least one course in two of the four core areas. Both must be upper division.

Note: Special Topics courses taught at the 400-level (PHL 491 [PHIL 495]) may count as upper-division core courses provided that they have a suitable content (consult the department advisor).

Minimum Required Grade: C-

6 Total Credits Required

History

	Course	Credits
	PHL 462 - Early Modern Philosophy (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more of the major philosophers from the early modern period (Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume).	3 Credits
	PHL 464 - Kant Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
	PHL 465 - Plato Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
	PHL 466 - Aristotle Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 261Y, or consent of instr. Reading and interpretation of selected works.	3 Credits
Minimum Required Grade: C-		

Value Theory

	Course	Credits
	PHL 412 - Ethics and Public Affairs Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of morally relevant issues in government, journalism, education and other social institutions. Issues considered may include just war theory, deception, confidentiality, conflict of interest, privacy, paternalism responsibilities in conflict with other institutions, and responsibilities across national boundaries, among others.	3 Credits

	PHL 422 - Environmental Philosophy Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Critical exploration of selected philosophical and literary texts pertinent to the ethics of human relationships with the natural environment.	3 Credits
	PHL 427 - Topics in Philosophy of Art (R-9) Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Examination of philosophical problems related to particular arts and discussion of the nature of the arts. Topics considered may include music, visual arts, literature, and film.	1 To 4 Credits
	PHL 429 - Philosophy in Literature Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Philosophical thought in selected works of literature.	3 Credits
	PHL 449 - Hist Moral and Political Phil Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Reading and interpretation of selected writings in the history of moral philosophy and/or political philosophy.	3 Credits
	PHL 450 - Contemp Moral/Political Theory Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. Recent theories in ethics and their implications; recent work in political theory, emphasizing contemporary liberalism and its critics.	3 Credits
	PHL 455 - Phil of Society and Culture Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A philosophical examination of cultural forces shaping modern society, forces such as science, technology, or domesticity.	3 Credits
Minimum Required Grade: C-		

Continental Philosophy

	Course	**Credits**
	PHL 467 - 19th Century Continental Phil (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 19th century continental philosophers (such as Hegel, Schopenhauer, Kierkegaard, Marx, Nietzsche).	3 Credits
	PHL 468 - 20th Century Continental Phil (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, and PHL 262Y, or consent of instr. Intensive study of the work of one or more 20th century continental philosophers (such as Heidegger, Husserl, Sartre, Merleau-Ponty, Ricoeur, Derrida) or several texts representing a major movement in 20th century continental thought (such as Phenomenology, Existentialism, Hermeneutics, Post-structuralism).	3 Credits
Minimum Required Grade: C-		

Analytic Philosophy

	Course	Credits
	PHL 405 - 20th Century Analytic Phil (R-9) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Intensive study of the work of one or more philosophers (such as Frege, Russell, Wittgenstein) or historical introduction to the major issues and figures of 20th century philosophy in the analytic tradition (with readings from Frege, Russell, Wittgenstein, Quine and others).	3 Credits
	PHL 406 - Contemp Issues Analytic Phil (R-6) Offered intermittently. Prereq., upper-division standing, PHL 210E, PHL 233, and PHL 262Y, or consent of instr. Examination of contemporary issues in analytic philosophy focusing on one or more of the following topics: philosophy of language, epistemology, metaphysics, philosophy of mind.	3 Credits
	PHL 445 - Central Issues Phil of Science Offered intermittently. Prereq., upper-division standing and PHL 210E, or consent of instr. A consideration of philosophical issues relating to the nature of modern physical science: method, explanation, theory, progress, space/time, causality, relation of science to philosophy.	3 Credits
Minimum Required Grade: C-		

Native American Studies

Theodore Van Alst, Chair

The Native American Studies Department at the University of Montana builds its curriculum on the foundation of three interrelated principles: sovereignty, indigeneity and community well-being. In so doing we pay close attention to the continuing role of traditional value systems, the impacts of colonization and the efforts toward decolonization within tribal communities. We define sovereignty broadly as one of the rights of all indigenous peoples, including both the political-legal foundations as provided in U.S. law and policy and self-determination more generally. Indigeneity underlies the unique holistic relationship that Native American communities have to the land and to the environment. In addition, our degree program not only intends to advance the well-being of our individual students, both native and non-native, but also to enhance the well-being of Indigenous communities across Montana, the United States and globally, by providing necessary and relevant education about those communities as well as the skills and knowledge for those working within those communities to do so effectively. Our curriculum and the foundations of faculty research are broadly cross-disciplinary with these principles at their base.

Native American Studies is an academic discipline committed to examining the contemporary and past experiences and life ways of the first Americans from their perspective. The curriculum is designed to provide a study of American Indians from a holistic and humanistic viewpoint by focusing upon their cultures, history, and contemporary life. Courses are designed for both Native American and non Native American students so they can better understand human similarities and differences, thereby leading to more effective work with and within tribal communities, through stronger knowledge bases of tribal America, and the development of better communications and cross-cultural relationships.

The Native American Studies major supports the objectives of a liberal arts education. It is interdisciplinary and provides a perspective that critically analyzes and evaluates the strengths and limitations of each contributing discipline.

Film

Back to Top

- FILM 860 - Native Americans & Cinema
  Credits: 3. Offered once each year. Same as NASX 360. Surveys the image of Native Americans in American film with an emphasis on revisionist, or breakthrough films. Ultimate focus will be on films featuring Native American writers, directors and actors.

Native American Studies

Back to Top

- NASX 105H - Intro Native Amer Studies
  Credits: 3. Offered Autumn and Spring. Survey course to acquaint the student with Native American Studies by a general overview of Indian history, culture, philosophy, religious beliefs and contemporary issues. Course Attributes: Hist & Cultural Studies (H) Cultural Intl Diversity (X)
- NASX 141 - Elementary Blackfoot I
  Credits: 5. Offered autumn. An introduction to the Blackfoot language and culture. Students will learn how to write and read Blackfoot as well as how to conduct simple conversations.
- NASX 142 - Elementary Blackfoot II
  Credits: 4. Offered intermittently spring. Continuation of 141. Course Attributes: Foreign Language Requirement
- NASX 180 - Event Planning
  Credits: 3. Offered spring semester. This course is intended for students to learn the skills necessary to put on a large event. The course is intended as a hands-on experiential learning course. The culmination of the course will be putting on the annual Kyi-Yo contest pow-wow, the first large regional pow-wow of the year on the circuit.
- NASX 191 - Special Topics
  Credits: 1 TO 9. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- NASX 192 - Independent Study
  Credits: 1 TO 6. (R-6) Prereq., consent of instr. Selected topics on American Indians under the direct supervision of a faculty member.
- NASX 198 - Internship
  Credits: 1 TO 6. (R-9)Offered by special arrangement. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- NASX 201X - Indian Cultr Exprssd Thru Lang

  Credits: 3. Offered Autumn. This course has been designed to introduce students to a non-Western perspective of the relationship that exists between Indian cultures and their languages. Students will be exposed to various languages of American Indian peoples, and how through Native languages insight can be gained into history, traditions, and cultural life-ways of Indian peoples. Course Attributes: Cultural Intl Diversity (X)

- NASX 210X - Native Amer Sports & Games

  Credits: 3. Offered Autumn or Spring. Explores Native American sports and games, both traditional and modern. Through classroom learning and actual play, students gain an understanding of how play and competition have been vital to Native communities. Course Attributes: Cultural Intl Diversity (X)

- NASX 231X - Indig World View Perspectives

  Credits: 3. Offered Spring. Same as ANTY 231X. Examination of Indigenous belief systems, with regard to world views, religious ceremonies, cultural ways and the impact that Anglo-European culture has had upon these systems. Focus on Indigenous peoples of Australia, New Zealand, Canada and the United States Course Attributes: Cultural Intl Diversity (X)

- NASX 235X - Oral/Written Trads Native Amer

  Credits: 3. Offered Autumn and Spring. Analysis of the oral traditions of Native Americans including an introduction to the literary works of early leading American Indian writers. Course Attributes: Lit & Artistic Studies (L) Writing Course-Intermediate Cultural Intl Diversity (X)

- NASX 239X - Nat North Amer History & Art

  Credits: 3. Focus on Native North American history through art and material culture and its relationship to American Indian tribally specific aesthetics, cosmologies, worldviews and life-ways, historic uses and the contemporary Indian artistic experience. Course Attributes: Lit & Artistic Studies (L) Cultural Intl Diversity (X)

- NASX 260X - Indig Community Developmnt

  Credits: 3. Offered intermittently. This course introduces the student to concepts in indigenous/rural sustainable community development in the countries of North America in broad historical and cultural frameworks. Course Attributes: Cultural Intl Diversity (X)

- NASX 280 - NA Studies Rsrch Theors/Mthds

  Credits: 3. Offered Autumn. Prereq., NAS major or minor. Introduction to the Research materials pertaining to the study of American Indian peoples and cultures. Emphasis on current research trends and writing. Course Attributes: Writing Course-Intermediate

- NASX 291 - Special Topics

  Credits: 1 TO 6. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- NASX 292 - Independent Study

  Credits: 1 TO 6. (R 6) Experimental offerings of visiting professors, experimental offerings of new courses or one time offerings of current topics.

- NASX 303E - Ecol Persp in Nat Amer Trad

  Credits: 3. Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources. Course Attributes: Ethical & Human Values Course Cultural Intl Diversity (X)

- NASX 304E - Native American Beliefs/Philos

  Credits: 3. Offered Autumn and Spring. A study of selected ethical systems; origins, world views; religious beliefs and the way they have been affected by western civilization. Course Attributes: Ethical & Human Values Course Cultural Intl Diversity (X)

- NASX 306X - Contemp Global Iss Indg People

  Credits: 3. Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities. Course Attributes: Cultural Intl Diversity (X)

- NASX 340 - Native American Lit

  Credits: 3. Offered Autumn. Prereq., three credits of lower-division LIT courses and NASX 105H or 235X. Same as LIT 305. Selected readings from Native American Literature and

criticism with emphasis on the literatures after the Native American literary Renaissance. A minimum of three genres covered and three culture areas.

- NASX 351 - Traditional Eco Knowledge

  Credits: 3. ?Offered summer. This course is one unit of the four unit (12 credit) summer semester program: "Wild Rockies Summer Semester." Description: This course will explore the traditional ecological perspectives of the Salish, Kootenai, Blackfeet and Tlingit people, as well as how these perspectives relate to Western concepts of ecology. Through field-based activities, lectures by tribal elders, and personal exploration, students will come to a heightened understanding of the still vital cultural perspectives and practices of modern American Indians, particularly in the Rockies of Montana and Canada.

- NASX 352 - Montana's Indians/Land

  Credits: 3. Offered autumn. This course is one unit of the four unit (12 credit) fall semester program: "Montana Afoot & Afloat: Human/Land Relations." Description: This course gives students a greater understanding of Indian people's traditional relationships with the land in Montana, and an understanding of how and why those relationships may have changed. Extensive time will be spent on the Fort Belknap, Northern Cheyenne and Crow Reservations where the class will meet with tribal elders and learning will have an emphasis on environmental and tribal/land relationships.

- NASX 354X - Indians of MT since Rsrvtn Era

  Credits: 3. Offered Autumn. Same as HSTA 354. Examination of the history of Montana Indians since the establishment of the reservations, contemporary conditions, and issues among both reservation and non-reservation Indian communities in the state. Special attention given to social and economic conditions, treaty rights, tribal sovereignty, and legal issues. Course Attributes: Cultural Intl Diversity (X)

- NASX 360 - Native Amer and Cinema

  Credits: 3. Offered Autumn or Spring. Same as ENFM 344. Surveys the image of Native Americans in American film with an emphasis on "revisionist," or "breakthrough" films. Ultimate focus will be on films featuring Native American writers, directors and actors.

- NASX 391 - Special Topics

  Credits: 1 TO 6. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- NASX 394 - Workshop/Seminar

  Credits: 1 TO 6. (R-6) Offered intermittently. Variable topics addressing Indian law, policy and culture by visiting scholars.

- NASX 398 - Internship

  Credits: 1 TO 6. (R-6) Offered by special arrangement. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- NASX 403 - Contmp Tribal Resource Issues

  Credits: 3. Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.

- NASX 405H - Gndr Iss in Native Amer Stdies

  Credits: 3. Offered intermittently. Same as WS 342H. Focus on American Indian gender relations and their cultural continuity and historical evolution. National in scope with concentration on certain tribes. Group analysis of contemporary gender issues relevant to Native American peoples. Course Attributes: Hist & Cultural Studies (H)

- NASX 464 - Hist Amer Indian Affrs to 1776

  Credits: 3. Offered Autumn. Same as HIST 464. A study of American Indian relations with Europeans and the United States from first contact to 1776.

- NASX 465 - Hist Amer Indian Affrs 10 Cent

  Credits: 3. Offered Spring. Same as HIST 465. A study of tribal encounters and adjustments to the American nations in the nineteenth century.

- NASX 466 - Hist of Indian Affrs from 1890

Credits: 3. Offered Autumn. Same as HIST 466. A study of tribal encounters and adjustments to the American nation from 1890.

- NASX 475 - Tribal Sovereignty
  Credits: 3. Offered Spring. An examination of the evolution of tribal governments from a historical and political perspective. Particular attention is devoted to the issues of tribal sovereignty and tribal-state conflicts.
- NASX 488 - Stds in Native Amer Autobio
  Credits: 3. Offered intermittently. Same as LIT 429. Prereq., LIT 300 or LIT 305/NASX 340, or consent of instr. Study of texts that present a first-person story of Native American individual's life within historical and cultural contexts, with discussion of theories of autobiography.
- NASX 491 - Special Topics
  Credits: 1 TO 6. (R-6) Prereq., upper-division standing and consent of instr. Selected topics on American Indians under the direct supervision of a faculty member.
- NASX 492 - Independent Study
  Credits: 1 TO 6. (R-9) Offered by special arrangement. Experimental offerings of visiting professors, experimental offerings of new courses or one-time offerings of current topics.
- NASX 494 - Seminar/Workshop
  Credits: 3. (R-6) Offered Spring. Prereq., NAS major or minor, 18 credits in NAS, and junior standing or higher. Senior reading capstone course for the review of past and current literature on and by American Indians. Course Attributes: Writing Course-Advanced
- NASX 499 - Senior Capstone/Thesis
  Credits: 3 TO 9. (R-9) Offered by special arrangement. Prereq., NAS major or minor, 18 credits in NAS, junior standing, and consent of instr. Independent research project in Native American Studies, supervised by a faculty member, and leading to completion of baccalaureate degree.
- NASX 594 - Sem Native American Stds
  Credits: 1 TO 3. (R-6) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary. Level: Graduate
- NASX 595 - Special Topics
  Credits: 1 TO 9. (R-9) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- NASX 596 - Independent Study
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., graduate standing and consent of instr. Study of selected topics or problems on American Indians under the direct supervision of a faculty member. Level: Graduate Course Attributes: Independent Study
- NASX 598 - Internship
  Credits: 1 TO 6. (R-6) Offered intermittently. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate Course Attributes: Internships/Practicums

Native American Studies B.A.

Bachelor of Arts - Native American Studies

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 39

Required Cumulative GPA: 2.5

Lower Division Core Courses

Rule: Must complete all of the following courses:

	Course	Credits
	NASX 105H - Intro Native Amer Studies Offered Autumn and Spring. Survey course to acquaint the student with Native American Studies by a general overview of Indian history, culture, philosophy, religious beliefs and contemporary issues.	3 Credits
	NASX 201X - Indian Cultr Exprssd Thru Lang Offered Autumn. This course has been designed to introduce students to a non-Western perspective of the relationship that exists between Indian cultures and their languages. Students will be exposed to various languages of American Indian peoples, and how through Native languages insight can be gained into history, traditions, and cultural life-ways of Indian peoples.	3 Credits
	NASX 235X - Oral/Written Trads Native Amer Offered Autumn and Spring. Analysis of the oral traditions of Native Americans including an introduction to the literary works of early leading American Indian writers.	3 Credits
	NASX 280 - NA Studies Rsrch Theors/Mthds Offered Autumn. Prereq., NAS major or minor. Introduction to the Research materials pertaining to the study of American Indian peoples and cultures. Emphasis on current research trends and writing.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Core Courses

Rule: Must complete the following subcategories

18 Total Credits Required

Fundamentals

Rule: Must complete all of the following courses

	Course	Credits
	NASX 303E - Ecol Persp in Nat Amer Trad Offered Autumn and Spring. An examination of Native American environmental ethics and tribal and historical and contemporary use of physical environmental resources.	3 Credits
	NASX 304E - Native American Beliefs/Philos Offered Autumn and Spring. A study of selected ethical systems; origins, world views; religious beliefs and the way they have been affected by western civilization.	3 Credits

	NASX 494 - Seminar/Workshop (R-6) Offered Spring. Prereq., NAS major or minor, 18 credits in NAS, and junior standing or higher. Senior reading capstone course for the review of past and current literature on and by American Indians.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Indigenous

Rule: Must complete 1 of the following courses

	Course	Credits
	NASX 260X - Indig Community Developmnt Offered intermittently. This course introduces the student to concepts in indigenous/rural sustainable community development in the countries of North America in broad historical and cultural frameworks.	3 Credits
	NASX 306X - Contemp Global Iss Indg People Offered Autumn. An examination of the major issues that affect the contemporary experiences of Indigenous Peoples of the Americas, and other global communities.	3 Credits
	NASX 475 - Tribal Sovereignty Offered Spring. An examination of the evolution of tribal governments from a historical and political perspective. Particular attention is devoted to the issues of tribal sovereignty and tribal-state conflicts.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

History

Rule: Must complete 2 of the following courses

	Course	Credits
	NASX 464 - Hist Amer Indian Affrs to 1776 Offered Autumn. Same as HIST 464. A study of American Indian relations with Europeans and the United States from first contact to 1776.	3 Credits
	NASX 465 - Hist Amer Indian Affrs 10 Cent Offered Spring. Same as HIST 465. A study of tribal encounters and adjustments to the American nations in the nineteenth century.	3 Credits
	NASX 466 - Hist of Indian Affrs from 1890 Offered Autumn. Same as HIST 466. A study of tribal encounters and adjustments to the American nation from 1890.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Elective Courses

Rule: Must complete 9 credits from the following courses:

	Course	Credits
	AAS 260 - African Amer & Native Amer Offered Fall, even years. A study of the broad scope of relations between African Americans and Native Americans in colonial and United States history. Topics explored through history, sociology, and cultural anthropology.	3 Credits
	ANTY 122S - Race and Minorities Offered autumn. Analysis of the development and concept of race as a social category and the processes of cultural change within and between ethnic groups.	3 Credits
	ANTY 323X - Native Peoples of Montana Offered spring. The history and culture of the Indian tribes in Montana.	3 Credits
	ANTY 330X - Peoples and Cultures of World (R-9) Offered autumn and spring. Study of the peoples of various geographic regions and their cultures.	3 Credits
	HSTA 455 - Indian, Bison, & Horse (AM) Offered autumn odd-numbered years. Historical interaction between Native American societies, horses and bison in North America. A writing intensive course. Upper division writing course for the history major.	3 Credits
	HSTR 367 - 19th Cent Amer West (AM) Euro-American movement and conflict in the nineteenth century trans-Mississippi west.	3 Credits
	HSTR 369 - 20th Cent Amer West (AM) The contemporary trans-Mississippi West.	3 Credits
	NASX 141 - Elementary Blackfoot I Offered autumn. An introduction to the Blackfoot language and culture. Students will learn how to write and read Blackfoot as well as how to conduct simple conversations.	4 Credits
	NASX 142 - Elementary Blackfoot II Offered intermittently spring. Continuation of 141.	4 Credits
	NASX 180 - Event Planning Offered spring semester. This course is intended for students to learn the skills necessary to put on a large event. The course is intended as a hands-on experiential learning course. The culmination of the course will be putting on the annual Kyi-Yo contest pow-wow, the first large regional pow-wow of the year on the circuit.	3 Credits
	NASX 191 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits

	NASX 198 - Internship (R-9)Offered by special arrangement. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
	NASX 210X - Native Amer Sports & Games Offered Autumn or Spring. Explores Native American sports and games, both traditional and modern. Through classroom learning and actual play, students gain an understanding of how play and competition have been vital to Native communities.	3 Credits
	NASX 231X - Indig World View Perspectives Offered Spring. Same as ANTY 231X. Examination of Indigenous belief systems, with regard to world views, religious ceremonies, cultural ways and the impact that Anglo-European culture has had upon these systems. Focus on Indigenous peoples of Australia, New Zealand, Canada and the United States	3 Credits
	NASX 291 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	NASX 340 - Native American Lit Offered Autumn. Prereq., three credits of lower-division LIT courses and NASX 105H or 235X. Same as LIT 305. Selected readings from Native American Literature and criticism with emphasis on the literatures after the Native American literary Renaissance. A minimum of three genres covered and three culture areas.	3 Credits
	NASX 354X - Indians of MT since Rsrvtn Era Offered Autumn. Same as HSTA 354. Examination of the history of Montana Indians since the establishment of the reservations, contemporary conditions, and issues among both reservation and non-reservation Indian communities in the state. Special attention given to social and economic conditions, treaty rights, tribal sovereignty, and legal issues.	3 Credits
	NASX 360 - Native Amer and Cinema Offered Autumn or Spring. Same as ENFM 344. Surveys the image of Native Americans in American film with an emphasis on "revisionist," or "breakthrough" films. Ultimate focus will be on films featuring Native American writers, directors and actors.	3 Credits
	NASX 388 - Native Amer Health & Healing Offered alternate years. Examination of traditional and contemporary uses of medicine in Native American societies. Issues covered will include current health conditions of American Indians, and the relationship from a cultural perspective on health, healing and medicine.	3 Credits
	NASX 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits

	NASX 394 - Workshop/Seminar (R-6) Offered intermittently. Variable topics addressing Indian law, policy and culture by visiting scholars.	1 To 6 Credits
	NASX 403 - Contmp Tribal Resource Issues Offered intermittently. Acquaints students with contemporary tribal resource management and environmental policies.	3 Credits
	NASX 405H - Gndr Iss in Native Amer Stdies Offered intermittently. Same as WS 342H. Focus on American Indian gender relations and their cultural continuity and historical evolution. National in scope with concentration on certain tribes. Group analysis of contemporary gender issues relevant to Native American peoples.	3 Credits
	NASX 488 - Stds in Native Amer Autobio Offered intermittently. Same as LIT 429. Prereq., LIT 300 or LIT 305/NASX 340, or consent of instr. Study of texts that present a first-person story of Native American individual's life within historical and cultural contexts, with discussion of theories of autobiography.	3 Credits
	NASX 491 - Independent Study (R-6) Prereq., upper-division standing and consent of instr. Selected topics on American Indians under the direct supervision of a faculty member.	1 To 6 Credits
	NASX 499 - Senior Capstone/Thesis (R-9) Offered by special arrangement. Prereq., NAS major or minor, 18 credits in NAS, junior standing, and consent of instr. Independent research project in Native American Studies, supervised by a faculty member, and leading to completion of baccalaureate degree.	3 To 9 Credits
	PHAR 320 - Am Ind Health Issues Offered spring. An overview of the health issues, health care delivery, health disparities, and social determinants of health that impact American Indians. Also, provides an overview in careers in health and cultural awareness for students.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Language Rejuvenation and Maintenance Certificate

Certificate of Art - Language Rejuvenation & Maint

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 18
Required Cumulative GPA: 2.0

Core Courses

Rule: All courses are required

	Course	Credits
	ANTY 476 - Methods for Native Languages (R-6) Offered Spring. In an effort to highlight promising methodologies that will advance the success of Native language acquisition and instruction, students will be exposed to an innovative methodology while being instructed in an Indigenous language.	3 Credits
	CSD 210 - Speech & Lang Devel Offered autumn. Sophomore standing or greater. Topics include typical speech and language development, phonology, semantic, morphological, syntax, and pragmatics, along with individual differences, second language acquisition and literacy.	3 Credits
	NASX 201X - Indian Cultr Exprssd Thru Lang Offered Autumn. This course has been designed to introduce students to a non-Western perspective of the relationship that exists between Indian cultures and their languages. Students will be exposed to various languages of American Indian peoples, and how through Native languages insight can be gained into history, traditions, and cultural life-ways of Indian peoples.	3 Credits

Military Science

Reserve Officers Training Corps, Chad Carlson, Chair

Army ROTC (Reserve Officers' Training Corps) offers college students the opportunity to serve as commissioned officers in the U.S. Army, the Army National Guard, or the U.S. Army Reserve upon graduation. ROTC enhances a student's education by providing unique leadership and management training along with practical leadership experience. Students develop many of the qualities basic to success while earning a college degree and an officer's commission at the same time.

The Margin of Difference. Army ROTC cadets learn to be leaders and receive hands-on experience in managing physical, financial, and human resources. They develop self-confidence and superior decision-making skills. Employers value these leadership qualities and recognize the associated potential in ROTC graduates.

Four–Year Program. The four–year Army ROTC program consists of two parts: the Basic Course and the Advanced Course.

Basic Course. The basic course is normally taken during the first two years of college and may be taken without incurring any military obligation. This course covers such subjects as management principles, national defense, military history, and leadership development. Basic course classes include adventure training such as squad tactics and small arms marksmanship. Additional opportunities are also available to conduct small unit training exercises throughout Western Montana. In addition, a variety of outside social and professional enrichment activities are available. All necessary ROTC textbooks, uniforms, and other essential materials for the basic course are furnished to students at no cost. After completing the basic course, students who have demonstrated the potential to become officers and who have met the physical and scholastic standards are eligible to enroll in the Advanced Course. Compression of the Basic Course into two semesters may be arranged for those students who did not take military science courses during their Freshman year.

Advanced Course. The Advanced Course is usually taken during the final two years of college. Instruction includes organization and management, tactics, ethics, critical thinking, creative problem solving and further leadership development. Uniforms and equipment in the Advanced Course are furnished to students at no cost. During the summer between their junior and senior years of college, Advanced Course cadets attend Cadet Summer Training (CST), a fully paid four–week leadership practicum. LDAC gives cadets the chance to apply what they have learned in the classroom and introduces them to Army life while also receiving academic credit. Completion of the Advanced Course requires two years of study. Each cadet in the Advanced Course receives a subsistence allowance of up to $4,500 for each year of attendance.

Two–Year Program. The two–year program applies to incoming juniors and community college graduates, students at four–year colleges who did not take ROTC during their first two years of school, and students entering a two–year postgraduate course of study. To enter the two–year program, students must attend a fully paid four–week Leader's Training Course (LTC), normally held during the summer between their sophomore and junior years of college. At LTC, students learn to challenge themselves physically and mentally, and to build their confidence and leadership skills. After successfully completing LTC, students who meet all the necessary enrollment requirements may participate in the Advanced Course.

Scholarships and Financial Assistance. Army ROTC scholarships are offered for four, three and two years and are awarded on a competitive basis. Each scholarship pays 100% of student's tuition and fees, $1200 a year for textbooks and supplies, and a monthly stipend totaling up to $4,500 per year while the scholarship is in effect. Four-year scholarships are awarded to students who will be entering college as freshmen. Two and three–year scholarships are awarded to students already enrolled in college and to Army enlisted personnel on active duty. Additionally, students who attend LTC (see two–year program) may compete for two–year scholarships while at the course. Scholarship recipients can pursue degrees in any accredited four year program at the University of Montana. Students who receive scholarships are required to attain undergraduate degrees in the fields in which their scholarships were awarded.

Veterans. Veterans may apply their military experience as credit toward the ROTC Basic Course. If eligible, a veteran may enroll directly into the Advanced Course.

Simultaneous Membership Program. This program allows students to be members of the Army National Guard or the Army Reserve and to enroll in Army ROTC at the same time. Students participating in the Simultaneous Membership Program receive up to $4,000 per year in tuition assistance, $4,500 per year in monthly stipends and an additional $20,000 per year in other benefits. There are also scholarships available for students participating in the Simultaneous Membership Program that are interested in staying in the Army National Guard or the Army Reserve upon graduation that pay up to $8,500 per year for living expenses and $1,200 per year for textbooks, supplies and other equipment. These scholarships are in addition to many of the current benefits students receive as part of the Simultaneous Membership Program.

Service Obligation. There is no military service obligation for basic course students, unless on scholarship. Advanced course and scholarship (contracted) students incur an obligation to serve in the active Army, Army Reserve or National Guard.

Commission Requirements. In order to earn a commission as a Second Lieutenant in the United States Army, each student must:

1. Complete all required Military Science instruction while attending college as a full-time student, and obtain a baccalaureate or higher degree.
2. Complete a PMS approved US History course.
3. Meet medical and physical fitness standards.
4. Be a U.S. citizen.
5. Successfully complete Cadet Summer Training.
6. Be recommended by the Professor of Military Science.

Military Science Leadership

Back to Top

- MSL 101 - Leadership and Personal Dev

  Credits: 3. Offered autumn. The Constitutional role of the military, military tradition, current defense posture, service roles and missions. An introduction to issues and competencies that are central to a commissioned officer's responsibilities. Establishes framework for understanding officership, leadership and army values. Course Attributes: ROTC Course

- MSL 102 - Intro to Tactical Leadership

  Credits: 3. Offered spring. Establishes foundation of basic leadership fundamentals such as problem–solving, communications, goal setting and improving listening techniques. Introduction to the principles of military leadership and organizational values through discussion, observation and practice exercises. Course Attributes: ROTC Course

- MSL 106 - Army Physical Fitness

  Credits: 1. (R–4) Offered autumn and spring. The study and application of military drill and ceremony: formation, ceremonies, and marching; the study of the fundamentals of the military physical conditioning program, and the practical application of skills learned. Physical education

activity course; a maximum of four credits of activity courses may be counted toward graduation. Course Attributes: ROTC Course

- MSL 195 - Special Topics

  Credits: 1 TO 6. (R–6) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics. Course Attributes: ROTC Course

- MSL 201 - Innovative Team Leadership

  Credits: 3. Offered autumn. Demonstration and practice of individual military leadership skills with emphasis on communication and observation through experiential learning exercises. Establishes framework for understanding of "life skills" such as physical fitness and time management. Examination and practical application of tasks training and military style briefings. Course Attributes: ROTC Course

- MSL 202 - Found of Tactical Leadership

  Credits: 3. Offered spring. Building successful teams through influencing actions and effective communication in setting and achieving goals. Use of creativity in the problem solving process. Introduction of individual and team aspects of military tactics in small unit operations. Practical exercises in techniques for training others as an aspect of continued leadership development. Course Attributes: ROTC Course

- MSL 203 - Ranger Challenge

  Credits: 2. (R–4) Offered autumn. Practical hands–on training in one rope bridge, land navigation, military weapons assembly/disassembly and physical conditioning. A team selected from this class will represent the University in competition against four other colleges and universities within the Big Sky Task Force. Students may include up to, but not more than, four credits earned in the HHP 100–179 and DANC 325 activity courses and MSL 203 and 315 in the total number of credits required for graduation. Students must be physically qualified and enrolled in an additional MSL academic class. Course Attributes: ROTC Course

- MSL 204 - Leader's Training Course

  Credits: 3. (R–4) Offered autumn and spring. Prereq., consent of instr. Intensive supervised study in applied leadership and management development in an organizational setting. Course Attributes: ROTC Course

- MSL 291 - Special Topics

  Credits: 1 TO 6. (R–6) Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- MSL 295 - Special Topics

  Credits: 1 TO 6. (R–6) Offered spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics. Course Attributes: ROTC Course

- MSL 296 - Leadership Practicum

  Credits: 1 TO 4. (R–4) Offered autumn and spring. Prereq., consent of instr. Intensive supervised study in applied leadership and management development in an organizational setting. Course Attributes: Service Learning/Volunteer ROTC Course

- MSL 301 - Adaptive Team Leadership

  Credits: 3. Offered autumn. Prereq., consent of instr. Coreq., MSL 303. Developing personal leadership principles through the learning and application of various small unit leadership procedures. Fundamentals of leadership development, land navigation, troop leading, small units tactics, rappelling, rifle marksmanship and physical fitness. Study of the organization and operation of the U.S. Army as a profession. Students are required to attend one weekend field exercise during the semester. Restricted to contracted Military Science students. Course Attributes: ROTC Course

- MSL 302 - Applied Team Leadership

  Credits: 3. Offered spring. Prereq., consent of instr. Coreq., MSL 303. Continuation of the study and application of small unit leadership tasks. Advanced leadership skills taught including medical evacuation procedures, radio procedures, and increased involvement in planning and executing military operations in preparation for attendance at the Leader Development and Assessment Course at Fort Lewis, Washington. Students participate in rifle marksmanship instruction including qualification with the M16A2 rifle, rappelling, and attend one weekend exercise with students

from regional universities in the area and the Montana Army National Guard. Restricted to contracted Military Science students. Course Attributes: ROTC Course

- MSL 303 - Leadership Laboratory
  Credits: 1. (R–4) Offered autumn and spring. Prereq., consent of instr. Coreq., MSL 301, 302, 401, or 402. Practical application of skills learned in the classroom. Course Attributes: ROTC Course
- MSL 305 - Leadership Development and Assessment Course
  Credits: 3. Offered every term. Prereq., consent of instr. Required study and internship in military tactics, leadership and organizational behavior. Supervised by active duty military officers. Participants attend course of study at Fort Knox, KY for four weeks of intense evaluation and training to assess their ability to serve as a 2nd LT in the US Army, US Army Reserves, or the National Guard.
- MSL 391 - Special Topics
  Credits: 1 TO 9. (R–9) Offered autumn and spring. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics. Course Attributes: ROTC Course
- MSL 401 - Adaptive Leadership
  Credits: 3. Offered autumn. Prereq., consent of instr.; coreq., MSL 303. The application of leadership principles and techniques involved in leading young men and women in today's Army. Students explore training management. methods of effective staff collaboration and developmental counseling techniques. Develops student proficiency in planning and executing complex operations, functioning as a member of a staff and mentoring subordinates. Restricted to contracted Military Science students. Course Attributes: ROTC Course
- MSL 402 - Leadership in a Complex World
  Credits: 3. Offered spring. Prereq., consent of instr., coreq., MSL 303. Study includes case study of military law and practical exercises on establishing an ethical command climate. Examines the role communications, values and ethics play in effective leadership. Students complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze and demonstrate their leadership skills. Restricted to contracted Military Science students. Course Attributes: ROTC Course
- MSL 492 - Coop Education/Internship
  Credits: 1 TO 4. (R–4) Offered every term. Prereq., consent of instr. Required study and internship in military tactics, leadership and organizational behavior. Supervised by active duty military officers. Course Attributes: ROTC Course

Military Studies Minor

Minor - Military Studies (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 33

Required Cumulative GPA: 2.5

Note: A total of 24 credits of MSL (Military Science Leadership) courses are allowed toward the bachelor degree for contracted students. A total of 12 credits are allowed toward the bachelor degree for non-contracted students. Obtain a grade of "C" or better in all courses used toward the minor, and a cumulative GPA of 2.5 for Military Science courses.

Lower Core Courses

Rule: Must complete all of the following:

Note: The department may waive the Basic Course requirements for following situation courses: prior military service, Advanced Individual Training (AIT), Leader's Training Course (LTC) or Accelerated Cadet Commissioning Training (ACCT).

	Course	Credits
	MSL 101 - Leadership and Personal Dev Offered autumn. The Constitutional role of the military, military tradition, current defense posture, service roles and missions. An introduction to issues and competencies that are central to a commissioned officer's responsibilities. Establishes framework for understanding officership, leadership and army values.	3 Credits
	MSL 102 - Intro to Tactical Leadership Offered spring. Establishes foundation of basic leadership fundamentals such as problem–solving, communications, goal setting and improving listening techniques. Introduction to the principles of military leadership and organizational values through discussion, observation and practice exercises.	3 Credits
	MSL 201 - Innovative Team Leadership Offered autumn. Demonstration and practice of individual military leadership skills with emphasis on communication and observation through experiential learning exercises. Establishes framework for understanding of "life skills" such as physical fitness and time management. Examination and practical application of tasks training and military style briefings.	3 Credits
	MSL 202 - Found of Tactical Leadership Offered spring. Building successful teams through influencing actions and effective communication in setting and achieving goals. Use of creativity in the problem solving process. Introduction of individual and team aspects of military tactics in small unit operations. Practical exercises in techniques for training others as an aspect of continued leadership development.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

Upper Core Courses

Rule: Must complete all of the following:

	Course	Credits
	MSL 301 - Adaptive Team Leadership Offered autumn. Prereq., consent of instr. Coreq., MSL 303. Developing personal leadership principles through the learning and application of various small unit leadership procedures. Fundamentals of leadership development, land navigation, troop leading, small units tactics, rappelling, rifle marksmanship and physical fitness. Study of the organization and operation of the U.S. Army as a profession. Students are required to attend one weekend field exercise during the semester. Restricted to contracted Military Science students.	3 Credits

	MSL 302 - Applied Team Leadership Offered spring. Prereq., consent of instr. Coreq., MSL 303. Continuation of the study and application of small unit leadership tasks. Advanced leadership skills taught including medical evacuation procedures, radio procedures, and increased involvement in planning and executing military operations in preparation for attendance at the Leader Development and Assessment Course at Fort Lewis, Washington. Students participate in rifle marksmanship instruction including qualification with the M16A2 rifle, rappelling, and attend one weekend exercise with students from regional universities in the area and the Montana Army National Guard. Restricted to contracted Military Science students.	3 Credits
	MSL 401 - Adaptive Leadership Offered autumn. Prereq., consent of instr.; coreq., MSL 303. The application of leadership principles and techniques involved in leading young men and women in today's Army. Students explore training management. methods of effective staff collaboration and developmental counseling techniques. Develops student proficiency in planning and executing complex operations, functioning as a member of a staff and mentoring subordinates. Restricted to contracted Military Science students.	3 Credits
	MSL 402 - Officership and Ethics Offered spring. Prereq., consent of instr., coreq., MSL 303. Study includes case study of military law and practical exercises on establishing an ethical command climate. Examines the role communications, values and ethics play in effective leadership. Students complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze and demonstrate their leadership skills. Restricted to contracted Military Science students.	3 Credits
Minimum Required Grade: C		12 Total Credits Required

War History Requirement

Rule: Must complete 1 of the following

	Course	Credits
	HSTA 316 - American Civil War Era (AM) Civil War and Reconstruction; the triumph of the industrialist and capitalist ethic.	3 Credits
	HSTA 333 - Key Events in American Militar (R-6) (AM) The French and Indian Wars to Vietnam and beyond; chronological and topical accounts.	3 Credits
Minimum Required Grade: C		3 Total Credits Required

History/Political Science Requirement

Rule: Must complete six credits from the following:

Note: Students must complete at least 3 credits from each discipline with at least 3 credits of upper division coursework in addition to the required history course. Student can also take HSTR 301-Political Ancient Greek Social History or HSTR 304- Ancient Rome to satisfy the History requirement.

	Course	Credits
	HSTA 316 - American Civil War Era (AM) Civil War and Reconstruction; the triumph of the industrialist and capitalist ethic.	3 Credits
	HSTA 333 - Key Events in American Militar (R-6) (AM) The French and Indian Wars to Vietnam and beyond; chronological and topical accounts.	3 Credits
	HSTR 272E - Terrorism:Viol Mod Wrld (WRLD) The rise and spread of terrorism in the modern world, from the French Revolution to the present.	3 Credits
	HSTR 374 - War, Peace, & Society (WRLD) A thematic and interdisciplinary approach to warfare and peace, sociopolitical structures and military organization, power among states, technological change, the role of the individual in organized violence, and moral views of war and peace.	3 Credits
	PSCI 230X - Intro to International Rel Offered every term. Not open to senior level political science majors except with consent of instr. Review of the evolution of the nation-state system and survey of contemporary international actors, issues and forces for stability and change.	3 Credits
	PSCI 335 - American Foreign Policy Prereq., PSCI 230X and junior standing or consent of instr. American diplomatic, economic and defense policies since World War II and their significance in international politics.	3 Credits
Minimum Required Grade: C		6 Total Credits Required

Central and Southwest Asian Studies

Dr. Ardi Kia, Advisor

The University of Montana has emerged as a national and international leader in recognizing the significance of Central and Southwest Asia, and translating that awareness into a major academic program. The program builds on significant faculty experience and expertise in the region, and includes scholars from a variety of academic disciplines. The program has also organized intensive summer language training programs at UM, as well as summer study tours for K-12 teachers to Central Asia, and also hosts an annual conference that brings leading scholars, diplomats, analysts, and journalists to the UM campus.

The University of Montana offers an undergraduate major as well as a Minor in Central and Southwest Asian Studies. Arabic, Chinese, Persian, Russian and Turkish language instruction are also offered. Faculty exchanges have been organized with universities in China, Egypt, Georgia, Kazakhstan, Kyrgyzstan, Morocco, Russia and Tajikistan.

Central and Southwest Asian Studies Minor

The Central and Southwest Asian Studies Minor is available to all students. It consists of eighteen credits. Students selecting the minor are required to successfully complete HSTR 146 (HIST106)/ANTH 106H/AS 106H and six credits in foundational Central and Southwest Asian Studies courses (200-level courses). Students must then complete nine credits of additional course work at the 300- or 400- level. No language courses are required; however, students pursuing the minor are strongly encouraged to meet the University-wide general education foreign language competency requirement by completing at least the second semester of one of the following languages (100 level or higher): Chinese, Persian, Arabic, Turkish or Russian. Participation in a study-abroad program is strongly recommended.

Minor - Central & Southwest Asian Stds

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 18

Required Cumulative GPA: 2.0

Note: The Central and Southwest Asian Studies minor is available to all students. No language courses are required. Participation in a study-abroad program is strongly recommended.

Lower Division Core Courses

Rule: Complete the following subcategories of courses

9 Total Credits Required

Introductory Course

Rule: Must complete the following course

	Course	Credits
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Foundational Courses

Rule: Must complete 2 of the following courses

Note: null

	Course	Credits
	CSWA 262H - Islamic Civil: Classical Age Offered autumn. Same as ANTY 243. A concise history of the Islamic world from the 6th century to the fall of the Abbasid Empire in the 13th century, focusing primarily on the teachings of Islam and the causes for the rapid expansion of the Islamic empire.	3 Credits
	CSWA 264 - Islamic Civ: Modrn Era Offered spring. History of the Islamic world and particularly the Persian, Arabic, and Turkish speaking lands between 1453 and 1952.	3 Credits
	HSTR 241H - Central Asian Cult & Civ (WRLD) Same as ANTY 241H. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Upper Division Core Courses

Rule: Must complete 3 courses

Note: If an independent study course is selected it must be taken for 3 credits.

	Course	Credits
	ANTY 347 - Central Asia and Its Neighbors Offered intermittently. Analysis of the human communities and cultures of Central and Southwest Asia, with particular emphasis on the importance of relationships with neighboring countries and civilizations since ancient times.	3 Credits
	ANTY 442 - Cities/Landscapes Central Asia Offered spring odd numbered years. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
	ANTY 492 - Independent Study (R-6) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	CSWA 441 - Seminar: Central Asia Offered spring. Advanced analysis of the historical and contemporary issues involving the human communities, cultures, and economies in Central and Southwest Asia.	3 Credits
	CSWA 457 - Artistic Trad Cent & SW Asia Offered autumn and spring. Same as HSTR 459. Analysis of the study of human artistic creativity and scientific innovations of various cultures in Central and Southwest Asia since ancient times.	3 Credits
	HSTR 368 - Iran Betw Two Revol (WRLD) The several intellectual traditions and philosophies some ephemeral and visionary, most eclectic and confused, and virtually all conflicting that are usually believed to underlie the varying concept of Iranian and Arab nationalism in the 20th century.	3 Credits
	HSTR 386 - Nationalism in Mod Middle East (WRLD) The socioeconomic, political, and cultural causes which resulted in the transformation of the Iranian society from a traditional Islamic entity to a modern secular state and the factors which led to the downfall of the secular state and the establishment of an Islamic republic.	3 Credits
	HSTR 492 - Independent Study (R-12) Prereq., consent of instr.	1 To 12 Credits
Minimum Required Grade: C		9 Total Credits Required

Catalog Year: 2016-2017

Degree Specific Credits: 42

Required Cumulative GPA: 2.0

Note: Students are required to complete 12 credits of Lower-Division core courses, 9 credits of Upper-Division core courses, in addition to completing the Capstone requirement. Students also must complete the second year sequence (8-10 credits) of either Arabic OR Chinese OR Russian, for a combined total of 42-44 credits. Students are strongly recommended to take a third or fourth year of language study.

Lower Division Core Courses

Rule: Must complete all of the following courses

	Course	Credits
	ANTY 141H - The Silk Road Offered autumn and spring. Introduction to the study of the human communities, cultures, and economies in Central and Southwest Asia along the ancient four thousand mile-long Silk Road.	3 Credits
	ANTY 241H - Central Asian Culture and Civ Offered autumn even numbered years. Introduction to Central Asia's history, culture and ways of thinking. Focus on the political and social organization of Central Asia and cultural changes as expressed in art and interactions with China, India and the Middle East.	3 Credits
	CSWA 262H - Islamic Civil: Classical Age Offered autumn. Same as ANTY 243. A concise history of the Islamic world from the 6th century to the fall of the Abbasid Empire in the 13th century, focusing primarily on the teachings of Islam and the causes for the rapid expansion of the Islamic empire.	3 Credits
	CSWA 264 - Islamic Civ: Modrn Era Offered spring. History of the Islamic world and particularly the Persian, Arabic, and Turkish speaking lands between 1453 and 1952.	3 Credits

	HSTR 442 - Cities/Landscps Central Asia (WRLD) Same as ANTY 442. Analysis of the main centers of civilization and culture, rich sites and monuments of Central Asia and Southwest Asia since ancient times.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Language Electives

Rule: Must complete 1 of the following subcategories

18-20 Total Credits Required

Arabic

Rule: May choose to complete the following courses

	Course	Credits
	ARAB 101 - Elementary Modern Arabic I Offered autumn. Elementary Modern Standard Arabic I brings students the opportunity to learn Arabic via a communicative approach, where the emphasis is placed on the functional use of the Arabic Language. Active skills are listening, speaking, reading, and writing, plus basic cultural study.	5 Credits
	ARAB 102 - Elementary Modern Arabic II Offered spring. Elementary Modern Standard Arabic II is a continuation of ARAB 101, in that it helps students learn Arabic via a communicative approach, where the emphasis is placed on the functional use of the Arabic Language. Active skills are listening, speaking, reading, and writing, plus basic cultural study.	5 Credits
	ARAB 201 - Intermediate Modern Arabic I Offered autumn. Prereq., ARAB 102 or equiv. Course is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the elementary level. The target proficiency level is Intermediate-Low/Mid (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages).	4 Credits

	ARAB 202 - Intermediate Modern Arabic II Offered spring. Prereq., ARAB 201 or equiv. Course is a continuation of ARAB 201, in that it is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the elementary level. The target proficiency level is Intermediate-Mid (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages).	4 Credits
Minimum Required Grade: C-		18 Total Credits Required

Chinese

Rule: May choose to complete the following courses

	Course	Credits
	CHIN 101 - Elementary Chinese I Offered autumn. Emphasis on speaking, reading and writing elementary Mandarin.	5 Credits
	CHIN 102 - Elementary Chinese II Prereq., CHIN 101. Offered spring. Continuation of 101.	5 Credits
	CHIN 201 - Intermediate Chinese I Offered autumn. Prereq., CHIN 102 or equiv. Emphasis on oral communication, with continuing development in all major skill areas: listening, speaking, reading and writing.	5 Credits
	CHIN 202 - Intermediate Chinese II Offered spring. Prereq., CHIN 201 or equiv. Continuation of 201.	5 Credits
Minimum Required Grade: C-		20 Total Credits Required

Russian

Rule: May choose to complete the following courses

	Course	Credits
	RUSS 101 - Elementary Russian I Offered autumn. Emphasis on oral communication, with development in all major skill areas: listening, speaking, reading, and writing.	5 Credits
	RUSS 102 - Elementary Russian II Offered spring. Prereq., RUSS 101 or equiv. Continuation of 101.	5 Credits
	RUSS 201 - Intermediate Russian I Offered autumn. Prereq., RUSS 102 or equiv. Continuation of active skills approach to Russian listening, speaking, reading, and writing.	4 Credits

	RUSS 202 - Intermediate Russian II Offered spring. Prereq., RUSS 201. Continuation of 201. Continuation of active skills approach to Russian listening, speaking, reading, and writing.	4 Credits
Minimum Required Grade: C-		18 Total Credits Required

Capstone Requirement

Rule: Must complete 1 of the following courses

Note: If taking HSTR 496, student is required to take the course for 3 credits and complete a 25 page research paper. Either course fulfills the Upper-Division Writing Requirement for the Major.

	Course	Credits
	ANTY 494 - Seminar: Central Asia Offered spring even-numbered years. Advanced analysis of historical and contemporary issues involving human communities, cultures, and economies of a particular region, and that region's role in the world.	3 Credits
	HSTR 496 - Independent Study (R-12) Offered intermittently. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

Modern and Classical Languages Literatures Department

Elizabeth Ametsbichler and Jannine Montauban, Co-Chairs

Instruction is offered in the following languages and literatures: Arabic, Chinese, French, German, Classical Greek, Italian, Japanese, Latin, Russian and Spanish, as well as in linguistics, foreign literatures in English translation, film, and the study of foreign cultures. Undergraduate courses have been planned to meet the needs of students who began studying a language in high school as well as those who undertake such study for the first time at the University.

The courses are intended to serve several purposes: (1) Contribute to the general education of students by giving them an opportunity to gain insight into patterns of living and thinking which are different from their own; (2) Enable students to gain proficiency in the language; (3) Prepare candidates for careers in research and college teaching by providing a solid basis for graduate studies in the various languages; (4) Prepare future teachers of foreign languages; (5) Provide language training requisite to careers in government, foreign commerce, and library work; (6) Enable students to read foreign publications and to meet graduate foreign language requirements in their field.

The Department of Modern and Classical Languages and Literatures offers undergraduate majors in Classics (Greek and Latin), French, German, Japanese, Russian, and Spanish. Within Classics, it is possible to elect options in Classical Languages (Latin and Greek), Classical Civilization, and Latin. There are undergraduate minors in Arabic and Chinese. The Master of Arts degree in Modern Languages and Literatures is offered with options in French, German, and Spanish. A master's degree with a concentration in any of the languages in which we offer a major may be obtained by means of the Master of Interdisciplinary Studies program.

High School Preparation: Credit is automatically granted for Advanced Placement scores of 3, 4, or 5. At each UM Orientation, the department offers a computerized placement/assessment examination in French, German, and Spanish. Students also can arrange individually to take the CLEP exam, administered by Testing Services in French, German, or Spanish.

These exams are not required, but serve one or more of three purposes:

1. **Exemption from the General Education Competency Requirement in Foreign Language:** if the student achieves a score that indicates a competence equivalent to the completion of French, German, or Spanish 102 (second semester). (See the General Education Requirements section of this catalog.)

2. **Placement for further study in the language:** the score achieved on this test is an accurate indicator of the course level at which language study should be resumed at the University (e.g. 102, 201, 202).
3. **Credit by examination:** A student with extensive language study may score high enough on the placement exam to qualify for University credits if she or he places into 202 or 301. By taking the course into which she or he placed (202 or 301) and receiving a B (3.00) or better, the student may then receive four by–pass credits (Pass grade only) for the preceding course (201or 202).

Students who elect not to take this exam may:

1. Satisfy the General Education Competency Requirement in Foreign Language by successfully completing a University foreign language 102 (second semester) course.
2. Estimate their placement level for further study by the approximate equating of one year of high school study to one semester of university study. Students should consult with the department in making this estimate.

Foreign Study Programs. The Department of Modern and Classical Languages and Literatures offers programs of accredited study in Argentina, Austria, China, Germany, Italy, Spain, Mexico, and Russia. Each program is supervised by a departmental faculty member, and is open to any student who meets the respective foreign language prerequisites. (There is no language prerequisite for the Study Abroad in Italy, but Italian is recommended.) Details concerning individual programs are available from the Department of Modern and Classical Languages and Literatures. The department also sponsors student exchanges with universities in France as well as work/study internships abroad for students in Japanese.

Department Faculty

Professors

Michihiro Ama, Karashima Tsukasa Associate Professor of Japanese Language and Culture
Elizabeth Ametsbichler, Professor / MCLL Co-Chair
Hiltrud Arens, Professor

- ### ARAB 101 - Elementary Modern Arabic I

  Credits: 5. Offered autumn. Elementary Modern Standard Arabic I brings students the opportunity to learn Arabic via a communicative approach, where the emphasis is placed on the functional use of the Arabic Language. Active skills are listening, speaking, reading, and writing, plus basic cultural study.

- ### ARAB 102 - Elementary Modern Arabic II

  Credits: 5. Offered spring. Elementary Modern Standard Arabic II is a continuation of ARAB 101, in that it helps students learn Arabic via a communicative approach, where the emphasis is placed on the functional use of the Arabic Language. Active skills are listening, speaking, reading, and writing, plus basic cultural study. Course Attributes: Foreign Language Requirement

- ### ARAB 191 - Special Topics

  Credits: 1 TO 6. (R–6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- ### ARAB 201 - Intermediate Modern Arabic I

  Credits: 4. Offered autumn. Prereq., ARAB 102 or equiv. Course is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the elementary level. The target proficiency level is Intermediate-Low/Mid (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages). Course Attributes:
  Foreign Language Requirement

- ### ARAB 202 - Intermediate Modern Arabic II

  Credits: 4. Offered spring. Prereq., ARAB 201 or equiv. Course is a continuation of ARAB 201, in that it is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond

the elementary level. The target proficiency level is Intermediate-Mid (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages). Course Attributes: Foreign Language Requirement

- ARAB 291 - Special Topics
  Credits: 1 TO 8. (R–8) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.
- ARAB 292 - Independent Study
  Credits: 1 TO 6. (R–6) Offered autumn and spring. Course material appropriate to the needs and objectives of the individual student.
- ARAB 301 - Adv Modern Standard Arabic I
  Credits: 3. Offered autumn. Prereq., ARAB 202 or equiv. Course is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the intermediate level. The target proficiency level is Intermediate-High (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages) Course Attributes: Foreign Language Requirement
- ARAB 302 - Adv Modern Standard Arabic II
  Credits: 3. Offered spring. Prereq., ARAB 301 or equiv. Course is a continuation of ARAB 301, in that it is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the intermediate level. The target proficiency level is Intermediate-High/Advanced-Low (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages). Course Attributes: Foreign Language Requirement
- ARAB 305 - The Arab World
  Credits: 3. Offered autumn. Students explore the Arabic-speaking countries through in-depth discussions of their history, geography, peoples, economy, political systems, educational systems, and cultural components, such as music, cuisine, tradition, customs, gender relations, etc. This course is designed for everyone interested in the topic, and no previous knowledge of the Arabic language is required.
- ARAB 307 - Model Arab League Delegates
  Credits: 3. Offered spring. Students explore the Arabic speaking countries, from North Africa, the Middle East and the Peninsula through discussions of political, economic, environmental, and social issues affecting the progress of the Arab world and its development. Students will learn parliamentary procedures used in institutions such as the Arab League itself; this mode of discourse will provide the basis for which students debate topics in class in order to better understand the region.
- ARAB 317 - Model Arab League Staff
  Credits: 3. Offered spring. As staff members, students will solidify their knowledge of the history, cultures, issues, and politics of the Middle East, as well as parliamentary procedures to a level which enables them to effectively assess, lead, and guide discussion related to their assigned countries and committee topics towards positive ends.
- ARAB 391 - Special Topics
  Credits: 1 TO 9. (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.
- ARAB 392 - Independent Study
  Credits: 1 TO 6. (R–6) Offered autumn and spring. Course material appropriate to the needs and objectives of the individual student.

Chinese

Back to Top

- CHIN 101 - Elementary Chinese I
  Credits: 5. Offered autumn. Emphasis on speaking, reading and writing elementary Mandarin.
- CHIN 102 - Elementary Chinese II

Credits: 5. Prereq., CHIN 101. Offered spring. Continuation of 101. Course Attributes: Foreign Language Requirement

- CHIN 191 - Special Topics
  Credits: 1 TO 6. (R–6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.
- CHIN 201 - Intermediate Chinese I
  Credits: 5. Offered autumn. Prereq., CHIN 102 or equiv. Emphasis on oral communication, with continuing development in all major skill areas: listening, speaking, reading and writing. Course Attributes: Foreign Language Requirement
- CHIN 202 - Intermediate Chinese II
  Credits: 5. Offered spring. Prereq., CHIN 201 or equiv. Continuation of 201. Course Attributes: Foreign Language Requirement
- CHIN 211H - Chinese Culture and Civiliz
  Credits: 3. Offered intermittently. Same as AS and LS 211H. An introduction to the historical, intellectual, political, literary and social developments of China from early times to the present. Course Attributes: Hist & Cultural Studies (H)
- CHIN 291 - Special Topics
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CHIN 292 - Independent Study
  Credits: 1 TO 6. (R-6) Offered autumn and spring. Course material appropriate to the needs and objectives of the individual student.
- CHIN 301 - Advanced Chinese I
  Credits: 3. Offered autumn. Prereq., CHIN 202 or consent of instr. Advanced Chinese, with emphasis on literary style, advanced grammar, and oral expression. Course Attributes: Foreign Language Requirement
- CHIN 302 - Advanced Chinese II
  Credits: 3. Offered spring. Prereq., CHIN 301 or consent of instr. Advanced Chinese, with emphasis on literary style, advanced grammar, and oral expression. Course Attributes: Foreign Language Requirement
- CHIN 313L - Chinese Poetry in Translation
  Credits: 3. Offered intermittently. The works of major Chinese poets to 1300 A.D. Course Attributes: Lit & Artistic Studies (L)

Teaching Latin

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Bachelor of Arts - Classics; Track: Teaching Latin

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 53

Required Cumulative GPA: 2.5

Note: Degree requires 58-62 credits to complete. Students must gain admission to Teacher Education Program. An overall minimum grade point average of 3.0 is required for upper division work. Students must meet the requirements for teaching licensure.

Lower Division Core

Rule: Complete 9 credits from the following list of courses:

Note: Must select either CLAS 251L or 252L. Only 1 will be accepted toward the fulfillment of the required major credits

	Course	**Credits**

	FRCH 494 - Seminar/Workshop (R-12) Offered autumn and spring. Prereq., FRCH 301 and one of FRCH 310, 311, 312 or 313 or consent of instructor. Studies in major authors, periods, genres, and/or cultural studies.	1 To 12 Credits
Minimum Required Grade: C-		6 Total Credits Required

Teaching French

Extended Major Teaching Field of French: For an endorsement in the extended major teaching field of French, a student must complete the requirements for the B.A. with a major in French including FRCH 421, LING 270, and MCLG 410. Study in a French speaking country, provided either through the university's Study Abroad Program or an experience considered to be equivalent, also is required.
French qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in French. Students should complete the requirements for a second teaching endorsement (major or minor) in another field in more demand in high schools.

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

Students will become familiar with the chronology and significance of key historical events in Central Europe as well as with major figures in such areas as politics, literature, art, and philosophy. Attention will also be given to important contributions that German-speaking culture has made globally.	3 Credits
Minimum Required Grade: C-		

Teaching German

Extended Major Teaching Field of German: For an endorsement in the extended major teaching field of German, a student must complete the requirements for the B.A. with a major in German which includes LING 270S, plus MCLG 410. Study in a German language country, provided either through the University's Study Abroad Program or an experience considered to be equivalent, also is required. German qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in German. Students are encouraged to complete the requirements for a second teaching endorsement (major or minor) in another field in more demand in high schools.

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Bachelor of Arts - German; Track: Teaching German

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 46

Required Cumulative GPA: 2.5

Note: Students are required to maintain a minimum overall GPA of 3.0 in all upper-division GRMN courses presented in fulfillment of requirements for the German teaching major. Study in a German language country is also required. The program may be provided through the University's Study Abroad Program or an equivalent experience.

Language Core

Rule: Must complete all of the following courses:

Note: Students with language background may be exempt from the GRMN 101-202 requirements. Please see the Department of Modern and Classical Languages and Literatures for additional information.

	Course	Credits
	GRMN 101 - Elementary German I Offered autumn. Emphasis on oral communication, with development in all major skill areas: listening, speaking, reading, and writing.	4 Credits
	GRMN 102 - Elementary German II Offered spring. Prereq., GRMN 101. Emphasis on oral communication, with continuing development in all major skill areas: listening, speaking, reading, and writing.	4 Credits
	GRMN 201 - Intermediate German I Offered autumn. Prereq., GRMN 102 or equiv. Continuation of active skills approach to German listening, speaking, reading, and writing.	4 Credits
	GRMN 202 - Intermediate German II Offered spring. Prereq., GRMN 201 or equiv. Continuation of 201.	4 Credits
Minimum Required Grade: C-		16 Total Credits Required

	HSTR 458 - Russian Revolution 1900-1930 (EU) Offered spring. The causes, course, character, and consequences of the Bolshevik Revolution.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Teaching Russian

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Bachelor of Arts - Russian; Track: Teaching Russian

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 51

Required Cumulative GPA: 2.5

Note: Students are required to maintain a minimum overall GPA of 3.00 in all upper-division courses presented in fulfillment of requirements for the Russian teaching major. Must complete a minimum of 27 upper division credits in Russian courses and electives.

Lower Division Core Courses

Rule: Complete the following subcategories of courses

19 Total Credits Required

Language

Rule: Must complete all of the following courses:

	Course	Credits
	RUSS 101 - Elementary Russian I Offered autumn. Emphasis on oral communication, with development in all major skill areas: listening, speaking, reading, and writing.	4 Credits
	RUSS 102 - Elementary Russian II Offered spring. Prereq., RUSS 101 or equiv. Continuation of 101.	4 Credits
	RUSS 201 - Intermediate Russian I Offered autumn. Prereq., RUSS 102 or equiv. Continuation of active skills approach to Russian listening, speaking, reading, and writing.	4 Credits
	RUSS 202 - Intermediate Russian II Offered spring. Prereq., RUSS 201. Continuation of 201. Continuation of active skills approach to Russian listening, speaking, reading, and writing.	4 Credits
Minimum Required Grade: C-		16 Total Credits Required

Teaching Licensure Requirements

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major GPA of 2.75 is required to be eligible for student teaching. This major does not qualify as a single field endorsement. Individuals must complete a second teaching major or minor in another content area.

Teaching Track Course

Rule: Must complete the following course

	Course	Credits
	MCLG 410 - Methods Tchg For Lang Offered spring. Fundamental concepts, objectives and techniques in the teaching of foreign languages.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Spanish B.A.

Bachelor of Arts - Spanish

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 51

Required Cumulative GPA: 2.5

Note: Students are required to maintain a minimum overall GPA of 2.5 in all upper-division courses presented in fulfillment of requirements for the Spanish major.

Lower Division Core Courses

Rule: Must complete all of the following courses:

	Course	Credits

	SPNS 101 - Elementary Spanish I Offered autumn. Emphasis on oral communication, with development in all major skill areas: listening, speaking, reading and writing.	5 Credits
	SPNS 102 - Elementary Spanish II Offered spring. Prereq., SPNS 101. Continuation of 101.	5 Credits
	SPNS 201 - Intermediate Spanish I Offered autumn. Prereq., SPNS 102. Continued practice in the oral skills with added emphasis on grammar and reading proficiency.	4 Credits
	SPNS 202 - Intermediate Spanish II Offered spring. Prereq., SPNS 201. Continuation of 201.	4 Credits
Minimum Required Grade: C-		18 Total Credits Required

Upper Division Core Courses

Rule: Must complete all of the following courses

Note: The sequential order of the following required courses must be followed:
1) SPNS 326 and SPNS 331 must be taken before any 400-level literature course
2) SPNS 301 must be taken before SPNS 408

	Course	Credits
	SPNS 301 - Spanish: Oral and Written Expr Offered autumn and spring. Prereq., SPNS 202 or equiv. Development of oral and written skills with an emphasis on Hispanic cultural context.	3 Credits
	SPNS 326 - Contemporary Spanish Lit Offered autumn and spring. Prereq., SPNS 202 or equiv. The study of contemporary works by peninsular authors, including an introduction to literary genres.	3 Credits
	SPNS 331 - Contemp Latin Amer Lit Offered autumn and spring. Prereq., SPNS 202 or equiv. The study of representative works by Latin-American authors with emphasis on the 20th century. Includes an introduction to literary genres.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Additional Upper Division Spanish Electives

Rule: Must complete 21 credits of upper-division courses in Spanish.

Note: The student must take at least 3 400-level courses. SPNS 408 may not count towards this requirement.

Minimum Required Grade: C-

21 Total Credits Required

Upper Division Writing

Rule: Must complete the following course

Note: This course fulfills the upper division writing requirement.

	Course	Credits

	MCLG 315 - Major Hispanic Authors Offered autumn. The intensive study of the life times, and works of a major Hispanic author.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Extended Major Teaching Field of Spanish: For an endorsement in the extended major teaching field of Spanish, a student must complete the requirements for the B.A. with a major in Spanish including SPNS 301, 305, 400, 408 (SPAN 301, 302, 405, 408) and MCLG 410. Study in a Spanish language country, provided either through the University's Study Abroad Program or an experience considered to be equivalent, also is required. Spanish qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in Spanish. Students are encouraged to complete the requirements for a second teaching endorsement (major or minor) in another field in more demand in high schools.

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Bachelor of Arts - Spanish; Track: Teaching Spanish

College Humanities & Sciences

Catalog Year: 2016-2017

Arabic Studies Minor

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 30

Required Cumulative GPA: 2.0

Note: At least 9 credits must be of upper division courses. A minimum grade of C is required in all the courses taken to fulfill the minor.

Lower Core Courses

Rule: Must complete all of the following:

	Course	Credits
	ARAB 101 - Elementary Modern Arabic I Offered autumn. Elementary Modern Standard Arabic I brings students the opportunity to learn Arabic via a communicative approach, where the emphasis is placed on the functional use of the Arabic Language. Active skills are listening, speaking, reading, and writing, plus basic cultural study.	5 Credits
	ARAB 102 - Elementary Modern Arabic II Offered spring. Elementary Modern Standard Arabic II is a continuation of ARAB 101, in that it helps students learn Arabic via a communicative approach, where the emphasis is placed on the functional use of the Arabic Language. Active skills are listening, speaking, reading, and writing, plus basic cultural study.	5 Credits
	ARAB 201 - Intermediate Modern Arabic I Offered autumn. Prereq., ARAB 102 or equiv. Course is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the elementary level. The target proficiency level is Intermediate-Low/Mid (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages).	4 Credits
	ARAB 202 - Intermediate Modern Arabic II Offered spring. Prereq., ARAB 201 or equiv. Course is a continuation of ARAB 201, in that it is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the elementary level. The target proficiency level is Intermediate-Mid (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages).	4 Credits
Minimum Required Grade: C		18 Total Credits Required

Upper Core Courses

Rule: Must complete all of the following:

	Course	Credits

	ARAB 301 - Adv Modern Standard Arabic I Offered autumn. Prereq., ARAB 202 or equiv. Course is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the intermediate level. The target proficiency level is Intermediate-High (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages)	3 Credits
	ARAB 302 - Adv Modern Standard Arabic II Offered spring. Prereq., ARAB 301 or equiv. Course is a continuation of ARAB 301, in that it is designed to help students further develop their language skills (listening, speaking, reading, and writing) and learn more about the Arab culture and advanced grammar rules beyond the intermediate level. The target proficiency level is Intermediate-High/Advanced-Low (based on proficiency guidelines from the American Council on the Teaching of Foreign Languages).	3 Credits
	ARAB 305 - The Arab World Offered autumn. Students explore the Arabic-speaking countries through in-depth discussions of their history, geography, peoples, economy, political systems, educational systems, and cultural components, such as music, cuisine, tradition, customs, gender relations, etc. This course is designed for everyone interested in the topic, and no previous knowledge of the Arabic language is required.	3 Credits
Minimum Required Grade: C		9 Total Credits Required

Electives

Rule: Must complete 3 credits from the following:

Note: Independent Study: Students may count up to 3 credits from an independent study related to the Arabic language or the Arab world. Before taking an independent study outside the Arabic program, you need to consult with the advisor of the minor. Upon consent of the advisor of the academic minor, up to three credits (either taken at the University of Montana or transferred from another college or university) may be counted as part of the electives if at least 75% of the content is related to the Arab world.

	Course	**Credits**
	ARAB 307 - Model Arab League Delegates Offered spring. Students explore the Arabic speaking countries, from North Africa, the Middle East and the Peninsula through discussions of political, economic, environmental, and social issues affecting the progress of the Arab world and its development. Students will learn parliamentary procedures used in institutions such as the Arab League itself; this mode of discourse will provide the basis for which students debate topics in class in order to better understand the region.	3 Credits
	ARAB 317 - Model Arab League Staff Offered spring. As staff members, students will solidify their knowledge of the history, cultures, issues, and politics of the Middle East, as well as parliamentary procedures to a level which enables them to effectively assess, lead, and guide discussion related to their assigned countries and committee topics towards positive ends.	3 Credits

	ARAB 392 - Independent Study (R–6) Offered autumn and spring. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	HSTR 262H - Islamic Civil: Classical Age (WRLD) A concise history of the Islamic world from the 6th century to the fall of the Abbasid Empire in the 13th century, focusing primarily on the teachings of Islam and the causes for the rapid expansion of the Islamic empire.	3 Credits

Minimum Required Grade: C-		3 Total Credits Required

Teaching French Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Minor Teaching Field of French: For an endorsement in the minor teaching field of French, a student must complete FRCH 101, 102, 201, 202, 301, 350, 421 (FREN 101,102, 201, 202, 301, 302, 401) LING 270, and MCLG 410. Study in a French-language country, provided either through the University's Study Abroad Programs or an experience considered to be equivalent, also is required.

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - French (Minor); Track: Teaching French

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 15

Required Cumulative GPA: 2.5

Note: French 101-202, or equivalent, are prerequisites to the minor in French. Study in a French-language country, provided either through the University's Study Abroad Programs or an experience considered to be equivalent, also is required. An overall minimum grade point average of 3.0 is required for upper division work.

Upper Division Core

Rule: Must complete all of the following:

	Course	Credits
	FRCH 301 - Adv Grammar/Oral Writ Exprsn (R-6) Prereq. 202 or equivalent. Advanced grammar review including literary tenses; developmental and written skills in French.	3 Credits
	FRCH 350 - French Civ & Culture (R-6) Offered spring. Prereq., FRCH 301 or consent of instr. Chronological/topical study of French culture.	3 Credits
	FRCH 421 - Adv Stylistics & Oral Arg (R-6) Prereq., FRCH 301 and one of FRCH 310, 311, 312 or 313 or consent of instructor. Intensive analysis of usage and style in written and oral argumentation at various linguistic levels.	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Teaching Licensure Requirements

Note: Individuals completing a teaching minor must also complete a teaching major in another content area. Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching.

Note: Individuals completing a teaching minor must also complete a teaching major in another content area. Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching.

Teaching Track Requirements

Rule: Must complete all of the following:

	Course	Credits
	LING 270S - Intro to Ling Offered autumn and spring. An introduction to the field of modern linguistics and to the nature of language. Emphasis on the ways different cultures develop symbol systems for representing meaning.	3 Credits

Teaching Latin Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - Latin (Minor); Track: Teaching Latin

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 29

Required Cumulative GPA: 2.5

Note: An overall minimum grade point average of 3.0 is required for upper-division work.

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits

	LATN 101 - Elementary Latin I Offered autumn. Latin I is the first course of a two-semester sequence, designed to enable the student to read authors in the original Latin as soon as possible. Based upon selected texts from Plautus, Vergil, Catullus, Livy, Ovid, Tacitus, and other major authors.	3 Credits
	LATN 102 - Elementary Latin II Offered spring. Prereq., LATN 101. Continuation of 101. Latin grammar, vocabulary, readings.	3 Credits
	LATN 201 - Intermediate Latin I Offered autumn. Prereq., LATN 102 or equiv. Selections of Latin prose from the classical period, with complementary exercises in elementary composition.	3 Credits
	LATN 202 - Intermediate Latin II Offered spring. Prereq., LATN 201 or equiv. Latin epic poetry: Vergil's Aeneid.	3 Credits
Minimum Required Grade: C-		17 Total Credits Required

Required Upper Division Courses

Rule: Must complete nine credits from the following courses:

	Course	Credits
	LATN 311 - Major Latin Authors (R–18) Offered autumn and spring. Prereq., LATN 202 or equiv. Plautus, Terence, Lucretius, Livy, Cicero, Vergil, Horace, Ovid, Tacitus, Juvenal, Pliny, Martial, etc.; also, Early Church fathers, Medieval and Renaissance Latin. Selection to suit students' needs and interests.	3 Credits
	LATN 391 - Special Topics (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 9 Credits
	LATN 392 - Independent Study (R–6) Offered autumn and spring. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	LATN 492 - Independent Study (R–12) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 12 Credits
Minimum Required Grade: C-		9 Total Credits Required

Teaching Licensure Requirements

Note: Individuals completing a teaching minor must also complete a teaching major in another content area. Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching.

Teaching Methods Course

Rule: Complete the following course.

	Course	Credits
	MCLG 410 - Methods Tchg For Lang Offered spring. Fundamental concepts, objectives and techniques in the teaching of foreign languages.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Latin American Studies Minor

Minor - Latin American Studies (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 32
Required Cumulative GPA: 2.5

Required Lower Division Courses

Rule: Must complete all of the following courses:

	Course	Credits
	MCLG 100H - Intro Latin American Studies Offered autumn or spring. Same as ANTY 103H. Multi–disciplinary survey and introduction to Latin America from pre–Columbian times to the present.	3 Credits
	SPNS 101 - Elementary Spanish I Offered autumn. Emphasis on oral communication, with development in all major skill areas: listening, speaking, reading and writing.	5 Credits
	SPNS 102 - Elementary Spanish II Offered spring. Prereq., SPNS 101. Continuation of 101.	5 Credits
	SPNS 201 - Intermediate Spanish I Offered autumn. Prereq., SPNS 102. Continued practice in the oral skills with added emphasis on grammar and reading proficiency.	4 Credits
Minimum Required Grade: C-		17 Total Credits Required

Minor Electives

Rule: Must complete 15 credits from the following courses:

Note: SPNS 494 may count when topic is related to Latin American literature such as Latin American drama, poetry, novel, short story, Argentinian literature, or 19th Century Latin American Literature.

	Course	Credits

	ANTY 354H - Mesoamerican Prehistory Offered spring odd-numbered years. The development of civilization and prehistoric states in the New World. Prehistoric lifeways and the effects of European contact on these cultures.	3 Credits
	ARTH 433H - Acient American Art Offered intermittently. Prereqs., ARTH 200H or ARTH 201H and ARTH 250L or consent of instructor. Exploration of ancient American art and architecture from prehistory to 1492.	3 Credits
	ARTH 434H - Latin American Art Offered intermittently. Prereq., ARTH 200H or 201H or consent of instructor. Same as NAS 368H. Exploration of themes in the development of Latin American art from the colonial period to the present including Renaissance ideals in the "New World", syncretism of European, African, and indigenous roots, the Black Legend, and the advent of such movements as Academism, Modernism, Social Realism, Magic Realism and Post-Modernism.	3 Credits
	ARTH 494 - Sem Art Hist & Crit (R-9) Offered intermittently. Prereq., ARTH 200H or 201H, a 300-level art history course and consent of instructor. Upper-division seminar in varying topics of art history and criticism.	3 Credits
	ENST 493 - Study Abroad: Envir Justice LA Offered intermittently. Two week travel seminar to one or more Latin American countries to examine Latin American perspectives on environmental justice and efforts toward sustainable development within the context of the global economy and U. S. foreign policy. Required one-credit seminar offered spring semester to provide background readings.	3 Credits
	HSTR 230H - Colonial Latin America (WRLD) Offered autumn. Latin America from conquest by Spain and Portugal to wars for independence. Focus on social relations, imperial and local politics, hegemony, resistance, and change.	3 Credits
	HSTR 231H - Modern Latin America (WRLD) Offered spring. Latin America from wars of independence to the present. Focus on social relations, development models, politics, and popular movements.	3 Credits
	HSTR 334 - Latin America: Reform and Revo (WRLD) Different ideologies and projects in Latin America aimed at gradual or radical transformation of political systems and/or socio-economic relations. From the Haitian Revolution to the Bolivarian vision of Hugo Chavez.	3 Credits
	HSTR 335 - Lat Am Workers & Labor (WRLD) Study of the experiences and agency of diverse working people in Latin America. Influence of race, ethnicity, gender, religion, and generation on working class identity and movements. Labor organizations and politics in historic context.	3 Credits

	HSTR 435 - Lat Am Human Rgts & Memory (WRLD) The legacy of state violence and ongoing struggles for truth and justice in select Latin American case studies. Different uses of memory and narration in bearing witness to social and political conflict and human rights violations.	3 Credits
	HSTR 437 - US-Latin America Relations (WRLD) Prereq., HSTR 200. Enrollment for history majors and minors, graduate students in history, or by consent of the instructor. Research and writing seminar on U.S.-Latin American relations from the late 18th century through the 20th century.	3 Credits
	MCLG 358 - Lat Amer Civ Thru Lit/Film Offered spring. The development of the traditional society of Latin American civilization through the interaction of European, Indian and African elements. Credit not allowed for both LS/MCLG 358 and 359.	3 Credits
	PSCI 325 - Politics of Latin America Offered autumn. Prereq., junior standing. Latin American politics from both historical and contemporary perspectives.	3 Credits
	PSCI 327 - Politics of Mexico Offered spring. Prereq., junior standing or consent of instr. A review of contemporary politics of Mexico from the Revolution to the present.	3 Credits
	PSCI 463 - Development Administration Offered autumn. Prereq., junior standing or consent of instr. Study of the functions and processes of public administration in the Third World. Focus on alleviating poverty and underdevelopment. Includes project design and development planning activities.	3 Credits
	S W 323 - Women & Soc Action Amer Offered intermittently. Prereq., one of SW 100, SOCI 101S, or ANTY 101H or consent of instr. Same as WS 323. Focus on women's experiences of and contributions to social change in North, South and Central America in the mid to late-20th century. Through case studies, testimonials, discussions with activists and Internet connections examine social constructions of gender, compare forms of social action in diverse cultural, political and historical contexts, link practice to theories of social participation, and reflect on lessons learned from women's experiences.	3 Credits
	SPNS 331 - Contemp Latin Amer Lit Offered autumn and spring. Prereq., SPNS 202 or equiv. The study of representative works by Latin-American authors with emphasis on the 20th century. Includes an introduction to literary genres.	3 Credits
	SPNS 359 - Span Amer Civ Lit & Film Offered spring in odd-numbered years. Prereq., at least one upper–division class in Spanish and SPNS 301. Same as MCLG and LS 358. The development of the traditional society of Spanish American civilization through the interaction of European, Indian, and African elements. Credit not allowed for both LS/MCLG 358 and SPAN 359.	3 Credits
	SPNS 432 - Latin American Literature (R–6) Offered regularly. Prereq. SPNS 326 or 331 or consent of instr. Emphasis on major works of the 20th century.	3 Credits

	SPNS 494 - Seminar (R–12) Offered regularly. Prereq., SPNS 326 or 331. Studies in major authors, periods, or genres.	1 To 12 Credits
Minimum Required Grade: C-		15 Total Credits Required

Mathematical Sciences Department

Emily Stone, Chair

Mathematics is studied both as a tool and for its own sake. Its usefulness in the sciences - physical, biological, social, behavioral, and environmental - and in decision-making processes is so established that it is an indispensable part of many curricula.

Mathematics is chosen as a major area of study by individuals who find it challenging, fascinating, and beautiful. It is also appreciated by many who seek primarily to use mathematics as a tool.

A career in mathematics, except for teaching at the secondary level, generally requires a graduate degree as preparation. Careers include teaching, research, and the application of mathematics to diverse problems in institutions of higher learning, business, industry, and government.

The Bachelor of Arts, Master of Arts, and Doctor of Philosophy degrees are offered as well as a Bachelor of Science in Mathematical Sciences–Computer Science.

High School Preparation: For studying mathematics at the University level, it is recommended that the high school course work consist of four years of college-preparatory mathematics, including geometry, trigonometry, and college algebra or precalculus. A course in calculus or statistics is helpful, but not necessary. It is unusual to complete an undergraduate degree in mathematics in four years without the necessary background to take Calculus I (M 171) during the freshman year (preferably during the first semester at the university).

Mathematics

Back to Top

- ## M 104 - Numbers as News

  Credits: 3. Offered spring. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An exploration of mathematics and statistics as used in the popular media. For students in the School of Journalism only.

- ## M 105 - Contemporary Mathematics

  Credits: 3. Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. An introduction to mathematical ideas and their impact on society. Intended for students wishing to satisfy the general education mathematics requirement.

- ## M 115 - Probability and Linear Math

  Credits: 3. Offered every term. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520. Systems of linear equations and matrix algebra. Introduction to probability with emphasis on models and probabilistic reasoning. Examples of applications of the material in many fields.

- ## M 118 - Math for Music Enthusiasts

  Credits: 3. Offered autumn and/or spring. Prereq. M 090 with a grade of B- or better, or M 095, or ALEKS placement >= 3, or ACT score of 22, or SAT score of 520; and elementary music background. An introduction to the interplay between mathematics and music. Course intended for Music majors/minors, and others with musical backgrounds/interests, who wish to satisfy the general education mathematics requirement.

- ## M 121 - College Algebra

  Credits: 3. Offered autumn and spring. Prereq., M 095 or ALEKS placement >= 4. Intended to strengthen algebra skills. The study of functions and their inverses; polynomial, rational, exponential, and logarithmic functions. Credit not allowed for both M 121, and M 151.

- ## M 122 - College Trigonometry

  Credits: 3. Offered autumn and spring. Prereq., M 121 or ALEKS placement >= 4. Preparation for calculus based on college algebra. Review of functions and their inverses. Trigonometric functions and identities, polar coordinates and an optional topic such as complex numbers, vectors or parametric equations. Credit not allowed for both M 122 and M 151.

- ## M 132 - Numbers and Operations for Elementary School Teachers

  Credits: 3. Offered autumn and spring. Prereq., M 095 or M 115, or ALEKS placement >= 4. The study of number and operations for prospective elementary and middle school teachers, including whole numbers, decimals, fractions, percent, integers, operations, numeration systems, and problem solving.

- ## M 133 - Geometry and Measurement for Elementary School Teachers

  Credits: 3. Offered autumn and spring. Prereq., M 132. The study of geometry and geometric measurement for prospective elementary and middle school teachers, including synthetic, transformational, and coordinate geometry, constructions, congruence and similarity, 2-dimensional and 3-dimensional measurement, and problem solving.

- ## M 151 - Precalculus

  Credits: 4. Offered autumn and spring. Prereq., ALEKS placement >= 4. A one semester preparation for calculus (as an alternative to M 121-122. Functions of one real variable are introduced in general and then applied to the usual elementary functions, namely polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, and miscellaneous others. Inverse functions, polar coordinates and trigonometric identities are included. Credit not allowed for both M 151 and M 121 or 122.

- ## M 162 - Applied Calculus

  Credits: 4. Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.

- ## M 171 - Calculus I

Credits: 4. Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.

- M 172 - Calculus II

  Credits: 4. Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.

- M 181 - Honors Calculus I

  Credits: 4. Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171. Course Attributes: Honors Course

- M 182 - Honors Calculus II

  Credits: 4. Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172. Course Attributes: Honors Course

- M 191 - Special Topics

  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.

- M 192 - Independent Study

  Credits: 1 TO 6. (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- M 210 - Intro to Mathematical Software

  Credits: 3. Offered spring. Prereq., one of M 162, 171, or 181, or consent of instr. Software packages useful for doing and writing mathematics. Introduction to a computer algebra system (such as Maple or Mathematica), a numerical package (such as MATLAB or R), and elementary programming. Writing and communicating mathematics using the mathematical typesetting system LaTeX.

- M 221 - Introduction to Linear Algebra

  Credits: 4. Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.

- M 225 - Intro to Discrete Mathematics

  Credits: 3. Offered autumn. Prereq., one of M 162, 171, or 181 or consent of instr. Mathematical concepts used in computer science with an emphasis on mathematical reasoning and proof techniques. Elementary logic, sets, functions and relations, combinatorics, mathematical induction, recursion and algorithms. Mathematics majors should take M 307 instead of 225.

- M 234 - Higher Mathematics for Elementary School Teachers

  Credits: 3. Offered autumn and spring. Prereq., M 132. The study of algebra, number theory, probability and statistics for prospective elementary and middle school teachers, including proportional reasoning, functions, elementary number theory, statistical modeling and inference, and elementary probability theory.

- M 263 - Applied Differential Equations

  Credits: 3. Offered spring. Prereq., one of M 162, 171 or 181 and knowledge of basic trigonometry. Solution of ordinary differential equations and systems with emphasis on applications, numerical methods and computer software.

- M 273 - Multivariable Calculus

  Credits: 4. Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.

- M 291 - Special Topics

  Credits: 1 TO 3. (R-9) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- M 292 - Independent Study
  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Guidance of an individual student in doing independent study on material not offered in a regular course.
- M 294 - Seminar
  Credits: 1 TO 9. (R–9) Offered autumn and spring. Prereq., consent of instr.
- M 300 - Undergraduate Mathematics Sem
  Credits: 1. (R–6) Offered every semester. Prereq., M 171 or 181. Discussion seminar focused on topics and issues of interest to students in the mathematical sciences.
- M 301 - Math Technology for Teachers
  Credits: 3. Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.
- M 307 - Intro to Abstract Mathematics
  Credits: 3. Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.
- M 311 - Ordinary Diff Equations/System
  Credits: 3. Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.
- M 317 - ODE Computer Lab
  Credits: 1. Offered autumn. Coreq., M 311 or consent of instr. Intended primarily for student in M 311.
- M 325 - Discrete Mathematics
  Credits: 3. Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.
- M 326 - Number Theory
  Credits: 3. Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.
- M 361 - Discrete Optimization
  Credits: 3. Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.
- M 362 - Linear Optimization
  Credits: 3. Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.
- M 363 - Linear Optimization Lab
  Credits: 1. Offered autumn. Coreq., M 362. Introduction to linear optimization software.
- M 381 - Advanced Calculus I
  Credits: 3. Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.
- M 391 - Special Topics
  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- M 392 - Independent Study

Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Guidance of an individual student in doing independent study on material not offered in a regular course.

- M 394 - Seminar
  Credits: 1 TO 9. (R–9) Offered autumn and spring. Prereq., consent of instr.

- M 398 - Internship
  Credits: 1 TO 6. Offered autumn and spring. Prereq., consent of instructor. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.
  Course Attributes: Internships/Practicums

- M 412 - Partial Differential Equations
  Credits: 3. Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate

- M 414 - Deterministic Models
  Credits: 3. Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate

- M 418 - PDE Computer Lab
  Credits: 1. Offered spring. Coreq., M 412 or consent of instr. Intended primarily for students in M 412. Level: Undergraduate-Graduate

- M 429 - History of Mathematics
  Credits: 3. Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate
  Course Attributes: Writing Course-Advanced

- M 431 - Abstract Algebra I
  Credits: 4. Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate

- M 432 - Abstract Algebra II
  Credits: 4. Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate

- M 439 - Euclidean & Non-Euclidean Geo
  Credits: 3. Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate

- M 440 - Numerical Analysis
  Credits: 4. Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate

- M 445 - Stat/Math/Comp Modeling
  Credits: 4. Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate

- M 461 - Practical Big Data Analytics
  Credits: 3. Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate

- M 462 - Theoretical Basics of Big Data Analytics and Real Time Computation Algorithms

  Credits: 3. Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate

- M 467 - Big Data Analytic Projects

  Credits: 3. Offered spring. Prereq., two courses chosen from STAT 341, M 221 and M 273, and one of M 461 or M 462, or consent of instructor. This course is a practicum course aimed at developing skills needed to solve big data problems facing industry and academics. Problems are brought to the class by local technology-oriented businesses and university researchers. Lecture topics include project management, interacting with clients, and written and oral presentation of results. Additional lecture topics will be selected to address the specific problems brought to the class and may cover data reduction methods, algorithm design and predictive analytics. Level: Undergraduate-Graduate

- M 472 - Intro to Complex Analysis

  Credits: 4. Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate

- M 473 - Introduction to Real Analysis

  Credits: 4. Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate

- M 485 - Graph Theory

  Credits: 3. Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate

- M 490 - Undergraduate Research

  Credits: 1 TO 4. (R-12) Offered every term. Prereq., consent of instr. Undergraduate research in the mathematical sciences under the direction of a faculty member. Graded credit/no credit.

- M 491 - Special Topics

  Credits: 1 TO 9. (R–9) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics. Level: Undergraduate-Graduate

- M 492 - Independent Study

  Credits: 1 TO 9. (R–9) Offered autumn and spring. Prereq., consent of instr. Guidance of an individual student in doing independent study on material not offered in a regular course

- M 494 - Seminar

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr.

- M 498 - Internship

  Credits: 1 TO 6. Offered autumn and spring. Prereq., consent of instr. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- M 499 - Senior Thesis

  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars. Course Attributes: Writing Course-Advanced

- M 500 - Curr Math Curricula

  Credits: 3. Offered intermittently. Prereq., teacher certification or consent of instructor. Analysis of contemporary materials for secondary school mathematics: the goals, the mathematical content, alternative methodologies, and curriculum evaluation. Level: Graduate

- M 501 - Tech Math for Tchrs

  Credits: 3. Offered intermittently. Prereq., teacher certification or consent of instructor. Technology usage when it is appropriate and when it is not. Experience is provided with scientific calculators, graphing utilities, computers, and identification of exemplary software. Level: Graduate

- M 504 - Topics in Math Education

  Credits: 1 TO 12. (R–12) Offered intermittently. Prereq., teacher certification. Topics of current interest which may include calculus, number theory, probability and statistics, geometry, or algebra, at a level suitable for teachers. Level: Graduate

- M 510 - Prob Solv for Tchrs

  Credits: 3. Offered intermittently. Prereq., teacher certification or consent of instructor. Strategies for problem solving, problem posing in a variety of situations, modeling and applications. Problems are selected from various areas of mathematics. Level: Graduate

- M 511 - Adv Math Methods I

  Credits: 3. Offered autumn odd–numbered years. Prereq., M 311, and 412 or 414. Methods in applied mathematics related to the qualitative and quantitative solution of nonlinear and differential integral equations, dynamical systems, and perturbation methods. Applications of these methods to other sciences. Level: Graduate

- M 512 - Adv Math Methods II

  Credits: 3. Offered spring even–numbered years. Prereq., M 511. Continuation of M 511. Level: Graduate

- M 514 - Topics Applied Math

  Credits: 1 TO 12. (R–12) Offered autumn even–numbered years. Prereq., consent of instr. or M 511-512. Topics of current interest in applied mathematics, mathematical modeling, dynamic modeling, and optimal management in stochastic or deterministic environments. Level: Graduate

- M 521 - Advanced Algebra I

  Credits: 3. Offered alternate years in autumn. Prereq., M 432 or consent of instr. Topics covered include group theory, field theory and Galois theory. Level: Graduate

- M 522 - Advanced Algebra II

  Credits: 3. Offered alternate years in spring. Prereq., M 521 or consent of instr. Continuation of 521; rings, modules, commutative algebra, and further topics. Level: Graduate

- M 524 - Topics in Algebra

  Credits: 3. (R-12) Offered alternate years in fall and spring. Prereq., consent of instr. Topics chosen from algebra and related areas, for example from commutative algebra, algebraic geometry, linear algebra, group theory, ring theory, or number theory. Level: Graduate

- M 530 - Geometries for Tchrs

  Credits: 3. Offered intermittently in summer. Prereq., M 439 or equiv. Comparison of synthetic, analytic, vector, and transformational approaches to geometry. Includes classification of geometries, geometric representations, axiomatics, and the applications of modern geometries. Level: Graduate

- M 531 - Topology

  Credits: 3. Offered autumn even–numbered years. Prereq., M 473 or consent of instr. Set theory, topological spaces, metrizability, continuous mappings and selected topics. Level: Graduate

- M 532 - Algebraic Topology

  Credits: 3. Offered spring alternate years. Prereq., M 431 and M 531 or consent of instr.Introduction to algebraic topology through one or more topics chosen from the fundamental group and higher homotopy groups, singular homology, and simplicial homology. Level: Graduate

- M 551 - Real Analysis

Credits: 3. Offered spring even–numbered years. Prereq., M 473 or 472 or consent of instr. Measure theory, abstract integration theory, theory of Lp–spaces. Level: Graduate

- M 555 - Functional Analysis

  Credits: 3. Offered spring odd–numbered years. Prereq., M 473 or 472 or consent of instr. Normed linear spaces, linear functionals, separation theorems, topological linear spaces, weak topologies, dualities. Level: Graduate

- M 564 - Topics in Analysis

  Credits: 3. (R–12) Offered autumn odd–numbered years. Prereq., consent of instr. Research projects or topics in analysis. May include but not restricted to Banach algebras, Fourier analysis, Harmonic analysis, Hilbert space theory, integral equations, or operator theory. Level: Graduate

- M 570 - Calculus Mdl Sch Tchrs

  Credits: 3. Offered online in full-year format. Prereq., teacher certification or consent of instr. A first course in differential and integral calculus. Concepts, definitions, properties, and elementary applications of the calculus of single-valued real variables. Level: Graduate

- M 572 - Algebra Middle Sch Tchrs

  Credits: 3. Offered intermittently in summer. Prereq., teacher certification or consent of instr. Topics include algebraic number fields, linear algebra topics, polynomials, and applications appropriate for teachers of middle school mathematics. Level: Graduate

- M 573 - Geometry Middle Sch Tchrs

  Credits: 3. Offered intermittently in summer. Prereq., teacher certification or consent of instr. Introduction to synthetic, analytic, vector, and transformational approaches to geometry. Includes topics in 2- and 3-dimensional geometry and measurement appropriate for teachers of middle school mathematics. Level: Graduate

- M 574 - Prob & Stat Mdl Sch Tchrs

  Credits: 3. Offered intermittently in summer. Prereq., teacher certification or consent of instr. A survey of topics in probability and statistics appropriate for teachers of middle school mathematics. Level: Graduate

- M 578 - Discrete Math Mdl Sch Tchr

  Credits: 3. Offered intermittently. Prereq., teacher certification or consent of instr. Elements and operations of finite structures, combinatorics, recursion, graphs, matrices, and finite models appropriate for teachers of middle school mathematics. Level: Graduate

- M 581 - Combinatorics

  Credits: 3. Offered autumn odd–numbered years. Prereq., consent of instr. Theory and applications of discrete mathematics. Topics chosen from enumeration, combinatorial analysis, and graph theory. Level: Graduate

- M 582 - Optimization

  Credits: 3. Offered autumn even–numbered years. Prereq., consent of instr. Theory and applications of optimization. Topics chosen from linear, non–linear, and discrete optimization, including duality theory, convexity and networks. Level: Graduate

- M 584 - Topics in Combin and Optim

  Credits: 3. (R–12) Offered spring odd–numbered years. Prereq., consent of instr. Topics chosen from the areas of combinatorics and optimization. May include classical problems, current trends, research interests or other topics chosen by the instructor. Level: Graduate

- M 593 - Professional Project

  Credits: 1 TO 6. (R–6) Offered autumn and spring. Prereq., consent of advisor. Preparation of a professional paper appropriate to the needs and objectives of the individual student. Level: Graduate

- M 595 - Special Topics

  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics. Level: Graduate

- M 596 - Independent Study

  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course

Attributes: Independent Study

- M 597 - Research
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student. Level: Graduate
- M 598 - Internship
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate Course Attributes: Internships/Practicums
- M 599 - Thesis
  Credits: 1 TO 6. (R–6) Offered autumn and spring. Prereq., consent of instr. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate
- M 600 - Math Colloquium
  Credits: 1 TO 3. (R–3) Offered autumn and spring. Prereq., consent of advisor. Presentations of research topics in mathematics and related fields. Level: Graduate
- M 602 - Teach College Math
  Credits: 3. Prereq., second year standing in graduate school. Topics include publishing, grant writing, writing in mathematics classes, media use in mathematics, evaluation and assessment of curricular materials and programs, instructional methods in university mathematics courses, and other selected topics. Level: Graduate
- M 605 - Learning Theories in Math
  Credits: 3. Prereq., graduate status. How children learn mathematical content and processes. Models of mental development, concept formation, problem solving, reasoning, and creative thinking. Level: Graduate
- M 606 - Math History Topics
  Credits: 3. Examination of mathematical history topics from the latter part of the 20th century. Discussions may focus on the impact of Hilbert's Problems. Research on current mathematics. Level: Graduate
- M 609 - Math Ed Research Methods
  Credits: 3. Prereq., Consent of instr. Resources for learning of reported research, critical reviews of research, quantitative and qualitative processes. Level: Graduate
- M 610 - Gr Sem Applied Math
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. A review and discussion of current research. Level: Graduate
- M 620 - Graduate Seminar in Algebra
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. Level: Graduate
- M 650 - Gr Sem in Analysis
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. A review and discussion of current research. Level: Graduate
- M 680 - Grad Sem Combin and Optim
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. A review and discussion of current research. Level: Graduate
- M 690 - Supervised Internship
  Credits: 1 TO 12. (R–6) Offered autumn and spring. Prereq., consent of department. Supervised Teaching Internship. Level: Graduate Course Attributes: Internships/Practicums
- M 691 - Practicum
  Credits: 3. Prereq., consent of instr. Resources for learning of reported research, critical reviews of research, quantitative and qualitative processes. Level: Graduate
- M 694 - Seminar
  Credits: 1 TO 12. (R–12) Offered autumn and spring. Prereq., consent of instr. A review and discussion of current research. Topics vary. Level: Graduate

- M 699 - Dissertation
  Credits: 1 TO 9. (R–9) Offered autumn and spring. Level: Graduate

Mathematics-Statistics

Back to Top

- STAT 216 - Introduction to Statistics
  Credits: 4. Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.
- STAT 341 - Intro to Probability and Stat
  Credits: 3. Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.
- STAT 421 - Probability Theory
  Credits: 3. Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate
- STAT 422 - Mathematical Statistics
  Credits: 3. Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate
- STAT 451 - Statistical Methods I
  Credits: 3. Offered autumn. Prereq., one year of college mathematics including M 115 or equiv. course in probability or consent of instr. May not be counted toward a major in mathematics. Intended primarily for non-mathematics majors who will be analyzing data. Graphical and numerical summaries of data, elementary sampling, designing experiments, probability as a model for random phenomena and as a tool for making statistical inferences, random variables, basic ideas of inference and hypothesis testing. Level: Undergraduate-Graduate
- STAT 452 - Statistical Methods II
  Credits: 3. Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate
- STAT 457 - Computer Data Analysis I
  Credits: 1. Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate
- STAT 458 - Computer Data Analysis II
  Credits: 1. Offered spring. Coreq., STAT 452 or consent of instr. Continuation of STAT 457. Intended primarily for students in STAT 452. Level: Undergraduate-Graduate
- STAT 491 - Special Topics
  Credits: 1 TO 9. (R 9) Offered autumn and spring. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics. Level: Undergraduate-Graduate
- STAT 542 - Applied Linear Models
  Credits: 3. Offered autumn even-numbered years. Prereq., STAT 422 or consent of instr. Numerical and graphical data summaries, simple linear and multiple regression and analysis of variance, including estimation, hypothesis testing, residual analysis, diagnostics, and model-building strategies. Use of the computer and real data sets integrated throughout. Level: Graduate
- STAT 543 - Appl Multiv Stat Analysis
  Credits: 4. Offered spring even-numbered years. Prereq., STAT 452 or 422, or consent of instr. Introduction to multivariate statistical methods and applications. Includes appropriate linear algebra, random vectors, multivariate normal distribution, multivariate ANOVA, principal components, clustering, discriminant analysis, and related topics. Use of the computer and real

data sets integrated throughout. Intended for students in mathematics and in other fields. Level: Graduate

- STAT 544 - Tps Probabil/Statistics
  Credits: 3. (R-12) Offered intermittently. Prereq., STAT 422 and consent of instr. May include theory of nonparametric statistics, generalized linear models, stochastic processes or other topics chosen by the instructor. Level: Graduate
- STAT 545 - Theory of Linear Models
  Credits: 3. Offered autumn odd-numbered years. Prereq., STAT 422. Multivariate normal distribution, distribution of quadratic forms, estimation and hypothesis testing in the full rank and less than full rank general linear models. Level: Graduate
- STAT 549 - Applied Sampling
  Credits: 3. Offered autumn even-numbered years. Theory and application of methods for selecting samples from populations in order to efficiently estimate parameters of interest. Includes simple random, systematic, cluster, stratified, multistage, line transect, distance and adaptive sampling. Use of the computer and real data sets integrated throughout. Intended for students in mathematics and in other fields. Level: Graduate
- STAT 640 - Gr Sem Prob & Stats
  Credits: 1 TO 12. (R-12) Offered autumn and spring. Prereq., consent of instr. A review and discussion of current research. Level: Graduate

Applied Mathematics

This degree option differs from the BA in Mathematics without an option only in the Option Requirements.

Bachelor of Arts - Mathematics; Applied Mathematics Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 67

Required Cumulative GPA: 2.0

Note: The degree specific credits are much lower for double-majors and for students completing an additional minor (in another subject): 42 credits for students completing a second major, and 46 credits for students completing a minor.

Mathematics Core Courses

Minimum Required Grade: C-

23 Total Credits Required

Calculus I

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits

	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematics Core Courses

Rule: Take all of the following courses.

	Course	Credits
	M 210 - Intro to Mathematical Software Offered spring. Prereq., one of M 162, 171, or 181, or consent of instr. Software packages useful for doing and writing mathematics. Introduction to a computer algebra system (such as Maple or Mathematica), a numerical package (such as MATLAB or R), and elementary programming. Writing and communicating mathematics using the mathematical typesetting system LaTeX.	3 Credits
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits

	M 300 - Undergraduate Mathematics Sem (R–6) Offered every semester. Prereq., M 171 or 181. Discussion seminar focused on topics and issues of interest to students in the mathematical sciences.	1 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Upper-Division Mathematics Requirement

Rule: Take 23 credits in this category.

Note: (1) Students completing a minor (in another subject) need take only 20 credits.
(2) Students completing a second major need take only 18 credits.

Minimum Required Grade: C-

23 Total Credits Required

Upper-Division Elective Courses

Rule: Take 7 courses from the following list; at least 3 of them must be at the 400 level.

Note: (1) Students completing a minor (in another subject) or a second major need take only 6 courses (totaling 18 credits or more).
(2) Residency Requirement: At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).
(3) Note that STAT 451 does not count toward this requirement.

	Course	**Credits**
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits

	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits
	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits
	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits

	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits

	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		21 or more Total Credits Required

Upper-Division Elective Computer Labs

Rule: Computer labs from the following list are optional; if taken, they count toward the total number of credits required for the Upper-Division Mathematics Requirement.

	Course	Credits
	M 317 - ODE Computer Lab Offered autumn. Coreq., M 311 or consent of instr. Intended primarily for student in M 311.	1 Credits
	M 363 - Linear Optimization Lab Offered autumn. Coreq., M 362. Introduction to linear optimization software.	1 Credits
	M 418 - PDE Computer Lab Offered spring. Coreq., M 412 or consent of instr. Intended primarily for students in M 412. Level: Undergraduate-Graduate	1 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits

	STAT 458 - Computer Data Analysis II Offered spring. Coreq., STAT 452 or consent of instr. Continuation of STAT 457. Intended primarily for students in STAT 452. Level: Undergraduate-Graduate	1 Credits
Minimum Required Grade: C-		0-5 Total Credits Required

Science Requirement

Rule: Take 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO*), chemistry (CHMY), computer science (CSCI, except CSCI TR*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

Note: (1) Students completing a minor (in another subject) or a second major are exempt from this requirement. (2) Transfer courses listed on the transcript as "CSCI TR*" may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

Minimum Required Grade: C-

18 Total Credits Required

Advanced College Writing Requirement

Rule: Take 1 of the following 2 courses, or any other approved Advanced College Writing course.

	Course	**Credits**
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 499 - Senior Thesis (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

GPA Requirement

Note: (1) A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
(2) In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

Foreign Language/Computer Science Requirement

Rule: Either complete the General Education Requirement "Group III: Modern and Classical Language" (not the symbolic systems exception), or take one course from the following list.

Note: Students completing a second major are exempt from this requirement.

	Course	**Credits**

	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Requirements for the Applied Mathematics Option

Rule: Complete the following subcategories
Minimum Required Grade: C-
13-14 Total Credits Required

Applied Mathematics Option: Core Courses

Rule: Take all of the following courses.

	Course	Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits

	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Applied Mathematics Option: Elective Courses

Rule: Take 2 of the following courses.

Note: In addition, M 381 and 485 are also recommended.

	Course	**Credits**
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
Minimum Required Grade: C-		7-8 Total Credits Required

Mathematics Education

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Bachelor of Arts - Mathematics; Mathematics Education Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 53

Required Cumulative GPA: 2.5

Note: (1) The number of degree specific credits required is significantly higher if one also counts the additional course work required by the Teacher Education Program.
(2) Note that the Teacher Education Program requires in addition an overall cumulative GPA of at least 2.75.

Mathematical Sciences Courses Required for the Mathematics Education Option

Rule: The courses in this category must be completed with a cumulative GPA of at least 2.75.

Minimum Required Grade: C-

41-42 Total Credits Required

Calculus I

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits

	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematical Sciences Core Courses for the Mathematics Education Option

Rule: Take all of the following courses.

Note: (1) Residency Requirement: At least 4 of the upper-division courses in this category must be taken at UM-Missoula (only 3 if the Elective Course is an upper-division course taken at UM-Missoula).
(2) Note that taking M 429 satisfies the Advanced College Writing Requirement for this degree.
(3) STAT 451 can be substituted for STAT 341, if STAT 451 is not selected as the elective course.

	Course	**Credits**
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits

	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
Minimum Required Grade: C-		26 Total Credits Required

Elective Course

Rule: Take one of the following:

	Course	Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits

	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits

	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 451 - Statistical Methods I Offered autumn. Prereq., one year of college mathematics including M 115 or equiv. course in probability or consent of instr. May not be counted toward a major in mathematics. Intended primarily for non-mathematics majors who will be analyzing data. Graphical and numerical summaries of data, elementary sampling, designing experiments, probability as a model for random phenomena and as a tool for making statistical inferences, random variables, basic ideas of inference and hypothesis testing. Level: Undergraduate-Graduate	3 Credits

	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Mathematics Teaching Methods Course

Rule: Take the following course.

Note: The course number EDU 497 covers many different teaching methods courses. The section of EDU 497 entitled "Methods: 5 - 12 Mathematics" is required for the Mathematics Education option.

	Course	**Credits**

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits

Minimum Required Grade: C-	4 Total Credits Required

Science Requirement for the Mathematics Education Option

Rule: Take 12 credits in at most two areas selected from astronomy (ASTR), biology (BIO*), chemistry (CHMY), computer science (CSCI, except CSCI TR*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

Note: (1) Students completing a teaching minor (in another subject) or a second major are exempt from this requirement.
(2) Transfer courses listed on the transcript as "CSCI TR*" may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

Minimum Required Grade: C-

12 Total Credits Required

Secondary Teaching Licensure

Note: For licensure to teach mathematics, a student must also gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (see the College of Education and Human Sciences).

Mathematics Minor

A handout with detailed advice for Math minors, including suggested curricula, is available on the Math Department's home page.

Minor - Mathematics

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 23

Required Cumulative GPA: 2.0

Note: null

Calculus Requirement for a Minor in Mathematics

Rule: Take one of the following three courses:

Note: M 172 or 182 are recommended since they are prerequisites for many upper-division mathematics courses.

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits

	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Elective Courses for a Minor in Mathematics

Rule: Take 23 credits in M or STAT courses offered at UM-Missoula. M courses must be numbered 115 or higher (excluding M 118). Courses must include at least three 3- or 4-credit courses at the 300 level or above.

Note: (1) The required Calculus course (M 162, 172, or 182) counts toward the 23 credits, as well as its prerequisite courses at the 100-level (e.g., M 171 or 121).
(2) Notice to Transfer Students: Mathematical Sciences courses that are not equivalent to courses taught at UM-Missoula can often be counted toward a Minor in Mathematics. This is determined on an individual basis; please contact the Department of Mathematical Sciences for details.

Minimum Required Grade: C-

23 Total Credits Required

Mathematics Education Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

The term ‘minor’ for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - Mathematics; Track: Teaching Math

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 31

Required Cumulative GPA: 2.75

Mathematical Sciences Courses for the Teaching Minor in Mathematics Education

Rule: Take all of the following courses.

Minimum Required Grade: C-

27 Total Credits Required

> *Calculus I*
>
> **Rule:** Take 1 of the following 2 courses.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematical Sciences Courses

Rule: Take all of the following courses.

Note: STAT 451 can be substituted for STAT 341.

	Course	Credits
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits

	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
Minimum Required Grade: C-		19 Total Credits Required

Mathematics Teaching Methods Course

Rule: Take the following course.

Note: The course number EDU 497 covers many different teaching method courses. The section of EDU 497 entitled "Methods: 5 - 12 Mathematics" is required for the Teaching Minor in Mathematics Education.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Secondary Teaching Licensure

Note: For licensure to teach mathematics, a student must also gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (see the College of Education and Human Sciences).

Combinatorics and Optimization

This degree option differs from the BA in Mathematics without an option only in the Option Requirements.

Bachelor of Arts - Mathematics; Combinatorics & Optimization Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 67

Required Cumulative GPA: 2.0

Note: The degree specific credits are much lower for double-majors and for students completing an additional minor (in another subject): 41 credits for students completing a second major, and 46 credits for students completing a minor.

Mathematics Core Courses

Minimum Required Grade: C-

23 Total Credits Required

Calculus I

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits

	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematics Core Courses

Rule: Take all of the following courses.

	Course	Credits
	M 210 - Intro to Mathematical Software Offered spring. Prereq., one of M 162, 171, or 181, or consent of instr. Software packages useful for doing and writing mathematics. Introduction to a computer algebra system (such as Maple or Mathematica), a numerical package (such as MATLAB or R), and elementary programming. Writing and communicating mathematics using the mathematical typesetting system LaTeX.	3 Credits
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 300 - Undergraduate Mathematics Sem (R–6) Offered every semester. Prereq., M 171 or 181. Discussion seminar focused on topics and issues of interest to students in the mathematical sciences.	1 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Upper-Division Mathematics Requirement

Rule: Take 23 credits in this category.

Note: (1) Students completing a minor (in another subject) need take only 20 credits.
(2) Students completing a second major need take only 18 credits.

Minimum Required Grade: C-

23 Total Credits Required

Upper-Division Elective Courses

Rule: Take 7 courses from the following list; at least 3 of them must be at the 400 level.

Note: (1) Students completing a minor (in another subject) or a second major need take only 6 courses (totaling 18 credits or more).
(2) Residency Requirement: At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).
(3) Note that STAT 451 does not count toward this requirement.

	Course	Credits
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits
	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits

	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits
	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits

	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits

	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		21 or more Total Credits Required

Upper-Division Elective Computer Labs

Rule: Computer labs from the following list are optional; if taken, they count toward the total number of credits required for the Upper-Division Mathematics Requirement.

	Course	Credits
	M 317 - ODE Computer Lab Offered autumn. Coreq., M 311 or consent of instr. Intended primarily for student in M 311.	1 Credits
	M 363 - Linear Optimization Lab Offered autumn. Coreq., M 362. Introduction to linear optimization software.	1 Credits
	M 418 - PDE Computer Lab Offered spring. Coreq., M 412 or consent of instr. Intended primarily for students in M 412. Level: Undergraduate-Graduate	1 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits
	STAT 458 - Computer Data Analysis II Offered spring. Coreq., STAT 452 or consent of instr. Continuation of STAT 457. Intended primarily for students in STAT 452. Level: Undergraduate-Graduate	1 Credits
Minimum Required Grade: C-		0-5 Total Credits Required

Science Requirement

Rule: Take 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO*), chemistry (CHMY), computer science (CSCI, except CSCI TR*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

Note: (1) Students completing a minor (in another subject) or a second major are exempt from this requirement. (2) Transfer courses listed on the transcript as “CSCI TR*” may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

Minimum Required Grade: C-
18 Total Credits Required

Advanced College Writing Requirement

Rule: Take 1 of the following 2 courses, or any other approved Advanced College Writing course.

	Course	Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 499 - Senior Thesis (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

GPA Requirement

Note: (1) A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
(2) In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

Foreign Language/Computer Science Requirement

Rule: Either complete the General Education Requirement "Group III: Modern and Classical Language" (not the symbolic systems exception), or take one course from the following list.

Note: Students completing a second major are exempt from this requirement.

	Course	Credits
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits

	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Requirements for the Combinatorics & Optimization Option

Minimum Required Grade: C-
12-13 Total Credits Required

Combinatorics & Optimization Option: Core Courses

Rule: Take all of the following courses.

	Course	Credits
	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		9 Total Credits Required

Combinatorics & Optimization Option: Elective Courses

Rule: Take 1 of the following courses.

	Course	Credits

	CSCI 332 - Design/Analysis of Algorithms Offered spring. Prereq., CSCI 232 and M 225 or consent of instr. Algorithm design, analysis, and correctness. Commonly used algorithms including searching and sorting, string search, dynamic programming, branch and bound, graph algorithms, and parallel algorithms. Introduction to NP-complete problems.	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Pure Mathematics

This degree option differs from the BA in Mathematics without an option only in the Option Requirements.

Bachelor of Arts - Mathematics; Pure Mathematics Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 68

Required Cumulative GPA: 2.0

Note: The degree specific credits are much lower for double-majors and for students completing an additional minor (in another subject): 44 credits for students completing a second major, and 47 credits for students completing a minor.

Mathematics Core Courses

Minimum Required Grade: C-

23 Total Credits Required

Calculus I

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematics Core Courses

Rule: Take all of the following courses.

	Course	Credits
	M 210 - Intro to Mathematical Software Offered spring. Prereq., one of M 162, 171, or 181, or consent of instr. Software packages useful for doing and writing mathematics. Introduction to a computer algebra system (such as Maple or Mathematica), a numerical package (such as MATLAB or R), and elementary programming. Writing and communicating mathematics using the mathematical typesetting system LaTeX.	3 Credits

	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 300 - Undergraduate Mathematics Sem (R–6) Offered every semester. Prereq., M 171 or 181. Discussion seminar focused on topics and issues of interest to students in the mathematical sciences.	1 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Upper-Division Mathematics Requirement

Rule: Take 23 credits in this category.

Note: (1) Students completing a minor (in another subject) need take only 20 credits.
(2) Students completing a second major need take only 18 credits.

Minimum Required Grade: C-

23 Total Credits Required

Upper-Division Elective Courses

Rule: Take 7 courses from the following list; at least 3 of them must be at the 400 level.

Note: (1) Students completing a minor (in another subject) or a second major need take only 6 courses (totaling 18 credits or more).
(2) Residency Requirement: At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).
(3) Note that STAT 451 does not count toward this requirement.

	Course	**Credits**
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits

	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits
	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits
	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits

	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits

	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		21 or more Total Credits Required

Upper-Division Elective Computer Labs

Rule: Computer labs from the following list are optional; if taken, they count toward the total number of credits required for the Upper-Division Mathematics Requirement.

	Course	**Credits**
	M 317 - ODE Computer Lab Offered autumn. Coreq., M 311 or consent of instr. Intended primarily for student in M 311.	1 Credits
	M 363 - Linear Optimization Lab Offered autumn. Coreq., M 362. Introduction to linear optimization software.	1 Credits

	M 418 - PDE Computer Lab Offered spring. Coreq., M 412 or consent of instr. Intended primarily for students in M 412. Level: Undergraduate-Graduate	1 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits
	STAT 458 - Computer Data Analysis II Offered spring. Coreq., STAT 452 or consent of instr. Continuation of STAT 457. Intended primarily for students in STAT 452. Level: Undergraduate-Graduate	1 Credits
Minimum Required Grade: C-		0-5 Total Credits Required

Science Requirement

Rule: Take 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO*), chemistry (CHMY), computer science (CSCI, except CSCI TR*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

Note: (1) Students completing a minor (in another subject) or a second major are exempt from this requirement. (2) Transfer courses listed on the transcript as "CSCI TR*" may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

Minimum Required Grade: C-

18 Total Credits Required

Advanced College Writing Requirement

Rule: Take 1 of the following 2 courses, or any other approved Advanced College Writing course.

	Course	**Credits**
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 499 - Senior Thesis (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

GPA Requirement

Note: (1) A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
(2) In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

Foreign Language/Computer Science Requirement

Rule: Either complete the General Education Requirement "Group III: Modern and Classical Language" (not the symbolic systems exception), or take one course from the following list.

Note: Students completing a second major are exempt from this requirement.

	Course	Credits
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Requirements for the Pure Mathematics Option

Rule: Take 4 of the following courses.

	Course	Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits
	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits

	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
Minimum Required Grade: C-		15-16 Total Credits Required

Statistics

This degree option differs from the BA in Mathematics without an option only in the Option Requirements.

Bachelor of Arts - Mathematics; Statistics Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 67

Required Cumulative GPA: 2.0

Note: The degree specific credits are much lower for double-majors and for students completing an additional minor (in another subject): 41 credits for students completing a second major, and 46 credits for students completing a minor.

Mathematics Core Courses

Minimum Required Grade: C-

23 Total Credits Required

Calculus I

Rule: Take 1 of the following 2 courses.

	Course	**Credits**
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits

	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematics Core Courses

Rule: Take all of the following courses.

	Course	Credits
	M 210 - Intro to Mathematical Software Offered spring. Prereq., one of M 162, 171, or 181, or consent of instr. Software packages useful for doing and writing mathematics. Introduction to a computer algebra system (such as Maple or Mathematica), a numerical package (such as MATLAB or R), and elementary programming. Writing and communicating mathematics using the mathematical typesetting system LaTeX.	3 Credits
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits

	M 300 - Undergraduate Mathematics Sem (R–6) Offered every semester. Prereq., M 171 or 181. Discussion seminar focused on topics and issues of interest to students in the mathematical sciences.	1 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Upper-Division Mathematics Requirement

Rule: Take 23 credits in this category.

Note: (1) Students completing a minor (in another subject) need take only 20 credits.
(2) Students completing a second major need take only 18 credits.

Minimum Required Grade: C-

23 Total Credits Required

Upper-Division Elective Courses

Rule: Take 7 courses from the following list; at least 3 of them must be at the 400 level.

Note: (1) Students completing a minor (in another subject) or a second major need take only 6 courses (totaling 18 credits or more).
(2) Residency Requirement: At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).
(3) Note that STAT 451 does not count toward this requirement.

	Course	**Credits**
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits

	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits
	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits
	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits

	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits

	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		21 or more Total Credits Required

Upper-Division Elective Computer Labs

Rule: Computer labs from the following list are optional; if taken, they count toward the total number of credits required for the Upper-Division Mathematics Requirement.

	Course	Credits
	M 317 - ODE Computer Lab Offered autumn. Coreq., M 311 or consent of instr. Intended primarily for student in M 311.	1 Credits
	M 363 - Linear Optimization Lab Offered autumn. Coreq., M 362. Introduction to linear optimization software.	1 Credits
	M 418 - PDE Computer Lab Offered spring. Coreq., M 412 or consent of instr. Intended primarily for students in M 412. Level: Undergraduate-Graduate	1 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits

	STAT 458 - Computer Data Analysis II Offered spring. Coreq., STAT 452 or consent of instr. Continuation of STAT 457. Intended primarily for students in STAT 452. Level: Undergraduate-Graduate	1 Credits
Minimum Required Grade: C-		0-5 Total Credits Required

Science Requirement

Rule: Take 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO*), chemistry (CHMY), computer science (CSCI, except CSCI TR*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

Note: (1) Students completing a minor (in another subject) or a second major are exempt from this requirement. (2) Transfer courses listed on the transcript as "CSCI TR*" may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

Minimum Required Grade: C-

18 Total Credits Required

Advanced College Writing Requirement

Rule: Take 1 of the following 2 courses, or any other approved Advanced College Writing course.

	Course	**Credits**
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 499 - Senior Thesis (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

GPA Requirement

Note: (1) A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
(2) In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

Foreign Language/Computer Science Requirement

Rule: Either complete the General Education Requirement "Group III: Modern and Classical Language" (not the symbolic systems exception), or take one course from the following list.

Note: Students completing a second major are exempt from this requirement.

	Course	**Credits**

	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Requirements for the Statistics Option

Rule: Take 4 of the following courses

Note: Additional mathematics and statistics courses chosen with advisor.

	Course	**Credits**
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits

	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Mathematical Sciences-Computer Science (Combined Major)

The purpose of the combined program is to provide a thorough background in both allied disciplines and to inculcate a deeper understanding of their goals and methods. A student must complete 60 credits in the two disciplines: 30 of these credits in Computer Science courses and 30 of these credits in Mathematical Sciences courses. Each student plans a program in consultation with both a Computer Science and a Mathematical Sciences advisor. Students planning to attend graduate school in computer science or the mathematical sciences should consult with their respective advisors.

Bachelor of Science - Mathematical Sci-Computer Sci

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 73
Required Cumulative GPA: 2.0
Note: null

Mathematical Sciences

Rule: Complete the following subcategories.

Note: null

31 Total Credits Required

Mathematical Sciences Core

Rule: Complete all of the following courses.

Note: The following substitutions are allowed: M 181 for M 171, M 182 for M 172, and M 225 for M 307.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
Minimum Required Grade: C-		19 Total Credits Required

Mathematical Sciences Electives

Rule: Complete 12 credits from the following courses.

Note: The combined nine credits of Computer Science Electives and twelve credits of Mathematical Sciences Electives must include at least three 3– or 4–credit courses numbered 400 or above, with at least one chosen from each department (not including M 429 and STAT 451, 452).

	Course	Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits
	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits
	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits

	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits
	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits

	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 451 - Statistical Methods I Offered autumn. Prereq., one year of college mathematics including M 115 or equiv. course in probability or consent of instr. May not be counted toward a major in mathematics. Intended primarily for non-mathematics majors who will be analyzing data. Graphical and numerical summaries of data, elementary sampling, designing experiments, probability as a model for random phenomena and as a tool for making statistical inferences, random variables, basic ideas of inference and hypothesis testing. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Computer Science

Rule: Complete the following subcategories.

30 Total Credits Required

Computer Science Core

Rule: Complete all of the following courses.

	Course	Credits
	CSCI 106 - Careers in Computer Science Offered autumn. Exploration of various careers available in the general area of Computer Science. Includes discussion of strategies for success in the major. Computer Science faculty members also will discuss possible undergraduate research opportunities and motivation for graduate education.	1 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 205 - Programming Languages w/ C/C++ Offered spring. Prereq., CSCI 232 and M 225. Concepts and principles of programming languages with an emphasis on C, C++, and object-oriented programming. Syntax and semantics of object-oriented languages. Principles and implementation of late binding, memory allocation and de-allocation, type-checking, scope, polymorphism, inheritance.	4 Credits
	CSCI 232 - Data Structures and Algorithms Offered autumn. Prereq., 'B-' or better in CSCI 136; or consent of instr. Abstract data types, algorithm analysis, stacks, queues, lists, recursion, trees, hashing, graphs, and applications of data structures in algorithm development. Python programming language used.	4 Credits
	CSCI 332 - Design/Analysis of Algorithms Offered spring. Prereq., CSCI 232 and M 225 or consent of instr. Algorithm design, analysis, and correctness. Commonly used algorithms including searching and sorting, string search, dynamic programming, branch and bound, graph algorithms, and parallel algorithms. Introduction to NP-complete problems.	3 Credits

	CSCI 361 - Computer Architecture Offered spring. Prereq., CSCI 136 or consent of instr. Functional view of computer system components, BCPU, ALU, memory, bus, cache, I/O module. Instruction set design: formats, addressing modes. Basic circuit design. Pipelining and assembly language. Interrupt handling. Implementation of ALU and control unit. Detailed design of an RISC-like instruction set. Datapath and performance comparisons. Basic multiprocessor design.	3 Credits
Minimum Required Grade: C-		21 Total Credits Required

Computer Science Electives

Rule: Complete 9 credits from the following courses.

Note: (1) A total of at most three of the nine credits of Computer Science Electives may be in CSCI 398 or 498.
(2) The combined nine credits of Computer Science Electives and twelve credits of Mathematical Sciences Electives must include at least three 3– or 4–credit courses numbered 400 or above, with at least one chosen from each department (not including M 429 and STAT 451, 452).

	Course	Credits
	CSCI 315E - Computers, Ethics, and Society Offered autumn. Prereq., University approved intermediate level writing course. Ethical problems that computer scientists face. The codes of ethics of professional computing societies. The social implications of computers, computing, and other digital technologies.	3 Credits
	CSCI 323 - Software Science Offered autumn. Prereq., CSCI 136. Study, implementation, and assessment of software processes, techniques, methods, and CASE tools. Project management and cost estimation techniques will be examined. A group project may be required.	3 Credits
	CSCI 340 - Database Design Offered spring. Prereq., CSCI 232 or consent of instr. Fundamentals of data modeling, the relational mode, normal forms, file organization, index structures and SQL. Major project involving the design and implementation of a relational database.	3 Credits
	CSCI 390 - Research (R-6) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student.	1 To 6 Credits
	CSCI 391 - Special Topics (R-6) Offered intermittently. Prereq., junior standing. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	CSCI 394 - Seminar (R-6) Offered intermittently. Prereq., consent of instr. Guidance in special work.	1 To 6 Credits

	CSCI 398 - Internship (R-3) Offered intermittently. Prereq., consent of department. Business or government internship. Prior approval must be obtained from faculty supervisor and the Internship Services office. Only three credits applicable to computer science major or minor. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 3 Credits
	CSCI 411 - Advanced Web Programming Offered intermittently. Prereq., CSCI 136. Programming and software development techniques for developing web-based applications. Scripting and other programming languages that are used for web-based development.	3 Credits
	CSCI 412 - Game and Mobile App Offered intermittently. Prereq., CSCI 232 and 323. Programming and software development techniques for developing gaming and mobile applications. Multiple gaming environments and mobile programming languages are introduced and examined to build modern applications.	3 Credits
	CSCI 426 - Adv Prgrmng Theory/Practice I Offered autumn. Prereq., CSCI 205, 232, 323 and M 225, or consent of instr. Examination and implementation of modern best practices in the areas of software design, coding, testing and maintenance. Focus on design patterns and design pattern languages used to build modern software systems in a variety of areas.	3 Credits
	CSCI 427 - Adv Prgrmng Theory/Practice II Offered spring. Prereq., CSCI 426. Design and implementation of a major software project in a group setting, with required documentation, presentation, installation, and approval by the instructor.	3 Credits
	CSCI 438 - Theory of Computation Offered intermittently. Prereq., M 225 or M 307. This course focuses on understanding the limitations & capabilities of abstract models of computation, through rigorous mathematical analysis. Topics will include finite & pushdown automata, nondeterministic computation, regular expressions, generative grammars, Turing machines, undecidability, and computational complexity.	3 Credits
	CSCI 441 - Computer Graphics Programming Offered intermittently. Prereq., CSCI 232 and M 221 or consent of instr. The graphics pipeline, its implementation in hardware and emphasis on the programmable portions of the pipeline. Matrix transformations for modeling, viewing, clipping, and windowing. Application of lighting, coloring, and texturing models. Hierarchical modeling of objects. Programmable shaders. OpenGL and WebGL.	3 Credits
	CSCI 443 - User Interface Design Offered intermittently. Prereq., CSCI 232 or consent of instr. Introduction to usability and key concepts of human behavior. Focus on the process of user-centered design, including requirements specification, prototyping, and methods of evaluation. Incorporation of regular design critiques of classmates' work, and emphasis on both oral and written communication skills. Credit not allowed for CSCI 543 and this course.	3 Credits

	CSCI 444 - Data Visualization Offered intermittently. Prereq., M 171; programming experience; and junior, senior, or graduate status; or consent of instr. Visualization fundamentals and applications using special visualization software; formulation of 3-D empirical models; translation of 3-D models into graphical displays; time sequences and pseudo-animation; interactive versus presentation techniques; special techniques for video, CD and other media.	3 Credits
	CSCI 446 - Artificial Intelligence Offered intermittently. Prereq., M 225 or M 307, and CSCI 232, or consent of instr. Using computers and software to solve problems that require intelligence. Specific topics may include knowledge representation, logical and probabilistic reasoning, machine learning, planning, game playing, information retrieval, computer vision, and robotics.	3 Credits
	CSCI 447 - Machine Learning Offered intermittently. Prereq., CSCI 232 or consent of instr. Introduction to the framework of learning from examples, various learning algorithms such as neural networks, and generic learning principles such as inductive bias, Occam's Razor, and data mining. Credit not allowed for both CSCI 447 and CSCI 547.	3 Credits
	CSCI 448 - Pattern Recognition Offered intermittently. Prereq., Junior or Senior status. Introduction to the framework of unsupervised learning techniques such as clustering (agglomerative, fuzzy, graph theory based, etc.), multivariate analysis approaches (PCA, MDS, LDA, etc.), image analysis (edge detection, etc.), as well as feature selection and generation. Emphasis will be on the underlying algorithms and their implementation. Credit not allowed for both CSCI 448 and CSCI 548.	3 Credits
	CSCI 451 - Computational Biology Offered Autumn. Designed for attendance by both computer scientists and biologists. The course will explore the interdisciplinary nature at the juncture of the two fields. Students will be introduced to bioinformatics (emphasis: computational genomics), with exposure to fundamental problems, algorithms, and tools in the field. This includes a basic introduction to genomics, along with in-depth coverage of algorithms and methods relevant to modern computational genomics, including: biological sequence alignment, sequence database homology search, and phylogeny inference. The programming expectations are limited for a 400-level computer science course, but at least one semester of a programming-intensive course is required. Credit not allowed for CSCI 558 and this course	3 Credits

	CSCI 460 - Operating Systems Offered autumn. Prereq., CSCI 232, or consent of instr. Operating system design principles. Processes, threads, synchronization, deadlock, memory management, file management and file systems, protection, and security, comparison of commonly used existing operating systems, writing programs that make use of operating system services. It is recommended, but not required, that the student also attend Programming Languages (in order to be prepared to write C programs) and Architecture (in order to understand interactions between the operating system and processor hardware) prior to attending this course.	3 Credits
	CSCI 464 - Applications Mining Big Data Offered intermittently. Prereq., upper division or consent of instr. Co-convenes with CSCI 564. Introduction to existing data mining software systems and their use, with focus on practical exercises. Topics include data acquisition, data cleansing, feature selection, and data analysis. Credit not allowed for both CSCI 464 and CSCI 564.	3 Credits
	CSCI 466 - Networks Offered spring. Prereq., CSCI 232. Concepts and practice of computer networking, network protocol layers, switching, routing, flow, and congestion control. Network programming.	3 Credits
	CSCI 477 - Simulation Co-convene with CSCI 577. Prereq., M 172, CSCI 135, or consent of instr. Matrix languages. ODE solving; Euler-Richardson, Runge-Kutta, PDE solving; finite differences, finite elements, multi-grid techniques. Discrete methods for solution, renormalization group method, critical phenomena. Emphasis on presentation of results and interactive programs. Credit not allowed for CSCI 577 and this course.	3 Credits
	CSCI 480 - Parallel Computing Prereq., CSCI 205 and 232, or instructor consent. This course is an introduction to parallelism and parallel programming. Topics include the various forms of parallelism on modern computer hardware (e.g. SIMD vector instructions, GPUs, multiple cores, and networked clusters), with coverage of locality and latency, shared vs non-shared memory, and synchronization mechanisms (locking, atomicity, etc). We will introduce patterns that appear in essentially all programs that need to run fast. We will discuss how to recognize these patterns in a variety of practical problems, discuss efficient algorithms for implementing them, and how to compose these patterns into larger applications. We will address computer architecture at a high level, sufficient to understand the relative costs of operations like arithmetic and data transfer. We also introduce useful tools for debugging correctness and performance of parallel programs. Assignments will include significant parallel programming projects. Co-convenes with CSCI 580. Credit not allowed for both CSCI 480 and CSCI 580.	3 Credits

	CSCI 490 - Research (R-6) Offered intermittently. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student.	1 To 6 Credits
	CSCI 491 - Special Topics (R-6) Offered intermittently. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	CSCI 494 - Seminar (R-6) Offered intermittently. Prereq., consent of instr. Guidance in special work.	1 To 6 Credits
	CSCI 498 - Internship (R-3) Offered Intermittently. Prereq., consent of department. Business or government internship. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Only three credits of CSCI 398 and/or CSCI 498 applicable to computer science major or minor. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 3 Credits
	CSCI 499 - Senior Thesis/Capstone (R-6) Offered every term. Prereq., consent of thesis/project director and chair of the Computer Science Department. Senior thesis for computer science majors and/or Watkins scholars.	1 To 6 Credits
Minimum Required Grade: C-		9 Total Credits Required

Science Requirement

Rule: Complete the course work from 1 of the following subcategories.

9-10 Total Credits Required

Biology

Rule: If you choose biology, complete all of the following courses.

	Course	**Credits**
	BIOB 160N - Principles of Living Systems Offered autumn and summer. Unifying principles of biological structure-function relationships at different levels of organization and complexity. Consideration of reproduction, genetics, development, evolution, ecosystems, as well as the inter-relationships of the human species to the rest of life. Students requiring a laboratory should also register for BIOB 161N. Credit not allowed for both BIOB 101N and 160N.	3 Credits

	BIOB 161N - Prncpls of Living Systems Lab Offered autumn and summer. Prereq., or Coreq., BIOB 160N. Lab experiences illustrate biological principles underlying growth, reproduction, development, genetics and physiology, and are designed to give students practice in scientific methods of description, development of hypotheses, and testing.	1 Credits
	BIOB 170N - Princpls Biological Diversity Offered spring and summer. Survey of the diversity, evolution and ecology of life including prokaryotes, viruses, protista, fungi, plants and animals.	3 Credits
	BIOB 171N - Princpls Biological Dvrsty Lab Offered spring and summer. Coreq., BIOB 170N. The diversity of life including prokaryotes, viruses, protista, fungi, plants and animals including structure and evolutionary relationships.	2 Credits
Minimum Required Grade: C-		9 Total Credits Required

Chemistry

Rule: If you choose chemistry, complete all of the following courses.

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics

Rule: If you choose physics, complete all of the following courses.

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits

	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Public Speaking Requirement

Rule: Complete 1 of the following courses.

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	COMX 242 - Argumentation Offered autumn and spring on the Mountain campus, offered intermittently on the Missoula College campus. Development of argumentation skills and critical judgment in decision-making and debate. Includes criticism, construction, presentation, and refutation of spoken and written arguments.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Advanced College Writing Requirement

Rule: Complete 1 of the following courses.

Note: Any other approved Advanced College Writing course will also fulfill this requirement.

	Course	Credits
	CSCI 315E - Computers, Ethics, and Society Offered autumn. Prereq., University approved intermediate level writing course. Ethical problems that computer scientists face. The codes of ethics of professional computing societies. The social implications of computers, computing, and other digital technologies.	3 Credits

	CSCI 499 - Senior Thesis/Capstone (R-6) Offered every term. Prereq., consent of thesis/project director and chair of the Computer Science Department. Senior thesis for computer science majors and/or Watkins scholars.	1 To 6 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 499 - Senior Thesis (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

Suggested Curricula

Note: Students are encouraged to choose their Computer Science and Mathematical Sciences Electives according to one of the following curricula; these tracks are suggestions only and, as such, optional. Note that the suggested curricula do not include an advanced College Writing Course.

Applied Math–Scientific Programming: M 311, 412, 414, and one course chosen from M 381, 440, 472, 473 and STAT 341. Three courses chosen from CSCI 441, 444, 460, 477.

Combinatorics and Optimization–Artificial Intelligence: M 361, 362, and two courses chosen from M 325, 414, 485 and STAT 341; and CSCI 446, 447, and 460.

Data Science (Big Data Analytics): M 461, 462, and STAT 341, 451, and 452. Three courses chosen from CSCI 444, 447, 448, 464, and 480.

Statistics–Machine Learning: STAT 341, 421, and two courses chosen from M 325, 362, 485 and STAT 422. Three courses chosen from CSCI 340, 444, 446, 447, and 451.

Algebra–Analysis: M 381, 431, and two courses chosen from M 326, 432, 472, 473; CSCI 426, 460, and one other course.

Mathematics B.A.

This degree is the BA in Mathematics without an option. Students can add one or more of the options in Applied Mathematics, Combinatorics & Optimization, Pure Mathematics, or Statistics to this degree by fulfilling the respective Option Requirements (achieved by taking specific Upper-Division Elective Courses). Typically, students declare one of these four options during their sophomore or junior year. Note that the requirements for the Mathematics Education option are extensive and differ substantially from the requirements for the other options. Students interested in Mathematics Education are encouraged to declare this option as early as possible, preferably during their first year at UM.

Bachelor of Arts - Mathematics

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 67

Required Cumulative GPA: 2.0

Note: The degree specific credits are much lower for double-majors and for students completing an additional minor (in another subject): 41 credits for students completing a second major, and 46 credits for students completing a minor.

Mathematics Core Courses

Minimum Required Grade: C-
23 Total Credits Required

Calculus I

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 181 - Honors Calculus I Offered autumn. Prereq., consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 171.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Calculus II

Rule: Take 1 of the following 2 courses.

	Course	Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 182 - Honors Calculus II Offered spring. Prereq., M 181 or consent of instr. Coreq., Honors Calculus Seminar, a section of M 294. Honors version of M 172.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Other Mathematics Core Courses

Rule: Take all of the following courses.

	Course	Credits

	M 210 - Intro to Mathematical Software Offered spring. Prereq., one of M 162, 171, or 181, or consent of instr. Software packages useful for doing and writing mathematics. Introduction to a computer algebra system (such as Maple or Mathematica), a numerical package (such as MATLAB or R), and elementary programming. Writing and communicating mathematics using the mathematical typesetting system LaTeX.	3 Credits
	M 221 - Introduction to Linear Algebra Offered autumn and spring. Prereq., M 172 or 182. Vectors in the plane and space, systems of linear equations and Gauss–Jordan elimination, matrices, determinants, eigenvalues and eigenvectors, vector spaces, linear transformations. Calculators and/or computers used where appropriate.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	M 300 - Undergraduate Mathematics Sem (R–6) Offered every semester. Prereq., M 171 or 181. Discussion seminar focused on topics and issues of interest to students in the mathematical sciences.	1 Credits
	M 307 - Intro to Abstract Mathematics Offered autumn and spring. Prereq., M 172 or 182. Designed to prepare students for upper–division proof–based mathematics courses. Topics include proof techniques, logic, sets, relations, functions and axiomatic methods. Students planning to take both M 221 and 307 are encouraged to take M 221 first.	3 Credits
Minimum Required Grade: C-		15 Total Credits Required

Upper-Division Mathematics Requirement

Rule: Take 23 credits in this category.

Note: (1) Students completing a minor (in another subject) need take only 20 credits.
(2) Students completing a second major need take only 18 credits.

Minimum Required Grade: C-

23 Total Credits Required

Upper-Division Elective Courses

Rule: Take 7 courses from the following list; at least 3 of them must be at the 400 level.

Note: (1) Students completing a minor (in another subject) or a second major need take only 6 courses (totaling 18 credits or more).
(2) Residency Requirement: At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).
(3) Note that STAT 451 does not count toward this requirement.

	Course	**Credits**
	M 301 - Math Technology for Teachers Offered autumn. Prereq., M 221. Discrete and continuous mathematical models from a variety of disciplines using appropriate technology.	3 Credits

	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
	M 325 - Discrete Mathematics Offered spring. Prereq., M 171 and 225 or 307. Continuation of 225 and topics from graph theory, Boolean algebras, automata theory, coding theory, computability and formal languages.	3 Credits
	M 326 - Number Theory Offered spring. Prereq., M 225 or 307. Congruences, Diophantine equations, properties of primes, quadratic residues, continued fractions, algebraic numbers.	3 Credits
	M 361 - Discrete Optimization Offered spring. Prereq., one of M 162, 172 or 182 (221 or 225 recommended). Intended for non–mathematics majors as well as mathematics majors. Introduction to discrete optimization and modeling techniques with applications. Topics from combinatorics and graph theory, including enumeration, graph algorithms, matching problems and networks.	3 Credits
	M 362 - Linear Optimization Offered autumn. Prereq., one of M 162, 172 or 182 (221 recommended). Coreq., M 363 recommended. Intended for non–mathematics majors as well as majors. Introduction to linear programming and modeling techniques with applications. Topics include the simplex method, duality, sensitivity analysis and network models.	3 Credits
	M 381 - Advanced Calculus I Offered autumn . Prereq., M 307. Rigorous development of single-variable calculus with formal proof. Functions, sequences, limits, continuity, differentiation, and integration.	3 Credits
	M 412 - Partial Differential Equations Offered spring. Prereq., M 311. Fourier series, Sturm–Liouville and boundary value problems. Partial differential equations: Cauchy problems and the method of characteristics, separation of variables and Laplace transform methods. Numerical methods and selected topics. M 418 computer lab recommended. Level: Undergraduate-Graduate	3 Credits
	M 414 - Deterministic Models Offered spring. Prereq., M 263 or 311 or consent of instr. Linear and nonlinear difference and differential equations: stability, phase–plane analysis, oscillatory behavior, limit cycles, and chaos. Eigenvalues and eigenfunctions. Emphasis on models in biology. Level: Undergraduate-Graduate	3 Credits
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits

	M 431 - Abstract Algebra I Offered autumn. Prereq., M 221 and 307 or consent of instr. An introduction to modern ideas of algebra through the study of groups, rings, and fields. Level: Undergraduate-Graduate	4 Credits
	M 432 - Abstract Algebra II Offered spring. Prereq., M 431. Continues the investigation of groups, rings, and fields begun in M 431. Further topics include vector spaces and field extensions. Level: Undergraduate-Graduate	4 Credits
	M 439 - Euclidean & Non-Euclidean Geo Offered autumn. Prereq., M 307. Euclidean geometry from a rigorous, axiomatic viewpoint and Non–Euclidean geometries chosen from Lobachevskian, projective, finite and Riemannian. Level: Undergraduate-Graduate	3 Credits
	M 440 - Numerical Analysis Offered intermittently. Prereq., 311, one computer language. Error analysis; approximation and interpolation, numerical solution of linear and non-linear equations, numerical integration of ordinary and partial differential equations. Level: Undergraduate-Graduate	4 Credits
	M 445 - Stat/Math/Comp Modeling Offered autumn odd-numbered years. Prereq., consent of instr. An interdisciplinary course on the integration of statistical and dynamical models with applications to biological problems. Linear and nonlinear models, estimation, systems of ordinary differential equations, numerical integration, bootstrapping, MCMC methods. Intended both for students in mathematics and the natural sciences. Level: Undergraduate-Graduate	4 Credits
	M 461 - Practical Big Data Analytics Offered autumn. Prereq., STAT 341, and one of M 221 or M 273, or consent of instructor. This is a methods course supporting the Big Data Certificate Program. The course provides the students with the essential tools for the analysis of big data. The content consists of map reduce and canonical information methods for analyzing massively large data sets, windowing methods for the analysis of streaming data, an introduction to predictive analytics, and an introduction to data visualization methods. Level: Undergraduate-Graduate	3 Credits
	M 462 - Theoretical Big Data Analytics Offered spring. Prereq., M 221 and two other Mathematics / Statistics classes at the 200-level or above, or consent of instr. The main goal of this course is to provide students with a unique opportunity to acquire conceptual knowledge and theoretical background behind mathematical tools applicable to Big Data Analytics and Real Time Computations. Specific challenges of Big Data Analytics, e.g., problems of extracting, unifying, updating, and merging information, and processing of highly parallel and distributed data, will be reviewed. The tools for Big Data Analytics, such as regression analysis, linear estimation, calibration problems, real time processing of incoming (potentially infinite) data, will be studied in more detail. It will be shown how these approaches can be transformed to conform to the Big Data demands. Level: Undergraduate-Graduate	3 Credits

	M 472 - Intro to Complex Analysis Offered spring. Prereq., M 273, M 307. Analytic functions, complex integration, singularities and application to contour integration, harmonic functions, spaces of analytic functions. Level: Undergraduate-Graduate	4 Credits
	M 473 - Introduction to Real Analysis Offered autumn odd-numbered years. Prereq., M 273, M 307. Theory of metric spaces and point set topology, Riemann-Stieltjes integral, sequences and series of functions. Stone-Weierstrass theorem, theorem of Arzela-Ascoli, introduction to Lebesgue integration. Level: Undergraduate-Graduate	4 Credits
	M 485 - Graph Theory Offered autumn. Prereq., M 325, or M 307 and M 361, or consent of instr. Theory and applications of graphs. Topics chosen from trees, matchings, connectivity, coloring, planarity, Ramsey theory, random graphs, combinatorial designs and matroid theory. Level: Undergraduate-Graduate	3 Credits
	STAT 341 - Intro to Probability and Stat Offered autumn and spring. Prereq., one of M 162, 172 or 182. Probability, probability models and simulation, random variables, density functions, special distributions, and a brief survey of estimation and hypothesis testing. Computer use integrated throughout.	3 Credits
	STAT 421 - Probability Theory Offered autumn. Prereq., M 273 or consent of instructor (STAT 341 recommended). An introduction to probability, random variables and their probability distributions, estimation and hypothesis testing. This course is the foundation on which more advanced statistics courses build. Level: Undergraduate-Graduate	3 Credits
	STAT 422 - Mathematical Statistics Offered spring. Prereq., STAT 421. Continuation of 421. Level: Undergraduate-Graduate	3 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		21 or more Total Credits Required

Upper-Division Elective Computer Labs

Rule: Computer labs from the following list are optional; if taken, they count toward the total number of credits required for the Upper-Division Mathematics Requirement.

	Course	**Credits**
	M 317 - ODE Computer Lab Offered autumn. Coreq., M 311 or consent of instr. Intended primarily for student in M 311.	1 Credits

	M 363 - Linear Optimization Lab Offered autumn. Coreq., M 362. Introduction to linear optimization software.	1 Credits
	M 418 - PDE Computer Lab Offered spring. Coreq., M 412 or consent of instr. Intended primarily for students in M 412. Level: Undergraduate-Graduate	1 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits
	STAT 458 - Computer Data Analysis II Offered spring. Coreq., STAT 452 or consent of instr. Continuation of STAT 457. Intended primarily for students in STAT 452. Level: Undergraduate-Graduate	1 Credits
Minimum Required Grade: C-		0-5 Total Credits Required

Science Requirement

Rule: Take 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO*), chemistry (CHMY), computer science (CSCI, except CSCI TR*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

Note: (1) Students completing a minor (in another subject) or a second major are exempt from this requirement. (2) Transfer courses listed on the transcript as "CSCI TR*" may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

Minimum Required Grade: C-

18 Total Credits Required

Advanced College Writing Requirement

Rule: Take 1 of the following 2 courses, or any other approved Advanced College Writing course.

	Course	**Credits**
	M 429 - History of Mathematics Offered spring. Prereq., M307. Historical study of the development of mathematics from the Egyptian and Babylonian eras to the 20th century. Level: Undergraduate-Graduate	3 Credits
	M 499 - Senior Thesis (R–12) Offered autumn and spring. Prereq., consent of instr. Senior thesis for mathematics majors and/or Watkins Scholars.	1 To 12 Credits
Minimum Required Grade: C-		3 Total Credits Required

GPA Requirement

Note: (1) A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
(2) In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

Foreign Language/Computer Science Requirement

Rule: Either complete the General Education Requirement Group III: Modern and Classical Language (not the symbolic systems exception),or take one course from the following list.

Note: Students completing a second major are exempt from this requirement.

	Course	Credits
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 135 - Fund of Computer Science I Offered autumn and spring. Prereq., computer programming experience in a language such as BASIC, Pascal, C, etc. Fundamental computer science concepts using the high level structured programming language, Java.	3 Credits
	CSCI 136 - Fund of Computer Science II Offered autumn and spring. Prereq., CSCI 135; coreq., M 115 or M 151 or consent of instr. Continuation of CSCI 135. Survey of computer science topics including recursion, algorithms, basic data structures, operating systems, artificial intelligence, graphics, user interfaces, and social and ethical implications of computing.	3 Credits
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Liberal Studies

Ruth Vanita, Director

The Liberal Studies & Humanities Program provides an education in the international and interdisciplinary humanities. Students are able to develop their individual interests through electives, options and minors. The Program offers its majors options in:

- Humanities
- Asian Studies
- Religious Studies
- Women's, Gender and Sexuality Studies

The Program offers a minor in Liberal Studies and a minor in South & South-East Asian Studies (the area comprising India and its immediate neighbors, and the Vietnam-Thailand-Indonesia region).

Liberal Studies majors choose courses from different departments, focusing on literary, philosophical and religious works from different parts of the globe. Liberal Studies offers innovative multidisciplinary courses that incorporate the tools of such disciplines as literary studies, history, philosophy, religious studies, gender studies and art history. We aim to help students develop the ability to read with comprehension, write correctly, form

logical arguments based on evidence, and gain understanding of historical, literary, philosophical and religious contexts. These are skills prized by employers. Students who graduate from the program will be prepared to enter various fields in the private and public sectors, pursue further professional or academic training, and will be better prepared to function as global citizens.

Majors in Liberal Studies may not take any course work presented for the major for CR/NCR. Upper–level students transferring into this program should have at least a C average in all credits attempted. The upper-division writing expectation must be met by successfully completing an upper-division writing course from the approved list in the General University Requirements section of this catalog (such as LSH 484).

Department Faculty

Professors

Paul Dietrich, Professor of Religious Studies and Liberal Studies
Ruth Vanita, Professor

Associate Professors

Bradley Clough, Associate Professor, Global Humanities and Religions
Nathaniel Levtow, Director, Humanities Institute; Associate Professor (Global Humanities and Religions)

Adjunct Faculty

Beth Hubble, Adjunct Assistant Professor of Women''s Studies

Lecturers

Mark Hanson, Lecturer of Global Humanities & Religions

Liberal Studies

Back to Top

- LS 202X - Introduction to India
  Credits: 3. Offered alternate years. Same as SSEA 202X This course introduces students to the history, economy, political and legal system, society, culture, religions, and literary and artistic traditions of India, the world's largest secular democracy and the birthplace of four major world religions. Course Attributes: Cultural Intl Diversity (X)
- LS 234X - Hindu Religious Traditions
  Credits: 3. Offered spring even-numbered years. Same as AS and LS 365. Critical exploration of selected aspects of Hindu thought, narrative and practice, both in contemporary and historical perspective. Focus primarily on India, but with consideration of Hinduism's transformation and impact beyond South Asia. Course Attributes: Cultural Intl Diversity (X)
- LS 311 - Chinese Folktales
  Credits: 3. Offered intermittently. Same as MCLG 380. The study of the aspirations, desires, loves, fears, moral and aesthetic values of the Chinese people as expressed in their folk literature.

Liberal Studies & Humanities

Back to Top

- LSH 102H - Intro to South & S East Asia
  Credits: 3. Offered intermittently. Same as ANTY 102H/SSEA 102H. An introduction to South and Southeast Asian regions, cultures, societies, and histories, with particular emphasis on artistic, religious and literary traditions from prehistory to the present. An overview approach with different materials and emphases. Course Attributes: Hist & Cultural Studies (H)
  Cultural Intl Diversity (X)
- LSH 151L - Humanities:Greeks,Bible,Roman

Credits: 0 TO 4. Offered autumn. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, comparing and contrasting the Greco–Roman with the Jewish and Christian traditions. Course Attributes: Lit & Artistic Studies (L) Writing Course-Intermediate

- LSH 152L - Humanities: Medieval to Modern

  Credits: 0 TO 4. Offered spring. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, in the modern period. Course Attributes: Lit & Artistic Studies (L) Writing Course-Intermediate

- LSH 161H - Asian Humanities

  Credits: 3. Offered autumn. Coreq., LS 151L or consent of instr. Selective survey of classical South and East Asian perspectives on the humanities. Hinduism, Confucianism, Taoism and Buddhism are the primary traditions considered. Course Attributes: Hist & Cultural Studies (H)

- LSH 191 - Special Topics

  Credits: 1 TO 9. (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- LSH 291 - Special Topics

  Credits: 1 TO 9. (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.

- LSH 292 - Independent Study

  Credits: 1 TO 9. (R–9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.

- LSH 294 - Seminar/Workshop

  Credits: 1 TO 6. (R–6) Offered intermittently. A review and discussion of current research. Topics vary.

- LSH 326 - Stories East and West

  Credits: 3. Offered intermittently. A course in Comparative Literature, examining similar genres (creation stories, fables, novels, short stories) in literature from Europe, America and India.

- LSH 327L - Gender & Sexuality in Eng Fict

  Credits: 3. Offered alternate years. Major 20th century novels and short stories written in English by both men and women in different parts of the world, and how these texts explore changing concepts of gender and sexuality. Topics include heterosexuality, homosexuality, bisexuality, transformations, chastity, adultery, ageing, violence, growing up, adolescence and varying definitions of love. Course Attributes: Lit & Artistic Studies (L)

- LSH 328 - Love in Bombay Cinema

  Credits: 3. Offered intermittently. Examines the representation of romantic love in Bombay cinema, in the context of the representation of many types of love, familial, friendly and devotional.

- LSH 329 - Fathers & Daughters in Lit

  Credits: 3. Prereq., WRIT 101. Examines how relationships between fathers and daughters have been represented, celebrated and critiqued in literature in the Western world, from antiquity to the present. Includes discussion of changing patriarchal formations, symbolic and adoptive fatherhood, incestuous rape, homosexuality and role reversals. Texts include Greek tragedy, Shakespeare, romantic poetry, novel, and graphic novel. Both male and female authors.

- LSH 342 - Topics Comparative Lit & Rel

  Credits: 3. Offered every second semester. Same as SSEA 342. These courses compare major traditions, texts and trends in two or more world civilizations or cultures. Works of literature and/or philosophy are examined in their historical contexts, and in relation to each other.

- LSH 351L - Exploring the Humanities

  Credits: 3. (R–9) Offered intermittently. Intensive study of a specific historical period in Western humanities through its seminal literature, with an emphasis on intellectual and ethical paradigms. Course Attributes: Literary & Artistic Stds Crse

- LSH 368 - Shakespeare: Comedy & Tragedy

Credits: 3. Offered yearly. An investigation of the differences, but also affinities, between the two fundamental Shakespearean genres.

- LSH 389E - Placebos: The Power of Words
  Credits: 3. Situated at the crossroads of medicine and the humanities, this course looks into the changing reputation of the placebo effect, with special attention to the power of words to induce therapeutic—or counter-therapeutic—effects. Course Attributes:
  Ethical & Human Values Course
- LSH 390 - Undergraduate Research
  Credits: 1 TO 6. (R–6) Offered intermittently. Directed individual research and study appropriate to the back ground and objectives of the student. Course Attributes: Research & Creative Schlrshp
- LSH 391 - Special Topics
  Credits: 1 TO 9. (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.
- LSH 392 - Independent Study
  Credits: 1 TO 12. (R–12) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.
- LSH 398 - Coop Education/Internship
  Credits: 1 TO 6. Offered intermittently. Prereq., consent of director. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums
- LSH 415 - Same Sex Unions Literature
  Credits: 3. Offered intermittently. Examines the literary representation of same-sex unions in European and Indian literary traditions.
- LSH 416 - The Bhagavad Gita
  Credits: 3. Offered every year or alternate year. Close reading of the Hindi Scripture, Bhagavad Gita in translation, examining its literary, philosophical, ethical and religious dimensions, its influence on Western and Indian literatures, and the way Indian and Western commentators have interpreted and used it.
- LSH 484 - Novel Ancient and Modern
  Credits: 3. Offered yearly. Two antithetical models for the construction of a novel. Course Attributes: Writing Course-Advanced
- LSH 490 - Undergraduate Research
  Credits: 1 TO 6. (R–6) Offered intermittently. Directed individual research and study appropriate to the background and objectives of the student. Course Attributes: Research & Creative Schlrshp
- LSH 491 - Special Topics
  Credits: 1 TO 9. (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.
- LSH 492 - Independent Study
  Credits: 1 TO 9. (R–9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.
- LSH 494 - Seminar/Workshop
  Credits: 3. (R–9) Offered intermittently. Concentrated studies in specific genres and periods.
- LSH 498 - Coop Education/Internship
  Credits: 1 TO 6. Offered intermittently. Prereq., consent of director. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

Religious Studies

Back to Top

- RLST 104 - Introduction to the Bible

  Credits: 3. This course offers an introduction to the modern study of the Bible, including both the Hebrew Bible (Old Testament) and the New Testament. It assumes no prior knowledge of religion, the Bible, Judaism or Christianity. The goal of the course is to understand the Bible's literary structures and themes and its ancient historical contexts. It will approach the Bible from comparative, historical, literary, anthropological and archeological perspectives to illuminate the world of its authors.

- RLST 191 - Special Topics

  Credits: 1 TO 9. (R-9) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- RLST 198 - Internship

  Credits: 1 TO 6. (R-6) Prereq., consent of faculty supervisor and the Internship Services office. Extended classroom experience which provides practical application of classroom learning during placements off campus. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- RLST 204H - Intro to the Hebrew Bible

  Credits: 3. An introduction to the history, religion, and literature of ancient Israel and to modern methods in Hebrew Bible (Old Testament) studies. Includes an introduction to the history and religions of ancient West Asia. Course Attributes: Hist & Cultural Studies (H)

- RLST 205 - Introduction to New Testament

  Credits: 3. An introduction to the history, religion, and literature of earliest Christianity and to modern methods in New Testament studies. Includes an introduction to the history and religions of the ancient Mediteranean.

- RLST 221 - Judaism

  Credits: 3. An introduction to Judaism as a religion and to the history of Jewish peoples (in Asia, Africa, Europe, and the Americas) from antiquity to modernity.

- RLST 225 - Christianity

  Credits: 3. Introduction to the historical development of Christian thought and practice in the cultures of late antiquity and the medieval and modern periods.

- RLST 232H - Buddhism

  Credits: 3. A historical introduction to the development of Buddhist thought and practice in the cultures of Asia and the West. Course Attributes: Hist & Cultural Studies (H)
  Cultural Intl Diversity (X)

- RLST 234X - Hindu Religious Traditions

  Credits: 3. Same as SSEA and LS 365. Critical exploration of selected aspects of Hindu thought, narrative and practice, both in contemporary and historical perspective. Focus primarily on India, but with consideration of Hinduism's transformation and impact beyond South Asia. Course Attributes: Cultural Intl Diversity (X)

- RLST 236 - Chinese Religions

  Credits: 3. An exploration of the development of thought and practice in and the interactions between the major religious movements of Chinese religion: Confucianism, Taoism, Buddhism, and folk religion/animism. Course Attributes: Cultural Intl Diversity (X)

- RLST 281E - Comparative Ethics

  Credits: 3. An examination of central theological teachings and modes of ethical reasoning of major religious traditions with models from the East and West. Course Attributes:
  Ethical & Human Values Course

- RLST 291 - Special Topics

  Credits: 1 TO 9. (R-9) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- RLST 292 - Independent Study

  Credits: 1 TO 6. (R-6) Course material appropriate to the needs and objectives of the individual student.

- RLST 300 - Theory & Method Study of Relig

  Credits: 3. A survey of modern theories and methods in the study of religion. Overview of sociological, anthropological, psychological, phenomenological, comparative, cognitive, and other approaches to the question, What is religion?

- RLST 310 - Topics in Biblical Studies

  Credits: 3. (R-6) Selected topics in modern Hebrew Bible (Old Testament) and New Testament studies. Focus on history, literature, and religions of ancient West Asia, the Mediterranean and North Africa. Topics vary from year to year and include: Israelite religion; prophets and prophecy; biblical history and historiography; ancient Gospels; the letters and communities of Paul; early biblical interpretation; archaeology and iconography of ancient religions; religion and politics in the Bible.

- RLST 320 - Anct Judaism & Early Christnty

  Credits: 3. (R6) Survey of the history and literature of ancient Judaism and early Christianity. Topics include: the emergence of Judaism and Christianity in the Persian, Greek, and Roman empires; religions of ancient West Asia and the Mediterranean; stories of Jewish and Christian origins; the historical Jesus; the early rabbinic movement; the Dead Sea Scrolls; Paul between Judaism and Christianity.

- RLST 335 - Western Religious Thought I

  Credits: 3. Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the ancient and medieval periods.

- RLST 336 - Western Religious Thought II

  Credits: 3. Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the late medieval and early modern periods.

- RLST 353 - Topics in South Asia Religions

  Credits: 3. (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Hinduism, Islam, Buddhism, Jainism, Sikhism) of South Asia.

- RLST 354 - Topics in East Asia Religions

  Credits: 3. (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Confucianism, Taoism, Buddhism, and folk animism and shamanism) of East Asia.

- RLST 366 - Tibetan Civilization

  Credits: 3. An exploration of the history and culture of a unique civilization that has influenced greatly the cultures of Himalayan, East, and South Asia. Special attention will be given to Tibetan religions, but these will be explored within the context of the society's political, social, economic, and other cultural developments.

- RLST 368 - Contemporary Buddhism S/SEAsia

  Credits: 3. As with other major religions, modernity and globalization have presented profound challenges to Buddhist traditions. In this course we will explore various contemporary issues that have affected Theravada Buddhist societies--colonial and post-colonial revivalism, religious nationalism, women's rights and social reform--as case studies in some of the major ways in which religions have confronted modernity.

- RLST 369 - Contemplative Tradtions Asia

  Credits: 3. An exploration of the rich and diverse approaches to mental transformation and cultivation of gnosis as developed by several of Asia's major religious traditions, such as Buddhism, Jainism, Hinduism, Taoism, and Confucianism.

- RLST 370 - Mysticism

  Credits: 3. (R-6) An inquiry into the literature and interpretation of mysticism in the major religious traditions. Each offering will focus on a specific tradition or period.

- RLST 376 - Contemporary Religious Thought

  Credits: 3. (R-6) Study of selected major critical and constructive proposals in modern religious thought in various traditions.

- RLST 391 - Special Topics

Credits: 1 TO 12. (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- RLST 392 - Independent Study
  Credits: 1 TO 6. (R-6) Course material appropriate to the needs and objectives of the individual student.
- RLST 491 - Special Topics
  Credits: 1 TO 12. (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- RLST 492 - Independent Study
  Credits: 1 TO 9. (R-9) Prereq., consent of instr. Work on selected problems by individual students under direct faculty supervision.

Liberal Studies B.A.

Bachelor of Arts - Liberal Studies; General Liberal Studies Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 42

Required Cumulative GPA: 2.0

Note: Advising closely with the Humanities Advisor and your assigned Liberal Studies advisor is imperative in Liberal Studies. There are substitutions that can occur in this program of study which need to be approved and documented with your faculty advisor.

General Humanities Lower Division Core

Rule: 18-20 credits

Minimum Required Grade: C-

18-20 Total Credits Required

Humanities

Rule: Take both of the following courses. (6-8 credits).

Note: Prerequisite or co-requisite: WRIT 101 or equivalent.
These courses are recommended to be taken early in the curriculum as they are foundational. LSH 152L can be taken prior to LSH 151L.

General Education fulfillment through the lower-division core: Both courses fulfill the "approved writing course" and "Literary & Artistic Studies".

	Course	Credits
	LSH 151L - IntrHumanities:Greek,Bible,Rom Offered autumn. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, comparing and contrasting the Greco–Roman with the Jewish and Christian traditions.	0 To 4 Credits
	LSH 152L - Humanities Medieval to Modern Offered spring. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, in the modern period.	0 To 4 Credits

Minimum Required Grade: C-	8 Total Credits Required

Literary Studies - European or American Literature

Rule: Take one approved 3 credit course.

Note: Please consult with an advisor in Liberal Studies on other course possibilities for this requirement.

	Course	Credits
	LIT 210L - American Lit I Offered every term. Representative texts from the pre-colonial period through the Civil War.	3 Credits
	LIT 211L - American Lit II Offered every term. Representative texts from the Civil War to the present.	3 Credits
	LIT 220L - Brit Lit: Med to Renaissance Offered every term. Representative texts from the Anglo-Saxon period through the Renaissance.	3 Credits
	LIT 221L - Brit Lit: Enlightenment to Rom Offered every term. Representative texts from the seventeenth through the eighteenth century.	3 Credits
	LIT 222L - Brit Lit: Victorian to Contemp Offered every term. Representative texts from the early nineteenth century to the present.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Historical Studies - European or American History

Rule: Take one approved course that is at least 3 credits.

Note: Please consult with an advisor in Liberal Studies on other course possibilities for this requirement.

	Course	Credits
	HSTA 101H - American History I (AM) Offered autumn. A comprehensive introductory history of Colonial, Revolutionary and 19th century America, to 1877. Lecture-discussion. Credit not allowed for both 101H and 103H.	4 Credits
	HSTA 102H - American History II (AM) Offered spring. A comprehensive introductory history of the U.S. since 1877. Lecture-discussion. Credit not allowed for both HSTA 102H and 104H.	4 Credits
	HSTA 103H - Honors American History I (AM) Offered autumn. Enrollment by consent of instructor. A comprehensive introductory history of Colonial, Revolutionary, and 19th century America, to 1877. Lecture-honors discussion. Credit not allowed for both 103H and 101H.	4 Credits

	HSTA 104H - Honors American History II (AM) Offered spring. Enrollment by consent of instructor. A comprehensive introductory history of the U. S. since 1877. Lecture-honors discussion. Credit not allowed for both HSTA 102H and 104H.	4 Credits
	HSTA 141H - Intro to AfAm Studies (AM) Offered autumn. Same as AAS 141H. This course introduces students to the primary questions, themes, and approaches to African-American Studies. In addition to examining key historical periods such as Reconstruction, the Harlem Renaissance, and the Civil Rights era, students will encounter Hip-Hop, African-American film, African-American religion, and contemporary identity politics. This course concludes by discussing the reasons for and new directions in African-American studies, including diaspora studies, Pan-Africanism, and post-colonial studies. Overall students will gain new insight into the social, cultural, political, and intellectual, experiences of a diverse people and into the history and contemporary experience of the United States.	3 Credits

History

Rule: One course (3 credits) of approved coursework.

	Course	**Credits**
	HSTA 311 - Early America (AM) Emphasis changes from year to year. Can touch upon the political economy of Puritanism, through gender and family to the preconditions for the American Revolution.	3 Credits

	HSTA 314 - Nature, Knowledge & Empire (AM) Offered alternate years. This course examines the entangled processes of human and environmental change in America and the Atlantic world from prehistoric times through the nineteenth century. We will examine the ways Native Americans and Europeans interacted with land and sea and the social and ecological repercussions that ensued. We will also look at the ways Atlantic world systems of exchange, including the movement of animals, disease, commodities, manufactured goods, and slaves effected environmental change. Finally, we will also explore the ways Renaissance and Enlightenment thought shaped the ways people understood the natural world and how that radically changed with industrialization and the shift to Romanticism.	3 Credits
	HSTA 315 - Early American Republic (AM) Democracy, nationalism and sectionalism, the War of 1812, the second party system, social order and disorder, the capitalist revolution.	3 Credits
	HSTA 316 - American Civil War Era (AM) Civil War and Reconstruction; the triumph of the industrialist and capitalist ethic.	3 Credits
	HSTA 320 - Birth of Modern US (AM) The history of the U.S. from 1877 to 1920 is largely the story of Americans responding to profound social, cultural and economic change. In an effort to bring order to their changing world, Americans created new institutions, retooled their ideologies, and improved the nation's infrastructure. The order they created is, in modified form, still with us today. Students will explore the myriad changes that transformed the United States during this period and study the social, political, and cultural struggles that shaped the emergence of Modern America.	3 Credits
	HSTA 321 - America in Crisis (AM) This era in U.S. history was marked by a series of crises: the contested transition to modernity during the 1920s, the Great Depression, and World War II and its aftermath. This course will explore how Americans responded to these crises, why they responded to them the way they did, and how their responses altered the society in which they lived.	3 Credits
	HSTA 322 - American History: WWII to Pres (AM) The Cold War and its consequences, the civil rights revolution, affluence and anxiety, counter-culture, political radicalism, feminism, the Nixon years, Watergate and after.	3 Credits
	HSTA 323 - U.S. in the 1950s (AM) Examines the political, social, cultural, intellectual developments of America in the 1950s. Particular emphasis is placed on cultural history.	3 Credits

	HSTA 324 - U.S. in the 1960s (AM) Examines the political, social, cultural, intellectual developments of America in the 1960s. Topics include the Great Society, political radicalism, the counter culture, black radicalism, and Vietnam.	3 Credits
	HSTA 327 - Atlantic World Slavery (AM) Offered alternate years. This course will examine the development and demise of slavery in the early modern Atlantic world, from the late fifteenth to the late nineteenth centuries. Specifically, we will explore the ways the transatlantic slave trade forged economic and cultural connections between Europe, Africa, and the Americas, thereby causing immeasurable suffering while conditioning conceptions of race, reshaping politics and religion, and transforming the ecology of nearly a third of the globe.	3 Credits
	HSTA 333 - Key Events in American Militar (R-6) (AM) The French and Indian Wars to Vietnam and beyond; chronological and topical accounts.	3 Credits
	HSTA 335 - Movie America (AM) This course examines major topics and themes in United States history from the early twentieth century to the present using movies as primary sources.	3 Credits
	HSTA 342H - Afr Amer Hist to 1865 (AM) Offered intermittently. Same as AAS 342H. Survey of the African American experience from the African background to the end of the Civil War. Focus on Black American quest for the American Dream, and how Blacks attempted to deal with the challenges of enslavement and racism.	3 Credits
	HSTA 343H - Afr Amer Hist Since 1865 (AM) Same as AAS 343H. Study of the African American experience since the Civil War. Change and continuity in the African American experience, the fight against Jim Crow, the struggle for civil rights, and post-civil rights economic, political, social and cultural developments and challenges.	3 Credits
	HSTA 347 - Voodoo, Muslim, Church (AM) The African American religious experience encompasses Islam, Christianity, Santeria, voodoo, and many others. In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course question, "How did religion shape the experience of the African-American community?" Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history. Same as AAS 347.	3 Credits

	HSTA 354X - Ind MT Since Reserv Era (AM) Offered autumn odd-numbered years. Same as ANTH 324X and NAS 324X. Examination of the history of Montana Indians since the establishment of the reservations, contemporary conditions, and issues among both reservation and non-reservation Indian communities in the state. Special attention given to social and economic conditions, treaty rights, tribal sovereignty, and legal issues.	3 Credits
	HSTA 358 - Images of the Amer West (AM) Offered even-numbered years. The roles that artists, artistic works and illustrations, and symbolic images have played in the history of the American West.	3 Credits
	HSTA 361 - The American South (AM) Social history of the American South with particular attention to race, class, and gender.	3 Credits
	HSTA 370H - Wmn Amer Colonial to Civil War Offered autumn. Interpretive overview of major themes and events in U.S. womens history to 1865. Same as WGS 370H.	3 Credits
	HSTA 371H - Wmn Amer Civil War to Present Offered spring. Interpretive overview of major themes and events in U.S. women's history from 1865 to the present. Same as WGS 371.	3 Credits
	HSTA 372 - The American Revolution (AM) Delving into the history of the early modern Atlantic world, this course examines the transnational ramifications of the American Revolution. Specifically, it examines the Revolution's economic and ideological origins, European involvement in the Revolutionary War, as well as the Revolution's impact on African American slavery and the slave trade. We will also consider its implications for Haitian and Latin American independence. And finally, we will discuss the creation of the U.S. Constitution, America's struggle for political sovereignty, and the Revolution's impact on Native Americans, women and families, and conceptions of American identity during the Early National period.	3 Credits
	HSTA 380 - AmericanConstitutional History (AM) An examination of major issues in the American constitutional past. Topics include the creation of the U.S. Constitution and the problem of ?original intent,? courts and judicial review, slavery and anti-slavery, the bill o frights, industrial capitalism and the welfare state, and majority rule and minority rights in American democracy.	3 Credits
	HSTA 382H - History of American Law (AM) Issues in the social history of law from the colonial period to the present.	3 Credits
	HSTA 385 - Families & Children in America (AM) Historical overview of families and children in the United States from the colonial era to the present. Topics include changing patterns of family life, the evolution of attitudes toward children and youth, the relationship between the American family and the nation-state, and debates over "family values" from the nation's founding to the present.	3 Credits

	HSTA 391 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	HSTA 415 - The Black Radical Tradition Offered intermittently. Same as HSTA 415. Prereq., HSTR 200 and only open to majors and minors in history or consent of instructor. From slave revolts through to the Move rebellion in Philadelphia, this course examines how the African-American community has engaged in radical efforts to change the status quo in the name of seeking justice.	3 Credits
	HSTA 417 - Prayer & Civil Rights (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how religion spilled out of sanctuaries into the streets during the civil rights era.	3 Credits
	HSTA 420 - America Divided, 1848-1865 (AM) Offered intermittently. Same as AAS 420. This course explores the period in American history from the close of the Mexican War through the conclusion of the Civil War. Topics include slavery and sectionalism; race and racism; immigration and ethno-religious conflict; military mobilization and wartime dissent; the meaning of freedom in the age of emancipation. This course is intended to hone skills fundamental to the historical discipline: the critical analysis of primary sources; independent primary research and historical writing; engagement with and assessment of historical scholarship; the construction of a historiographical essay. Upper division writing course for the history major.	3 Credits
	HSTA 422 - Research: U.S. After WWII (AM) Prereq. HSTR 200. Enrollment for history majors and minors , graduate students in history, or by consent of the instructor. This course offers students an opportunity to do original research and produce an article-length research paper on a topic in post-war American history. It meets the department's requirement of an upper-level research seminar as well as the upper-division writing expectation in the major.	3 Credits

	HSTA 455 - Indian, Bison, & Horse (AM) Offered autumn odd-numbered years. Historical interaction between Native American societies, horses and bison in North America. A writing intensive course. Upper division writing course for the history major.	3 Credits
	HSTA 461 - Research in Montana History (AM) Prereq. HSTR 200. Enrollment for history majors and minors, graduate students in history, or by consent of the instructor. This course is a research and writing seminar in Montana history. Students will learn advanced research methodology in history and will be exposed to a variety of databases and source collections in Montana history that are available locally and online. Students will research and write a primary-source based paper on a topic in Montana history. This course fulfills the upper-division writing requirement for the history department and the university.	3 Credits
	HSTA 462 - Regionalism & Rocky Mtn West (AM) Offered spring odd-numbered years. Same as GEOG 401. Investigation of regionalism as a concept and its future in the Rocky Mountain West. Regionalism as a geographical, economic, political and cultural entity. An intensive writing class.	3 Credits
	HSTA 469 - Atlantic America Research (AM) Offered intermittently. Prereq. HSTR 200. Enrollment for history majors and minors, graduate students in history, or by consent of the instructor. This seminar is designed to teach advanced undergraduate and graduate students the fundamentals of original research in the fields of early American and Atlantic world history. Every student will pursue an original research project, based on primary materials, and focused chronologically within the period of early contact to the U.S. Civil War. You will read texts that will serve as models of historical writing and others that will help you develop your skills as a researcher, writer, and editor. We will hone our writing skills through drafting and discussion. Consent of instructor required.	3 Credits
	HSTA 471 - Writing Women's Lives (AM) Prereq. HSTR 200. Enrollment for history majors and minors, graduate students in history, or by consent of the instructor. Consent of instructor required. Upper-division writing-intensive seminar in women's history. Students will write an original research paper based on primary source materials.	3 Credits
	HSTA 491 - Special topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.	1 To 12 Credits
	HSTA 494 - Seminar (R-6) Consent of instructor.	1 To 6 Credits
	HSTR 302 - Ancient Greece (EU) Offered intermittently. Same as MCLG 301H. Greek history from the earliest times through the Macedonian ascendancy, based on the writings of the Greek historians. Cannot receive credit for both HSTR 302 and MCLG 301H.	3 Credits

	HSTR 306 - Medieval World: Barbarian West (EU) Offered intermittently. The collapse of Roman authority, the establishment of the Germanic kingdoms, Christianity and the Roman church.	3 Credits
	HSTR 306H - Medieval World: Barbarian West (EU) Offered autumn. The collapse of Roman authority, the establishment of the Germanic kingdoms, Christianity and the Roman church.	3 Credits
	HSTR 307H - Medieval World: High Middle Ag (EU) Offered spring. The Christian world in the West to the decline of the papacy, a hundred years of war, the Black Death.	3 Credits

In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course is the question, "How did religion shape the experience of the African-American community?" Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history.	3 Credits
	AAS 372 - African American Identity Offered autumn. Interdisciplinary course designed to explore and illuminate the multifaceted nature and development of African-American group and individual identity.	3 Credits
	AAS 395 - Special Topics (R-9) Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.	1 To 9 Credits
	AAS 396 - Independent Study (R-9) Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	AAS 415 - The Black Radical Tradition Offered intermittently. Same as HSTA 415. Prereq., HSTR 200 and only open to majors and minors in history or consent of instructor. From slave revolts through to the Move rebellion in Philadelphia, this course examines how the African-American community has engaged in radical efforts to change the status quo in the name of seeking justice.	3 Credits

	AAS 417 - Prayer & Civil Rights (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how religion spilled out of sanctuaries into the streets during the civil rights era.	3 Credits
	AAS 420 - America Divided, 1848-1865 Offered intermittently. Same as HSTA 420. This course explores the period in American history from the close of the Mexican War through the conclusion of the Civil War. Topics include slavery and sectionalism; race and racism; immigration and ethno-religious conflict; military mobilization and wartime dissent; the meaning of freedom in the age of emancipation. This course is intended to hone skills fundamental to the historical discipline: the critical analysis of primary sources; independent primary research and historical writing; engagement with and assessment of historical scholarship; the construction of a historiographical essay.	3 Credits
	AAS 495 - Special Topics (R-9) Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one time offerings of current topics.	1 To 9 Credits
	AAS 496 - Independent Study (R-9) Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	ANTY 427 - Anthropology of Gender Offered spring. Comparative study of the history and significance of gender in social life.	3 Credits

	WGSS 391 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	WGSS 392 - Independent Study (R-12) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 12 Credits
	WGSS 398 - Coop Education/Internship R-6) Offered intermittently. Prereq., consent of director. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
	WGSS 463 - WGS Capstone Offered spring. Capstone course for the Women's and Gender Studies majors and minors.	2 Credits
	WGSS 490 - Undergraduate Research (R-6) Offered intermittently. Directed individual research and study appropriate to the back ground and objectives of the student.	1 To 6 Credits
	WGSS 490H - Research Offered intermittently. Prereq., ART 150H or 151H or consent of instr. A survey of major women artists in context of social history and aesthetics from ancient to modern times. Analysis of feminism and works by contemporary women artists in film and video.	3 Credits

	WGSS 491 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	WGSS 492 - Independent Study (R-9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
Minimum Required Grade: C-		3 Total Credits Required

Religious Studies

Rule: Two courses (6 credits) of approved coursework.

	Course	Credits
	AAS 347 - Voodoo, Muslim, Church Offered intermittently. Same as HSTA 347. The African-American religious experience encompasses Islam, Christianity, Santería, voodoo, and many others. In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course is the question, “How did religion shape the experience of the African-American community?” Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history.	3 Credits
	AAS 417 - Prayer & Civil Rights (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how religion spilled out of sanctuaries into the streets during the civil rights era.	3 Credits
	NASX 304E - Native American Beliefs/Philos Offered Autumn and Spring. A study of selected ethical systems; origins, world views; religious beliefs and the way they have been affected by western civilization.	3 Credits

	RLST 300 - Theory & Method Study of Relig A survey of modern theories and methods in the study of religion. Overview of sociological, anthropological, psychological, phenomenological, comparative, cognitive, and other approaches to the question, What is religion?	3 Credits
	RLST 310 - Topics in Biblical Studies (R-6) Selected topics in modern Hebrew Bible (Old Testament) and New Testament studies. Focus on history, literature, and religions of ancient West Asia, the Mediterranean and North Africa. Topics vary from year to year and include: Israelite religion; prophets and prophecy; biblical history and historiography; ancient Gospels; the letters and communities of Paul; early biblical interpretation; archaeology and iconography of ancient religions; religion and politics in the Bible.	3 Credits
	RLST 320 - Anct Judaism & Early Christnty (R6) Survey of the history and literature of ancient Judaism and early Christianity. Topics include: the emergence of Judaism and Christianity in the Persian, Greek, and Roman empires; religions of ancient West Asia and the Mediterranean; stories of Jewish and Christian origins; the historical Jesus; the early rabbinic movement; the Dead Sea Scrolls; Paul between Judaism and Christianity.	3 Credits
	RLST 335 - Western Religious Thought I Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the ancient and medieval periods.	3 Credits
	RLST 336 - Western Religious Thought II Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the late medieval and early modern periods.	3 Credits
	RLST 353 - Topics in South Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Hinduism, Islam, Buddhism, Jainism, Sikhism) of South Asia.	3 Credits
	RLST 354 - Topics in East Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Confucianism, Taoism, Buddhism, and folk animism and shamanism) of East Asia.	3 Credits
	RLST 360 - Classcs of Buddhist Literature (R-6) Close reading of a selection of core Buddhist texts drawn from various Asian cultures and spanning the three main phases of the tradition.	3 Credits
	RLST 366 - Tibetan Civilization An exploration of the history and culture of a unique civilization that has influenced greatly the cultures of Himalayan, East, and South Asia. Special attention will be given to Tibetan religions, but these will be explored within the context of the society's political, social, economic, and other cultural developments.	3 Credits

	RLST 367 - Approaches to Study Zen Bddhsm An exploration of both key developments in the history of Zen Buddhist thought and practice and the variety of ways that Zen has been studied by Western popular and academic cultures.	3 Credits
	RLST 368 - Contem Buddhism in S & SE Asia As with other major religions, modernity and globalization have presented profound challenges to Buddhist traditions. In this course we will explore various contemporary issues that have affected Theravada Buddhist societies--colonial and post-colonial revivalism, religious nationalism, women's rights and social reform--as case studies in some of the major ways in which religions have confronted modernity.	3 Credits
	RLST 369 - Contemplative Tradtions Asia An exploration of the rich and diverse approaches to mental transformation and cultivation of gnosis as developed by several of Asia's major religious traditions, such as Buddhism, Jainism, Hinduism, Taoism, and Confucianism.	3 Credits
	RLST 370 - Mysticism (R-6) An inquiry into the literature and interpretation of mysticism in the major religious traditions. Each offering will focus on a specific tradition or period.	3 Credits
	RLST 376 - Contemporary Religious Thought (R-6) Study of selected major critical and constructive proposals in modern religious thought in various traditions.	3 Credits
	RLST 391 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	RLST 392 - Independent Study (R-6) Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	RLST 491 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	RLST 492 - Independent Study (R-9) Prereq., consent of instr. Work on selected problems by individual students under direct faculty supervision.	1 To 9 Credits
Minimum Required Grade: C-		6 Total Credits Required

Liberal Studies

Rule: Two courses (6 credits) of approved coursework.

	Course	**Credits**

	LSH 326 - Stories East and West Offered intermittently. A course in Comparative Literature, examining similar genres (creation stories, fables, novels, short stories) in literature from Europe, America and India.	3 Credits
	LSH 327L - Gender & Sexuality in Eng Fict Offered alternate years. Major 20th century novels and short stories written in English by both men and women in different parts of the world, and how these texts explore changing concepts of gender and sexuality. Topics include heterosexuality, homosexuality, bisexuality, transformations, chastity, adultery, ageing, violence, growing up, adolescence and varying definitions of love.	3 Credits
	LSH 329 - Fathers & Daughters in Lit Prereq., WRIT 101. Examines how relationships between fathers and daughters have been represented, celebrated and critiqued in literature in the Western world, from antiquity to the present. Includes discussion of changing patriarchal formations, symbolic and adoptive fatherhood, incestuous rape, homosexuality and role reversals. Texts include Greek tragedy, Shakespeare, romantic poetry, novel, and graphic novel. Both male and female authors.	3 Credits
	LSH 342 - Topics Comparative Lit & Rel Offered every second semester. Same as SSEA 342. These courses compare major traditions, texts and trends in two or more world civilizations or cultures. Works of literature and/or philosophy are examined in their historical contexts, and in relation to each other.	3 Credits
	LSH 351L - Exploring the Humanities (R–9) Offered intermittently. Intensive study of a specific historical period in Western humanities through its seminal literature, with an emphasis on intellectual and ethical paradigms.	3 Credits
	LSH 368 - Shakespeare: Comedy & Tragedy Offered yearly. An investigation of the differences, but also affinities, between the two fundamental Shakespearean genres.	3 Credits
	LSH 390 - Undergraduate Research (R–6) Offered intermittently. Directed individual research and study appropriate to the back ground and objectives of the student.	1 To 6 Credits
	LSH 391 - Special Topics (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 9 Credits
	LSH 392 - Independent Study (R–12) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 12 Credits
	LSH 484 - Novel Ancient and Modern Offered yearly. Two antithetical models for the construction of a novel.	3 Credits
	LSH 490 - Undergraduate Research (R–6) Offered intermittently. Directed individual research and study appropriate to the background and objectives of the student.	1 To 6 Credits

	LSH 491 - Special Topics (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 9 Credits
	LSH 492 - Independent Study (R–9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
	LSH 494 - Seminar/Workshop (R–9) Offered intermittently. Concentrated studies in specific genres and periods.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Senior Liberal Studies Capstone Seminar

Rule: One course (3 credits) of approved coursework.

	Course	Credits
	LSH 327L - Gender & Sexuality in Eng Fict Offered alternate years. Major 20th century novels and short stories written in English by both men and women in different parts of the world, and how these texts explore changing concepts of gender and sexuality. Topics include heterosexuality, homosexuality, bisexuality, transformations, chastity, adultery, ageing, violence, growing up, adolescence and varying definitions of love.	3 Credits
	LSH 329 - Fathers & Daughters in Lit Prereq., WRIT 101. Examines how relationships between fathers and daughters have been represented, celebrated and critiqued in literature in the Western world, from antiquity to the present. 	LSH 494 - Seminar/Workshop (R–9) Offered intermittently. Concentrated studies in specific genres and periods.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Modern and Classical Language Requirement

Note: Students must demonstrate fourth semester proficiency in a second language either by completing four semesters (recommended to be subsequent) with a grade of C- or better, or by receiving an equivalent score on a competence exam.

Asian Studies Option, Professor Bradley Clough, Advisor:

The Asian Studies Option offers opportunities for those students who wish to focus on the diverse societies of the Asian continent through the study of literature, geography, history, peoples, religious and other cultural traditions, and languages.

Interested students must major in Liberal Studies with an option in Asian Studies. In addition to select Liberal Studies courses, students will choose from specified courses offered in many departments and areas in the College of Humanities and Sciences, such as History, Japanese Studies, Chinese Studies, Anthropology, Sociology, Geography, and Religious Studies.

Students who choose the Asian Studies option must meet with the Asian studies faculty advisor.

Bachelor of Arts - Liberal Studies; Asian Studies Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 41

Required Cumulative GPA: 2.0

Note: Two years (or equivalent proficiency) in an Asian language appropriate to the student's academic goals and approved by the academic advisor. Students who plan to pursue graduate work are strongly advised to complete three years, including at least one study abroad in Asia experience.

Asian Studies Option Lower Division Core

Rule: 20 credits.

Note: Please see academic advisor for questions regarding course availability or course substitutions.

Minimum Required Grade: C-

20 Total Credits Required

Introduction to the Humanities

Rule: Take both of the following courses (8 credits).

Note: WRIT 101 is a pre-requisite or co-requisite. General Education fulfillment: LSH 151L and 152L satisfy both the "approved writing course" and "Literary & Artistic Studies".

	Course	Credits
	LSH 151L - IntrHumanities:Greek,Bible,Rom Offered autumn. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, comparing and contrasting the Greco–Roman with the Jewish and Christian traditions.	0 To 4 Credits
	LSH 152L - Humanities Medieval to Modern Offered spring. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, in the modern period.	0 To 4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Introductory Asian Studies

Rule: Choose 1 of the following courses.

	Course	Credits
	LSH 102H - Intro to South & S East Asia Offered intermittently. Same as ANTY 102H/SSEA 102H. An introduction to South and Southeast Asian regions, cultures, societies, and histories, with particular emphasis on artistic, religious and literary traditions from prehistory to the present. An overview approach with different materials and emphases.	3 Credits
	LSH 161H - Asian Humanities Offered autumn. Coreq., LS 151L or consent of instr. Selective survey of classical South and East Asian perspectives on the humanities. Hinduism, Confucianism, Taoism and Buddhism are the primary traditions considered.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Asian Civilization Courses

Rule: Choose 2 of the following courses

	Course	Credits
	CHIN 211H - Chinese Culture and Civiliz Offered intermittently. Same as AS and LS 211H. An introduction to the historical, intellectual, political, literary and social developments of China from early times to the present.	3 Credits
	HSTR 240 - East Asian Civilizations (WRLD) An interdisciplinary, pluralist, and exploratory introduction to civilizations of East Asia. Primary focus on China, Japan, and Korea, the relations among them and their patterns of interaction with the outside world in pre-modern and modern periods.	3 Credits
	JPNS 150H - Japanese Cult & Civiliz Offered intermittently. Same as AS and LS 210H. The historical, religious, artistic, literary and social developments in Japan from earliest times to the present.	3 Credits
	SOCI 212S - Social Issues Southeast Asia Offered every other year. Introduction to the cultures, societies, and contemporary social problems of Southeast Asia.	3 Credits
	SSEA 202X - Introduction to India Offered alternate years. This course introduces students to the history, economy, political and legal system, society, culture, religions, and literary and artistic traditions of India, which is the world's largest secular democracy and the birthplace of four major world religions.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Asian Religion and Cultural Studies

Rule: Choose one course from the following. 3 credits.

	Course	Credits
	RLST 232H - Buddhism A historical introduction to the development of Buddhist thought and practice in the cultures of Asia and the West.	3 Credits
	RLST 233 - Tradtns of Buddhist Meditation Prereq. or coreq., RLST 232 H. A critical and phenomenological introduction to meditation as the Buddhist method of systematic inquiry into the nature of the mind and its role in the construction of experience.	3 Credits
	RLST 234X - Hindu Religious Traditions Same as SSEA and LS 365. Critical exploration of selected aspects of Hindu thought, narrative and practice, both in contemporary and historical perspective. Focus primarily on India, but with consideration of Hinduism's transformation and impact beyond South Asia.	3 Credits
	RLST 236X - Chinese Religions An exploration of the development of thought and practice in and the interactions between the major religious movements of Chinese religion: Confucianism, Taoism, Buddhism, and fold religion/animism.	3 Credits
	RLST 238X - Japanese Religions Offered at least once every two years. An introductory exploration of Japan's unique religious synthesis of Buddhist, Shinto, Taoist, Confucian and folk/shamanistic traditions.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Asian Studies Upper-Division Requirements

Rule: Choose 7 courses from among the following. 21 credits.

	Course	Credits
	CHIN 313L - Chinese Poetry in Translat Offered intermittently. The works of major Chinese poets to 1300 A.D.	3 Credits
	CHIN 314L - Tradit Chinese Literature Offered intermittently. Same as AS, MCLG, and LS 314L. Highlights of Chinese literature to 1800; includes philosophy, poetry, prose, and fiction.	3 Credits
	GPHY 444 - High Asia Offered intermittently. A study of the geography and mountain-society interactions in High Asia. The course includes attention to the theory and methodology of mountain geography, with attention to physical and human systems and their interaction.	3 Credits
	HSTR 345H - Modern China (WRLD) Offered autumn. China since 180, emphasizing internal weaknesses of the Manchu dynasty, confrontation with the west, and the emergence of Nationalist and Communist regimes.	3 Credits

	HSTR 448 - Tradition & Reform in China (WRLD) Prereq., junior standing or consent of instructor. A history of key reform movements from the mid-19th century (when China was rocked by rebellion and the entry of the West) to the Maoist period.	3 Credits
	HSTR 449 - Revolution & Reform in China (WRLD) Offered autumn. A history of the rise and fall of the Maoist regime and the complicated impact of the epochal post Mao reform movement.	3 Credits
	JPNS 311 - Jpns Clasc Lit Engl Trans Offered intermittently. Prereq., Composition course WRIT 101 or 201 (or transfer equiv.) with a grade of C- or better; and one approved Gen Ed writing course or WRIT 201, with a C- or better. Introduction to the classical literature of the Japanese court, ca. 7th to 14th century. Kojiki, Man'yoshu, Kokinshu, Genji Monogatari, and other major classics of the period.	3 Credits
	JPNS 312 - Jpns Lit Medieval to Mod Offered spring alternate years. Prereq., Composition course WRIT 101 or 201 (or transfer equiv.) with a grade of C- or better; and one approved Gen Ed writing course or WRIT 201, with a C- or better. Introduction to the literature of Japan from the 15th to the 20th century.	3 Credits
	JPNS 391 - Special Topics (R–12) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 12 Credits
	JPNS 411 - Mod Jpns Wrtrs/Thinkers (R–6) Offered autumn or spring. Prereq., JPNS 202. Introduction to the important writers, thinkers, and poets of the 20th century. Readings include a wide range of topics in the humanities, including literature, philosophy, and the arts.	3 Credits
	JPNS 431L - Post-War Japanese Literature Offered spring odd–numbered years. Same as MCLG 431L. Introduction to issues, literature, and criticism of Japanese literature from the postwar (1945) through the contemporary period, using texts in English translation.	3 Credits
	PSCI 329 - Politics of Japan Offered autumn. Prereq., junior standing or consent of instr. Institutions and political development in Japan.	3 Credits
	RLST 353 - Topics in South Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Hinduism, Islam, Buddhism, Jainism, Sikhism) of South Asia.	3 Credits
	RLST 354 - Topics in East Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Confucianism, Taoism, Buddhism, and folk animism and shamanism) of East Asia.	3 Credits
	RLST 360 - Classcs of Buddhist Literature (R-6) Close reading of a selection of core Buddhist texts drawn from various Asian cultures and spanning the three main phases of the tradition.	3 Credits

	RLST 366 - Tibetan Civilization An exploration of the history and culture of a unique civilization that has influenced greatly the cultures of Himalayan, East, and South Asia. Special attention will be given to Tibetan religions, but these will be explored within the context of the society's political, social, economic, and other cultural developments.	3 Credits
	RLST 367 - Approaches to Study Zen Bddhsm An exploration of both key developments in the history of Zen Buddhist thought and practice and the variety of ways that Zen has been studied by Western popular and academic cultures.	3 Credits
	RLST 368 - Contem Buddhism in S & SE Asia As with other major religions, modernity and globalization have presented profound challenges to Buddhist traditions. In this course we will explore various contemporary issues that have affected Theravada Buddhist societies--colonial and post-colonial revivalism, religious nationalism, women's rights and social reform--as case studies in some of the major ways in which religions have confronted modernity.	3 Credits
	RLST 369 - Contemporary Tradtions of Asia An exploration of the rich and diverse approaches to mental transformation and cultivation of gnosis as developed by several of Asia's major religious traditions, such as Buddhism, Jainism, Hinduism, Taoism, and Confucianism.	3 Credits
Minimum Required Grade: C-		21 Total Credits Required

Asian Language Requirement

Rule: Student must reach proficiency at the 202 level (fourth semester) in either Chinese or Japanese.

Note: Two years (or equivalent proficiency) in an Asian language appropriate to the student's academic goals and approved by the academic advisor. Students who plan to pursue graduate work are strongly advised to complete three years, including at least one study abroad in Asia experience.

	Course	**Credits**
	CHIN 101 - Elementary Chinese I Offered autumn. Emphasis on speaking, reading and writing elementary Mandarin.	5 Credits
	CHIN 102 - Elementary Chinese II Prereq., CHIN 101. Offered spring. Continuation of 101.	5 Credits
	CHIN 201 - Intermediate Chinese I Offered autumn. Prereq., CHIN 102 or equiv. Emphasis on oral communication, with continuing development in all major skill areas: listening, speaking, reading and writing.	5 Credits
	CHIN 202 - Intermediate Chinese II Offered spring. Prereq., CHIN 201 or equiv. Continuation of 201.	5 Credits
	JPNS 101 - Elementary Japanese I Offered autumn. Understanding of grammar and basic sentence structures are taught as a foundation for oral comprehension. The students will learn Hiragana and Katakana, two syllabic writing systems, and approximately 400 Kanji ideographs.	5 Credits

	JPNS 102 - Elementary Japanese II Offered spring. Prereq., JPNS 101. Continuation of 101.	5 Credits
	JPNS 201 - Intermediate Japanese I Offered autumn. Prereq., JPNS 102 or equiv. Reading and writing kanji; building oral/aural fluency.	5 Credits
	JPNS 202 - Intermediate Japanese II Offered spring. Prereq., JPNS 201 or equiv. Continuation of JPNS 201.	5 Credits
Minimum Required Grade: C-		0-20 Total Credits Required

Religious Studies

Religious Studies Option, Professor Paul Dietrich, Advisor:

Religion has been taught as an academic discipline at the University of Montana since 1924. Located within the Liberal Studies Program, the study of religion is pursued in the University in an interdisciplinary setting that offers opportunities for exploration and discovery in many areas of the humanities, art, and sciences. Our Religious Studies courses emphasize the scholarly analysis and interpretation of the history, literature, beliefs, myths, symbols, rituals, ethical and legal codes, and communities and institutions of the world's religious traditions.

We investigate how the world's religions address enduring human questions and influence responses to daily problems, and we explore how religious traditions shape lives and societies, from the emergence of the earliest civilizations to 21st-century global conflicts. Our students engage ideas about the good life and death, suffering and happiness, war and peace, revelation and salvation, God, mysticism, and religious experience. The curriculum is designed to provide students with a broad and deep understanding of religion as a field of human activity and inquiry. Students acquire the skills necessary to investigate specific religious traditions in historical depth and to understand the forms, expressions, and roles of religion in the world today.

Theory & Method in the Study of Religion

Rule: Take the following course. 3 credits.
Note: Please see a Liberal Studies advisor for possible course substitution approval.

	Course	Credits
	RLST 300 - Theory & Method Study of Relig A survey of modern theories and methods in the study of religion. Overview of sociological, anthropological, psychological, phenomenological, comparative, cognitive, and other approaches to the question, What is religion?	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Religious Studies Courses

Rule: Choose 5 of the following courses. 15 credits.

	Course	Credits
	AAS 347 - Voodoo, Muslim, Church Offered intermittently. Same as HSTA 347. The African-American religious experience encompasses Islam, Christianity, Santería, voodoo, and many others. In this course, students will examine the history of religious expression within the African-American community from the colonial era through the twentieth century. Central to the course is the question, “How did religion shape the experience of the African-American community?” Students will also examine the ways in which religious practice influenced social, political, and cultural changes in American history.	3 Credits
	AAS 417 - Prayer & Civil Rights (AM) Same as HSTA 417. HSTR 200 and only open to majors and minors in history or consent of instructor. This course explores the meaning of public prayer in the Civil Rights Movement. Built around the question, "Does religion help or hinder the pursuit of social change?" this class combines historical and religious studies inquiry to trace changes in civil rights activists' efforts to make use of religion. By focusing on a particular religious practice - in this case prayer - in a specific, but limited period of time, this course challenges students to consider how meaning is formed through historical action and study the social significance of religious practice. This formed through historical action and study the social significance of religious practice. This course complicates prevailing ideas about the normalcy of African-American religious practitioners' prayer, invites students to examine their assumptions about the nature of prayer, and traces how religion spilled out of sanctuaries into the streets during the civil rights era.	3 Credits
	NASX 304E - Native American Beliefs/Philos Offered Autumn and Spring. A study of selected ethical systems; origins, world views; religious beliefs and the way they have been affected by western civilization.	3 Credits
	RLST 310 - Topics in Biblical Studies (R-6) Selected topics in modern Hebrew Bible (Old Testament) and New Testament studies. Focus on history, literature, and religions of ancient West Asia, the Mediterranean and North Africa. Topics vary from year to year and include: Israelite religion; prophets and prophecy; biblical history and historiography; ancient Gospels; the letters and communities of Paul; early biblical interpretation; archaeology and iconography of ancient religions; religion and politics in the Bible.	3 Credits

	RLST 320 - Anct Judaism & Early Christnty (R6) Survey of the history and literature of ancient Judaism and early Christianity. Topics include: the emergence of Judaism and Christianity in the Persian, Greek, and Roman empires; religions of ancient West Asia and the Mediterranean; stories of Jewish and Christian origins; the historical Jesus; the early rabbinic movement; the Dead Sea Scrolls; Paul between Judaism and Christianity.	3 Credits
	RLST 335 - Western Religious Thought I Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the ancient and medieval periods.	3 Credits
	RLST 336 - Western Religious Thought II Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the late medieval and early modern periods.	3 Credits
	RLST 353 - Topics in South Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Hinduism, Islam, Buddhism, Jainism, Sikhism) of South Asia.	3 Credits
	RLST 354 - Topics in East Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Confucianism, Taoism, Buddhism, and folk animism and shamanism) of East Asia.	3 Credits
	RLST 360 - Classcs of Buddhist Literature (R-6) Close reading of a selection of core Buddhist texts drawn from various Asian cultures and spanning the three main phases of the tradition.	3 Credits
	RLST 366 - Tibetan Civilization An exploration of the history and culture of a unique civilization that has influenced greatly the cultures of Himalayan, East, and South Asia. Special attention will be given to Tibetan religions, but these will be explored within the context of the society's political, social, economic, and other cultural developments.	3 Credits
	RLST 367 - Approaches to Study Zen Bddhsm An exploration of both key developments in the history of Zen Buddhist thought and practice and the variety of ways that Zen has been studied by Western popular and academic cultures.	3 Credits
	RLST 368 - Contem Buddhism in S & SE Asia As with other major religions, modernity and globalization have presented profound challenges to Buddhist traditions. In this course we will explore various contemporary issues that have affected Theravada Buddhist societies--colonial and post-colonial revivalism, religious nationalism, women's rights and social reform--as case studies in some of the major ways in which religions have confronted modernity.	3 Credits

	RLST 369 - Contemplative Tradtions Asia An exploration of the rich and diverse approaches to mental transformation and cultivation of gnosis as developed by several of Asia's major religious traditions, such as Buddhism, Jainism, Hinduism, Taoism, and Confucianism.	3 Credits
	RLST 370 - Mysticism (R-6) An inquiry into the literature and interpretation of mysticism in the major religious traditions. Each offering will focus on a specific tradition or period.	3 Credits
	RLST 376 - Contemporary Religious Thought (R-6) Study of selected major critical and constructive proposals in modern religious thought in various traditions.	3 Credits
	RLST 391 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	RLST 392 - Independent Study (R-6) Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	RLST 491 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	RLST 492 - Independent Study (R-9) Prereq., consent of instr. Work on selected problems by individual students under direct faculty supervision.	1 To 9 Credits
Minimum Required Grade: C-		15 Total Credits Required

Liberal Studies courses with Religious Studies content

Rule: Choose two Liberal Studies courses from the following. 6 credits.

	Course	Credits
	LSH 326 - Stories East and West Offered intermittently. A course in Comparative Literature, examining similar genres (creation stories, fables, novels, short stories) in literature from Europe, America and India.	3 Credits
	LSH 329 - Fathers & Daughters in Lit Prereq., WRIT 101. Examines how relationships between fathers and daughters have been represented, celebrated and critiqued in literature in the Western world, from antiquity to the present. Includes discussion of changing patriarchal formations, symbolic and adoptive fatherhood, incestuous rape, homosexuality and role reversals. Texts include Greek tragedy, Shakespeare, romantic poetry, novel, and graphic novel. Both male and female authors.	3 Credits

	LSH 342 - Topics Comparative Lit & Rel Offered every second semester. Same as SSEA 342. These courses compare major traditions, texts and trends in two or more world civilizations or cultures. Works of literature and/or philosophy are examined in their historical contexts, and in relation to each other.	3 Credits
	LSH 368 - Shakespeare: Comedy & Tragedy Offered yearly. An investigation of the differences, but also affinities, between the two fundamental Shakespearean genres.	3 Credits
	LSH 391 - Special Topics (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 9 Credits
	LSH 392 - Independent Study (R–12) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 12 Credits
	LSH 484 - Novel Ancient and Modern Offered yearly. Two antithetical models for the construction of a novel.	3 Credits
	LSH 491 - Special Topics (R–9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one–time offerings of current topics.	1 To 9 Credits
	LSH 492 - Independent Study (R–9) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 9 Credits
Minimum Required Grade: C-		6 Total Credits Required

Modern and Classical Language Requirement

Note: Students must demonstrate fourth semester proficiency in a second language either by completing four semesters (recommended to be subsequent) with a grade of C- or better, or by receiving an equivalent score on a competence exam.

Liberal Studies Minor

Minor - Liberal Studies (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 23
Required Cumulative GPA: 2.5

Lower Division Core

Rule: Must complete all of the following courses:

	Course	Credits
	LSH 151L - IntrHumanities:Greek,Bible,Rom Offered autumn. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, comparing and contrasting the Greco–Roman with the Jewish and Christian traditions.	0 To 4 Credits
	LSH 152L - Humanities Medieval to Modern Offered spring. Prereq., eligibility for WRIT 101 (ENEX 101) based on writing placement examination. General survey of the field of Humanities in Western civilization, in the modern period.	0 To 4 Credits
	LSH 161H - Asian Humanities Offered autumn. Coreq., LS 151L or consent of instr. Selective survey of classical South and East Asian perspectives on the humanities. Hinduism, Confucianism, Taoism and Buddhism are the primary traditions considered.	3 Credits
Minimum Required Grade: C-		11 Total Credits Required

Upper Division Electives I

Rule: Must complete 6 credits from the following courses:

	Course	Credits
	LSH 326 - Stories East and West Offered intermittently. A course in Comparative Literature, examining similar genres (creation stories, fables, novels, short stories) in literature from Europe, America and India.	3 Credits
	LSH 327L - Gender & Sexuality in Eng Fict Offered alternate years. Major 20th century novels and short stories written in English by both men and women in different parts of the world, and how these texts explore changing concepts of gender and sexuality. Topics include heterosexuality, homosexuality, bisexuality, transformations, chastity, adultery, ageing, violence, growing up, adolescence and varying definitions of love.	3 Credits
	LSH 329 - Fathers & Daughters in Lit Prereq., WRIT 101. Examines how relationships between fathers and daughters have been represented, celebrated and critiqued in literature in the Western world, from antiquity to the present. Includes discussion of changing patriarchal formations, symbolic and adoptive fatherhood, incestuous rape, homosexuality and role reversals. Texts include Greek tragedy, Shakespeare, romantic poetry, novel, and graphic novel. Both male and female authors.	3 Credits
	LSH 368 - Shakespeare: Comedy & Tragedy Offered yearly. An investigation of the differences, but also affinities, between the two fundamental Shakespearean genres.	3 Credits

	LSH 416 - The Bhagavad Gita Offered every year or alternate year. Close reading of the Hindi Scripture, Bhagavad Gita in translation, examining its literary, philosophical, ethical and religious dimensions, its influence on Western and Indian literatures, and the way Indian and Western commentators have interpreted and used it.	3 Credits
	LSH 484 - Novel Ancient and Modern Offered yearly. Two antithetical models for the construction of a novel.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Upper Division Electives II

Rule: Must complete 6 credits from the following courses

	Course	Credits
	RLST 300 - Theory & Method Study of Relig A survey of modern theories and methods in the study of religion. Overview of sociological, anthropological, psychological, phenomenological, comparative, cognitive, and other approaches to the question, What is religion?	3 Credits
	RLST 310 - Topics in Biblical Studies (R-6) Selected topics in modern Hebrew Bible (Old Testament) and New Testament studies. Focus on history, literature, and religions of ancient West Asia, the Mediterranean and North Africa. Topics vary from year to year and include: Israelite religion; prophets and prophecy; biblical history and historiography; ancient Gospels; the letters and communities of Paul; early biblical interpretation; archaeology and iconography of ancient religions; religion and politics in the Bible.	3 Credits
	RLST 320 - Anct Judaism & Early Christnty (R6) Survey of the history and literature of ancient Judaism and early Christianity. Topics include: the emergence of Judaism and Christianity in the Persian, Greek, and Roman empires; religions of ancient West Asia and the Mediterranean; stories of Jewish and Christian origins; the historical Jesus; the early rabbinic movement; the Dead Sea Scrolls; Paul between Judaism and Christianity.	3 Credits
	RLST 335 - Western Religious Thought I Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the ancient and medieval periods.	3 Credits
	RLST 336 - Western Religious Thought II Selected studies in the intellectual history of western religions, alternating between studies of periods and seminal thinkers. Emphasis will be on the late medieval and early modern periods.	3 Credits
	RLST 353 - Topics in South Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Hinduism, Islam, Buddhism, Jainism, Sikhism) of South Asia.	3 Credits

	RLST 354 - Topics in East Asia Religions (R-6) This course will examine select topics of central importance with respect to the history of interaction between the major religions (Confucianism, Taoism, Buddhism, and folk animism and shamanism) of East Asia.	3 Credits
	RLST 360 - Classcs of Buddhist Literature (R-6) Close reading of a selection of core Buddhist texts drawn from various Asian cultures and spanning the three main phases of the tradition.	3 Credits
	RLST 366 - Tibetan Civilization An exploration of the history and culture of a unique civilization that has influenced greatly the cultures of Himalayan, East, and South Asia. Special attention will be given to Tibetan religions, but these will be explored within the context of the society's political, social, economic, and other cultural developments.	3 Credits
	RLST 367 - Approaches to Study Zen Bddhsm An exploration of both key developments in the history of Zen Buddhist thought and practice and the variety of ways that Zen has been studied by Western popular and academic cultures.	3 Credits
	RLST 368 - Contem Buddhism in S & SE Asia As with other major religions, modernity and globalization have presented profound challenges to Buddhist traditions. In this course we will explore various contemporary issues that have affected Theravada Buddhist societies--colonial and post-colonial revivalism, religious nationalism, women's rights and social reform--as case studies in some of the major ways in which religions have confronted modernity.	3 Credits
	RLST 369 - Contemplative Tradtions Asia An exploration of the rich and diverse approaches to mental transformation and cultivation of gnosis as developed by several of Asia's major religious traditions, such as Buddhism, Jainism, Hinduism, Taoism, and Confucianism.	3 Credits
	RLST 370 - Mysticism (R-6) An inquiry into the literature and interpretation of mysticism in the major religious traditions. Each offering will focus on a specific tradition or period.	3 Credits
	RLST 376 - Contemporary Religious Thought (R-6) Study of selected major critical and constructive proposals in modern religious thought in various traditions.	3 Credits
	RLST 391 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits
	RLST 392 - Independent Study (R-6) Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	RLST 491 - Special Topics (R-12) Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 12 Credits

	RLST 492 - Independent Study (R-9) Prereq., consent of instr. Work on selected problems by individual students under direct faculty supervision.	1 To 9 Credits
Minimum Required Grade: C-		6 Total Credits Required

Women's and Gender Studies B.A.

Women's and Gender Studies Option, Professor Elizabeth Hubble and Professor Ione Crummy, Co-Directors of the Women's and Gender Studies Program:

Students who choose the Women's and Gender Studies (WGS) option must register with the WGS advisor, who will supervise their program. The following requirements must be met to complete the WGS option within the liberal studies major.

Chemistry and Biochemistry Department

Christopher P. Palmer, Chair

Chemistry is the central science that involves the study of molecules, their structures, their combinations, their interactions, and the energy changes accompanying chemical processes.

The Department offers the following degrees: B.S., B.A., M.S., M.A., and Ph.D.

Prospective students desiring further information on any program of the Department of Chemistry and Biochemistry should visit the Department of Chemistry and Biochemistry and Biochemistry Program websites.

High School Preparation: In addition to the general University admission requirements, it is strongly recommended that a student take four years of mathematics, four (or more) years of science (earth and space science, biology, chemistry, and physics), four years of a foreign language, and four years of English.

Refer to graduation requirements listed previously in the catalog. See index.

Department Faculty

Professor

Bruce Bowler, Professor and Director, Biochemistry Program
Mark Cracolice, Professor
Michael DeGrandpre, Professor of Chemistry and Biochemistry
Daniel Dwyer, Professor of Chemistry
Christopher Palmer, Professor/Chair
Nigel Priestley, Professor of Chemistry
Edward Rosenberg, Professor
J.B. Alexander (Sandy) Ross, Professor of Chemistry and Biochemistry
Kent Sugden, Professor of Chemistry and Biochemistry

Associate Professors

Orion Berryman, Assistant Professor
Klara Briknarova, Associate Professor
Xi Chu, Associate Professor
Aaron Thomas, Associate Professor, Director of Native American Research Laboratory

Adjunct Instructor

Gerald Olbu

Lecturer

Earle Adams, Assistant Research Professor
Holly Thompson, Lecturer

Emeritus Professor

Richard Field, Professor Emeritus

Donald Kiely
Garon Smith, Professor of Chemistry
Edward Waali, Professor Emeritus

Chemistry

Back to Top

- CHMY 104 - Preparation for Chemistry
  Credits: 3. Offered autumn. Prereq. ALEKS Level 3 or M 090 Introductory Algebra w/ C– or better. An introduction to chemistry for those who believe they have an inadequate background to enroll in CHMY 121N or 141N. Not appropriate toward chemistry requirement in any major.
- CHMY 121N - Intro to General Chemistry
  Credits: 3. Offered autumn and spring. First semester of an introduction to general, inorganic, organic and biological chemistry. Course Attributes: Natural Science Course (N)
- CHMY 122 - Intro to Gen Chem Lab
  Credits: 1. Offered autumn and spring. Prereq., Enrolled in the College of Technology ASRN program. Prereq. or coreq., CHMY 121N or equivalent. A laboratory course emphasizing inorganic chemistry, quantitative relations and synthesis of inorganic and organic compounds.
- CHMY 123 - Intro to Organic & Biochem
  Credits: 3. Offered autumn and spring. Prereq., "C-" or equiv. in CHMY 121N or CHMY 141N or consent of instr. Second semester of an introduction to general, inorganic, organic and biological chemistry.
- CHMY 124 - Intro to Organic & Biochem Lab
  Credits: 2. Offered autumn and spring. Prereq. or coreq., CHMY 123. Laboratory to accompany CHMY 123.
- CHMY 141N - College Chemistry I
  Credits: 5. Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory. Course Attributes:
  Natural Science Lab Course (N) Natural Science Course (N)
- CHMY 143N - College Chemistry II
  Credits: 5. Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory. Course Attributes:
  Natural Science Lab Course (N) Natural Science Course (N)
- CHMY 191 - Special Topics/Expmntl Crse
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CHMY 221 - Organic Chemistry I
  Credits: 3. Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.
- CHMY 222 - Organic Chemistry I Lab
  Credits: 2. Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.
- CHMY 223 - Organic Chemistry II
  Credits: 3. Offered spring. Prereq., CHMY 221. Continuation of 221.
- CHMY 224 - Organic Chemistry II Lab
  Credits: 2. Offered spring. Prereq., CHMY 222; prereq. or coreq., CHMY 223.
- CHMY 290 - Undergraduate Research
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Research & Creative Schlrshp

- CHMY 291 - Special Topics/Expmntl Crse
  Credits: 1 TO 6. (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CHMY 292 - Independent Study
  Credits: 1 TO 10. (R-10) Offered autumn and spring. Prereq., one semester of chemistry and consent of instr. Laboratory investigations and research in the laboratory of a faculty member.
- CHMY 294 - Seminar/Workshop
  Credits: 1 TO 3. (R-6) Offered intermittently. Topic varies.
- CHMY 305E - Ethics and Writing in Science
  Credits: 3. Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry. Course Attributes: Ethical & Human Values Course
  Writing Course-Advanced
- CHMY 311 - Analytical Chem-Quant Analysis
  Credits: 4. Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.
- CHMY 360 - Applied Physical Chemistry
  Credits: 3. Offered spring. Prereq., CHMY 123 OR 143 AND M 162. Basic thermodynamics and chemical kinetics with applications in the biological and environmental sciences. Credit not allowed for both 360 and 373.
- CHMY 371 - Phys Chem-Qntm Chm & Spctrscpy
  Credits: 4. Offered spring. Prereq., CHMY 373. Systematic treatment of the laws and theories relating to chemical phenomena.
- CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs
  Credits: 4. Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.
- CHMY 390 - Undergraduate Research
  Credits: 1. Offered every term. Prereq., CHEM 161N-162N with B or better and consent of instr. Methods of peer-led team learning as applied to general chemistry instruction. Review of concepts from general chemistry. Student leaders mentor a team of general chemistry students in working toward constructing chemistry knowledge and developing problem-solving skills. Course Attributes: Research & Creative Schlrshp
- CHMY 391 - Special Topics/Expmntl Crse
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CHMY 392 - Independent Study
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.
- CHMY 397 - Teaching Chemistry
  Credits: 1. Offered every term. Prereq., CHMY 141N-143N with B or better and consent of instr. Methods of peer-led team learning as applied to general chemistry instruction. Review of concepts from general chemistry. Student leaders mentor a team of general chemistry students in working toward constructing chemistry knowledge and developing problem-solving skills.
- CHMY 398 - Internship/Cooperative Educ
  Credits: 1 TO 6. Offered autumn and spring. Prereq., consent of department. Extended classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- CHMY 401 - Advanced Inorganic Chemistry

  Credits: 3. Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.

- CHMY 402 - Advanced Inorganic Chem Lab

  Credits: 2. Offered spring. Prereq., CHMY 224 AND 360 or 373 and consent of instr. Preparation of inorganic and coordination compounds. Isolation and characterization by ion exchange, column chromatography, IR, UV-VIS, derivatives, MP, and BP.

- CHMY 403 - Descriptive Inorganic Chem

  Credits: 3. Offered spring. Prereq., CHMY 221-222, 360 or 373-371, and 401. A survey of the chemistry of the elements including transition metal reaction mechanisms, redox chemistry, organometallic chemistry, bioinorganic chemistry.

- CHMY 411 - Advanced Organic Chemistry

  Credits: 3. Prereqs., CHMY221 and CHMY223 (the sophomore organic chemistry sequence).The course is study of organic chemistry which covers chemoinformatics, structure and conformation, acid-base properties, kinetics/thermodynamics, mechanisms and reactivity, and synthetic strategy and key reactions.

- CHMY 421 - Advanced Instrument Analysis

  Credits: 4. Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.

- CHMY 442 - Aquatic Chemistry

  Credits: 3. Offered autumn odd-numbered years. Prereq., CHMY 311 or consent of instr. Application of chemical equilibria theory for understanding and modeling chemical processes in natural waters with an emphasis on spreadsheet computations. In depth examination of concepts such as pH, alkalinity, buffering, and solubility as they apply to natural waters.

- CHMY 445 - Indstrl Chm & Its Impct on Soc

  Credits: 3. Offered every other autumn semester. Prereq., CHMY 143 or 123. A course based on local Montana chemical industries involving field trips to chemical plants, visits by company personnel and an overall evaluation of the company=s economic and environmental impact on the community.

- CHMY 465 - Organic Spectroscopy

  Credits: 3. Offered intermittently. Prereq., CHMY 360 or 373 and one year of organic chemistry or consent of instr. Theory and interpretation of the NMR, IR, UV, and mass spectra of organic compounds with the goal of structure identification.

- CHMY 466 - FT-NMR Optn for Undrgrd Rsrch

  Credits: 1. Offered intermittently. Prereq., CHMY 221-222; research project using NMR; consent of instr. Operation of the FT-NMR spectrometer and brief background of NMR spectroscopy.

- CHMY 485 - Laboratory Safety

  Credits: 1. Offered autumn. Prereq., one year of college chemistry. Awareness of and methods of control of hazards encountered in laboratory work. Awareness of legal constraints on work with chemicals. Sources of information regarding chemical hazards.

- CHMY 488 - Forensic Research

  Credits: 3. Offered autumn, spring and summer. Prereq., consent of instr. Laboratory investigations and research on forensic chemistry topics under the direction of a faculty member.

- CHMY 489 - Forensic Research Seminar

  Credits: 1. Offered autumn. Prereq., CHMY 421 and ANTH 286N. Seminar speakers on forensic science topics in the areas of ethics, law, anthropology and criminology; tours of the Montana State Crime Laboratory.

- CHMY 490 - Undergraduate Research

  Credits: 1 TO 9. Undergraduate Research Variable cr (R-9). Offered autumn, spring, and summer. Prereq., consent of instr. Laboratory investigations and research in the laboratory of a faculty member. Course Attributes: Research & Creative Schlrshp

- CHMY 491 - Special Topics/Expmntl Crse

Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses or one-time offerings of current topics.

- CHMY 492 - Independent Study

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Laboratory investigations and research in the laboratory of a faculty member.

- CHMY 494 - Seminar/Workshop

  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Laboratory investigations and research in the laboratory of a faculty member.

- CHMY 498 - Internship/Cooperative Educ

  Credits: 1 TO 6. Prereq., consent of department. Extended non-classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation. Course Attributes: Internships/Practicums

- CHMY 499 - Senior Thesis/capstone

  Credits: 3. Offered autumn and spring. Prereq., CHMY 490 or consent of instr. and senior standing. Students complete and report on undergraduate research initiated as CHEM 490 or equivalent research experience. Reports are both oral and written.

- CHMY 501 - Teaching University Chemistry

  Credits: 1. Offered autumn. Preparation for teaching chemistry at the college level. A survey of teaching fundamentals and educational psychology as applied to chemistry instruction. Level: Graduate

- CHMY 541 - Environmental Chemistry

  Credits: 3. Offered intermittently. Prereq., CHMY 360 OR 373. Chemical principles and reactions in natural systems: Fate of chemical contaminants in the environment; partitioning of contaminants between phases (air/water/soil); chemistry of atmospheric pollutants; computer modeling of equilibrium and kinetic processes; degradation and transformation of organic contaminants. Level: Graduate

- CHMY 542 - Separation Science

  Credits: 3. Offered autumn odd-numbered years. Prereq., CHMY 421, CHMY 360 or 373. Theory, method development, and application of analytical separations; solvent extraction; solid phase extraction; various forms of chromatography; electrophoresis. Level: Graduate

- CHMY 544 - Applied Spectroscopy

  Credits: 3. Offered intermittently. Prereq., CHMY 421 or consent of instr. The function and application of optical (ultraviolet to infrared) chemical instrumentation. Specific topics include optics, light sources, detectors and a wide variety of spectrochemical methods with an emphasis on methods not typically covered in undergraduate instrumental analysis courses. Level: Graduate

- CHMY 553 - Inor Chem and Curr Lit

  Credits: 4. Offered spring. Prereq., CHMY 401. A survey of the elements including transition metal reaction mechanisms, redox chemistry, organomatallic chemistry, bioinorganic chemistry. Oral and written presentations on primary literature. Level: Graduate

- CHMY 562 - Org Structure and Mech

  Credits: 3. Offered intermittently. Prereq., one year of organic chemistry. Topics may include: stereochemistry, conformational analysis, aromaticity, transition sate theory, isotope effects, solvent effects, substitution and elimination reactions, and mechanisms that involve carbocations, carbanions, radicals and carbenes as reactive intermediates. Level: Graduate

- CHMY 563 - Organic Synthesis

  Credits: 3. Offered intermittently. Prereq., CHMY 221-223. Theoretical treatise of the common methods used in organic synthesis including: oxidation, reduction, organometallics, C-C bond forming reactions, synthetic strategies and total synthesis. Level: Graduate

- CHMY 566 - FT-NMR for Graduates

  Credits: 1. Offered intermittently. Prereq., CHMY 221-222; research project using NMR; consent of instr. Operation of the FT-NMR spectrometer and brief background of NMR spectroscopy. Level: Graduate

- CHMY 568 - Organometallic Chemistry
  Credits: 3. Offered intermittently in autumn. Prereq., CHMY 221, 223, 401, 403. Survey of the reactivity and structure of main group and transition metal organometallic compounds with an emphasis on applications to organic synthesis and catalysis. Level: Graduate
- CHMY 573 - Advanced Physical Chem
  Credits: 3. Offered intermittently. Prereq., CHMY 371-373. Fundamental principles of physical chemistry and special applications. Level: Graduate
- CHMY 580 - Adv Graduate Res Seminars
  Credits: 1. (R-10) Offered every term. Prereq., consent of instr. Formal oral and written presentations of research results and selected literature topics in a designated area. Level: Graduate
- CHMY 593 - Professional Project
  Credits: 3. Offered autumn and spring. Prereq., consent of instr. Preparation of a professional project appropriate to the needs and objectives of the individual student. Level: Graduate
- CHMY 595 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Prereq., consent of instr. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- CHMY 596 - Independent Study
  Credits: 1 TO 9. (R-9) Offered autumn and spring. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Independent Study
- CHMY 597 - Research
  Credits: 1 TO 10. Offered autumn and spring. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student. Level: Graduate
- CHMY 598 - Internship
  Credits: 1 TO 8. (R-8) Offered autumn and spring. Prereq., consent of department. Extended non-classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. Level: Graduate Course Attributes: Internships/Practicums
- CHMY 599 - Thesis
  Credits: 1 TO 6. (R-6) Offered autumn and spring. Prereq., consent of instr. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate
- CHMY 630 - Seminar
  Credits: 1. (R-14) Offered autumn and spring. Prereq., graduate standing in chemistry or biochemistry, or consent of instr. Level: Graduate
- CHMY 640 - Intro Grad Seminar
  Credits: 1. (R-20) Offered autumn. Prereq., graduate standing in chemistry or biochemistry or consent of instr. Seminar to acquaint new graduate students with departmental research. Level: Graduate
- CHMY 650 - Graduate Chemistry Seminar
  Credits: 1. (R-2) Offered spring. Prereq., graduate standing. A review and discussion of current research. Topics vary. Level: Graduate
- CHMY 652 - Original Research Proposal
  Credits: 1. Offered autumn. Prereq., CHMY 640 and CHMY 650. Preparation and presentation of original research proposals for third year graduate students. Level: Graduate
- CHMY 697 - Research
  Credits: 1 TO 10. (R-60) Offered autumn and spring. Prereq., consent of instr. Directed individual research and study appropriate to the back ground and objectives of the student. Level: Graduate
- CHMY 699 - Dissertation
  Credits: 1 TO 10. (R-10) Offered autumn and spring. Preparation of extensive thesis or manuscript based on research for presentation and/or publication. Level: Graduate

Forensic Chemistry

Bachelor of Science - Chemistry; Forensic Chemistry Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 100
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All courses in all subcategories listed are required

General Chemistry

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
Minimum Required Grade: C-		10 Total Credits Required

Organic Chemistry

	Course	Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits

	CHMY 224 - Org Chm II Lab Offered spring. Prereq., CHMY 222; prereq. or coreq., CHMY 223.	2 Credits
Minimum Required Grade: C-		10 Total Credits Required

Biochemistry and Biology

	Course	Credits
	BCH 110 - Intro Biology for Biochemists Offered spring. Prereq. CHMY 141N or equivalent. Prereq. or Coreq., CHMY 143N. Coreq., BCH 111. An introductory course that explores biomolecules and their roles in life processes. Provides a foundation for Cellular and Molecular Biology (BIOB 260), Genetics and Evolution (BIOB 272), Introductory Biochemistry Seminar (BCH 294), and many other advanced science courses.	3 Credits
	BCH 111 - Intro Biol for Biochemists Lab Offered spring. Prereq., CHMY 141N or equivalent. Prereq., or Coreq., CHMY 143N. Coreq., BCH 110. Introduction to the experimental techniques used to study biomolecules and their roles in life processes. Provides a foundation for other advanced level laboratory courses in chemistry and biochemistry.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physics

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits

	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Mathematics

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Forensic Science and Criminal Justice

	Course	Credits

	CJUS 125N - Fund of Forensic Science Offered autumn and online spring. A survey of the forensic sciences and related disciplines and their use in criminal investigations, the role of forensic scientists in the investigative process and as expert witnesses.	3 Credits
	SOCI 221 - Criminal Justice System Offered spring. A systematic survey of crime and the administration of justice in the United States, including the organizational structures, processes, and dynamics of law enforcement, criminal adjudication, and corrections.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Upper Core Courses

Rule: All subcategories must be completed

Analytical Chemistry

Rule: Complete all of the following courses

	Course	Credits
	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 421 - Advanced Instrument Analysis Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physical Chemistry

Rule: Choose 1 of the listed courses

	Course	Credits
	CHMY 360 - Applied Physical Chemistry Offered spring. Prereq., CHMY 123 OR 143 AND M 162. Basic thermodynamics and chemical kinetics with applications in the biological and environmental sciences. Credit not allowed for both 360 and 373.	3 Credits

	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Inorganic Chemistry

Rule: Complete the following course

	Course	Credits
	CHMY 401 - Advanced Inorganic Chemistry Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Biochemistry

Rule: Complete the following courses

	Course	Credits
	BCH 480 - Advanced Biochemistry I Offered autumn. Prereq., CHMY 223. Primarily for science majors. The chemistry of biomolecules, with emphasis on the structure and function of proteins, carbohydrates, lipids and nucleic acids. The chemistry and regulation of the transfer and expression of genetic information, protein synthesis. Credit not allowed for both BCH 380 and 480-482.	3 Credits
	BCH 482 - Advanced Biochemistry II Offered spring. Prereq., BCH 480 or equiv. Continuation of BCH 480. Enzyme kinetics, metabolism, especially macromolecule biosyntheses and energy acquisition pathways, and the associated energetics and molecular physiology. Credit not allowed for both BCH 380 and BCH 480-482.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Experiential Learning

Rule: Choose 1 of the listed courses for 3 credits

	Course	Credits

	CHMY 488 - Forensic Research Offered autumn, spring and summer. Prereq., consent of instr. Laboratory investigations and research on forensic chemistry topics under the direction of a faculty member.	3 Credits
	CHMY 498 - Internship/Cooperative Educ Prereq., consent of department. Extended non-classroom experience which provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (198, 298, 398, 498) may count toward graduation.	1 To 6 Credits
Minimum Required Grade: C-		3 Total Credits Required

Seminar

Rule: Complete the following course

	Course	Credits
	CHMY 489 - Forensic Research Seminar Offered autumn. Prereq., CHMY 421 and ANTH 286N. Seminar speakers on forensic science topics in the areas of ethics, law, anthropology and criminology; tours of the Montana State Crime Laboratory.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Statistics

Rule: Complete the following courses

	Course	Credits
	STAT 451 - Statistical Methods I Offered autumn. Prereq., one year of college mathematics including M 115 or equiv. course in probability or consent of instr. May not be counted toward a major in mathematics. Intended primarily for non-mathematics majors who will be analyzing data. Graphical and numerical summaries of data, elementary sampling, designing experiments, probability as a model for random phenomena and as a tool for making statistical inferences, random variables, basic ideas of inference and hypothesis testing. Level: Undergraduate-Graduate	3 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits

Minimum Required Grade: C-	4 Total Credits Required

Advanced Electives

Rule: Choose 11 credits from the listed courses. 8 of the credits must be numbered 300 or above

	Course	Credits
	BIOB 440 - Biological Electron Microscopy Offered spring. Prereq., senior standing or consent of instr. Theory of electron microscopy, recent developments in transmission and scanning electron microscopy. Limited experience with the instruments.	2 Credits
	CHMY 465 - Organic Spectroscopy Offered intermittently. Prereq., CHMY 360 or 373 and one year of organic chemistry or consent of instr. Theory and interpretation of the NMR, IR, UV, and mass spectra of organic compounds with the goal of structure identification.	3 Credits
	CHMY 466 - FT-NMR Optn for Undrgrd Rsrch Offered intermittently. Prereq., CHMY 221-222; research project using NMR; consent of instr. Operation of the FT-NMR spectrometer and brief background of NMR spectroscopy.	1 Credits
	CHMY 542 - Separation Science Offered autumn odd-numbered years. Prereq., CHMY 421, CHMY 360 or 373. Theory, method development, and application of analytical separations; solvent extraction; solid phase extraction; various forms of chromatography; electrophoresis. Level: Graduate	3 Credits
	CJUS 488 - For Sci Crime Lab & Beyond Offered spring and online in autumn. Examination of the forensic sciences with emphases on the non-crime lab forensic sciences, new technologies, and new directions in the forensic sciences.	3 Credits
	PHAR 110N - Use & Abuse of Drugs Offered autumn and spring. Drug dependence and abuse.	3 Credits
Minimum Required Grade: C-		11 Total Credits Required

Expressive Art - Public Speaking

Rule: Complete the following course

	Course	Credits
	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Social Science - Criminology

Rule: Complete the following course

	Course	Credits
	SOCI 211S - Introduction to Criminology Offered autumn. A critical examination of crime in society: how crime is defined, the extent and distribution of crime, theoretical explanations of criminal behavior, and crime control efforts.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Complete the following course

	Course	Credits
	CHMY 305E - Ethics and Writing in Science Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry B.S.

(American Chemical Society Certified)

The courses required for the B.S. degree provide a solid education in chemistry for the professional chemist and in preparation for graduate work in most areas of chemistry. These requirements meet the latest certification standards of the American Chemical Society.

Bachelor of Science - Chemistry

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 94

Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All courses in all subcategories listed are required

45 Total Credits Required

General Chemistry

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
Minimum Required Grade: C-		10 Total Credits Required

Organic Chemistry

	Course	Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
	CHMY 224 - Org Chm II Lab Offered spring. Prereq., CHMY 222; prereq. or coreq., CHMY 223.	2 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics

	Course	Credits

	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Mathematics

	Course	**Credits**
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits

Minimum Required Grade: C-	12 Total Credits Required

Computer Science

	Course	Credits
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
		3 Total Credits Required

Upper Division Core Courses

Rule: All courses in all subcategories listed are required

33 Total Credits Required

Analytical Chemistry

	Course	Credits
	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 421 - Advanced Instrument Analysis Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physical Chemistry

	Course	Credits

	CHMY 371 - Phys Chem-Qntm Chm & Spctrscpy Offered spring. Prereq., CHMY 373. Systematic treatment of the laws and theories relating to chemical phenomena.	4 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Inorganic Chemistry

	Course	Credits
	CHMY 401 - Advanced Inorganic Chemistry Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.	3 Credits
	CHMY 402 - Advanced Inorganic Chem Lab Offered spring. Prereq., CHMY 224 AND 360 or 373 and consent of instr. Preparation of inorganic and coordination compounds. Isolation and characterization by ion exchange, column chromatography, IR, UV-VIS, derivatives, MP, and BP.	2 Credits
	CHMY 403 - Descriptive Inorganic Chem Offered spring. Prereq., CHMY 221-222, 360 or 373-371, and 401. A survey of the chemistry of the elements including transition metal reaction mechanisms, redox chemistry, organometallic chemistry, bioinorganic chemistry.	3 Credits
Minimum Required Grade: C-		8 Total Credits Required

Biochemistry

	Course	Credits
	BCH 480 - Advanced Biochemistry I Offered autumn. Prereq., CHMY 223. Primarily for science majors. The chemistry of biomolecules, with emphasis on the structure and function of proteins, carbohydrates, lipids and nucleic acids. The chemistry and regulation of the transfer and expression of genetic information, protein synthesis. Credit not allowed for both BCH 380 and 480-482.	3 Credits

	BCH 486 - Biochemistry Research Lab Offered spring. Prereq., BCH 380 or 480. Applications of biochemical principles to modern protein biochemistry. Basic micro- and molecular biology techniques are used to produce mutant proteins; then students learn basic and advanced biophysical techniques to characterize the mutant proteins.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Mathematics

	Course	Credits
	M 311 - Ordinary Diff Equations/System Offered autumn. Prereq., M 273. Ordinary differential equations. Systems of linear differential equations from a matrix viewpoint. Series solutions. Existence and uniqueness for initial value problems. Numerical methods. Stability and selected topics. M 317 computer lab recommended.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Advanced Electives

Rule: Choose 3 to 9 credits from the listed courses.

Note: 3 credits maximum of CHMY 492 or CHMY 499 may be applied toward degree requirements.
Other classes in chemistry, physics, geology, biochemistry, or mathematics may be used to meet the Advanced Electives requirement with approval of the Chemistry Adviser.
2 additional Advanced Electives of at least 3 credits each may be substituted for the Modern Language requirement with approval of the Chemistry Adviser.

	Course	Credits
	CHMY 391 - Special Topics/Expmntl Crse (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	CHMY 442 - Aquatic Chemistry Offered autumn odd-numbered years. Prereq., CHMY 311 or consent of instr. Application of chemical equilibria theory for understanding and modeling chemical processes in natural waters with an emphasis on spreadsheet computations. In depth examination of concepts such as pH, alkalinity, buffering, and solubility as they apply to natural waters.	3 Credits
	CHMY 445 - Indstrl Chm & Its Impct on Soc Offered every other autumn semester. Prereq., CHMY 143 or 123. A course based on local Montana chemical industries involving field trips to chemical plants, visits by company personnel and an overall evaluation of the company=s economic and environmental impact on the community.	3 Credits

	CHMY 465 - Organic Spectroscopy Offered intermittently. Prereq., CHMY 360 or 373 and one year of organic chemistry or consent of instr. Theory and interpretation of the NMR, IR, UV, and mass spectra of organic compounds with the goal of structure identification.	3 Credits
	CHMY 491 - Special Topics/Expmntl Crse (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses or one-time offerings of current topics.	1 To 9 Credits
	CHMY 492 - Independent Study (R-9) Offered autumn and spring. Prereq., consent of instr. Laboratory investigations and research in the laboratory of a faculty member.	1 To 9 Credits
	CHMY 499 - Senior Thesis/capstone Offered autumn and spring. Prereq., CHMY 490 or consent of instr. and senior standing. Students complete and report on undergraduate research initiated as CHEM 490 or equivalent research experience. Reports are both oral and written.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Modern Foreign Language

Rule: Complete 2 semesters (10 credits) of a modern language or 2 addiional advanced elective courses

Note: 2 Advanced Elective courses worth at least 3 credits each may be substituted for the Modern Foreign Language requirement with approval from the Chemistry Adviser.

Minimum Required Grade: Pass

10 Total Credits Required

Ethics

Rule: Complete the following course

	Course	**Credits**
	CHMY 305E - Ethics and Writing in Science Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Environmental Chemistry

Bachelor of Science - Chemistry; Environmental Chemistry Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 89

Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All courses in all subcategories listed are required

General Chemistry

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
Minimum Required Grade: C-		10 Total Credits Required

Organic Chemistry

	Course	Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
	CHMY 224 - Org Chm II Lab Offered spring. Prereq., CHMY 222; prereq. or coreq., CHMY 223.	2 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics

	Course	Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Mathematics

	Course	Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits

Minimum Required Grade: C-	8 Total Credits Required

Geology

	Course	Credits
	GEO 101N - Intro to Physical Geology Offered autumn and spring. General geology including the work of wind, flowing water, glacial ice, gravity, earthquakes, volcanoes and plate tectonics in shaping the earth.	3 Credits
	GEO 102N - Intro to Physical Geology Lab Offered autumn and spring. Prereq. or coreq., GEO 101N (preferred) or 105N or 108N. A series of laboratory and field experiences designed around basic geologic processes and materials. Familiarization with common minerals, rocks, land forms, and structures. Intended to provide laboratory experience primarily with GEO 101N, but can be taken with or following any of the other freshman GEO courses listed above.	1 Credits
Minimum Required Grade: C-		4 Total Credits Required

Biochemistry Biology

	Course	Credits
	BCH 110 - Intro Biology for Biochemists Offered spring. Prereq. CHMY 141N or equivalent. Prereq. or Coreq., CHMY 143N. Coreq., BCH 111. An introductory course that explores biomolecules and their roles in life processes. Provides a foundation for Cellular and Molecular Biology (BIOB 260), Genetics and Evolution (BIOB 272), Introductory Biochemistry Seminar (BCH 294), and many other advanced science courses.	3 Credits
	BCH 111 - Intro Biol for Biochemists Lab Offered spring. Prereq., CHMY 141N or equivalent. Prereq., or Coreq., CHMY 143N. Coreq., BCH 110. Introduction to the experimental techniques used to study biomolecules and their roles in life processes. Provides a foundation for other advanced level laboratory courses in chemistry and biochemistry.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits

	BIOB 272 - Genetics and Evolution Offered spring. Prereq., either BIOB 260 OR both BIOB 160N and BIOB 170N/171N; and one of M 121, 122, 151, 162, or 171. Principles and mechanisms of inheritance and evolution. Population genetics, fossil record, macroevolution, speciation, extinction, systematics, molecular evolution.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Upper Division Core Courses

Rule: All subcategories must be completed

Analytical Chemistry

Rule: Complete all of the following courses

	Course	Credits
	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 421 - Advanced Instrument Analysis Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physical Chemistry

Rule: Choose 1 of the listed courses

	Course	Credits
	CHMY 360 - Applied Physical Chemistry Offered spring. Prereq., CHMY 123 OR 143 AND M 162. Basic thermodynamics and chemical kinetics with applications in the biological and environmental sciences. Credit not allowed for both 360 and 373.	3 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Inorganic Chemistry

Rule: Complete the following course

	Course	Credits
	CHMY 401 - Advanced Inorganic Chemistry Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Biochemistry

Rule: Complete the following course

	Course	Credits
	BCH 480 - Advanced Biochemistry I Offered autumn. Prereq., CHMY 223. Primarily for science majors. The chemistry of biomolecules, with emphasis on the structure and function of proteins, carbohydrates, lipids and nucleic acids. The chemistry and regulation of the transfer and expression of genetic information, protein synthesis. Credit not allowed for both BCH 380 and 480-482.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Statistics

Rule: Complete the following courses

	Course	Credits
	STAT 451 - Statistical Methods I Offered autumn. Prereq., one year of college mathematics including M 115 or equiv. course in probability or consent of instr. May not be counted toward a major in mathematics. Intended primarily for non-mathematics majors who will be analyzing data. Graphical and numerical summaries of data, elementary sampling, designing experiments, probability as a model for random phenomena and as a tool for making statistical inferences, random variables, basic ideas of inference and hypothesis testing. Level: Undergraduate-Graduate	3 Credits
	STAT 457 - Computer Data Analysis I Offered autumn. Coreq., STAT 451 or consent of instr. An introduction to software for doing statistical analyses. Intended primarily for students in STAT 451. Level: Undergraduate-Graduate	1 Credits

Minimum Required Grade: C-	4 Total Credits Required

Geology

Rule: Complete the following course

	Course	Credits
	GEO 327 - Geochemistry Offered alternate years. Prereq. one year of college chemistry, one semester of calculus, and one semester of physical geology, or consent of instructor. One semester of mineralogy recommended. The chemical properties of elements control their geological distribution and underlie the basic physical properties of rocks. An understanding of geochemistry will help students understand water chemistry, sediment geochemistry, and igneous petrology. The course covers chemical principles applied to geologic materials and processes, including the origin and chemical composition of earth, atmosphere, and hydrosphere. Principles of stable and radiogenic isotope geochemistry are discussed. Students will use excel to solve problems. Class discussions, problems sets, and exams are used to assess student performance.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Advanced Electives

Rule: Choose at least 8 credits from the listed courses.

Note: 3 credits maximum of CHMY 492.
3 credits maximum of BIOB 492.
3 credits maximum of GEO 492.
A maximum of 5 credits of Modern Foreign Language may be applied to meet the Advanced Electives requirement.

	Course	Credits
	BIOB 490 - Adv Undergrad Research (R-10) Offered every term. Prereq., junior or senior standing and consent of instr. Independent research under the direction of a faculty member. Graded credit/no credit.	1 To 10 Credits
	BIOB 492 - Independent Study Offered every term. Prereq., consent of instr. Independent work under the University omnibus option. See index.	1 To 10 Credits
	BIOE 370 - General Ecology Offered autumn. Prereq., BIOB 272. Analysis of the distribution and abundance of plants and animals. Includes individual, population and community-level processes (e.g., population growth and regulation, competition, predation, succession, nutrient cycling, energy flow and community organization).	3 Credits

	BIOL 453 - Ecology of Small & Large Lakes Offered summers only at Flathead Lake Biological Station. Prereq., BIOL 342 or BIOE 370/371, CHMY 121N and CHMY 123N. The physical, chemical and biological characteristics of lake ecosystems with an emphasis on nutrient cycling, food web interactions and water quality.	3 Credits
	BIOL 454 - Stream Ecology Offered summers only at Flathead Lake Biological Station. Prereq., BIOE 342 or BIOE 370/371, CHMY 121N. The biota and biogeochemical processes of running waters with unifying principles and contemporary research approaches.	3 Credits
	BIOM 360 - Gen Microbiolgy (equiv to 260) Offered autumn. Prereq., CHMY 123 or 143N; Prereq. or coreq., BIOB 260. Microbial structure and function, growth and reproduction, physiology, ecology, genetics, environmental factors, control of microorganisms and sterility, antimicrobial agents, microbial diversity.	3 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
	CHMY 391 - Special Topics/Expmntl Crse (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	CHMY 402 - Advanced Inorganic Chem Lab Offered spring. Prereq., CHMY 224 AND 360 or 373 and consent of instr. Preparation of inorganic and coordination compounds. Isolation and characterization by ion exchange, column chromatography, IR, UV-VIS, derivatives, MP, and BP.	2 Credits
	CHMY 403 - Descriptive Inorganic Chem Offered spring. Prereq., CHMY 221-222, 360 or 373-371, and 401. A survey of the chemistry of the elements including transition metal reaction mechanisms, redox chemistry, organometallic chemistry, bioinorganic chemistry.	3 Credits
	CHMY 442 - Aquatic Chemistry Offered autumn odd-numbered years. Prereq., CHMY 311 or consent of instr. Application of chemical equilibria theory for understanding and modeling chemical processes in natural waters with an emphasis on spreadsheet computations. In depth examination of concepts such as pH, alkalinity, buffering, and solubility as they apply to natural waters.	3 Credits
	CHMY 445 - Indstrl Chm & Its Impct on Soc Offered every other autumn semester. Prereq., CHMY 143 or 123. A course based on local Montana chemical industries involving field trips to chemical plants, visits by company personnel and an overall evaluation of the company=s economic and environmental impact on the community.	3 Credits

	CHMY 465 - Organic Spectroscopy Offered intermittently. Prereq., CHMY 360 or 373 and one year of organic chemistry or consent of instr. Theory and interpretation of the NMR, IR, UV, and mass spectra of organic compounds with the goal of structure identification.	3 Credits
	CHMY 466 - FT-NMR Optn for Undrgrd Rsrch Offered intermittently. Prereq., CHMY 221-222; research project using NMR; consent of instr. Operation of the FT-NMR spectrometer and brief background of NMR spectroscopy.	1 Credits
	CHMY 491 - Special Topics/Expmntl Crse (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses or one-time offerings of current topics.	1 To 9 Credits
	CHMY 492 - Independent Study (R-9) Offered autumn and spring. Prereq., consent of instr. Laboratory investigations and research in the laboratory of a faculty member.	1 To 9 Credits
	GEO 320 - Global Water Offered autumn. Prereq. one semester of college chemistry, WRIT 101 or equiv., and completion of one writing course. Water is necessary for life. Without it, life as we know it cannot exist. This course discusses the chemistry of water as it moves through the hydrological cycle. We discuss how water chemistry evolves through atmospheric water, rain water, ground water, surface water, and sea water. Students will have an understanding of the chemical attributes of water in major water reservoirs. Class discussions, formal and informal writing assignments, a short laboratory experiment, and a field trip highlight examples of water chemistry. Students will use excel to solve problems and will learn citation conventions relevant for scientific writing.	4 Credits
	GEO 420 - Hydrogeology Offered spring. Prereq., GEO 101N-102N; PHSX 205N/206N or PHSX 215N/216N ; M 162 or 171 strongly recommended or consent of instr. Occurrence, movement, quality, and methods of quantification of groundwater. Geological framework and physics of groundwater flow. Supply, contamination, and management problems.	4 Credits
	GEO 492 - Independent Study (R-6) Offered every term. Specific topics of particular interest to individual students.	1 To 6 Credits
	STAT 452 - Statistical Methods II Offered spring. Prereq., STAT 451. Continuation of STAT 451. May not be counted toward a major in mathematics. Multiple regression, experimental design, analysis of variance, other statistical models. Level: Undergraduate-Graduate	3 Credits
Minimum Required Grade: C-		8 Total Credits Required

Ethics

Rule: Complete the following course

	Course	Credits
	CHMY 302E - Chem Lit and Science Writing Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Pharmacology

Bachelor of Science - Chemistry; Pharmacology Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 88
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All subcategories must be completed

General Chemistry

Rule: Complete both courses

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
Minimum Required Grade: C-		10 Total Credits Required

Organic Chemistry

Rule: Complete all courses listed

	Course	Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
	CHMY 224 - Org Chm II Lab Offered spring. Prereq., CHMY 222; prereq. or coreq., CHMY 223.	2 Credits
Minimum Required Grade: C-		10 Total Credits Required

Biochemistry and Biology

Rule: Complete both courses

	Course	Credits
	BCH 110 - Intro Biology for Biochemists Offered spring. Prereq. CHMY 141N or equivalent. Prereq. or Coreq., CHMY 143N. Coreq., BCH 111. An introductory course that explores biomolecules and their roles in life processes. Provides a foundation for Cellular and Molecular Biology (BIOB 260), Genetics and Evolution (BIOB 272), Introductory Biochemistry Seminar (BCH 294), and many other advanced science courses.	3 Credits
	BCH 111 - Intro Biol for Biochemists Lab Offered spring. Prereq., CHMY 141N or equivalent. Prereq., or Coreq., CHMY 143N. Coreq., BCH 110. Introduction to the experimental techniques used to study biomolecules and their roles in life processes. Provides a foundation for other advanced level laboratory courses in chemistry and biochemistry.	1 Credits
	BIOB 260 - Cellular and Molecular Biology Offered autumn and summer. Prereq. BIOB 160N (preferred) or BCH 110/111 (preferred) or B- or higher in BIOH 112; and either CHMY 123 or CHMY 143. Analytical exploration of the structure and function of the cell, the fundamental unit of life, with an emphasis on energy transformations and information flow. Topics include molecular building blocks, membranes, organelles, and mechanisms of replication, gene expression, metabolism, signal transduction, cell birth, cell death, and cell differentiation.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physics

Rule: Complete either PHSX 205N-206N and 207N-208N or PHSX 215N-216N and 217N-218N

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits

	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Mathematics

Rule: Complete either M162 and M274 or M171 and M172

	Course	Credits
	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 263 - Applied Differential Equations Offered spring. Prereq., one of M 162, 171 or 181 and knowledge of basic trigonometry. Solution of ordinary differential equations and systems with emphasis on applications, numerical methods and computer software.	3 Credits
Minimum Required Grade: C-		7 Total Credits Required

Upper Core Courses

Rule: All subcategories must be completed

Analytical Chemistry

Rule: Complete all of the following courses

	Course	Credits
	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 421 - Advanced Instrument Analysis Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physical Chemistry

Rule: Choose 1 of the listed courses

	Course	Credits
	CHMY 360 - Applied Physical Chemistry Offered spring. Prereq., CHMY 123 OR 143 AND M 162. Basic thermodynamics and chemical kinetics with applications in the biological and environmental sciences. Credit not allowed for both 360 and 373.	3 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Inorganic Chemistry

Rule: Complete the following course

	Course	Credits
	CHMY 401 - Advanced Inorganic Chemistry Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Biochemistry

Rule: Complete the following courses

	Course	Credits
	BCH 480 - Advanced Biochemistry I Offered autumn. Prereq., CHMY 223. Primarily for science majors. The chemistry of biomolecules, with emphasis on the structure and function of proteins, carbohydrates, lipids and nucleic acids. The chemistry and regulation of the transfer and expression of genetic information, protein synthesis. Credit not allowed for both BCH 380 and 480-482.	3 Credits
	BCH 482 - Advanced Biochemistry II Offered spring. Prereq., BCH 480 or equiv. Continuation of BCH 480. Enzyme kinetics, metabolism, especially macromolecule biosyntheses and energy acquisition pathways, and the associated energetics and molecular physiology. Credit not allowed for both BCH 380 and BCH 480-482.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Pharmacology

Rule: Complete the following courses

	Course	Credits
	PHAR 421 - Medicinal Chem I Offered autumn. The chemistry of organic compounds used medicinally and their biochemical mechanisms of action.	3 Credits
	PHAR 422 - Medicinal Chem II Offered spring. Prereq., BMED 421. Continuation of 421.	3 Credits
	PHAR 443 - Pharmacol & Toxicol I Offered autumn. Prereq., second professional year standing. Basic principles of pharmacology, toxicology and therapeutics.	4 Credits
	PHAR 444 - Pharmacology & Toxicol II Offered spring. Prereq., BMED 443. Continuation of 443.	4 Credits
Minimum Required Grade: C-		14 Total Credits Required

Biology

Rule: Complete the following course

	Course	Credits
	BIOM 400 - Medical Microbiology Offered autumn. Microbial structure and functions, pathogenic microorganisms, virology, immunology. Credit not allowed toward a major in microbiology.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Advanced Electives

Rule: Choose 3 credits from the listed courses

Note: 3 credits maximum of CHMY 492 may be applied toward degree requirements.
3 credits maximum of BIOB 490 may be applied toward degree requirements.

	Course	Credits
	BIOB 490 - Adv Undergrad Research (R-10) Offered every term. Prereq., junior or senior standing and consent of instr. Independent research under the direction of a faculty member. Graded credit/no credit.	1 To 10 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
	CHMY 402 - Advanced Inorganic Chem Lab Offered spring. Prereq., CHMY 224 AND 360 or 373 and consent of instr. Preparation of inorganic and coordination compounds. Isolation and characterization by ion exchange, column chromatography, IR, UV-VIS, derivatives, MP, and BP.	2 Credits
	CHMY 403 - Descriptive Inorganic Chem Offered spring. Prereq., CHMY 221-222, 360 or 373-371, and 401. A survey of the chemistry of the elements including transition metal reaction mechanisms, redox chemistry, organometallic chemistry, bioinorganic chemistry.	3 Credits
	CHMY 442 - Aquatic Chemistry Offered autumn odd-numbered years. Prereq., CHMY 311 or consent of instr. Application of chemical equilibria theory for understanding and modeling chemical processes in natural waters with an emphasis on spreadsheet computations. In depth examination of concepts such as pH, alkalinity, buffering, and solubility as they apply to natural waters.	3 Credits
	CHMY 445 - Indstrl Chm & Its Impct on Soc Offered every other autumn semester. Prereq., CHMY 143 or 123. A course based on local Montana chemical industries involving field trips to chemical plants, visits by company personnel and an overall evaluation of the company=s economic and environmental impact on the community.	3 Credits
	CHMY 465 - Organic Spectroscopy Offered intermittently. Prereq., CHMY 360 or 373 and one year of organic chemistry or consent of instr. Theory and interpretation of the NMR, IR, UV, and mass spectra of organic compounds with the goal of structure identification.	3 Credits

	CHMY 466 - FT-NMR Optn for Undrgrd Rsrch Offered intermittently. Prereq., CHMY 221-222; research project using NMR; consent of instr. Operation of the FT-NMR spectrometer and brief background of NMR spectroscopy.	1 Credits
	CHMY 492 - Independent Study (R-9) Offered autumn and spring. Prereq., consent of instr. Laboratory investigations and research in the laboratory of a faculty member.	1 To 9 Credits
Minimum Required Grade: C-		3 Total Credits Required

Ethics

Rule: Complete the following course

	Course	Credits
	CHMY 305E - Ethics and Writing in Science Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Chemistry B.A.

The courses required for the B.A. degree provide a less extensive training in chemistry than do the courses required for the American Chemical Society certified B.S. degree. This is to allow the student to supplement his or her program with courses that meet his or her specific needs. Thus this degree provides the core of traditional preparation in chemistry together with latitude for combination with an interdisciplinary field or the Teacher Preparation program. It is strongly advised that students using this degree obtain faculty advice in planning their program.

Bachelor of Arts - Chemistry

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 89
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All subcategories must be completed

> *General Chemistry*
> **Rule:** Complete both courses

Physics

Rule: Complete either PHSX 205N-206N and 207N-208N or PHSX 215N-216N and 217N-218N

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits

	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Mathematics

Rule: Complete all courses

	Course	**Credits**

	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
Minimum Required Grade: C-		12 Total Credits Required

Computer Science

Rule: Complete course

	Course	**Credits**
	CSCI 250 - Computer Mdlng/Science Majors Offered autumn. Prereq., basic computer and spreadsheet literacy; coreq., M 162 or 171. An introduction to programming in Python with an emphasis on problems arising in the sciences, including: function plotting, data fitting, file input/output, solving ordinary differential equations, matrix manipulation, and sensor networks. A student can take at most one of CSCI 172, CSCI 250, CRT 280, and CRT 281 for credit.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Core Courses

Rule: All subcategories must be completed

Analytical Chemistry

Rule: Complete all of the following courses

	Course	**Credits**

	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 421 - Advanced Instrument Analysis Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physical Chemistry

Rule: Complete all of the following courses

	Course	Credits
	CHMY 371 - Phys Chem-Qntm Chm & Spctrscpy Offered spring. Prereq., CHMY 373. Systematic treatment of the laws and theories relating to chemical phenomena.	4 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Advanced Electives

Rule: Complete 15 credits of advanced electives

Note: Complete 15 credits of advanced electives approved by Chemistry Adviser

Minimum Required Grade: C-

15 Total Credits Required

Modern Foreign Language

Rule: Complete 10 credits of modern foreign language

Minimum Required Grade: Pass

10 Total Credits Required

Ethics

Rule: Complete the following course

	Course	Credits

	CHMY 305E - Ethics and Writing in Science Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Teaching Chemistry

To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a major/minor form for graduation or the major/minor/concentration section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Tracks will not appear on your UM transcript, diploma, university lists, student data system, or university publication and are used for advising purposes only. You do not fill out a major change for a track.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the teacher preparation program through the Department of Curriculum and Instruction. Individuals must complete the teaching major/teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

Bachelor of Arts - Chemistry; Track: Teaching Chemistry

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 85
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All subcategories must be completed

49 Total Credits Required

General Chemistry

Rule: Complete both courses

	Course	**Credits**
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits

	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
Minimum Required Grade: C-		10 Total Credits Required

Organic Chemistry

Rule: Complete all courses

	Course	Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
	CHMY 224 - Org Chm II Lab Offered spring. Prereq., CHMY 222; prereq. or coreq., CHMY 223.	2 Credits
Minimum Required Grade: C-		10 Total Credits Required

Physics

Rule: Complete either PHSX 205N-206N and 207N-208N or PHSX 215N-216N and 217N-218N

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits

	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 215N - Fund of Physics w/Calc I Offered autumn. Prereq. or coreq., PHSX 216N and M 171 or equiv. This course satisfies the lecture portion of medical and technical school requirements in general physics. Mechanics, fluids, waves and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 216N - Physics Laboratory I w/Calc Offered autumn. Coreq., PHSX 215N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Mechanics, fluids, waves, and sound. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
	PHSX 217N - Fund of Physics w/Calc II Offered spring. Prereq., PHSX 215N, and prereq. or coreq. PHSX 218, and prereq. or coreq., M 172 or equivalent. This course satisfies the lecture portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	4 Credits
	PHSX 218N - Physics Laboratory II w/Calc Offered spring. Prereq., PHSX 215N, coreq., PHSX 217N. This course satisfies the laboratory portion of medical and technical school requirements in general physics. Heat, electricity, magnetism, and light. Credit not allowed for both PHSX 215N-216N-217N-218N and 205N-206N-207N-208N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Mathematics

Rule: Complete all courses

	Course	**Credits**

	M 171 - Calculus I Offered autumn and spring. Prereq., M 122 or 151 or ALEKS placement >= 5. Differential calculus, including limits, continuous functions, Intermediate Value Theorem, tangents, linear approximation, inverse functions, implicit differentiation, extreme values and the Mean Value Theorem. Integral Calculus including antiderivatives, definite integrals, and the Fundamental Theorem of Calculus.	4 Credits
	M 172 - Calculus II Offered autumn and spring. Prereq., M 171 or 181. Techniques of Integration. Area computations. Improper integrals. Infinite series and various convergence tests. Power series. Taylor's Formula. Polar coordinates. Parametric curves.	4 Credits
	M 273 - Multivariable Calculus Offered autumn and spring. Prereq., M 172 or 182. Calculus of functions of several variables; differentiation and elementary integration. Vectors in the plane and space.	4 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		16 Total Credits Required

Computer Science

Rule: Complete the following course

	Course	**Credits**
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Core Courses

Rule: All subcategories must be completed

33 Total Credits Required

Analytical Chemistry

Rule: Complete all of the following courses

	Course	**Credits**

	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 421 - Advanced Instrument Analysis Offered spring. Prereq., CHMY 311. Theory and use of instrumental methods in the study of analytical and physical chemistry.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physical Chemistry

Rule: Complete all of the following courses

	Course	Credits
	CHMY 371 - Phys Chem-Qntm Chm & Spctrscpy Offered spring. Prereq., CHMY 373. Systematic treatment of the laws and theories relating to chemical phenomena.	4 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Inorganic Chemistry

Rule: Complete all of the following courses

	Course	Credits
	CHMY 401 - Advanced Inorganic Chemistry Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.	3 Credits
	CHMY 403 - Descriptive Inorganic Chem Offered spring. Prereq., CHMY 221-222, 360 or 373-371, and 401. A survey of the chemistry of the elements including transition metal reaction mechanisms, redox chemistry, organometallic chemistry, bioinorganic chemistry.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Laboratory Safety

Rule: Complete the following course

	Course	Credits
	CHMY 485 - Laboratory Safety Offered autumn. Prereq., one year of college chemistry. Awareness of and methods of control of hazards encountered in laboratory work. Awareness of legal constraints on work with chemicals. Sources of information regarding chemical hazards.	1 Credits
Minimum Required Grade: C-		1 Total Credits Required

Teaching Preparation Requirements

Rule: Complete both of the following

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Science.

	Course	Credits

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits

	ENST 472 - Gen Sci: Conserv Ed Offered autumn and spring. A study of the foundations of environmental science and conservation education with applications to community service and teaching.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Biochemistry

Rule: Complete the following course

	Course	Credits
	BCH 380 - Biochemistry Offered autumn and spring. Prereq., CHMY 223 or BIOB 260. Fundamental biochemistry; chemistry and metabolism of biomolecules, energy relationships in metabolism; storage, transmission, and expression of genetic information. Credit not allowed for both BCH 380 and 480-482.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Teaching Licensure Requirements

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A major GPA of 2.75 is required to be eligible for student teaching.

Modern Foreign Language

Rule: Complete 10 credits of modern foreign language

Note: The foreign language requirement may be waived for a student who completes the B.A. degree in preparation for secondary teaching and who meets the requirements for teaching licensure, including the student teaching requirement. These students still must meet the foreign language/symbolic systems competency requirement (likely via M 171 and 172) for General Education as described in the Academic Policies and Procedures section of this catalog.

Minimum Required Grade: Pass

10 Total Credits Required

Ethics

Rule: Complete the following course

	Course	Credits
	CHMY 305E - Ethics and Writing in Science Offered autumn and spring. Prereq., CHMY 223 and chemistry or biochemistry majors. Practicum for developing and improving skills in scientific writing and evaluation. Presentation, discussion and written evaluations of standard ethics traditions and ethical issues related to the professional practice of science. Use of library and search tools to access current literature in chemistry.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Chemistry Minor

Minor - Chemistry (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 31
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: Must complete all of the following:

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
Minimum Required Grade: C-		18 Total Credits Required

Upper Core Courses

Rule: Must complete the following:

	Course	Credits

	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
Minimum Required Grade: C-		4 Total Credits Required

Physical Chemistry Requirement

Rule: Must complete one of the following:

	Course	Credits
	CHMY 360 - Applied Physical Chemistry Offered spring. Prereq., CHMY 123 OR 143 AND M 162. Basic thermodynamics and chemical kinetics with applications in the biological and environmental sciences. Credit not allowed for both 360 and 373.	3 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Division Electives

Rule: Must complete two of the following:

Note: If the student's major requires biochemistry, BCH 380 or BCH 480 and BCH 482 may not be used to satisfy this requirement.

	Course	Credits
	BCH 380 - Biochemistry Offered autumn and spring. Prereq., CHMY 223 or BIOB 260. Fundamental biochemistry; chemistry and metabolism of biomolecules, energy relationships in metabolism; storage, transmission, and expression of genetic information. Credit not allowed for both BCH 380 and 480-482.	4 Credits
	BCH 480 - Advanced Biochemistry I Offered autumn. Prereq., CHMY 223. Primarily for science majors. The chemistry of biomolecules, with emphasis on the structure and function of proteins, carbohydrates, lipids and nucleic acids. The chemistry and regulation of the transfer and expression of genetic information, protein synthesis. Credit not allowed for both BCH 380 and 480-482.	3 Credits

	BCH 482 - Advanced Biochemistry II Offered spring. Prereq., BCH 480 or equiv. Continuation of BCH 480. Enzyme kinetics, metabolism, especially macromolecule biosyntheses and energy acquisition pathways, and the associated energetics and molecular physiology. Credit not allowed for both BCH 380 and BCH 480-482.	3 Credits
	CHMY 371 - Phys Chem-Qntm Chm & Spctrscpy Offered spring. Prereq., CHMY 373. Systematic treatment of the laws and theories relating to chemical phenomena.	4 Credits
	CHMY 401 - Advanced Inorganic Chemistry Offered autumn. Prereq., CHMY 223 AND 360 OR 373 or consent of instr. Theory and principles of inorganic chemistry and a systematic coverage of descriptive inorganic chemistry in the context of the periodic table.	3 Credits
	CHMY 403 - Descriptive Inorganic Chem Offered spring. Prereq., CHMY 221-222, 360 or 373-371, and 401. A survey of the chemistry of the elements including transition metal reaction mechanisms, redox chemistry, organometallic chemistry, bioinorganic chemistry.	3 Credits
	CHMY 442 - Aquatic Chemistry Offered autumn odd-numbered years. Prereq., CHMY 311 or consent of instr. Application of chemical equilibria theory for understanding and modeling chemical processes in natural waters with an emphasis on spreadsheet computations. In depth examination of concepts such as pH, alkalinity, buffering, and solubility as they apply to natural waters.	3 Credits
	CHMY 445 - Indstrl Chm & Its Impct on Soc Offered every other autumn semester. Prereq., CHMY 143 or 123. A course based on local Montana chemical industries involving field trips to chemical plants, visits by company personnel and an overall evaluation of the company=s economic and environmental impact on the community.	3 Credits
	CHMY 465 - Organic Spectroscopy Offered intermittently. Prereq., CHMY 360 or 373 and one year of organic chemistry or consent of instr. Theory and interpretation of the NMR, IR, UV, and mass spectra of organic compounds with the goal of structure identification.	3 Credits
Minimum Required Grade: C-		6 Total Credits Required

Teaching Chemistry Minor

A teaching minor is an academic minor which may contain different course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete a teaching major in a content area plus the teacher preparation program through the Department of Curriculum and Instruction. Additional teaching areas can be added through completion of either a teaching major or a teaching minor in that content area.

- Secondary Education Licensure Program
- Licensure Degree Requirements

The term 'minor' for this teaching option refers to courses that need to be completed. To sign up for this option, you need to contact the Curriculum and Instruction Department. Do not fill out a minor form for graduation or the minor section of the major change form. Approvals for this option must come from the Curriculum and Instruction Department.

Minor - Chemistry (Minor); Track: Teaching Chemistry

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 60
Required Cumulative GPA: 2.0

Lower Core Courses

Rule: All subcategories must be completed

42 Total Credits Required

Chemistry

Rule: Must complete all of the following:

	Course	Credits
	CHMY 141N - College Chemistry I Offered autumn and spring. Prereq., ALEKS Placement Level 4 or M 095 Intermediate Algebra w/ C- or better. For science majors and other students intending to take more than one year of chemistry. Properties of elements, inorganic compounds, liquid solutions, chemical equilibria and chemical kinetics. Includes laboratory.	5 Credits
	CHMY 143N - College Chemistry II Offered spring and summer. Prereq., "C-" or better in CHMY 141N or consent of instr. A continuation of CHMY 141N. Includes Laboratory.	5 Credits
	CHMY 221 - Organic Chem I Offered autumn. Prereq., CHMY 123N or 143N. The chemical and physical properties of organic compounds.	3 Credits
	CHMY 222 - Org Chm I Lab Offered autumn. Coreq., CHMY 221; prereq., one semester of 100-level laboratory. Microscale techniques are emphasized.	2 Credits
	CHMY 223 - Organic Chm II Offered spring. Prereq., CHMY 221. Continuation of 221.	3 Credits
Minimum Required Grade: C-		21 Total Credits Required

Mathematics

Rule: Must complete all of the following:

	Course	Credits

	M 162 - Applied Calculus Offered autumn and spring. Prereq., ALEKS placement >= 5 or one of M 121, 122 or 151. Introductory course surveying the principal ideas of differential and integral calculus with emphasis on applications and computer software. Mathematical modeling in discrete and continuous settings. Intended primarily for students who do not plan to take higher calculus.	4 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		8 Total Credits Required

Physics

Rule: Must complete all of the following:

	Course	Credits
	PHSX 205N - College Physics I Offered autumn and spring. Prereq., M 122 or 151 or equivalent, and prereq. or coreq. PHSX 206N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 206N - College Physics I Laboratory Offered autumn and spring. Prereq. or coreq., PHSX 205N. Mechanics, sound, and heat. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
	PHSX 207N - College Physics II Offered autumn and spring. Prereq. PHSX 205N and prereq. or coreq., PHSX 208N. Electricity, magnetism, light, and modern physics. For non-physical science majors. This course satisfies the lecture portion of medical school requirements in general physics. Credit not allowed for both PHSX 205N-207N and 215N-217N.	4 Credits
	PHSX 208N - College Physics II Laboratory Offered autumn and spring. Prereq., PHSX 206N, prereq, or coreq., PHSX 207N. Electricity, magnetism, light and modern physics. For non-physical science majors. This course satisfies the laboratory portion of medical school requirements in general physics. Credit not allowed for both PHSX 206N-208N and 216N-218N.	1 Credits
Minimum Required Grade: C-		10 Total Credits Required

Computer Science

Rule: Must complete one of the following:

	Course	Credits
	CSCI 100 - Intro to Programming Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.	3 Credits
	CSCI 172 - Intro to Computer Modeling Offered autumn and spring. Problem solving and data modeling using computer productivity software. Emphasis using spreadsheets and database for data analysis. Credit not allowed for CSCI 172, CRT 172, and CS 172.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Core Courses

Rule: Must complete the following:

	Course	Credits
	BCH 380 - Biochemistry Offered autumn and spring. Prereq., CHMY 223 or BIOB 260. Fundamental biochemistry; chemistry and metabolism of biomolecules, energy relationships in metabolism; storage, transmission, and expression of genetic information. Credit not allowed for both BCH 380 and 480-482.	4 Credits
	CHMY 311 - Analytical Chem-Quant Analysis Offered autumn. Prereq., one year of college chemistry, including laboratory. Classroom and laboratory work in gravimetric, volumetric, colorimetric and electrochemical methods of analysis; theory of errors; ionic equilibria in aqueous solutions.	4 Credits
	CHMY 485 - Laboratory Safety Offered autumn. Prereq., one year of college chemistry. Awareness of and methods of control of hazards encountered in laboratory work. Awareness of legal constraints on work with chemicals. Sources of information regarding chemical hazards.	1 Credits
Minimum Required Grade: C-		9 Total Credits Required

Physical Chemistry Requirement

Rule: Must complete one of the following:

	Course	Credits

	CHMY 360 - Applied Physical Chemistry Offered spring. Prereq., CHMY 123 OR 143 AND M 162. Basic thermodynamics and chemical kinetics with applications in the biological and environmental sciences. Credit not allowed for both 360 and 373.	3 Credits
	CHMY 373 - Phys Chem-Kntcs & Thrmdynmcs Offered autumn. Prereq., CHMY 143N, M 273, PHSX 207N or 217N. Systematic treatment of the laws and theories relating to chemical phenomena. Credit not allowed for both CHMY 360 and 373.	4 Credits
Minimum Required Grade: C-		3-4 Total Credits Required

Teaching Licensure Requirements

Note: Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Curriculum & Instruction in the College of Education and Human Sciences for more information. A minor GPA of 2.75 is required to be eligible for student teaching. Individuals completing a teaching minor must also complete a teaching major in another content area.

Teaching Preparation Requirements

Rule: Must complete all of the following:

Note: The EDU 497 course number is used for multiple courses. Students should register for EDU 497 Methods: 5-12 Science.

	Course	**Credits**

	EDU 497 - Teaching and Assessing (R-15) Offered autumn and/or spring. Prerequisite: Admission to the Teacher Education Program. This course number is used for multiple elementary and secondary methods courses. Check the class schedule or with your advisor regarding appropriate sections. 5-8 Mathematics: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Methods of teaching, assessing, and evaluating mathematics in the 5-8 middle grades including number and operations, rational numbers, ratio and proportion, measurement, algebra, expressions and equations, geometry, probability, statistics, and functions. K-8 Social Studies: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing teaching and assessing social studies teaching/learning opportunities that incorporate literature, primary sources and other developmentally appropriate activities. Overarching themes address diversity, integration across the curriculum and understanding state and national curriculum standards. K-8 Science: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Emphasis on developing, teaching, and assessing science teaching/learning opportunities that are inquiry-based, developmentally appropriate, integrated across the curriculum, and aligned with state and national curriculum standards. 4-8 Reading: 3 cr. Offered autumn and spring. This class must be taken concurrently with Level 3 courses and is restricted to students who have completed coursework in Levels 1 & 2. Preparation for teaching reading in a 4-8 setting so that all students are successful. Emphasis on reading to learn. Focus on using assessment to guide instruction, learning from trade books, textbooks, and electronic texts, activating prior knowledge, studying texts, and developing student enthusiasm for reading. 5-12 Science: 3 cr. Offered autumn. Methods of teaching science in the middle and secondary school. This course emphasizes the use of inquiry, problem-solving, appropriate use of technology, and assessment techniques that align with state and national curriculum standards. 5-12 Social Studies: 3 cr. Offered autumn. Foundations and purpose of the middle and secondary social studies curriculum. Elements of curricular design, including instructional methods, materials and assessment. 5-12 Mathematics: 4 cr. Offered autumn. Methods for teaching mathematics in grades 5-12 focusing on presentation of mathematics concepts and procedures through models, problem solving, and technology. Development of instructional strategies and classroom organizational models, discourse in the classroom, and multiple means for assessing student progress. 5-12 Business Subjects: 4 cr. Offered autumn. Methods for teaching business subjects in grades 5-12 focusing on content-specific topics in business, marketing, and information technology to include: instructional planning; effective teaching strategies (F2F & online); multiple means for assessing student progress; classroom management; and the relationship of the content area to standards-based curricula.	0 To 4 Credits
	ENST 472 - Gen Sci: Conserv Ed Offered autumn and spring. A study of the foundations of environmental science and conservation education with applications to community service and teaching.	3 Credits

Minimum Required Grade: C-	3 Total Credits Required

Communication Studies Department

Steve Schwarze, Chair

Communication Studies engages in both social-scientific and humanistic approaches to the analysis, understanding and improvement of human communication. The discipline traces its roots to ancient Greek and Roman studies of the functions of public discourse in society, but in the twentieth century communication came to embrace the studies of interpersonal and small group interaction, human relations in organizations, media and society, and intercultural interaction. Although interdisciplinary in spirit, the discipline has a core of knowledge, theory, and concepts concentrating on such things as symbols, messages, interactions, networks, audiences, and persuasive campaigns. Uniting the field is the belief that the role of communication in human experience is basic to comprehending complex situations and problems in the modern world. The discipline has roles in both the broad traditions of liberal arts education and in the development and refinement of practical skills.

The Department of Communication Studies at the University of Montana-Missoula focuses on three broad areas of study: interpersonal interaction and human relationships, organizational communication, and rhetoric and public discourse. The knowledge and skills the student may acquire in each of these areas are important to functioning effectively in one's personal life, at work, and as a citizen of the larger society in a rapidly changing world.

The program in Communication Studies helps to prepare students for such diverse professions as: public relations officer, marketing analyst, human resources or personnel manager, community mediator, political speech writer, health communication trainer, social services director, or student services coordinator. Also, undergraduate and graduate study can assist the student in pursuing advanced studies for law, the ministry, and higher education.

Department Faculty

Professor

Betsy Wackernagel Bach, Professor
Sara Hayden, Professor
Gregory Larson, Professor
Steve Schwarze, Professor
Alan Sillars, Professor
Stephen Yoshimura, Professor

Associate Professors

Joel Iverson, Associate Professor
Christina Yoshimura, Associate Professor of Communication Sutides (M.A., Ph.D.) and Mental Health Counselor (M.A.)

Adjunct Instructor

Lucy Beighle, Adjunct instructor
Phyllis Ngai, Adjunct Associate Professor

Lecturer

David Airne, Director of Debate

Communication

Back to Top

- COMX 111A - Intro to Public Speaking
  Credits: 3. Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed

for both COMM 111A and COM 160A. Course Attributes: Expressive Arts Course (A)

- COMX 115S - Intro to Interpersonal Comm

  Credits: 3. Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S. Course Attributes: Social Sciences Course (S)

- COMX 191S - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Course Attributes: Internships/Practicums Social Sciences Course (S)

- COMX 202S - Nonverbal Communication

  Credits: 3. Offered yearly. Nonverbal code systems and how they function in human communication including gestures, facial expressions, personal space, and others. Course Attributes: Social Sciences Course (S)

- COMX 204X - International & Dvlpmnt Comm

  Credits: 3. Offered yearly. International Communication is concerned with information exchange across national borders while Development Communication focuses on the historical, current, and prospective role of communication technologies in social change, improving living conditions, and enhancing life prospects - mainly in developing countries. Course Attributes: Cultural Intl Diversity (X)

- COMX 210 - Communication in Small Groups

  Credits: 3. Offered autumn and spring. Theory and research related to communication roles, collaboration, cohesion, leadership, and decision-making. Experiences provided in task oriented groups and field analyses of group processes.

- COMX 220S - Intro to Organizational Comm

  Credits: 3. Offered yearly. Theory and research on communication in organizations. Focus on topics such as productivity, power, culture, socialization, technology and globalization covering a wide range of organizations including corporations, government, educational institutions, non-profit agencies and media organizations. Course Attributes: Social Sciences Course (S)

- COMX 222 - Professional Communication

  Credits: 3. Offered intermittently. Explores communication skills needed in business and professional contexts. Focus on developing a working knowledge of theory and skills for interpersonal communication, group communication, and business writing. Concepts include communication processes, diversity in the workplace, nonverbal communication, technical communication, communication with customers, and employment communication.

- COMX 240H - Intro to Rhetorical Theory

  Credits: 3. Offered yearly. An overview of rhetorical theory including an exploration of classical rhetoric, British and Continental rhetorical theory, and contemporary theories of language and persuasion. Course Attributes: Hist & Cultural Studies (H)

- COMX 241 - Persuasive Communication

  Credits: 3. Offered yearly. The use of communication in attitude and behavior change as experienced in personal, organizational, and public contexts.

- COMX 242 - Argumentation

  Credits: 3. Offered autumn and spring on the Mountain campus, offered intermittently on the Missoula College campus. Development of argumentation skills and critical judgment in decision-making and debate. Includes criticism, construction, presentation, and refutation of spoken and written arguments.

- COMX 311 - Family Communication

  Credits: 3. Offered yearly. An examination of communication in marriage/romantic partnership, parent-child, and extended family relationships. Topics include intimacy, power, decision-making, problem solving, identity formation, and interpersonal perception.

- COMX 312 - Forensics/Honors

  Credits: 1 TO 3. (R-12) Offered every term. Preparation and participation in competitive speech and debate, including Lincoln/Douglas and Parliamentary debate. The team travels to regional

competitions and hosts on-campus and intramural debates and speaking events. Up to 6 credits may apply toward a major or minor in communication studies.

- COMX 343 - Persuasive Speaking and Critic

  Credits: 3. Offered yearly. Prereq., COMM 111A or consent of instructor. The persuasive process through the criticism and creation of speeches and other rhetorical artifacts emphasizing the role persuasion plays in creating and shaping our culture.

- COMX 347 - Rhetoric Nature & Environmtlsm

  Credits: 3. Offered every other year. Same as ENST 377. Survey of rhetorical texts that shape public understanding of nature and environmental issues. Analysis of a range of historical and contemporary environmental texts using theoretical concepts from the rhetorical tradition. Course Attributes: Writing Course-Advanced

- COMX 349 - Comm Consump & Climate

  Credits: 3. Offered every other year. Same as CCS 349. Analyzes consumption as a communication practice, investigates discourses that promote consumption, and illuminates environmental impacts on consumption.

- COMX 351 - Principles of Public Relations

  Credits: 3. Offered yearly. The many uses of communication in the endeavor of public relations. Communication theories and models including interpersonal communication, organizational communication, and mass communication are applied to explore the internal and external communication behavior associated with public relations.

- COMX 352 - Public Relations Portfolio

  Credits: 3. Offered yearly. Writing documents such as press releases, fact sheets, brochures and speeches to create relationships between organizations and their publics.

- COMX 380 - Gender and Communication

  Credits: 3. Offered yearly. The meaning of gender in our culture. Examines how gender is displayed and perpetuated through social institutions such as the media and through our private and public verbal and nonverbal interactions.

- COMX 391 - Special Topics

  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- COMX 398 - Internship

  Credits: 1 TO 6. (R-6) Offered autumn and spring. Preq., consent of instructor. Extended classroom experience that provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (398, 498) may count toward graduation. Offered C/NCR only. Course Attributes: Internships/Practicums Internship graduation limit 6

- COMX 412 - Communication and Conflict

  Credits: 3. Offered autumn and spring. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Topics include culture, power, styles, negotiation and bargaining, mediation, dissent, dispute systems, and crisis communication. Credit is not allowed for both COMM 413 and COMM 412.

- COMX 413 - Comm & Conflict-Writing

  Credits: 3. Offered yearly. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Fulfills Upper-Division Writing requirement for Communication Studies majors. Credit is not allowed for both COMX 413 and COMX 412. Course Attributes: Writing Course-Advanced

- COMX 414 - Comm in Personal Relationshps

  Credits: 3. Offered yearly. Prerequisite, COMX 115S or consent of instructor. An examination of the functions, types, and historical context of close personal relationships with an in-depth study of the role of communication in friendships and romantic relationships. Course Attributes: Writing Course-Advanced

- COMX 415 - Intercultural Communication

  Credits: 3. Offered autumn and spring. Communication principles and processes in cross-cultural environments. Non-Western cultures are emphasized by contrasting them to Western communication norms.

- COMX 421 - Comm in Non-Profit Organizatns

  Credits: 3. Offered yearly. Focuses on issues in nonprofit organizational communication at macro and micro levels. Topics include: organizational identity, change processes, public relations, fund-raising, advocacy, socialization, stress and burnout, board management and professionalization. Course Attributes: Writing Course-Advanced

- COMX 422 - Communication and Technology

  Credits: 3. Offered every other year. This course takes a critical look at the influence of communication technologies on organizational communication. Students will examine how the world of work is changing due to new technologies and explore the social and ethical implications of technical innovation, adoption and use. Course Attributes: Writing Course-Advanced

- COMX 423 - Org Comm Consult & Train

  Credits: 3. Offered every year. Prerequisite, COMX 220S or consent of instructor. Not open to PCOM. Emphasis on the theoretical and practical issues involved in communication training and consultation. Overview of theoretical models followed by the "nuts and bolts" of communication training, development, and assessment. Students will carry out a training or consultation project (e.g., planning, execution, and evaluation) to sharpen the issues explored.

- COMX 424 - Risk Crisis & Comm

  Credits: 3. Offered every other year. This course explores the communicative dynamics that both prevent and cause organizational crisis. Through case studies, the class examines how people plan, communicate and make good decisions in high-risk situations, as well as how to manage crisis public relations effectively. Course Attributes: Writing Course-Advanced

- COMX 425 - Comm in Health Organizations

  Credits: 3. Offered every other year. Not open to PCOM. This course explores the key issues at the intersection of health communication and organizational communication by considering communication processes that occur in a number of distinct contexts of health organizations. Through case studies and health campaigns students explore contemporary concerns and theory in the area of health communication.

- COMX 445 - Rhetorical Criticism & Theory

  Credits: 3. Offered yearly. Introduction to study of rhetorical criticism and theory. Current theoretical and methodological issues and approaches including traditional criticism, experiential criticism, dramatism, narrative criticism, feminist criticism, postmodern criticism. Course Attributes: Writing Course-Advanced

- COMX 447 - Rhetorical Constrctn of Woman

  Credits: 3. Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class. Course Attributes: Writing Course-Advanced

- COMX 449 - Rhetoric of Women's Activism

  Credits: 3. Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class. Course Attributes: Writing Course-Advanced

- COMX 460 - Research Methods

  Credits: 3. Offered autumn and spring. Open only to majors in COMM. Prereq., Grade of C- or better in EDLD 486 or PSYX 222 or SOCI 202 or STAT 216. Introduction to the major types of communication research and the foundations of quantitative research methods.

- COMX 461 - Communication Research Seminar

  Credits: 1 TO 3. (R-9) Offered autumn and spring. coreq., COMX 460. Application of quantitative and qualitative research methods to specialized contexts. Emphasis on direct student involvement in research activities.

- COMX 485 - Communication and Health

  Credits: 3. Offered yearly. Theory and research on the health correlates of human interaction.

- COMX 491 - Special Topics

  Credits: 1 TO 3. (R-9) Offered intermittently. Not open to PCOM. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.

- COMX 492 - Independent Study

  Credits: 1 TO 9. (R-9) Offered every term. Prereq., consent of instructor. Offered C/NCR only.

- COMX 510 - Sem Personal Relationships

  Credits: 3. (R-6) Offered yearly. Examines theory and research on the process and functions of communication in personal relationship contexts. Interdisciplinary readings illuminates the dynamics of communication in the development, maintenance, and deterioration of romantic relationships, friendships, and family relationships. Discussion and assignments center around theoretical, methodological, and practical issues in research on communicative activities and events in personal relationships. Level: Graduate

- COMX 511 - Survey Interpersonal Comm

  Credits: 3. Offered every other year. Survey of theories and research in interpersonal communication including definitions of interpersonal communication, its place in the field of communication, and methodological issues. Overall emphasis on foundational readings and recent research developments. Level: Graduate

- COMX 512 - Sem Comm Conflict

  Credits: 3. (R-6) Offered intermittently. A review and discussion of current research regarding conflict in different levels and contexts of communication. Level: Graduate

- COMX 514 - Alt Dispute Resolution

  Credits: 3. Offered yearly. Same as LAW 614. A study of the varieties of dispute resolution vehicles outside the court process. Focus on a 40-hour component of practical skills training for the mediation practitioner. Topics include the mediation model, interest-based negotiation and effective communication. Level: Graduate

- COMX 515 - Enviro Negotiation Mediation

  Credits: 3. Same as NRSM 515 and ENST 515. This course prepares students to effectively engage in multiparty negotiation on natural resource and environmental issues. It is grounded in theory and provides an opportunity to develop practical skills in both negotiation and facilitation/mediation. Guest speakers, case studies, and simulations allow students to develop, test, and refine best practices. The course is face-paced, highly interactive, and serves as the second of three required courses in the Natural Resources Conflict Resolution Program. Level: Graduate

- COMX 520 - Sem in Organiz Communication

  Credits: 3. (R-6) Offered every other year. Introduction to theories and research in organizational communication. Topics include culture, networks, structure, technology, identity, power, resistance, gender, and globalization. Overall emphasis on foundational readings and recent research developments. Level: Graduate

- COMX 540 - Sem Instructional Comm

  Credits: 3. Offered every other year. Instruction in the theories, concepts, principles, and skills employed university level classroom communication and instruction. Level: Graduate

- COMX 541 - COMM Teaching Methods

  Credits: 2. (R-8) Offered autumn and spring. Prereq., consent of instr. Restricted to Communication majors only. Offered C/NCR only. Level: Graduate

- COMX 555 - Sem Rhet Crit & Theory

  Credits: 3. Offered annually. Introduction to contemporary issues in rhetorical criticism and theory. Methods reviewed include classical criticism, dramatism, close textual analysis, ideographic criticism, narrative criticism, feminist criticism, and postmodern criticism. Level: Graduate

- COMX 561 - Qual Research Methods

  Credits: 3. Offered every year. An emphasis on the philosophy and practice of qualitative inquiry, the development and use of descriptive frameworks, and gathering and testing qualitative data to develop human communication theory. Level: Graduate

- COMX 572 - Family Law Mediation

  Credits: 3. Offered autumn. Same as LAW 672. Interdisciplinary course on advanced mediation skills with a focus on family mediation including divorce and other types of family problems. Psychological issues for both children and parents, power balancing, gender issues and interest-based negotiation model. Level: Graduate

- COMX 575 - Sem:Rhet&Env'l Controversy
  Credits: 3. Offered every other year. Same as ENST 575. The study of how advocates use symbols to influence meaning and action in environmental controversies. Rhetorical theory is used to identify, analyze, and evaluate persuasive strategies and tactics. Level: Graduate
- COMX 585 - Comm Across Sciences
  Credits: 3. Offered yearly. Focus on communication practices that facilitate interdisciplinary interactions across the sciences and result in more competent communication. Offered only to graduate student trainees enrolled in the M-EID program. Level: Graduate
- COMX 591 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- COMX 593 - Professional Paper
  Credits: 1 TO 3. (R-6) Offered every term. Prereq., consent of instr. Preparation of a professional paper appropriate to the needs and objectives of the individual student. Level: Graduate
- COMX 594 - Topical Seminar
  Credits: 1 TO 2. (R-6) Offered intermittently. Prereq., consent of instr. A review and discussion of current research. Topics vary. Level: Graduate
- COMX 595 - Special Topics
  Credits: 1 TO 9. (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics. Level: Graduate
- COMX 596 - Independent Study
  Credits: 1 TO 9. (R-9) Offered every term. Prereq., consent of instr. Course material appropriate to the needs and objectives of the individual student. Level: Graduate Course Attributes: Independent Study
- COMX 599 - Thesis
  Credits: 1 TO 9. (R-9) Offered every term. Prereq., consent of instr. Preparation of a thesis or manuscript based on research for presentation and/or publication. Level: Graduate

Communication and Human Relationships

Bachelor of Arts - Communication Studies; Comm & Human Relationships Option

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 48

Required Cumulative GPA: 2.0

Note: To graduate with a degree in Communication Studies, the student must complete 36 COMX (COMM) credits with 18 of those credits in courses numbered 300 or above. Students must also complete an approved statistics course. For the Human Relationships option, students must complete an additional 12 credits in Allied courses to reach 48 total degree credits. A maximum of 6 credits in COMX 312 (COMM 360) and a maximum of 6 credits in COMX 398 (COMM 398) may count toward a major in communication studies.

Lower Division Core Courses

Rule: Must complete all of the following courses:

Note: null

	Course	Credits

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	COMX 220S - Intro to Organizational Comm Offered yearly. Theory and research on communication in organizations. Focus on topics such as productivity, power, culture, socialization, technology and globalization covering a wide range of organizations including corporations, government, educational institutions, non-profit agencies and media organizations.	3 Credits
	COMX 240H - Intro to Rhetorical Theory Offered yearly. An overview of rhetorical theory including an exploration of classical rhetoric, British and Continental rhetorical theory, and contemporary theories of language and persuasion.	3 Credits
Minimum Required Grade: C-		12 Total Credits Required

Upper Division Core Courses

Rule: Must complete the following subcategories

6 Total Credits Required

Research

Rule: Must complete the following course

Note: Students taking COMX 460 in the fall or spring semester will also be required to take COMX 461, Communication Research Seminar. Those taking COMX 460 in summer are exempt from this requirement.

	Course	**Credits**
	COMX 460 - Research Methods Offered autumn and spring. Open only to majors in COMM. Prereq., Grade of C- or better in EDLD 486 or PSYX 222 or SOCI 202 or STAT 216. Introduction to the major types of communication research and the foundations of quantitative research methods.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Upper Division Writing

Rule: Must complete 1 of the following courses

Note: One of these courses is required to complete the upper division writing requirement in the major. This counts toward the total credits needed for the major.

	Course	Credits
	COMX 347 - Rhetoric Nature & Environmtlsm Offered every other year. Same as ENST 377. Survey of rhetorical texts that shape public understanding of nature and environmental issues. Analysis of a range of historical and contemporary environmental texts using theoretical concepts from the rhetorical tradition.	3 Credits
	COMX 413 - Comm & Conflict-Writing Offered yearly. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Fulfills Upper-Division Writing requirement for Communication Studies majors. Credit is not allowed for both COMX 413 and COMX 412.	3 Credits
	COMX 414 - Comm in Personal Relationshps Offered yearly. Prerequisite, COMX 115S or consent of instructor. An examination of the functions, types, and historical context of close personal relationships with an in-depth study of the role of communication in friendships and romantic relationships.	3 Credits
	COMX 421 - Comm in Non-Profit Organizatns Offered yearly. Focuses on issues in nonprofit organizational communication at macro and micro levels. Topics include: organizational identity, change processes, public relations, fund-raising, advocacy, socialization, stress and burnout, board management and professionalization.	3 Credits
	COMX 422 - Communication and Technology Offered every other year. This course takes a critical look at the influence of communication technologies on organizational communication. Students will examine how the world of work is changing due to new technologies and explore the social and ethical implications of technical innovation, adoption and use.	3 Credits
	COMX 424 - Risk Crisis & Comm Offered every other year. This course explores the communicative dynamics that both prevent and cause organizational crisis. Through case studies, the class examines how people plan, communicate and make good decisions in high-risk situations, as well as how to manage crisis public relations effectively.	3 Credits
	COMX 445 - Rhetorical Criticism & Theory Offered yearly. Introduction to study of rhetorical criticism and theory. Current theoretical and methodological issues and approaches including traditional criticism, experiential criticism, dramatism, narrative criticism, feminist criticism, postmodern criticism.	3 Credits
	COMX 447 - Rhetorical Constrctn of Woman Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits

	COMX 449 - Rhetoric of Women's Activism Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Comm & Human Relationships Option

Rule: Must complete the following subcategories

30 Total Credits Required

Major Courses

Rule: Must complete at least 5 of the following courses

	Course	Credits
	COMX 202S - Nonverbal Communication Offered yearly. Nonverbal code systems and how they function in human communication including gestures, facial expressions, personal space, and others.	3 Credits
	COMX 311 - Family Communication Offered yearly. An examination of communication in marriage/romantic partnership, parent-child, and extended family relationships. Topics include intimacy, power, decision-making, problem solving, identity formation, and interpersonal perception.	3 Credits
	COMX 380 - Gender and Communication Offered yearly. The meaning of gender in our culture. Examines how gender is displayed and perpetuated through social institutions such as the media and through our private and public verbal and nonverbal interactions.	3 Credits

Investigation of policies, strategies, and procedures available to an organization in establishing and controlling its communications. Course will explore the impact of public relations and media through case studies and writing exercises.	3 Credits

	COMX 291 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	COMX 292 - Independent Study (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	COMX 311 - Family Communication Offered yearly. An examination of communication in marriage/romantic partnership, parent-child, and extended family relationships. Topics include intimacy, power, decision-making, problem solving, identity formation, and interpersonal perception.	3 Credits
	COMX 312 - Forensics/Honors (R-12) Offered every term. Preparation and participation in competitive speech and debate, including Lincoln/Douglas and Parliamentary debate. The team travels to regional competitions and hosts on-campus and intramural debates and speaking events. Up to 6 credits may apply toward a major or minor in communication studies.	1 To 3 Credits
	COMX 343 - Persuasive Speaking and Critic Offered yearly. Prereq., COMM 111A or consent of instructor. The persuasive process through the criticism and creation of speeches and other rhetorical artifacts emphasizing the role persuasion plays in creating and shaping our culture.	3 Credits
	COMX 347 - Rhetoric Nature & Environmtlsm Offered every other year. Same as ENST 377. Survey of rhetorical texts that shape public understanding of nature and environmental issues. Analysis of a range of historical and contemporary environmental texts using theoretical concepts from the rhetorical tradition.	3 Credits
	COMX 349 - Comm Consump & Climate Offered every other year. Same as CCS 349. Analyzes consumption as a communication practice, investigates discourses that promote consumption, and illuminates environmental impacts on consumption.	3 Credits
	COMX 351 - Principles of Public Relations Offered yearly. The many uses of communication in the endeavor of public relations. Communication theories and models including interpersonal communication, organizational communication, and mass communication are applied to explore the internal and external communication behavior associated with public relations.	3 Credits
	COMX 352 - Public Relations Portfolio Offered yearly. Writing documents such as press releases, fact sheets, brochures and speeches to create relationships between organizations and their publics.	3 Credits
	COMX 380 - Gender and Communication Offered yearly. The meaning of gender in our culture. Examines how gender is displayed and perpetuated through social institutions such as the media and through our private and public verbal and nonverbal interactions.	3 Credits

	COMX 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	COMX 398 - Internship (R-6) Offered autumn and spring. Preq., consent of instructor. Extended classroom experience that provides practical application of classroom learning during placements off campus. Prior approval must be obtained from the faculty supervisor and the Internship Services office. A maximum of 6 credits of Internship (398, 498) may count toward graduation. Offered C/NCR only.	1 To 6 Credits
	COMX 412 - Communication and Conflict Offered autumn and spring. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Topics include culture, power, styles, negotiation and bargaining, mediation, dissent, dispute systems, and crisis communication. Credit is not allowed for both COMM 413 and COMM 412.	3 Credits
	COMX 413 - Comm & Conflict-Writing Offered yearly. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Fulfills Upper-Division Writing requirement for Communication Studies majors. Credit is not allowed for both COMX 413 and COMX 412.	3 Credits
	COMX 414 - Comm in Personal Relationshps Offered yearly. Prerequisite, COMX 115S or consent of instructor. An examination of the functions, types, and historical context of close personal relationships with an in-depth study of the role of communication in friendships and romantic relationships.	3 Credits
	COMX 415 - Intercultural Communication Offered autumn and spring. Communication principles and processes in cross-cultural environments. Non-Western cultures are emphasized by contrasting them to Western communication norms.	3 Credits
	COMX 421 - Comm in Non-Profit Organizatns Offered yearly. Focuses on issues in nonprofit organizational communication at macro and micro levels. Topics include: organizational identity, change processes, public relations, fund-raising, advocacy, socialization, stress and burnout, board management and professionalization.	3 Credits
	COMX 422 - Communication and Technology Offered every other year. This course takes a critical look at the influence of communication technologies on organizational communication. Students will examine how the world of work is changing due to new technologies and explore the social and ethical implications of technical innovation, adoption and use.	3 Credits
	COMX 423 - Org Comm Consult Offered every year. Prerequisite, COMX 220S or consent of instructor. Not open to PCOM. Emphasis on the theoretical and practical issues involved in communication training and consultation. Overview of theoretical models followed by the "nuts and bolts" of communication training, development, and assessment. Students will carry out a training or consultation project (e.g., planning, execution, and evaluation) to sharpen the issues explored.	3 Credits

	COMX 424 - Risk Crisis & Comm Offered every other year. This course explores the communicative dynamics that both prevent and cause organizational crisis. Through case studies, the class examines how people plan, communicate and make good decisions in high-risk situations, as well as how to manage crisis public relations effectively.	3 Credits
	COMX 425 - Comm in Health Organizations Offered every other year. Not open to PCOM. This course explores the key issues at the intersection of health communication and organizational communication by considering communication processes that occur in a number of distinct contexts of health organizations. Through case studies and health campaigns students explore contemporary concerns and theory in the area of health communication.	3 Credits
	COMX 445 - Rhetorical Criticism and Theor Offered yearly. Introduction to study of rhetorical criticism and theory. Current theoretical and methodological issues and approaches including traditional criticism, experiential criticism, dramatism, narrative criticism, feminist criticism, postmodern criticism.	3 Credits
	COMX 447 - Rhetorical Constrctn of Woman Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
	COMX 449 - Rhetoric of Women's Activism Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
	COMX 460 - Research Methods Offered autumn and spring. Open only to majors in COMM. Prereq., Grade of C- or better in EDLD 486 or PSYX 222 or SOCI 202 or STAT 216. Introduction to the major types of communication research and the foundations of quantitative research methods.	3 Credits
	COMX 461 - Communication Research Seminar (R-9) Offered autumn and spring. coreq., COMX 460. Application of quantitative and qualitative research methods to specialized contexts. Emphasis on direct student involvement in research activities.	1 To 3 Credits
	COMX 485 - Communication and Health Offered yearly. Theory and research on the health correlates of human interaction.	3 Credits
	COMX 491 - Special Topics (R-9) Offered intermittently. Not open to PCOM. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 3 Credits
	COMX 492 - Independent Study (R-9) Offered every term. Prereq., consent of instructor. Offered C/NCR only.	1 To 9 Credits

Minimum Required Grade: C-	18 Total Credits Required

Statistics

Rule: Must complete 1 of the following courses

	Course	Credits
	EDU 421 - Statistical Procedures in Educ Prereq., M 115 or equiv. or consent of instr. Concepts and procedures characterizing both descriptive and inferential statistics. Awareness of common statistical errors.	3 Credits
	PSYX 222 - Psychological Statistics Offered every term. Prereq., PSYX 120; M 115, M 162 or 171. Application of statistical techniques to psychological data. Credit not allowed for both PSYX 222 and SOCI 202.	3 Credits
	SOCI 202 - Social Statistics Offered every term. Prereq., M 115, Sociology majors only, or consent of instr. Application of descriptive and inferential statistical techniques to sociological data. Required of all majors.	3 Credits
	STAT 216 - Introduction to Statistics Offered autumn and spring. Prereq., M 115 (preferred), or one of M 121, 132, 151, 162 or 171, or ALEKS placement >= 4. Introduction to major ideas of statistical inference. Emphasis is on statistical reasoning and uses of statistics.	4 Credits
Minimum Required Grade: C-		3 Total Credits Required

Communication Studies Minor

Minor - Communication Studies (Minor)

College Humanities & Sciences

Catalog Year: 2016-2017

Degree Specific Credits: 20

Required Cumulative GPA: 2.0

Note: Once admitted to earn a minor, the student must complete a minimum of 20 credits in COMX courses, with at least 9 credits in courses numbered 300 and above.

Lower Division Core Courses

Rule: Must complete all of the following:

	Course	Credits

	COMX 111A - Intro to Public Speaking Offered every term. Preparation, presentation, and criticism of speeches. Emphasis on the development of public speaking techniques through constructive criticism. Credit not allowed for both COMM 111A and COM 160A.	3 Credits
Minimum Required Grade: C-		3 Total Credits Required

Electives

Rule: Must complete 17 credits from the following:

Note: A maximum of 6 credits in COMX 312 may count toward a minor in communication studies.

	Course	Credits
	COMX 115S - Intro to Interpersonal Communc Offered autumn and spring. An overview of the process of human communication with special emphasis on analyzing communication patterns and improving interpersonal communication skills. Credit not allowed for both COMM 110S and COM 150S.	3 Credits
	COMX 140L - Intro to Visual Rhetoric Offered autumn and spring. An introduction to the persuasive nature of visual symbols as texts. Readings will include historical to contemporary rhetorical criticisms on advertising, billboards, bodies, cartoons, memorials, and photography.	3 Credits
	COMX 191 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	COMX 192 - Independent Study (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	COMX 202S - Nonverbal Communication Offered yearly. Nonverbal code systems and how they function in human communication including gestures, facial expressions, personal space, and others.	3 Credits
	COMX 204X - International & Dvlpmnt Comm Offered yearly. International Communication is concerned with information exchange across national borders while Development Communication focuses on the historical, current, and prospective role of communication technologies in social change, improving living conditions, and enhancing life prospects - mainly in developing countries.	3 Credits
	COMX 210 - Communication in Small Groups Offered autumn and spring. Theory and research related to communication roles, collaboration, cohesion, leadership, and decision-making. Experiences provided in task oriented groups and field analyses of group processes.	3 Credits

	COMX 212X - Intro to Intercultural Com Offered autumn and spring. This course provides students with an introduction to communicating across cultures. Local and global case studies and theories will be explored. Students will explore the influence of immediate communication and social media on large scale social issues.	3 Credits
	COMX 217A - Oral Interpretation of Lit Offered intermittently. Introduction to orally presenting literature to an audience. Focus is on analyzing and performing prose, drama, poetry, and children's literature to express points of view.	3 Credits
	COMX 219S - Survey of Children's Comm Offered autumn. Focus on communication processes and contemporary communication environments of children and adolescents. Topics include language development and the brain, nonverbal communication development, media, contracting, bullying, and gender.	3 Credits
	COMX 220S - Intro to Organizational Comm Offered yearly. Theory and research on communication in organizations. Focus on topics such as productivity, power, culture, socialization, technology and globalization covering a wide range of organizations including corporations, government, educational institutions, non-profit agencies and media organizations.	3 Credits
	COMX 222 - Professional Communication Offered intermittently. Explores communication skills needed in business and professional contexts. Focus on developing a working knowledge of theory and skills for interpersonal communication, group communication, and business writing. Concepts include communication processes, diversity in the workplace, nonverbal communication, technical communication, communication with customers, and employment communication.	3 Credits
	COMX 240H - Intro to Rhetorical Theory Offered yearly. An overview of rhetorical theory including an exploration of classical rhetoric, British and Continental rhetorical theory, and contemporary theories of language and persuasion.	3 Credits
	COMX 241 - Persuasive Communication Offered yearly. The use of communication in attitude and behavior change as experienced in personal, organizational, and public contexts.	3 Credits
	COMX 242 - Argumentation Offered autumn and spring on the Mountain campus, offered intermittently on the Missoula College campus. Development of argumentation skills and critical judgment in decision-making and debate. Includes criticism, construction, presentation, and refutation of spoken and written arguments.	3 Credits
	COMX 250 - Intro to Public Relations Offered autumn and spring. Introduction to the origin, scope, and nature of public relations activities. Investigation of policies, strategies, and procedures available to an organization in establishing and controlling its communications. Course will explore the impact of public relations and media through case studies and writing exercises.	3 Credits

	COMX 291 - Special Topics (R-6) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 6 Credits
	COMX 292 - Independent Study (R-6) Offered intermittently. Course material appropriate to the needs and objectives of the individual student.	1 To 6 Credits
	COMX 311 - Family Communication Offered yearly. An examination of communication in marriage/romantic partnership, parent-child, and extended family relationships. Topics include intimacy, power, decision-making, problem solving, identity formation, and interpersonal perception.	3 Credits
	COMX 312 - Forensics/Honors (R-12) Offered every term. Preparation and participation in competitive speech and debate, including Lincoln/Douglas and Parliamentary debate. The team travels to regional competitions and hosts on-campus and intramural debates and speaking events. Up to 6 credits may apply toward a major or minor in communication studies.	1 To 3 Credits
	COMX 343 - Persuasive Speaking and Critic Offered yearly. Prereq., COMM 111A or consent of instructor. The persuasive process through the criticism and creation of speeches and other rhetorical artifacts emphasizing the role persuasion plays in creating and shaping our culture.	3 Credits
	COMX 347 - Rhetoric Nature & Environmtlsm Offered every other year. Same as ENST 377. Survey of rhetorical texts that shape public understanding of nature and environmental issues. Analysis of a range of historical and contemporary environmental texts using theoretical concepts from the rhetorical tradition.	3 Credits
	COMX 349 - Comm Consump & Climate Offered every other year. Same as CCS 349. Analyzes consumption as a communication practice, investigates discourses that promote consumption, and illuminates environmental impacts on consumption.	3 Credits
	COMX 351 - Principles of Public Relations Offered yearly. The many uses of communication in the endeavor of public relations. Communication theories and models including interpersonal communication, organizational communication, and mass communication are applied to explore the internal and external communication behavior associated with public relations.	3 Credits
	COMX 352 - Public Relations Portfolio Offered yearly. Writing documents such as press releases, fact sheets, brochures and speeches to create relationships between organizations and their publics.	3 Credits
	COMX 380 - Gender and Communication Offered yearly. The meaning of gender in our culture. Examines how gender is displayed and perpetuated through social institutions such as the media and through our private and public verbal and nonverbal interactions.	3 Credits

	COMX 391 - Special Topics (R-9) Offered intermittently. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 9 Credits
	COMX 412 - Communication and Conflict Offered autumn and spring. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Topics include culture, power, styles, negotiation and bargaining, mediation, dissent, dispute systems, and crisis communication. Credit is not allowed for both COMM 413 and COMM 412.	3 Credits
	COMX 413 - Comm & Conflict-Writing Offered yearly. Conceptual and practical discussions of communication and conflict in interpersonal relationships, organizational settings and overall cultural milieu. Fulfills Upper-Division Writing requirement for Communication Studies majors. Credit is not allowed for both COMX 413 and COMX 412.	3 Credits
	COMX 414 - Comm in Personal Relationshps Offered yearly. Prerequisite, COMX 115S or consent of instructor. An examination of the functions, types, and historical context of close personal relationships with an in-depth study of the role of communication in friendships and romantic relationships.	3 Credits
	COMX 415 - Intercultural Communication Offered autumn and spring. Communication principles and processes in cross-cultural environments. Non-Western cultures are emphasized by contrasting them to Western communication norms.	3 Credits
	COMX 421 - Comm in Non-Profit Organizatns Offered yearly. Focuses on issues in nonprofit organizational communication at macro and micro levels. Topics include: organizational identity, change processes, public relations, fund-raising, advocacy, socialization, stress and burnout, board management and professionalization.	3 Credits
	COMX 422 - Communication and Technology Offered every other year. This course takes a critical look at the influence of communication technologies on organizational communication. Students will examine how the world of work is changing due to new technologies and explore the social and ethical implications of technical innovation, adoption and use.	3 Credits
	COMX 423 - Org Comm Consult Offered every year. Prerequisite, COMX 220S or consent of instructor. Not open to PCOM. Emphasis on the theoretical and practical issues involved in communication training and consultation. Overview of theoretical models followed by the "nuts and bolts" of communication training, development, and assessment. Students will carry out a training or consultation project (e.g., planning, execution, and evaluation) to sharpen the issues explored.	3 Credits
	COMX 424 - Risk Crisis & Comm Offered every other year. This course explores the communicative dynamics that both prevent and cause organizational crisis. Through case studies, the class examines how people plan, communicate and make good decisions in high-risk situations, as well as how to manage crisis public relations effectively.	3 Credits

	COMX 425 - Comm in Health Organizations Offered every other year. Not open to PCOM. This course explores the key issues at the intersection of health communication and organizational communication by considering communication processes that occur in a number of distinct contexts of health organizations. Through case studies and health campaigns students explore contemporary concerns and theory in the area of health communication.	3 Credits
	COMX 445 - Rhetorical Criticism and Theor Offered yearly. Introduction to study of rhetorical criticism and theory. Current theoretical and methodological issues and approaches including traditional criticism, experiential criticism, dramatism, narrative criticism, feminist criticism, postmodern criticism.	3 Credits
	COMX 447 - Rhetorical Constrctn of Woman Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
	COMX 449 - Rhetoric of Women's Activism Offered every other year. Explores the rhetoric surrounding contemporary women's social "activism" in the U.S. Topics include women's rights, women's liberation, consciousness raising as a rhetorical form, reproductive rights, sexuality, and intersections between gender, race, and class.	3 Credits
	COMX 460 - Research Methods Offered autumn and spring. Open only to majors in COMM. Prereq., Grade of C- or better in EDLD 486 or PSYX 222 or SOCI 202 or STAT 216. Introduction to the major types of communication research and the foundations of quantitative research methods.	3 Credits
	COMX 461 - Communication Research Seminar (R-9) Offered autumn and spring. coreq., COMX 460. Application of quantitative and qualitative research methods to specialized contexts. Emphasis on direct student involvement in research activities.	1 To 3 Credits
	COMX 485 - Communication and Health Offered yearly. Theory and research on the health correlates of human interaction.	3 Credits
	COMX 491 - Special Topics (R-9) Offered intermittently. Not open to PCOM. Experimental offerings of visiting professors, experimental offerings of new courses, or one-time offerings of current topics.	1 To 3 Credits
	COMX 492 - Independent Study (R-9) Offered every term. Prereq., consent of instructor. Offered C/NCR only.	1 To 9 Credits
Minimum Required Grade: C-		17 Total Credits Required

Computer Science Department

Andrew Ware, Chair

Travis Wheeler, Assistant Chair

The growing utility of computers in research and education, as well as the increased impact of computers on our modern society, strongly implies that knowledge of computers and their capabilities should be a part of the basic education of all students. The courses listed below are designed to provide the student with this knowledge and to prepare the student for a career in a field in which there is a growing need for trained personnel. The objective of the undergraduate curriculum in computer science is to develop professionally competent, broadly educated computer scientists who wish to pursue professional careers or graduate studies.

The B.S. program is accredited by the Computing Accreditation Commission of ABET. For more information, access the Computer Science Department homepage or email the chair Andrew Ware.

High School Preparation: In addition to general University admission requirements, pre-college preparation should include as many computer science courses as possible, and four years of high school mathematics, to include algebra, trigonometry and pre-calculus. Also recommended are physics, chemistry and biology.

»Admission Requirements

Admission to computer science courses varies according to course level and other departmental standards. However, students must have completed all prerequisite courses with a grade of at least a "C-".

Lower-Division Courses

Most 100- and 200-level courses are open on a first-come, first-served basis to all students who have the prerequisites.

Upper-Division Courses

Admission to 300-level or above courses requires successful completion of the prerequisites.

Major-Minor Status

Completed change of major forms along with college transcripts must be turned in to the department when declaring computer science as a major or minor.

Department Faculty

Professor

Jesse Johnson, Professor
Yolanda Reimer, Professor
Andrew Ware, Professor

Assistant Professor

Rob Smith, Assistant Professor
Travis Wheeler, Assistant Professor, Assistant Chair of Computer Science

Lecturer

Michael Cassens, Lecturer
Patricia Duce, Lecturer
Mike O'Conner, Lecturer, Undergraduate Advisor

Research Faculty

Dave Opitz, Research Professor
Orest Pilskalns, Research Professor
Douglas Raiford, Research Professor

Emeritus

Ray Ford, Emeritus Professor
Alden Wright, Emeritus Professor

Computer Applications

Back to Top

- CAPP 171 - Communicating via Computers

  Credits: 3. Offered intermittently. Prereq., previous computer experience or consent of instr. The use of the computer for information presentation and communication; emphasis placed on the use of electronic resources for the access, management, and presentation of information. Students taking CS classes with computer programming components should expect to use additional computer lab time outside of class.

Computer Science/Programming

Back to Top

- CSCI 100 - Intro to Programming

  Credits: 3. Offered autumn and spring. This course covers basic programming concepts such as variables, data types, iteration, flow of control, input/output, functions, and objects. The course will also cover programming ideas such as data structures, algorithms, modularity, and debugging. Students will learn about the role computation can play in solving problems by writing interesting programs to solve useful goals. No prior programming experience is expected. (Two hours independent lab per week.) Credit not allowed for both CSCI 100 and CSCI 110.

- CSCI 105 - Computer Fluency
